The original design of Illuminism was undoubtedly the elevation of the human race. Knigge, who was one of its most prominent working members, and the author of several of its degrees, was a religious man, and would never have united with it had its object been, as has been charged, to abolish Christianity. But it cannot be denied, that in process of time abuses had crept into the Institution, and that by the influence of unworthy men the system became corrupted; yet the coarse accusations of such writers as Barruel and Robison are known to be exaggerated, and some of them altogether false. The *Conversations-Lexicon*, for instance, declares that the society had no influence whatever on the French Revolution, which is charged upon it by these as well as other writers.

But Illuminism came directly and professedly in conflict with the Jesuits and with the Roman Church, whose tendencies were to repress the freedom of thought. The priests became, therefore, its active enemies, and waged war so successfully against it, that on June 22, 1784, the Elector of Bavaria issued an edict for its suppression. Many of its members were fined or imprisoned, and some, among whom was Weishaupt, were compelled to flee the country. The edicts of the Elector of Bavaria were repeated in March and August, 1785, and the Order began to decline, so that by the end of the last century it had ceased to exist. Adopting Masonry only as a means for its own more successful propagation, and using it only as incidental to its own organization, it exercised while in prosperity no favorable influence on the Masonic Institution, nor any unfavorable effect on it by its dissolution.

Illuminati of Avignon. See *Avignon, Illuminati of.*

Illuminati of Stockholm. An Order but little known; mentioned by Ragon in his *Catalogue* as having been instituted for the propagation of Martinism.

Illuminism. The system or Rite practised by the German Illuminati is so called.

Illustrious. A title given in the Ancient and Accepted Scottish Rite to all those who possess the Thirty-second or Thirty-third Degree.

Illustrious Elect of the Fifteen. The title now generally given to the *Elect of Fifteen*, which see.

Imaum. The appellation given to the most honored teacher of Mohammedanism. The title of the Sultan, as the spiritual chief of all Moslems.

Imitative Societies. A title sometimes given to those secret societies which, imitating the general organization of Freemasonry, differ from it entirely in their character and object. Such, in the last century, when at one time they abounded, were the Bucks, the Sawyers, the Gormogons, and the Gregorians; and, in the present century, the Odd Fellows, the Good Templars, and the Knights of Pythias. Most of them imitate the Masons in their external appearance, such as the wearing of aprons, collars, and jewels, and in calling their places of meeting, by a strange misnomer, Lodges. But in these points is their only resemblance to the original Institution.

Immanuel. A Hebrew word signifying "God with us," from עִמָּנוּ, *immanu*, "with us," and אֵל, *el*, "God." It was the symbolical name given by the prophet Isaiah to the child who was announced to Ahaz and the people of Judah as the sign which God would give of their deliverance from their enemies, and afterward applied by the Apostle Matthew to the Messiah born of the Virgin. As one of the appellations of Christ, it has been adopted as a significant word in modern Templarism, where, however, the form of *Emanuel* is most usually employed.

Immaterialism. A doctrine relating to the quality of God and of the human soul, showing that He forms an absolute contrast to matter, and is the basis of the qualities of eternity, omnipotence, and unchangeableness. The immateriality of the soul includes simplicity as another of its qualities.

Immortality of the Soul. Very wisely has Max Müller said (*Chips*, i., 45) that "without a belief in personal immortality, religion is surely like an arch resting on one pillar, like a bridge ending in an abyss"; and he cites passages from the Vedas to show that to the ancient Brahmans the idea was a familiar one. Indeed, almost all the nations of the earth with whose religious faith we are acquainted recognize the dogma, although sometimes in vague and, perhaps, materialistic forms.

It was the professed teaching of the Ancient Mysteries, where, in the concluding rites of their initiation, the restoration of the hero of their legend was a symbol of the immortal life. So, too, the same doctrine is taught by a similar legendary and symbolic method in the Third Degree of Masonry.

Archdeacon Mant thus describes the differences, in the teaching of this doctrine of immortality, between what he calls, after the school of Oliver, the spurious and the true Freemasonry:

"Whereas the heathens had taught this doctrine only by the application of a fable to their purpose, the wisdom of the pious Grand Master of the Israelitish Masons took advantage of a real circumstance, which would more forcibly impress the sublime truths he intended to inculcate upon the minds of all brethren."

It will be doubted by some of our modern skeptics whether the Hiramic myth is entitled to more authenticity as an historic narrative than the Osiric or the Dionysian; but it will not be denied that, while they all taught the same dogma of immortality, the method of teaching by symbolism was in all the same.

Immovable Jewels. See *Jewels of a Lodge.*

Implements. The Operative Freemasons of the Middle Ages gave to certain of their implements—the most important of which were the square, the compasses, the stone-hammer, or gavel, and the foot-rule—a special symbolic meaning. When the Operative Institution was merged in the Speculative, the custom of thus spiritualizing, as it was called, these implements was continued; but the system of symbolic instruction has been so greatly enlarged and improved as to constitute, in fact, the characteristic feature of modern Freemasonry—a feature which widely distinguishes it from all other societies, whether secret or open. Thus, the twenty-four-inch gage and gavel are bestowed upon the Entered Apprentice because these are the implements used in the quarries in hewing the stones and fitting them for the builder's use, an occupation which, for its simplicity, is properly suited to the unskilled apprentice. The square, level, and plumb are employed in the still further preparation of these stones and in adjusting them to their proper positions. This is the labor of the craftsmen, and hence to the Fellow-Craft are they presented. But the work is not completed until the stones thus adjusted have been accurately examined by the master workman, and permanently secured in their places by cement. This is accomplished by the trowel, and hence this implement is entrusted to the Master Mason. Thus, the tools attached to each degree admonish the Mason, as an Apprentice, to prepare his mind for the reception of the great truths which are hereafter to be unfolded to him; as a Fellow-Craft, to mark their importance and adapt them to their proper uses; and as a Master, to adorn their beauty by the practise of brotherly love and kindness, the cement that binds all Masons in one common Fraternity.

There is no doubt, as Findel says (*Hist.*, p. 68), that the stone-masons were not the first who symbolized the implements of their craft. But they had reason, above all other gilds, for investing them with a far higher worth, and associating them with a spiritual meaning, on account of the sacred calling to which they were devoted. By the erection of churches, the Master Mason not only perpetuated his own name, but assisted in giving glory to God, in spreading the knowledge of Christianity, and in stimulating to the practise of the Christian virtues. And hence the church-building Masons naturally gave a more sacred signification in their symbolism to the implements employed in such holy purposes. And thus it was that they transmitted to their successors, the Speculative Masons, the same sacred interpretation of their symbols. Modern Freemasonry has been derived from an association of church architects, and this accounts for the religious character of its symbolism. Had it been the offspring of the Templars, as Ramsay contends, its symbolism would have been undoubtedly military, somewhat like that employed by St. Paul in his epistle to the Ephesians.

Impost. The point where an arch rests on a wall or column. Husenbeth says *imposts* were "members of a secret society of Tyrian artists who were hired by King Solomon to erect the temple, in order to distinguish them from the Jews, who performed the more humble labors, were honored with the epithet of *free* annexed to the name of builder or Mason, and, being talented foreigners, were freed from the usual imposts paid to the state by the subjects of Solomon."

Impostors. Impostors in Masonry may be either profanes who, never having been initiated, yet endeavor to pass themselves for regular Freemasons, or Masons who, having been expelled or suspended from the Order, seek to conceal the fact and still claim the privileges of members in good standing. The false pretensions of the former class are easily detected, because their real ignorance must after a proper trial become apparent. The latter class, having once been invested with the proper instructions, can stand the test of an examination; and their true position must be discovered only by information derived from the Lodges which have suspended or expelled them. The Tiler's oath is intended to meet each of these cases, because it requires every strange visitor to declare that he has been lawfully initiated, and that he is in good standing. But perjury added to imposture will easily escape this test. Hence the necessity for the utmost caution, and therefore the Charges of 1722 say, "You are cautiously to examine a strange brother in such a method as prudence shall direct you, that you may not be imposed on by an ignorant false pretender, whom you are to reject with contempt and derision, and beware of giving him any hints of knowledge." (*Constitutions*, 1723, p. 55.) The Masonic rule is, that it is better that ninety and nine true brethren be rejected than that one impostor be admitted.

In Activity. When a Lodge is performing all its duties and functions, and is regularly represented in the Grand Lodge, it is said to be *in activity*, in contradistinction to a Lodge which has ceased to work or hold communications, which is said to be *dormant*.

Inauguration. A word applied by the ancient Romans to the ceremony by which, after the *augurs* had been consulted, some thing or person was solemnly consecrated. The consecration of a Master of a Lodge to his office, which is equivalent to the ancient inauguration of a priest or king, is in Masonic language called an *Installation*, which see.

Incense. The use of incense as a part of the Divine worship was common to all the nations of antiquity. Among the Hebrews, the Egyptians, and the Hindus it seems to have been used for no other purposes; but the Persians burnt it also before the king. The Roman Catholic Church has borrowed the usage from the ancients; and the burning of incense in certain sacred rites is also practised in Masonry, especially in the high degrees.

In Scripture, incense is continually spoken of, both in the Old and the New Testaments, as a symbol of prayer. Thus the Psalmist says (cxli. 2), "Let my prayer be set before thee as incense." It has in Masonry a similar signification; and hence the pot of incense has been adopted as a symbol in the Third Degree, typifying the pure heart from which prayers and aspirations arise, as incense does from the pot or incensorium, as an acceptable sacrifice to the Deity.

Incense, Regulations for Use of. From the Talmud we learn that the mixture of the perfume of incense was composed of balm, mycha, galbanum, frankincense, of each an equal weight, viz., 70 manehs; myrrh, cassia, spikenard, and saffron, of each an equal weight, 16 manehs; costus, 12 manehs; the rind of an odoriferous tree, 3 manehs; cinnamon, 9 manehs; soap of Carsina, 9 kabs; wine of capers, 3 seahs and 3 kabs, and if caper wine could not be had, strong white wine was substituted for it; salt of Sodom, the fourth part of a kab, and of an herb called maa-a-lay o-shon, a small quantity. Rabbi Nathan said a small quantity of the amber of Jordan. If honey was mixed with it, it was profane; and if it was deficient in any one of its ingredients, the priest was accounted worthy of death.

Rabbi Simeon, the son of Gamliel, says that the balm issues from an incision in the tree called balsamon. The soap of Carsina was to refine the omycha, that it might have a handsome appearance. The wine of capers was brought to soak the cloves or mycha therein, that it might become hard. And though the "water from the feet" was proper for the purpose, yet it was not used because it was not decent to bring it into the temple.

Inchoate Lodges. From the Latin, *inchoatus*, unfinished, incomplete. Lodges working under the dispensation of the Grand Master are said to be "inchoate" or incomplete, because they do not possess all the rights and prerogatives that belong to a Lodge working under the Warrant of constitution of a Grand Lodge. The same term is applied to Chapters which work under the dispensation of a Grand High Priest. (See *Lodges*.)

Incommunicable. The Tetragrammaton, so called because it was not common to, and could not be bestowed upon, nor shared by, any other being. It was proper to the true God alone. Thus Drusius (*Tetragrammaton, sive de Nomine Dei proprio*, p. 108) says, "Nomen quatuor literarum proprie et absolute non tribui nisi Deo vero. Unde doctores catholici dicunt *incommunicabile* [not common] esse creaturæ."

That is: "The name of four letters, which is not to be attributed, properly and absolutely, except to the true God. Whence the Catholic doctors say that it is *incommunicable*, not common to or to be shared by any creature." Oliver, in his *Symbolic Dictionary*, commits a curious blunder in supposing that the Incommunicable Name is the Name not to be communicated to or pronounced by anyone; thus incorrectly confounding the words *incommunicable* and *ineffable*. Although the two epithets are applied to the same name, yet the qualities of incommunicability and ineffability are very different.

Incorporation. By an act of incorporation, the supreme legislature of a country creates a corporation or body politic, which is defined by Mr. Kyd (*Corp.*, i., 13) to be "a collection of many individuals united in one body, under a special denomination, having perpetual succession under an artificial form, and vested by the policy of the law with a capacity of acting in several respects as an individual, particularly of taking and granting property, contracting obligations, and of suing and being sued; of enjoying privileges and immunities in common, and of exercising a variety of political rights." Some Grand Lodges in America are incorporated by act of the General Assembly of their respective States; others are not, and these generally hold their property through Trustees. In 1768, an effort was made in the Grand Lodge of England to petition Parliament for incorporation, and after many discussions the question was submitted to the Lodges; a large majority of whom having agreed to the measure in 1772, a bill was introduced in Parliament by the Deputy Grand Master, but, being approved on its second reading, at the request of several of the Fraternity, who had petitioned the House against it, it was withdrawn by the mover, and thus the design of an incorporation fell to the ground. Perhaps the best system of Masonic incorporation in existence is that of the Grand Lodge of South Carolina. There the act, by which the Grand Lodge was incorporated, in 1817, delegates to that body the power of incorporating its subordinates; so that a Lodge, whenever it receives from the Grand Lodge a Warrant of constitution, acquires thereby at once all the rights of a corporate body, which it ceases to exercise whenever the said Warrant is revoked by the Grand Lodge.

Objections have been made to the incorporation of Lodges in consequence of some of the legal results which would follow. An incorporated Lodge becomes subject to the surveillance of the courts of law, from which an unincorporated Lodge is exempt. Thus, a Mason expelled by an unincorporated Lodge must look for his redress to the Grand Lodge alone. But if the Lodge be incorporated, he may apply to the courts for a restoration of his franchise as a member. Masonic discipline would thus be seriously affected. The objection to incorporation is, it seems, founded on good reasons.

Increase of Wages. (*Augmentation de gages.*) To ask for an increase of wages, is, in the technical language of French Masonry, to apply for advancement to a higher degree.

Indefeasible. Unavoidable, that which cannot be voided or taken away. The word is thus used in the second of the Charges of 1722, where, speaking of a brother who has been guilty of treason or rebellion, it is, said that he cannot for this cause be expelled from

the Lodge, and that "his relation to it remains *indefeasible.*" (*Constitutions*, 1723, p. 50.) It is a law term, which is usually applied to an estate or right which cannot be defeated.

Indelibility. The indelibility of the Masonic character, as expressed in the often-repeated maxim, "once a Mason, always a Mason," is universally admitted. That is to say, no voluntary or even forced withdrawal from the Order can cancel certain obligations which have been contracted, and place the person withdrawing in precisely the same relative position toward the Institution that he had occupied before his initiation.

Indented Tarsel. In the old rituals these words were used for what is now called the tessellated border. (See *Tarsel.*)

Indented Tessel. The ornamented border which surrounds the Mosaic pavement. (See *Tessellated Border.*)

India. In 1728, Lord Kingston, Grand Master of England, granted a Deputation to George Pomfret, Esq., for Bengal, in the East Indies, but no action seems to have been taken, under that authority, until 1730, in which year a Lodge meeting at The East India Arms, Fort William, No. 72, was established at Calcutta; and this may therefore be considered as the era of the introduction of Freemasonry into India. The next was established at Madras in 1752; a third at Bombay in 1758; and a fourth at Calcutta in 1761. From that time Masonry made rapid progress in India, and in 1779 there was scarcely a town of importance in Hindustan in which there was not a Lodge. The dissensions of the Ancients and the Moderns, which commenced in England in 1751, unhappily spread to India, but all differences were reconciled in 1786, by the establishment of a Provincial Grand Lodge, of which Brigadier-General Horne was appointed Provincial Grand Master by the Duke of Cumberland. Templarism and Royal Arch Masonry were subsequently introduced, Chapters and Commanderies are now in successful operation.

Indian Calendar. The Indian or Hindu year begins in April, thus: 1st Vaisakha, 13th April; 1st Jyaishtha, 14th May; 1st Ashadha, 14th June; 1st Sravana, 16th July; 1st Bhadrapada, 16th August; 1st Asvina, 16th September; 1st Kartlika, 17th October; 1st Agrahayana or Margasirsha, 16th November; 1st Pansha, 15th December; 1st Magha, 13th January; 1st Phalguna, 12th February; 1st Caitra, 13th March. The days of the week, commencing with Sunday, are Aditya, Soma, Mangala, Budha, Guru, Sukra, and Sani. The Hindu era, until April 13, 1885, was 1937.

Indian Faith. See *Buddhism.*

Indiana. Freemasonry was introduced into the Territory now known as the State of Indiana as early as 1795, by those connected with Army Lodges on the northwest frontier, but the first Lodge organized was the Vincennes Lodge, No. 15, at Vincennes, which was constituted under a Warrant granted by the Grand Lodge of Kentucky. Five other Lodges were subsequently chartered by the same authority. On December 3, 1817, a convention assembled at Corydon, at which were present the representatives of six chartered Lodges, and two under dispensation from Kentucky, and one under dispensation from Ohio. The convention, having taken the preliminary steps, adjourned to meet at Madison on January 12, 1818, on which day the Grand Lodge was organized.

The Grand Chapter was established in 1845; the Grand Commandery on May 16, 1854, and the Grand Council of Royal and Select Masters on December 11, 1855.

Indifferents. A secret society of men and women established in Paris, in 1738, in imitation of Freemasonry. The object of the society was to protect its members from the influence of love, and hence it wore, as an appropriate device, a jewel representing an icicle.

Indische Mysterien. Indian Mysteries. In the German Cyclopædia we find the following: "The East Indians have still their mysteries, which it is very probable they received from the ancient Egyptians. (?) These mysteries are in the possession of the Brahmans, and their ancestors were the ancient Brachmen.

"It is only the sons of these priests who are eligible to initiation. Had a grown-up youth of the Brachmen sufficiently hardened his body, learned to subdue his passions, and given the requisite proofs of his abilities at school, he must submit to an especial proof of his fortitude before he was admitted into the mysteries, which proofs were given in a cavern. A second cavern in the middle of a high hill contained the statues of nature, which were neither made of gold, nor of silver, nor of earth, nor of stone, but of a very hard material resembling wood, the composition of which was unknown to any mortal.

"These statues are said to have been given by God to his Son, to serve as models by which he might form all created beings. Upon the crown of one of these statues stood the likeness of Bruma, who was the same with them as Osiris was with the Egyptians. The inner part, and the entrance also into this cavern, was quite dark, and those who wished to enter into it were obliged to seek the way with a lighted torch. A door led into the inner part, on the opening of which the water that surrounded the border of the cavern broke loose.

"If the candidate for initiation was worthy, he opened the door quite easily, and a spring of the purest water flowed gently upon him and purified him. Those, on the contrary, who were guilty of any crime, could not open the door; and if they were candid, they confessed their sins to the priest, and besought him to turn away the anger of the gods by prayer and fasting.

"In this cavern, on a certain day, the Brachmen held their annual assembly. Some of them dwelt constantly there; others came there only in the spring and harvest—conversed with each other upon the doctrines con-

tained in their mysteries, contemplated the hieroglyphics upon the statues, and endeavored to decipher them. Those among the initiated who were in the lowest degrees, and who could not comprehend the sublime doctrines of one God, worshiped the sun and other inferior divinities. This was also the religion of the common people. The Brahmans, the present inhabitants of India, those pure descendants of the ancient Brachmen, do not admit any person into their mysteries without having first diligently inquired into his character and capabilities, and duly proved his fortitude and prudence. No one could be initiated until he had attained a certain age; and before his initiation the novice had to prepare himself by prayer, fasting, and almsgiving, and other good works, for many days.

"When the appointed day arrived he bathed himself and went to the Guru, or chief Brahman, who kept one of his own apartments ready in which to perform this ceremony. Before he was admitted he was asked if he earnestly desired to be initiated?—if it was not curiosity which induced him to do so?—if he felt himself strong enough to perform the ceremonies which would be prescribed to him for the whole of his life, without the exception of a single day?

"He was at the same time advised to defer the ceremony for a time, if he had not sufficient confidence in his strength. If the youth continued firm in his resolution, and showed a zealous disposition to enter into the paths of righteousness, the Guru addressed a charge to him upon the manner of living, to which he was about to pledge himself for the future. He threatened him with the punishment of heaven if he conducted himself wickedly; promised him, on the contrary, the most glorious rewards if he would constantly keep the path of righteousness. After this exhortation, and having received his pledge, the candidate was conducted to the prepared chamber, the door of which stood open, that all those who assembled might participate in the offering about to be made.

"Different fruits were thrown into the fire, while the High Priest, with many ceremonies, prayed that God might be present with them in that sacred place. The Guru then conducted the youth behind a curtain, both having their heads covered, and then gently pronounced into his ear a word of one or two syllables, which he was as gently to repeat into the ear of the Guru, that no other person might hear it. In this word was the prayer which the initiated was to repeat as often as he could for the whole day, yet in the greatest stillness and without ever moving the lips. Neither durst he discover this sacred word unto any person. No European has ever been able to discover this word, so sacred is this secret to them. When the newly initiated has repeated this command several times, then the chief Brahman instructs him in the ceremonies, teaches him several songs to the honor of God, and finally dismisses him with many exhortations to pursue a virtuous course of life." (See *Pitris.*)

Induction. 1. The Master of a Lodge, when installed into office, is said to be inducted into the Oriental Chair of King Solomon. The same term is applied to the reception of a candidate into the Past Master's Degree. The word is derived from the language of the law, where the giving a clerk or parson possession of his benefice is called his induction. 2. Induction is also used to signify initiation into the degree called Thrice Illustrious Order of the Cross.

Inductor. The Senior and Junior Inductors are officers in a Council of the Thrice Illustrious Order of the Cross, corresponding to the Senior and Junior Deacons.

Industry. A virtue inculcated amongst Masons, because by it they are enabled not only to support themselves and families, but to contribute to the relief of worthy distressed brethren. "All Masons," say the Charges of 1722, "shall work honestly on working days that they may live creditably on holy days." (*Constitutions*, 1723, p. 52.) The Masonic symbol of industry is the beehive, which is used in the Third Degree.

Ineffable Degrees. From the Latin word, *ineffabilis*, that which can not or ought not to be spoken or expressed. The degrees from the Fourth to the Fourteenth inclusive, of the Ancient and Accepted Scottish Rite, which are so called because they are principally engaged in the investigation and contemplation of the Ineffable name.

Ineffable Name. It was forbidden to the Jews to pronounce the Tetragrammaton or sacred name of God; a reverential usage which is also observed in Masonry. Hence the Tetragrammaton is called the Ineffable Name. As in Masonry, so in all the secret societies of antiquity, much mystery has been attached to the Divine Name, which it was considered unlawful to pronounce, and for which some other word was substituted. Adonai was among the Hebrews the substitute for the Tetragrammaton.

Ineffable Triangle. The two triangles incrusted one upon the other, containing the Ineffable Name in Enochian characters, represented in the Eleventh of the Ineffable series. Good and evil, light and darkness, life and death, are here not wanting in symbolism, foreshadowing the philosophic degrees, and furnishing the true original of the two interlaced triangles adopted in modern Masonry. (See *Enochian Alphabet.*)

Ineligible. Who are and who are not ineligible for initiation into the mysteries of Freemasonry is treated of under the head of *Qualifications of Candidates*, which see.

Information, Lawful. One of the modes of recognizing a stranger as a true brother, is from the "lawful information" of a third party. No Mason can lawfully give in-

formation of another's qualifications unless he has actually tested him by the strictest trial and examination, or knows that it has been done by another. But it is not every Mason who is competent to give "lawful information." Ignorant and unskilful brethren cannot do so, because they are incapable of discovering truth or of detecting error. A "rusty Mason" should never attempt to examine a stranger, and certainly, if he does, his opinion as to the result is worth nothing. If the information given is on the ground that the party who is vouched for has been seen sitting in a Lodge, care must be taken to inquire if it was a "just and legally constituted Lodge of Master Masons." A person may forget from the lapse of time, and vouch for a stranger as a Master Mason, when the Lodge in which he saw him was only opened in the First or Second Degree. Information given by letter, or through a third party, is irregular. The person giving the information, the one receiving it, and the one of whom it is given, should all be present at the same time, for otherwise there would be no certainty of identity. The information must be positive, not founded on belief or opinion, but derived from a legitimate source. And, lastly, it must not have been received casually, but for the very purpose of being used for Masonic purposes. For one to say to another, in the course of a desultory conversation, "A. B. is a Mason," is not sufficient. He may not be speaking with due caution, under the expectation that his words will be considered of weight. He must say something to this effect: "I know this man to be a Master Mason, for such or such reasons, and you may safely recognize him as such." This alone will insure the necessary care and proper observance of prudence.

Inherent Rights of a Grand Master. This has been a subject of fertile discussion among Masonic jurists, although only a few have thought proper to deny the existence of such rights. Upon the theory which, however recently controverted, has very generally been recognized, that Grand Masters existed before Grand Lodges were organized, it must be evident that the rights of a Grand Master are of two kinds—those, namely, which he derives from the Constitution of a Grand Lodge of which he has been made the presiding officer, and those which exist in the office independent of any Constitution, because they are derived from the landmarks and ancient usages of the Craft. The rights and prerogatives which depend on and are prescribed by the Constitution may be modified or rescinded by that instrument. They differ in different jurisdictions, because one Grand Lodge may confer more or less power upon its presiding officer than another; and they differ at different times, because the Constitution of every Grand Lodge is subject, in regard to its internal regulations, to repeated alteration and amendment. These may be called the accidental rights of a Grand Master, because they are derived from the accidental provisions of a Grand Lodge, and have in them nothing essential to the integrity of the office. It is unnecessary to enumerate them, because they may be found in varied modifications in the Constitutions of all Grand Lodges. But the rights and prerogatives which Grand Masters are supposed to have possessed, not as the presiding officers of an artificial body, but as the rulers of the Craft in general, before Grand Lodges came into existence, and which are dependent, not on any prescribed rules which may be enacted to-day and repealed to-morrow, but on the long-continued usages of the Order and the concessions of the Craft from time out of mind, inhere in the office, and cannot be augmented or diminished by the action of any authority, because they are landmarks, and therefore unchangeable. These are called the *inherent rights* of a Grand Master. They comprise the right to preside over the Craft whenever assembled, to grant dispensations, and, as a part of that power, to make Masons at sight.

In Hoc Signo Vinces. On the Grand Standard of a Commandery of Knights Templar these words are inscribed over "a blood-red Passion Cross," and they constitute in part the motto of the American branch of the Order. Their meaning, "by this sign thou shalt conquer," is a substantial, but not literal, translation of the original Greek, *ἐν τουτῳ νίκα*. For the origin of the motto, we must go back to a well-known legend of the Church, which has, however, found more doubters than believers among the learned. Eusebius, who wrote a life of Constantine, says that while the emperor was in Gaul, in the year 312, preparing for war with his rival, Maxentius, about the middle hours of the day, as the sun began to verge toward its setting, he saw in the heavens, with his own eyes, the sun surmounted with the trophy of the cross, which was composed of light, and a legend annexed, which said *"by this conquer."* This account Eusebius affirms to be in the words of Constantine. Lactantius, who places the occurrence at a later date and on the eve of a battle with Maxentius, in which the latter was defeated, relates it not as an actual occurrence, but as a dream or vision; and this is now the generally received opinion of those who do not deem the whole legend a fabrication. On the next day Constantine had an image of this cross made into a banner, called the *labarum*, which he ever afterward used as the imperial standard. Eusebius describes it very fully. It was not a Passion Cross, such as is now used on the modern Templar standard, but the monogram of Christ. The shaft was a very long spear. On the top was a crown composed of gold and precious stones, and containing the sacred symbol, namely, the Greek letter *rho* or P, intersected by the *chi* or X, which two letters are the first and second of the name ΧΡΙΣΤΟΣ, or CHRIST. If, then, the Tem-

plars retain the motto on their banner, they should, for the sake of historical accuracy, discard the Passion Cross, and replace it with the Constantinian Chronogram, or Cross of the Labarum. But the truth is, that the ancient Templars used neither the Passion Cross, nor that of Constantine, nor yet the motto *in hoc signo vinces* on their standard. Their only banner was the black and white Beauseant, and at the bottom of it was inscribed their motto, "Non nobis Domine, non nobis, sed nomini tuo da gloriam "—*not unto us, O Lord, not unto us, but unto thee give the glory.* This was the song or shout of victory sung by the Templars when triumphant in battle.

In Memoriam. Latin. As a memorial. Words frequently placed at the heads of pages in the transactions of Grand Lodges on which are inscribed the names of brethren who have died during the past year. The fuller phrase, of which they are an abbreviated form, is "In perpetuam rei memoriam," *As a perpetual memorial of the event.* Words often inscribed on pillars erected in commemoration of some person or thing.

Inigo Jones MS. R. F. Gould (*History of F. M.*, vol. i., p. 63) informs us that this MS. was published only in the *Masonic Magazine*, July, 1881. A very curious folio MS., ornamented title and drawing by Inigo Jones, old red morocco, gilt leaves, dated 1607, was sold by Puttick & Simpson, November 12, 1879, and described as "The Ancient Constitutions of the Free and Accepted Masons." The late Bro. Woodford became its possessor, who mentions it as "a curious and valuable MS. *per se*, not only on account of its special verbiage, but because it possesses a frontispiece of Masons at work, with the words 'Inigo Jones delin.' at the bottom. It is also highly ornamented throughout, both in the capital letters and with 'finials.' It is of date 1607. . . . It is a peculiarly interesting MS. in that it differs from all known transcripts in many points, and agrees with no one copy extant." Bro. Gould remarks, "This, one of the latest 'discoveries,' is certainly to be classed amongst the most valuable of existing versions of our manuscript 'Constitutions.'" It is now the property of the Provincial Grand Lodge of Worcestershire, and has been reproduced by the Quatuor Coronati Lodge. It was probably a copy of a much earlier MS., and is considered to belong to the latter half of the seventeenth century, and never to have belonged to Inigo Jones.

Initiate. (*Initiatus.*) 1. The Fifth and last degree of the Order of the Temple; 2. The Eleventh Degree of the Rite of Philalethes; 3. The candidate in any of the degrees of Masonry is called an Initiate.

Initiate in the Egyptian Secrets. The Second Degree in the Rite of African Architects.

Initiate in the Mysteries. The Twenty-first Degree in the Metropolitan Chapter of France.

Initiate in the Profound Mysteries. The Sixty-second Degree of the collection of the Metropolitan Chapter of France.

Initiate into the Sciences, The. Bro. Kenneth Mackenzie, in the *Royal Masonic Cyclopædia*, informs us that this is the title of the Second Degree of a Masonic system founded on the doctrines and principles of Pythagoras.

Initiated Knight and Brother of Asia. The Thirty-second Degree of the Order of Initiated Brothers of Asia. (See *Asia, Initiated Knights and Brothers of.*)

Initiation. A term used by the Romans to designate admission into the mysteries of their sacred and secret rites. It is derived from the word *initia*, which signifies the first principles of a science. Thus Justin (*Lib.* xi., c. 7) says of Midas, King of Phrygia, that he was initiated into the mysteries by Orpheus. "Ab Orpheo sacrorum solemnibus initiatus." The Greeks used the term Μυσταγωνία, from μυστηριον, a mystery. From the Latin, the Masons have adopted the word to signify a reception into their Order. It is sometimes specially applied to a reception into the First Degree, but he who has been made an Entered Apprentice is more correctly said to be *Entered.* (See *Mysteries.*)

Inner Guard. An officer of a Lodge, according to the English system, whose functions correspond in some particulars with those of the Junior Deacon in the American Rite. His duties are to admit visitors, to receive candidates, and to obey the commands of the Junior Warden. This officer is unknown in the American system.

Inner Order. Name of the sixth grade of Von Hund's Templar system.

Innovations. There is a well-known maxim of the law which says *Omnis innovatio plus novitate perturbat quam utilitate prodest*, that is, every innovation occasions more harm and disarrangement by its novelty than benefit by its actual utility. This maxim is peculiarly applicable to Freemasonry, whose system is opposed to all innovations. Thus Dr. Dalcho says, in his *Ahiman Rezon* (p. 191), "Antiquity is dear to a Mason's heart; innovation is treason, and saps the venerable fabric of the Order." In accordance with this sentiment, we find the installation charges of the Master of a Lodge affirming that "it is not in the power of any man or body of men to make innovations in the body of Masonry."

By the "body of Masonry" is here meant, undoubtedly, the landmarks, which have always been declared to be unchangeable. The non-essentials, such as the local and general regulations and the lectures, are not included in this term. The former are changing every day, according as experience or caprice suggests improvement or alteration. The most important of these changes in this country has been the abolition of the Quarterly Communications of the Grand Lodge, and the substitution for

them, except, perhaps, in a single State, of an Annual Communication. But, after all, this is, perhaps, only a recurrence to first usages; for, although Anderson says that in 1717 the Quarterly Communications "were revived," there is no evidence extant that before that period the Masons ever met except once a year in their "General Assembly." If so, the change in 1717 was an innovation, and not that which has almost universally prevailed in America.

The lectures, which are but the commentaries on the ritual and the interpretation of the symbolism, have been subjected, from the time of Anderson to the present day, to repeated modifications.

But notwithstanding the repugnance of Masons to innovations, a few have occurred in the Order. Thus, on the formation of the Grand Lodge of Ancients, as they called themselves in contradistinction to the regular Grand Lodge of England, which was styled the Grand Lodge of Moderns, the former body, to prevent the intrusion of the latter upon their meetings, made changes in some of the modes of recognition—changes which, although Dalcho has said that they amounted to no more than a dispute "whether the glove should be placed first upon the right hand or on the left" (*Ahim. Rez.*, p. 193), were among the causes of continuous acrimony among the two bodies, which was only healed, in 1813, by a partial sacrifice of principle on the part of the legitimate Grand Lodge, and have perpetuated differences which still exist among the English and American and the continental Freemasons.

But the most important innovation which sprang out of this unfortunate schism is that which is connected with the Royal Arch Degree. On this subject there have been two theories: One, that the Royal Arch Degree originally constituted a part of the Master's Degree, and that it was dissevered from it by the Ancients; the other, that it never had any existence until it was invented by Ramsay, and adopted by Dermott for his Ancient Grand Lodge. If the first, which is the most probable and the most generally received opinion, be true, then the regular or Modern Grand Lodge committed an innovation in continuing the disseverance at the union in 1813. If the second be the true theory, then the Grand Lodge equally perpetuated an innovation in recognizing it as legal, and declaring, as it did, that "Ancient Craft Masonry consists of three degrees, including the Holy Royal Arch." But however the innovation may have been introduced, the Royal Arch Degree has now become, so far as the York and American Rites are concerned, well settled and recognized as an integral part of the Masonic system.

About the same time there was another innovation attempted in France. The adherents of the Pretender, Charles Edward, sought to give to Masonry a political bias in favor of the exiled house of Stuarts, and, for this purpose, altered the interpretation of the great legend of the Third Degree, so as to make it applicable to the execution or, as they called it, the martyrdom of Charles I. But this attempted innovation was not successful, and the system in which this lesson was practised has ceased to exist, although its workings are now and then seen in some of the high degrees, without, however, any manifest evil effect.

On the whole, the spirit of Freemasonry, so antagonistic to innovation, has been successfully maintained; and an investigator of the system as it prevailed in the year 1717, and as it is maintained at the present day, will not refrain from wonder at the little change which has been brought about by the long cycle of one hundred and fifty years.

I.·.N.·.R.·.I.·. The initials of the Latin sentence which was placed upon the cross: *Jesus Nazarenus Rex Judæorum.* The Rosicrucians used them as the initials of one of their Hermetic secrets: *Igne Natura Renovatur Integra*, "By fire, nature is perfectly renewed." They also adopted them to express the names of their three elementary principles—salt, sulphur, and mercury—by making them the initials of the sentence, *Igne Nitrum Roris Invenitur.* Ragon finds in the equivalent Hebrew letters יהוה the initials of the Hebrew names of the ancient elements: *Iaminim*, water; *Nour*, fire; *Ruach*, air; and *Iebschah*, earth.

Insect Shermah. A Jewish belief that the Solomonian Temple was constructed by Divine means, that the stones were squared and polished by a specially created worm called *samis*, and that the stones by innate power came to the temple ground, and were placed in position by angelic aid. The worm has been designated "the Insect Shermah."

Insignia. See *Jewels, Official.*

Inspector. See *Sovereign Grand Inspector-General.*

Installation. The act by which an officer is put in possession of the place he is to fill. In Masonry it is, therefore, applied to the induction of one who has been elected into his office. The officers of a Lodge, before they can proceed to discharge their functions, must be installed. The officers of a new Lodge are installed by the Grand Master, or by some Past Master deputed by him to perform the ceremony. Formerly, the Master was installed by the Grand Master, the Wardens by the Grand Wardens, and the Secretary and Treasurer by the Grand Secretary and Treasurer; but now this custom is not continued. At the election of the officers of an old Lodge, the Master is installed by his predecessor or some Past Master present, and the Master elect then installs his subordinate officers. No officer after his installation can resign. At his installation, the Master receives the degree of Past Master. It is a law of Masonry that all officers hold on to their re-

spective offices until their successors are installed. It is installation only that gives the right to exercise the franchises of an office.

The ceremony is an old one, and does not pertain exclusively to Masonry. The ancient Romans installed their priests, their kings, and their magistrates; but the ceremony was called *inauguration*, because performed generally by the augurs. The word *installation* is of comparatively modern origin, being Medieval Latin, and is compounded of *in* and *stallum*, a seat. Priests, after *ordination* or reception into the sacerdotal order, were installed into the churches or parishes to which they were appointed. The term as well as the custom is still in use.

Installation as a Masonic ceremony was early used. We find in the first edition of Anderson's *Constitutions*, a form of "Constituting a New Lodge," which was practised by the Duke of Wharton, who was Grand Master in 1723. It was probably prepared by Desaguliers, who was Deputy, or by Anderson, who was one of the Wardens, and perhaps by both. It included the ceremony of installing the new Master and Wardens. The words "Shall, in due form, *install* them" are found in this document. The usage then was for the Grand Master, or some brother for him, to install the Master, and for the Master to install his Wardens; a usage which still exists.

Installed Masters, Board of. An expression used in England to designate a committee of Masters to whom "the Master elect is presented that he may receive from his predecessor the benefit of installation." It is the same as the emergent Lodge of Past Masters assembled in this country for the same purpose.

Installing Officer. The person who performs the ceremony of installation is thus called. He should be of the same official dignity at least; although necessity has sometimes permitted a Grand Master to be installed by a Past Deputy, who in such case acts as *locum tenens* of a Grand Master. The Masonic rule is that anyone who has been installed into an office may install others into similar or inferior offices. In this it agrees with the old Rabbinical law as described by Maimonides (*Stat. de Sanhed.*, c. 4), who says: "Formerly, all Rabbis who had been installed, *hasmochachim*, could install others; but since the time of Hillel the faculty can be exercised only by those who have been invested with it by the Prince of the Grand Sanhedrim; nor then, unless there be two witnesses present, for an installation cannot be performed by less than three." So the strict Masonic rule requires the presence of three Past Masters in the complete installation of a Master and his investiture with the Past Master's Degree.

The first Master of a new Lodge can be installed only by the Grand Master, or by a Past Master especially appointed by him and acting as his proxy.

Instruction. It is the duty of the Master of the Lodge to give the necessary instruction to the candidate on his initiation. In some of the higher and in the continental Rites these instructions are imparted by an officer called the Orator; but the office is unknown in the English and American systems of Ancient Craft Masonry.

Instruction, Lodge of. See *Lodge of Instruction.*

Instrumental Masonry. Oliver by this term defines a species of Masonry which is engaged in the study of mechanical instruments. But there is no authority in any other writer for the use of the term, nor is its necessity or relevancy apparent.

Integrity. Integrity of purpose and conduct is symbolized by the *Plumb*, which see.

Intemperance. This is a vice which is wholly incompatible with the Masonic character, and the habitual indulgence in which subjects the offender to the penalty of expulsion from the Order. (See *Temperance.*)

Intendant of the Building. (*Intendant du Bâtiment.*) This degree is sometimes called "Master in Israel." It is the Eighth in the Ancient and Accepted Scottish Rite. Its emblematic color is red; and its principal officers, according to the old rituals, are a Thrice Puissant, representing Solomon; a Senior Warden, representing the illustrious Tito, one of the Harodim; and a Junior Warden, representing Adoniram the son of Abda. But in the present rituals of the two Supreme Councils of the United States the three chief officers represent Adoniram, Joabert, and Stolkin; but in the working of the degree the past officer assumes the character of Solomon. The legend of the degree is, that it was instituted to supply the place of the chief architect of the Temple.

Intention. The obligations of Masonry are required to be taken with an honest determination to observe them; and hence the Mason solemnly affirms that in assuming those responsibilities he does so without equivocation, secret evasion, or mental reservation.

Internal Preparation. See *Preparation of the Candidate.*

Internal Qualifications. Those qualifications of a candidate which refer to a condition known only to himself, and which are not patent to the world, are called internal qualifications. They are: 1st. That he comes forward of his own free-will and accord, and unbiased by the solicitations of others. 2d. That he is not influenced by mercenary motives; and, 3d, That he has a disposition to conform to the usages of the Order. The knowledge of these can only be obtained from his own statements, and hence they are included in the preliminary questions which are proposed before initiation.

Intimate Initiate. (*Intimus Initiatus.*) Latin. The Fourth Degree of the Order of the Temple.

Intimate Secretary. (*Secretaire intime.*) The Sixth Degree in the Ancient and Accepted Scottish Rite. Its emblematic color is black,

strewed with tears; and its collar and the lining of the apron are red. Its officers are only three: Solomon, King of Israel; Hiram, King of Tyre; and a Captain of the Guards. Its history records an instance of unlawful curiosity, the punishment of which was only averted by the previous fidelity of the offender. The legend in this degree refers to the cities in Galilee which were presented by Solomon to Hiram, King of Tyre; and with whose character the latter was so displeased that he called them the land of Cabul.

Intolerance. The arch-enemy of Freemasonry. Toleration is one of the chief foundation-stones of the Fraternity, and Universality and Brotherly Love are ever taught. Notwithstanding, intolerance has, and ever has had, its grip upon the brotherhood, and insidiously does its silent and undermining work. Human powers are limited or circumscribed. Man by nature is weak, and is largely the creature of early education; yet no institution has such resisting power and is of such avail as Freemasonry against that great enemy of man, which has destroyed more of the human race than any other evil power. The synonym may be found in the Third and Tenth degrees, A. A. Scottish Rite.

Introductor and Introductress. Officers in a Lodge of Adoption, whose functions resemble those of a Master of Ceremonies.

Inversion of Letters. In some of the French documents of the high degrees the letters of some words were inverted—not apparently for concealment, but as a mere caprice. Hence Thory (*Fondat*, p. 128) calls them *inversions enfantines* (childish inversions). Thus they wrote ꟻosæ ɔɹnɔıs æsoʏ for Rosæ crucis. But in all French Cahiers and rituals, or, as they call them, *tuilleurs*, words are inverted; that is, the letters are transposed for purposes of secrecy. Thus they would write *Nomolos* for Solomon, and *Marih* for Hiram. This was also a custom among the Kabbalists and the Alchemists to conceal secret words.

Investiture. The presentation of the apron to a candidate in the ceremony of initiation.

Invincible. The degree of Knights of the Christian Mark, formerly conferred in this country, was called the Invincible Order, and the title of the presiding officer was Invincible Knight.

Invisibles, Les. (*The Invisibles.*) A secret order of which little is known. Thory (*Acta Latomorum*, i., 319) quotes a German writer, who says: "C'est la secte la plus dangereuse; les réceptions des initiés se font la nuit, sous une voûte souterraine, et la doctrine des initians prêche l'athéisme et le suicide." We need no more upon this subject, and believe the society "sleeps the sleep that knows no waking."

Inwood, Jethro. The Rev. Jethro Inwood was curate of St. Paul's at Deptford, in England. He was born about the year 1767, and initiated into Masonry in 1785 as a lewis, according to Oliver. He was soon after appointed Chaplain of the Provincial Grand Lodge of Kent, an office which he held for more than twenty years, during which time he delivered a great number of sermons on festival and other occasions. A volume of these sermons was published in 1799, with a portrait of the author, under the title of *Sermons, in which are explained and enforced the religious, moral, and political virtues of Freemasonry, preached upon several occasions before the Provincial Grand Officers and other Brethren in the Counties of Kent and Essex.* An edition of these sermons was published by Oliver, in 1849, in the fourth volume of his *Golden Remains*. These sermons are written, to use the author's own expression, "in a language that is plain, homely, and searching"; but, in Masonic character, surpass the generality of sermons called Masonic, simply because they have been preached before the Craft. Dr. Oliver describes him as "an assiduous Mason, who permitted no opportunity to pass unimproved of storing his mind with useful knowledge, or of imparting instruction to those who needed it."

Ionian Islands. Freemasonry appears to have been founded at Corfu, by a Lodge called "Loge de St. Napoléon," under the Grand Orient of France, in 1809, followed by a second in 1810.

Ionic Order. One of the three Grecian orders, and the one that takes the highest place in Masonic symbolism. Its distinguishing characteristic is the volute of its capital, and the shaft is cut into twenty flutes separated by fillets. It is more delicate and graceful than the Doric, and more simply majestic than the Corinthian. The judgment and skill displayed in its construction, as combining the strength of the former with the beauty of the latter, has caused it to be adopted in Masonry as the symbol of Wisdom, and being placed in the east of the Lodge it is referred to as represented by the Worshipful Master.

Iowa. Freemasonry was introduced into Iowa on November 20, 1840, by the formation of a Lodge at Burlington, under a Warrant from the Grand Lodge of Missouri. Of this Lodge, Bro. Theodore S. Parvin, since a Past Grand Master of the State, was one of the founders, and James R. Hartsock, another Past Grand Master, was the first initiate. A second Lodge was formed at Bloomington, now Muscatine, February 4, 1841; a third at Dubuque, October 20, 1842; and a fourth in Iowa City, October 10, 1842. A convention was held on January 2, 1844, and a Grand Lodge organized; Oliver Cock being elected Grand Master.

The Grand Chapter was organized June 8, 1854; the Grand Council in 1857, and the Grand Commandery, June 6, 1864. The Ancient and Accepted Scottish Rite has also been introduced into the State, and there is a Grand Consistory and several subordinate bodies.

Iram. (Heb., עירם, *aureum excelsus.*) The former ruling Prince of Idumea.

Ireland. The early history of Freemasonry in Ireland is involved in the deepest obscurity. It is vain to look in Anderson, in Preston, Smith, or any other English writer of the last century, for any account of the organization of Lodges in that kingdom anterior to the establishment of a Grand Lodge. But Dr. W. J. Chetwode Crawley, Grand Treasurer of Ireland (1911), has done much to lift the veil from the early Irish Freemasonry. A contemporary newspaper has been discovered, which gives an account of the installation of the Earl of Rosse as Grand Master of Ireland in June, 1725; and this account is so worded as to leave little room for doubt that the Grand Lodge of Ireland had already been in existence long enough to develop a complete organization of Grand Officers with at least six subordinate Lodges under its jurisdiction. (*Comentaria Hibernica, Fasc. II.*)

There is also still in existence a minute book which contains a record of a meeting of the "Grand Lodge for the Province of Munster," held on December 27, 1726, when the Hon. James O'Brien was elected Grand Master; and there is nothing to show that this was the first meeting of this body.

In 1731 Lord Kingston, who had been Grand Master of England in 1729, became Grand Master of the Grand Lodge of Munster and also of the Grand Lodge of Ireland, in connection with what appears to have been a reorganization of the latter body. No more is heard of the Grand Lodge of Munster, and from 1731 to the present date the succession of the Grand Officers of the Grand Lodge of Ireland is plain and distinct. (Gould's *Concise History of F. M.*, p. 273.)

In the year 1730, *The Constitutions of the Freemasons, Containing the History, Charges, Regulations, etc., of that most Ancient and Right Worshipful Fraternity. For the use of the Lodges*, was published at Dublin. A second edition was published in 1744, and a third, in 1751.

In 1749, the "Grand Master's Lodge" was instituted, which still exists; a singular institution, possessing several unusual privileges, among which are that its members are members of the Grand Lodge without the payment of dues, that the Lodge takes precedence of all other Lodges, and that any candidates nominated by the Grand Master are to be initiated without ballot.

In 1772, the Grand Lodge of Ireland recognized the Grand Lodge of the "Antients" and entered into an alliance with it, which was also done in the same year by the Grand Lodge of Scotland. This does not appear to have given any offense to the regular Grand Lodge of England; for when that body, in 1777, passed a vote of censure on the Lodges of Ancient Masons, it specially excepted from the censure the Lodges of Ireland and Scotland.

In 1779, an application was made to the Mother Kilwinning Lodge of Scotland, by certain brethren in Dublin, for a charter empowering them to form a Lodge to be called the "High Knights Templars," that they might confer the Templar Degree. The Kilwinning Lodge granted the petition for the three Craft degrees only, but at a later period this Lodge became, says Findel, the source of the Grand Encampment of Ireland.

The Grand Lodge holds jurisdiction over all the Blue Lodges. The Mark Degree is worked under the Grand Royal Arch Chapter. Next comes the Royal Arch, which formerly consisted of three degrees, the Excellent, Super-excellent, and Royal Arch—the first two being nothing more than passing the first two veils with each a separate obligation. But that system was abolished some years ago, and a new ritual framed something like the American, except that the king and not the high priest is made the Presiding Officer. The next degrees are the Fifteenth, Sixteenth, and Seventeenth, which are under the jurisdiction of the Templar Grand Conclave, and are given to the candidate previous to his being created a Knights Templar. Next to the Templar Degree in the Irish system comes the Eighteenth or Rose Croix, which is under the jurisdiction of the Grand Chapter of Prince Masons or Council of Rites, composed of the first three officers of all the Rose Croix Chapters, the Supreme Council having some years ago surrendered its authority over the degree. The Twenty-eighth Degree or Knight of the Sun is the next conferred, and then the Thirtieth or Kadosh in a body over which the Supreme Council has no control except to grant certificates to its members. The Supreme Council confers the Thirty-first, Thirty-second, and Thirty-third degrees, there being no Grand Consistory.

The Supreme Council of the Ancient and Accepted Scottish Rite for Ireland was established by a Patent from the Supreme Council of the United States, at Charleston, dated August 13, 1824, by which the Duke of Leinster, John Fowler, and Thomas McGill were constituted a Supreme Council for Ireland, and under that authority it continues to work.

Whence the high degrees came into Ireland is not clearly known. The Rose Croix and Kadosh degrees existed in Ireland long before the establishment of the Supreme Council. In 1808 Dr. Dalcho's *Orations* were published at Dublin, by "the Illustrious College of Knights of K. H., and the Original Chapter of Prince Masons of Ireland." It is probable that these degrees were received from Bristol, England, where are preserved the earliest English records of the Rose Croix.

Irish Chapters. These Chapters existed in Paris from the year 1730 to 1740, and were thence disseminated through France. They consisted of degrees, such as Irish Master, Perfect Irish Master, and Sublime Irish Master, which, it is said, were invented by the adherents of the house of Stuart when they sought to make Freemasonry a political means of restoring the exiled family to the throne of England. Ramsay, when he assumed his theory of the establishment of Freemasonry in

Scotland by the Templars, who had fled thither under d'Aumont, took possession of these degrees (if he did not, as some suppose, invent them himself), and changed their name, in deference to his theory, from Irish to Scottish, calling, for instance, the degree of *Maître Irlandais* or Irish Master, the *Maître, Ecossais* or Scottish Master.

Irish Colleges. The Irish Chapters are also called by some writers Irish Colleges.

Irish Degrees. See *Irish Chapters.*

Iron Tools. The lectures teach us that at the building of King Solomon's Temple there was not heard the sound of ax, hammer, or other metallic tool. But all the stones were hewn, squared, and numbered in the quarries; and the timbers felled and prepared in the forest of Lebanon, whence they were brought on floats by sea to Joppa, and thence carried by land to Jerusalem, where, on being put up, each part was found to fit with such exact nicety that the whole, when completed, seemed rather the handiwork of the Grand Architect of the Universe than of mere human hands. This can hardly be called a legend, because the same facts are substantially related in the 1st Book of Kings; but the circumstance has been appropriated in Masonry to symbolize the entire peace and harmony which should prevail among Masons when laboring on that spiritual temple of which the Solomonic Temple was the archetype.

Isaac and Ishmael. The sons of Abraham by Sarah and Hagar. They are recognized, from the conditions of their mothers, as the free born and the bondman. According to Oliver, the fact that the inheritance which was bestowed upon Isaac, the son of his free-born wife, was refused to Ishmael, the son of a slave woman, gave rise to the Masonic theory which constitutes a landmark that none but the free born are entitled to initiation.

Ischngi. (Heb., ישעי, *salus mea.*) One of the five Masters, according to the Masonic myth, appointed by Solomon after the death of Hiram to complete the Temple.

Ish Chotzeb. איש חצב. Literally, "men of hewing," i. e., "hewers." The phrase was first used by Anderson in the first edition of the *Constitutions* (p. 10), but is not found in the original Hebrew (1 Kings v. 18) to which he refers, where it is said that Solomon had fourscore "hewers in the mountains," *chotzeb bahar.* But *ish chotzeb* is properly constructed according to the Hebrew idiom, and is employed by Anderson to designate the hewers who, with the "Giblim," or stone-cutters, and the "Bonai," or builders, amounted to eighty thousand, all of whom he calls, in his second edition (p. 11), "bright Fellow Crafts." But he distinguishes them from the thirty thousand who cut wood on Mount Lebanon under Adoniram.

Ish Sabbal. איש סבל. Men of burden. Anderson thus designates the 70,000 laborers who, in the original Hebrew, are (1 Kings v. 18) called *noshe sabal,* bearers of burdens. Anderson says "they were of the remains of the old Canaanites, and, being bondmen, are not to be reckoned among Masons." (*Constitutions,* 1738, p. 11.) But in Webb's system they constitute the Apprentices at the building of the Temple.

Ish Sodi. Corruptly, *Ish Soudy.* This expression is composed of the two Hebrew words, יש, ISH, and סוד, SOD. The first of these words, ISH, means *a man,* and SOD signifies primarily *a couch* on which one reclines. Hence ISH SODI would mean, first, *a man of my couch,* one who reclines with me on the same seat, an indication of great familiarity and confidence. Thence followed the secondary meaning given to SOD, of familiar intercourse, consultation, or intimacy. Job (xix. 19) applies it in this sense, when, using MATI, a word synonymous with ISH, he speaks of MATI SODI in the passage which the common version has translated thus: "all my *inward friends* abhorred me," but which the marginal interpretation has more correctly rendered, "all the men of my secret." *Ish Sodi,* therefore, in this degree, very clearly means *a man of my intimate counsel, a man of my choice,* one selected to share with me a secret task or labor. Such was the position of every Select Master to King Solomon, and in this view those are not wrong who have interpreted *Ish Sodi* as meaning a *Select Master.*

Isiac Table. Known also as the Tabula Isiaca, Mensa Isiaca, and Tabula Bembina. A monument often quoted by archeologists previous to the discovery of hieroglyphics. A flat rectangular bronze plate, inlaid with niello and silver, 56 by 36 inches in size. It consists of three compartments of figures of Egyptian deities and emblems; the central figure is Isis. It was sold by a soldier to a locksmith, bought by Cardinal Bembo in 1527, and is now in the Royal Museum in Turin.

Isis. The sister and the wife of Osiris, and worshiped by the Egyptians as the great goddess of nature. Her mysteries constituted one of the degrees of the ancient Egyptian initiation. (See *Egyptian Mysteries* and *Osiris.*)

Israfeel. In the Mohammedan faith, the name of the angel who, on the judgment morn, will sound the trumpet of resurrection.

Italy. In the year 1733, Freemasonry was introduced into Italy, by the establishment of a Lodge at Florence, by Lord George Sackville. Thory, and after him Findel, calls him Duke of Middlesex; but there was at that time no such title in the peerage of England. A medal was struck on this occasion. It is not known under what authority this Lodge was established, but most probably under that of the Grand Lodge of England. The initiation of the Grand Duke of Tuscany had a favorable influence on the prospects of the Order, and in 1735 Lodges were established at Milan, Verona, Padua, Vincenza, Venice, and Naples. In 1737, John Gaston, the last duke of the house of the Medicis, prohibited Freemasonry, but dying soon after, the Lodges continued to meet. His successor, the Grand Duke of Lorraine, declared himself the protector of the Order, and many new Lodges

were established under his auspices. In 1738, Pope Clement XIV. issued his bull forbidding all congregations of Freemasons, which was followed in January, 1739, by the edict of Cardinal Firrao, which inflicted the penalty of death and confiscation of goods on all who should contravene the Papal order. Several arrests were made at Florence by the Inquisition, but, through the intercession of the Grand Duke, the persons who had been arrested were set at liberty.

For many years Freemasonry held but a precarious existence in Italy, the persecutions of the Church preventing any healthy growth. The Masons continued to meet, although generally in secret. The Masons of Rome struck a medal, in 1746, in honor of Martin Folkes; and the author of *Anti-Saint-Nicaise* says that there was a Grand Lodge at Naples in 1756, which was in correspondence with the Lodges of Germany. Naples, indeed, seems to have been for a long time the only place where the Lodges were in any kind of activity. In 1776, Queen Caroline exerted her interest in behalf of the Order. Smith, writing in 1783 (*Use and Abuse*, p. 211), says, "At present most of the Italian nobles and dignified ecclesiastics are Freemasons, who hold their meetings generally in private houses, though they have established Lodges at Naples, Leghorn, Venice, Verona, Turin, Messina, in the island of Sicily, Genoa, and Modena."

In 1805 a Supreme Council of the Ancient and Accepted Rite was established at Milan by Count de Grasse-Tilly, and Prince Eugene accepted the offices of Grand Commander of the Council and Grand Master of the Grand Orient.

When, by the defeat of Napoleon in 1814, the liberal policy of France was withdrawn from Italy, to be again substituted by the ignorance of the Bourbon dynasty and the bigotry of the Roman Church, Italian Masonry ceased any longer to have an existence nor did it revive until 1860. But the centralization of Italy, and the political movements that led to it, restored Italy to freedom and intelligence, and Freemasonry had again found, even beneath the shadow of the Vatican, a congenial soil.

A Lodge was established at Turin in 1859, and a Grand Lodge in 1861. A Grand Orient was subsequently established by Garibaldi, who adopted the system of the Scottish Rite. A Supreme Council was also formed at Naples. Internal dissensions, however, unfortunately took place. The Grand Orient was removed from Turin to Florence, when many resignations took place, and a recusant body was formed. But peace at length prevailed, and at a Constituent Assembly held at Rome on April 28, 1873, "the fundamental bases of Italian Masonic Fraternity" were adopted; and "the Grand Orient of Italy" was now in successful operation. There was also a Supreme Council of the Scottish Rite.

Itratics, Order of. A society of adepts, engaged in the search for the Universal Medicine; is now extinct. Mentioned by Fustier.

I.·.V.·.I.·.O.·.L.·. (*Inveni Verbum in Ore Leonis.*) Initial letters of significant words used in the Thirteenth Degree, A. A. Scottish Rite. They have reference to the recovery of the key of the Sacred Ark, which contains certain treasures. The Ark and its key having been lost in the forest during a battle which occurred when the Jews were journeying through the wilderness, the key was found in the mouth of a lion, who dropped it upon the ground on the approach of the Israelites. Much symbolical teaching is deduced from the historical myth.

Ivory Key. The symbolic jewel of the Fourth Degree, A. A. Scottish Rite. On the wards of the key is the Hebrew letter *zain*.

Izabud. A corruption of *Zabud*, which see.

Izads. The twenty-eight creations of the beneficent deity Ormudz, or Auramazda, in the Persian religious system.

J

J. The tenth letter in the English alphabet. It is frequently and interchangeably used with I, and written in Hebrew as Yod (י), with the numerical value of 10, and having reference to the Supreme.

Jaaborou Hammaim. (Heb., יעברו־המים, *aquæ transibunt.*) A word of covered significancy in the Fifteenth Degree of the A. A. Scottish Rite. It also has reference to the L. D. P. (See *Liber.*)

Jabescheh. (Heb., יבשה, *Earth.*) Also written Jebschah. (See *I.·.N.·.R.·.I.·.*)

Jabulum. A corrupted word used in two of the degrees of the A. A. Scottish Rite, the Thirteenth and Seventeenth. The true word and its meaning, however, are disclosed to the initiate.

Jachin. יכין. Hence called by Dudley and some other writers, who reject the points, *ichin*. It is the name of the right-hand pillar facing eastward (i. e., on the south), that stood at the porch of King Solomon's Temple. It is derived from two Hebrew words, יה, *jah*, "God," and יכין, *iachin*, "will establish." It signifies, therefore, "God will establish," and is often called "the pillar of establishment."

Jachinai. A Gallic corruption of *Shekinah*, to be found only in the French Cahiers of the high degrees.

Jacobins. A political sect that sprang up

in the beginning of the French Revolution, and which gave origin to the Jacobin clubs, so well known as having been the places where the leaders of the Revolution concocted their plans for the abolition of the monarchy and the aristocracy. Lieber says that it is a most surprising phenomenon that "so large a body of men could be found uniting rare energy with execrable vice, political madness, and outrageous cruelty, committed always in the name of virtue." Barruel, in his *Histoire de Jacobinisme*, and Robison, in his *Proofs of a Conspiracy*, both endeavor to prove that there was a coalition of the revolutionary conspirators with the Illuminati and the Freemasons which formed the Jacobin clubs, those bodies being, as they contend, only Masonic Lodges in disguise. The falsity of these charges will be evident to anyone who reads the history of French Masonry during the Revolution, and more especially during that part of the period known as the "Reign of Terror," when the Jacobin clubs were in most vigor. The Grand Orient, in 1788, declared that a politico-Masonic work, entitled *Les Jesuites chassés de la Maçonnerie et leur Poignard brisé par les Maçons*, was the production of a perverse mind, prepared as a poison for the destruction of Masonry, and ordered it to be burned. During the Revolution, the Grand Orient suspended its labors, and the Lodges in France were dissolved; and in 1793, the Duke of Orleans, the head of the Jacobins, who was also, unfortunately, Grand Master of the French Masons, resigned the latter position, assigning as a reason that he did not believe that there should be any mystery nor any secret society in a republic. It is evident that the Freemasons, as an Order, held themselves aloof from the political contests of that period.

Jacob's Ladder. The introduction of Jacob's ladder into the symbolism of Speculative Masonry is to be traced to the vision of Jacob, which is thus substantially recorded in the twenty-eighth chapter of the Book of Genesis: When Jacob, by the command of his father Isaac, was journeying toward Padan-aram, while sleeping one night with the bare earth for his couch and a stone for his pillow, he beheld the vision of a ladder, whose foot rested on the earth and whose top reached to heaven. Angels were continually ascending and descending upon it, and promised him the blessing of a numerous and happy posterity. When Jacob awoke, he was filled with pious gratitude, and consecrated the spot as the house of God.

This ladder, so remarkable in the history of the Jewish people, finds its analogue in all the ancient initiations. Whether this is to be attributed simply to a coincidence—a theory which but few scholars would be willing to accept—or to the fact that these analogues were all derived from a common fountain of symbolism, or whether, as suggested by Oliver, the origin of the symbol was lost among the practises of the Pagan rites, while the symbol itself was retained, it is, perhaps, impossible authoritatively to determine. It is, however, certain that the ladder as a symbol of moral and intellectual progress existed almost universally in antiquity, presenting itself either as a succession of steps, of gates, of degrees, or in some other modified form. The number of the steps varied; although the favorite one appears to have been seven, in reference, apparently, to the mystical character almost everywhere given to that number.

Thus, in the Persian mysteries of Mithras, there was a ladder of seven rounds, the passage through them being symbolical of the soul's approach to perfection. These rounds were called gates, and, in allusion to them, the candidate was made to pass through seven dark and winding caverns, which process was called the ascent of the ladder of perfection. Each of these caverns was the representative of a world, or state of existence through which the soul was supposed to pass in its progress from the first world to the last, or the world of truth. Each round of the ladder was said to be of metal of increasing purity, and was dignified also with the name of its protecting planet. Some idea of the construction of this symbolic ladder may be obtained from the following table:

7 Gold,	Sun,	Truth. [Blessed.
6 Silver,	Moon,	Mansion of the
5 Iron,	Mars,	World of Births.
4 Tin,	Jupiter,	Middle World.
3 Copper,	Venus,	Heaven. [ence.
2 Quicksilver,	Mercury,	World of Preexist-
1 Lead,	Saturn,	First World.

In the mysteries of Brahma we find the same reference to the ladder of seven steps. The names of these were not different, and there was the same allusion to the symbol of the universe. The seven steps were emblematical of the seven worlds which constituted the Indian universe. The lowest was the Earth; the second, the World of Preexistence; the third, Heaven; the fourth, the Middle World, or intermediate region between the lower and upper worlds; the fifth, the World of Births, in which souls are again born; the sixth, the Mansion of the Blessed; and the seventh, or topmost round, the Sphere of Truth, and the abode of Brahma. Dr. Oliver thinks that in the Scandinavian mysteries the tree Yggrasil was the representative of the mystical ladder. But although the ascent of the tree, like the ascent of the ladder, was a change from a lower to a higher sphere—from time to eternity, and from death to life—yet the unimaginative genius of the North seems to have shorn the symbolism of many of its more salient features.

Among the Kabbalists, the ladder was represented by the ten Sephiroths, which, commencing from the bottom, were the Kingdom, Foundation, Splendor, Firmness, Beauty, Justice, Mercy, Intelligence, Wisdom, and the Crown, by which we arrive at the En Soph, or the Infinite.

In the higher Masonry we find the ladder of Kadosh, which consists of seven steps, thus

commencing from the bottom: Justice, Equity, Kindness, Good Faith, Labor, Patience, and Intelligence. The arrangement of these steps, for which we are indebted to modern ritualism, does not seem to be perfect; but yet the idea of intellectual progress to perfection is carried out by making the topmost round represent Wisdom or Understanding.

The Masonic ladder which is presented in the symbolism of the First Degree ought really to consist of seven steps, which thus ascend: Temperance, Fortitude, Prudence, Justice, Faith, Hope, and Charity; but the earliest examples of it present it only with three, referring to the three theological virtues, whence it is called the theological ladder. It seems, therefore, to have been settled by general usage that the Masonic ladder has but three steps.

As a symbol of progress, Jacob's ladder was early recognized. Picus of Mirandola, who wrote in the sixteenth century, in his oration, "De Hominis Dignitate," says that Jacob's ladder is a symbol of the progressive scale of intellectual communication betwixt earth and heaven; and upon the ladder, as it were, step by step, man is permitted with the angels to ascend and descend until the mind finds blissful and complete repose in the bosom of divinity. The highest step he defines to be theology, or the study and contemplation of the Deity in his own abstract and exalted nature.

Other interpretations have, however, been given to it. The Jewish writers differ very much in their expositions of it. Thus, a writer of one of the Midrashes or Commentaries, finding that the Hebrew words for *Ladder* and *Sinai* have each the same numerical value of letters, expounds the ladder as typifying the giving of the law on that mount. Aben Ezra thought that it was a symbol of the human mind, and that the angels represented the sublime meditations of man. Maimonides supposed the ladder to symbolize nature in its operations; and, citing the authority of a Midrash which gives to it four steps, says that they represent the four elements; the two heavier, earth and water, descending by their specific gravity, and the two lighter, fire and air, ascending from the same cause. Abarbanel, assuming the Talmudic theory that Luz, where Jacob slept, was Mount Moriah, supposes that the ladder, resting on the spot which afterward became the holy of holies, was a prophetic symbol of the building of the Temple. And, lastly, Raphael interprets the ladder, and the ascent and the descent of the angels, as the prayers of man and the answering inspiration of God. Fludd, the Hermetic philosopher, in his *Philosophia Mosaica* (1638), calls the ladder the symbol of the triple world, moral, physical, and intellectual; and Nicolai says that the ladder with three steps was, among the Rosicrucian Freemasons in the seventeenth century, a symbol of the knowledge of nature. Finally, Krause says, in his *drei ältesten Kunsturkunden* (ii., 481), that a Brother Keher of Edinburgh, whom he describes as a skilful and truthful Mason, had in 1802 assured the members of a Lodge at Altenberg that originally only one Scottish degree existed, whose object was the restoration of James II. to the throne of England, and that of that restoration Jacob's ladder had been adopted by them as a symbol. Of this fact he further said that an authentic narrative was contained in the Archives of the Grand Lodge of Scotland. Notwithstanding Lawrie's silence on the subject, Krause is inclined to believe the story, nor is it in all its parts altogether without probability. It is more than likely that the Chevalier Ramsay, who was a warm adherent of the Stuarts, transferred the symbol of the mystical ladder from the Mithraic mysteries, with which he was very familiar, into his Scottish degrees, and that thus it became a part of the symbolism of the Kadosh system. In some of the political Lodges instituted under the influence of the Stuarts to assist in the restoration of their house, the philosophical interpretation of the symbol may have been perverted to a political meaning, and to these Lodges it is to be supposed that Keher alluded; but that the Grand Lodge of Scotland had made any official recognition of the fact is not to be believed. Lawrie's silence seems to be conclusive.

In the Ancient Craft degrees of the York Rite, Jacob's ladder was not an original symbol. It is said to have been introduced by Dunckerley when he reformed the lectures. This is confirmed by the fact that it is not mentioned in any of the early rituals of the last century, nor even by Hutchinson, who had an excellent opportunity of doing so in his lecture on the *Nature of the Lodge*, where he speaks of the covering of the Lodge, but says nothing of the means of reaching it, which he would have done, had he been acquainted with the ladder as a symbol. Its first appearance is in a Tracing Board, on which the date of 1776 is inscribed, which very well agrees with the date of Dunckerley's improvements. In this Tracing Board, the ladder has but three rounds; a change from the old seven-stepped ladder of the mysteries; which, however, Preston corrected when he described it as having many rounds, but three principal ones.

As to the modern Masonic symbolism of the ladder, it is, as I have already said, a symbol of progress, such as it is in all the old initiations. Its three principal rounds, representing Faith, Hope, and Charity, present us with the means of advancing from earth to heaven, from death to life—from the mortal to immortality. Hence its foot is placed on the ground floor of the Lodge, which is typical of the world, and its top rests on the covering of the Lodge, which is symbolic of heaven.

In the Prestonian lecture, which was elaborated out of Dunckerley's system, the ladder is said to rest on the Holy Bible, and to reach to the heavens. This symbolism is thus explained:

"By the doctrines contained in the Holy

Bible we are taught to believe in the Divine dispensation of Providence, which belief strengthens our *Faith*, and enables us to ascend the first step.

"That Faith naturally creates in us a *Hope* of becoming partakers of some of the blessed promises therein recorded, which *Hope* enables us to ascend the second step.

"But the third and last being *Charity* comprehends the whole, and he who is possessed of this virtue in its ample sense, is said to have arrived at the summit of his profession, or, more metaphorically, into an ethereal mansion veiled from the mortal eye by the starry firmament."

In the modern lectures, the language is materially changed, but the idea and the symbolism are retained unaltered.

The delineation of the ladder with three steps only on the Tracing Board of 1776, which is a small one, may be attributed to notions of convenience. But the Masonic ladder should properly have seven steps, which represent the four cardinal and the three theological virtues.

Jacques de Molay. See *Molay, James de.*

Jafuhar. The second king in the Scandinavian mysteries. The synonym for Thor.

Jah. In Hebrew, יה. Maimonides calls it the "two-lettered name," and derives it from the Tetragrammaton, of which he says it is an abbreviation. Others have denied this, and assert that *Jah* is a name independent of Jehovah, but expressing the same idea of the Divine Essence. It is uniformly translated in the authorized version of the Bible by the word LORD, being thus considered as synonymous with Jehovah, except in Psalm lxviii. 4, where the original word is preserved: "Extol him that rideth upon the heavens by his name JAH," upon which the Targum comment is: "Extol him who sitteth on the throne of glory in the ninth heaven; YAH is his name." It seems, also, to have been well known to the Gentile nations as the triliteral name of God; for, although biliteral among the Hebrews, it assumed among the Greeks the triliteral form, as ΙΑΩ. Macrobius, in his *Saturnalia*, says that this was the sacred name of the Supreme Deity; and the Clarian Oracle being asked which of the gods was Jao, replied, "The initiated are bound to conceal the mysterious secrets. Learn thou that ΙΑΩ is the Great God Supreme who ruleth over all." (See *Jehovah.*)

Jaheb. (Heb., יהב, *concedens.*) A sacred name used in the Thirteenth Degree of the A. A. Scottish Rite.

Jaina Cross. Used by several orders, and found in the abbeys of Great Britain and on the monuments of India. Its significations are many. This cross was adopted by the Jainas, a heterodox sect of the Hindus, who dissent from Brahmanism and deny the Vedas, and whose adherents are found in every province of Upper Hindustan. They are wealthy and influential, and form an important division of the population of India. This symbol is also known as the *Fylfot* or *Swastika.* It is a religious symbol mentioned by Weaver in his *Funeral Monuments*, by Dr. H. Schliemann as having been found in the presumed ruins of Troy, by De Rossi and others in the Catacombs of Christian Rome, and there termed the *Crux dissimulata.* It has been found on almost every enduring monument on the globe, of all ages, and in both hemispheres.

Jainas. See *Jaina Cross.*

Jamblichus. It is strange that the old Masons, when inventing their legend, which gave so prominent a place to Pythagoras as "an ancient friend and brother," should have entirely forgotten his biographer, Jamblichus, whose claims to their esteem and veneration are much greater than those of the Samian sage. Jamblichus was a Neoplatonic philosopher, who was born at Chalcis, in Calo, Syria, and flourished in the fourth century. He was a pupil of Porphyry, and was deeply versed in the philosophic systems of Plato and Pythagoras, and, like the latter, had studied the mystical theology of the Egyptians and Chaldeans whose Divine origin and truth he attempts to vindicate. He maintained that man, through theurgic rites and ceremonies, might commune with the Deity; and hence he attached great importance to initiation as the means of inculcating truth. He carried his superstitious veneration for numbers and numerical formula to a far greater extent than did the school of Pythagoras; so that all the principles of his philosophy can be represented by numbers.

Thus, he taught that one, or the monad, was the principle of all unity as well as diversity; the duad, or two, was the intellect; three, the soul; four, the principle of universal harmony; eight, the source of motion; nine, perfection; and ten, the result of all the emanations of the *to en.* It will thus be seen that Jamblichus, while adopting the general theory of numbers that distinguished the Pythagorean school, differed very materially in his explanations. He wrote many philosophical works on the basis of these principles, and was the author of a *Life of Pythagoras*, and a *Treatise of the Mysteries.* Of all the ancient philosophers, his system assimilates him most—if not in its details, at least in its spirit—to the mystical and symbolic character of the Masonic philosophy.

James II. and III. of Scotland. See *Stuart Masonry.*

Jaminim or **Iaminim.** (Heb., *water.*) (See *I.·.N.·.R.·.I.·.*)

Janitor. A door-keeper. The word *Sentinel*, which in a Royal Arch Chapter is the proper equivalent of the *Tiler* in a Lodge, is in some jurisdictions replaced by the word *Janitor.* There is no good authority for the usage.

Japan. Freemasonry was introduced in Japan by the establishment at Yokohama, in 1865, of a Lodge by the Grand Lodge of England. A Masonic hall was built at Yokohama in 1869.

Japanese Faith. See *Kojiki;* also *Nihongi.*

Japhet. Heb., יפת. The eldest son of Noah. It is said that the first ark—the ark of safety, the archetype of the tabernacle—was constructed by Shem, Ham, and Japhet under the superintendence of Noah. Hence these are significant words in the Royal Arch Degree.

Jasher, Book of. (Heb., Sepher hayashar, *The Book of the Upright.*) One of the lost books of the ancient Hebrews, which is quoted twice (Josh. x. 13; 2 Sam. i. 18). A Hebrew minstrelsy, recording the warlike deeds of the national heroes, and singing the praises of eminent or celebrated men. An original is said to be in the library at Samarkand.

Jasper. Heb., ישפר. A precious stone of a dullish green color, which was the last of the twelve inserted in the high priest's breastplate, according to the authorized version; but the Vulgate translation more correctly makes it the third stone of the second row. It represented the tribe of Zebulun.

Jebusite. See *Ornan.*

Jedadiah. A special name given to King Solomon at his birth. It signifies "beloved of God."

Jehoshaphat. East of Jerusalem, between Mount Zion and the Mount of Olives, lies the Valley of Jehoshaphat. In the most recent rituals this word has lost its significance, but in the older ones it played an important part. There was in reality no such valley in ancient Judea, nor is there any mention of it in Scripture, except once by the prophet Joel. The name is altogether modern. But, as the Hebrew means *the judgment of God,* and as the prophecy of Joel declared that God would there judge the heathen for their deeds against the Israelites, it came at last to be believed by the Jews, which belief is shared by the Mohammedans, that the Valley of Jehoshaphat is to be the place of the last judgment. Hence it was invested with a peculiar degree of sanctity as a holy place. The idea was borrowed by the Masons of the last century, who considered it as the symbol of holy ground. Thus, in the earliest rituals we find this language:

"Where does the Lodge stand?"

"Upon holy ground, or the highest hill or lowest vale, or in the Valley of Jehoshaphat, or any other secret place."

This reference to the Valley of Jehoshaphat as the symbol of the ground floor of the Lodge was in this country retained until a very recent period; and the expression which alludes to it in the ritual of the Second Degree has only within a few years past been abandoned. Hutchinson referred to this symbolism, when he said that the Spiritual Lodge was placed in the Valley of Jehoshaphat to imply that the principles of Masonry are derived from the knowledge of God, and are established in the judgments of the Lord.

Jehovah. Jehovah is, of all the significant words of Masonry, by far the most important. Reghellini very properly calls it "the basis of our dogma and of our mysteries." In Hebrew it consists of four letters, יהוה, and hence is called the *Tetragrammaton,* or four-lettered name; and because it was forbidden to a Jew, as it is to a Mason, to pronounce it, it is also called the Ineffable or Unpronounceable name. For its history we must refer to the sixth chapter of Exodus (verses 2, 3). When Moses returned discouraged from his first visit to Pharaoh, and complained to the Lord that the only result of his mission had been to incense the Egyptian king, and to excite him to the exaction of greater burdens from the oppressed Israelites, God encouraged the patriarch by the promise of the great wonders which he would perform in behalf of his people, and confirmed the promise by imparting to him that sublime name by which he had not hitherto been known: "And God," says the sacred writer, "spake unto Moses, and said unto him, I am Jehovah: and I appeared unto Abraham, unto Isaac, and unto Jacob as El Shaddai, but by my name Jehovah was I not known unto them."

This Ineffable name is derived from the substantive verb היה, hayah, *to be;* and combining, as it does, in its formation the present, past, and future significations of the verb, it is considered as designating God in his immutable and eternal existence. This idea is carried by the Rabbis to such an extent, that Menasseh Ben Israel says that its four letters may be so arranged by permutations as to form twelve words, every one of which is a modification of the verb *to be,* and hence it is called the *nomen substantiæ vel essentiæ,* the name of his substance or existence.

The first thing that attracts our attention in the investigation of this name is the ancient regulation, still existing, by which it was made unlawful to pronounce it. This, perhaps, originally arose from a wish to conceal it from the surrounding heathen nations, so that they might not desecrate it by applying it to their idols. Whatever may have been the reason, the rule was imperative among the Jews. The Talmud, in one of its treatises, the "Sanhedrim," which treats of the question, Who of the Israelites shall have future life and who shall not? says: "Even he who *thinks* the name of God with its true letters forfeits his future life." Abraham Ben David Halevi, when discussing the names of God, says: "But the name יהוה we are not allowed to pronounce. In its original meaning it is conferred upon no other being, and therefore we abstain from giving any explanation of it." We learn from Jerome, Origen, and Eusebius that in their time the Jews wrote the name in their copies of the Bible in Samaritan instead of Hebrew letters, in order to veil it from the inspection of the profane. Capellus says that the rule that the holy name was not to be pronounced was derived from a tradition, based on a passage in Leviticus (xxiv. 16), which says that he who blasphemeth the name of Jehovah shall be put to death; and he translates this passage, "whosoever shall pronounce the name Jehovah shall suffer death," because the word *nokeb,* here translated "to

blaspheme," means also "to pronounce distinctly, to call by name." Another reason for the rule is to be found in a rabbinical misinterpretation of a passage in Exodus.

In the third chapter of that book, when Moses asks of God what is His name, He replies "I AM THAT I AM; and He said, Thus shalt thou say unto the children of Israel, I AM hath sent me unto you," and he adds, "this is my name forever." Now, the Hebrew word I AM is אהיה, *Ehyeh.* But as Mendelssohn has correctly observed, there is no essential difference between אהיה, in the sixth chapter and יהוה in the third, the former being the first person singular, and the latter the third person of the same verb (the future used in the present sense of the verb *to be*); and hence what was said of the name Ehyeh was applied by the Rabbis to the name Jehovah. But of Ehyeh God had said, "this is my name *forever*." Now the word *forever* is represented in the original by לעלם, *l'olam;* but the Rabbis, says Capellus, by the change of a single letter, made *l'olam*, forever, read as if it had been written *l'alam*, which means "to be concealed," and hence the passage was translated "this is my name to be concealed," instead of "this is my name forever." And thus Josephus, in writing upon this subject, uses the following expressions: "Whereupon God declared to Moses His holy name, which had never been discovered to men before; concerning which it is not lawful for me to say any more." In obedience to this law, whenever the word Jehovah occurs to a Jew in reading, he abstains from pronouncing it, and substitutes in its place the word אדני, *Adonai.* Thus, instead of saying "holiness to Jehovah," as it is in the original, he would say "holiness to Adonai." And this same reverential reticence has been preserved by our translators in the authorized version, who, wherever Jehovah occurs, have, with a few exceptions, translated it by the word "Lord," the very passage just quoted, being rendered "holiness to the Lord."

Maimonides tells us that the knowledge of this word was confined to the *hachamin* or wise men, who communicated its true pronunciation and the mysteries connected with it only on the Sabbath day, to such of their disciples as were found worthy; but how it was to be sounded, or with what vocal sounds its four letters were to be uttered, was utterly unknown to the people. Once a year, namely, on the day of atonement, the holy name was pronounced with the sound of its letters and with the utmost veneration by the high priest in the Sanctuary. The last priest who pronounced it, says Rabbi Bechai, was Simeon the Just, and his successors used in blessing only the twelve-lettered name. After the destruction of the city and Temple by Vespasian, the pronunciation of it ceased, for it was not lawful to pronounce it anywhere except in the Temple at Jerusalem, and thus the true and genuine pronunciation of the name was entirely lost to the Jewish people. Nor is it now known how it was originally pronounced. The Greeks called it JAO; the Romans, JOVA; the Samaritans always pronounced it JAHVE.

The task is difficult to make one unacquainted with the peculiarities of the Hebrew language comprehend how the pronunciation of a word whose letters are preserved can be wholly lost. It may, however, be attempted. The Hebrew alphabet consists entirely of consonants. The vowel sounds were originally supplied by the reader while reading, he being previously made acquainted with the correct pronunciation of each word; and if he did not possess this knowledge, the letters before him could not supply it, and he was, of course, unable to pronounce the word. Every Hebrew, however, knew from practise the vocal sounds with which the consonants were pronounced in the different words, in the same manner as every English reader knows the different sounds of *a* in *hat, hate, far, was*, and that *knt* is pronounced *knight.* The words "God save the republic," written in the Hebrew method, would appear thus: "Gd sv th rpblc." Now, this incommunicable name of God consists of four letters, Yod, He, Vau, and He, equivalent in English to the combination JHVH. It is evident that these four letters cannot, in our language, be pronounced, unless at least two vowels be supplied. Neither can they in Hebrew. In other words, the vowels were known to the Jew, because he heard the words continually pronounced, just as we know that *Mr.* stands for *Mister*, because we continually hear this combination so pronounced. But the name of God, of which these four letters are symbols, was never pronounced, but another word, *Adonai*, substituted for it; and hence, as the letters themselves have no vocal power, the Jew, not knowing the implied vowels, was unable to supply them, and thus the pronunciation of the word was in time entirely lost.

Hence some of the most learned of the Jewish writers even doubt whether Jehovah is the true pronunciation, and say that the recovery of the name is one of the mysteries that will be revealed only at the coming of the Messiah. They attribute the loss to the fact that the Masoretic or vowel points belonging to another word were applied to the sacred name, whereby in time a confusion occurred in its vocalization.

In the Ineffable degrees of the Scottish Rite, there is a tradition that the pronunciation varied among the patriarchs in different ages. Methuselah, Lamech, and Noah pronounced it *Juha;* Shem, Arphaxad, Selah, Heber, and Peleg pronounced it *Jeva;* Reu, Serug, Nahor, Terah, Abraham, Isaac, and Judah, called it *Jova;* by Hezrom and Ram it was pronounced *Jevo;* by Aminadab and Nasshon, *Jevah;* by Salmon, Boaz, and Obed, *Johe;* by Jesse and David, *Jehovah.* And they imply that none of these was the right pronunciation, which was only in the possession of Enoch, Jacob, and Moses, whose names are, therefore, not mentioned in this list. In all these words it must be noticed that the J is to be pronounced as Y, the *a* as in *father*, and the *e* as *a* in *fate.*

Thus, Je-ho-vah would be pronounced Yay-ho-vah.

The Jews believed that this holy name, which they held in the highest veneration, was possessed of unbounded powers. "He who pronounces it," said they, "shakes heaven and earth, and inspires the very angels with astonishment and terror. There is a sovereign authority in this name: it governs the world by its power. The other names and surnames of the Deity are ranged about it like officers and soldiers about their sovereigns and generals: from this king-name they receive their orders, and obey."

It was called the *Shem hamphorash*, the explanatory or declaratory name, because it alone, of all the Divine names, distinctly explains or declares what is the true essence of the Deity.

Among the Essenes, this sacred name, which was never uttered aloud, but always in a whisper, was one of the mysteries of their initiation, which candidates were bound by a solemn oath never to divulge.

It is reported to have been, under a modified form, a password in the Egyptian mysteries, and none, says Schiller, dare enter the temple of Serapis who did not bear on his breast or forehead the name *Jao* or *Je-ha-ho;* a name almost equivalent in sound to that of Jehovah, and probably of identical import; and no name was uttered in Egypt with more reverence.

The Rabbis asserted that it was engraved on the rod of Moses, and enabled him to perform all his miracles. Indeed, the Talmud says that it was by the utterance of this awful name, and not by a club, that he slew the Egyptian; although it fails to tell us how he got at that time his knowledge of it.

That scurrilous book of the Jews of the Middle Ages, called the *Toldoth Jeshu*, attributes all the wonderful works of Jesus Christ to the potency of this incommunicable name, which he is said to have abstracted from the Temple, and worn about him. But it would be tedious and unprofitable to relate all the superstitious myths that have been invented about this name.

And now as to the grammatical signification of this important word. Gesenius (*Thesaur.*, ii., 577) thinks—and many modern scholars agree with him—that the word is the future form of the Hiphil conjugation of the verb *to be*, pronounced *Yavah*, and therefore that it denotes "He who made to exist, called into existence," that is, the Creator. The more generally accepted definition of the name is, that it expresses the eternal and unchangeable existence of God in respect to the past, the present, and the future. The word יהוה is derived from the substantive verb היה, hayah, *to be*, and in its four letters combines those of the past, present and future of the verb. The letter י in the beginning, says Buxtorf (*de Nomine*, v.), is a characteristic of the future; the ו in the middle, of the participle or present time; and the ה at the end, of the past. Thus, out of יהוה we get היה, *he was;* הוה, *he is;* and יהיה, *he will be*. Hence, among other titles it received that of *nomen essentiæ*, because it shows the essential nature of God's eternal existence. The other names of God define His power, wisdom, goodness, and other qualities; but this alone defines His existence.

It has been a controverted point whether this name was made known for the first time to Moses, or whether the patriarchs had been previously acquainted with it. The generally recognized opinion now is, and the records of Genesis and Exodus sustain it, that the name was known to the patriarchs, but not in its essential meaning, into which Moses was the first to be initiated. In the language of Aben Ezra, "Certainly the name was already known to the patriarchs, but only as an uncomprehended and unmeaning noun, not as a descriptive, appellative one, indicative of the attributes and qualities of the Deity." "It is manifest," says Kallisch (*Comm. on Ex.*), "that Moses, in being initiated into the holy and comprehensive name of the Deity, obtains a superiority over the patriarchs, who, although perhaps from the beginning more believing than the long-wavering Moses, lived more in the sphere of innocent, childlike obedience than of manly, spiritual enlightenment." This, too, is the Masonic doctrine. In Freemasonry the Holy Name is the representative of the Word, which is itself the symbol of the nature of God. To know the Word is to know the true nature and essence of the Grand Architect.

When the pronunciation of the name was first interdicted to the people is not certainly known. Leusden says it was a rabbinical prohibition, and was probably made at the second Temple. The statement of the Rabbi Bechai, already cited, that the word was pronounced for the last time by Simeon, before the spoliation by the Roman emperor Vespasian, would seem to indicate that it was known at the second Temple, although its utterance was forbidden, which would coincide with the Masonic tradition that it was discovered while the foundations of the second Temple were being laid. But the general opinion is, that the prohibition commenced in the time of Moses, the rabbinical writers tracing it to the law of Leviticus, already cited. This, too, is the theory of Masonry, which also preserves a tradition that the prohibition would have been removed at the first Temple, had not a well-known occurrence prevented it. But this is not to be viewed as an historic statement, but only as a medium of creating a symbol.

The Jews had four symbols by which they expressed this Ineffable name of God: the first and most common was two Yods, with a Sheva and the point Kametz underneath, thus, יְיְ; the second was three points in a radiated form like a diadem, thus, \|/, to represent, in all probability, the sovereignty of God; the third was a Yod within an equilateral triangle, which the Kabbalists explained as a ray of light, whose luster was too transcendent to be contemplated by human eyes; and the fourth was the letter שׁ, which is the initial letter of *Shadai*, "the Almighty," and

was the symbol usually placed upon their phylacteries. Buxtorf mentions a fifth method which was by three Yods, with a Kametz underneath '‫יְ‬', enclosed in a circle.

In Freemasonry, the equilateral triangle, called the delta, with or without a *Yod* in the center, the Yod alone, and the letter G, are recognized as symbols of the sacred and Ineffable name.

The history of the introduction of this word into the ritualism of Freemasonry would be highly interesting, were it not so obscure. Being in almost all respects an esoteric symbol, nearly all that we know of its Masonic relations is derived from tradition; and as to written records on the subject, we are compelled, in general, to depend on mere intimations or allusions, which are not always distinct in their meaning. In Masonry, as in the Hebrew mysteries, it was under the different appellations of the Word, the True Word, or the Lost Word, the symbol of the knowledge of Divine Truth, or the true nature of God.

That this name, in its mystical use, was not unknown to the Medieval Freemasons there can be no doubt. Many of their architectural emblems show that they possessed this knowledge. Nor can there be any more doubt that through them it came to their successors, the Freemasons of the beginning of the eighteenth century. No one can read the *Defence of Masonry*, written in 1730, without being convinced that the author (probably Martin Clare, *q. v.*) was well acquainted with this name; although he is, of course, careful to make no very distinct reference to it, except in one instance. "The occasion," he says, "of the brethren searching so diligently for their Master was, it seems, to receive from him the *secret Word of Masonry*, which should be delivered down to their fraternity in after ages." (*Constitutions*, 1738, p. 225.)

It is now conceded, from indisputable evidence, that the holy name was, in the earlier years, and, indeed, up to the middle of the last century, attached to the Third Degree, and then called the Master's Word. On some early tracing boards of the Third Degree among the emblems displayed is a coffin, on which is inscribed, in capital letters, the word JEHOVAH. Hutchinson, who wrote in 1774, makes no reference whatever to the Royal Arch, although that system had, by that time, been partially established in England; but in his lectures to Master Masons and on the Third Degree refers to "the mystic word, the Tetragrammaton." (*Lecture* X., p. 180.) Oliver tells us distinctly that it was the Master's Word until Dunckerley took it out of the degree and transferred it to the Royal Arch. That it was so on the Continent, we have the unmistakable testimony of Guillemain de St. Victor, who says, in his *Adonhiramite Masonry* (p. 90), that Solomon placed a medal on the tomb of Hiram, "on which was engraved *Jehova*, the old Master's Word, and which signifies the Supreme Being."

So far, then, these facts appear to be established: that this Ineffable name was known to the Operative Freemasons of the Middle Ages; that it was derived from them by the Speculative Masons, who, in 1717, revived the Order in England; that they knew it as Master Masons; and that it continued to be the Master's Word until late in that century, when it was removed by Dunckerley into the Royal Arch.

Although there is, perhaps, no point in the esoteric system of Masonry more clearly established than that the Tetragrammaton is the true omnific word, yet innovations have been admitted, by which, in some jurisdictions in this country, that word has been changed into three others, which simply signify Divine names in other languages, but have none of the sublime symbolism that belongs to the true name of God. It is true that the General Grand Chapter of the United States adopted a regulation disapproving of the innovation of these explanatory words, and restoring the Tetragrammaton; but this declaration of what might almost be considered a truism in Masonry has been met with open opposition or reluctant obedience in some places.

The Grand Chapter of England has fallen into the same error, and abandoned the teachings of Dunckerley, the founder of the Royal Arch in that country, as some of the Grand Chapters in America did those of Webb, who was the founder of the system here. It is well, therefore, to inquire what was the omnific word when the Royal Arch system was first invented.

We have the authority of Oliver, who had the best opportunity of any man in England of knowing the facts, for saying that Dunckerley established the Royal Arch for the modern Grand Lodge; that he wisely borrowed many things from Ramsay and Dermott; and that he boldly transplanted the word Jehovah from the Master's Degree and placed it in his new system.*

Now, what was "THE WORD" of the Royal Arch, as understood by Dunckerley? We have no difficulty here, for he himself answers the question. To the first edition of the *Laws and Regulations of the Royal Arch*, published in 1782, there is prefixed an essay on Freemasonry, which is attributed to Dunckerley. In this he makes the following remarks:

"It must be observed that the expression THE WORD is not to be understood as a watchword only, after the manner of those annexed to the several degrees of the Craft; but also theologically, as a term, thereby to convey to the mind some idea of that Grand Being who is the sole author of our existence; and to carry along with it the most solemn veneration for his sacred Name and Word, as well as the most clear and perfect elucidation of his power and attributes that the human mind is capable of receiving. And this is the light in which the

* But more recent authorities, such as R. F. Gould (*Hist. of F. M.*) and H. Sadler (*Life of Dunckerley*), have cast great doubt on these statements (see *Dunckerley*). [E. L. H.]

Name and Word hath always been considered, from the remotest ages, amongst us Christians and the Jews."

And then, after giving the well-known history from Josephus of the word, which, to remove all doubt of what it is, he says is the "Shem Hamphorash, or the Unutterable Name," he adds: "Philo, the learned Jew, tells us not only that the word was lost, but also the time when, and the reason why. But, to make an end of these unprofitable disputes among the learned, be it remembered that they all concur with the Royal Arch Masons in others much more essential: first, that the Name or Word is expressive of SELF-EXISTENCE AND ETERNITY; and, secondly, that it can be applicable only to that GREAT BEING who WAS and IS and WILL BE."

Notwithstanding this explicit and unmistakable declaration of the founder of the English Royal Arch, that the Tetragrammaton is the omnific word, the present system in England has rejected it, and substituted in its place three other words, the second of which is wholly unmeaning.

In the American system, as revised by Thomas Smith Webb, there can be no doubt that the Tetragrammaton was recognized as the omnific word. In the *Freemasons' Monitor*, prepared by him for monitorial instruction, he has inserted, among the passages of Scripture to be read during an exaltation, the following from Exodus, which is the last in order, and which anyone at all acquainted with the ritual will at once see is appropriated to the time of the *euresis* or *discovery of the Word*.

"And God spake unto Moses, and said unto him, I am the Lord, and I appeared unto Abraham, and unto Isaac, and unto Jacob by the name of God Almighty, but by my name JEHOVAH was I not known to them."

From this it will be evident that Webb recognized the word Jehovah, and not the three other words that have since been substituted for them by some Grand Chapters in America, and which it is probable were originally used by Webb as merely explanatory or declaratory of the Divine nature of the other and principal word. And this is in accordance with one of the traditions of the degree, that they were placed on the substitute ark around the real word, as a key to explain its signification.

To call anything else but this four-lettered name an omnific word—an all-creating and all-performing word—either in Masonry or in Hebrew symbolism, whence Masonry derived it, is to oppose all the doctrines of the Talmudists, the Kabbalists, and the Gnostics, and to repudiate the teachings of every Hebrew scholar from Buxtorf to Gesenius. To fight the battle against such odds is to secure defeat. It shows more of boldness than of discretion. And hence the General Grand Chapter of the United States has very wisely restored the word Jehovah to its proper place. It is only in the York and in the American Rites that this error has ever existed. In every other Rite the Tetragrammaton is recognized as the true word.

Jephthah. A Judge of Israel, and the leader of the Gileadites in their war against the Ephraimites, which terminated in the slaughter of so many of the latter at the passes of the river Jordan. (See *Ephraimites.*)

Jephthah's Daughter. The First Degree in the American Order of the Eastern Star, or Adoptive Rite. It inculcates obedience. Color, blue. (See *Eastern Star, Order of the.*)

Jericho, Heroine of. See *Heroine of Jericho.*

Jermyn, Henry. Anderson says (*Constitutions*, 1738, p. 101) that Henry Jermyn, Earl of St. Albans, was Grand Master and held a General Assembly on the 27th of December, 1663, at which six regulations (which he quotes) were made. Roberts, in his edition of the *Old Constitutions* printed in 1722, the earliest printed Masonic book that we have, refers also to this General Assembly; the date of which he, however, makes the 8th of December. Roberts gives what he calls the Additional Orders and Constitutions. The Harleian MS., in the British Museum, numbered 1942, which Hughan supposes to have the date of 1670, and which he has published in his *Old Charges of the British Freemasons* (p. 52, ed. 1872), contains also six "new articles." The articles in Roberts's and the Harleian MS. are identical, but the wording is slightly altered by Anderson after his usual fashion. Of these new articles, one of the most important is that which prescribes that the society of Freemasons shall thereafter be governed by a Master and Wardens. Bro. Hughan thinks that there is no evidence of the statement that a General Assembly was held in 1663. But it would seem that the concurring testimony of Roberts in 1722, and of Anderson in 1738, with the significant fact that the charges are found in a manuscript written seven years after, give some plausibility to the statement that a General Assembly was held at that time.

Jekson. This word is found in the French *Cahiers* of the high degrees. It is undoubtedly a corruption of *Jacquesson*, and this a mongrel word compounded of the French *Jacques* and the English *son*, and means the *son of James*, that is, James II. It refers to Charles Edward the Pretender, who was the son of that abdicated and exiled monarch. It is a significant relic of the system attempted to be introduced by the adherents of the house of Stuart, and by which they expected to enlist Masonry as an instrument to effect the restoration of the Pretender to the throne of England. For this purpose they had altered the legend of the Third Degree, making it applicable to James II., who, being the son of Henrietta Maria, the widow of Charles I., was designated as "the widow's son."

Jena, Congress of. Jena is a city of Saxe-Weimar, in Thuringia. A Masonic Congress was convoked there in 1763, by the Lodge of Strict Observance, under the presidency of Johnson, a Masonic charlatan, whose real name was Becker. In this Congress the doc-

trine was announced that the Freemasons were the successors of the Knights Templar, a dogma peculiarly characteristic of the Rite of Strict Observance. In the year 1764, a second Congress was convoked by Johnson or Leucht with the desire of authoritatively establishing his doctrine of the connection between Templarism and Masonry. The empirical character of Johnson was here discovered by the Baron Hund, and he was denounced, and subsequently punished at Magdeburg by the public authorities.

Jerusalem. The capital of Judea, and memorable in Masonic history as the place where was erected the Temple of Solomon. It is early mentioned in Scripture, and is supposed to be the Salem of which Melchizedek was king. At the time that the Israelites entered the Promised Land, the city was in possession of the Jebusites, from whom, after the death of Joshua, it was conquered, and afterward inhabited by the tribes of Judah and Benjamin. The Jebusites were not, however, driven out; and we learn that David purchased Mount Moriah from Ornan or Araunah the Jebusite as a site for the Temple. It is only in reference to this Temple that Jerusalem is connected with the legends of Ancient Craft Masonry. In the degrees of chivalry it is also important, because it was the city where the holy places were situated, and for the possession of which the Crusaders so long and so bravely contested. It was there, too, that the Templars and the Hospitalers were established as Orders of religious and military knighthood.

Modern Speculative Masonry was introduced into Jerusalem by the establishment of a Lodge in 1872, the warrant for which, on the application of Robert Morris and others, was granted by the Grand Lodge of Canada. Recently a Lodge has been warranted in England to meet at Chester, but to be in due course removed to Jerusalem, named "King Solomon's Temple," No. 3464.

Jerusalem, Knight of. See *Knight of Jerusalem.*

Jerusalem, New. The symbolic name of the Christian church (Rev. xxi. 2–21; iii. 12). The Apostle John (Rev. xxi.), from the summit of a high mountain, beheld, in a pictorial symbol or scenic representation, a city resplendent with celestial brightness, which seemed to descend from the heavens to the earth. It was stated to be a square of about 400 miles, or 12,000 stadia, equal to about 16,000 miles in circumference—of course, a mystical number, denoting that the city was capable of holding almost countless myriads of inhabitants. The New Jerusalem was beheld, like Jacob's ladder, extending from earth to heaven. It plays an important part in the ritual of the Nineteenth Degree, or Grand Pontiff of the Ancient and Accepted Scottish Rite, where the descent of the New Jerusalem is a symbol of the descent of the empire of Light and Truth upon the earth.

Jerusalem, Prince of. See *Prince of Jerusalem.*

Jerusalem Word. In the Grand Mystery of the Freemasons Discovered of 1724 occurs the following question and answer:

"*Q.* Give me the Jerusalem Word.

"*A.* Giblin."

The origin of this phrase may perhaps be thus traced. The theory that after the completion of the Temple a portion of the workmen traveled abroad to seek employment, while another portion remained at Jerusalem, was well known to the Fraternity at the beginning of the last century. It is amply detailed in that old manuscript known as the York MS., which is now lost, but was translated by Krause, and inserted in his *Kunsturkunden.* It may be supposed that this "Jerusalem Word" was the word which the Masons used at Jerusalem, while the "Universal Word," which is given in the next question and answer, was the word common to the Craft everywhere. The Jerusalem Word, as such, is no longer in use, but the Universal Word is still found in the First Degree.

Jesse. A large candlestick, of metal, with many sconces, hanging from the ceiling, and symbolically referring to the Branch of Jesse.

Jesuits. In the last century the Jesuits were charged with having an intimate connection with Freemasonry, and the invention of the degree of Kadosh was even attributed to those members of the Society who constituted the College of Clermont. This theory of a Jesuitical Masonry seems to have originated with the Illuminati, who were probably governed in its promulgation by a desire to depreciate the character of all other Masonic systems in comparison with their own, where no such priestly interference was permitted. Barruel scoffs at the idea of such a connection, and calls it (*Hist. de Ja.*, iv., 287) "la fable de la Franc-Maçonnerie Jésuitique." For once he is right. Like oil and water, the tolerance of Freemasonry and the intolerance of the "Society of Jesus" cannot commingle.

Yet it cannot be denied that, while the Jesuits have had no part in the construction of pure Freemasonry, there are reasons for believing that they took an interest in the invention of some degrees and systems which were intended to advance their own interests. But wherever they touched the Institution they left the trail of the serpent. They sought to convert its pure philanthropy and toleration into political intrigue and religious bigotry. Hence it is believed that they had something to do with the invention of those degrees, which were intended to aid the exiled house of Stuart in its efforts to regain the English throne, because they believed that would secure the restoration in England of the Roman Catholic religion. Almost a library of books has been written on both sides of this subject in Germany and in France.

Jetzirah, Book of. See *Jezirah.*

Jewel of an Ancient Grand Master. A Masonic tradition informs us that the jewel of an ancient Grand Master at the Temple was

the square and compass with the letter G between. This was the jewel worn by Hiram Abif on the day which deprived the Craft of his invaluable services, and which was subsequently found upon him.

Jewel, Member's. In many Lodges, especially among the Germans, where it is called "Mitglieder Zeichen," a jewel is provided for every member, and presented to him on his initiation or affiliation. It is to be worn from the buttonhole, and generally contains the name of the Lodge and some Masonic device.

Jewels, Immovable. See *Jewels of a Lodge.*

Jewels, Movable. See *Jewels of a Lodge.*

Jewels of a Lodge. Every Lodge is furnished with six jewels, three of which are movable and three immovable. They are termed jewels, says Oliver, because they have a moral tendency which renders them jewels of inestimable value. The movable jewels, so called because they are not confined to any particular part of the Lodge, are the rough ashlar, the perfect ashlar, and the trestle-board. The immovable jewels are the square, the level, and the plumb. They are termed immovable, because they are appropriated to particular parts of the Lodge, where alone they should be found, namely, the square to the east, the level to the west, and the plumb to the south. In the English system the division is the reverse of this. There, the square, level, and plumb are called movable jewels, because they pass from the three officers who wear them to their successors.

Jewels, Official. Jewels are the names applied to the emblems worn by the officers of Masonic bodies as distinctive badges of their offices. For the purpose of reference, the jewels worn in Symbolic Lodges, in Chapters, Councils, and Encampments are here appended.

1. *In Symbolic Lodges.*

W.·. Master	wears	a square.
Senior Warden	"	a level.
Junior Warden	"	a plumb.
Treasurer	"	cross keys.
Secretary	"	cross pens.
Senior Deacon	"	square and compass, sun in the center.
Junior Deacon	"	square and compass, moon in the center.
Steward	"	a cornucopia.
Tiler	"	cross swords.

The jewels are of silver in a subordinate Lodge, and of gold in a Grand Lodge. In English Lodges, the jewel of the Deacon is a dove and olive branch.

2. *In Royal Arch Chapters.*

High Priest	wears	a miter.
King	"	a level surmounted by a crown.
Scribe	"	a plumb-rule surmounted by a turban.
Captain of the Host	wears	a triangular plate inscribed with a soldier.
Principal Sojourner	"	a triangular plate inscribed with a pilgrim.
Royal Arch Captain	"	a sword.
Grand Master of the Veils	"	a sword.

The other officers as in a Symbolic Lodge All the jewels are of gold, and suspended within an equilateral triangle.

3. *In Royal and Select Councils.*

T. I. Grand Master	wears	a trowel and square.
I. Hiram of Tyre	"	a trowel and level.
Principal Conductor of the Works	"	a trowel and plumb.
Treasurer	"	a trowel and cross keys.
Recorder	"	a trowel and cross pens.
Captain of the Guards	"	a trowel and sword.
Steward	"	a trowel and cross swords.
Marshal	"	a trowel and baton.

If a Conductor of the Council is used, he wears a trowel and baton, and then a scroll is added to the Marshal's baton to distinguish the two officers.

All the jewels are of silver, and are enclosed within an equilateral triangle.

4. *In Commanderies of Knights Templars.*

Em't Commander	wears	a cross surmounted by rays of light.
Generalissimo	"	a square surmounted by a paschal lamb.
Captain-General	"	a level surmounted by a cock.
Prelate	"	a triple triangle.
Senior Warden	"	a hollow square and sword of justice.
Junior Warden	"	eagle and flaming sword.
Treasurer	"	cross keys.
Recorder	"	cross pens.
Standard-Bearer	"	a plumb surmounted by a banner.
Warder	"	a square plate inscribed with a trumpet and cross swords.
Three Guards	"	a square plate inscribed with a battle-ax.

The jewels are of silver.

Jewels, Precious. In the lectures of the Second and Third degrees, allusion is made to certain moral qualities, which, as they are intended to elucidate and impress the most important moral principles of the degree, are for

their great value called the Precious Jewels of a Fellow-Craft and the Precious Jewels of a Master Mason. There are three in each degree, and they are referred to by the *Alarm*. Their explanation is esoteric.

Jewish Rites and Ceremonies. A period of excitement in favor of the rites of Judaism centered upon and pervaded the people of various nations during the early portion of the fourteenth century. The ceremonies grew and took fast hold upon the minds of the Romans, and, combining with their forms, spread to Constantinople and northwest to Germany and France. The Jewish rites, traditions, and legends thus entered the mystic schools. It was during this period that the legend of Hiram first became known (Bro. G. H. Fort), and Jehovah's name, and mystic forms were transmitted from Byzantine workmen to Teutonic sodalities and German gilds. Thus, also, when the Christian enthusiasm pervaded the North, Paganism gave way, and the formal toasts at the ceremonial banquets were drunk in the name of the saints in lieu of those of the Pagan gods.

Jews, Disqualification of. The great principles of religious and political toleration which peculiarly characterize Freemasonry would legitimately make no religious faith which recognized a Supreme Being a disqualification for initiation. But, unfortunately, these principles have not always been regarded, and from an early period the German Lodges, and especially the Prussian, were reluctant to accord admission to Jews. This action has given great offense to the Grand Lodges of other countries which were more liberal in their views, and were more in accord with the Masonic spirit, and was productive of dissensions among the Masons of Germany, many of whom were opposed to this intolerant policy. But a better spirit now prevails; and very recently the Grand Lodge of the Three Globes at Berlin, the leading Masonic body of Prussia, has removed the interdict, and Judaism is there no longer a disqualification for initiation.

Jezeeds. A Mohammedan sect in Turkey and Persia, which took its name from the founder, Jezeed, a chief who slew the sons of Ali, the father-in-law of Mohammed. They were ignorant in the extreme, having faith in both the Hebrew Bible and Koran; their hymns were addressed, without distinction, to Moses, Christ, or Mohammed.

Jezirah or **Jetzirah, Book of.** יצירה ספר, i. e., Book of the Creation. A Kabbalistic work, which is claimed by the Kabbalists as their first and oldest code of doctrines, although it has no real affinity with the tenets of the Kabbala. The authorship of it is attributed to the patriarch Abraham; but the actual date of its first appearance is supposed to be about the ninth century. Steinschneider says that it opens the literature of the Secret Doctrine. Its fundamental idea is, that in the ten digits and the twenty letters of the Hebrew alphabet we are to find the origin of all things. Landauer, a German Hebraist, thinks that the author of the *Jetzirah* borrowed his doctrine of numbers from the School of Pythagoras, which is very probable. The old Masons, it is probable, derived some of their mystical ideas of sacred numbers from this work.

Joabert. This, according to the legends of the high degrees, was the name of the chief favorite of Solomon, who incurred the displeasure of Hiram of Tyre on a certain occasion, but was subsequently pardoned, and, on account of the great attachment he had shown to the person of his master, was appointed the Secretary of Solomon and Hiram in their most intimate relations. He was afterward still further promoted by Solomon, and appointed with Tito and Adoniram a Provost and Judge. He distinguished himself in his successful efforts to bring certain traitors to condign punishment, and although by his rashness he at first excited the anger of the king, he was subsequently forgiven, and eventually received the highest reward that Solomon could bestow, by being made an Elect, Perfect, and Sublime Mason. The name is evidently not Hebrew, or must at least have undergone much corruption, for in its present form it cannot be traced to a Hebrew root. Lenning says (*Encyclopädie*) that it is *Johaben*, or, more properly, *Ihaoben*, which he interprets the Son of God; but it would be difficult to find any such meaning according to the recognized rules of the Hebrew etymology.

Joachim, Order of. A secret association instituted in Germany toward the end of the last century. Its recipients swore that they believed in the Trinity, and would never waltz. None but nobles, their wives and children, were admitted. It had no connection with Masonry.

Jobel. (Heb., יובל, *jubilans.*) A name of God used in the Thirteenth Degree, A. A. Scottish Rite.

Jochebed. (Heb., יוכבד, *God-glorified.*) The wife of Amram, and mother of Miriam, Moses, and Aaron.

Johaben. (Heb., יהוֹ-בן; Latin, *Filius Dei.*) A name of continuous use in the A. A. Scottish Rite, and also mentioned in the Fourth and Fifth degrees of the modern French Rite.

Johannite Masonry. A term introduced by Dr. Oliver to designate the system of Masonry, of which the two Sts. John are recognized as the patrons, and to whom the Lodges are dedicated, in contradistinction to the more recent system of Dr. Hemming, in which the dedication is to Moses and Solomon. Oliver was much opposed to the change, and wrote an interesting work on the subject entitled *A Mirror for the Johannite Masons*, which was published in 1848. According to his definition, the system practised in the United States is Johannite Masonry.

Johannites. A Masonico-religious sect established in Paris, in 1814, by Fabré-Palaprat, and attached to the Order of the Temple, of which he was the Grand Master. (See *Levitikon* and *Temple, Order of the.*)

John's Brothers. In the charter of Cologne, it is said that before the year 1440 the

society of Freemasons was known by no other name than that of "John's Brothers," *Joannaeorum fratrum;* that they then began to be called at Valenciennes, Free and Accepted Masons; and that at that time, in some parts of Flanders, by the assistance and riches of the brotherhood, the first hospitals were erected for the relief of such as were afflicted with St. Anthony's fire. In another part of the charter it is said that the authors of the associations were called "Brothers consecrated to John"—*fratres Joanni Sacros*—because "they followed the example and imitation of John the Baptist."

Johnson. Sometimes spelled Johnstone. An adventurer, and Masonic charlatan, whose real name was Leucht. He assumed Masonry as a disguise under which he could carry on his impositions. He appeared first at Jena, in the beginning of the year 1763, and proclaimed that he had been deputed by the chiefs of Templar Masonry in Scotland to introduce a reform into the German Lodges. He established a Chapter of Strict Observance (the Rite then dominating in Germany), and assumed the dignity of Grand Prior. He made war upon Rosa, the founder of the Rosaic Rite, and upon the Grand Lodge of the Three Globes, which then sustained that enthusiast. Many of the German Lodges succumbed to his pretensions, and, surrendering their Warrants, gave in their adhesion to Johnson. Von Hund himself was at first deceived by him; but in 1764, at Altenberg, having discovered that Johnson had been formerly, under the name of Becker, the secretary of the Prince of Bernberg, whose confidence he had betrayed; that during the seven years' war he had been wandering about, becoming, finally, the servant of a Mason, whose papers he had stolen, and that by means of these papers he had been passing himself as that individual, B. von Hund denounced him as an impostor. Johnson fled, but was subsequently arrested at Magdeburg, and imprisoned in the fortress of Wartzberg, where in 1773 he died suddenly.

John the Baptist. See *Saint John the Baptist.*

John the Evangelist. See *Saint John the Evangelist.*

Joinville, Chaillou de. See *Chaillou de Joinville.*

Jokshan. (Heb., יקשן, *fowler.*) The second son of Abraham and Keturah, whose sons appear to be the ancestors of the Sabeans and Dedanites, who inhabited part of Arabia Felix. (Same as *Jeksan.*)

Jones, Inigo. One of the most celebrated of English architects, and hence called the Vitruvius of England. He was born at London on July 15, 1573, and died June 21, 1652, in the seventy-ninth year of his age. He was successively the architect of three kings—James I., Charles I., and Charles II.—and during his long career superintended the erection of many of the most magnificent public and private edifices in England, among which were the Banqueting-House of Whitehall, and the old church of St. Paul's. Jones's official position placed him, of course, in close connection with the Operative Masons. Anderson, seizing on this circumstance, says that James I. "approved of his being chosen Grand Master of England, to preside over the Lodges" (*Constitutions*, 1738, p. 98); but the Earl of Pembroke being afterward chosen Grand Master, he appointed Jones his Deputy. These statements are copied by Entick and Noorthouck in their respective editions of the *Book of Constitutions;* but it is hardly necessary to say that they need historical confirmation. Preston says:

"During his administration, several learned men were initiated into the Order, and the society considerably increased in consequence and reputation. Ingenious artists daily resorted to England, where they met with great encouragement; Lodges were instituted as seminaries of instruction in the sciences and polite arts, after the model of the Italian schools; the communications of the Fraternity were established, and the annual festivals regularly observed."

There may be exaggeration or assumption in much of this, but it cannot be denied that the office of Jones as "King's Architect," and his labors as the most extensive builder of his time, must have brought him into close intimacy with the associations of Operative Masons, which were being rapidly influenced by a speculative character. It will be remembered that six years before Jones's death, Elias Ashmole was, by his own account, made a Freemason at Warrington, and Jones the architect and builder could hardly have taken less interest in the society than Ashmole the astrologer and antiquary. We have, perhaps, a right to believe that Jones was a Freemason.

Jones, Stephen. A miscellaneous writer and Masonic author of some celebrity. He was born at London in 1764, and educated at St. Paul's school. He was, on leaving school, placed under an eminent sculptor, but, on account of some difference, was removed and apprenticed to a printer. On the expiration of his articles, he was engaged as corrector of the press, by Mr. Strahan, the king's printer. Four years afterward, he removed to the office of Mr. Thomas Wright, where he remained until 1797, when the death of his employer dissolved his immediate connection with the printing business. He then became the editor of the Whitehall *Evening Post*, and, on the decline of that paper, of the *General Evening Post*, and afterward of the *European Magazine*. His contributions to literature were very various. He supervised an edition of Reed's *Biographia Dramatica*, an abridgment of *Burke's Reflections on the French Revolution*, and also abridgments of many other popular works. But he is best known in general literature by his *Pronouncing and Explanatory Dictionary of the English Language*, published in 1798. This production, although following Walker's far superior work, was very favorably received by the public.

In Masonry, Stephen Jones occupied a very high position. He was a Past Master of the

Lodge of Antiquity, of which William Preston was a member, and of whom Jones was an intimate friend, and one of his executors. Preston had thoroughly instructed him in his system, and after the death of that distinguished Mason, he was the first to fill the appointment of Prestonian lecturer. In 1797 he published *Masonic Miscellanies in Prose and Poetry*, which went through many editions, the last being that of 1811. In a graceful dedication to Preston, he acknowledges his indebtedness to him for any insight that he may have acquired into the nature and design of Masonry. In 1816, he contributed the article "Masonry or Freemasonry" to the *Encyclopædia Londinensis*. In 1821, after the death of Preston, he published an edition of the *Illustrations*, with *Additions and Corrections*. Bro. Matthew Cooke (London *Freemasons' Magazine*, September, 1859) says of him: "In the Masonic Craft, Bro. Jones was very deeply versed. He was a man of genial sympathies, and a great promoter of social gatherings." John Britton the architect, who knew him well, says of him (*Autobiog.*, p. 302), that "he was a man of mild disposition, strict honesty, great industry, and unblemished character." In his latter days he was in embarrassed circumstances, and derived pecuniary aid from the Literary Fund. He died, on December 20, 1828, of dropsy, in King Street, Holborn, London.

Joppa. A town of Palestine and the seaport of Jerusalem, from which it is distant about forty miles in a westerly direction. It was here that the King of Tyre sent ships laden with timber and marble to be forwarded overland to Solomon for the construction of the Temple. Its shore is exceedingly rough, and much dreaded by navigators, who, on account of its exposure, and the perpendicularity of its banks, are compelled to be perpetually on their guard. The following extract from the narrative of the Baron Geramb, a Trappist, who visited the Holy Land in 1842, will be interesting to Mark Masters. "Yesterday morning at daybreak, boats put off and surrounded the vessel to take us to the town (of Joppa), *the access to which is difficult on account of the numerous rocks that present to view their bare flanks*. The walls were covered with spectators, attracted by curiosity. The boats being much lower than the bridge, *upon which one is obliged to climb*, and having no ladder, *the landing is not effected without danger*. More than once it has happened that passengers, in springing out, have broken their limbs; and we might have met with the like accident, *if several persons had not hastened to our assistance.*" (*Pilgrimage to Jerusalem and Mount Sinai*, vol. i., p. 27.) The place is now called Jaffa.

Joram. (Heb., עוֹרם, *excelsus*.) One of three architects sent by Solomon to superintend the cutting and preparing of timber.

Jordan. A river of Judea, on the banks of which occurred the slaughter of the Ephraimites, which is alluded to in the Second Degree.

Jordan, Charles Stephen. Secret counselor of the King of Prussia, and Vice-President of the Academy of Sciences in Berlin, was born in the year 1700, and died in the year 1745. In the year 1740, he founded, with the Baron von Bielfeld, the Lodge of Three Globes at Berlin, of which he was Secretary until the time of his death.

Jordan, Fords of the. The *exact* locality of these fords (or "passages," as the Bible terms them) cannot now be designated, but most likely they were those nearly due east of Seikoot, and opposite Mizpah. At these fords, in summer time, the water is not more than three or four feet deep, the bottom being composed of a hard limestone rock. If, as some think, the fords thirty miles higher up are those referred to, the same description will apply. At either place, the Jordan is about eighty feet wide; its banks encumbered by a dense growth of tamarisks, cane, willows, thorn bushes, and other low vegetation of the shrubby and thorny sorts, which make it difficult even to approach the margin of the stream. The Arabs cross the river at the present day, at stages of low water, at a number of fords, from the one near the point where the Jordan leaves the sea of Galilee, down to the Pilgrims' Ford, six miles above the Dead Sea. (Morris, *Freemasonry in the Holy Land*, p. 316.)

Joseph II. This emperor of Germany, who succeeded his mother Maria Theresa, at one time encouraged the Masons in his dominions, and, notwithstanding the efforts of the priests to prevent it, issued a decree in 1785, written, says Lenning, by his own hand, which permitted the meetings of Lodges under certain restrictions as to number. In this decree he says:

"In return for their compliance with this ordinance, the government accords to the Freemasons welcome, protection, and liberty; leaving entirely to their own direction the control of their members and their constitutions. The government will not attempt to penetrate into their mysteries.

"Following these directions, the Order of Freemasons, in which body are comprised a great number of worthy men who are well-known to me, may become useful to the state."

But the Austrian Masons did not enjoy this tolerance long; the Emperor at length yielded to the counsels and the influence of the bigoted priesthood, and in 1789 the ordinance was rescinded, and the Lodges were forbidden to congregate under the severest penalties.

Josephus, Flavius. A Jewish author who lived in the first century, and wrote in Greek, among other works, a *History of the Jews*, to which recourse has been had in some of the high degrees, such as the Prince of Jerusalem, and Knight of the Red Cross, or Red Cross of Babylon, for details in framing their rituals.

Joshaphat, Son of Ahilud. The name of the Orator in the degree of Provost and Judge, A. A. Scottish Rite.

Joshua. The high priest who, with Zerubbabel the Prince of Judah, superintended the rebuilding of the Temple after the Baby-

lonian captivity. He was the high priest by lineal descent from the pontifical family, for he was the son of Josadek, who was the son of Seraiah, who was the high priest when the Temple was destroyed by the Chaldeans. He was distinguished for the zeal with which he prosecuted the work of rebuilding, and opposed the interference of the Samaritans. He is represented by the High Priest in the Royal Arch Degree according to the York and American Rites.

Journey. Journeywork, or work by the day, in contradistinction to *task*, or work by the piece, and so used in all the old *Constitutions*. Thus, in the Dowland MS., there is the charge "that noe maister nor fellowe, put no lord's work to taske that was want to goe to jornaye." It was fairer to the lord and to the craftsman to work by the day than by the piece.

Journeyman. When the Lodges were altogether operative in their character, a Mason, having served his apprenticeship, began to work for himself, and he was then called a *journeyman;* but he was required, within a reasonable period (in Scotland it was two years), to obtain admission into a Lodge, when he was said to have passed a Fellow-Craft. Hence the distinction between Fellow-Crafts and journeymen was that the former were and the latter were not members of Lodges. Thus, in the minutes of St. Mary's Chapel Lodge of Edinburgh, on the 27th of December, 1689, it was declared that "No Master shall employ a person who has not been passed a Fellow Craft in two years after the expiring of his apprenticeship"; and the names of several journeymen are given who had not complied with the law. A similar regulation was repeated by the same Lodge in 1705, complaint having been made "that there are several Masteris of this house that tolerate jurnimen to work up and down this citie contrary to their oath of admission"; and such journeymen were forbidden to seek employment. The patronage of the Craft of Freemasons was bestowed only on those who had become "free of the gild."

Jova. A significant word in the high degrees. It is a corrupted form of the Tetragrammaton.

Jua. A corrupted form of the Tetragrammaton, and a significant word in the high degrees.

Jubal Cain. Erroneously used for *Tubal Cain*, which see. Jubal was the second son of Lamech by his first wife, Ada, and was the founder of the science of music; while the third son, Tubal Cain, was a famous smithwright.

Jubela-o-m. The mythical names of assassins, the true interpretation of which is only known to the initiate who is an esoteric student.

Judah. The whole of Palestine was sometimes called the land of Judah, because Judah was a distinguished tribe in obtaining possession of the country. The tribe of Judah bore a lion in its standard, and hence the Masonic allusion to the Lion of the tribe of Judah. (See also Genesis xlix. 9, "Judah is a lion's whelp.")

Judah and Benjamin. Of the twelve tribes of Israel who were, at various times, carried into captivity, only two, those of Judah and Benjamin, returned under Zerubbabel to rebuild the second Temple. Hence, in the high degrees, which are founded on events that occurred at and after the building of the second Temple, the allusions are made only to the tribes of Judah and Benjamin.

Judith. (Heb., יהודית.) Used in the French Adoptive Masonry, and in the Fifth Degree of Sovereign Illustrious Ecossais.

Jug Lodges. An opprobrious epithet bestowed, during the anti-Masonic excitement, upon certain assemblages of worthless men who pretended to confer the degrees upon candidates weak enough to confide in them. They derived their instructions from the so-called expositions of Morgan, and exacted a trifling fee for initiation, which was generally a jug of whisky, or money enough to buy one. They were found in the mountain regions of North and South Carolina and Georgia.

Junior Adept. (*Junior Adeptus.*) One of the degrees of the German Rose Croix.

Junior Entered Apprentice. According to the rituals of the early part of the last century, the Junior Entered Apprentice was placed in the North, and his duty was to keep out all cowans and eavesdroppers. There was also a Senior Entered Apprentice, and the two seem to have occupied, in some manner, the positions now occupied by the Senior and Junior Deacons. (See *Senior Entered Apprentice.*)

Junior Overseer. The lowest officer in a Mark Lodge. When Royal Arch Chapters are opened in the Mark Degree, the duties of the Junior Overseer are performed by the Grand Master of the First Veil.

Junior Warden. The third officer in a Symbolic Lodge. He presides over the Craft during the hours of refreshment, and, in the absence of the Master and Senior Warden, he performs the duty of presiding officer. Hence, if the Master and Senior Warden were to die or remove from the jurisdiction, the Junior Warden would assume the chair for the remainder of the term. The jewel of the Junior Warden is a plumb, emblematic of the rectitude of conduct which should distinguish the brethren when, during the hours of refreshment, they are beyond the precincts of the Lodge. His seat is in the South, and he represents the Pillar of Beauty. He has placed before him, and carries in procession, a column, which is the representative of the left-hand pillar which stood at the porch of the Temple. (See *Wardens.*)

The sixth officer in a Commandery of Knights Templar is also styled Junior Warden. His duties, especially in the reception of candidates, are very important. His jewel of office is an Eagle holding a Flaming Sword.

Jurisdiction of a Grand Lodge. The jurisdiction of a Grand Lodge extends over

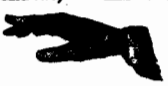
every Lodge working within its territorial limits, and over all places not already occupied by a Grand Lodge. The territorial limits of a Grand Lodge are determined in general by the political boundaries of the country in which it is placed. Thus the territorial limits of the Grand Lodge of New York are circumscribed within the settled boundaries of that State. Nor can its jurisdiction extend beyond these limits into any of the neighboring States. The Grand Lodge of New York could not, therefore, without an infringement of Masonic usage, grant a Warrant of Constitution to any Lodge located in any State where there was already a Grand Lodge. It might, however, charter a Lodge in a Territory, where there is not in existence a Grand Lodge of that Territory. Thus the Lodges of France held their allegiance to the Grand Lodge of England until the formation of a Grand Lodge of France, and the Grand Lodges of both England, Scotland, and France granted Warrants to various Lodges in America until after the Revolution, when the States began to organize Grand Lodges for themselves. For the purpose of avoiding collision and unfriendly feeling, it has become the settled usage, that when a Grand Lodge has been legally organized in a State, all the Lodges within its limits must surrender the charters which they have received from foreign bodies, and accept new ones from the newly established Grand Lodge. This is the settled and well-recognized law of American and English Masonry. But the continental Masons, and especially the Germans, have not so rigidly interpreted this law of unoccupied territory; and there have been in France, and still are in Germany, several Grand Lodges in the same kingdom exercising coordinate powers.

Jurisdiction of a Lodge. The jurisdiction of a Lodge is geographical or personal. The *geographical jurisdiction* of a Lodge is that which it exercises over the territory within which it is situated, and extends to all the Masons, affiliated and unaffiliated, who live within that territory. This jurisdiction extends to a point equally distant from the adjacent Lodge. Thus, if two Lodges are situated within twenty miles of each other, the geographical jurisdiction of each will extend ten miles from its seat in the direction of the other Lodge. But in this case both Lodges must be situated in the same State, and hold their Warrants from the same Grand Lodge; for it is a settled point of Masonic law that no Lodge can extend its geographical jurisdiction beyond the territorial limits of its own Grand Lodge.

The *personal jurisdiction* of a Lodge is that penal jurisdiction which it exercises over its own members wherever they may be situated. No matter how far a Mason may remove from the Lodge of which he is a member, his allegiance to that Lodge is indefeasible so long as he continues a member, and it may exercise penal jurisdiction over him.

Jurisdiction of a Supreme Council. The Masonic jurisdiction of the whole territory of the United States for the Ancient and Accepted Scottish Rite was divided between the Southern and Northern Supreme Councils in accordance with a special concession made by the former body in 1813, when the latter was organized. By this concession the Northern Supreme Council has jurisdiction over the States of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Pennsylvania, Ohio, Illinois, and Indiana; all the other States and Territories are under the jurisdiction of the Southern Supreme Council.

Justice. One of the four cardinal virtues, the practise of which is inculcated in the First Degree. The Mason who remembers how emphatically he has been charged to preserve an upright position in all his dealings with mankind, should never fail to act justly to himself, to his brethren, and to the world. This is the corner-stone on which alone he can expect "to erect a superstructure alike honorable to himself and to the Fraternity." In iconology, Justice is usually represented as a matron with bandaged eyes, holding in one hand a sword and in the other a pair of scales at equipoise. But in Masonry the true symbol of Justice, as illustrated in the First Degree, is the feet firmly planted on the ground, and the body upright.



Justification. The Fifth Degree in the Rite of Fessler.

Just Lodge. A Lodge is said to be Just, Perfect, and Regular under the following circumstances: *Just*, when it is furnished with the three Great Lights; *Perfect*, when it contains the constitutional number of members; and *Regular*, when it is working under a Charter of Warrant of Constitution emanating from the legal authority.

K

K. (Heb., כ, *Caph*, signifying hollow of the hand.) This is the eleventh letter of the English alphabet, and in Hebrew has the numerical value of 20. In the Chaldaic or hieroglyphic it is represented by a hand.

Kaaba. The name of the holy temple of Mecca, which is to the Mohammedans what the Temple of Solomon was to the Jews. It is certainly older, as Gibbon admits, than the Christian era, and is supposed, by the tradition of the Arabians, to have been erected in the nineteenth century B.C., by Abraham, who was assisted by his son Ishmael. It derives its name of Kaaba from its cubical form, it being fifteen feet long, wide, and high. It has but one aperture for light, which is a door in the east end. In the northeast corner is a black stone, religiously venerated by the Mussulmans, called "the black stone of the Kaaba," around which cluster many traditions. One of these is that it came down from Paradise, and was originally as white as milk, but that the sins of mankind turned it black; another is, that it is a ruby which was originally one of the precious stones of heaven, but that God deprived it of its brilliancy, which would have illuminated the world from one end to the other. Syed Ahmed, who, for a Mussulman, has written a very rational *History of the Holy Mecca* (London, 1870), says that the black stone is really a piece of rock from the mountains in the vicinity of Mecca; that it owes its black color to the effects of fire; and that before the erection of the temple of the Kaaba, it was no other than one of the numerous altars erected for the worship of God, and was, together with other stones, laid up in one of the corners of the temple at the time of its construction. It is, in fact, one of the relics of the ancient stone worship; yet it reminds us of the foundation-stone of the Solomonic Temple, to which building the temple of the Kaaba has other resemblances. Thus, Syed Ahmed, who, in opposition to most Christian writers, devoutly believes in its Abrahamic origin, says that (p. 6) "the temple of the Kaaba was built by Abraham in conformity with those religious practices according to which, after a lapse of time, the descendants of his second son built the Temple of Jerusalem."

Kabbala. The mystical philosophy or theosophy of the Jews is called the Kabbala. The word is derived from the Hebrew קבל, *Kabal*, signifying to receive, because it is the doctrine received from the elders. It has sometimes been used in an enlarged sense, as comprehending all the explanations, maxims, and ceremonies which have been traditionally handed down to the Jews; but in that more limited acceptation, in which it is intimately connected with the symbolic science of Freemasonry, the Kabbala may be defined to be a system of philosophy which embraces certain mystical interpretations of Scripture, and metaphysical speculations concerning the Deity, man, and spiritual beings. In these interpretations and speculations, according to the Jewish doctors, were enveloped the most profound truths of religion, which, to be comprehended by finite beings, are obliged to be revealed through the medium of symbols and allegories. Buxtorf (*Lex. Talm.*) defines the Kabbala to be a secret science, which treats in a mystical and enigmatical manner of things divine, angelical, theological, celestial, and metaphysical; the subjects being enveloped in striking symbols and secret modes of teaching. Much use is made of it in the high degrees, and entire Rites have been constructed on its principles. Hence it demands a place in any general work on Masonry.

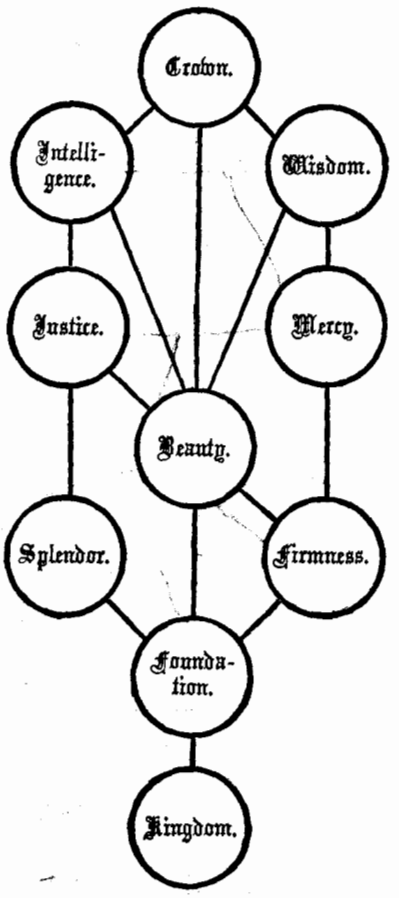
In what estimation the Kabbala is held by Jewish scholars, we may learn from the traditions which they teach, and which Dr. Ginsburg has given in his exhaustive work (*Kabbalah*, p. 84), in the following words:

"The Kabbalah was first taught by God himself to a select company of angels, who formed a theosophic school in Paradise. After the fall, the angels most graciously communicated this heavenly doctrine to the disobedient child of earth, to furnish the protoplasts with the means of returning to their pristine nobility and felicity. From Adam it passed over to Noah, and then to Abraham, the friend of God, who emigrated with it to Egypt, where the patriarch allowed a portion of this mysterious doctrine to ooze out. It was in this way that the Egyptians obtained some knowledge of it, and the other Eastern nations could introduce it into their philosophical systems. Moses, who was learned in all the wisdom of Egypt, was first initiated into it in the land of his birth, but became most proficient in it during his wanderings in the wilderness, when he not only devoted to it the leisure hours of the whole forty years, but received lessons in it from one of the angels. By the aid of this mysterious science, the lawgiver was enabled to solve the difficulties which arose during his management of the Israelites, in spite of the pilgrimages, wars, and the frequent miseries of the nation. He covertly laid down the principles of this secret doctrine in the first four books of the Pentateuch, but withheld them from Deuteronomy. This constitutes the former the man, and the latter the woman. Moses also initiated the seventy elders into the secrets of this doctrine, and they again transmitted them from hand to hand. Of all who formed the unbroken line of tradition, David and Solomon were first initiated into the Kabbalah. No one, however, dared to write it down till Simon ben Jochai, who lived at the time of the destruction of the second Temple. Having been condemned to death by Titus, Rabbi Simon man-

aged to escape with his son, and concealed himself in a cavern, where he remained for twelve years. Here in this subterranean abode, he occupied himself entirely with the contemplation of the sublime Kabbalah, and was constantly visited by the prophet Elias, who disclosed to him some of its secrets, which were still concealed from the theosophical Rabbi. Here, too, his disciples resorted to be initiated by their master into these divine mysteries; and here Simon ben Jochai expired with this heavenly doctrine in his mouth, whilst discoursing on it to his disciples. Scarcely had his spirit departed, when a dazzling light filled the cavern, so that no one could look at the Rabbi; whilst a burning fire appeared outside, forming as it were a sentinel at the entrance of the cave, and denying admittance to the neighbors. It was not till the light inside, and the fire outside, had disappeared, that the disciples perceived that the lamp of Israel was extinguished. As they were preparing for his obsequies, a voice was heard from heaven, saying, 'Come ye to the marriage of Simon b. Jochai; he is entering into peace, and shall rest in his chamber!' A flame preceded the coffin, which seemed enveloped by and burning like fire. And when the remains were deposited in the tomb, another voice was heard from heaven, saying, 'This is he who caused the earth to quake and the kingdoms to shake!' His son, R. Eliezer, and his secretary, R. Abba, as well as his disciples, then collated R. Simon b. Jochai's treatises, and out of these composed the celebrated work called *Sohar*, (זהר,) i. e., *Splendor*, which is the grand storehouse of Kabbalism."

The Kabbala is divided into two kinds, the *Practical* and the *Theoretical*. The Practical Kabbala is occupied in instructions for the construction of talismans and amulets, and has no connection with Masonic science. The Theoretical Kabbala is again divided into the Dogmatic and the Literal. The Dogmatic Kabbala is the summary of the rabbinical theosophy and philosophy. The Literal Kabbala is the science which teaches a mystical mode of explaining sacred things by a peculiar use of the letters of words, and a reference to their value. Each of these divisions demands a separate attention.

I. The Dogmatic Kabbala. The origin of the Kabbala has been placed by some scholars at a period posterior to the advent of Christianity, but it is evident, from the traces of it which are found in the Book of Daniel, that it arose at a much earlier day. It has been supposed to be derived originally from the system of Zoroaster, but whether its inventors were the contemporaries or the successors of that philosopher and reformer it is impossible to say. The doctrine of emanation is, says King (*Gnostics*, p. 10), "the soul, the essential element of the Kabbala; it is likewise the essential element of Zoroastrism." But as we advance in the study of each we will find important differences, showing that, while the idea of the Kabbalistic theosophy was borrowed from the Zendavesta, the sacred book of the Persian sage, it was not a copy, but a development of it.



The Kabbalistic teaching of emanation is best understood by an examination of the doctrine of the Sephiroth.

The Supreme Being, say the Kabbalists, is an absolute and inscrutable unity, having nothing without him and everything within him. He is called אין סוף, EN SOPH, "The Infinite One." In this infinitude he cannot be comprehended by the intellect, nor described in words intelligible by human minds, so as to make his existence perceptible. It was necessary, therefore, that, to render himself comprehensible, the En Soph should make himself active and creative. But he could not become the direct creator; because, being infinite, he is without will, intention, thought, desire, or action, all of which are qualities of a finite being only. The En Soph, therefore, was compelled to create the world in an indirect manner, by ten emanations from the infinite light which he was and in which he dwelt. These ten emanations are the ten Sephiroth, or Splendors of the Infinite One, and the way in which they were produced was thus: At first the En Soph sent forth into space one spiritual emanation. This first Sephirah is called כתר, *Kether*, "the Crown," because it occupies the highest position. This first Sephirah contained within it the other nine, which sprang forth in the following order: At first a male, or active potency, proceeded from it, and this, the second Sephirah, is called חכמה, *Chocmah* or "Wisdom." This sent forth an opposite, female or passive potency, named בינה, *Binah* or "Intelligence." These three Sephiroth constitute the first triad, and out of them proceeded the other seven. From the junction of *Wisdom* and *Intelligence* came the fourth Sephirah, called חסד, *Chesed* or "Mercy." This was a male potency, and from it emanated the fifth Sephirah, named גבורה, *Giburah* or "Justice." The union of *Mercy* and *Justice* produced the sixth Sephirah, תפארת, *Tiphereth* or "Beauty"; and these three constitute the second triad. From the sixth Sephirah came forth the seventh Sephirah, נצח, *Nitzach* or "Firmness." This was a male potency, and produced the female potency named הוד, *Hod* or "Splendor." From these two proceeded יסוד, *Isod* or "Foundation"; and these three constituted the third triad of the Sephiroth. Lastly, from the *Foundation* came the tenth Sephirah, called מלכות, *Malcuth* or "Kingdom," which was at the foot of all, as the *Crown* was at the top.

This division of the ten Sephiroth into three triads was arranged into a form called by the Kabbalists the Kabbalistic Tree, or the Tree of Life, as shown in the diagram on opposite page.

In this diagram the vertical arrangement of the Sephiroth is called "Pillars." Thus the four Sephiroth in the center are called the "Middle Pillar"; the three on the right, the "Pillar of Mercy"; and the three on the left, the "Pillar of Justice." They allude to these two qualities of God, of which the benignity

of the one modifies the rigor of the other, so that the Divine Justice is always tempered by the Divine Mercy. C. W. King, in his *Gnostics* (p. 12), refers the right-hand pillar to the Pillar Jachin, and the left-hand pillar to the Pillar Boaz, which stood at the porch of the Temple; and "these two pillars," he says, "figure largely amongst all the secret societies of modern times, and naturally so; for these

illuminati have borrowed, without understanding it, the phraseology of the Kabbalists and the Valentinians." But an inspection of the arrangement of the Sephiroth will show, if he is correct in his general reference, that he has transposed the pillars. Firmness would more naturally symbolize Boaz or Strength, as Splendor would Jachin or Establishment.

These ten Sephiroth are collectively denominated the archetypal man, the Microcosm, as the Greek philosophers called it, and each of them refers to a particular part of the body. Thus the Crown is the *head;* Wisdom, the *brain;* and Intelligence, the *heart*, which was deemed the seat of understanding. These three represent the intellectual; and the first triad is therefore called the *Intellectual World.* Mercy is the *right arm*, and Justice the *left arm*, and Beauty is the *chest.* These three represent moral qualities; and hence the second triad is called the *Moral World.* Firmness is the *right leg*, Splendor the *left leg*, and Foundation the *privates.* These three represent power and stability; and hence the third triad is called the *Material World.* Lastly, Kingdom is the *feet*, the basis on which all stand, and represents the harmony of the whole archetypal man.

Again, each of these Sephiroth was represented by a Divine name and by an Angelic name, which may be thus tabulated:

Sephiroth.	*Divine Names.*	*Angelic Names.*
Crown,	Eheyeh,	Chajoth,
Wisdom,	Jah,	Ophanim,
Intelligence,	Jehovah,	Arelim,
Mercy,	El,	Cashmalim,
Justice,	Eloha,	Seraphim,
Beauty,	Elohim,	Shinanim,
Firmness,	Jehovah Sabaoth,	Tarshishim,
Splendor,	Elohim Sabaoth,	Beni Elohim,
Foundation,	El Chai,	Ishim,
Kingdom.	Adonai.	Cherubim.

These ten Sephiroth constitute in their totality the Atzilatic world or the world of emanations, and from it proceeded three other worlds, each having also its ten Sephiroth, namely, the Briatic world or the world of creation; the Jetziratic world or the world of formation; and the Ashiatic world or the world of action: each inhabited by a different order of beings. But to enter fully upon the nature of these worlds would carry us too far into the obscure mysticism of the Kabbala.

These ten Sephiroth, represented in their order of ascent from the lowest to the highest, from the Foundation to the Crown, forcibly remind us of the system of Mystical Ladders which pervaded all the ancient as well as the modern initiations; the Brahmanical Ladder of the Indian mysteries; the Ladder of Mithras, used in the Persian mysteries; the Scandinavian Ladder of the Gothic mysteries, and in the Masonic mysteries the Ladder of Kadosh; and lastly, the Theological Ladder of the Symbolical degrees.

II. The Literal Kabbala. This division of the Kabbala, being, as has already been said, occupied in the explanation of sacred words by the value of the letters of which they are composed, has been extensively used by the inventors of the high degrees in the symbolism of their significant words. It is divided into three species: Gematria, Notaricon, and Temura.

1. *Gematria.* This word, which is evidently a rabbinical corruption of the Greek *geometria*, is defined by Buxtorf to be "a species of the Kabbala which collects the same sense of different words from their equal numerical value." The Hebrews, like other ancient nations, having no figures in their language, made use of the letters of their alphabet instead of numbers, each having a numerical value. Gematria is, therefore, a mode of con-

templating words according to the numerical value of their letters.

Any two words, the letters of which have the same numerical value, are mutually convertible, and each is supposed to contain the latent signification of the other. Thus the words in Genesis xlix. 10, "Shiloh shall come," are supposed to contain a prophecy of the Messiah, because the letters of "Shiloh shall come," יבאשילה, and of "Messiah," משיה, both have the numerical value of 358, according to the above table. By Gematria, applied to the Greek language, we find the identity of *Abraxas* and *Mithras*, the letters of each word having in the Greek alphabet the equal value of 365. This is by far the most common mode of applying the literal Kabbala.

2. *Notaricon* is derived from the Latin *notarius*, a shorthand writer or writer in cipher. The Roman Notarii were accustomed to use single letters, to signify whole words with other methods of abbreviation, by marks called "notæ." Hence, among the Kabbalists, *notaricon* is a mode of constructing one word out of the initials or finals of many, or a sentence out of the letters of a word, each letter being used as the initial of another word. Thus of the sentence in Deuteronomy xxx. 12, "Who shall go up for us to heaven?" in Hebrew מי יעלה לנו השמימה, the initial letters of each word are taken to form the word מילה, "circumcision," and the finals to form יהוה, "Jehovah"; hence it is concluded that Jehovah hath shown circumcision to be the way to heaven. Again: the six letters of the first word in Genesis, בראש ת, "in the beginning," are made use of to form the initials of six words which constitute a sentence signifying that "In the beginning God saw that Israel would accept the law," שיקבלו ישראל תורה בראשית ראה אלהים.

3. *Temura* is a rabbinical word which signifies permutation. Hence *temura* is a Kabbalistic result produced by a change or permutation of the letters of a word. Sometimes the letters are transposed to form another word, as in the modern anagram; and sometimes the letters are changed for others, according to certain fixed rules of alphabetical permutation, the 1st letter being placed for the 22d, the 2d for the 21st, the 3d for the 20th, and so on. It is in this way that Babel, בבל, is made out of Sheshach, ששך, and hence the Kabbalists say that when Jeremiah used the word Sheshach (xxv. 26), he referred to Babel.

Kabbalistic Companion. A degree found in the archives of the Mother Lodge of the Philosophical Rite of France.

Kadíri, Order of. A secret society existing in Arabia, which so much resembles Freemasonry in its object and forms, that Lieut. Burton, who succeeded in obtaining initiation into it, calls the members "Oriental Freemasons." Burton gives a very interesting account of the Order in his *Pilgrimage to El Medinah and Mecca*.

Kadosh. The name of a very important degree in many of the Masonic Rites. The word קדש is Hebrew, and signifies *holy* or *consecrated*, and is thus intended to denote the elevated character of the degree and the sublimity of the truths which distinguish it and its possessors from the other degrees. Pluche says that in the East, a person preferred to honors bore a scepter, and sometimes a plate of gold on the forehead, called a *Kadosh*, to apprise the people that the bearer of this mark or rod was a public person, who possessed the privilege of entering into hostile camps without the fear of losing his personal liberty.

The degree of Kadosh, though found in many of the Rites and in various countries, seems, in all of them, to have been more or less connected with the Knights Templar. In some of the Rites it was placed at the head of the list, and was then dignified as the *ne plus ultra* of Masonry.

It was sometimes given as a separate order or Rite within itself, and then it was divided into the three degrees of Illustrious Knight of the Temple, Knight of the Black Eagle, and Grand Elect.

Oliver enumerates five degrees of Kadosh: the Knight Kadosh; Kadosh of the Chapter of Clermont; Philosophical Kadosh; Kadosh Prince of Death; and Kadosh of the Ancient and Accepted Scottish Rite.

The French rituals speak of seven: Kadosh of the Hebrews; Kadosh of the first Christians; Kadosh of the Crusades; Kadosh of the Templars; Kadosh of Cromwell or the Puritans; Kadosh of the Jesuits; and the True Kadosh. But the correctness of this enumeration is doubtful, for it cannot be sustained by documentary evidence. In all of these Kadoshes the doctrine and the modes of recognition are substantially the same, though in most of them the ceremonies of initiation differ.

Ragon mentions a Kadosh which is said to have been established at Jerusalem in 1118; but here he undoubtedly refers to the Order of Knights Templar. He gives also in his *Tuileur Général* the nomenclature of no less than fourteen Kadosh degrees.

The doctrine of the Kadosh system is that the persecutions of the Knights Templar by Philip the Fair of France, and Pope Clement V., however cruel and sanguinary in its results, did not extinguish the Order, but it continued to exist under the forms of Freemasonry. That the ancient Templars are the modern Kadoshes, and that the builder at the Temple of Solomon is now replaced by James de Molay, the martyred Grand Master of the Templars, the assassins being represented by the King of France, the Pope, and Naffodei the informer against the Order; or, it is sometimes said, by the three informers, Squin de Florian, Naffodei, and the Prior of Montfauçon.

As to the history of the Kadosh degree, it is said to have been first invented at Lyons, in France, in 1743, where it appeared under the name of the *Petit Elu*. This degree, which is said to have been based upon the Templar doc-

trine heretofore referred to, was afterward developed into the Kadosh, which we find in 1758 incorporated as the *Grand Elect Kadosh* into the system of the Council of Emperors of the East and West, which was that year formed at Paris, whence it descended to the Scottish Rite Masons.

Of all the Kadoshes, two only are now important, viz.: the Philosophic Kadosh, which has been adopted by the Grand Orient of France, and the Knight Kadosh, which constitutes the Thirtieth Degree of the Ancient and Accepted Scottish Rite, this latter being the most generally diffused of the Kadoshes.

Kadosh, called also the Holy Man. (*Kadosch ou l'Homme Saint.*) The Tenth and last degree of the Rite of Martinism.

Kadosh, Grand, Elect Knight. The Sixty-fifth Degree of the Rite of Mizraim.

Kadosh, Knight. The Thirtieth Degree of the Scottish Rite. (See *Knight Kadosh.*)

Kadosh of the Jesuits. According to Thory (*Act. Lat.*, i., 320), this degree is said to have been invented by the Jesuits of the College of Clermont. The statement is not well supported. De Bonneville's Masonic Chapter of Clermont was probably, either with or without design, confounded with the Jesuitical College of Clermont. (See *Jesuits.*)

Kadosh, Philosophic. A modification of the original Kadosh, for which it has been substituted and adopted by the Grand Orient of France. The military character of the Order is abandoned, and the Philosophic Kadosh wear no swords. Their only weapon is the WORD.

Kadosh, Prince. A degree of the collection of Pyron.

Kadosh Prince of Death. The Twenty-seventh Degree of the Rite of Mizraim.

Kamea. Hebrew, קמיע, *an amulet.* More particularly applied by the Kabbalists to magic squares inscribed on paper or parchment, and tied around the neck as a safeguard against evil. (See *Magic Squares.*)

Kansas. In the year 1855 there were three Lodges in Kansas, holding warrants from the Grand Lodge of Missouri. On November 14, 1855, two of these Lodges met in convention at Leavenworth. In consequence of the absence of the third Lodge, the convention adjourned until December 27, 1855, on which day the two Lodges of Smithton and Leavenworth met, and, Wyandot Lodge being again absent, the delegates of these two Lodges organized the Grand Lodge of Kansas, and elected Richard R. Rees Grand Master.

But these proceedings were considered illegal, in consequence of the convention having been formed by two instead of three Lodges; and, accordingly, another convention of the three chartered Lodges in the Territory was held March 17, 1856, and the proceedings of the previous convention ratified by a reenactment, the same Grand Master being reelected. There are 389 Lodges under the Grand Lodge of Kansas.

The Grand Royal Arch Chapter was established January 27, 1866.

The Grand Council of Royal and Select Masters was organized December 12, 1867.

The Grand Commandery was organized December 29, 1868.

Karmatians. A Mohammedan sect that became notorious from its removal of the celebrated black stone of the Kaaba, and, after retaining it for twenty-two years, voluntarily surrendered it. Founded by Karmata at Irak in the ninth century.

Kasideans. A Latinized spelling of *Chasidim*, which see.

Katharsis. Greek, καθαρσις. The ceremony of purification in the Ancient Mysteries. Müller says (*Dorians*, i., 384) that "one of the important parts of the Pythagorean worship was the *pæan*, which was sung to the lyre in spring-time by a person sitting in the midst of a circle of listeners: this was called the *katharsis* or purification."

Keeper of the Seals. An officer called *Garde des Sceaux* in Lodges of the French Rite. It is also the title of an officer in Consistories of the Scottish Rite. The title sufficiently indicates the functions of the office.

Kellermann, Marshal. Duke de Valmy, born 1770, died 1835. Member of the Supreme Council and Grand Officer of Honor of G. O. of France; elected 1814. Served in the battles of Marengo, Austerlitz, and Waterloo.

Kelly, Christopher. A Masonic plagiarist, who stole bodily the whole of the typical part of the celebrated work of Samuel Lee entitled *Orbis Miraculum, or The Temple of Solomon pourtrayed by Scripture Light*, and published it as his own under the title of *Solomon's Temple spiritualized; setting forth the Divine Mysteries of the Temple, with an account of its Destruction.* He prefaced the book with *An Address to all Free and Accepted Masons.* The first edition was published at Dublin in 1803, and on his removal to America he published a second in 1820, at Philadelphia. Kelly was, unfortunately, a Freemason, but not an honest one.

Kenning's Masonic Cyclopædia. Edited by Rev. A. F. A. Woodford, in London, contemporaneously with the *Encyclopædia* of Dr. A. G. Mackey, in America, but published by the well-known Bro. George Kenning, 198 Fleet Street, London, to whom the work is dedicated in affectionate terms. Kenning's *Cyclopædia* is rendered unusually invaluable in consequence of the fulness of its bibliography. Kloss's well-known *Bibliographie der Freimaurer* does not become so great a necessity, having *Kenning;* yet other subjects have not been permitted to suffer in consequence of the numerous short biographic sketches. The work is an admirably arranged octavo of nearly seven hundred pages.

Kentucky. Organized Freemasonry was introduced by the Grand Lodge of Virginia, which, in the year 1788, granted a charter for Lexington Lodge, No. 25, at Lexington. This was the first Lodge instituted west of the Alleghany Mountains.

Three other Lodges were subsequently chartered by Virginia, namely, at Paris, George-

town, and Frankford, and a dispensation granted for a fifth at Shelbyville. These five Lodges met in convention at Lexington on September 8, 1800. Having resolved that it was expedient to organize a Grand Lodge, an address was prepared to the Grand Lodge of Virginia, and the convention adjourned to October 16th. On that day it reassembled and organized the Grand Lodge of Kentucky, William Murray being elected Grand Master.

Chapters of Royal Arch Masons, independent of the Grand Lodge, were first established by Thomas Smith Webb in 1816, and the Grand Chapter was formed December 4, 1817.

The Grand Council of Royal and Select Masters was organized December 10, 1827.

The Grand Encampment (now the Grand Commandery) was organized October 5, 1847.

Scottish Masonry was introduced into Kentucky, and the Grand Consistory organized at Louisville, in August, 1852, by Bro. Albert G. Mackey, Secretary-General of the Supreme Council for the Southern Jurisdiction.

Key. "The key," says Dr. Oliver (*Landm.*, i., 180, *note*), "is one of the most important symbols of Freemasonry. It bears the appearance of a common metal instrument, confined to the performance of one simple act. But the well-instructed brother beholds in it the symbol which teaches him to keep a tongue of good report, and to abstain from the debasing vices of slander and defamation." Among the ancients the key was a symbol of silence and circumspection; and thus Sophocles alludes to it in the *Œdipus Coloneus* (1051), where he makes the chorus speak of "the golden key which had come upon the tongue of the ministering hierophant in the mysteries of Eleusis—*ὃν καὶ χρυσέα κλῆις ἐπὶ γλώσσᾳ βέβακε προσπόλων εὐμολπιδᾶν.*" Callimachus says that the priestess of Ceres bore a key as the ensign of her mystic office. The key was in the mysteries of Isis a hieroglyphic of the opening or disclosing of the heart and conscience, in the kingdom of death, for trial and judgment.

In the old rituals of Masonry the key was an important symbol, and Dr. Oliver regrets that it has been abandoned in the modern system. In the rituals of the First Degree, in the eighteenth century, allusion is made to a key by whose help the secrets of Masonry are to be obtained, which key "is said to hang and not to lie, because it is always to hang in a brother's defence and not to lie to his prejudice." It was said, too, to hang "by the thread of life at the entrance," and was closely connected with the heart, because the tongue "ought to utter nothing but what the heart dictates." And, finally, this key is described as being "composed of no metal, but a tongue of good report." In the ritual of the Master's Degree in the Adonhiramite Rite, we find this catechism:

"*Q.* What do you conceal?

"*A.* All the secrets which have been intrusted to me.

"*Q.* Where do you conceal them?

"*A.* In the heart.

"*Q.* Have you a *key* to gain entrance there?

"*A.* Yes, Right Worshipful.

"*Q.* Where do you keep it?

"*A.* In a box of coral which opens and shuts only with ivory keys.

"*Q.* Of what metal is it composed?

"*A.* Of none. It is a tongue obedient to reason, which knows only how to speak well of those of whom it speaks in their absence as in their presence." (*Recueil Précieux*, p. 87.)

All of this shows that the key as a symbol was formerly equivalent to the modern symbol of the "instructive tongue," which, however, with almost the same interpretation, has now been transformed to the Second or Fellow-Craft's Degree. The key, however, is still preserved as a symbol of secrecy in the Royal Arch Degree; and it is also presented to us in the same sense in the ivory key of the Secret Master, or Fourth Degree of the Scottish Rite, In many of the German Lodges an ivory key is made a part of the Masonic clothing of each brother, to remind him that he should lock up or conceal the secrets of Freemasonry in his heart.

But among the ancients the key was also a symbol of power; and thus among the Greeks the title of *κλειδουχος*, or *key-bearer*, was bestowed upon one holding high office; and with the Romans, the keys are given to the bride on the day of marriage, as a token that the authority of the house was bestowed upon her; and if afterward divorced, they were taken from her, as a symbol of the deprivation of her office. Among the Hebrews the key was used in the same sense. "As the robe and the baldric," says Lowth (*Is.*, p. 2, s. 4), "were the ensigns of power and authority, so likewise was the key the mark of office, either sacred or civil." Thus in Isaiah it is said: "The key of the house of David will I lay upon his shoulders; so he shall open, and none shall shut; and he shall shut, and none shall open" (xxii. 22). Our Savior expressed a similar idea when he said to St. Peter, "I will give unto thee the keys of the kingdom of heaven." It is in reference to this interpretation of the symbol, and not that of secrecy, that the key has been adopted as the official jewel of the treasurer of a Lodge, because he has the purse, the source of power, under his command.

Key of Masonry. See *Knight of the Sun.*

Keystone. The stone placed in the center of an arch which preserves the others in their places, and secures firmness and stability to the arch. As it was formerly the custom of Operative Masons to place a peculiar mark on each stone of a building to designate the workman by whom it had been adjusted, so the Keystone was most likely to receive the most prominent mark, that of the superintendent of the structure. Such is related to have occurred to that Keystone which plays so important a part in the legend of the Royal Arch Degree.

The objection has sometimes been made, that the arch was unknown in the time of Solomon. But this objection has been completely laid at rest by the researches of an-

tiquaries and travelers within a few years past. Wilkinson discovered arches with regular keystones in the doorways of the tombs of Thebes, the construction of which he traced to the year 1540 B.C., or 460 years before the building of the Temple of Solomon. And Dr. Clark asserts that the Cyclopean gallery of Tiryns exhibits lancet-shaped arches almost as old as the time of Abraham. In fact, at the Solomonic era, the construction of the arch must have been known to the Dionysian artificers, of whom, it is the received theory, many were present at the building of the Temple.

Khem. The Egyptian Deity, Amon, in the position metaphorically used in representations of Buddha and by the Hermetic philosophers, one hand toward Heaven and the other toward Nature.

Khepra. An Egyptian Deity, presiding over transformation, and represented with the beetle in place of a head.

Kher-heb. The Master of Ceremonies in the Egyptian system of worship.

Khesvan or **Chesvan.** (חשון.) The same Hebrew month as *Marchesvan*, which see.

Khetem el Nabiim. Mohammed, the seal of the prophets.

Khon. The title given to the dead, subject to examination as depicted in ch. 125 of the Book of the Dead in the Egyptian Ritual.

Khotbah. The Confession of Faith under the Mohammedan law.

Khurum-Abi. A variation of the name of Hiram Abi.

Ki. A word used in the old Ritual of the Eighth Degree of the A. A. Scottish Rite.

Kilwinning. As the city of York claims to be the birthplace of Masonry in England, the obscure little village of Kilwinning is entitled to the same honor with respect to the origin of the Order in the sister kingdom of Scotland. The claim to the honor, however, in each case, depends on the bare authority of a legend, the authenticity of which is now doubted by many Masonic historians. A place, which, in itself small and wholly undistinguishable in the political, the literary, or the commercial annals of its country, has become of great importance in the estimation of the Masonic antiquary from its intimate connection with the history of the Institution.

The Abbey of Kilwinning is situated in the bailiwick of Cunningham, about three miles north of the royal burgh of Irving, near the Irish Sea. The abbey was founded in the year 1140, by Hugh Morville, Constable of Scotland, and dedicated to St. Winning, being intended for a company of monks of the Tyronesian Order, who had been brought from Kelso. The edifice must have been constructed at great expense, and with much magnificence, since it is said to have occupied several acres of ground in its whole extent.

Lawrie (*Hist. of Freemasonry*, 1804) says that, by authentic documents as well as by other collateral arguments which amount almost to a demonstration, the existence of the Kilwinning Lodge has been traced back as far as the end of the fifteenth century. But we know that the body of architects who perambulated the Continent of Europe under the name of "Traveling Freemasons," flourished at a much earlier period; and we learn, also, from Lawrie himself, that several of these Masons traveled into Scotland, about the beginning of the twelfth century. Hence, we have every reason to suppose that these men were the architects who constructed the Abbey at Kilwinning, and who first established the Institution of Freemasonry in Scotland. If such be the fact, we must place the origin of the first Lodge in that kingdom at an earlier date, by three centuries, than that claimed for it by Lawrie, which would bring it much nearer, in point of time, to the great Masonic Assembly, which is traditionally said to have been convened in the year 926, by Prince Edwin, at York, in England.

There is some collateral evidence to sustain the probability of this early commencement of Masonry in Scotland. It is very generally admitted that the Royal Order of Herodem was founded by King Robert Bruce, at Kilwinning. Thory, in the *Acta Latomorum*, gives the following chronicle: "Robert Bruce, King of Scotland, under the title of Robert I., created the Order of St. Andrew of Chardon, after the battle of Bannockburn, which was fought on the 24th of June, 1314. To this Order was afterwards united that of Herodem, for the sake of the Scotch Masons, who formed a part of the thirty thousand troops with whom he had fought an army of one hundred thousand Englishmen. King Robert reserved the title of Grand Master to himself and his successors forever, and founded the Royal Grand Lodge of Herodem at Kilwinning."

Dr. Oliver says that "the Royal Order of Herodem had formerly its chief seat at Kilwinning; and there is every reason to think that it and St. John's Masonry were then governed by the same Grand Lodge."

In 1820, there was published at Paris a record which states that in 1286, James, Lord Stewart, received the Earls of Gloucester and Ulster into his Lodge at Kilwinning; which goes to prove that a Lodge was then existing and in active operation at that place.

The modern iconoclasts, however, who are leveling these old legends with unsparing hands, have here been at work. Bro. D. Murray Lyon has attacked the Bruce legend, and in the London *Freemasons' Magazine* (1868, p. 141) says: "Seeing that the fraternity of Kilwinning never at any period practised or acknowledged other than Craft degrees, and have not preserved even a shadow of a tradition that can in the remotest degree be held to identify Robert Bruce with the holding of Masonic Courts, or the Institution of a Secret Order at Kilwinning, the fraternity of the 'Herodim' must be attributed to another than the hero of Bannockburn, and a birthplace must be sought for it in a soil still more favorable to the growth of the high grades than Scotland has hitherto proved." He intimates that the legend was the inven-

tion of the Chevalier Ramsay, whose birthplace was in the vicinity of Kilwinning.

I confess that I look upon the legend and the documents that contain it with some favor, as at least furnishing the evidence that there has been among the Fraternity a general belief of the antiquity of the Kilwinning Lodge. Those, however, whose faith is of a more hesitating character, will find the most satisfactory testimonies of the existence of that Lodge in the beginning of the fifteenth century. At that period, when James II. was on the throne, the Barons of Roslin, as hereditary Patrons of Scotch Masonry, held their annual meetings at Kilwinning, and the Lodge at that place granted Warrants of Constitution for the formation of subordinate Lodges in other parts of the kingdom. The Lodges thus formed, in token of their respect for, and submission to, the mother Lodge whence they derived their existence, affixed the word Kilwinning to their own distinctive name; many instances of which are still to be found on the register of the Grand Lodge of Scotland—such as Canongate Kilwinning, Greenock Kilwinning, Cumberland Kilwinning, etc.

But, in process of time, this Grand Lodge at Kilwinning ceased to retain its supremacy, and finally its very existence. As in the case of the sister kingdom, where the Grand Lodge was removed from York, the birthplace of English Masonry, to London, so in Scotland, the supreme seat of the Order was at length transferred from Kilwinning to the metropolis; and hence, in the doubtful document entitled the "Charter of Cologne," which purports to have been written in 1542, we find, in a list of nineteen Grand Lodges in Europe, that that of Scotland is mentioned as sitting at Edinburgh, under the Grand Mastership of John Bruce. In 1736, when the Grand Lodge of Scotland was organized, the Kilwinning Lodge was one of its constituent bodies, and continued in its obedience until 1743. In that year it petitioned to be recognized as the oldest Lodge in Scotland; but as the records of the original Lodge had been lost, the present Lodge could not prove, says Lawrie, that it was the identical Lodge which had first practised Freemasonry in Scotland. The petition was therefore rejected, and, in consequence, the Kilwinning Lodge seceded from the Grand Lodge and established itself as an independent body. It organized Lodges in Scotland; and several instances are on record of its issuing charters as Mother Kilwinning Lodge to Lodges in foreign countries. Thus, it granted one to a Lodge in Virginia in 1758, and another in 1779 to some brethren in Ireland calling themselves the Lodge of High Knights Templar. But in 1807 the Mother Lodge of Kilwinning renounced all right of granting charters, and came once more into the bosom of the Grand Lodge, bringing with her all her daughter Lodges.

Here terminates the connection of Kilwinning as a place of any special importance with the Masonry of Scotland. As for the abbey, the stupendous fabric which was executed by the Freemasons who first migrated into Scotland, its history, like that of the Lodge which they founded, is one of decline and decay. In 1560, it was in a great measure demolished by Alexander, Earl of Glencairne, in obedience to an Order from the States of Scotland, in the exercise of their usurped authority during the imprisonment of Mary Stuart. A few years afterward, a part of the abbey chapel was repaired and converted into the parish church, and was used as such until about the year 1775, when, in consequence of its ruinous and dangerous state, it was pulled down and an elegant church erected in the modern style. In 1789, so much of the ancient abbey remained as to enable Grose, the antiquary, to take a sketch of the ruins; but now not a vestige of the building is to be found, nor can its exact site be ascertained with any precision.

Kilwinning Manuscript. Also called the Edinburgh Kilwinning. This manuscript derives its name from its being written in a small quarto book, belonging to the celebrated "Mother Kilwinning Lodge" of Scotland. For its publication, the Masonic Fraternity is indebted to Bro. William James Hughan, who has inserted it in his *Unpublished Records of the Craft*, from a copy made for him from the original by Bro. D. Murray Lyon, of Ayr, Scotland. Bro. Lyon, "whilst glancing at the minutes of the Lodge of Edinburgh from December 27, 1675, till March 12, 1678, was struck with the similarity which the handwriting bore to that in which the Kilwinning copy of the *Narrative of the Founding of the Craft of Masonry* is written, and upon closer examination he was convinced that in both cases the caligraphy is the same." (*History of the Lodge of Edinburgh*, p. 107.) It was probably written in 1665. The Anglican phraseology, and the fact that one of the charges requires that Masons should be "liedgemen to the King of England," conclusively show that the manuscript was written in England and introduced into Scotland. It is so much like the text of the Grand Lodge MS., published by Bro. Hughan in his *Old Charges of British Freemasons*, that, to use the language of Bro. Woodford, "it would pass as an indifferent copy of that document."

Kilwinning, Mother Lodge. For an account of this body, which was for some time the rival of the Grand Lodge of Scotland, see *Kilwinning*.

Kilwinning System. The Masonry practised in Scotland, so called because it is supposed to have been instituted at the Abbey of Kilwinning. Oliver uses the term in his *Mirror for the Johannite Masons* (p. 120). (See *Saint John's Masonry*.)

King. The second officer in a Royal Arch Chapter in America. He is the representative of Zerubbabel, prince or governor of Judah. When the Chapter meets as a Lodge of Mark, Past, or Most Excellent Masters, the king acts as Senior Warden.

After the rebuilding of the second Temple, the government of the Jews was administered

by the high priests as the vicegerents of the kings of Persia, to whom they paid tribute. This is the reason that the high priest is the presiding officer in a Chapter, and the king only a subordinate. But in the Chapters of England and Ireland, the king is made the presiding officer. The jewel of the king is a level surmounted by a crown suspended within a triangle.

King of the Sanctuary. A side degree formerly conferred in the presence of five Past Masters, now in disuse.

King of the World. A degree in the system of the Philosophical Rite.

Kings, The Five. The sacred code of the older Chinese. The word king signifies web of cloth, or the warp that keeps the threads in position, or upon which we may weave the somber and golden colors that make up this life's pictured history. This great light in Chinese secret societies contains the best sayings of the best sages on the ethico-political duties of life. They cannot be traced to a period beyond the tenth century B.C., although the religion is believed to be older.

Some of the superior classes of Chinese are believers in the great philosopher Lao-tse, and others in the doctrines of Confucius. The two religions appear to be twin in age, not strikingly dissimilar, and each has been given a personality in color in accordance with the character of ethics believed in by the two writers. Lao-tse and Confucius were the revivers of an older religion, the former of whom was born 604 B.C., and the latter fifty-four years subsequently.

The five kings are, the Yih-King, or Book of Changes; the Shi-King, or Book of Songs; the Shu-King, or Book of Annals; the Ch'un Ts'iu, or "Spring and Autumn"; and the Li-King, or Book of Rites. The fourth book was composed by Confucius himself, while the first three are supposed to have been compiled by him, and the fifth by his disciples from his teachings.

Dr. Legge, late Professor of Chinese at Oxford, England, and Dr. Medhurst assert that there are no authentic records in China earlier than 1100 B.C., and no alphabetical writing before 1500 B.C.

The grandeur of the utterances and brilliancy of the intellectual productions of Confucius and Mencius, as law-givers and expounders of the sacred code of the Chinese, called The Five Kings, are much to be admired, and are the trestle-board of fully 80,000,000 of the earth's population.

Kislev or **Chislev.** (כִּסְלֵו.) The third month of the Hebrew civil year, and corresponding with the months November and December, beginning with the new moon of the former.

Kiss, Fraternal. The Germans call it *der bruder kuss;* the French, *le baiser fraternal.* It is the kiss given in the French and German Lodges by each brother to his right and left hand neighbor when the labors of the Lodge are closed. It is not adopted in the English or American systems of Ancient Craft Masonry, although practised in some of the high degrees.

Kiss of Peace. In the reception of an Ancient Knight Templar, it was the practise for the one who received him to greet him with a kiss upon the mouth. This, which was called the *osculum pacis,* or kiss of peace, was borrowed by the Templars from the religious orders, in all of which it was observed. It is not practised in the receptions of Masonic Templarism.

Kloss, Georg Burkh. Franz. A celebrated German Mason and Doctor of Medicine, who was born in 1788. Dr. Kloss was initiated into Masonry early in life. He reorganized the Eclectic Grand Lodge, of which he was several times Grand Master. He resided at Frankfort-on-the-Main, where he enjoyed a high reputation as a physician. He was the possessor of an extensive Masonic library, and devoted himself to the study of the antiquities and true character of the Masonic institution, insomuch that he was styled the "teacher of the German Freemasons." Kloss's theory was that the present Order of Freemasons found its origin in the stone-cutters and building corporations of the Middle Ages. He delivered, in the course of his life, many valuable historical discourses before the Lodge Zur Einigheit, several of which were printed and published: *Annals of the Lodge Zur Einigheit,* Frankfort, 1840; *Freemasonry in its true meaning, from the ancient and genuine documents of the Stonemasons,* Leipsic, 1846; *A History of Freemasonry in England, Scotland, and Ireland,* Leipsic, 1848; *A History of the Freemasons of France, from genuine documents,* Darmstadt, 1852; and a *Bibliography of Freemasonry,* Frankfort, 1844. This last is a most valuable contribution to Masonic literature. It contains a list of more than six thousand Masonic works in all languages, with critical remarks on many of them. Dr. Kloss died at Frankfort, February 10, 1854. Bro. Meisinger, who delivered his funeral eulogy, said of him: "He had a rare amount of learning, and was a distinguished linguist; his reputation as a physician was deservedly great; and he added to these a friendly, tender, amiable disposition, with great simplicity and uprightness of character."

Kneeling. Bending the knees has, in all ages of the world, been considered as an act of reverence and humility, and hence Pliny, the Roman naturalist, observes, that "a certain degree of religious reverence is attributed to the knees of man." Solomon placed himself in this position when he prayed at the consecration of the Temple; and Masons use the same posture in some portions of their ceremonies, as a token of solemn reverence. In the act of prayer, Masons in the lower degrees adopt the standing posture, which was the usage of the primitive Church, where it was symbolic of the resurrection; but Masons in the higher degrees generally kneel on one knee.

Knee to Knee. When, in his devotions to the G. A. O. T. U., he seeks forgiveness for the

past and strength for the future, the Mason is taught that he should, in these offices of devotion, join his brother's name with his own. The prerogative that Job, in his blindness, thought was denied to him, when he exclaimed, "Oh that one might plead for a man with God, as a man pleadeth for his neighbor!" is here not only taught as a right, but inculcated as a duty; and the knee is directed to be bent in intercession, not for ourselves alone, but for the whole household of our brethren.

Knewt-neb-s. The Egyptian goddess personifying the West, facing the East.

Knife and Fork Degree. Those Masons who take more delight in the refreshments of the banquet than in the labors of the Lodge, and who admire Masonry only for its social aspect, are ironically said to be "Members of the Knife and Fork Degree."

The sarcasm was first uttered by Dermott, when he said in his *Ahiman Rezon* (p. 36), speaking of the Moderns, that "it was also thought expedient to abolish the old custom of studying geometry in the Lodge; and some of the young brethren made it appear that a good knife and fork in the hands of a dexterous brother, over proper materials, would give greater satisfaction and add more to the rotundity of the Lodge than the best scale and compass in Europe.

Knigge, Adolph Franz Friederich Ludwig, Baron von. He was at one time among the most distinguished Masons of Germany; for while Weishaupt was the ostensible inventor and leader of the system of Bavarian Illuminism, it was indebted for its real form and organization to the inventive genius of Knigge. He was born at Brendenbeck, near Hanover, October 16, 1752. He was initiated, January 20, 1772, in a Lodge of Strict Observance at Cassel, but does not appear at first to have been much impressed with the Institution, for, in a letter to Prince Charles of Hesse, he calls its ceremonies "absurd, juggling tricks." Subsequently his views became changed, at least for a time. When, in 1780, the Marquis de Costanzo was despatched by Weishaupt to Northern Germany to propagate the Order of the Illuminati, he made the acquaintance of Knigge, and succeeded in gaining him as a disciple. Knigge afterward entered into a correspondence with Weishaupt, in consequence of which his enthusiasm was greatly increased. After some time, in reply to the urgent entreaties of Knigge for more light, Weishaupt confessed that the Order was as yet in an unfinished state, and actually existed only in his own brain; the lower classes alone having been organized. Recognizing Knigge's abilities, he invited him to Bavaria, and promised to surrender to him all the manuscript materials in his possession, that Knigge might out of them, assisted by his own invention, construct the high degrees of the Rite.

Knigge accordingly repaired to Bavaria in 1781, and when he met Weishaupt, the latter consented that Knigge should elaborate the whole system up to the highest mysteries.

This task Knigge accomplished, and entered into correspondence with the Lodges, exerting all his talents, which were of no mean order, for the advancement of the Rite. He brought to its aid the invaluable labors of Bode, whom he prevailed upon to receive the degrees.

After Knigge had fully elaborated the system, and secured for it the approval of the Areopagites, he introduced it into his district, and began to labor with every prospect of success. But Weishaupt now interfered; and, notwithstanding his compact with Knigge, he made many alterations and additions, which he imperiously ordered the Provincial Directors to insert in the ritual. Knigge, becoming disgusted with this proceeding, withdrew from the Order and soon afterward entirely from Freemasonry, devoting the rest of his life to general literature. He died at Bremen, May 6, 1796.

Knigge was a man of considerable talents, and the author of many books, both Masonic and non-Masonic. Of these the following are the most important. A work published anonymously in 1781, entitled *Ueber Jesuiten, Freimaureren und deutsche Rosenkreuzer*, i. e., "On the Jesuits, Freemasons and Rosicrucians"; *Versuch über die Freimaurerei*, i. e., "Essay on Freemasonry," in 1784; *Beytrag zur neuesten Geschichte des Freimaurerordens*, i. e., "Contribution towards the latest History of the Order of Freemasons," in 1786; and, after he had retired from the Illuminati, a work entitled *Philo's endliche Erklärung*, or "Philo's final Declaration," 1788, which professed to be his answer to the numerous inquiries made of him in reference to his connection with the Order.

Among his most popular non-Masonic works was a treatise on Social Philosophy, with the title of *Ueber den Umgang mit Menschen*, or, "On Conversation with Men." This work, which was written toward the close of his life, was very favorably received throughout Germany, and translated into many languages. Although abounding in many admirable remarks on the various relations and duties of life, to the Mason it will be particularly interesting as furnishing a proof of the instability of the author's opinions, for, with all his abilities, Knigge evidently lacked a well-balanced judgment. Commencing life with an enthusiastic admiration for Freemasonry, in a few years he became disgusted with it; no long time elapsed before he was found one of its most zealous apostles; and again retiring from the Order, he spent his last days in writing against it. In his *Conversation with Men*, is a long chapter on Secret Societies, in which he is scarcely less denunciatory of them than Barruel or Robison.

Knighthood. The Saxon word *cniht*, from which we get the English *knight*, signified at first a youth, and then a servant, or one who did domestic service, or a soldier who did military service, which might either be on foot or on horseback; but the French word *chevalier* and the German *ritter* both refer to his

equestrian character. Although Tacitus says that the German kings and chiefs were attended in war and peace by a select body of faithful servants, and although the Anglo-Saxon kings and thanes had their military attendants, who served them with a personal fealty, the knight, in the modern acceptation of the word, did not appear until the establishment in France of the order of chivalry. Thence knighthood rapidly passed into the other countries of Christendom; for it always was a Christian institution.

The stages through which a candidate passed until his full investiture with the rank of knighthood were three: the Page, the Squire or Esquire, and the Knight.

1. *The Page.* The child who was destined to knighthood continued until he was seven years old in the charge of women, who gave him that care which his tender age required. He was then taken from them and placed in the hands of a governor, who prepared him by a robust and manly education for the labors and dangers of war. He was afterward put into the household of some noble, where he first assumed the title of a Page. His employments were to perform the service of a domestic about the person of his master and mistress; to attend them in the chase, on their journeys, their visits, and their walks; to carry their messages, or even to wait on them at table. The first lessons given to him were in the love of God and attachment to and respect for females. His religious education was not neglected, and he was taught a veneration for all sacred things. His instructions in respect to manners, conversation, and virtuous habits were all intended to prepare him for his future condition as a knight.

2. *The Squire.* The youth, on emerging from the employment of a Page, took on him that of Squire, called in French *écuyer*. This promotion was not unaccompanied by an appropriate ceremony. The Page who was to be made a Squire was presented to the altar by his father and mother, or by those who represented them, each holding a lighted taper in his hand. The officiating priest took from the altar a sword and belt, on which he bestowed several benedictions, and then placed them on the youth, who from that time constantly wore them. The Squires were divided into various classes, each of whose employment was different. To some, as to the chamberlains, was committed the care of the gold and silver of the household; others, as the constable, had the charge of the table utensils; others were carvers, and others butlers. But the most honorable and the only one connected immediately with chivalry was the squire of Honor or the Body Squire. He was immediately attached to some knight, whose standard he carried. He helped to dress and undress him, and attended him morning and evening in his apartment. On a march, he led the war-horse of his master and carried his sword, his helmet, and his shield. In the hour of battle, the Squire, although he did not actually take a part in the combat, was not altogether an idle spectator of the contest. In the shock of battle, the two lines of knights, with their lances in rest, fell impetuously on each other; some, who were thrown from their horses, drew their swords or battle-axes to defend themselves and to make new attacks, while advantage was sought by their enemies over those who had been thrown. During all this time, the Squire was attentive to every motion of his master. In the one case, to give him new arms, or to supply him with another horse; to raise him up when he fell, and to ward off the strokes aimed at him; while in the other case, he seconded the knight by every means that his skill, his valor, and his zeal could suggest, always, however, within the strict bounds of the defensive, for the Squire was not permitted by the laws of chivalry to engage in offensive combat with a knight.

3. *The Knight.* These services merited and generally received from the knight the most grateful acknowledgment, and in time the high honor of the badge of knighthood bestowed by his own hand, for every knight possessed the prerogative of making other knights.

The age of twenty-one was that in which the youthful Squire, after so many proofs of zeal, fidelity, and valor, might be admitted to the honor of knighthood. The rule as to age was not, however, always observed. Sometimes the Squire was not knighted until he was further advanced in years, and in the case of princes the time was often anticipated. There are instances of infants, the sons of kings, receiving the dignity of knighthood.

The creation of a knight was accompanied by solemn ceremonies, which some writers have been pleased to compare to those of the Church in the administration of its sacraments, and there was, if not a close resemblance, a manifest allusion in the one to the other. The white habit and the bath of the knight corresponded to the form of baptism; the stroke on the neck and the embrace given to the new knight were compared to the ceremony of confirmation; and as the godfather made a present to the child whom he held at the font, so the lord who conferred knighthood was expected to make a gift or grant some peculiar favor to the knight whom he had dubbed.

The preliminary ceremonies which prepared the neophyte for the sword of chivalry were as follows: austere fasts; whole nights passed in prayers in a church or chapel; the sacraments of confession, penance, and the eucharist; bathings, which prefigured purity of manners and life; a white habit as a symbol of the same purity, and in imitation of the custom with new converts on their admission into the Church, and a serious attention to sermons, were all duties of preparation to be devoutly performed by the Squire previous to his being armed with the weapons and decorated with the honors of knighthood.

An old French chronicler thus succinctly details the ceremony of creation and investiture. The neophyte bathes; after which,

clothed in white apparel, he is to watch all night in the church, and remain there in prayer until after the celebration of high mass. The communion being then received, the youth solemnly raises his joined hands and his eyes to heaven, when the priest who had administered the sacrament passes the sword over the neck of the youth and blesses it. The candidate then kneels at the feet of the lord or knight who is to arm him. The lord asks him with what intent he desires to enter into that sacred Order, and if his views tend only to the maintenance and honor of religion and of knighthood. The lord, having received from the candidate a satisfactory reply to these questions, administers the oath of reception, and gives him three strokes on the neck with the flat side of the sword, which he then girds upon him. This scene passes sometimes in a hall or in the court of a palace, or, in time of war, in the open field.

The girding on of the sword was accompanied with these or similar words: "In the name of God, of St. Michael, and of St. George, I make thee a knight: be brave, be hardy, and be loyal." And then the kneeling candidate is struck upon the shoulder or back of the neck by him who confers the dignity, with the flat of the sword, and directed to rise in words like these: "Arise, Sir Damian"; a formula still followed by the sovereigns of England when they confer the honor of knighthood. And hence the word "Sir," which is equivalent to the old French "Sire," is accounted, says Ashmole, "parcel of their style."

Sir William Segar, in his treatise on *Civil and Military Honor*, gives the following account of the ceremonies used in England in the sixth century:

"A stage was erected in some cathedral, or spacious place near it, to which the gentleman was conducted to receive the honor of knighthood. Being seated on a chair decorated with green silk, it was demanded of him if he were of a good constitution, and able to undergo the fatigue required in a soldier; also whether he were a man of good morals, and what credible witnesses he could produce to affirm the same.

"Then the Bishop or Chief Prelate of the Church administered the following oath: 'Sir, *you that desire to receive the honor of knighthood, swear before God and this holy book that you will not fight against his Majesty, that now bestoweth the order of knighthood upon you. You shall also swear to maintain and defend all Ladies, Gentlemen, Widows and Orphans; and you shall shun no adventure of your person in any war wherein you shall happen to be.*'

"The oath being taken, two Lords led him to the King, who drew his sword, and laid it upon his head, saying, *God and St. George* (or what other saint the King pleased to name,) *make thee a good knight;* after which seven Ladies dressed in white came and girt a sword to his side and four knights put on his spurs.

"These ceremonies being over, the Queen took him by the right hand, and a Duchess by the left, and leading him to a rich seat, placed him on an ascent, where they seated him, the King sitting on his right hand, and the Queen on his left.

"Then the Lords and Ladies also sat down upon other seats, three descents under the King; and being all thus seated, they were entertained with a delicate collation; and so the ceremony ended."

The manner of arming a newly made knight was first to put on the spurs, then the coat of mail, the cuirass, the brasset or casque, and the gauntlets. The lord or knight conferring the honor then girded on the sword, which last was considered as the most honorable badge of chivalry, and a symbol of the labor that the knight was in future to encounter. It was in fact deemed the real and essential part of the ceremony, and that which actually constituted the knight. Du Cange, in his *Glossarium*, defines the Latin word *militare*, in its medieval sense, as signifying "to make a knight," which was, he says, "balteo militari accingere," i. e., *to gird on him the knightly belt;* and it is worthy of remark, that *cingulus*, which in pure Latin signifies *a belt*, came in the later Latin of Justinian to denote the *military profession*. I need not refer to the common expression, "a belted knight," as indicating the close connection between knighthood and the *girding* of the belt. It was indeed the belt and sword that made the knight.

The oath taken by the knight at his reception devoted him to the defense of religion and the Church, and to the protection of widows, orphans, and all of either sex who were powerless, unhappy, or suffering under injustice and oppression; and to shrink from the performance of these duties whenever called upon, even at the sacrifice of his life, was to incur dishonor for the rest of his days.

Of all the laws of chivalry, none was maintained with more rigor than that which secured respect for the female sex. "If an honest and virtuous lady," says Brantome, "will maintain her firmness and constancy, her servant, that is to say, the knight who had devoted himself to her service, must not even spare his life to protect and defend her, if she runs the least risk either of her fortune, or her honor, or of any censorious word, for we are bound by the laws of Chivalry to be the champions of women's afflictions."

Nor did any human law insist with so much force as that of chivalry upon the necessity of an inviolable attachment to truth. Adherence to his word was esteemed the most honorable part of a knight's character. Hence to give the lie was considered the most mortal and irreparable affront, to be expiated only by blood.

An oath or solemn promise given in the name of a knight was of all oaths the most inviolable. Knights taken in battle engaged to come of their own accord to prison whenever it was required by their captors, and on their word of honor they were readily allowed liberty for the time for which they asked it; for no one ever doubted that they would ful-

fil their engagements. Sovereigns considered their oath of knighthood as the most solemn that they could give, and hence the Duke of Bretagne, having made a treaty of peace with Charles VI. of France, swore to its observance "by the faith of his body and the loyalty of his knighthood."

It is scarcely necessary to say that generous courage was an indispensable quality of a knight. An act of cowardice, of cruelty, or of dishonorable warfare in battle, would overwhelm the doer with deserved infamy. In one of the *tenzones*, or poetical contests of the Troubadours, it is said that to form a perfect knight all the tender offices of humanity should be united to the greatest valor, and pity and generosity to the conquered associated with the strictest justice and integrity. Whatever was contrary to the laws of war was inconsistent with the laws of chivalry.

The laws of chivalry also enforced with peculiar impressiveness sweetness and modesty of temper, with that politeness of demeanor which the word *courtesy* was meant perfectly to express. An uncourteous knight would have been an anomaly.

Almost all of these knightly qualities are well expressed by Chaucer in the Prologue to his *Knight's Tale* (l. 43–50; 67–72):

"A knight there was, and that a worthy man,
That from the time that he first began
To riden out he loved chivalry,
Truth and honor, freedom and courtesy.
Full worthy was he in his lord's war
And thereto had he ridden, no man farther;
As well in Christendom as in Heatheness,
And ever honored for his worthiness.

. . . . . .

"And ever more he had a sovereign price,
And though that he was worthy, he was wise
And of his port as meek as is a maid.
He never yet no villainy not said
In all his life unto no manner wight,
He was a very perfect, gentle knight."

The most common and frequent occasions on which knights were created, independent of those which happened in war, were at the great feasts of the Church, and especially at the feast of Pentecost; also at the publications of peace or a truce, the coronations of kings, the birth or baptism of princes, and the days on which those princes had themselves received knighthood. But a knight could at any time confer the distinction on one whom he deemed deserving of it.

There was a distinction between the titles as well as the dress of a knight and a squire. The knight was called Don, Sire, Messire, or, in English, Sir—a title not bestowed upon a squire: and while the wife of the former was called a Lady, that of the latter was only a Gentlewoman. The wife of a knight was sometimes called *Militissa*, or female knight.

In their dresses and their harness, knights were entitled to wear gold and golden decorations, while the squires were confined to the use of silver. Knights alone had a right to wear, for the lining of their cloaks and mantles, ermine, sable, and meniver, which were the most valuable furs; while those of a less costly kind were for the squires. The long and trailing mantle, of a scarlet color, and lined with ermine or other precious furs, which was called the Mantle of Honor, was especially reserved for the knight. Such a mantle was always presented by the kings of France to knights whom they created. The mantle was considered the most august and noble decoration that a knight could wear, when he was not dressed in his armor. The official robes still worn by many magistrates in Europe are derived from the knightly Mantle of Honor.

It should be remarked that the order of knighthood, and the ceremonies accompanying the investiture of a knight, were of a symbolic character, and are well calculated to remind the Freemason of the symbolic character of his own Institution.

The sword which the knight received was called "the arms of mercy," and he was told to conquer his enemies by mercy rather than by force of arms. Its blade was two-edged, to remind him that he must maintain chivalry and justice, and contend only for the support of these *two chief pillars of the temple of honor*. The lance represented Truth, because truth, like the lance, is straight. The coat of mail was the symbol of a fortress erected against vice; for, as castles are surrounded by walls and ditches, the coat of mail is closed in all its parts, and defends the knight against treason, disloyalty, pride, and every other evil passion. The rowels of the spur were given to urge the possessor on to deeds of honor and virtue. The shield, which he places betwixt himself and his enemy, was to remind him that the knight is a shield interposed between the prince and the people, to preserve peace and tranquillity.

In a Latin manuscript of the thirteenth century, copied by Anstis (App., p. 95), will be found the following symbolical explanation of the ceremonial of knighthood. The *bath* was a symbol of the washing away of sin by the sacrament of baptism. The bed into which the novice entered and reposed after the bath, was a symbol of the peace of mind which would be acquired by the virtue of chivalry. The white garments with which he was afterward clothed, were a symbol of the purity which a knight should maintain. The scarlet robe put on the newly made knight was symbolic of the blood which he should be ready to shed for Christ and the Church. The dark boots are a sign of the earth, whence we all came, and to which we are all to return. The white belt is a symbol of chastity. The golden spur symbolizes promptitude of action. The sword is a symbol of severity against the attacks of Satan; its two edges are to teach the knight that he is to defend the poor against the rich, and the weak against the powerful. The white fillet around the head is a symbol of good works. The alapa or blow was in memorial of him who made him a knight.

There was one usage of knighthood which is peculiarly worthy of attention. The love of

glory, which was so inspiring to the knights of chivalry, is apt to produce a spirit of rivalry and emulation that might elsewhere prove the fruitful source of division and discord. But this was prevented by the fraternities of arms so common among the knights. Two knights who had, perhaps, been engaged in the same expeditions, and had conceived for each other a mutual esteem and confidence, would enter into a solemn compact by which they became and were called "Brothers in arms." Under this compact, they swore to share equally the labors and the glory, the dangers and the profits of all enterprises, and never, under any circumstances, to abandon each other. The brother in arms was to be the enemy of those who were the enemies of his brother, and the friend of those who were his friends; both of them were to divide their present and future wealth, and to employ that and their lives for the deliverance of each other if taken prisoner. The claims of a brother in arms were paramount to all others, except those of the sovereign. If the services of a knight were demanded at the same time by a lady and by a brother in arms, the claim of the former gave way to that of the latter. But the duty which was owing to the prince or to the country was preferred to all others, and hence brothers in arms of different nations were only united together so long as their respective sovereigns were at peace, and a declaration of war between two princes dissolved all such confraternities between the subjects of each. But except in this particular case, the bond of brotherhood was indissoluble, and a violation of the oath which bound two brothers together was deemed an act of the greatest infamy. They could not challenge each other. They even wore in battle the same habits and armor, as if they desired that the enemy should mistake one for the other, and thus that both might incur an equal risk of the dangers with which each was threatened.

Knights were divided into two ranks, namely, Knights Bachelors and Knights Bannerets.

The *Knight Bachelor* was of the lower rank, and derived his title most probably from the French *bas chevalier*. In the days of chivalry, as well as in later times, this dignity was conferred without any reference to a qualification of property. Many Knights Bachelors were in fact mere adventurers, unconnected by feudal ties of any sort, who offered their services in war to any successful leader, and found in their sword a means of subsistence, not only by pay and plunder, but in the regularly established system of ransom, which every knight taken in action paid for his liberty. The Knight Bachelor bore instead of a square banner a pointed or triangular ensign, which was forked by being extended in two cornets or points, and which was called a pennon. The triangular banner, not forked, was called a pennoncel, and was carried by a squire.

The *Knight Banneret*, a name derived from *banneret*, a little banner, was one who possessed many fiefs, and who was obliged to serve in war with a large attendance of followers.

If a knight was rich and powerful enough to furnish the state or his sovereign with a certain number of armed men, and to entertain them at his own expense, permission was accorded to him to add to his simple designation of Knight or Knight Bachelor, the more noble and exalted title of Knight Banneret. This gave him the right to carry a square banner on the top of his lance. Knights Bachelors were sometimes made Bannerets on the field of battle, and as a reward of their prowess, by the simple ceremony of the sovereign cutting off with his sword the cornets or points of their pennons, thus transforming them into square banners. Clark, in his *History of Knighthood* (vol. i., p. 73), thus describes this ceremony in detail:

"The king or his general, at the head of his army drawn up in order of battle after a victory, under the royal standard displayed, attended by all the officers and nobility present, receives the knight led between two knights carrying his pennon of arms in his hand, the heralds walking before him, who proclaim his valiant achievements for which he has deserved to be made a Knight Banneret, and to display his banner in the field; then the king or general says to him, *Advancez toy banneret*, and causes the point of his pennon to be rent off; then the new knight, having the trumpets before him sounding, the nobility and officers bearing him company, is sent back to his tent, where they are all entertained."

But generally the same ceremonial was used in times of peace at the making of a Knight Banneret as at the institution of barons, viscounts, earls, and the other orders of nobility, with whom they claimed an almost equality of rank.

Not long after the institution of knighthood as an offshot of chivalry, we find, besides the individual Knights Bachelors and Knights Bannerets, associations of knights banded together for some common purpose, of which there were two classes. First: Fraternities possessing property and rights of their own as independent bodies into which knights were admitted as monks were into religious foundations. Of this class may be mentioned, as examples, the three great religious Orders—the Templars, the Hospitalers, and the Teutonic Knights.

The second class consisted of honorary associations established by sovereigns within their respective dominions, consisting of members whose only common tie is the possession of the same titular distinction. Such are most of the European orders of knighthood now existing, as the Knights of the Garter in England, the Knights of St. Andrew in Russia, and the Knights of the Golden Fleece in Spain. The institution of these titular orders of knighthood dates at a much more recent period than that of the Fraternities who constitute the first class, for not one of them can trace its birth to the time of the Crusades, at

which time the Templars and similar orders sprang into existence.

Ragon, in his *Cours Philosophique*, attempts to draw a parallel between the institution of knighthood and that of Freemasonry, such as that there were three degrees in one as there are in the other, and that there was a close resemblance in the ceremonies of initiation into both orders. He thus intimates for them a common origin; but these parallels should rather be considered simply as coincidences. The theory first advanced by the Chevalier Ramsay, and adopted by Hund and the disciples of the Rite of Strict Observance, that all Freemasons are Templars, and that Freemasonry is a lineal successor of ancient knighthood, is now rejected as wholly untenable and unsupported by any authentic history. The only connection between knighthood and Freemasonry is that which was instituted after the martyrdom of James de Molay, when the Knights Templar sought concealment and security in the bosom of the Masonic Fraternity.

When one was made a knight, he was said to be *dubbed*. This is a word in constant use in the Medieval manuscripts. In the old Patavian statutes, "Miles adobatus," *a dubbed knight*, is defined to be "one who, by the usual ceremonies, acquires the dignity and profession of chivalry." The Provençal writers constantly employ the term *to dub*, "adouber," and designate a knight who has gone through the ceremony of investiture as "un chevalier adoubé," *a dubbed knight*. Thus, in the *Romaunt d'Auberi*, the Lady d'Auberi says to the king:

> "Sire, dit elle, par Dieu de Paradis
> Soit *adouber* mes frères auberis."

That is, "Sire, for the love of the God of Paradise, let my brothers be *dubbed*."

The meaning of the word then is plain: *to dub*, is to make or create a knight. But its derivation is not so easily settled amid the conflicting views of writers on the subject. The derivation by Menage from *duplex* is not worth consideration. Henschell's, from a Provençal word *adobare*, "to equip," although better, is scarcely tenable. The derivation from the Anglo-Saxon *dubban*, "to strike or give a blow," would be reasonable, were it not presumable that the Anglo-Saxons borrowed their word from the French and from the usages of chivalry. It is more likely that *dubban* came from *adouber*, than that *adouber* came from *dubban*. The Anglo-Saxons took their forms and technicalities of chivalry from the French. After all, the derivation proposed by Du Cange is the most plausible and the one most generally adopted, because it is supported by the best authorities. He says that it is derived from the Latin *adoptare*, to adopt, "quod qui aliquem armis instruit ac Militem facit, eum quodammodo adoptat in filium," i. e., "He who equips any one with arms, and makes him a knight, adopts him, as it were, as a son." To dub one as a knight is, then, to adopt him into the order of chivalry. The idea was evidently taken from the Roman law of *adoptatio*, or adoption, where, as in conferring knighthood, a blow on the cheek was given.

The word *accolade* is another term of chivalry about which there is much misunderstanding. It is now supposed to mean the blow of the sword, given by the knight conferring the dignity, on the neck or shoulder of him who received it. But this is most probably an error. The word is derived, says Brewer (*Dict. Phr. and Fab.*), from the Latin *ad collum*, "around the neck," and signifies the embrace "given by the Grand Master when he receives a neophyte or new convert." It was an early custom to confer an embrace and the kiss of peace upon the newly made knight, which ceremony, Ashmole thinks, was called the *accolade*. Thus, in his *History of the Order of the Garter* (p. 15), he says: "The first Christian kings, at giving the belt, kissed the new knight on the left cheek, saying: *In the honor of the Father and the Son and the Holy Ghost, I make you a knight.* It was called the *osculum pacis*, the kiss of favor or of brotherhood [more correctly the kiss of peace], and is presumed to be the accolade or ceremony of embracing, which Charles the Great used when he knighted his son Louis the Débonnair." In the book of Johan de Vignay, which was written in the fourteenth century, this kiss of peace is mentioned together with the accolade: "Et le Seigneur leur doit donner une colée en signe de proeste et de hardement, et que il leur souveigne de celui noble homme qui la fait chevalier. Et donc les doit le Seigneur baisier en la bouche en signe de paix et d'amour"; i. e., "And the lord ought to give him [the newly-made knight] an accolade as a symbol of readiness and boldness, and in memory of the nobleman who has made him a knight; and then the lord ought to kiss him on the mouth as a sign of peace and love."

In an old manuscript in the Cottonian Library, entitled "The manner of makynge Knyghtes after the custome of Engelande," a copy of which is inserted in Anstis's *Historical Essay on the Knighthood of the Bath* (Append., p. 99), is this account of the embrace and kiss, accompanied with a blow on the neck: "Thanne shall the Squyere lift up his armes on high, and the Kynge shall put his armes about the nekke of the Squyer, and lyftynge up his right hande he shall smyte the Squyer in the nekke, seyeng thus: *Be ye a good Knyhte;* kissing him." Anstis himself is quite confused in his description of the ceremonial, and enumerates "the blow upon the neck, the accolade, with the embracing and kiss of peace," as if they were distinct and separate ceremonies; but in another part of his book he calls the accolade "the laying hands upon the shoulders." I am inclined to believe, after much research, that both the blow on the neck and the embrace constituted properly the accolade. This blow was sometimes given with the hand, but sometimes with the sword. Anstis says that "the action which fully and finally impresses the character of

knighthood is the blow given with the hand upon the neck or shoulder." But he admits that there has been a controversy among writers whether the blow was heretofore given with a sword or by the bare hand upon the neck (p. 73).

The mystical signification which Caseneuve gives in his *Etymologies* (voc. Accollée) is ingenious and appropriate, namely, that the blow was given on the neck to remind him who received it that he ought never, by flight from battle, to give an enemy the opportunity of striking him on the same place.

But there was another blow, which was given in the earliest times of chivalry, and which has by some writers been confounded with the accolade, which at length came to be substituted for it. This was the blow on the cheek, or, in common language, the box on the ear, which was given to a knight at his investiture. This blow is never called the accolade by the old writers, but generally the *alapa*, rarely the *gautada*. Du Cange says that this blow was sometimes given on the neck, and that then it was called the *colaphus*, or by the French *colée*, from *col*, the neck. Duchesne says the blow was always given with the hand, and not with the sword.

Ashmole says: "It was in the time of Charles the Great the way of knighting by the *colaphum*, or blow on the ear, used in sign of sustaining future hardships, . . . a custom long after retained in Germany and France. Thus William, Earl of Holland, who was to be knighted before he could be emperor, at his being elected king of the Romans, received knighthood by the box of the ear, etc., from John, king of Bohemia, A. D. 1247."

Both the word *alapa* and the ceremony which it indicated were derived from the form of manumission among the Romans, where the slave on being freed received a blow called *alapa* on the cheek, characterized by Claudian as "*felix injuria*," a happy injury, to remind him that it was the last blow he was compelled to submit to: for thenceforth he was to be a freeman, capable of vindicating his honor from insult. The *alapa*, in conferring knighthood, was employed with a similar symbolism. Thus in an old register of 1260, which gives an account of the knighting of Hildebrand by the Lord Ridolfonus, we find this passage, which I give in the original, for the sake of the one word *gautata*, which is unusual: "Postea Ridolfonus de more dedit illi gautatam et dixit illi. Tu es miles nobilis militiæ equestris, et hæc gautata est in recordationem, illius qui te armavit militem, et hœc gautata debet esse ultima injuria, quam patienter acceperis." That is: "Afterwards Ridolfonus gave him in the customary way the blow, and said to him: Thou art a noble Knight of the Equestrian Order of Chivalry, and this blow is given in memory of him who hath armed thee as a knight, and it must be the last injury which thou shalt patiently endure." The first reason assigned for the blow refers to an old custom of cuffing the witnesses to a transaction, to impress it on their memory. Thus, by the riparian law, when there was a sale of land, some twelve witnesses were collected to see the transfer of property and the payment of the price, and each received a box on the ear, that he might thus the better remember the occurrence. So the knight received the blow to make him remember the time of his receiving his knighthood and the person who conferred it.

For the commission of crime, more especially for disloyalty to his sovereign, a knight might be degraded from the Order; and this act of degradation was accompanied with many ceremonies, the chief of which was the hacking off his spurs. This was to be done for greater infamy, not by a knight, but by the master cook. Thus Stow says that, at the making of Knights of the Bath, the king's master cook stood at the door of the chapel, and said to each knight as he entered, "Sir Knight, look that you be true and loyal to the king my master, or else I must hew these spurs from your heels." His shield too was reversed, and the heralds had certain marks called *abatements*, which they placed on it to indicate his dishonor.

M. de St. Palaye concludes his learned and exhaustive *Memoires sur l'ancienne Chevalerie* with this truthful tribute to that spirit of chivalry in which ancient knighthood found its birth, and with it I may appropriately close this article:

"It is certain that chivalry, in its earliest period, tended to promote order and good morals; and although it was in some respects imperfect, yet it produced the most accomplished models of public valor and of those pacific and gentle virtues that are the ornaments of domestic life; and it is worthy of consideration, that in an age of darkness, most rude and unpolished, such examples were to be found as the results of an institution founded solely for the public welfare, as in the most enlightened times have never been surpassed and very seldom equalled."

Knight. 1. An order of chivalry. (See *Knighthood* and *Knight Masonic*.)

2. The Eleventh and last degree of the Order of African Architects.

Knight, Black. See *Black Brothers*.

Knight Commander. (*Chevalier Commandeur*.) 1. The Ninth Degree of the Rite of Elect Cohens. 2. A distinction conferred by the Supreme Council of the Ancient and Accepted Scottish Rite for the Southern Jurisdiction of the United States on deserving Honorary Thirty-thirds and Sublime Princes of the Royal Secret. It is conferred by a vote of the Supreme Council, and is unattended with any other ceremony than the presentation of a decoration and a patent.

Knight Commander of the Temple. See *Sovereign Commander of the Temple*.

Knight Commander of the White and Black Eagle. (*Chevalier Commandeur de l'Aigle blanc et noir*.) The Eightieth Degree of the collection of the Metropolitan Chapter of France.

Knight Crusader. (*Chevalier Croisé.*) Thory says (*Act. Lat.*, i., 303) that this is a chivalric degree, which was communicated to him by a member of the Grand Lodge of Copenhagen. He gives no further account of its character.

Knight Elect of Fifteen. 1. The Sixteenth Degree of the Ancient and Accepted Rite, more commonly called Illustrious Elect of the Fifteen. (See *Elect of Fifteen.*)

2. The Tenth Degree of the Chapter of Emperors of the East and West.

3. The Eleventh Degree of the Rite of Mizraim.

Knight Elect of Twelve, Sublime. The Eleventh Degree of the Ancient and Accepted Rite, sometimes called "Twelve Illustrious Knights." After vengeance had been taken upon the traitors mentioned in the degrees of Elected Knights of Nine and Illustrious Elected of Fifteen, Solomon, to reward those who had exhibited their zeal and fidelity in inflicting the required punishment, as well as to make room for the exaltation of others to the degree of Illustrious Elected of Fifteen, appointed twelve of these latter, chosen by ballot, to constitute a new degree, on which he bestowed the name of Sublime Knights Elected, and gave them the command over the twelve tribes of Israel. The Sublime Knights rendered an account each day to Solomon of the work that was done in the Temple by their respective tribes, and received their pay. The Lodge is called a Chapter. In the old rituals Solomon presides, with the title of Thrice Puissant, and instead of Wardens, there are a Grand Inspector and a Master of Ceremonies. In the modern ritual of the Southern Jurisdiction, the Master and Wardens represent Solomon, Hiram of Tyre, and Adoniram, and the style of the Master and Senior Warden is Thrice Illustrious. The room is hung with black, sprinkled with white and red tears.

The apron is white, lined and bordered with black, with black strings; on the flap, a flaming heart.

The sash is black, with a flaming heart on the breast, suspended from the right shoulder to the left hip.

The jewel is a sword of justice.

This is the last of the three Elus which are found in the Ancient Scottish Rite. In the French Rite they have been condensed into one, and make the Fourth Degree of that ritual, but not, as Ragon admits, with the happiest effect.

Knight Evangelist. A grade formerly in the archives of the Lodge of *St. Louis des Amis Réunis at Calais.* (Thory, *Acta Lat.*, i., 312.)

Knight Hospitaler. See *Knight of Malta.*

Knight, Illustrious or **Illustrious Elect.** (*Chevalier Illustre* or *Elu Illustre.*) The Thirteenth Degree of the Rite of Mizraim.

Knight Jupiter. (*Le Chevalier Jupiter.*) The Seventy-eighth Degree of the collection of Peuvret.

Knight Kadosh, formerly called Grand Elect Knight Kadosh. (*Grand Elu du Chevalier Kadosch.*) The Knight Kadosh is the Thirtieth Degree of the Ancient and Accepted Scottish Rite, called also Knight of the White and Black Eagle. While retaining the general Templar doctrine of the Kadosh system, it symbolizes and humanizes the old lesson of vengeance. It is the most popular of all the Kadoshes.

In the Knight Kadosh of the Ancient and Accepted Scottish Rite, the meetings are called Councils. The principal officers are, according to the recent rituals, a Commander, two Lieutenant Commanders, called also Prior and Preceptor; a Chancellor, Orator, Almoner, Recorder, and Treasurer. The jewel, as described in the ritual of the Southern Supreme Council, is a double-headed eagle, displayed resting on a teutonic cross, the eagle silver, the cross gold enameled red. The Northern Council uses instead of the eagle the letters J. B. M. The Kadoshes, as representatives of the Templars, adopt the Beauseant as their standard. In this degree, as in all the other Kadoshes, we find the mystical ladder of seven steps.

Knight Kadosh of Cromwell. Ragon says of this (*Tuileur*, p. 171), that it is a pretended degree, of which he has four copies, and that it appears to be a monstrosity invented by an enemy of the Order for the purposes of calumniation. The ritual says that the degree is conferred only in England and Prussia, which is undoubtedly untrue.

Knight Masonic. The word *knight*, prefixed to so many of the high degrees as a part of the title, has no reference whatever to the orders of chivalry, except in the case of Knights Templar and Knights of Malta. The word, in such titles as Knight of the Ninth Arch, Knight of the Brazen Serpent, etc., has a meaning totally unconnected with Medieval knighthood. In fact, although the English, German, and French words Knight, Ritter, and Chevalier, are applied to both, the Latin word for each is different. A Masonic knight is, in Latin, *eques;* while the Medieval writers always called a knight of chivalry *miles.* So constant is this distinction, that in the two instances of Masonic knighthood derived from the chivalric orders, the Knights Templar and the Knight of Malta, this word *miles* is used, instead of *eques*, to indicate that they are not really degrees of Masonic knighthood. Thus we say *Miles Templarius* and *Miles Melitæ.* If they had been inventions of a Masonic ritualist, the titles would have been *Eques Templarius* and *Eques Melitæ.*

The *eques*, or Masonic knight, is therefore not, in the heraldic sense, a knight at all. The word is used simply to denote a position higher than that of a mere Master; a position calling, like the "devoir" of knighthood, for the performance of especial duties. As the word "prince," in Masonic language, denotes not one of princely rank, but one invested with a share of Masonic sovereignty and command, so "knight" denotes one who is expected to be distinguished with peculiar fidelity to the

cause in which he has enlisted. It is simply, as has been said, a point of rank above that of the Master Mason. It is, therefore, confined to the high degrees.

Knight Mahadon. (*Chevalier Mahadon.*) A degree in the Archives of the *Lodge of St. Louis des Amis Réunis at Calais.*

Knight of Asia, Initiated. See *Asia, Initiated Knights of.*

Knight of Athens. (*Chevalier d'Athènes.*) 1. The Fifty-second Degree of the Rite of Mizraim. 2. A degree in the nomenclature of Fustier. 3. A degree in the Archives of the Mother Lodge of the Philosophic Rite in France.

Knight of Aurora. (*Chevalier de l'Aurore.*) A degree belonging to the Rite of Palestine. It is a modification of the Kadosh, and is cited in the collection of Fustier. In the collection of M. Viany, it is also called *Knight of Palestine.*

Knight of Beneficence. (*Chevalier de la Bienfaisance.*) The Forty-ninth Degree of the collection of the Metropolitan Chapter of France. It is also called *Knight of Perfect Silence.*

Knight of Brightness. (*Chevalier de la Clarté.*) The Seventh and last degree of the system of the Clerks of Strict Observance, called also *Magus.*

Knight of Christ. After the dissolution of the Templars in the fourteenth century, those knights who resided in Portugal retained the possessions of the Order in that country, and perpetuated it under the name of the Knights of Christ. Their badge is a red cross pattée, charged with a plain white cross. (See *Christ, Order of.*)

Knight of Constantinople. A side degree; instituted, doubtless, by some lecturer; teaching, however, an excellent moral lesson of humility. Its history has no connection whatever with Masonry. The degree is not very extensively diffused; but several Masons, especially in the Western States, are in possession of it. It may be conferred by any Master Mason on another; although the proper performance of the ceremonies requires the assistance of several. When the degree is formally conferred, the body is called a Council, and consists of the following officers: Illustrious Sovereign, Chief of the Artisans, Seneschal, Conductor, Prefect of the Palace, and Captain of the Guards.

Knight of Hope. 1. A species of androgynous Masonry, formerly practised in France. The female members were called *Dames* or *Ladies of Hope.* 2. A synonym of *Knight of the Morning Star*, which see.

Knight of Iris. (*Chevalier de l'Iris.*) The Fourth Degree of the Hermetic Rite of Montpellier.

Knight of Jerusalem. (*Chevalier de Jerusalem.*) The Sixty-fifth Degree of the collection of the Metropolitan Chapter of France.

Knight of Justice. Knights Hospitalers of St. John of Jerusalem or Knights of Malta were called, in the technical language of the Order, Knights of Justice.

Knights of Malta. This Order, which at various times in the progress of its history received the names of Knights Hospitalers, Knights of St. John of Jerusalem, Knights of Rhodes, and, lastly, Knights of Malta, was one of the most important of the religious and military orders of knighthood which sprang into existence during the Crusades which were instituted for the recovery of the Holy Land. It owes its origin to the Hospitalers of Jerusalem, that wholly religious and charitable Order which was established at Jerusalem, in 1048, by pious merchants of Amalfi for the succor of poor and distressed Latin pilgrims. (See *Hospitalers of Jerusalem.*) This society, established when Jerusalem was in possession of the Mohammedans, passed through many vicissitudes, but lived to see the Holy City conquered by the Christian knights. It then received many accessions from the Crusaders, who, laying aside their arms, devoted themselves to the pious avocation of attending the sick. It was then that Gerard, the Rector of the Hospital, induced the brethren to take upon themselves the vows of poverty, obedience, and chastity, which they did at the hands of the Patriarch of Jerusalem, who clothed them in the habit selected for the Order, which was a plain, black robe bearing a white cross of eight points on the left breast. This was in the year 1099, and some writers here date the beginning of the Order of Knights of Malta. But this is an error. It was not until after the death of Gerard that the Order assumed that military character which it ever afterward maintained, or, in other words, that the peaceful Hospitalers of Jerusalem became the warlike Knights of St. John.

In 1118, Gerard, the Rector of the Hospital, died, and was succeeded by Raymond du Puy, whom Marulli, the old chronicler of the Order, in his *Vite de' Gran Maestri* (Napoli, 1636), calls "secondo Rettore e primo Maestro."

The peaceful habits and monastic seclusion of the Brethren of the Hospital, which had been fostered by Gerard, no longer suited the warlike genius of his successor. He therefore proposed a change in the character of the society, by which it should become a military Order, devoted to active labors in the field and the protection of Palestine from the encroachments of the infidels. This proposition was warmly approved by Baldwyn II., King of Jerusalem, who, harassed by a continual warfare, gladly accepted this addition to his forces. The Order having thus been organized on a military basis, the members took a new oath, at the hands of the Patriarch of Jerusalem, by which they bound themselves to defend the cause of Christianity against the infidels in the Holy Land to the last drop of their blood, but on no account to bear arms for any other purpose.

This act, done in 1118, is considered as the beginning of the establishment of the Order of Knights Hospitalers of St. John, of which Raymond du Puy is, by all historians, deemed the first Grand Master.

By the rule established by Du Puy for the government of the Order, it was divided into three classes, namely, 1. Knights, who were called Knights of Justice; 2. Chaplains; and 3. Serving Brothers; all of whom took the three vows of chastity, obedience, and poverty. There was also attached to the institution a body of men called Donats, who, without assuming the vows of the Order, were employed in the different offices of the hospital, and who wore what was called the demi-cross, as a badge of their connection.

The history of the Knights from this time until the middle of the sixteenth century is but a chronicle of continued warfare with the enemies of the Christian faith. When Jerusalem was captured by Saladin, in 1187, the Hospitalers retired to Margat, a town and fortress of Palestine which still acknowledged the Christian sway. In 1191, they made Acre, which in that year had been recaptured by the Christians, their principal place of residence. For just one hundred years the knights were engaged, with varying success, in sanguinary contests with the Saracens and other infidel hordes, until Acre, the last stronghold of the Christians in the Holy Land, having fallen beneath the blows of the victorious Moslems, Syria was abandoned by the Latin race, and the Hospitalers found refuge in the island of Cyprus, where they established their convent.

The Order had been much attenuated by its frequent losses in the field, and its treasury had been impoverished. But commands were at once issued by John de Villiers, the Grand Master, to the different Grand Priories in Europe, and large reinforcements in men and money were soon received, so that the Fraternity were enabled again to open their hospital and to recommence the practise of their religious duties. No longer able to continue their military exploits on land, the knights betook themselves to their galleys, and, while they protected the pilgrims who still flocked in vast numbers to Palestine, gave security to the Christian commerce of the Mediterranean. On sea, as on land, the Hospitalers still showed that they were the inexorable and tertrible foes of the infidels, whose captured vessels soon filled the harbor of Cyprus.

But in time a residence in Cyprus became unpleasant. The king, by heavy taxes and other rigorous exactions, had so disgusted them, that they determined to seek some other residence. The neighboring island of Rhodes had long, under its independent princes, been the refuge of Turkish corsairs; a name equivalent to the more modern one of pirates. Fulk de Villaret, the Grand Master of the Hospital, having obtained the approval of Pope Clement and the assistance of several of the European States, made a descent upon the island, and, after months of hard fighting, on the 15th of August, 1310, planted the standard of the Order on the walls of the city of Rhodes; and the island thenceforth became the home of the Hospitalers, whence they were often called the Knights of Rhodes.

The Fraternity continued to reside at Rhodes for two hundred years, acting as the outpost and defense of Christendom from the encroachments of the Ottoman power. Of this long period, but few years were passed in peace, and the military reputation of the Order was still more firmly established by the prowess of the knights. These two centuries were marked by other events which had an important bearing on the fortunes of the institution. The rival brotherhood of the Templars was abolished by the machinations of a pope and a king of France, and what of its revenues and possessions was saved from the spoliation of its enemies was transferred to the Hospitalers.

There had always existed a bitter rivalry between the two Orders, marked by unhappy contentions, which on some occasions, while both were in Palestine, amounted to actual strife. Toward the Knights of St. John the Templars had never felt nor expressed a very kindly feeling; and now this acceptance of an unjust appropriation of their goods in the hour of their disaster, keenly added to the sentiment of ill-will, and the unhappy children of De Molay, as they passed away from the theater of knighthood, left behind them the bitterest imprecations on the disciples of the Hospital.

The Order, during its residence at Rhodes, also underwent several changes in its organization, by which the simpler system observed during its infancy in the Holy Land was rendered more perfect and more complicated. The greatest of all these changes was in the character of the European Commanderies. During the period that the Order was occupied in the defense of the holy places, and losing large numbers of its warriors in its almost continual battles, these Commanderies served as nurseries for the preparation and education of young knights who might be sent to Palestine to reinforce the exhausted ranks of their brethren. But now, secured in their island home, Jerusalem permanently in possession of the infidel, and the enthusiasm once inspired by Peter the Hermit forever dead, there was no longer need for new Crusaders. But the knights, engaged in strengthening and decorating their insular possession by erecting fortifications for defense, and palaces and convents for residence, now required large additions to their revenue to defray the expenses thus incurred. Hence the Commanderies were the sources whence this revenue was to be derived; and the Commanders, once the Principals, as it were, of military schools, became lords of the manor in their respective provinces. There, by a judicious and economical administration of the property which had been entrusted to them, by the cultivation of gardens and orchards, by the rent received from arable and meadow lands, of mills and fisheries appertaining to their estates, and even by the voluntary contributions of their neighbors, and by the raising of stock, they were enabled to add greatly to their income. Of this one-fifth was claimed, under the name

of responsions, as a tribute to be sent annually to Rhodes for the recuperation of the always diminishing revenue of the Order.

Another important change in the organization of the Order was made at a General Chapter held about 1320 at Montpellier, under the Grand Mastership of Villanova. The Order was there divided into *languages*, a division unknown during its existence in Palestine. These languages were at first seven in number, but afterward increased to eight, by the subdivision of that of Aragon. The principal dignities of the Order were at the same time divided among these languages, so that a particular dignity should be always enjoyed by the same language. These languages, and the dignities respectively attached to them, were as follows:

1. Provence: Grand Commander.
2. Auvergne: Grand Marshal.
3. France: Grand Hospitaler.
4. Italy: Grand Admiral.
5. Aragon: Grand Conservator.
6. Germany: Grand Bailiff.
7. Castile: Grand Chancellor.
8. England: Grand Turcopolier.

But perhaps the greatest of all changes was that which took place in the personal character of the Knights. "The Order," says Taafe (*Hist.*, iv., 234), "had been above two hundred years old before it managed a boat, but was altogether equestrian during its two first, and perhaps most glorious, centuries." But on settling at Rhodes, the knights began to attack their old enemies by sea with the same prowess with which they had formerly met them on land, and the victorious contests of the galleys of St. John with the Turkish corsairs, who were infesting the Mediterranean, proved them well entitled to the epithet of naval warriors.

In the year 1480, Rhodes was unsuccessfully besieged by the Ottoman army of Mohammed II., under the command of Paleologus Pasha. After many contests, the Turks were repulsed with great slaughter. But the attack of the Sultan Solyman, forty-four years afterward, was attended with a different result, and Rhodes was surrendered to the Turkish forces on the 20th of December, 1522. The terms of the capitulation were liberal to the knights, who were permitted to retire with all their personal property; and thus, in the Grand Mastership of L'Isle Adam, Rhodes ceased forever to be the home of the Order, and six days afterward, on New Year's Day, 1523, the fleet, containing the knights and four thousand of the inhabitants, sailed for the island of Candia.

From Candia, where the Grand Master remained but a short time, he proceeded with his knights to Italy. Seven long years were passed in negotiations with the monarchs of Europe, and in the search for a home. At length, the Emperor Charles V., of Germany, vested in the Order the complete and perpetual sovereignty of the islands of Malta and Gozo, and the city of Tripoli; and in 1530, the knights took formal possession of Malta, where, to borrow the language of Porter (*Hist.*, ii., 33), "for upwards of two centuries and a half, waved the banner of St. John, an honor to Christianity and a terror to the infidel of the East." From this time the Order received the designation of "Knights of Malta," a title often bestowed upon it, even in official documents, in the place of the original one of "Knights Hospitalers of St. John of Jerusalem."

For 268 years the Order retained possession of the island of Malta. But in 1798 it was surrendered without a struggle by Louis de Hompesch, the imbecile and pusillanimous Grand Master, to the French army and fleet under Bonaparte; and this event may be considered as the commencement of the suppression of the Order as an active power.

Hompesch, accompanied by a few knights, embarked in a few days for Trieste, and subsequently retired to Montpellier, where he resided in the strictest seclusion and poverty until May 12, 1805, when he died, leaving behind him not enough to remunerate the physicians who had attended him.

The great body of the knights proceeded to Russia, where the Emperor Paul had a few years before been proclaimed the protector of the Order. On the 27th of October, 1798, a Chapter of such of the knights as were in St. Petersburg was held, and the Emperor Paul I. was elected Grand Master. This election was made valid, so far as its irregularities would permit, by the abdication of Hompesch in July, 1799.

At the death of Paul in 1801, his successor on the throne, Alexander, appointed Count Soltikoff as Lieutenant of the Mastery, and directed him to convene a Council at St. Petersburg to deliberate on future action. This assembly adopted a new statute for the election of the Grand Master, which provided that each Grand Priory should in a Provincial Chapter nominate a candidate, and that out of the persons so nominated the Pope should make a selection. Accordingly, in 1802, the Pope appointed John de Tommasi, who was the last knight that bore the title of Grand Master.

On the death of Tommasi, the Pope declined to assume any longer the responsibility of nominating a Grand Master, and appointed the Bailiff Guevarr Luardo simply as Lieutenant of the Mastery, a title afterward held by his successors, Centelles, Busca, De Candida, and Collavedo. In 1826 and 1827, the first steps were taken for the revival of the English language, and Sir Joshua Meredith, Bart., who had been made a knight in 1798 by Hompesch, being appointed Lieutenant Prior of England, admitted many English gentlemen into the Order.

But the real history of the Order of St. John of Jerusalem ends with the disgraceful capitulation at Malta in 1798. All that has since remained of it, all that now remains—however imposing may be the titles assumed—is but the diluted shadow of its former existence.

The organization of the Order in its days of prosperity was very complicated, partaking both of a monarchial and a republican character. Over all presided a Grand Master, who, although invested with extensive powers, was still controlled by the legislative action of the General Chapter.

The Order was divided into eight languages, over each of which presided one of the Grand dignitaries with the title of Conventual Bailiff. These dignitaries were the Grand Commander, the Grand Marshal, the Grand Hospitaler, the Grand Conservator, the Grand Turcopolier, the Grand Bailiff, and the Grand Chancellor. Each of these dignitaries resided in the palace or inn at Malta which was appropriated to his language. In every province there were one or more Grand Priories presided over by Grand Priors, and beneath these were the Commanderies, over each of which was a Commander. There were scattered through the different countries of Europe 22 Grand Priories and 596 Commanderies.

Those who desired admission into the Order as members of the first class, or Knights of Justice, were required to produce proofs of noble descent. The ceremonies of initiation were public and exceedingly simple, consisting of little more than the taking of the necessary vow. In this the Hospitalers differed from the Templars, whose formula of admission was veiled in secrecy. Indeed, Porter (*Hist.*, i., 203) attributes the escape of the former Order from the accusations that were heaped upon the latter, and which led to its dissolution, to the fact that the Knights "abjured all secrecy in their forms and ceremonies."

The Order was dissolved in England by Henry VIII., and, although temporarily restored by Mary, was finally abolished in England. A decree of the Constituent Assembly abolished it in France in 1792. By a decree of Charles IV., of Spain, in 1802, the two languages of Aragon and Castile became the Royal Spanish Order of St. John, of which he declared himself the Grand Master.

Now, only the languages of Germany and Italy remain. The Order is, therefore, at this day in a state of abeyance, if not of disintegration, although it still maintains its vitality, and the functions of Grand Master are exercised by a Lieutenant of the Magistery, who resides at Rome. Attempts have also been made, from time to time, to revive the Order in different places, sometimes with and sometimes without the legal sanction of the recognized head of the Order. For instance, there are now in England two bodies—one Catholic, under Sir George Bowyer, and the other Protestant, at the head of which is the Duke of Manchester; but each repudiates the other. But the relic of the old and valiant Order of Knights Hospitalers claims no connection with the branch of Masonry which bears the title of Knights of Malta, and hence the investigation of its present condition is no part of the province of this work.

Knight of Malta, Masonic. The degree of Knight of Malta is conferred in the United States as "an appendant Order" in a Commandery of Knights Templar. There is a ritual attached to the degree, but very few are in possession of it, and it is generally communicated after the candidate has been created a Knights Templar; the ceremony consisting generally only in the reading of the passage of Scripture prescribed in the Monitors, and the communication of the modes of recognition.

How anything so anomalous in history as the commingling in one body of Knights Templar and Knights of Malta, and making the same person a representative of both Orders, first arose, it is now difficult to determine. It was, most probably, a device of Thomas S. Webb, and was, it may be supposed, one of the results of a too great fondness for the accumulation of degrees. Mitchell, in his *History of Freemasonry* (ii., 83), says: "The degree, so called, of Malta, or St. John of Jerusalem, crept in, we suppose, by means of a bungler, who, not knowing enough of the ritual to confer it properly, satisfied himself by simply adding a few words in the ceremony of dubbing; and thus, by the addition of a few signs and words but imperfectly understood, constituted a Knights Templar also a Knight of Malta, and so the matter stands to this day." I am not generally inclined to place much confidence in Mitchell as an historian; yet I cannot help thinking that in this instance his guess is not very far from the truth, although, as usual with him, there is a tinge of exaggeration in his statement.

There is evidence that the degree was introduced at a very early period into the Masonry of this country. In the Constitution of the "United States Grand Encampment," adopted in 1805, one section enumerates "Encampments of Knights of Malta, Knights Templars, and Councils of Knights of the Red Cross," now Companions of the Red Cross. It will be observed that the Knight of Malta precedes the Knights Templar; whereas, in the present system, the former is made the ultimate degree of the series. Yet, in this Constitution, no further notice is taken of the degree; for while the fees for the Red Cross and the Templar degrees are prescribed, there is no reference to any to be paid for that of Malta. In the revised Constitution of 1816, the order of the series was changed to Red Cross, Templar, and Malta, which arrangement has ever since been maintained. The Knights of Malta are designated as one of the "Appendant Orders," a title and a subordinate position which the pride of the old Knights of Malta would hardly have permitted them to accept.

In 1856, the Knights Templar of the United States had become convinced that the incorporation of the Order of Malta with the Knights Templar, and making the same person the possessor of both Orders, was so absurd a violation of all historic truth, that at the session of the General Grand Encampment in that year, at Hartford, Connecticut, on the

suggestion of the author, the degree was unanimously stricken from the Constitution; but at the session of 1862, in Columbus, Ohio, it was, I think, without due consideration, restored, and is now communicated in the Commanderies of Knights Templar.

There is no fact in history better known than that there existed from their very birth a rivalry between the two Orders of the Temple and of St. John of Jerusalem, which sometimes burst forth into open hostility. Porter says (*Hist. K. of Malta*, i., 107), speaking of the dissensions of the two Orders, "instead of confining their rivalry to a friendly emulation, whilst combating against their common foe, they appeared more intent upon thwarting and frustrating each other, than in opposing the Saracen."

To such an extent had the quarrels of the two Orders proceeded, that Pope Alexander III. found it necessary to interfere; and in 1179 a hollow truce was signed by the rival houses of the Temple and the Hospital; the terms of which were, however, never strictly observed by either side. On the dissolution of the Templars so much of their possessions as were not confiscated to public use were given by the sovereigns of Europe to the Knights of Malta, who accepted the gift without compunction. And there is a tradition that the surviving Templars, indignant at the spoliation and at the mercenary act of their old rivals in willingly becoming a party to the robbery, solemnly registered a vow never thereafter to recognize them as friends.

The attempt at this day to make a modern Knights Templar accept initiation into a hated and antagonistic Order is to display a lamentable ignorance of the facts of history.

Another reason why the degree of Knight of Malta should be rejected from the Masonic system is that the ancient Order never was a secret association. Its rites of reception were open and public, wholly unlike anything in Masonry. In fact, historians have believed that the favor shown to the Hospitalers, and the persecutions waged against the Templars, are to be attributed to the fact that the latter Order had a secret system of initiation which did not exist in the former. The ritual of reception, the signs and words as modes of recognition now practised in the modern Masonic ceremonial, are all a mere invention of a very recent date. The old Knights knew nothing of such a system.

A third, and perhaps the best, reason for rejecting the Knights of Malta as a Masonic degree is to be found in the fact that the Order still exists, although in a somewhat decayed condition; and that its members, claiming an uninterrupted descent from the Knights who, with Hompesch, left the island of Malta in 1797, and threw themselves under the protection of Paul of Russia, utterly disclaim any connection with the Freemasons, and almost contemptuously repudiate the so-called Masonic branch of the Order. In 1858, a manifesto was issued by the supreme authority of the Order, dated from "the Magisterial Palace of the Sacred Order" at Rome, which, after stating that the Order, as it then existed, consisted only of the Grand Priories in the Langues of Italy and Germany, the knights in Prussia, who trace descent from the Grand Bailiwick of Brandenburg, and a few other knights who had been legally received by the Mastership and Council, declares that:

"Beyond and out of the above-mentioned Langues and Priories, and excepting the knights created and constituted as aforesaid, all those who may so call or entitle themselves *are legally ignored* by our Sacred Order."

There is no room there provided for the so-called Masonic Knights of Malta. But a writer in *Notes and Queries* (3d Ser., iii., 413), who professes to be in possession of the degree, says, in reply to an inquiry, that the Masonic degree "has nothing whatever to do with the Knights Hospitalers of St. John of Jerusalem." This is most undoubtedly true in reference to the American degree. Neither in its form, its ritual, the objects it professes, its tradition, nor its historical relations, is it in the slightest degree assimilated to the ancient Order of Hospitalers, afterward called Knights of Rhodes, and, finally, Knights of Malta. To claim, therefore, to be the modern representatives of that Order, to wear its dress, to adopt its insignia, to flaunt its banners, and to leave the world to believe that the one is but the uninterrupted continuation of the other, are acts which must be regarded as a very ridiculous assumption, if not actually entitled to a less courteous appellation.

For all these reasons, I think that it is much to be regretted that the action of the Grand Encampment in repudiating the degree in 1856 was reversed in 1862. The degree has no historical or traditional connection with Masonry; holds no proper place in a Commandery of Templars, and ought to be wiped out of the catalogue of Masonic degrees.*

Knight of Masonry, Terrible. (*Chevalier Terrible de la Maçonnerie.*) A degree contained in the collection of Le Page.

Knight of Palestine. (*Chevalier de la Palestine.*) 1. The Sixty-third Degree of the Rite of Mizraim. 2. The Ninth Degree of the Reform of St. Martin. 3. One of the series of degrees formerly given in the Baldwyn Encampment of England, and said to have been introduced into Bristol, in 1800, by some French refugees under the authority of the Grand Orient of France.

* A different view is now generally held by Templars regarding the Knights of Malta, and a modified ritual has been adopted from the Canadian work where the Malta is the principal degree of their Priories. The adoption of this ritual among the Commanderies of America is optional, but when once adopted must be conformed to in their work. This change was brought about by the visiting influence from Canada and also the reasons for the Malta being a degree of chivalry. For a similar reason the Knights of the Red Cross has been justly changed to Companion of the Red Cross, and properly never deserved a place in the degrees of chivalry, as the ritual plainly shows. [E. E. C.]

Knight of Patmos. An apocalyptic degree mentioned by Oliver in his *Landmarks*. It refers, he says, to the banishment of St. John.

Knight of Perfumes. (*Chevalier des Parfums.*) The Eighth Degree of the Rite of the East (*Rite d'Orient*) according to the nomenclature of Fustier.

Knight of Pure Truth. (*Chevalier de la Pure Verité.*) Thory mentions this as a secret society instituted by the scholars of the Jesuitical college at Tulle. It could scarcely have been Masonic.

Knight of Purity and Light. (*Ritter der Klarheit und des Lichts.*) The Seventh and last degree of the Rite of the *Clerks of Strict Observance*, which see.

Knight of Rhodes. 1. One of the titles given to the Knights Hospitalers in consequence of their long residence on the island of Rhodes. 2. A degree formerly conferred in the Baldwyn Encampment at Bristol, England. It seems in some way to have been confounded with the Mediterranean Pass.

Knight of Rose Croix. See *Rose Croix.*

Knight of St. Andrew, Grand Scottish. (*Grand Ecossais de Saint André.*) Sometimes called "Patriarch of the Crusades." The Twenty-ninth Degree of the Ancient and Accepted Scottish Rite. Its ritual is founded on a legend, first promulgated by the Chevalier Ramsay, to this effect: that the Freemasons were originally a society of knights founded in Palestine for the purpose of building Christian churches; that the Saracens, to prevent the execution of this design, sent emissaries among them, who disguised themselves as Christians, and were continually throwing obstacles in their way; that on discovering the existence of these spies, the knights instituted certain modes of recognition to serve as the means of detection; that they also adopted symbolic ceremonies for the purpose of instructing the proselytes who had entered the society in the forms and principles of their new religion; and finally, that the Saracens, having become too powerful for the knights any longer to contend with them, they had accepted the invitation of a king of England, and had removed into his dominions, where they thenceforth devoted themselves to the cultivation of architecture and the fine arts. On this mythical legend, which in reality was only an application of Ramsay's theory of the origin of Freemasonry, the Baron de Tschoudy is said, about the middle of the last century, to have formed this degree, which Ragon says (*Orthod. Maçon.*, p. 138) at his death, in 1769, he bequeathed in manuscript to the Council of Emperors of the East and West. On the subsequent extension of the twenty-five degrees of the Rite of Perfection, instituted by that body, to the thirty-three degrees of the Ancient and Accepted Rite, this degree was adopted as the twenty-ninth, and as an appropriate introduction to the Knights of Kadosh, which it immediately precedes. Hence the jewel, a St. Andrew's cross, is said, by Ragon, to be only a concealed form of the Templar Cross. In allusion to the time of its supposed invention, it has been called "Patriarch of the Crusades." On account of the Masonic instruction which it contains, it also sometimes receives the title of "Grand Master of Light."

The Lodge is decorated with red hangings supported by white columns. There are eighty-one lights, arranged as follows: four in each corner before a St. Andrew's cross, two before the altar, and sixty-three arranged by nines in seven different parts of the room. There are three officers, a Venerable Grand Master and two Wardens. The jewel is a St. Andrew's cross, appropriately decorated, and suspended from a green collar bordered with red.

In the ritual of the Southern Jurisdiction, the leading idea of a communication between the Christian knights and the Saracens has been preserved; but the ceremonies and the legend have been altered. The lesson intended to be taught is toleration of religion.

This degree also constitutes the sixty-third of the collection of the Metropolitan Chapter of France; the fifth of the Rite of Clerks of Strict Observance; and the twenty-first of the Rite of Mizraim. It is also to be found in many other systems.

Knight of St. Andrew, Free. (*Chevalier libre de Saint-André.*) A degree found in the collection of Pyron.

Knight of St. Andrew of the Thistle. (*Chevalier Ecossais de S. André du Chardon.*) The Seventy-fifth Degree of the collection of the Metropolitan Chapter of France.

Knight of St. John of Jerusalem. 1. The original title of the Knights of Malta, and derived from the church and monastery built at Jerusalem in 1048 by the founders of the Order, and dedicated to St. John the Baptist. (See *Knight of Malta.*)

2. A mystical degree divided into three sections, which is found in the collection of Lemanceau.

Knight of St. John of Palestine. (*Chevalier de Sainte Jean de la Palestine.*) The Forty-eighth Degree of the Metropolitan Chapter of France.

Knight of the Altar. (*Chevalier de l'Autel.*) The Twelfth Degree of the Rite of the East according to the nomenclature of Fustier.

Knight of the American Eagle. An honorary degree invented many years ago in Texas or some other of the Western States. It was founded on incidents of the American Revolution, and gave an absurd legend of Hiram Abif's boyhood. It is believed to be now obsolete.

Knight of the Anchor. (*Chevalier de l'Ancre.*) 1. An androgynous degree. (See *Anchor, Order of Knights and Ladies of the.*) 2. The Twenty-first Degree of the collection of the Metropolitan Chapter of France.

Knight of the Ape and Lion. Gädicke says (*Freimaurer-Lex.*) that this Order appeared about the year 1780, but that its existence was only made known by its extinction. It adopted the lion sleeping with open eyes as a symbol of watchfulness, and the ape as a

symbol of those who imitate without due penetration. The members boasted that they possessed all the secrets of the Ancient Templars, on which account they were persecuted by the modern Order. The lion and ape, as symbols of courage and address, are found in one of the degrees described in the *Franc-Maçons Ecrasés*.

Knight of the Arch. (*Chevalier de l'Arche.*) A degree found in the nomenclature of Fustier.

Knight of the Argonauts. (*Chevalier des Argonautes.*) The first point of the Sixth Degree, or Knight of the Golden Fleece of the Hermetic Rite of Montpellier.

Knight of the Banqueting Table of the Seven Sages. (*Chevalier de la Table du Banquet des Sept Sages.*) A degree in the Archives of the Mother Lodge of the Philosophic Scottish Rite.

Knight of the Black Eagle. (*Chevalier de l'Aigle noir.*) 1. The Seventy-sixth Degree of the collection of the Metropolitan Chapter of France; called also Grand Inquisitor, Grand Inspector, Grand Elu or Elect, in the collection of Le Rouge. 2. The Thirty-eighth Degree of the Rite of Mizraim.

Knight of the Brazen Serpent. (*Chevalier du Serpent d'Airain.*) The Twenty-fifth Degree of the Ancient and Accepted Scottish Rite. The history of this degree is founded upon the circumstances related in Numbers ch. xxi. ver. 6–9: "And the Lord sent fiery serpents among the people, and they bit the people; and much people of Israel died. Therefore the people came to Moses, and said, We have sinned; for we have spoken against the Lord, and against thee: pray unto the Lord that he take away the serpents from us. And Moses prayed for the people. And the Lord said unto Moses, Make thee a fiery serpent, and set it upon a pole: and it shall come to pass, that every one that is bitten, when he looketh upon it shall live. And Moses made a serpent of brass, and put it upon a pole; and it came to pass, that if a serpent had bitten any man, when he beheld the serpent of brass, he lived." In the old rituals the Lodge was called the Court of Sinai; the presiding officer was styled Most Puissant Grand Master, and represented Moses; while the two Wardens, or Ministers, represented Aaron and Joshua. The Orator was called Pontiff; the Secretary, Grand Graver; and the candidate, a Traveler. In the modern ritual adopted in this country, the Council represents the camp of the Israelites. The first three officers represent Moses, Joshua, and Caleb, and are respectively styled Most Puissant Leader, Valiant Captain of the Host, and Illustrious Chief of the Ten Tribes. The Orator represents Eleazar; the Secretary, Ithamar; the Treasurer, Phinehas; and the candidate an intercessor for the people. The jewel is a crux ansata, with a serpent entwined around it. On the upright of the cross is engraved חלתי, khalati, *I have suffered*, and on the arms נחושתן, nakhushtan, *a serpent*. The French ritualists would have done better to have substituted for the first word חטאתי, khatati, *I have sinned;* the original in Numbers being חטאנו, Kathanu, *we have sinned*. The apron is white, lined with black, and symbolically decorated.

There is an old legend which says that this degree was founded in the time of the Crusades, by John Ralph, who established the Order in the Holy Land as a military and monastic society, and gave it the name of the Brazen Serpent, because it was a part of their obligation to receive and gratuitously nurse sick travelers, to protect them against the attacks of the Saracens, and escort them safely to Palestine; thus alluding to the healing and saving virtues of the Brazen Serpent among the Israelites in the wilderness.

Knight of the Burning Bush. (*Chevalier du Buisson ardent.*) A theosophic degree of the collection of the Mother Lodge of the Philosophic Scottish Rite.

Knight of the Chanuca. (*Chevalier de la Kanuka.*) The Sixty-ninth Degree of the Rite of Mizraim. The חנוכה, or *Chanuca*, is the feast of the dedication celebrated by the Jews in commemoration of the dedication of the Temple by Judas Maccabæus after its pollution by the Syrians. In the ritual of the degree, the Jewish lighting of seven lamps, one on each day, is imitated, and therefore the ceremony of initiation lasts for seven days.

Knight of the Christian Mark. Called also Guard of the Conclave. A degree formerly conferred in the United States on Knights Templar in a body called a Council of the Trinity. The legend of the Order is that it was organized by Pope Alexander for the defense of his person, and that its members were selected from the Knights of St. John of Jerusalem. In the ceremonies there is a reference to the tau cross or mark on the forehead, spoken of by the prophet Ezekiel, and hence the name of the degree. The motto of the Order is, "Christus regnat, vincit, triumphat. Rex regnantium, Dominus dominantium." Christ reigns, conquers, and triumphs. King of kings and Lord of lords.

Knight of the Columns. (*Chevalier des Colonnes.*) The Seventh Degree of the Rite of the East according to the nomenclature of Fustier.

Knight of the Comet. (*Chevalier de la Comète.*) A degree found in the collection of Hécart.

Knight of the Cork. (*Chevalier du Bouchon.*) An androgynous secret society established in Italy after the Papal bull excommunicating the Freemasons, and intended by its founders to take the place of the Masonic institution.

Knight of the Courts. (*Chevalier des Parvis.*) The Third Degree of the Rite of the East according to the nomenclature of Fustier.

Knight of the Crown. (*Chevalier de la Couronne.*) A degree in the collection of Pyron.

Knight of the Door. (*Chevalier de la Porte.*) The Fourth Degree of the Rite of the East according to the nomenclature of Fustier.

Knight of the Dove. The Knights and Ladies of the Dove (*Chevaliers et Chevalieres*

de la Colombe) was an androgynous secret society framed on the model of Freemasonry, and instituted at Versailles in 1784. It had but an ephemeral existence.

Knight of the Eagle. (*Chevalier de l'Aigle.*) 1. The First Degree of the Chapter of Clermont. 2. The Third Degree of the Clerks of Strict Observance. 3. The Fifty-sixth Degree of the collection of the Metropolitan Chapter of France. 4. It was also one of the degrees of the Chapter of the Grand Lodge Royal York of Berlin. 5. The Thirty-seventh Degree of the Rite of Mizraim. Thory (*Acta Lat.*, i., 291) says it was also one of the appellations of the degree more commonly called *Perfect Master in Architecture*, which is the Fourteenth of the Primitive Scottish Rite, and is found also in some other systems.

Knight of the Eagle and Pelican. One of the appellations of the degree of Rose Croix, because the jewel has on one side an eagle and on the other a pelican, both at the foot of the cross, in allusion to the symbolism of the degree. (See *Rose Croix, Prince of.*)

Knight of the Eagle reversed. (*Chevalier de l'Aigle renversé.*) Thory (*Acta Lat.*, i., 292) records this as a degree to be found in the Archives of the Scottish Lodge *Saint Louis des Amis Réunis at Calais.* In heraldic phrase, an eagle reversed is an eagle with the wings drooping.

Knight of the East. (*Chevalier d'Orient.*) This is a degree which has been extensively diffused through the most important Rites, and it owes its popularity to the fact that it commemorates in its legend and its ceremonies the labors of the Masons in the construction of the second Temple.

1. It is the Fifteenth Degree of the Ancient and Accepted Scottish Rite, the description of which will apply with slight modifications to the same degree in all the other Rites. It is founded upon the history of the assistance rendered by Cyrus to the Jews, who permitted them to return to Jerusalem, and to commence the rebuilding of the house of the Lord. Zerubbabel, therefore, as the Prince of the Jews, and Cyrus the King of Persia, as his patron, are important personages in the drama of reception; which is conducted with great impressiveness even in the old and somewhat imperfect ritual of the last century, but which has been greatly improved in the modern rituals adopted by the Supreme Councils of the United States.

The cordon of a Knight of the East is a broad green watered ribbon, worn as a baldric from left to right. The sash or girdle is of white watered silk, edged above, and fringed below with gold. On it is embroidered a bridge, with the letters L. D. P. on the arch, and also on other parts of the girdle human heads, and mutilated limbs, and crowns, and swords. The apron is crimson, edged with green, a bleeding head and two swords crossed on the flap, and on the apron three triangles interlaced formed of triangular links of chains. The jewel is three triangles interlaced enclosing two naked swords.

Scripture and the traditions of the Order furnish us with many interesting facts in relation to this degree. The Knights of the East are said to derive their origin from the captivity of the Israelites in Babylon. After seventy-two years of servitude, they were restored to liberty by Cyrus, King of Persia, through the intercession of Zerubbabel, a prince of the tribe of Judah, and Nehemias, a holy man of a distinguished family, and permitted to return to Jerusalem and rebuild the Temple.

2. It is the Sixth Degree of the French Rite. It is substantially the same as the preceding degree.

3. The Sixth Degree of the old system of the Royal York Lodge of Berlin.

4. The Fifteenth Degree of the Chapter of the Emperors of the East and West, and this was most probably the original degree.

5. The Fifty-second Degree of the collection of the Metropolitan Chapter of France.

6. The Forty-first Degree of the Rite of Mizraim.

7. The Sixth Degree of the Rite of Philalethes.

8. The Eleventh Degree of the Adonhiramite Rite.

9. It is also substantially the Tenth Degree, or Knight of the Red Cross of the American Rite. Indeed, it is found in all the Rites and systems which refer to the second Temple.

Knight of the East and West. (*Chevalier d'Orient et d'Occident.*) 1. The Seventeenth Degree of the Ancient and Accepted Scottish Rite. The oldest rituals of the degree were very imperfect, and did not connect it with Freemasonry. They contained a legend that upon the return of the knights from the Holy Land, in the time of the Crusaders, they organized the Order, and that in the year 1118 the first knights, to the number of eleven, took their vows between the hands of Garinus, patriarch. The allusion, here, is evidently to the Knights Templar; and this legend would most probably indicate that the degree originated with the Templar system of Ramsay. This theory is further strengthened by the other legend, that the Knights of the East represented the Masons who remained in the East after the building of the first Temple, while the Knights of the East and West represented those who traveled West and disseminated the Order over Europe, but who returned during the Crusades and reunited with their ancient brethren, whence we get the name.

The modern ritual as used in the United States has been greatly enlarged. It still retains the apocalyptic character of the degree which always attached to it, as is evident from the old tracing-board, which is the figure described in the first chapter of the Revelation of St. John. The jewel is a heptagon inscribed with symbols derived from the Apocalypse, among which are the lamb and the book with seven seals. The apron is yellow, lined and edged with crimson. In the old ritual its device was a two-edged sword. In the new one

it is a tetractys of ten dots. This is the first of the philosophical degrees of the Scottish Rite. 2. The Seventeenth Degree of the Chapter of Emperors of the East and West.

Knight of the Eastern Star. (*Chevalier de l'Etoile d'Orient.*) The Fifty-seventh Degree of the collection of the Metropolitan Chapter of France.

Knight of the East, Victorious. (*Chevalier victorieux de l'Orient.*) A degree found in the collection of Hécart.

Knight of the East, White. (*Chevalier d'Orient.*) The Fortieth Degree of the Rite of Mizraim.

Knight of the Election. (*Chevalier du Choix.*) The Thirty-third Degree of the Rite of Mizraim.

Knight of the Election, Sublime. (*Chevalier sublime du Choix.*) The Thirty-fourth Degree of the Rite of Mizraim.

Knight of the Golden Eagle. (*Chevalier de l'Aigle d'or.*) A degree in the collection of Pyron.

Knight of the Golden Fleece. (*Chevalier de la Toisson d'or.*) The Sixth Degree of the Hermetic Rite of Montpellier.

Knight of the Golden Key. (*Chevalier de la Clef d'or.*) The Third Degree of the Hermetic Rite of Montpellier.

Knight of the Golden Star. (*Chevalier de l'Etoile d'or.*) A degree contained in the collection of Peuvret.

Knight of the Grand Arch. (*Chevalier de la Grande Arche.*) A degree which Thory (*Acta Lat.*, i., 295) says is contained in the Archives of the Lodge of *Saint Louis des Amis Réunis at Calais.*

Knight of the Holy City, Beneficent. (*Chevalier bienfaisant de la Cité Sainte.*) The Order of Beneficent Knights of the Holy City of Jerusalem was created, according to Ragon, at Lyons, in France, in 1782, by the brethren of the Lodge of Chevaliers Bienfaisants. But Thory (*Acta Lat.*, i. 299) says it was rectified at the Congress of Wilhelmsbad. Both are perhaps right. It was probably first invented at Lyons, at one time a prolific field for the *hautes grades*, and afterward adopted at Wilhelmsbad, whence it began to exercise a great influence over the Lodges of Strict Observance. The Order professed the Rite of Martinism; but the members attempted to convert Freemasonry into Templarism, and transferred all the symbols of the former to the latter system. Thus, they interpreted the two pillars of the porch and their names as alluding to Jacobus Burgundus or James the Burgundian, meaning James de Molay, the last Grand Master of the Templars; the three gates of the Temple signified the three vows of the Knights Templar, obedience, poverty, and chastity; and the sprig of acacia referred to that which was planted over the ashes of De Molay when they were transferred to Heredom in Scotland. The Order and the doctrine sprang from the Templar system of Ramsay. The theory of its Jesuitic origin can scarcely be admitted.

Knight of the Holy Sepulcher. 1. As a Masonic degree, this was formerly given in what were called Councils of the Trinity, next after the Knight of the Christian Mark; but it is no longer conferred in America, and may now be considered as obsolete. The Masonic legend that it was instituted by St. Helena, the mother of Constantine, in 302, after she had visited Jerusalem and discovered the cross, and that, in 304, it was confirmed by Pope Marcellinus, is altogether apocryphal. The military Order of Knights of the Holy Sepulcher still exists; and Mr. Curzon, in his *Visits to the Monasteries in the Levant*, states that the Order is still conferred in Jerusalem, but only on Roman Catholics of noble birth, by the Reverendissimo or Superior of the Franciscans, and that the *accolade*, or blow of knighthood, is bestowed with the sword of Godfrey de Bouillon, which is preserved, with his spurs, in the sacristy of the Church of the Holy Sepulcher. Madame Pfeiffer, in her *Travels in the Holy Land*, confirms this account. Dr. Heylin says that the Order was instituted in 1099, when Jerusalem was regained from the Saracens by Philip of France. Faryn, in his *Theatre d' Honneur*, gives a different account of the institution. He says that while the Saracens possessed the city they permitted certain canons regular of St. Augustine to have the custody of the Holy Sepulcher. Afterward Baldwyn, King of Jerusalem, made them Men-of-Arms and Knights of the Holy Sepulcher, and ordained that they should continue to wear their white habits, and on the breast his own arms, which were a red cross potent between four Jerusalem crosses. Their rule was confirmed by Pope Innocent III. The Grand Master was the Patriarch of Jerusalem. They engaged to fight against infidels, to protect pilgrims, to redeem Christian captives, hear Mass every day, recite the hours of the cross, and bear the five red crosses in memory of our Savior's wounds. On the loss of the Holy Land, they retired to Perugia, in Italy, where they retained their white habit, but assumed a double red cross. In 1484, they were incorporated with the Knights Hospitalers, who were then at Rhodes, but in 1496, Alexander VI. assumed, for himself and the Popes his successors, the Grand Mastership, and empowered the Guardian of the Holy Sepulcher to bestow Knighthood of the Order upon pilgrims. Unsuccessful attempts were made by Philip II., of Spain, in 1558, and the Duke of Nevers, in 1625, to restore the Order. It is now found only in Jerusalem, where it is conferred, as has been already said, by the Superior of the Franciscans.

2. It is also the Fiftieth Degree of the Metropolitan Chapter of France.

Knight of the Interior. (*Chevalier de l'Intérieur.*) The Fifth Degree of the Rite of the East according to the nomenclature of Fustier.

Knight of the Kabbala. (*Chevalier de la Cabale.*) The Eighth Degree of the collection of the Metropolitan Chapter of France.

Knight of the Lilies of the Valley. This was a degree conferred by the Grand Orient of France as an appendage to Templarism. The

Knights Templar who received it were constituted Knights Commanders.

Knight of the Lion. (*Chevalier du Lion.*) The Twentieth Degree of the Metropolitan Chapter of France.

Knight of the Mediterranean Pass. An honorary degree that was formerly conferred in Encampments of Knights Templar, but is now disused. Its meetings were called Councils; and its ritual, which was very impressive, supplies the tradition that it was founded about the year 1367, in consequence of certain events which occurred to the Knights of Malta. In an excursion made by a party of these knights in search of forage and provisions, they were attacked while crossing the river Offanto (the ancient Aufidio) by a large body of Saracens, under the command of the renowned Amurath I. The Saracens had concealed themselves in ambush, and when the knights were on the middle of the bridge which spanned the river, they were attacked by a sudden charge of their enemies upon both extremities of the bridge. A long and sanguinary contest ensued; the knights fought with their usual valor, and were at length victorious. The Saracens were defeated with such immense slaughter that fifteen hundred of their dead bodies encumbered the bridge, and the river was literally stained with their blood. In commemoration of this event, and as a reward for their valor, the victorious knights had free permission to pass and repass in all the coasts of the Mediterranean Sea without danger of molestation, whence the name of the degree is derived. As the latter part of this legend has not been verified by voyagers in the Mediterranean, the degree has long been disused. Dr. Mackey says that he had a ritual of it, which was in the handwriting of Dr. Moses Holbrook, the Grand Commander of the Southern Supreme Council of the Ancient and Accepted Scottish Rite.

Knight of the Moon. A mock Masonic society, established in the last century in London. It ceased to exist in the year 1810.

Knight of the Morning Star. Called also Knight of Hope. A degree in the Archives of the Mother Lodge of the Philosophical Rite, which is said to be a modification of the Kadosh.

Knight of the Ninth Arch. The Thirteenth Degree of the Ancient and Accepted Scottish Rite, called also the "Royal Arch of Solomon," and sometimes the "Royal Arch of Enoch." It is one of the most interesting and impressive of what are called the Ineffable degrees. Its legend refers to Enoch and to the method by which, notwithstanding the destructive influence of the deluge and the lapse of time, he was enabled to preserve important secrets to be afterward communicated to the Craft. According to the present ritual, its principal officers are a Thrice Puissant Grand Master, representing King Solomon, and two Wardens, representing the King of Tyre and the Inspector Adoniram. Bodies of this degree are called Chapters. The color is black strewed with tears. The jewel is a circular medal of gold, around which is inscribed the following letters: R. S. R. S. T. P. S. R. I. A. Y. E. S., with the date *Anno Enochi 2995*. On the reverse is a blazing triangle with the Tetragrammaton in the center in Samaritan letters.

This degree claims great importance in the history of Masonic ritualism. It is found, under various modifications, in almost all the Rites; and, indeed, without it, or something like it, the symbolism of Freemasonry cannot be considered as complete. Indebted for its origin to the inventive genius of the Chevalier Ramsay, it was adopted by the Council of the Emperors of the East and West, whence it passed into the Ancient and Accepted Rite. Though entirely different in its legend from the Royal Arch of the York and American Rites, its symbolic design is the same, for one common thought of a treasure lost and found pervades them all. Vassal, who is exceedingly flippant in much that he has written of Ecossism, says of this degree, that, "considered under its moral and religious aspects, it offers nothing either instructive or useful." It is evident that he understood nothing of its true symbolism.

Knight of the North. (*Chevalier du Nord.*) A degree in the Archives of the Lodge of *Saint Louis des Amis Réunis at Calais.* Thory (*Acta Lat.*, i., 328) mentions another degree called Sublime Knight of the North, which he says is the same as one in the collection of Peuvret, which has the singular title of Daybreak of the Rough Ashlar, *Point du Jour de la Pierre Brute.*

Knight of the Phenix. (*Chevalier du Phênix.*) The Fourth Degree of the Philosophic Scottish Rite.

Knight of the Prussian Eagle. (*Chevalier de l'Aigle Prussien.*) A degree in the collection of Hécart.

Knight of the Purificatory. (*Chevalier du Purificatoire.*) The Sixteenth Degree of the Rite of the East according to the nomenclature of Fustier.

Knight of the Pyramid. (*Chevalier de la Pyramide.*) The Seventh Degree of the Kabbalistic Rite.

Knight of the Rainbow. (*Chevalier de l'Arc-en-ciel.*) The Sixty-eighth Degree of the Rite of Mizraim.

Knight of the Red Cross. This degree, whose legend dates it far anterior to the Christian era, and in the reign of Darius, has no analogy with the chivalric orders of knighthood. It is purely Masonic, and intimately connected with the Royal Arch Degree, of which, in fact, it ought rightly to be considered as an appendage. It is, however, now always conferred in a Commandery of Knights Templar in this country, and is given as a preliminary to reception in that degree. Formerly, the degree was sometimes conferred in an independent council, which Webb (edit. 1812, p. 123) defines to be "a council that derives its authority immediately from the Grand Encampment unconnected with an Encampment of Knights Templars." The

embassy of Zerubbabel and four other Jewish chiefs to the court of Darius to obtain the protection of that monarch from the encroachments of the Samaritans, who interrupted the labors in the reconstruction of the Temple, constitutes the legend of the Red Cross Degree. The history of this embassy is found in the eleventh book of the *Antiquities* of Josephus, whence the Masonic ritualists have undoubtedly taken it. The only authority of Josephus is the apocryphal record of Esdras, and the authenticity of the whole transaction is doubted or denied by modern historians. The legend is as follows: After the death of Cyrus, the Jews, who had been released by him from their captivity, and permitted to return to Jerusalem, for the purpose of rebuilding the Temple, found themselves obstructed in the undertaking by the neighboring nations, and especially by the Samaritans. Hereupon they sent an embassy, at the head of which was their prince, Zerubbabel, to Darius, the successor of Cyrus, to crave his interposition and protection. Zerubbabel, awaiting a favorable opportunity, succeeded not only in obtaining his request, but also in renewing the friendship which formerly existed between the king and himself. In commemoration of these events, Darius is said to have instituted a new order, and called it the Knights of the East. They afterward assumed their present name from the red cross borne in their banners. Webb, or whoever else introduced it into the American Templar system, undoubtedly took it from the Sixteenth Degree, or Prince of Jerusalem of the Ancient and Accepted Rite. It has, within a few years, been carried into England, under the title of the "Red Cross of Babylon." In New Brunswick, it has been connected with Cryptic Masonry. It is there as much out of place as it is in a Commandery of Knights Templar. Its only true connection is with the Royal Arch Degree.

Knight of the Red Eagle. (*Chevalier de l'Aigle rouge.*) The Thirty-ninth Degree of the Rite of Mizraim. The red eagle forms a part of the arms of the House of Brandenburg, and the Order of Knights of the Red Eagle was instituted, in 1705, by George William, hereditary Prince of Bayreuth. In 1792, it was placed among the Prussian orders. The Masonic degree has no connection with the political order. The Mizraimites appropriated all titles that they fancied.

Knight of the Rose. (*Chevalier de la Rose.*) The Order of the Knights and Ladies of the Rose (*Chevaliers et Chevalieres de la Rose*) was an order of adoptive or androgynous Masonry, invented in France toward the close of the eighteenth century. M. de Chaumont, the Masonic secretary of the Duc de Chartres, was its author. The principal seat of the order was at Paris. The hall of meeting was called the Temple of Love. It was ornamented with garlands of flowers, and hung round with escutcheons on which were painted various devices and emblems of gallantry. There were two presiding officers, a male and female, who were styled the Hierophant and the High Priestess. The former initiated men, and the latter, women. In the initiations, the Hierophant was assisted by a conductor or deacon called Sentiment, and the High Priestess by a conductress or deaconess called Discretion. The members received the title of Knights and Nymphs. The Knights wore a crown of myrtle, the Nymphs, a crown of roses. The Hierophant and High Priestess wore, in addition, a rose-colored scarf, on which were embroidered two doves within a wreath of myrtle. During the time of initiation, the hall was lit with a single dull taper, but afterward it was brilliantly illuminated by numerous wax candles.

When a candidate was to be initiated, he or she was taken in charge, according to the sex, by the conductor or conductress, divested of all weapons, jewels, or money, hoodwinked, loaded with chains, and in this condition conducted to the door of the Temple of Love, where admission was demanded by two knocks. Brother Sentiment then introduced the candidate by order of the Hierophant or High Priestess, and he or she was asked his or her name, country, condition of life, and, lastly, what he or she was seeking. To this the answer was, "Happiness."

The next question proposed was, "What is your age?" The candidate, if a male, replied, "The age to love"; if a female, "The age to please and to love."

The candidates were then interrogated concerning their private opinions and conduct in relation to matters of gallantry. The chains were then taken from them, and they were invested with garlands of flowers which were called "the chains of love." In this condition they were made to traverse the apartment from one extremity to another, and then back in a contrary direction, over a path inscribed with love-knots. The following obligation was then administered:

"I promise and swear by the Grand Master of the Universe never to reveal the secrets of the Order of the Rose; and should I fail in this my vow, may the mysteries I shall receive add nothing to my pleasures, and instead of the roses of happiness may I find nothing but the thorns of repentance."

The candidates were then conducted to the mysterious groves in the neighborhood of the Temple of Love, where the Knights received a crown of myrtle, and the Nymphs a simple rose. During this time a soft, melodious march was played by the orchestra. After this, the candidates were conducted to the altar of mystery, placed at the foot of the Hierophant's throne, and there incense was offered up to Venus and her son. If it was a Knight who had been initiated, he now exchanged his crown of myrtle for the rose of the last initiated Nymph; and if a Nymph, she exchanged her rose for the myrtle crown of Brother Sentiment. The Hierophant now read a copy of verses in honor of the god of Mystery, and the bandage was at length taken from the eyes of the candidate. Delicious music and brilliant lights now added

to the charms of this enchanting scene, in the midst of which the Hierophant communicated to the candidate the modes of recognition peculiar to the Order. (Clavel, *Hist. Pitt.*, 115–7.)

The Order had but a brief existence. In 1784, F. B. von Grossing invented, in Germany, an Order bearing a similar name, but its duration was as ephemeral as that of the French one.

Knight of the Rosy and Triple Cross. (*Chevalier de la Rose et Triple Croix.*) A degree in the Archives of the Lodge of *Saint Louis des Amis Réunis at Calais.*

Knight of the Rosy Cross. See *Royal Order of Scotland.*

Knight of the Round Table. (*Chevalier de la Table ronde.*) A degree in the Archives of the Lodge of *Saint Louis des Amis Réunis at Calais.*

Knight of the Round Table of King Arthur. (*Chevalier de la Table ronde du Roi Arthur.*) 1. Thory (*Acta Lat. i.*, 341) says that this is a degree of the Primitive Rite; but neither Dr. Mackey nor the Rev. A. F. A. Woodford (*Kenning's Masonic Cyclopædia*) has been able to trace the degree. Dr. Mackey says that he has seen the manuscript of a degree of this name written many years ago, which was in the possession of Bro. C. W. Moore, of Boston. It was an honorary degree, and referred to the poetic legend of King Arthur and his knights.

Knight of the Royal Ax. (*Chevalier de la royale Hache.*) The Twenty-second Degree of the Ancient and Accepted Scottish Rite, called also Prince of Libanus, or Lebanon. It was instituted to record the memorable services rendered to Masonry by the "mighty cedars of Lebanon." The legend of the degree informs us that the Sidonians were employed in cutting cedars on Mount Libanus or Lebanon for the construction of Noah's ark. Their descendants subsequently cut cedars from the same place for the ark of the covenant; and the descendants of these were again employed in the same offices, and in the same place, in obtaining materials for building Solomon's Temple. Lastly, Zerubbabel employed them in cutting the cedars of Lebanon for the use of the second Temple. This celebrated nation formed colleges on Mount Lebanon, and in their labors always adored the Great Architect of the Universe. No doubt this last sentence refers to the Druses, that secret sect of Theists who still reside upon Mount Lebanon and in the adjacent parts of Syria and Palestine, and whose mysterious ceremonies have attracted so much of the curiosity of Eastern travelers.

The apron of the Knights of the Royal Ax is white, lined and bordered with purple. On it is painted a round table, on which are laid several architectural plans. On the flap is a three-headed serpent. The jewel is a golden ax, having on the handle and blade the initials of several personages illustrious in the history of Masonry. The places of meeting in this degree are called "Colleges." This degree is especially interesting to the Masonic scholar in consequence of its evident reference to the mystical association of the Druses, whose connection with the Templars at the time of the Crusades forms a yet to be investigated episode in the history of Freemasonry.

Knight of the Sacred Mountain. (*Chevalier de la Montagne Sacrée.*) A degree in the Archives of the Lodge of *Saint Louis des Amis Réunis at Calais.*

Knight of the Sanctuary. (*Chevalier du Sanctuaire.*) The Eleventh Degree of the Rite of the East according to the collection of Fustier.

Knight of the Sepulcher. The Sixth Degree of the system of the Grand Lodge Royal York at Berlin.

Knight of the South. (*Chevalier du Sud.*) The Eighth Degree of the Swedish Rite, better known as the Favorite of St. John.

Knight of the Star. (*Chevalier de l'Etoile.*) A degree in the collection of Pyron.

Knight of the Sun. (*Chevalier du Soleil.*) The Twenty-eighth Degree of the Ancient and Accepted Scottish Rite, called also Prince of the Sun, Prince Adept, and Key of Masonry, or Chaos Disentangled. It is a Kabbalistic and Hermetic degree, and its instructions and symbols are full of the Kabbala and Alchemy. Thus, one of its favorite words is Stibium, which, with the Hermetic Philosophers, meant the primal matter of all things. The principal officers are Father Adam and Brother Truth, allegorizing in the old rituals the search of Man after Truth. The other officers are named after the seven chief angels, and the brethren are called Sylphs, or, in the American ritual, Aralim or Heroes. The jewel is a golden sun, having on its reverse a hemisphere with the six northern signs of the zodiac. There is but one light in the Lodge, which shines through a globe of glass.

This degree is not confined to the Scottish Rite, but is found sometimes with a different name, but with the same Hermetic design, more or less developed in other Rites. Ragon, with whom Delaunay and Chemin-Dupontès concur, says that it is not, like many of the high degrees, a mere modern invention, but that it is of the highest antiquity; and was, in fact, the last degree of the ancient initiations teaching, under an Hermetic appearance, the doctrines of natural religion, which formed an essential part of the Mysteries. But Ragon must here evidently refer to the general, philosophic design rather than to the particular organization of the degree. Thory (*Acta Lat.*, i., 339), with more plausibility, ascribes its invention as a Masonic degree to Pernetty, the founder of the Hermetic Rite. Of all the high degrees, it is, perhaps, the most important and the most interesting to the scholar who desires to investigate the true secret of the Order. Its old catechisms, now unfortunately too much neglected, are full of suggestive thoughts, and in its modern ritual, for which we are indebted to the inventive genius of Bro. Albert Pike, it is by far the most learned and philosophical of the Scottish degrees.

Knight of the Sword. (*Chevalier de l'Epée.*) One of the titles of the Scottish Rite degree of Knight of the East. So called in allusion to the legend that the Masons at the second Temple worked with the trowel in one hand and the sword in the other. Du Cange, on the authority of Arnoldus Lubeckius, describes an Order, in the Middle Ages, of Knights of the Sword (*Milites Gladii*), who, having vowed to wield the sword for God's service, wore a sword embroidered on their mantles as a sign of their profession, whence they took their name. But it was not connected with the Masonic degree.

Knight of the Tabernacle. In the Minute Book of the "Grand Lodge of all England," extracts from which are given by Bro. Hughan in his *Unpublished Records* (p. 146), we find the expression *Knight of the Tabernacle*, used in the year 1780, as synonymous with *Knight Templar*.

Knight of the Tabernacle of the Divine Truths. (*Chevalier du Tabernacle des Verités divines.*) A degree cited in the nomenclature of Fustier.

Knight of the Temple. (*Chevalier du Temple.*) This degree is common to all the systems of Masonry founded on the Templar doctrine.

1. It is a synonym of Knights Templar.
2. The Eighth Degree of the Rite of the Philalethes.
3. The Sixty-ninth Degree of the collection of the Metropolitan Chapter of France.
4. The Sixth Degree of the Clerks of Strict Observance.
5. The Ninth Degree of the Rite of the East according to the nomenclature of Fustier.
6. The Thirty-sixth Degree of the Rite of Mizraim.

Knight of the Three Kings. An American side degree of but little importance. Its history connects it with the dedication of the first Temple, the conferrer of the degree representing King Solomon. Its moral tendency appears to be the inculcation of reconciliation of grievances among Masons by friendly conference. It may be conferred by any Master Mason on another.

Knight of the Throne. (*Chevalier du Trône.*) The Second Degree of the Rite of the East according to the nomenclature of Fustier.

Knight of the Triple Cross. (*Chevalier de la Triple Croix.*) The Sixty-sixth Degree of the collection of the Metropolitan Chapter of France.

Knight of the Triple Period. (*Chevalier de la Triple Période.*) A degree in the Archives of the Lodge of *Saint Louis des Amis Réunis at Calais.*

Knight of the Triple Sword. (*Chevalier de la Triple Epée.*) A degree in the collection of Pyron.

Knight of the Two Crowned Eagles. (*Chevalier des teux Aigles Couronnées.*) The Twenty-second Degree of the collection of the Metropolitan Chapter of France.

Knight of the West. (*Chevalier d'Occident.*) 1. The Sixty-fourth Degree of the collection of the Metropolitan Chapter of France. 2. The Forty-seventh Degree of the Rite of Mizraim.

Knight of the White and Black Eagle. (*Chevalier de l'Aigle blanc et noir.*) One of the titles of the Thirtieth Degree of the Ancient and Accepted Scottish Rite, or Knight Kadosh. In the Rite of Perfection of the Emperors of the East and West, it constituted the Twenty-fourth Degree, under the title of Knight Commander of the White and Black Eagle. The white eagle was the emblem of the eastern empire, and the black of the western. Hence we have the Knights of the White Eagle in Russia, and the Knights of the Black Eagle in Prussia, as orders of chivalry. The two combined were, therefore, appropriately (so far as the title is concerned) adopted by the Council which assumed Masonic jurisdiction over both empires.

Knight of the White Eagle. The Sixty-fourth Degree of the Rite of Mizraim. As a political order, that of the Knights of the White Eagle was instituted by Wladistas, King of Poland, in 1325. It is still conferred by the Czar of Russia.

Knight of Unction. (*Chevalier d'Onction.*) The Fifty-first Degree of the collection of the Metropolitan Chapter of France.

Knight, Perfect. (*Chevalier Parfait.*) A degree of the Ancient Chapter of Clermont, found in the Archives of the Mother Lodge of the Philosophic Rite.

Knight, Professed. See *Eques Professus.*

Knight, Prussian. See *Noachite.* Also the Thirty-fifth Degree of the Rite of Mizraim.

Knight Rower. (*Chevalier Rameur.*) The Order of the Knights and Ladies Rowers (*Ordre des Chevaliers Rameurs et Chevalieres Rameures*) was an androgynous and adoptive Rite, founded at the city of Rouen, in France, in 1738, and was therefore one of the earliest instances of the adoptive system. It met with very little success.

Knight, Royal Victorious. (*Chevalier royal Victorieux.*) A degree formerly conferred in the Chapter attached to the Grand Orient of Bologne.

Knight, Sacrificing. (*Chevalier Sacrifiant.*) A degree found in the Archives of the Lodge of *Saint Louis des Amis Réunis at Calais.*

Knight, Victorious. (*Chevalier Victorieux.*) A degree contained in the collection of Hécart.

Knights of the East, Council of. (*Conseil des Chevaliers d'Orient.*) A Chapter of High Degrees, under this name, was established at Paris, on July 22, 1762, by one Pirlet, a tailor, as the rival of the Council of Emperors of the East and West. Baron de Tschoudy became one of its members.

Knights Templar. The piety or the superstition of the age had induced multitudes of pilgrims in the eleventh and twelfth centuries to visit Jerusalem for the purpose of offering their devotions at the sepulcher of the Lord and the other holy place in that city. Many

of these religious wanderers were weak or aged, almost all of them unarmed, and thousands of them were subjected to insult, to pillage, and often to death, inflicted by the hordes of Arabs who, even after the capture of Jerusalem by the Christians, continued to infest the sea coast of Palestine and the roads to the capital.

To protect the pious pilgrims thus exposed to plunder and bodily outrage, nine French knights, the followers of Baldwyn, united, in the year 1118, in a military confraternity or brotherhood in arms, and entered into a solemn compact to aid each other in clearing the roads, and in defending the pilgrims in their passage to the holy city.

Two of these knights were Hugh de Payens and Godfrey de St. Aldemar. Raynouard (*Les Templiers*) says that the names of the other seven have not been preserved in history, but Wilke (*Geschichte des T. H. Ordens*) gives them as Roral, Gundemar, Godfrey Bisol, Payens de Montidier, Archibald de St. Aman, André de Montbar, and the Count of Provence.

Uniting the monastic with the military character, they took, in the presence of the Patriarch of Jerusalem, the usual vows of poverty, chastity, and obedience, and with great humility assumed the title of "Poor Fellow Soldiers of Christ." Baldwyn, the King of Jerusalem, assigned for their residence a part of his palace which stood near the former site of the Temple; and the Abbot and Canons of the Temple gave them, as a place in which to store their arms and magazines, the street between the palace and the Temple, whence they derived the name of Templars; a title which they ever afterward retained.

Raynouard says that Baldwyn sent Hugh de Payens to Europe to solicit a new crusade, and that while there he presented his companions to Pope Honorius II., from whom he craved permission to form a religious military order in imitation of that of the Hospitalers. The pontiff referred them to the ecclesiastical council which was then in session at Troyes, in Champagne. Thither De Payens repaired, and represented to the fathers the vocation of himself and his companions as defenders of the pilgrim; the enterprise was approved, and St. Bernard was directed to prescribe a rule for the infant Order.

This rule, in which the knights of the Order are called *Pauperes commilitis Christi et Templi Salomonis*, or "The Poor Fellow Soldiers of Christ and of the Temple of Solomon," is still extant. It consists of seventy-two chapters, the details of which are remarkable for their ascetic character. It enjoined severe devotional exercises, self-mortification, fasting, and prayer. It prescribed for the professed knights white garments as a symbol of a pure life; esquires and retainers were to be clothed in black. To the white dress, Pope Eugenius II. subsequently added a red cross, to be worn on the left breast as a symbol of martyrdom.

Hugh de Payens, thus provided with a rule that gave permanence to his Order, and encouraged by the approval of the Church, returned to Jerusalem, carrying with him many recruits from among the noblest families of Europe.

The Templars soon became preeminently distinguished as warriors of the cross. St. Bernard, who visited them in their Temple retreat, speaks in the warmest terms of their self-denial, their frugality, their modesty, their piety, and their bravery. "Their arms," he says, "are their only finery, and they use them with courage, without dreading either the number or the strength of the barbarians. All their confidence is in the Lord of Hosts, and in fighting for his cause they seek a sure victory or a Christian and honorable death."

Their banner was the Beauseant, of divided white and black, indicative of peace to their friends, but destruction to their foes. At their reception each Templar swore never to turn his back on three enemies, but should he be alone, to fight them if they were infidels. It was their wont to say that a Templar ought either to vanquish or die, since he had nothing to give for his ransom but his girdle and his knife.

The Order of the Temple, at first exceedingly simple in its organization, became in a short time very complicated. In the twelfth century it was divided into three classes, which were Knights, Chaplains, and Serving Brethren.

1. *The Knights.* It was required that whoever presented himself for admission into the Order must prove that he was sprung from a knightly family, and was born in lawful wedlock; that he was free from all previous obligations; that he was neither married nor betrothed; that he had not made any vows of reception in another Order; that he was not involved in debt; and finally, that he was of a sound and healthy constitution of body.

2. *The Chaplains.* The Order of the Temple, unlike that of the Hospitalers, consisted at first only of laymen. But the bull of Pope Alexander III., issued in 1162, gave the Templars permission to receive into their houses spiritual persons who were not bound by previous vows, the technical name of whom was chaplains. They were required to serve a novitiate of a year. The reception was, except in a few points not applicable to the clergy, the same as that of the knights, and they were required to take only the three vows of poverty, chastity, and obedience. Their duties were to perform all religious offices, and to officiate at all the ceremonies of the Order, such as the admission of members at installations, etc. Their privileges were, however, unimportant, and consisted principally in sitting next to the Master, and being first served at table.

3. *The Serving Brethren.* The only qualification required of the serving brethren, was, that they should be free born and not slaves; yet it is not to be supposed that all the persons of this class were of mean condition. Many

men, not of noble birth, but of wealth and high position, were found among the serving brethren. They fought in the field under the knights, and performed at home the menial offices of the household. At first there was but one class of them, but afterward they were divided into two—the *Brethren-at-Arms* and the *Handicraft Brethren*. The former were the soldiers of the Order. The latter, who were the most esteemed, remained in the Preceptories, and exercised their various trades, such as those of farriers, armorers, etc. The reception of the serving brethren did not differ, except in some necessary particulars, from that of the knights. They were, however, by the accident of their birth, precluded from promotion out of their class.

Besides these three classes there was a fourth—not, however, living in the bosom of the Order—who were called *Affiliati* or the *Affiliated*. These were persons of various ranks and of both sexes, who were recognized by the Order, though not openly connected with it, as entitled to its protection, and admitted to a participation in some of its privileges, such as protection from the interdicts of the Church, which did not apply to the members of the Order.

There was also a class called *Donates* or *Donats*. These were either youths whom their parents destined for the service of the Order when they had attained the proper age, or adults who had bound themselves to aid and assist the Order so long as they lived, solely from their admiration of it, and a desire to share its honors.

Over these presided the Grand Master, more usually styled, in the early days of the Order, simply the Master of the Temple. In the treaty of peace executed in 1178, between the Templars and the Hospitalers, Odo de St. Armand calls himself "Humble Master of the Order of the Temple." But in after times this spirit of humility was lost sight of, and the title of Grand Master was generally accorded to him. His allowances were suitable to the distinguished rank he held, for in the best days of the Order the Grand Master was considered as the equal of a sovereign.

The Grand Master resided originally at Jerusalem; afterward, when that city was lost, at Acre, and finally at Cyprus. His duty always required him to be in the Holy Land; he consequently never resided in Europe. He was elected for life from among the knights in the following manner: On the death of the Grand Master, a Grand Prior was chosen to administer the affairs of the Order until a successor could be elected. When the day which had been appointed for the election arrived, the Chapter usually assembled at the chief seat of the Order; three or more of the most esteemed knights were then proposed; the Grand Prior collected the votes, and he who had received the greatest number was nominated to be the electing Prior. An Assistant was then associated with him, in the person of another knight. These two remained all night in the chapel, engaged in prayer. In the morning, they chose two others, and these four, two more, and so on until the number of twelve (that of the apostles) had been selected. The twelve then selected a Chaplain. The thirteen then proceeded to vote for a Grand Master, who was elected by a majority of the votes. When the election was completed, it was announced to the assembled brethren; and when all had promised obedience, the Prior, if the person was present, said to him, "In the name of God the Father, the Son, and the Holy Ghost, we have chosen, and do choose thee, Brother N., to be our Master." Then, turning to the brethren, he said, "Beloved Sirs and Brethren, give thanks unto God; behold here our Master." The Chaplains then chanted the *Te Deum;* and the brethren, taking their new Master in their arms, carried him into the chapel and placed him before the altar, where he continued kneeling, while the brethren prayed, and the Chaplains repeated the *Kyrie Eleison*, the *Pater Noster*, and other devotional exercises.

Next in rank to the Grand Master was the *Seneschal*, who was his representative and lieutenant. Then came the *Marshal*, who was the General of the Order. Next was the *Treasurer*, an office that was always united with that of Grand Preceptor of Jerusalem. He was the Admiral of the Order. The *Draper*, the next officer in rank, had charge of the clothing of the Order. He was a kind of Commissary General. The *Turcopolier* was the Commander of the light-horse. There was also a class of officers called *Visitors*, whose duties, as their name imports, was to visit the different Provinces, and correct abuses. There were also some subordinate offices appropriated to the Serving Brethren, such as *Sub marshal*, *Standard-Bearer*, *Farrier*, etc.

These officers, with the Grand Preceptors of the Provinces and the most distinguished knights who could attend, constituted the General Chapter or great legislative assembly of the Order, where all laws and regulations were made and great officers elected. This assembly was not often convened, and in the intervals its powers were exercised by the Chapter of Jerusalem.

The Order thus organized, as it increased in prosperity and augmented its possessions in the East and in Europe, was divided into Provinces, each of which was governed by a Grand Preceptor or Grand Prior; for the titles were indiscriminately used. That, however, of Preceptor was peculiar to the Templars, while that of Prior was common both to them and to the Knights Hospitalers of St. John. These Provinces were fifteen in number, and were as follows: Jerusalem, Tripolis, Antioch, Cyprus, Portugal, Castile and Leon, Aragon, France and Auvergne, Normandy, Aquitaine, Provence, England, including Scotland and Ireland; Germany, Upper and Central Italy, and Apulia and Sicily. Hence it will be seen that there was no part of Europe, except the impoverished kingdoms of Denmark, Sweden, and Norway, where the Templars had not extended their possessions and their influence.

In all the Provinces there were numerous temple-houses called Preceptories, presided over by a Preceptor. In each of the larger Preceptories there was a Chapter, in which local regulations were made and members were received into the Order.

The reception of a knight into the Order was a very solemn ceremonial. It was secret, none but members of the Order being permitted to be present. In this it differed from that of the Knights of Malta, whose form of reception was open and public; and it is to this difference, between a public reception and a secret initiation, that may, perhaps, be attributed a portion of the spirit of persecution exhibited by the Church to the Order in its latter days.

Of this reception, the best and most authentic account is given by Münter in his *Statutenbuch des Ordens der Tempelherren* (pp. 29–42), and on that I shall principally rely.

On the day of the reception, the Master and the knights being in the Chapter, the Master said:

"Beloved Knights and Brethren, ye see that the majority are willing that this man shall be received as a brother. If there be among you any one who knows anything concerning him, wherefor he cannot rightfully become a brother, let him say so. For it is better that this should be made known beforehand than after he has been brought before us." All being silent, the candidate is conducted into an adjoining chamber. Two or three of the oldest knights are sent to him to warn him of the difficulties and hardships that he will have to encounter; or, as the Benedictine rule says, all the hard and rough ways that lead to God —"omnia dura et aspera, per quæ itur ad Deum."

They commenced by saying: "Brother, do you seek the fellowship of the Order?" If he replied affirmatively, they warned him of the rigorous services which would be demanded of him. Should he reply that he was willing to endure all for the sake of God and to become the slave of the Order, they further asked him if he were married or betrothed; if he had ever entered any other Order; if he owed more than he could pay; if he was of sound body; and if he was of free condition? If his replies were satisfactory, his examiners returned to the Chapter room and made report; whereupon the Master again inquired if any one present knew anything against the candidate. All being silent, he asked: "Are you willing that he should be received in God's name?" and all the knights answered: "Let him be received in God's name." His examiners then returned to him and asked him if he still persisted in his intention. If he replied that he did, they gave him the necessary instructions how he should act, and led him to the door of the Chapter room. There entering he cast himself on his knees before the Master, with folded hands, and said: "Sir, I am come before God, before you and the brethren, and pray and beseech you, for God and our dear Lady's sake, to admit me into your fellowship and to the good deeds of the Order, as one who will for all his life long be the servant and slave of the Order."

The Master replied: "Beloved Brother, you are desirous of a great matter, for you see nothing but the outward shell of our Order. It is only the outward shell when you see that we have fine horses and rich caparisons, that we eat and drink well, and are splendidly clothed. From this you conclude that you will be well off with us. But you know not the rigorous maxims which are in our interior. For it is a hard matter for you, who are your own master, to become the servant of another. You will hardly be able to perform, in future, what you wish yourself. For when you wish to be on this side of the sea, you will be sent to the other side; when you will wish to be in Acre, you will be sent to the district of Antioch, to Tripolis, or to Armenia; or you will be sent to Apulia, to Sicily, or to Lombardy, or to Burgundy, France, England, or any other country where we have houses and possessions. When you will wish to sleep, you will be ordered to watch; when you will wish to watch, then you will be ordered to go to bed; when you will wish to eat, then you will be ordered to do something else. And as both we and you might suffer great inconvenience from what you have, mayhap, concealed from us, look here on the holy Evangelists and the word of God, and answer the truth to the questions which we shall put to you; for if you lie, you will be perjured, and may be expelled the Order, from which God keep you!"

The questions which had been before asked him by his examiners were then repeated more at large, with the additional one whether he had made any contract with a Templar or any other person to secure his admission.

His answers being satisfactory, the Master proceeded: "Beloved Brother, take good heed that you have spoken truth to us, for should you in any one point have spoken falsely, you would be put out of the Order, from which God preserve you. Now, beloved Brother, heed well what we shall say to you. Do you promise God and Mary, our dear Lady, that your life long you will be obedient to the Master of the Temple and the Prior who is set over you?"

"Yes, Sir, God willing."

"Do you promise God and Mary, our dear Lady, all your life long to live chaste in your body?"

"Yes, Sir, God willing."

"Do you promise God and Mary, our dear Lady, your life long to observe the laudable manners and customs of our Order, those which now are and those which the Master and knights may hereafter ordain?"

"Yes, Sir, God willing."

"Do you promise God and Mary, our dear Lady, that your life long you will, with the power and strength that God gives you, help to conquer the holy land of Jerusalem, and with your best power you will help to keep and guard that which the Christians possess?"

"Yes, Sir, God willing."

"Do you promise God and Mary, our dear Lady, never to hold this Order for stronger or weaker, for worse or for better, but with the permission of the Master or the convent which has the authority?"

"Yes, Sir, God willing."

"Finally, do you promise God and Mary, our dear Lady, that you will never be present when a Christian shall be unjustly and unlawfully despoiled of his heritage, and that you will never by counsel or act take part therein?"

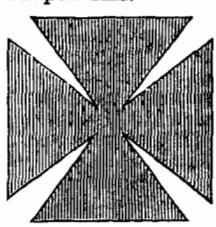
"Yes, Sir, God willing."

Then the Master said: "Thus, in the name of God and Mary our dear Lady, and in the name of St. Peter of Rome, and our Father the Pope, and in the name of all the Brethren of the Temple, we receive you to all the good works of the Order which have been done from the beginning, and shall be done to the end, you, your father, your mother, and all your lineage, who you are willing shall have a share therein. In like manner do you receive us into all the good works which you have done or shall do. We assure you bread and water, and the poor clothing of the Order, and toil and labor in abundance."

The Chaplain then read the 133d Psalm and the prayer of the Holy Ghost, *Deus qui corda fidelium*, and the brethren repeated the Lord's prayer. The Prior and the Chaplain gave the recipient the fraternal kiss. He was then seated before the Master, who delivered to him a discourse on his duties and obligations as a member of the Order.

These duties may be thus summed up: He was never to assault a Christian, nor swear, nor receive any attendance from a woman without the permission of his superiors; not to kiss a woman, even his mother or sister; to hold no child to the baptismal font; and to abuse no man, but to be courteous to all. He was to sleep in a linen shirt, drawers and hose, and girded with a small girdle; to attend Divine service punctually, and to begin and end his meals with a prayer.

Such is the formula of reception, which has been collected by Münter from the most authentic sources. It is evident, however, that it is not complete. The secret parts of the ritual are omitted, so that the formula is here something like what a Freemason would call the monitorial part of the instruction. Münter does not even give the form of the oath taken by the candidate; although Raynouard says that it is preserved in the Archives of the Abbey of Alcobaza, in Aragon, and gives it in the following words, on the authority of Henriguez in his *Regula, etc., Ordinis Cisterniensis:*



"I swear to consecrate my discourse, my arms, my faculties, and my life, to the defence of the sacred mysteries of the faith, and to that of the unity of God. I also promise to be submissive and obedient to the Grand Master of the Order. . . . At all times that it may be necessary, I will cross the seas to go to battle; I will contribute succor against infidel kings and princes; I will not turn my back on three foes; and even if I be alone, I will fight them if they are infidels."

The fact that the Templars had a secret initiation is now generally conceded, although a few writers have denied it. But the circumstantial evidence in its favor is too great to be overcome by anything except positive proof to the contrary, which has never been adduced. It is known that at these receptions none but members of the Order were admitted; a prohibition which would have been unnecessary if the ceremonies had not been secret. In the meetings of the General Chapter of the Order, even the Pope's Legate was refused admission.

It would not be fair to quote the one hundred and twenty accusations preferred against the Templars by Clement, because they were undoubtedly malicious falsehoods invented by an unprincipled Pontiff pandering to the cupidity of an avaricious monarch; but yet some of them are of such a nature as to indicate what was the general belief of men at the time. Thus, Art. 32 says: "Quod receptiones istius clandestine faciebant"; i. e., *that they were wont to have their receptions in secret.* The 100th is in these words: "Quod sic se includunt ad tenenda capitula ut omnes januas domus et ecclesiæ in quibus tenent capitula ferment adeo firmiter quod nullus sit nec esse possit accessus ad eos nec juxta: ut possit quicunque videre vel audire de factis veldictis eorum"; i. e., *that when they held their Chapters, they shut all the doors of the house or church in which they met so closely that no one could approach near enough to see or hear what they were doing and saying.* And the next article is more particular, for it states that, to secure themselves against eavesdroppers, they were accustomed to place a watch, as we should now say a tiler, upon the roof of the house, "excubicum super tectum," who could give the necessary warning.

Of course it is impossible to obtain an accurate knowledge of all the details of this secret reception of the ancient Templars, since it must have been generally oral; but I have always been inclined to think, from allusions here and there scattered through the history of their customs, that many of its features have descended to us, and are to be found in the ritual of initiation practised by the Masonic Knights Templar.

The dress of the Templars was prescribed for them by St. Bernard, in the rule which he composed for the government of the Order, and is thus described in Chapter XX.

"To all the professed knights, both in winter and summer, we give, if they can be procured, *white garments*, that those who have cast behind them a dark life, may know that they are to commend themselves to their Creator by a pure and white life." The white mantle was therefore the peculiar vestment of the Templars, as the black was of the Hospitalers.

The general direction of St. Bernard as to clothing was afterward expanded, so that the dress of a Templar consisted of a long, white tunic, nearly resembling that of a priest's in shape, with a red cross on the front and back; under this was his linen shirt clasped by a girdle. Over all was the white mantle with the red cross pattée. The head was covered by a cap or hood attached to the mantle. The arms were a sword, lance, mace, and shield. Although at first the Order adopted as a seal the representation of two knights riding on one horse, as a mark of their poverty, subsequently each knight was provided with three horses, and an esquire selected usually from the class of Serving Brethren.

To write the history of the Templar Order for the two centuries of its existence would, says Addison, be to write the Latin history of Palestine, and would occupy a volume. Its details would be accounts of glorious struggles with the infidel in defense of the Holy Land, and of Christian pilgrimage, sometimes successful and often disastrous; of arid sands well moistened with the blood of Christian and Saracen warriors; of disreputable contests with its rival of St. John; of final forced departure from the places which its prowess had conquered, but which it had not strength to hold, and of a few years of luxurious, and it may be of licentious indolence, terminated by a cruel martyrdom and dissolution.

The fall of Acre in 1292, under the vigorous assault of the Sultan Mansour, led at once to the evacuation of Palestine by the Christians. The Knights Hospitalers of St. John of Jerusalem, afterward called Knights of Rhodes, and then of Malta, betook themselves to Rhodes, where the former, assuming a naval character, resumed the warfare in their galleys against the Mohammedans. The Templars, after a brief stay in the island of Cyprus, retired to their different Preceptories in Europe.

Porter (*Hist. K. of Malta*, i., 174) has no panegyric for these recreant knights. After eulogizing the Hospitalers for the persevering energy with which, from their island home of Rhodes, they continued the war with the infidels, he says:

"The Templar, on the other hand, after a brief sojourn in Cyprus, instead of rendering the smallest assistance to his chivalrous and knightly brethren in their new undertaking, hurried with unseemly haste to his numerous wealthy European Preceptories, where the grossness of his licentiousness, the height of his luxury, and the arrogance of his pride, soon rendered him an object of the most invincible hatred among those who possessed ample power to accomplish his overthrow. During these last years of their existence little can be said in defense of the Order; and although the barbarous cruelty with which their extinction was accomplished has raised a feeling of compassion in their behalf, which bids fair to efface the memory of their crimes, still it cannot be denied that they had of late years so far deviated from the original purposes of their Institution as to render them highly unfit depositaries of that wealth which had been bequeathed to them for purposes so widely different from those to which they had appropriated it."

The act of cruelty and of injustice by which the Templar Order was dissolved in the fourteenth century, has bequeathed an inglorious memory on the names of the infamous king, and no less infamous pope, who accomplished it. In the beginning of the fourteenth century, the throne of France was filled by Philip the Fair, an ambitious, a vindictive, and an avaricious prince. In his celebrated controversy with Pope Boniface, the Templars had, as was usual with them, sided with the pontiff and opposed the king; this act excited his hatred: the Order was enormously wealthy; this aroused his avarice; their power interfered with his designs of political aggrandizement; and this alarmed his ambition. He, therefore, secretly concerted with Pope Clement V. a plan for their destruction, and the appropriation of their revenues. Clement, by his direction, wrote in June, 1306, to De Molay, the Grand Master, who was then at Cyprus, inviting him to come and consult with him on some matters of great importance to the Order. De Molay obeyed the summons, and arrived in the beginning of 1307 at Paris, with sixty knights and a large amount of treasure. He was immediately imprisoned, and, on the thirteenth of October following, every knight in France was, in consequence of the secret orders of the king, arrested on the pretended charge of idolatry, and other enormous crimes, of which Squin de Flexian, a renegade and expelled Prior of the Order, was said to have confessed that the knights were guilty in their secret Chapters.

What these charges were has not been left to conjecture. Pope Clement sent a list of the articles of accusation, amounting to one hundred and twenty in number, to all the archbishops, bishops, and Papal commissaries upon which to examine the knights who should be brought before them. This list is still in existence, and in it we find such charges as these: 1. That they required those who were received into the Order to abjure Christ, the Blessed Virgin, and all the saints. 7. That they denied that Christ had suffered for man's redemption. 9. That they made their recipient spit upon the cross or the crucifix. 14. That they worshiped a cat in their assemblies. 16. That they did not believe in the eucharistic sacrifice. 20. That they said that the Grand Master had the power of absolution. 26. That they practised obscene ceremonies in their receptions. 32. That their receptions were secret; a charge repeated in articles 97, 98, 99, 100, and 101, in different forms. 42. That they had an idol, which was a head with one or with three faces, and sometimes a human skull. 52, 53. That they exercised magic arts.

On such preposterous charges as these the

knights were tried, and of course, as a foregone conclusion, condemned. On the 12th of May, 1310, fifty-four of the knights were publicly burnt, and on the 18th of March, 1313, De Molay, the Grand Master, and the three principal dignitaries of the order, suffered the same fate. They died faithfully asserting their innocence of all the crimes imputed to them. The Order was now, by the energy of the King of France, assisted by the spiritual authority of the pope, suppressed throughout Europe. So much of its vast possessions as were not appropriated by the different sovereigns to their own use, or to that of their favorites, was bestowed upon the Order of the Knights of Malta, whose acceptance of the donation did not tend to diminish the ill feeling which had always existed between the members of the two Orders.

As to the story of the continuation of the Order, after the death of James de Molay, by Johannes Larmenius, under the authority of a charter of transmission given to him by De Molay a few days before his death, that subject is more appropriately treated in the history of the Order of the Temple, which claims, by virtue of this charter, to be the regular successor of the ancient Order.

From the establishment of the Order by Hugh de Payens, until its dissolution during the Mastership of De Molay, twenty-two Grand Masters presided over the Order, of whom the following is an accurate list, compiled on the authority of Addison. The roll of Grand Masters in the Rite of Strict Observance, and that in the Order of the Templar, differ in several names; but these rolls are destitute of authenticity.

1. Hugh de Payens,	elected in	1118.
2. Robert of Burgundy,	"	1136.
3. Everard de Barri,	"	1146.
4. Bernard de Tremellay,	"	1151.
5. Bertrand de Blanquefort,	"	1154.
6. Philip of Naplous,	"	1167.
7. Odo de St. Amand,	"	1170.
8. Arnold de Troye,	"	1180.
9. Gerard de Ridefort,	"	1185.
10. Brother Walter,	"	1189.
11. Robert de Sablé,	"	1191.
12. Gilbert Horal,	"	1195.
13. Philip de Plessis,	"	1201.
14. William de Chartres,	"	1217.
15. Peter de Montaigu,	"	1218.
16. Hermann de Perigord,	"	1236.
17. William de Sonnac,	"	1245.
18. Reginald de Vichier,	"	1252.
19. Thomas Berard,	"	1256.
20. William de Beaujeu,	"	1273.
21. Theobald de Gaudini,	"	1291.
22. James de Molay,	"	1297.

(See *Trans. Quar. Cor.*, vol. XX.)

Knights Templar, Masonic. The connection of the Knights Templar with the Freemasons may much more plausibly be traced than that of the Knights of Malta. Yet, unfortunately, the sources from which information is to be derived are for the most part traditionary; authentic dates and documents are wanting. Tradition has always been inclined to trace the connection to an early period, and to give to the Templar system of secret reception a Masonic character, derived from their association during the Crusades with the mystical Society of the Assassins in Syria. Lawrie (*Hist.*, p. 87), or Sir David Brewster, the real author of the work which bears Lawrie's name, embodies the tradition in this form:

"Almost all the secret associations of the ancients either flourished or originated in Syria and the adjacent countries. It was here that the Dionysian artists, the Essenes and the Kasideans arose. From this country also came several members of that trading association of Masons which appeared in Europe during the dark ages; and we are assured, that, notwithstanding the unfavorable condition of that province, there exists at this day, on Mount Libanus, one of these Syriac fraternities. As the Order of the Templars, therefore, was originally formed in Syria, and existed there for a considerable time, it would be no improbable supposition that they received their Masonic knowledge from the Lodges in that quarter. But we are fortunately, in this case, not left to conjecture, for we are expressly informed by a foreign author [Adler, *de Drusis*], who was well acquainted with the history and customs of Syria, that the Knights Templar were actually members of the Syriac fraternities."

Even if this hypothesis were true, although it might probably suggest the origin of the secret reception of the Templars, it would not explain the connection of the modern Templars with the Freemasons, because there is no evidence that these Syriac fraternities were Masonic.

There are four sources from which the Masonic Templars are said to have derived their existence; making, therefore, as many different divisions of the Order.

1. The Templars who claim John Mark Larmenius as the successor of James de Molay.

2. Those who recognize Peter d'Aumont as the successor of De Molay.

3. Those who derive their Templarism from the Count Beaujeu, the nephew of Molay.

4. Those who claim an independent origin, and repudiate alike the authority of Larmenius, of Aumont, and of Beaujeu.

From the first class spring the Templars of France, who professed to have continued the Order by authority of a charter given by De Molay to Larmenius. This body of Templars designate themselves as the "Order of the Temple." Its seat is in Paris. The Duke of Sussex received from it the degree and the authority to establish a Grand Conclave in England. He did so; and convened that body once, but only once. During the remaining years of his life, Templarism had no activity in England, as he discountenanced all Chris-

tian and chivalric Masonry. (See *Temple, Order of the.*)

The second division of Templars is that which is founded on the theory that Peter d'Aumont fled with several knights into Scotland, and there united with the Freemasons. This legend is intimately connected with Ramsay's tradition—that Freemasonry sprang from Templarism, and that all Freemasons are Knights Templar. The Chapter of Clermont adopted this theory; and in establishing their high degrees asserted that they were derived from these Templars of Scotland. The Baron Hund carried the theory into Germany, and on it established his Rite of Strict Observance, which was a Templar system. Hence the Templars of Germany must be classed under the head of the followers of Aumont. (See *Strict Observance.*)

The third division is that which asserts that the Count Beaujeu, a nephew of the last Grand Master, De Molay, and a member of the Order of Knights of Christ—the name assumed by the Templars of Portugal—had received authority from that Order to disseminate the degree. He is said to have carried the degree and its ritual into Sweden, where he incorporated it with Freemasonry. The story is, too, that Beaujeu collected his uncle's ashes and interred them in Stockholm, where a monument was erected to his memory. Hence the Swedish Templar Masons claim their descent from Beaujeu, and the Swedish Rite is through this source a Templar system.

Of the last class, or the Templars who recognized the authority of neither of the leaders who have been mentioned, there were two subdivisions, the Scotch and the English; for it is only in Scotland and England that this independent Templarism found a foothold.

It was only in Scotland that the Templars endured no persecution. Long after the dissolution of the Order in every other country of Europe, the Scottish Preceptories continued to exist, and the knights lived undisturbed. One portion of the Scottish Templars entered the army of Robert Bruce, and, after the battle of Bannockburn, were merged in the "Royal Order of Scotland," then established by him. (See *Royal Order of Scotland.*)

Another portion of the Scottish Templars united with the Knights Hospitalers of St. John. They lived amicably in the same houses, and continued to do so until the Reformation. At this time many of them embraced Protestantism. Some of them united with the Freemasons, and established "the Ancient Lodge" at Stirling, where they conferred the degrees of Knight of the Sepulcher, Knight of Malta, and Knights Templar. It is to this division that we are to trace the Masonic Templars of Scotland.

The Roman Catholic knights remaining in the Order placed themselves under David Seaton. Lord Dundee afterward became their Grand Master. Charles Edward, the "Young Pretender," is said to have been admitted into the Order at Holyrood House, Edinburgh, on September 24, 1745, and made the Grand Master. He is also said, but without any proof, to have established the Chapter of Arras and the high degrees.* To this branch, I think, there can be but little doubt that we are to attribute the Templar system of the Ancient and Accepted Scottish Rite as developed in its degree of Kadosh.

The English Masonic Templars are most probably derived from that body called the "Baldwyn Encampment," or from some one of the four coordinate Encampments of London, Bath, York, and Salisbury, which it is claimed were formed by the members of the Preceptory which had long existed at Bristol, and who, on the dissolution of their Order, are supposed to have united with the Masonic Fraternity. The Baldwyn Encampment claims to have existed from "time immemorial"—an indefinite period—but we can trace it back far enough to give it a priority over all other English Encampments. From this division of the Templars, repudiating all connection with Larmenius, with Aumont, or any other of the self-constituted leaders, but tracing its origin to the independent action of knights who fled for security and for perpetuity into the body of Masonry, we may be held justly entitled to derive the Templars of the United States.

Of this brief statement, we may make the following summary:

1. From Larmenius came the French Templars.
2. From Aumont, the German Templars of Strict Observance.
3. From Beaujeu, the Swedish Templars of the Rite of Zinnendorf.
4. From the Protestant Templars of Scotland and the Ancient Lodge of Stirling, the Scotch Templars.
5. From Prince Charles Edward and his adherents, the Templars of the Ancient and Accepted Scottish Rite.
6. From the Baldwyn Encampment and its coordinates, the old English and the American Templars.

The GOVERNMENT of Masonic Knights Templar in the United States is vested, first, in Commanderies, which confer the Red Cross and Templar degrees and instruct in the secrets of Malta.† The usual expression, that a candidate after being made a Knights Templar is also created a Knight of Malta, involves an absurdity. No man being a Knights Templar could, by the original statutes, be a member of any other Order; and it is to be regretted that the wise provision of the Grand Encampment in 1856, which struck the degree of Malta from the ritual of the Commanderies, should have been in 1862 unwisely repealed. The secrets in which the candidate is instructed are the modern inventions of the Masonic Knights of Malta. The original Order had no secrets.

---

* For a critical examination of this story see Hughan's *Jacobite Lodge at Rome*, ch. 3.
[E. L. H.]

† See foot-note after Knights of Malta.

Commanderies are under the control of Grand Commanderies in States in which those bodies exist. Where they do not, the Warrants are derived directly from the Grand Encampment.

The supreme authority of the Order is exercised by the Grand Encampment of the United States, which meets triennially. The presiding officer is a Grand Master.

The COSTUME of the Knights Templar of the United States is of two kinds. First, the original uniform, which was in general use until the year 1859, and is still used by Commanderies which were in existence before that time. It is thus described:

The suit is black, with black gloves. A black velvet sash, trimmed with silver lace, crosses the body from the left shoulder to right hip, having at its end a cross-hilted dagger, a black rose on the left shoulder, and a Maltese cross at the end. Where the sash crosses the left breast, is a nine-pointed star in silver, with a cross and serpent of gold in the center, within a circle, around which are the words, "*in hoc signo vinces.*" The apron is of black velvet, in triangular form, to represent the delta, and edged with silver lace. On its flap is placed a triangle of silver, perforated with twelve holes, with a cross and serpent in the center; on the center of the apron are a skull and crossbones, between three stars of seven points, having a red cross in the center of each. The belt is black, to which is attached a cross-hilted sword. The caps vary in form and decoration in different Encampments. The standard is black, bearing a nine-pointed cross of silver, having in its center a circle of green, with the cross and serpent in gold, and the motto around "*in hoc signo vinces.*"

In 1859 the Grand Encampment enacted a statute providing that all Commanderies which might be thereafter chartered should provide a new costume of an entirely different kind, which should also be adopted by the old Commanderies whenever they should change their uniform. This new costume was further altered in 1862, and is now of the following description, as detailed in the statute:

Full Dress.—Black frock coat, black pantaloons, scarf, sword, belt, shoulder straps, gauntlets, and chapeau, with appropriate trimmings.

Fatigue Dress.—Same as full dress, except for chapeau a black cloth cap, navy form, with appropriate cross in front, and for gauntlets, white gloves.

Scarf.—Five inches wide in the whole, of white, bordered with black one inch on either side, a strip of navy lace one-fourth of an inch wide, at the inner edge of the black. On the front center of the scarf a metal star of nine points, in allusion to the nine founders of the Temple Order, enclosing the Passion Cross, surrounded by the Latin motto, "*in hoc signo vinces*"; the star to be three and three-quarter inches in diameter. The scarf to be worn from the right shoulder to the left hip, with the ends extending six inches below the point of intersection.

Chapeau.—The military chapeau, trimmed with black binding, one white and two black plumes, and appropriate cross on the left side.

Gauntlets.—Of buff leather, the flap to extend four inches upward from the wrist, and to have the appropriate cross embroidered in gold, on the proper colored velvet, two inches in length.

Sword.—Thirty-four to forty inches, inclusive of scabbard; helmet head, cross handle, and metal scabbard.

Belt.—Red enameled or patent leather, two inches wide, fastened round the body with buckle or clasp.

From what has been said, it will appear that there are two modes of dress or costume in use among the Templars of the United States—one, the old or "black uniform," which was adopted at the first organization of the Order in this country, and which is still used by the old Commanderies which were in existence previous to the year 1859; and the new or "white uniform," which was adopted by the Grand Encampment in that year, and which has been prescribed for all Commanderies chartered since that year.

This difference of costume has recently been the occasion of much discussion in the Order. In 1872, Sir J. Q. A. Fellows, the Grand Master, thinking that it was his duty to enforce a uniform dress in the Order, issued his decree requiring all the Commanderies in the United States which were then using "the black uniform," to abandon it, and to adopt "the white uniform," which had been originally ordered in 1859, and subsequently amended in 1862. Much opposition has been manifested to this order in the Commanderies and Grand Commanderies where the black costume was in use. The Grand Master's interpretation of the statute of the Grand Encampment has been doubted or denied, and the order has been virtually disobeyed by most, if not by all of them. The question has assumed great importance in consequence of the feeling that has been created, and is therefore worthy of discussion. Dr. Mackey's views were against the correctness of the Grand Master's interpretation of the law, and so were those of the living Past Grand Masters of the Order. It is, however, but fair to say that some distinguished Templars have been of a different opinion. The following views advanced by Dr. Mackey in the *National Freemason* in December, 1872, express what he thought was the true condition of the question.

Previous to the year 1859 the costume of the Knights Templar of this country was determined only by a traditional rule, and consisted of a black dress, with the richly decorated baldric and apron; the latter intended to show the connection which existed between the Order and Ancient Craft Masonry.

In 1856, at Hartford, a new Constitution was proposed and adopted, with the exception of the part that referred to costume. Sir Knight Mackey, from the committee on the Constitution, made a report on the subject of dress, as a part of the Constitution; but the

consideration of this report was postponed until the next triennial meeting. The changes in costume proposed by the committee were not very great; the baldric and the *essential* apron were preserved, and a white tunic, not hitherto used, was recommended.

At the session of 1859, at Chicago, the subject of dress was alluded to by the Grand Master in his address; and his remarks, together with the report of the committee made in 1856, were referred to a special committee of seven, of which the Grand Master was chairman, and Sir Knights Doyle, Pike, Simons, Mackey, Morris, and French were the members.

This committee reported a uniform which made material differences in the dress theretofore worn, and especially by the rejection of the apron and the introduction of a white tunic and a white cloak. These last were favorite notions of Grand Master Hubbard, and they were adopted by the committee mainly in deference to his high authority.

The proposed measure met at first with serious opposition, partly on account of the rejection of the apron, which many Templars then held, as they do now, to be an essential feature of Masonic Templarism, and a tangible record of the union at a specific period in history of the two Orders; but mainly, perhaps, on account of the very heavy expense and inconvenience which would devolve on the old Commanderies, if they were required at once to throw aside their old dress and provide a new one.

This opposition was only quelled by the agreement on a *compromise*, by which the old Commanderies were to be exempted from the operation of the law. The regulations for the new costume were then passed, and the *compromise* immediately after adopted in the words of the following resolution, which was proposed by Sir Knight Doyle, who was one of the committee:

"*Resolved*, That the costume this day adopted by the Grand Encampment be, and the same is hereby, ordered to be worn by all Commanderies chartered at this Communication, or that shall hereafter be established in this jurisdiction, and by all Commanderies heretofore existing, whenever they shall procure a new costume"; and all State Grand Commanderies were directed to enforce it in all subordinates that may hereafter be chartered in their respective jurisdictions.

This was a compromise, nothing more or less, and so understood at the time. The old Commanderies were then in the majority, and would not have consented to any change involving so much expenditure, unless they had been relieved from the burden themselves.

But the white tunic and cloak were never popular with the knights, who had been required by the regulations of 1859 to wear them. In consequence of this, at the session in 1862, on motion of Sir Knight Bailey, "the subject-matter of costume and the resolution relating thereto were referred to a Select Committee of Five."

This committee made a report, in which they "proposed" a uniform. The record says that "the report was agreed to, and the uniform was adopted." But there are some points in this report that are worthy of notice. In the first place, not a word is said about the compromise resolution adopted in 1859, although it was referred to the committee. That resolution was not repealed by any action taken at the session of 1862, and still must remain in force. It secured to the old Commanderies the right to wear the old black costume; a right which could not be taken from them, except by a repeal of the resolution conferring the right. Nothing need be said of the manifest injustice of repealing a resolution granted by the friends of a measure to its opponents to remove their opposition. In 1859, the promise was made to the old Commanderies, that if they would agree to a certain uniform, to be prescribed for new Commanderies, their own old, traditional costume should never be interfered with. *Might* could, it is true, repeal this compromise; but *Right* would, for that purpose, have to be sacrificed. But the fact is, that the sense of right in the Grand Encampment prevented such an act of discourtesy, "not to put too fine a point upon it," and no one can find in the proceedings of the Grand Encampment any act which repeals the compromise resolution of 1859; and this has been the opinion and the decision of all the Grand Masters who have wielded the baculus of office, except the present one.

But, in the second place, the report of 1862 shows clearly that the object of the committee was to recommend a change in the uniform that had been adopted for new Commanderies in 1859, and which had become objectionable on account of the tunic and cloak, and that they did not intend to refer at all to the old dress of the old Commanderies.

In the report the committee say: "The objections advanced to the costume adopted at the last Triennial Conclave of this Grand Body are want of adaptation to the requirements of our modern Templars, its liability to injury, and its expensiveness." Now, who advanced these objections? Clearly, not the old Commanderies. They were well satisfied with the mode of dress which they had received from their fathers; and which was dear to them for its solemn beauty and its traditional associations; and the right to wear which had been secured to them in 1859, with the understanding that if they ever desired, of their own accord, to lay it aside, they would then adopt, in its stead, the regulation dress of the Grand Encampment. But this was to be for their own free action.

It was very evident that the old Commanderies had never complained that the tunics and cloaks were from their material expensive, and from their color liable to injury. The old Commanderies did not use these expensive and easily soiled garments. It was the new Commanderies that had made the objection, and for them the legislation of 1862 was undertaken.

Dr. Mackey held, therefore, that the compromise resolution of 1859 still remains in force; that even if the Grand Encampment had the right to repeal it, which he did not admit, it never has enacted any such repeal; that the old Commanderies have the right to wear the old black uniform, and that the legislation of 1862 was intended only to affect the new Commanderies which had been established since the year 1859, when the first dress regulation was adopted.

It would scarcely be proper to close this article on Masonic Templarism without some reference to a philological controversy which has recently arisen among the members of the Order in the United States in reference to the question whether the proper title in the plural is "Knights Templars" or "Knights Templar." This subject was first brought to the attention of the Order by the introduction, in the session of the Grand Encampment in 1871, of the following resolutions by Sir Knight Charles F. Stansbury, of Washington City.

"*Resolved*, That the proper title of the Templar Order is 'Knights Templars,' and not 'Knights Templar,' as now commonly used under the sanction of the example of this Grand Encampment.

"*Resolved*, That the use of the term 'Knights Templar' is an innovation, in violation of historic truth, literary usage, and the philology and grammar of the English language."

This report was referred to a committee, who reported "that this Grand Encampment has no authority to determine questions of 'historic truth, literary usage, and the philology and grammar of the English language' "; and they asked to be discharged from the further consideration of the subject. This report is not very creditable to the committee, and puts a very low estimate on the character of the Grand Encampment. Certainly, it is the duty of every body of men to inquire whether the documents issued under their name are in violation of these principles, and if so, to correct the error. If a layman habitually writes bad English, it shows that he is illiterate; and the committee should have sought to preserve the Grand Encampment from a similar charge. It should have investigated the subject, which to scholars is of more importance than they seemed to consider it; they should have defended the Grand Encampment in the use of the term, or have recommended its abandonment. Moreover, the Grand Recorder reports that on examination he finds that the title *Knights Templars* was always used until 1856, when it was changed to *Knights Templar;* and the committee should have inquired by whose authority the change was made. But having failed to grapple with the question of good English, the Craft afterward took the subject up, and a long discussion ensued in the different Masonic journals, resulting at last in the expression, by the best scholars of the Order, of the opinion that *Knights Templars* was correct, because it was in accordance with the rules of good English, and in unexceptional agreement with the usage of all literary men who have written on the subject.

Bro. Stansbury, in an article on this question which he published in Mackey's *National Freemason* (i., 191), has almost exhausted the subject of authority and grammatical usage. He says: "That it is an innovation in violation of historic truth is proved by reference to all historical authorities. I have made diligent researches in the Congressional Library, and have invoked the aid of all my friends who were likely to be able to assist me in such an investigation, and so far from finding any conflict of authority on the question, I have never been able to discover a single historical authority in favor of any other title than 'Knights Templars.'

"I refer to the following list of authorities: *Encyclopedia Britannica, Encyclopedia Americana, Chambers's Encyclopedia, London Encyclopedia, Encyclopedia Metropolitana, Penny Cyclopedia, Cottage Cyclopedia, Rees's Cyclopedia,* Wade's *British Chronology,* Blair's *Chronological Tables, Chambers's Miscellany* (Crusades), *Chambers's Book of Days,* Addison's *Knights Templars, Pantalogia,* Boutelle's *Heraldry,* Hallam's *Middle Ages,* Lingard's *History of England; Glossographia Anglicana Nova,* 1707; Blackstone's *Commentaries,* vol. i., p. 406; *Appleton's Cyclopedia of Biography* (Molai); Townsend's *Calendar of Knights,* London, 1828; Mosheim's *Ecclesiastical History* (ed. 1832), vol. ii., p. 481; Dugdale's *Monasticon Anglicanum,* vol. vi., p. 813; Hayden's *Dictionary of Dates;* Beeton's *Dictionary of Universal Information;* Burne's *Sketch of the History of the Knights Templars;* Laurie's *History of Freemasonry;* Taffe's *History of Knights of Malta; London Freemasons' Magazine;* Sutherland's *Achievements of Knights of Malta;* Clark's *History of Knighthood;* Ashmole's *History of the Order of the Garter;* Turner's *England in the Middle Ages;* Brande's *Encyclopedia;* Tanner's *Notitia Monastica,* 1744, pp. 307–310.

"These will, perhaps, suffice to show what, in the opinion of historical authorities, is the proper title of the Order. In all of them, the term 'Knights Templars' is the only one employed.

"They might, perhaps, be sufficient also on the question of literary usage; but on that point I refer, in addition, to the following:

"*London Quarterly Review,* 1829, p. 608. Article: 'History of the Knights Templars.'

"*Edinburgh Review,* October, 1806, p. 196. Review of M. Renouard's work, *Les Templiers.*

"*Eclectic Review,* 1842, p. 189. Review of the *History of the Knights Templars, the Temple Church, and the Temple,* by Chas. G. Addison. The running title is *History of the Knights Templars.*

"*Retrospective Review,* 1821, vol. iv., p. 250. Review of the *History of the Templars,* by Nicholas Gaulterius, Amsterdam, 1703. The running title is *History of the Knights Templars.*

"In Dr. Mackey's various Masonic works both titles are occasionally used; but that fact is fully explained in the letter from that distinguished Masonic authority, with which I shall conclude this article."

On the philological and grammatical question, it mainly turns on the inquiry whether the word Templar is a noun or an adjective. I think it may be safely asserted that every dictionary of the English language in which the word occurs, gives it as a noun, and as a noun only. This is certainly the fact as to Johnson's Dictionary, Webster's Dictionary, Cole's Dictionary, Crabb's Dictionary (Technological), Imperial Dictionary, Craig's Dictionary (Universal), and Worcester's Dictionary.

If, then, the word "Templar" is a noun, we have in the combination—"Knights Templar"—two nouns, referring to the same person, one of which is in the plural, and the other in the singular. The well-known rule of apposition, which prevails in almost, if not quite all, languages, requires nouns under these circumstances to agree in number and case. This is, in fact, a principle of general grammar, founded in common sense. The combination "Knights Templar" is therefore false in grammar, if the word "Templar" is a noun. But some may say that it is a noun used as an adjective—a qualifying noun—a very common usage in the English tongue. If this were so, the combination "Knights Templar" would still be entirely out of harmony with the usage of the language in regard to qualifying nouns, the invariable practise being to place the adjective noun before the noun which it qualifies. A few familiar examples will show this. Take the following: mansion house, bird cage, sea fog, dog days, mouse trap, devil fish, ink stand, and beer cask. In every case the generic word follows the qualifying noun.

But if we even went to the length of admitting the word "Templar" to be an adjective, the combination "Knights Templar" would still be contrary to the genius of the language, which, except in rare cases, places the adjective before the noun which it qualifies. In poetry, and in some technical terms of foreign origin, the opposite practise prevails.

The analogy of the usage, in reference to the designations of other Orders of knighthood, is also against the use of "Knights Templar." We have Knights Commanders, Knights Bachelors, Knights Bannerets, Knights Baronets, and Knights Hospitalers.

Against all this, the only thing that can be pleaded is the present usage of the Grand Encampment of the United States, and of some Commanderies which have followed in its wake. The propriety of this usage is the very question at issue; and it would be curious reasoning, indeed, that would cite the fact of the usage in proof of its propriety. If the Templars of to-day are the successors of De Molay and Hugh de Payens, the preservation and restoration of the correct title of the Order cannot be a matter of indifference to them.

In coming to the consideration of the question, it appears that it must be examined in two ways, grammatically and traditionally: in other words, we must inquire, first, which of these two expressions better accords with the rules of English grammar; and, secondly, which of them has the support and authority of the best English writers.

1. If we examine the subject grammatically, we shall find that its proper decision depends simply on the question: Is "Templar" a noun or an adjective? If it is an adjective, then "Knights Templar" is correct, because adjectives in English have no plural form. It would, however, be an awkward and unusual phraseology, because it is the almost invariable rule of the English language that the adjective should precede and not follow the substantive which it qualifies.

But if "Templar" is a substantive or noun, then, clearly, "Knights Templar" is an ungrammatical phrase, because "*Templar*" would then be in apposition with "*Knights*," and should be in the same regimen; that is to say, two nouns coming together, and referring to the same person or thing, being thus said to be *in apposition*, must agree in number and case. Thus we say *King George* or *Duke William*, when *King* and *George*, and *Duke* and *William* are in apposition and in the singular; but speaking of Thackeray's "Four Georges," and intending to designate who they were by an explanatory noun in apposition, we should put both nouns in the plural, and say "the four *Georges, Kings* of England." So when we wish to designate a simple Knight, who is not only a Knight, but also belongs to that branch of the Order which is known as Templars, we should call him a "Knight Templar"; and if there be two or more of these Templars, we should call them "Knights Templars," just as we say "Knight Hospitaler" and "Knights Hospitalers."

Now there is abundant evidence, in the best works on the subject, of the use of the word "Templar" as a substantive, and none of its use as an adjective.

It would be tedious to cite authorities, but a reference to our best English writers will show the constant employment of "Templar" as a substantive only. The analogy of the Latin and French languages supports this view, for "Templarius" is a noun in Latin, as "Templier" is in French.

2. As to traditional authority, the usage of good writers, which is the "*jus et norma loquendi*," is altogether in favor of "*Knights Templars*," and not "*Knights Templar*."

In addition to the very numerous authorities collected by Bro. Stansbury from the shelves of the Congressional Library, Dr. Mackey collated all the authorities in his own library.

All the English and American writers, Masonic and unmasonic, except some recent American ones, use the plural of Templar to designate more than one Knight. In a few instances Dr. Mackey found "Knight Templars," but never "Knights Templar." The very recent

American use of this latter phrase is derived from the authority of the present Constitution of the Grand Encampment of the United States, and is therefore the very point in controversy. The former Constitution used the phrase 'Knights Templars.' "On the whole," Dr. Mackey concludes, "I am satisfied that the expression 'Knights Templar' is a violation both of the grammatical laws of our language and of the usage of our best writers on both sides of the Atlantic, and it should therefore, I think, be abandoned." *

Knights of St. John the Evangelist of Asia in Europe. Founded at Schleswig and Hamburg by Count of Ecker and Eckhoffen, in 1786, out of his Order of the "True Light," founded the previous year.

Knights of the True Light. A degree founded by Count of Ecker and Eckhoffen, in 1785.

Knocks, Three. When the Craft were to be called to labor in old North Germany, "the Master should give three knocks, a Pallirer two, consecutively; and in case the Craft at large were imperatively demanded, one blow must be struck, morning, midday, or at eventide." (*Ordnung der Steinmetzen*, 1462, Art. 28.) Fort, in his *Early History, etc.*, says, "three strokes by a Master convened all the members of that degree; two strokes by the Pallirer called the Fellows, and by a single blow each member was assembled in Lodge. In the opening and closing of Teutonic tribunals of justice, the judge carried a staff or mace, as an emblem of jurisdiction, and order was enjoined by a blow on the pedestal by the Arbiter."

An exposure of Masonry called *The Three Distinct Knocks*, was issued in 1760. Dermott (*Ahiman Rezon*, 1764, p. iii.) says Daniel Tadpole was the editor, but this is probably intended for a joke.

Knowledge. In the dualism of Masonry, knowledge is symbolized by light, as ignorance is by darkness. To be initiated, to receive light is to acquire knowledge; and the cry of the neophyte for light is the natural aspiration of the soul for knowledge.

Knowledge, Degrees of. See *Degrees of Knowledge*.

Kojiki. (*Book of Ancient Traditions.*) The oldest monument of Shintoism, the ancient religion of Japan. It is written in pure Japanese, and was composed by order of the Mikado Gemmio, A.D. 712, and first printed about 1625. The adherents of Shintoism number about 14,000,000.

Konx Ompax. There is hardly anything that has been more puzzling to the learned than the meaning and use of these two apparently barbarous words. Bishop Warburton says (*Div. Leg.*, I., ii., 4), but without giving his authority, that in the celebration of the Eleusinian mysteries, "the assembly was dismissed with these two barbarous words, ΚΟΓΞ ΟΜΠΑΞ"; and he thinks that this "shows the *Mysteries* not to have been originally Greek." Le Clerc (*Bib. Univ.*, vi., 86) thinks that the words seem to be only an incorrect pronunciation of *kots* and *omphets*, which, he says, signify in the Phœnician language, "watch, and abstain from evil." Potter also (*Gr. Ant.*, 346) says that the words were used in the Eleusinian mysteries.

The words occur in none of the old Greek lexicons, except that of Hesychius, where they are thus defined:

"Κόγξ ομπαξ. An acclamation used by those who have finished anything. It is also the sound of the judge's ballots and of the clepsydra. The Athenians used the word *blops*."

The words were always deemed inexplicable until 1797, when Captain Wilford offered, in the *Asiatic Researches* (vol. v., p. 300), the following explanation. He there says that the real words are *Candsha Om Pacsha;* that they are pure Sanskrit; and are used to this day by the Brahmans at the conclusion of their religious rites. *Candsha* signifies the object of our most ardent wishes. *Om* is the famous monosyllable used both at the beginning and conclusion of a prayer or religious rite, like our word Amen. *Pacsha* exactly answers to the obsolete Latin word *vix;* it signifies change, course, stead, place, turn of work, duty, fortune, etc., and is particularly used in pouring water in honor of the gods.

Uwaroff (*Ess. sur les Myst. d'Eleus.*) calls this "the most important of modern discoveries." Creuzer, Schelling, and Münter also approve of it.

Not so with Lobeck, who, in his *Aglaophamus* (p. 775), denies not only that such words were used in the Eleusinian mysteries, but the very existence of the words themselves. He says that in the title of the article in Hesychius there is a misprint. Instead of κόγξ δμπάξ, it should be κόγξ δμ. πάξ, where δμ is the usual abbreviation of δμοίως, like or similar to; so that the true reading would be κογξ δμοίως παξ, or *konx, like pax;* and he confirms this by referring to παξ, to which Hesychius gives the same meaning as he does to κογξ. This is too simple for Godfrey Higgins, who calls it (*Anacal.*, i., 253) "a pretended emendation." It is nevertheless very ingenious, and is calculated to shake our belief that these words were ever used in the Eleusinian Rites, notwithstanding the learned authority of Meursius, Warburton, Lempriere, Creuzer, Uwaroff, and others.

Korah. The son of Izhar, uncle of Moses, who was famed for beauty and wealth. It is related that he refused to give alms, as Moses had commanded, and brought a villainous charge against Moses, who complained thereof to God; the answer was that the earth would obey whatever command he should give; and Moses said, "O earth, swallow them up"; then Korah and his confederates were sinking into the ground, when Korah pleaded for mercy, which Moses refused. Then God said, "Moses, thou hadst no mercy on Korah, though he asked pardon of thee four times; but I would have had compassion on him if he

* Knights Templar is the form now adopted. [E. E. C.]

had asked pardon of me but once."—*Al Beidâwi.*

Koran. The sacred book of the Mohammedans, and believed by them to contain a record of the revelations made by God to Mohammed, and afterward dictated by him to an amanuensis, since the prophet could neither read nor write. In a Lodge consisting wholly of Mohammedans, the Koran would be esteemed as the Book of the Law, and take the place on the altar which is occupied in Christian Lodges by the Bible. It would thus become the symbol to them of the Tracing-Board of the Divine Architect. But, unlike the Old and New Testaments, the Koran has no connection with, and gives no support to, any of the Masonic legends or symbols, except in those parts which were plagiarized by the prophet from the Jewish and Christian Scriptures. Finch, however, in one of his apocryphal works, produced a system of Mohammedan Masonry, consisting of twelve degrees, founded on the teachings of the Koran, and the Hadeeses or traditions of the prophet. This system was a pure invention of Finch.

Krause, Carl Christian Friedrich. One of the most learned and laborious Masons of Germany, and one who received the smallest reward and the largest persecution for his learning and his labors. The record of his life reflects but little credit on his contemporaries who were high in office, but it would seem low in intellect. Findel (*Hist. of F. M.*, p. 628) calls them "the antiquated German Masonic world." Dr. Krause was born at Eisenberg, a small city of Altenberg, May 6, 1781. He was educated at Jena, where he enjoyed the instructions of Reinhold, Fichte, and Schelling. While making theology his chief study, he devoted his attention at the same time to philosophy and mathematics. In 1801, he obtained his degree as Doctor of Philosophy, and established himself at the University of Jena as an extraordinary professor. There he remained until 1805, marrying in the meantime a lady of the name of Fuchs, with whom he passed thirty years, leaving as the fruit of his union eight sons and five daughters.

In 1805, Krause removed to Dresden, and remained there until 1813. In April, 1805, he was initiated into Freemasonry in the Lodge "Archimedes." As soon as he had been initiated, he commenced the study of the Institution by the reading of every Masonic work that was accessible. It was at this time that Krause adopted his peculiar system of philosophy, which was founded on the theory that the collective life of man—that is to say, of humanity—was an organic and harmonious unity; and he conceived the scheme of a formal union of the whole race of mankind into one confederacy, embracing all partial unions of church organizations, of State government, and of private, social aggregations, into one general confederation, which should labor, irrespective of political, ecclesiastical, or personal influences, for the universal and uniform culture of mankind. Of such a confederation he supposed that he could see the germ in the Order of Freemasonry, which, therefore, it was his object to elevate to that position.

He first submitted these views in a series of lectures delivered before the Lodge "Zu den drei Schwertern" in Dresden, of which he had been appointed the Orator. They were received with much approbation, and were published in 1811 under the title of the *Spiritualization of the Genuine Symbols of Freemasonry.* In these lectures, Krause has not confined himself to the received rituals and accustomed interpretations, but has adopted a system of his own. This is the course that was pursued by him in his greater work, the *Kunsturkunden;* and it was this which partly gave so much offense to his Masonic, but not his intellectual, superiors. In 1810, he published, as the result of all his labors and researches, his greatest work, the one on which his reputation principally depends, and which, notwithstanding its errors, is perhaps one of the most learned works that ever issued from the Masonic press. This is *Die drei ältesten Kunsturkunden der Freimaurerbrüderschaft,* or "The Three Oldest Professional Documents of the Brotherhood of Freemasons."

The announcement that this work was shortly to appear, produced the greatest excitement in the Masonic circles of Germany. The progressive members of the Craft looked with anxious expectation for the new discoveries which must result from the investigations of an enlightened mind. The antiquated and unprogressive Masons, who were opposed to all discussion of what they deemed esoteric subjects, dreaded the effects of such a work on the exclusiveness of the Order. Hence attempts were made by these latter to suppress the publication. So far were these efforts carried, that one of the German Grand Lodges offered the author a large amount of money for his book, which proposal was of course rejected. After the publication, the Grand Master of the three Grand Lodges sought every means of excommunicating Krause and Mossdorf, who had sustained him in his views. After much angry discussion, the Dresden Lodge, "Zu den drei Schwertern," was prevailed upon to act as executioner of this ignorant spirit of fanaticism, and Krause and Mossdorf, two of the greatest lights that ever burst upon the horizon of Masonic literature, were excommunicated. Nor did the persecution here cease. Krause experienced its effects through all the remaining years of his life. He was prevented on frequent occasions, by the machinations of his Masonic enemies, from advancement in his literary and professional pursuits, and failed through their influence to obtain professorships to which, from his learning and services, he was justly entitled. Findel (p. 629) has approvingly quoted Dr. Schauberg as calling this "the darkest page in the history of German Freemasonry."

In 1814 Krause removed to Berlin. In 1821 he traveled through Germany, Italy, and France, and in 1823 established himself at Göttingen, where he gave lectures on philoso-

phy until 1830. He then removed to Munich, where he died September 27, 1832. Besides his contributions to Freemasonry, Krause was an extensive writer on philosophical subjects. His most important works are his *Lectures on the System of Philosophy*, 1828, and his *Lectures on the Fundamental Truths of Science*, 1829; both published at Göttingen.

His great work, however, to which he owes his Masonic fame, is his *Kunsturkunden*. He commences this work by a declaration of his design in writing it, which was twofold: first, to enlighten the brotherhood in reference to the three oldest documents in possession of the Craft, by a philological and philosophical examination of these records; and secondly, and with a higher purpose, to call their attention to a clear perception of the fundamental idea of a general union of mankind, to be accomplished by a reorganization of their own brotherhood. To the rituals of the present day he objected as wanting in scientific formula, and he thought that out of these old records they might well construct a better and more practical system.

But with all his learning, while his ideas of reform, if properly carried out, would undoubtedly advance and elevate the Masonic Institution, he committed grave errors in his estimation of the documents that he has made the groundwork of his system.

The three documents which he has presented as the oldest and most authentic records of the Fraternity are: 1. The well-known *Leland Manuscript*, a document of whose authenticity there are the gravest doubts; 2. The *Entered Apprentice's Lecture*, a document published early in the eighteenth century, to which, in his second edition, he has added what he calls the *New English Lecture;* but it is now known that Krause's Lecture is by no means the oldest catechism extant; and, 3. The *York Constitution*, which, claiming the date of 926, has been recently suspected to be not older than the early part of the eighteenth century.

Notwithstanding these assumptions of authenticity for documents not really authentic, the vast learning of the author is worthy of all admiration. His pages are filled with important facts and suggestive thoughts that cannot fail to exert an influence on all Masonic investigations. Krause cannot but be considered as one of the founders of a new Masonic literature, not for Germany alone, but for the whole world of Masonic students.

Krause Manuscript. A title sometimes given to the so-called York Constitutions, a German translation of which was published by Krause, in 1810, in his *Kunsturkunden*. (See *York Constitutions* and *Manuscripts, Apocryphal.*)

Krishna or **Christna.** One of the Trimurti in the Hindu religious system. The myth proceeds to state that Devanaguy, upon the appearance of Vishnu, fell in a profound ecstasy, and having been *overshadowed* (Sanskrit), the spirit was incarnated, and upon the birth of a child, the Virgin and Son were conducted to a sheepfold belonging to Nanda, on the confines of the territory of Madura. The newly born was named Krishna (in Sanskrit, sacred). The Rajah of Madura had been informed in a dream that this son of Devanaguy should dethrone and chastise him for all his crimes; he therefore sought the certain destruction of the child, and ordained the massacre, in all his states, of all the children of the male sex born during the night of the birth of Krishna. A troop of soldiers reached the sheepfold of Nanda, the lord of a small village on the banks of the Ganges, and celebrated for his virtues. The servants were about to arm in defense, when the child, who was at his mother's breast, suddenly grew to the appearance and size of a child ten years of age, and running, amused himself amidst the flock of sheep. The exploits of this wonder child, his preaching the new or reformed doctrine of India, his disciples and loved companion Ardjouna, the parables, philosophic teaching, the myth of his transfiguration, his ablutions in the Ganges before his death, and tragic end, together with the story of his revival after three days, and ascension, are graphically told by many authors, perhaps more brilliantly in *La Bible dans l'Inde*, as translated into English by Louis Jacolliot.

Kulma. The Hindustani Confession of Faith.

Kum, Kivi. These two words, pronounced *koom* and *keevy*, are found as ceremonial words in one of the high degrees. They are from the Hebrew, and are interpreted as meaning *arise!* and *kneel!* They are not significant words, having no symbolic allusion, and seem to have been introduced merely to mark the Jewish origin of the degree in which they are employed. In the modern rituals they are disused.

Kun. Arabic for *Be*, the creative fiat of God.

L

L. (Heb., ל; Samaritan, 𐤋.) The shape of the twelfth English letter is borrowed from that of the Oriental *lomad,* coinciding with the Samaritan. The numerical value in Hebrew is thirty. The Roman numeral L is fifty. Hebrew name of Deity, as an equivalent, is למד, Limmud, or Doctus. This letter also signifies a *stimulus,* generally female.

Laanah. (Heb., לענה.) Wormwood, a word used in the Order of Ishmael.

Labady. A member of the G. Loge de France, banished, in 1766, for alleged libel. An exile to Blois, in October, 1767, for permitting Masonic assemblies at his residence contrary to the orders of the government.

Labarum. The monogram of the name of Christ, formed by the first two letters of that name, ΧΡΙΣΤΟΣ, in Greek. It is the celebrated

sign which the legend says appeared in the sky at noonday to the Emperor Constantine, and which was afterward placed by him upon his standard. Hence it is sometimes called the Cross of Constantine. It was adopted as a symbol by the early Christians, and frequent instances of it are to be found in the catacombs. According to Eusebius, the Labarum was surrounded by the motto ΕΝ ΤΟΥΤΩ ΝΙΚΑ, or "conquer by this," which has been Latinized into *in hoc signo vinces,* the motto assumed by the Masonic Knights Templar. The derivation of the word Labarum is uncertain. (See *In hoc signo vinces.*)

Labor. It is one of the most beautiful features of the Masonic Institution, that it teaches not only the necessity, but the nobility of labor. From the time of opening to that of closing, a Lodge is said to be at labor. This is but one of the numerous instances in which the terms of Operative Masonry are symbolically applied to Speculative; for, as the Operative Masons were engaged in the building of material edifices, so Free and Accepted Masons are supposed to be employed in the erection of a superstructure of virtue and morality upon the foundation of the Masonic principles which they were taught at their admission into the Order. When the Lodge is engaged in reading petitions, hearing reports, debating financial matters, etc., it is said to be occupied in *business;* but when it is engaged in the form and ceremony of initiation into any of the degrees, it is said to be at *work.* Initiation is Masonic labor. This phraseology at once suggests the connection of our speculative system with an operative art that preceded it, and upon which it has been founded.

"Labor," says Gädicke, "is an important word in Masonry; indeed, we might say the most important. For this, and this alone, does a man become a Freemason. Every other object is secondary or incidental. Labor is the accustomed design of every Lodge meeting. But do such meetings always furnish evidence of industry? The labor of an Operative Mason will be visible, and he will receive his reward for it, even though the building he has constructed may, in the next hour, be overthrown by a tempest. He knows that he has done his labor. And so must the Freemason labor. His labor must be visible to himself and to his brethren, or, at least, it must conduce to his own internal satisfaction. As we build neither a visible Solomonic Temple nor an Egyptian pyramid, our industry must become visible in works that are imperishable, so that when we vanish from the eyes of mortals it may be said of us that our labor was well done." As Masons, we labor in our Lodge to make ourselves a perfect building, without blemish, working hopefully for the consummation, when the house of our earthly tabernacle shall be finished, when the LOST WORD of Divine truth shall at last be discovered, and when we shall be found by our own efforts at perfection to have done God service.

Laborare est orare. *To labor is to pray;* or, in other words, *labor is worship.* This was a saying of the Medieval monks, which is well worth meditation. This doctrine, that labor is worship, has been advanced and maintained, from time immemorial, as a leading dogma of the Order of Freemasonry. There is no other human institution under the sun which has set forth this great principle in such bold relief. We hear constantly of Freemasonry as an institution that inculcates morality, that fosters the social feeling, that teaches brotherly love; and all this is well, because it is true; but we must never forget that from its foundation-stone to its pinnacle, all over its vast temple, is inscribed, in symbols of living light, the great truth that *labor is worship.*

Laboratory. The place where experiments in chemistry, pharmacy, etc., are performed; the workroom of the chemist. An important apartment in the conferring of the degrees of the Society of Rosicrucians.

Laborers, Statutes of. Toward the middle of the fourteenth century, a plague of excessive virulence, known in history as the Black Death, invaded Europe, and swept off fully one-half of the inhabitants. The death of so many workmen had the effect of advancing the price of all kinds of labor to double the former rate. In England, the Parliament, in 1350, enacted a statute, which was soon followed by others, the object of which was to regulate the rate of wages and the price of the necessaries of life. Against these enactments, which were called the Statutes of Laborers, the artisans of all kinds rebelled; but the most active opposition was found among the Masons, whose organization, being better regulated, was more effective.* In 1360, statutes were passed forbidding their "congregations, chapters, regulations, and oaths," which were

* See *Freemason.*

from time to time repeated, until the third year of the reign of Henry VI., A. D. 1425, when the celebrated statute entitled "Masons shall not confederate themselves in chapters and congregations," was enacted in the following words:

"Whereas, by yearly congregations and confederacies, made by the Masons in their General Assemblies, the good course and effect of the Statutes for Laborers be openly violated and broken, in subversion of the law, and to the great damage of all the Commons, our said sovereign lord the king, willing in this case to provide a remedy, by the advice and assent aforesaid, and at the special request of the Commons, hath ordained and established that such chapters and congregations shall not be hereafter holden; and if any such be made, they that cause such chapters and congregations to be assembled and holden, if they thereof be convict, shall be judged for felons, and that the other Masons that come to such chapters and congregations be punished by imprisonment of their bodies, and make fine and ransom at the king's will."

[Findel (*Hist. of F. M.*, p. 94), following Preston, says that this Statute was passed in the Parliament of Bats; but this is erroneous, for the Act forbidding Masons to meet in Chapters or Congregations was passed in 1425 by the Parliament at Westminster, while the Parliament of Bats met at Leicester in the following year. (See *Bats, Parliament of.*)—E. L. H.]

All the Statutes of Laborers were repealed in the fifth year of Elizabeth; and Lord Coke gave the opinion that this act of Henry VI. became, in consequence, "of no force or effect"; a decision which led Anderson, very absurdly, to suppose that "this most learned judge really belonged to the ancient Lodge, and was a faithful brother" (*Constitutions*, 1723, p. 57); as if it required a judge to be a Mason to give a just judgment concerning the interests of Masonry.

Labrum. From the Latin. A lip or edge, as of a dish or font; having reference to the vase at the entrance of places of worship for preliminary lustration.

Labyrinth. A place full of intricacies, with winding passages, as the Egyptian, Samian, and Cretan labyrinths. That of the Egyptians was near Lake Moeris, which contained twelve palaces under one roof, and was of polished stone, with many vaulted passages, and a court of 3,000 chambers, half under the earth and half above them. Pliny states it was 3,600 years old in his day. The labyrinth is symbolical of the vicissitudes and anxieties of life, and is thus metaphorically used in a number of the degrees of various Rites. Sage of the Labyrinth is the eighteenth grade, Rite of Memphis, in the Order of 1860. Sage Sublime of Labyrinth, the fifty-fifth grade of the same organization. (See *Catacombs.*)

Lacepède, B. G. E. de la Ville. A French savant and naturalist, born in 1756, died 1825. President of the Legislative Assembly in 1791. Master of the Lodge "De St. Napoléon" in 1805. An account of his installation is recorded by Kloss.

Lacorne. The Count of Clermont, who was Grand Master of France, having abandoned all care of the French Lodges, left them to the direction of his Deputies. In 1761, he appointed one Lacorne, a dancing-master, his Deputy; but the Grand Lodge, indignant at the appointment, refused to sanction it or to recognize Lacorne as a presiding officer. He accordingly constituted another Grand Lodge, and was supported by adherents of his own character, who were designated by the more respectable Masons as the "Lacorne faction." In 1762, the Count of Clermont, influenced by the representations that were made to him, revoked the commission of Lacorne, and appointed M. Chaillou de Joinville his Substitute General. In consequence of this, the two rival Grand Lodges became reconciled, and a union was effected on the 24th of June, 1762. But the reconciliation did not prove altogether satisfactory. In 1765, at the annual election, neither Lacorne nor any of his associates were chosen to office. They became disgusted, and, retiring from the Grand Lodge, issued a scandalous protest, for which they were expelled; and subsequently they organized a spurious Grand Lodge and chartered several Lodges. But from this time Lacorne ceased to have a place in regular Masonry, although the dissensions first begun by him ultimately gave rise to the Grand Orient as the successor of the Grand Lodge.

Ladder. A symbol of progressive advancement from a lower to a higher sphere, which is common to Masonry and to many, if not all, of the Ancient Mysteries. In each, generally, as in Masonry, the number of steps was seven. (See *Jacob's Ladder.*)

Ladder, Brahmanical. The symbolic ladder used in the mysteries of Brahma. It had seven steps, symbolic of the seven worlds of the Indian universe. The lowest was the Earth; the second, the World of Reexistence; the third, Heaven; the fourth, the Middle World, or intermediate region between the lower and the upper worlds; the fifth, the World of Births, in which souls are born again; the sixth, the Mansion of the Blessed; and the seventh, or topmost round, the Sphere of Truth, the abode of Brahma, who was himself a symbol of the sun.

Ladder, Jacob's. See *Jacob's Ladder.*

Ladder, Kabbalistic. The ladder of the Kabbalists consisted of the ten Sephiroths or emanations of Deity. The steps were in an ascending series—the Kingdom, Foundation, Splendor, Firmness, Beauty, Justice, Mercy, Intelligence, Wisdom, and the Crown. This ladder formed the exception to the usual number of seven steps or rounds.

Ladder, Mithraitic. The symbolic ladder used in the Persian mysteries of Mithras. It had seven steps, symbolic of the seven planets and the seven metals. Thus, beginning at the bottom, we have Saturn represented by lead, Venus by tin, Jupiter by brass, Mercury

by iron, Mars by a mixed metal, the Moon by silver, and the Sun by gold; the whole being a symbol of the sidereal progress of the sun through the universe.

Ladder of Kadosh. This ladder, belonging to the high degrees of Masonry, consists of the seven following steps, beginning at the bottom: Justice, Equity, Kindliness, Good Faith, Labor, Patience, and Intelligence or Wisdom. Its supports are love of God and love of our neighbor, and their totality constitute a symbolism of the devoir of Knighthood and Masonry, the fulfilment of which is necessary to make a Perfect Knight and Perfect Mason.

Ladder, Rosicrucian. Among the symbols of the Rosicrucians is a ladder of seven steps standing on a globe of the earth, with an open Bible, square, and compasses resting on the top. Between each of the steps is one of the following letters, beginning from the bottom: I. N. R. I. F. S. C., being the initials of Iesus, Nazarenus, Rex, Iudæorum, Fides, Spes, Caritas. But a more recondite meaning is sometimes given to the first four letters.

Ladder, Scandinavian. The symbolic ladder used in the Gothic mysteries. Dr. Oliver refers it to the Yggrasil, or sacred ash-tree. But the symbolism is either very abstruse or very doubtful. It retains, however, the idea of an ascent from a lower to a higher sphere, which was common to all the mystical ladder systems. At its root lies the dragon of death; at its top are the eagle and hawk, the symbols of life.

Ladder, Theological. The symbolic ladder of the Masonic mysteries. It refers to the ladder seen by Jacob in his vision, and consists, like all symbolical ladders, of seven rounds, alluding to the four cardinal and the three theological virtues. (See *Jacob's Ladder.*)

Lady. In the androgynous Lodges of Adoption, where the male members are called Knights, the female members are called Ladies; as, the Knights and Ladies of the Rose. The French use the word *Dame.*

Lakak Deror Pessah. (Hebrew, דרור פסח לקח.) The initials of these three words are found on the symbol of the Bridge in the Fifteenth Degree of the Scottish Rite, signifying liberty of passage and liberty of thought. (See *Bridge,* also *Liber.*)

Lalande. See *De la Lande.*

Lamaism. The name of the religion prevalent in Tibet and Mongolia. (Tibet, Llama, pronounced *lama,* a chief or high priest.) Buddhism, corrupted by Sivaism, an adoration of saints. At the summit of its hierarchy are two Lama popes, having equal rank and authority in spiritual and temporal affairs.

Lamb. In ancient Craft Masonry the lamb is the symbol of innocence; thus in the ritual of the First Degree: "In all ages the lamb has been deemed an emblem of innocence." Hence it is required that a Mason's apron should be made of lambskin. In the high degrees, and in the degrees of chivalry, as in Christian iconography, the lamb is a symbol of Jesus Christ. The introduction of this Christian symbolism of the lamb comes from the expression of St. John the Baptist, who exclaimed, on seeing Jesus, "Behold the Lamb of God"; which was undoubtedly derived from the prophetic writers, who compare the Messiah suffering on the cross to a lamb under the knife of a butcher. In the vision of St. John, in the Apocalypse, Christ is seen, under the form of a lamb, wounded in the throat, and opening the book with the seven seals. Hence, in one of the degrees of the Scottish Rite, the Seventeenth, or Knight of the East and West, the lamb lying on the book with the seven seals is a part of the jewel.

Lamb of God. See *Lamb, Paschal.*

Lamb, Paschal. The paschal lamb, sometimes called the Holy Lamb, was the lamb offered up by the Jews at the paschal feast. This has been transferred to Christian symbolism, and naturally to chivalric Masonry; and hence we find it among the symbols of modern Templarism. The paschal lamb, as a Christian and Masonic symbol, called also the *Agnus Dei,* or the Lamb of God, first appeared in Christian art after the sixth century. It is depicted as a lamb standing on the ground, holding by the left forefoot a banner, on which a cross is inscribed. This paschal lamb, or Lamb of God, has been adopted as a symbol by the Knights Templar, being borne in one of the banners of the Order, and constituting, with the square which it surmounts, the jewel of the Generalissimo of a Commandery. The lamb is a symbol of Christ; the cross, of his passion; and the banner, of his victory over death and hell. Mr. Barrington states (*Archæologia,* ix., 134) that in a deed of the English Knights Templar, granting lands in Cambridgeshire, the seal is a Holy Land, and the arms of the Master of the Temple at London were argent, a cross gules, and on the nombril point thereof a Holy Lamb, that is, a paschal or Holy Lamb on the center of a red cross in a white field.

Lamballe, The Princess of. Niece of Marie Antoinette, murdered in 1792 at Paris. The Grand Mistress of the so-called Mother Lodge of "La Maçonnerie d'Adoption."

Lambskin Apron. See *Apron.*

Lamma Sabactani. An expression used in the Masonic French Rite of Adoption.

Lamp, Knight of the Inextinguishable. A degree quoted in the nomenclature of Fustier. (Thory, *Acta Lat.,* i., 320.)

Lance. A weapon for thrusting at an enemy, usually adorned with a small flag, made of tough ash, weighted at one end and pointed at the other.

Landmarks. In ancient times, it was the custom to mark the boundaries of lands by means of stone pillars, the removal of which, by malicious persons, would be the occasion of much confusion, men having no other guide than these pillars by which to distinguish the limits of their property. To remove them, therefore, was considered a heinous crime. "Thou shalt not," says the Jewish law, "remove thy neighbor's landmark, which they of

old time have set in thine inheritance." Hence those peculiar marks of distinction by which we are separated from the profane world, and by which we are enabled to designate our inheritance as the "sons of light," are called the landmarks of the Order. The *universal language* and the *universal laws* of Masonry are landmarks, but not so are the local ceremonies, laws, and usages, which vary in different countries. To attempt to alter or remove these sacred landmarks, by which we examine and prove a brother's claims to share in our privileges, is one of the most heinous offenses that a Mason can commit.

In the decision of the question what are and what are not the landmarks of Masonry, there has been much diversity of opinion among writers. Dr. Oliver says (*Dict. Symb. Mas.*) that "some restrict them to the O. B. signs, tokens, and words. Others include the ceremonies of initiation, passing, and raising; and the form, dimensions, and support; the ground, situation, and covering; the ornaments, furniture, and jewels of a Lodge, or their characteristic symbols. Some think that the Order has no landmarks beyond its peculiar secrets." But all of these are loose and unsatisfactory definitions, excluding things that are essential, and admitting others that are unessential.

Perhaps the safest method is to restrict them to those ancient, and therefore universal, customs of the Order, which either gradually grew into operation as rules of action, or, if at once enacted by any competent authority, were enacted at a period so remote, that no account of their origin is to be found in the records of history. Both the enactors and the time of the enactment have passed away from the record, and the landmarks are therefore "of higher antiquity than memory or history can reach."

The first requisite, therefore, of a custom or rule of action to constitute it a *landmark*, is, that it must have existed from "time whereof the memory of man runneth not to the contrary." Its antiquity is its essential element. Were it possible for all the Masonic authorities at the present day to unite in a universal congress, and with the most perfect unanimity to adopt any new regulation, although such regulation would, so long as it remained unrepealed, be obligatory on the whole Craft, yet it would not be a landmark. It would have the character of universality, it is true, but it would be wanting in that of antiquity.

Another peculiarity of these landmarks of Masonry is, that they are unrepealable. As the congress to which I have just alluded would not have the power to enact a landmark, so neither would it have the prerogative of abolishing one. The landmarks of the Order, like the laws of the Medes and the Persians, can suffer no change. What they were centuries ago, they still remain, and must so continue in force until Masonry itself shall cease to exist.

Until the year 1858, no attempt had been made by any Masonic writer to distinctly enumerate the landmarks of Freemasonry, and to give to them a comprehensible form. In October of that year, the author of this work published in the *American Quarterly Review of Freemasonry* (vol. ii., p. 230) an article on "The Foundations of Masonic Law," which contained a distinct enumeration of the landmarks, which was the first time that such a list had been presented to the Fraternity. This enumeration was subsequently incorporated by the author in his *Text Book of Masonic Jurisprudence*. It has since been very generally adopted by the Fraternity and republished by many writers on Masonic law; sometimes without any acknowledgment of the source whence they derived their information. According to this recapitulation, the result of much labor and research, the landmarks are twenty-five in number, and are as follows:

1. The modes of recognition are, of all the landmarks, the most legitimate and unquestioned. They admit of no variation; and if ever they have suffered alteration or addition, the evil of such a violation of the ancient law has always made itself subsequently manifest.

2. The division of symbolic Masonry into three degrees is a landmark that has been better preserved than almost any other; although even here the mischievous spirit of innovation has left its traces, and, by the disruption of its concluding portion from the Third Degree, a want of uniformity has been created in respect to the final teaching of the Master's Order; and the Royal Arch of England, Scotland, Ireland, and America, and the "high degrees" of France and Germany, are all made to differ in the mode in which they lead the neophyte to the great consummation of all symbolic Masonry. In 1813, the Grand Lodge of England vindicated the ancient landmark, by solemnly enacting that ancient Craft Masonry consisted of the three degrees of Entered Apprentice, Fellow-Craft, and Master Mason, including the Holy Royal Arch. But the disruption has never been healed, and the landmark, although acknowledged in its integrity by all, still continues to be violated.

3. The legend of the Third Degree is an important landmark, the integrity of which has been well preserved. There is no Rite of Masonry, practised in any country or language, in which the essential elements of this legend are not taught. The lectures may vary, and indeed are constantly changing, but the legend has ever remained substantially the same. And it is necessary that it should be so, for the legend of the Temple Builder constitutes the very essence and identity of Masonry. Any Rite which should exclude it, or materially alter it, would at once, by that exclusion or alteration, cease to be a Masonic Rite.

4. The government of the Fraternity by a presiding officer called a *Grand Master*, who is elected from the body of the Craft, is a fourth landmark of the Order. Many persons suppose that the election of the Grand Master is held in consequence of a law or regulation of

the Grand Lodge. Such, however, is not the case. The office is indebted for its existence to a landmark of the Order. Grand Masters, or persons performing the functions under a different but equivalent title, are to be found in the records of the Institution long before Grand Lodges were established; and if the present system of legislative government by Grand Lodges were to be abolished, a Grand Master would still be necessary.

5. The prerogative of the Grand Master to preside over every assembly of the Craft, wheresoever and whensoever held, is a fifth landmark. It is in consequence of this law, derived from ancient usage, and not from any special enactment, that the Grand Master assumes the chair, or as it is called in England, "the throne," at every communication of the Grand Lodge; and that he is also entitled to preside at the communication of every subordinate Lodge, where he may happen to be present.

6. The prerogative of the Grand Master to grant dispensations for conferring degrees at irregular times, is another and a very important landmark. The statutory law of Masonry requires a month, or other determinate period, to elapse between the presentation of a petition and the election of a candidate. But the Grand Master has the power to set aside or dispense with this probation, and to allow a candidate to be initiated at once. This prerogative he possessed before the enactment of the law requiring a probation, and as no statute can impair his prerogative, he still retains the power.

7. The prerogative of the Grand Master to give dispensations for opening and holding Lodges is another landmark. He may grant, in virtue of this, to a sufficient number of Masons, the privilege of meeting together and conferring degrees. The Lodges thus established are called "Lodges under dispensation." (See *Lodges.*)

8. The prerogative of the Grand Master to make Masons at sight is a landmark which is closely connected with the preceding one. There has been much misapprehension in relation to this landmark, which misapprehension has sometimes led to a denial of its existence in jurisdictions where the Grand Master was, perhaps, at the very time substantially exercising the prerogative, without the slightest remark or opposition. (See *Sight, Making Masons at.*)

9. The necessity for Masons to congregate in Lodges is another landmark. It is not to be understood by this that any ancient landmark has directed that permanent organization of subordinate Lodges which constitutes one of the features of the Masonic system as it now prevails. But the landmarks of the Order always prescribed that Masons should, from time to time, congregate together for the purpose of either Operative or Speculative labor, and that these congregations should be called Lodges. Formerly, these were extemporary meetings called together for special purposes, and then dissolved, the brethren departing to meet again at other times and other places, according to the necessity of circumstances. But Warrants of Constitution, by-laws, permanent officers, and annual arrears are modern innovations wholly outside the landmarks, and dependent entirely on the special enactments of a comparatively recent period.

10. The government of the Craft, when so congregated in a Lodge, by a Master and two Wardens, is also a landmark. A congregation of Masons meeting together under any other government, as that, for instance, of a president and vice-president, or a chairman and subchairman, would not be recognized as a Lodge. The presence of a Master and two Wardens is as essential to the valid organization of a Lodge as a Warrant of constitution is at the present day. The names, of course, vary in different languages; but the officers, their number, prerogatives, and duties are everywhere identical.

11. The necessity that every Lodge, when congregated, should be duly tiled, is an important landmark of the Institution which is never neglected. The necessity of this law arises from the esoteric character of Masonry. The duty of guarding the door, and keeping off cowans and eavesdroppers, is an ancient one, which therefore constitutes a landmark.

12. The right of every Mason to be represented in all general meetings of the Craft, and to instruct his representatives, is a twelfth landmark. Formerly, these general meetings, which were usually held once a year, were called "General Assemblies," and all the Fraternity, even to the youngest Entered Apprentice, were permitted to be present. Now they are called "Grand Lodges," and only the Masters and Wardens of the subordinate Lodges are summoned. But this is simply as the representatives of their members. Originally, each Mason represented himself; now he is represented by his officers. (See *Representatives of Lodges.*)

13. The right of every Mason to appeal from the decision of his brethren, in Lodge convened, to the Grand Lodge or General Assembly of Masons, is a landmark highly essential to the preservation of justice, and the prevention of oppression. A few modern Grand Lodges, in adopting a regulation that the decision of subordinate Lodges, in cases of expulsion, cannot be wholly set aside upon an appeal, have violated this unquestioned landmark, as well as the principles of just government.

14. The right of every Mason to visit and sit in every regular Lodge is an unquestionable landmark of the Order. This is called "the right of visitation." This right of visitation has always been recognized as an inherent right which inures to every Mason as he travels through the world. And this is because Lodges are justly considered as only divisions for convenience of the universal Masonic family. This right may, of course, be impaired or forfeited on special occasions by various circumstances; but when admission is refused to a Mason in good standing,

who knocks at the door of a Lodge as a visitor, it is to be expected that some good and sufficient reason shall be furnished for this violation of what is, in general, a Masonic right, founded on the landmarks of the Order.

15. It is a landmark of the Order, that no visitor unknown to the brethren present, or to some one of them as a Mason, can enter a Lodge without first passing an examination according to ancient usage. Of course, if the visitor is known to any brother present to be a Mason in good standing, and if that brother will vouch for his qualifications, the examination may be dispensed with, as the landmark refers only to the cases of strangers, who are not to be recognized unless after strict trial, due examination, or lawful information.

16. No Lodge can interfere in the business of another Lodge, nor give degrees to brethren who are members of other Lodges. This is undoubtedly an ancient landmark, founded on the great principles of courtesy and fraternal kindness, which are at the very foundation of our Institution. It has been repeatedly recognized by subsequent statutory enactments of all Grand Lodges.

17. It is a landmark that every Freemason is amenable to the laws and regulations of the Masonic jurisdiction in which he resides, and this although he may not be a member of any Lodge. Non-affiliation, which is, in fact, in itself a Masonic offense, does not exempt a Mason from Masonic jurisdiction.

18. Certain qualifications of candidates for initiation are derived from a landmark of the Order. These qualifications are that he shall be a man—unmutilated, free born, and of mature age. That is to say, a woman, a cripple, or a slave, or one born in slavery, is disqualified for initiation into the Rites of Masonry. Statutes, it is true, have from time to time been enacted, enforcing or explaining these principles; but the qualifications really arise from the very nature of the Masonic Institution, and from its symbolic teachings, and have always existed as landmarks.

19. A belief in the existence of God as the Grand Architect of the Universe, is one of the most important landmarks of the Order. It has been always admitted that a denial of the existence of a Supreme and Superintending Power is an absolute disqualification for initiation. The annals of the Order never yet have furnished or could furnish an instance in which an avowed Atheist was ever made a Mason. The very initiatory ceremonies of the First Degree forbid and prevent the possibility of such an occurrence.

20. Subsidiary to this belief in God, as a landmark of the Order, is the belief in a resurrection to a future life. This landmark is not so positively impressed on the candidate by exact words as the preceding; but the doctrine is taught by very plain implication, and runs through the whole symbolism of the Order. To believe in Masonry, and not to believe in a resurrection, would be an absurd anomaly, which could only be excused by the reflection, that he who thus confounded his belief and his skepticism was so ignorant of the meaning of both theories as to have no rational foundation for his knowledge of either.

21. It is a landmark that a "Book of the Law" shall constitute an indispensable part of the furniture of every Lodge. I say, advisedly, *Book of the Law*, because it is not absolutely required that everywhere the Old and New Testaments shall be used. The "Book of the Law" is that volume which, by the religion of the country, is believed to contain the revealed will of the Grand Architect of the Universe. Hence, in all Lodges in Christian countries, the "Book of the Law" is composed of the Old and New Testaments; in a country where Judaism was the prevailing faith, the Old Testament alone would be sufficient; and in Mohammedan countries, and among Mohammedan Masons, the Koran might be substituted. Masonry does not attempt to interfere with the peculiar religious faith of its disciples, except so far as relates to the belief in the existence of God, and what necessarily results from that belief. The "Book of the Law" is to the Speculative Mason his spiritual trestle-board; without this he cannot labor; whatever he believes to be the revealed will of the Grand Architect constitutes for him this spiritual trestle-board, and must ever be before him in his hours of speculative labor, to be the rule and guide of his conduct. The landmark, therefore, requires that a "Book of the Law," a religious code of some kind, purporting to be an exemplar of the revealed will of God, shall form an essential part of the furniture of every Lodge.

22. The equality of all Masons is another landmark of the Order. This equality has no reference to any subversion of those gradations of rank which have been instituted by the usages of society. The monarch, the nobleman, or the gentleman is entitled to all the influence, and receives all the respect, which rightly belong to his position. But the doctrine of Masonic equality implies that, as children of one great Father, we meet in the Lodge upon the level—that on that level we are all traveling to one predestined goal—that in the Lodge genuine merit shall receive more respect than boundless wealth, and that virtue and knowledge alone should be the basis of all Masonic honors, and be rewarded with preferment. When the labors of the Lodge are over, and the brethren have retired from their peaceful retreat, to mingle once more with the world, each will then again resume that social position, and exercise the privileges of that rank, to which the customs of society entitle him.

23. The secrecy of the Institution is another and most important landmark. The form of secrecy is a form inherent in it, existing with it from its very foundation, and secured to it by its ancient landmarks. If divested of its secret character, it would lose its identity, and would cease to be Freemasonry. Whatever objections may, therefore, be made to the Institution on account of its secrecy, and however much some unskilful brethren have been

unwilling in times of trial, for the sake of expediency, to divest it of its secret character, it will be ever impossible to do so, even were the landmark not standing before us as an insurmountable obstacle; because such change of its character would be social suicide, and the death of the Order would follow its legalized exposure. Freemasonry, as a secret association, has lived unchanged for centuries; as an open society, it would not last for as many years.

24. The foundation of a speculative science upon an operative art, and the symbolic use and explanation of the terms of that art, for the purposes of religious or moral teaching, constitute another landmark of the Order. The Temple of Solomon was the symbolic cradle of the Institution, and, therefore, the reference to the Operative Masonry which constructed that magnificent edifice, to the materials and implements which were employed in its construction, and to the artists who were engaged in the building, are all component and essential parts of the body of Freemasonry, which could not be subtracted from it without an entire destruction of the whole identity of the Order. Hence, all the comparatively modern rites of Masonry, however they may differ in other respects, religiously preserve this Temple history and these operative elements, as the substratum of all their modifications of the Masonic system.

25. The last and crowning landmark of all is, that these landmarks can never be changed. Nothing can be subtracted from them—nothing can be added to them—not the slightest modification can be made in them. As they were received from our predecessors, we are bound by the most solemn obligations of duty to transmit them to our successors.

Langes, Savalette de. The Master of "Les Amis Réunis," who aided in founding the system of Philalethes in 1775.

Language, Universal. The invention of a universal language, which men of all nations could understand and through which they could communicate their thoughts, has always been one of the Utopian dreams of certain philologists. In the seventeenth century, Dalgarno had written his *Ars Signorum* to prove the possibility of a universal character and a philosophical language. About the same time Bishop Wilkins published his *Essay towards a Real Character and a Philosophical Language;* and even the mathematical Leibnitz entertained the project of a universal language for all the world. It is not, therefore, surprising, that when the so-called Leland Manuscript stated that the Masons concealed a "universelle longage," Mr. Locke, or whoever was the commentator on that document, should have been attracted by the statement. "A universal language," he says, "has been much desired by the learned of many ages. It is a thing rather to be wished than hoped for. But it seems the Masons pretend to have such a thing among them. If it be true, I guess it must be something like the language of the Pantomimes among the ancient Romans, who are said to be able, by signs only, to express and deliver any oration intelligibly to men of all nations and languages."

The "guess" of the commentator was near the truth. A universal language founded on words is utterly impracticable. Even if once inaugurated by common consent, a thing itself impossible, the lapse of but a few years, and the continual innovation of new phrases, would soon destroy its universality. But there are signs and symbols which, by tacit consent, have always been recognized as the exponents of certain ideas, and these are everywhere understood. It is well known that such a system exists over the vast territory occupied by the North American savages, and that the Indians of two tribes, which totally differ in language, meeting on the prairie or in the forest, are enabled, by conventual signs of universal agreement, to hold long and intelligible intercourse. On such a basis the "universal language" of Freemasonry is founded. It is not universal to the world, but it is to the Craft; and a Mason of one country and language meeting a Mason of another can make himself understood for all practical purposes of the Craft, simply because the system of signs and symbols has been so perfected that in every language they convey the same meaning and make the same impression. This, and this only, is the extent to which the universal language of Masonry reaches. It would be an error to suppose that it meets the expectations of Dalgarno or Wilkins, or any other dreamer, and that it is so perfect as to supersede the necessity of any other method of intercommunication.

Lansdowne MS. This version of the *Old Charges* is of very early date, about the middle or latter half of the sixteenth century, as these *Free Masons Orders and Constitutions* are believed to have been part of the collection made by Lord Burghley (Sec. of State, *temp.* Edward VI.), who died A.D. 1598.

Bro. Gould, in his *History* (vol. i., p. 61), says the "MS. is contained on the inner side of three sheets and a half of stout paper, eleven by fifteen inches, making in all seven folios, many of the principal words being in large letters of an ornamental character. Mr. Sims (MS. Department of the British Museum) does not consider these 'Orders' ever formed a roll, though there are indications of the sheets having been stitched together at the top, and paper or vellum was used for additional protection. It has evidently 'seen service.' It was published in *Freemasons' Mag.*, February 24, 1858, and Hughan's *Old Charges* (p. 31), and since in facsimile by the Quatuor Coronati Lodge. The catalogue of the Lansdowne MSS.—which consisted of twelve hundred and forty-five volumes, bought by Parliament, in 1807, for £4925—has the following note on the contents of this document:

'No. 48. A very foolish legendary account of the original of the Order of Freemasonry'—in the handwriting, it is said, of Sir Henry Ellis."

Lanturelus, Ordre des. Instituted, according to Clavel, in 1771, by the Marquis de Croismare. Its purposes or objects are not now understood.

Lapicida. A word sometimes used in Masonic documents to denote a Freemason. It is derived from *lapis*, a stone, and *cædo*, to cut, and is employed by Varro and Livy to signify "a stone-cutter." But in the low Latin of the Medieval age it took another meaning; and Du Cange defines it in his *Glossarium* as "Ædeficiorum structor; Gall. Maçon," i. e., "A builder of edifices; in French, a Mason"; and he quotes two authorities of 1304 and 1392, where *lapicidæ* evidently means *builders*. In the *Vocabularium* of Ugutio, Anno 1592, *Lapicedius* is defined "a cutter of stones." The Latin word now more commonly used by Masonic writers for *Freemason* is *Latomus;* but *Lapicida* is purer Latin. (See *Latomus*.)

Larmenius, Johannes Marcus. According to the tradition of the Order of the Temple—the credibility of which is, however, denied by most Masonic scholars—John Mark Larmenius was in 1314 appointed by James de Molay his successor as Grand Master of the Templars, which power was transmitted by Larmenius to his successors, in a document known as the "Charter of Transmission." (See *Temple, Order of the.*)

La Rochefoucault, Bayers, Le Marquis de. G. Master of the "Rite Ecossais Philosophique" in 1776. A Mason of considerable note.

Larudan, Abbe. The author of a work entitled *Les Franc-Maçons ecrasés. Suite du livre intitule l'Ordre des Franc-Maçons trahi, traduit du Latin.* The first edition was published at Amsterdam in 1746. In calling it the sequel of *L'Ordre des Franc-Maçons trahi*, by the Abbé Perau, Larudan has sought to attribute the authorship of his own libelous work to Perau, but without success, as the internal evidence of style and of tone sufficiently distinguishes the two works. Kloss says (*Bibliog.*, No. 1874) that this work is the armory from which all subsequent enemies of Masonry have derived their weapons. Larudan was the first to broach the theory that Oliver Cromwell was the inventor of Freemasonry.

Lasalle, Troubat de. One of the founders of the Mother Lodge of the "Rite Ecossais Philosophique."

Lateran Councils. They were five in number, regarded as ecumenical, and were held in the Church of St. John Lateran in Rome, in 1123, 1139, 1179, 1215, and 1512.

Latin Lodge. In the year 1785, the Grand Lodge of Scotland granted a Warrant for the establishment of Roman Eagle Lodge at Edinburgh; the whole of whose work was conducted in the Latin language. Of this Lodge, the celebrated and learned Dr. John Brown was the founder and Master. He had himself translated the ritual into the classical language of Rome, and the minutes were written in Latin. (Lyon's *Hist. of the Lodge of Edinburgh*, p. 257.) The Lodge is No. 160 on the Scotch Roll, but ceased to work in Latin in 1794.

Latomia. This word has sometimes been used in modern Masonic documents as the Latin translation of the word *Lodge*, with what correctness we will see. The Greek λατομεῖον, *latomeion* (or λατομία), from the roots *laas*, a stone, and *temno*, to cut, meant a place where stones were cut, a quarry. From this the Romans got their word *latomiæ*, more usually spelled *lautumiæ*, which also, in pure Latinity, meant a stone-quarry. But as slaves were confined and made to work in the quarries by way of punishment, the name was given to any prison excavated out of the living rock and below the surface of the earth, and was especially so applied to the prison excavated by Servius Tullius under the Capitoline hill at Rome, and to the state prison at Syracuse. Both λατομία and *lautumiæ* are seldom used by ancient writers in their primary sense of "a stone-quarry," but both are used in the secondary sense of "a prison," and therefore "Latomia" cannot be considered a good equivalent for "Lodge."

Latomus. By Masonic writers used as a translation of *Freemason* into Latin; thus, Thory entitles his valuable work, *Acta Latomorum*, i. e., "Transactions of the Freemasons." This word was not used in classical Latinity. In the low Latin of the Middle Ages it was used as equivalent to *lapicida*. Du Cange defines it, in the form of *lathomus*, as a cutter of stones, "Cæsor lapidum." He gives an example from one of the ecclesiastical Constitutions, where we find the expression "carpentarii ac Latomi," which may mean *Carpenters and Masons* or *Carpenters and Stone-Cutters*. Du Cange also gives Latomus as one of the definitions of *Maçonetus*, which he derives from the French *Maçon*. But Maçonetus and Latomus could not have had precisely the same meaning, for in one of the examples cited by Du Cange, we have "Joanne de Bareno, Maçoneto, Latonio de Gratianopolis," i. e., "John de Bareno, Mason and Stone-Cutter (?) of Grenoble." Latomus is here evidently an addition to Maçonetus, showing two different kinds of occupation. We have abundant evidence in Medieval documents that a Maçonetus was a builder, and a Latomus was most probably an inferior order, what the Masonic Constitutions call a "rough Mason." The propriety of applying it to a Freemason seems doubtful. The word is sometimes found as *Lathomus* and *Latonius*.

Latour d'Auvergne, Le Prince de. President of the Mother Lodge of the "Rite Ecossais Philosophique" in 1805, and member of the Grand Orient of France in 1814.

Latres. This word has given much unnecessary trouble to the commentators on the old Records of Masonry. In the legend of the Craft contained in all the old *Constitutions*,

we are informed that the children of Lamech "knew that God would take vengeance for sinne, either by fire or water, wherefore they did write these sciences that they had found in twoe pillars of stone, that they might be found after that God had taken vengeance; the one was of marble and would not burne, the other was *Latres* and would not drowne in water." (Harleian MS. No. 1942.) It is the Latin word *later*, a brick. The legend is derived from Josephus (*Antiq.*, I., ii.), where the same story is told. Whiston properly translates the passage, "they made two pillars; the one of brick, the other of stone." The original Greek is πλίνθος, which has the same meaning. The word is variously corrupted in the manuscripts. Thus the Harleian MS. has *latres*, which comes nearest to the correct Latin plural *lateres;* the Cooke MS. has *lacerus;* the Dowland, *laterns;* the Lansdowne, *latherne;* and the Sloane MS., No. 3848, getting furthest from the truth, has *letera*. It is strange that Halliwell (*Early Hist. of F. M. in England*, 2d ed., p. 8) should have been ignorant of the true meaning, and that Hy. Phillips (*Freemasons' Quarterly Review*, 1836, p. 289) in commenting on the Harleian MS., should have supposed that it alluded "to some floating substance." The Latin word *later* and the passage in Josephus ought readily to have led to an explication.

Laurel Crown. A decoration used in some of the higher degrees of the Ancient and Accepted Scottish Rite. The laurel is an emblem of victory; and the *corona triumphalis* of the Romans, which was given to generals who had gained a triumph by their conquests, was made of laurel leaves. The laurel crown in Masonry is given to him who has made a conquest over his passions.

Laurens, J. L. A French Masonic writer, and the author of an *Essai historique et critique sur la Franche-Maçonnerie*, published at Paris in 1805. In this work he gives a critical examination of the principal works that have treated of the Institution. It contains also a refutation of the imputations of anti-Masonic writers. In 1808 he edited an edition of the *Vocabulaire des Franc-Maçons*, the first edition of which had been issued in 1805. In 1825 was published a *Histoire des Initiations de l'ancienne Egypt* with an essay by Laurens on the origin and aim of the Ancient Mysteries. (Kloss, *Bibliographie*, No. 3871.)

Laurie. See *Lawrie, Alexander*.

Laver, Brazen. A large brazen vessel for washing placed in the court of the Jewish tabernacle, where the officiating priest cleansed his hands and feet, and as well the entrails of victims. Constructed by command of Moses (Exod. xxxviii. 8). A similar vessel was symbolically used at the entrance, in the modern French and Scotch Rites, when conferring the Apprentice Degree. It is used in many of the degrees of the latter Rite.

Law, Moral. See *Moral Law*.

Law, Oral. See *Oral Law*.

Law, Parliamentary. See *Parliamentary Law*.

Law, Sacred. The Sacred Scriptures, the Bible, the Great Light in Masonry.

Lawful Information. See *Information, Lawful*.

Lawrie, Alexander. He was originally a stocking-weaver, and afterward became a bookseller and stationer in Parliament Square, Edinburgh, and printer of the *Edinburgh Gazette*. He was appointed bookseller and stationer to the Grand Lodge of Scotland, and afterward Grand Secretary. In 1804 he published a book entitled *The History of Freemasonry, drawn from authentic sources of information; with an Account of the Grand Lodge of Scotland, from its Institution in 1736 to the present time, compiled from the Records; and an Appendix of Original Papers*. Of this valuable and interesting work, Lawrie was at one time deemed the author, notwithstanding that the learning exhibited in the first part, and the numerous references to Greek and Latin authorities, furnished abundant internal evidence of his incapacity, from previous education, to have written it. The doubt which naturally arises, whether he was really the author, derives great support from the testimony of the late Dr. David Irving, Librarian to the Faculty of Advocates, Edinburgh. A writer in the *Notes and Queries* (3d Ser., iii., 366), on May 9, 1863, stated that at the sale of the library of Dr. Irving, on Saturday, March 28, 1862, a copy of Lawrie's *History of Freemasonry* was sold for £1. In that copy there was the following memorandum in the handwriting of Dr. Irving:

"The history of this book is somewhat curious, and perhaps there are only two individuals now living by whom it could be divulged. The late Alexander Lawrie, 'Grand Stationer,' wished to recommend himself to the Fraternity by the publication of such a work. Through Dr. Anderson, he requested me to undertake its compilation, and offered a suitable remuneration. As I did not relish the task, he made a similar offer to my old acquaintance David Brewster, by whom it was readily undertaken, and I can say was executed to the entire satisfaction of his employers. The title-page does not exhibit the name of the author, but the dedication bears the signature of *Alexander Lawrie*, and the volume is commonly described as Lawrie's *History of Freemasonry*."

There can be no doubt of the truth of this statement. It has never been unusual for publishers to avail themselves of the labors of literary men and affix their own names to books which they have written by proxy. Besides, the familiarity with abstruse learning that this work exhibits, although totally irreconcilable with the attainments of the stocking-weaver, can readily be assigned to Sir David Brewster the philosopher. (See Lyon's *Hist. of the Lodge of Edinburgh*, p. 55.)

Lawrie had a son, William Alexander Laurie (he had thus, for some unknown reason, changed the spelling of his name), who was for very many years the Grand Secretary of the

Grand Lodge of Scotland, and died in office in 1870, highly esteemed. In 1859 he published a new edition of the *History*, with many additions, under the title of *The History of Freemasonry and the Grand Lodge of Scotland, with chapters on the Knights Templar, Knights of St. John, Mark Masonry, and the R. A. Degree.*

Law, Sacred. See *Sacred Law.*

Laws, General. See *Laws of Masonry.*

Laws, Local. See *Laws of Masonry.*

Laws of Masonry. The laws of Masonry, or those rules of action by which the Institution is governed, are very properly divided into three classes: 1. Landmarks. 2. General Laws or Regulations. 3. Local Laws or Regulations.

1. *Landmarks.* These are the unwritten laws of the Order, derived from those ancient and universal customs which date at so remote a period that we have no record of their origin.

2. *General Laws.* These are all those Regulations that have been enacted by such bodies as had at the time universal jurisdiction. They operate, therefore, over the Craft wheresoever dispersed; and as the paramount bodies which enacted them have long ceased to exist, it would seem that they are unrepealable. It is generally agreed that these General or Universal Laws are to be found in the old Constitutions and Charges, so far as they were recognized and accepted by the Grand Lodge of England at the revival in 1717, and adopted previous to the year 1721.

3. *Local Laws.* These are the Regulations which, since 1721, have been and continue to be enacted by Grand Lodges. They are of force only in those jurisdictions which have adopted them, and are repealable by the bodies which have enacted them. They must, to be valid, be not repugnant to the Landmarks or the General Laws, which are of paramount authority.

Lawsuits. In the Old Charges which were approved in 1722, and published in 1723, by Anderson, in the *Book of Constitutions*, the regulations as to lawsuits are thus laid down: "And if any of them do you injury, you must apply to your own or his Lodge, and from thence you may appeal to the Grand Lodge, at the Quarterly Communication, and from thence to the Annual Grand Lodge, as has been the ancient laudable conduct of our forefathers in every nation; never taking a legal course but when the case cannot be otherwise decided, and patiently listening to the honest and friendly advice of Master and Fellows, when they would prevent you going to law with strangers, or would excite you to put a speedy period to all lawsuits, that so you may mind the affair of Masonry with the more alacrity and success; but with respect to Brothers or Fellows at law, the Master and Brethren should kindly offer their mediation, which ought to be thankfully submitted to by the contending brethren; and if that submission is impracticable, they must, however, carry on their process or lawsuit without wrath and rancor, (not in the common way,) saying or doing nothing which may hinder brotherly love and good offices to be renewed and continued; that all may see the benign influence of Masonry, as all true Masons have done from the beginning of the world, and will do to the end of time." (*Constitutions*, 1723, p. 56.)

Lax Observance. (*Observantia Lata.*) When the Rite of Strict Observance was instituted in Germany by Von Hund, its disciples gave to all the other German Lodges which refused to submit to its obedience and adopt its innovations, but preferred to remain faithful to the English Rite, the title of "Lodges of Lax Observance." Ragon, in his *Orthodoxie Maçonnique* (p. 236), has committed the unaccountable error of calling it a schism, established at Vienna in 1767; thus evidently confounding it with Starck's Rite of the Clerks of Strict Observance.

Lay Brothers. A society founded in the eleventh century, consisting of two classes, who were skilled in architecture; also recognized as a degree in the Rite of Strict Observance.

Layer. A term used in the old Records to designate a workman inferior to an Operative Freemason. Thus: "Alsoe that no Mason make moulds, square or rule to any rough layers." (Harleian MS., No. 2054.)

In Dr. Murray's new *English Dictionary* the word is said to mean "one who lays stones; a mason," and is described as obsolete in this sense. A quotation is given from Wyclif's Bible of 1382, 1 Chron. xxii. 15, "Many craftise men, masouns and leyers." [E. L. H.]

Lazarus, Order of. An order instituted in Palestine, termed the "United Order of St. Lazarus and of our Beloved Lady of Mount Carmel." It was a military order engaged against the Saracens, by whom it was nearly destroyed. In 1150 the knights assumed the vows of Obedience, Poverty, and Chastity, in the presence of William the Patriarch. In 1572, Gregory XII. united the Italian knights of the order with that of St. Maurice. Vincent de Paul, in 1617, founded a religious order, which was approved in 1626, and erected into a congregation in 1632, and so called from the priory of St. Lazarus in Paris, which was occupied by the order during the French Revolution. The members are called Priests of the Mission, and are employed in teaching and missionary labors.

Lebanon. A mountain, or rather a range of mountains in Syria, extending from beyond Sidon to Tyre, and forming the northern boundary of Palestine. Lebanon is celebrated for the cedars which it produces, many of which are from fifty to eighty feet in height, and cover with their branches a space of ground the diameter of which is still greater. Hiram, King of Tyre, in whose dominions Mount Lebanon was situated, furnished these trees for the building of the Temple of Solomon. In relation to Lebanon, Kitto, in his *Biblical Cyclopedia*, has these remarks: "The forests of the Lebanon mountains only could

supply the timber for the Temple. Such of these forests as lay nearest the sea were in the possession of the Phœnicians, among whom timber was in such constant demand, that they had acquired great and acknowledged skill in the felling and transportation thereof; and hence it was of such importance that Hiram consented to employ large bodies of men in Lebanon to hew timber, as well as others to perform the service of bringing it down to the seaside, whence it was to be taken along the coasts in floats to the port of Joppa, from which place it could be easily taken across the country to Jerusalem."

The Ancient and Accepted Scottish Rite has dedicated to this mountain its Twenty-second Degree, or Prince of Lebanon. The Druses now inhabit Mount Lebanon, and still preserve there a secret organization. (See *Druses*.)

Lebanon, Prince of. See *Knight of the Royal Ax*.

Le Bauld de Nans, Claude Etienne. A distinguished Masonic writer, born at Besançon in 1736. He was by profession a highly respected actor, and a man of much learning, which he devoted to the cultivation of Freemasonry. He was for seven years Master of the Lodge St. Charles de l'Union, in Mannheim; and on his removal to Berlin, in 1771, became the Orator of the Lodge Royale York de l'Amitié, and editor of a Masonic journal. He delivered, while Orator of the Lodge—a position which he resigned in 1778—a large number of discourses, a collection of which was published at Berlin in 1788. He also composed many Masonic odes and songs, and published, in 1781, a collection of his songs for the use of the Lodge Royale York, and in 1786, his *Lyre Maçonnique*. He is described by his contemporaries as a man of great knowledge and talents, and Fessler has paid a warm tribute to his learning and to his labors in behalf of Masonry. He died at Berlin in 1789.

Lechangeur. An officer of one of the Lodges of Milan, Italy, of whom Rebold (*Hist. des Trois G. Loges*, p. 575) gives the following account. When, in 1805, a Supreme Council of the Ancient and Accepted Scottish Rite was established at Milan, Lechangeur became a candidate for membership. He received some of the degrees; but subsequently the founders of the Council, for satisfactory reasons, declined to confer upon him the superior grades. Incensed at this, Lechangeur announced to them that he would elevate himself above them by creating a rite of ninety degrees, into which they should not be admitted. He carried this project into effect, and the result was the Rite of Mizraim, of which he declared himself to be the Superior Grand Conservator. His energies seem to have been exhausted in the creation of his unwieldy rite, for no Chapters were established except in the city of Naples. But in 1810 a patent was granted by him to Michel Bedarride, by whom the Rite was propagated in France. Lechangeur's fame, as the founder of the Rite, was overshadowed by the greater zeal and impetuosity of Bedarride, by whom his self-assumed prerogatives were usurped. He died in 1812.

Lecture. Each degree of Masonry contains a course of instruction, in which the ceremonies, traditions, and moral instruction appertaining to the degree are set forth. This arrangement is called a lecture. Each lecture, for the sake of convenience, and for the purpose of conforming to certain divisions in the ceremonies, is divided into sections, the number of which have varied at different periods, although the substance remains the same. According to Preston, the lecture of the first degree contains six sections; that of the second, four; and that of the third, twelve. But according to the arrangement adopted in this country, commonly known as the "Webb lectures," there are three sections in the first degree, two in the second, and three in the third.

In the Entered Apprentices', the first section is almost entirely devoted to a recapitulation of the ceremonies of initiation. The initiatory portion, however, supplies certain modes of recognition. The second section is occupied with an explanation of the ceremonies that had been detailed in the first—the two together furnishing the interpretation of ritualistic symbolism. The third is exclusively occupied in explaining the signification of the symbols peculiar to the degree.

In the Fellow-Craft's Degree, the first section, like the first section of the Entered Apprentice, is merely a recapitulation of ceremonies, with a passing commentary on some of them. The second section introduces the neophyte for the first time to the differences between Operative and Speculative Masonry and to the Temple of King Solomon as a Masonic symbol, while the candidate is ingeniously deputed as a seeker after knowledge.

In the Master's Degree the first section is again only a detail of ceremonies. The second section is the most important and impressive portion of all the lectures, for it contains the legend on which the whole symbolic character of the Institution is founded. The third section is an interpretation of the symbols of the degree, and is, of all the sections, the one least creditable to the composer.

In fact, it must be confessed that many of the interpretations given in these lectures are unsatisfactory to the cultivated mind, and seem to have been adopted on the principle of the old Egyptians, who made use of symbols to conceal rather than to express their thoughts. Learned Masons have been, therefore, always disposed to go beyond the mere technicalities and stereotyped phrases of the lectures, and to look in the history and the philosophy of the ancient religions, and the organization of the ancient mysteries, for a true explanation of most of the symbols of Masonry, and there they have always been enabled to find this true interpretation. The lectures, however, serve as an introduction or

preliminary essay, enabling the student, as he advances in his initiation, to become acquainted with the symbolic character of the Institution. But if he ever expects to become a learned Mason, he must seek in other sources for the true development of Masonic symbolism. The lectures alone are but the primer of the science.

Lecturer, Grand. An officer known only in the United States. He is appointed by the Grand Master or the Grand Lodge. His duty is to visit the subordinate Lodges, and instruct them in the ritual of the Order as practised in his jurisdiction, for which he receives compensation partly from the Grand Lodge and partly from the Lodges which he visits.

Lectures, History of the. To each of the degrees of Symbolic Masonry a catechetical instruction is appended, in which the ceremonies, traditions, and other esoteric instructions of the degree are contained. A knowledge of these lectures—which must, of course, be communicated by oral teaching—constitutes a very important part of a Masonic education; and, until the great progress made within the present century in Masonic literature, many "bright Masons," as they are technically styled, could claim no other foundation than such a knowledge for their high Masonic reputation. But some share of learning more difficult to attain, and more sublime in its character than anything to be found in these oral catechisms, is now considered necessary to form a Masonic scholar. Still, as the best commentary on the ritual observances is to be found in the lectures, and as they also furnish a large portion of that secret mode of recognition, or that universal language, which has always been the boast of the Institution, not only is a knowledge of them absolutely necessary to every practical Freemason, but a history of the changes which they have from time to time undergone constitutes an interesting part of the literature of the Order.

Comparatively speaking (comparatively in respect to the age of the Masonic Institution), the system of Lodge lectures is undoubtedly a modern invention. That is to say, we can find no traces of any forms of lectures like the present before the middle, or perhaps the close, of the seventeenth century. Examinations, however, of a technical nature, intended to test the claims of the person examined to the privileges of the Order, appear to have existed at an early period. They were used until at least the middle of the eighteenth century, but were perpetually changing, so that the tests of one generation of Masons constituted no tests for the succeeding one. Oliver very properly describes them as being "something like the conundrums of the present day—difficult of comprehension—admitting only of one answer, which appeared to have no direct correspondence with the question, and applicable only in consonance with the mysteries and symbols of the Institution." (*On the Masonic Tests of the Eighteenth Century. Golden Remains*, vol. iv., p. 16.) These tests were sometimes, at first, distinct from the lectures, and sometimes, at a later period, incorporated with them. A specimen is the answer to the question, "How blows the wind?" which was, "Due east and west."

The "Examination of a German Stone-Mason," which is given by Findel in the appendix to his *History*, was most probably in use in the fourteenth century. Dr. Oliver was in possession of what purports to be a formula, which he supposes to have been used during the Grand Mastership of Archbishop Chichely, in the reign of Henry VI., and from which (*Rev. of a Sq.*, p. 11) he makes the following extracts:

"*Q.* Peace be here? *A.* I hope there is. *Q.* What o'clock is it? *A.* It is going to six, or going to twelve. *Q.* Are you very busy? *A.* No. *Q.* Will you give or take? *A.* Both; or which you please. *Q.* How go squares? *A.* Straight. *Q.* Are you rich or poor? *A.* Neither. *Q.* Change me that? *A.* I will. *Q.* In the name of the King and the Holy Church, are you a Mason? *A.* I am so taken to be. *Q.* What is a Mason? *A.* A man begot by a man, born of a woman, brother to a king. *Q.* What is a fellow? *A.* A companion of a prince, etc."

There are other questions and answers of a similar nature, conveying no instruction, and intended apparently to be used only as tests. Dr. Oliver attributes, it will be seen, the date of these questions to the beginning of the fifteenth century; but the correctness of this assumption is doubtful. They have no internal evidence in style of having been the invention of so early a period of the English tongue.

The earliest form of catechism that we have on record is that contained in the Sloane MS., No. 3329, now in the British Museum, which has been printed and published by the Rev. A. F. A. Woodford. One familiar with the catechisms of the eighteenth century will detect the origin of much that they contain in this early specimen. It is termed in the manuscript the Mason's "private discourse by way of question and answer," and is in these words:

"*Q.* Are you a mason? *A.* Yes, I am a Freemason. *Q.* How shall I know that? *A.* By perfect signes and tokens and the first poynts of my Entrance. *Q.* Which is the first signe or token, shew me the first and I will shew you the second. *A.* The first is heal and conceal or conceal and keep secrett by no less paine than cutting my tongue from my throat. *Q.* Where were you made a mason? *A.* In a just and perfect or just and lawfull lodge. *Q.* What is a just and perfect or just and lawfull lodge? *A.* A just and perfect lodge is two Interprintices two fellow craftes and two Mast'rs, more or fewer the more the merrier the fewer the better chear but if need require five will serve that is, two Interprintices, two fellow craftes and one Mast'r on the highest hill or lowest valley of the world without the crow of a cock or the bark of a dogg. *Q.* From whome do you derive your principalls? *A.* From a great'r than you. *Q.* Who is that on earth that is great'r than a

freemason? *A.* He y't was caryed to y'e highest pinnicall of the temple of Jerusalem. *Q.* Whith'r is your lodge shut or open? *A.* It is shut. *Q.* Where lyes the keys of the lodge doore? *A.* They ley in a bound case or under a three cornered pavem't about a foote and halfe from the lodge door. *Q.* What is the key of your lodge doore made of? *A.* It is not made of wood stone iron or steel or any sort of mettle but the tongue of good report behind a Broth'rs back as well as before his face. *Q.* How many jewels belong to your lodge? *A.* There are three the square pavem't the blazing star and the Danty tassley. *Q.* How long is the cable rope of your lodge? *A.* As long as from the Lop of the liver to the root of the tongue. *Q.* How many lights are in your lodge? *A.* Three the sun the mast'r and the square. *Q.* How high is your lodge? *A.* Without foots yards or Inches, it reaches to heaven. *Q.* How stood your lodge? *A.* East and west as all holly Temples stand. *Q.* W'ch is the mast'rs place in the lodge? *A.* The east place is the mast'rs place in the lodge and the jewell resteth on him first and he setteth men to worke w't the m'rs have in the forenoon the wardens reap in the afternoon. *Q.* Where was the word first given? *A.* At the tower of Babylon. *Q.* Where did they first call their lodge? *A.* At the holy chapell of St. John. *Q.* How stood your lodge? *A.* As the said holy chapell and all other holy Temples stand (viz.) east and west. *Q.* How many lights are in your lodge? *A.* Two one to see to go in and another to see to work. *Q.* What were you sworne by? *A.* By God and the square. *Q.* Whither above the cloathes or und'r the cloathes? *A.* Und'r the cloathes. *Q.* Und'r what arme? *A.* Und'r the right arme. God is gratfull to all Worshipfull Mast'rs and fellows in that worshipfull lodge from whence we last came and to you good fellow w't is your name. *A.* J or B then giving the grip of the hand he will say Broth'r John greet you well you. *A.* God's good greeting to you dear Broth'r."

But when we speak of the lectures, in the modern sense, as containing an exposition of the symbolism of the Order, we may consider it as an established historical fact, that the Fraternity were without any such system until after the revival in 1717. Previous to that time, brief extemporary addresses and charges in addition to these test catechisms were used by the Masters of Lodges, which, of course, varied in excellence with the varied attainments and talents of the presiding officer. We know, however, that a series of charges were in use about the middle and end of the seventeenth century, which were ordered "to be read at the making of a Freemason." These "Charges and Covenants," as they were called, contained no instructions on the symbolism and ceremonies of the Order, but were confined to an explanation of the duties of Masons to each other. They were altogether exoteric in their character, and have accordingly been repeatedly printed in the authorized publications of the Fraternity.

Dr. Oliver, who had ampler opportunities than any other Masonic writer of investigating this subject, says that the earliest authorized lectures with which he has met were those of 1720. They were arranged by Drs. Anderson and Desaguliers, perhaps, at the same time that they were compiling the Charges and Regulations from the ancient Constitutions. They were written in a catechetical form, which form has ever since been retained in all subsequent Masonic lectures. Oliver says that "the questions and answers are short and comprehensive, and contain a brief digest of the general principles of the Craft as it was understood at that period." The "digest" must, indeed, have been brief, since the lecture of the Third Degree, or what was called "the Master's Part," contained only thirty-one questions, many of which are simply tests of recognition. Dr. Oliver says the number of questions was only seven; but he probably refers to the seven tests which conclude the lecture. There are, however, twenty-four other questions that precede these.

A comparison of these—the primitive lectures, as they may be called—with those in use in America at the present day, demonstrate that a great many changes have taken place. There are not only omissions of some things, and additions of others, but sometimes the explanations of the same points are entirely different in the two systems. Thus the Andersonian lectures describe the "furniture" of a Lodge as being the "Mosaic pavement, blazing star, and indented tassel," emblems which are now, perhaps more properly, designated as "ornaments." But the present furniture of a Lodge is also added to the pavement, star, and tassel, under the name of "other furniture." The "greater lights" of Masonry are entirely omitted, or, if we are to suppose them to be meant by the expression "fixed lights," then these are referred, differently from our system, to the three windows of the Lodge.

In the First Degree may be noticed, among others, the following points in the Andersonian lectures which are omitted in the American system: the place and duty of the Senior and Junior Entered Apprentices, the punishment of cowans, the bone bone-box, and all that refers to it; the clothing of the Master, the age of an Apprentice, the uses of the day and night, and the direction of the wind. These latter, however, are, strictly speaking, what the Masons of that time denominated "tests." In the same degree, the following, besides many other important points in the present system, are altogether omitted in the old lectures of Anderson: the place where Masons anciently met, the theological ladder, and the lines parallel. Important changes have been made in several particulars; as, for instance, in the "points of entrance," the ancient lecture giving an entirely different interpretation of the expression, and designating what are now called "points of entrance" by the term "principal signs"; the distinctions

between Operative and Speculative Masonry, which are now referred to the Second Degree, are there given in the First; and the dedication of the Bible, compass, and square is differently explained.

In the Second Degree, the variations of the old from the modern lectures are still greater. The old lecture is, in the first place, very brief, and much instruction deemed important at the present day was then altogether omitted. There is no reference to the distinctions between Operative and Speculative Masonry (but this topic is adverted to in the former lecture); the approaches to the middle chamber are very differently arranged; and not a single word is said of the fords of the river Jordan. It must be confessed that the ancient lecture of the Fellow-Craft is immeasurably inferior to that contained in the modern system, and especially in that of Webb.

The Andersonian lecture of the Third Degree is brief, and therefore imperfect. The legend is, of course, referred to, and its explanation occupies nearly the whole of the lecture; but the details are meager, and many important facts are omitted, while there are in other points striking differences between the ancient and the present system.

But, after all, there is a general feature of similarity—a substratum of identity—pervading the two systems of lectures—the ancient and the modern—which shows that the one derives its parentage from the other. In fact, some of the answers given in the year 1730 are, word for word, the same as those used in America at the present time.

[Martin Clare and Dunckerley (*q. v.*) are often credited with being revisers of the English ritual and lectures, but as there is no proof whatever that they had anything to do with such revision it does not seem worth while to repeat the well-worn tale here. —E. L. H.]

[Nothing can be said with any certainty about the lectures in England until the last quarter of the eighteenth century, when William Preston took the matter in hand and revised or more probably rewrote them entirely.—E. L. H.]

He divided the lecture on the First Degree into six sections, the Second into four, and the third into twelve. But of the twelve sections of the third lecture, seven only strictly appertain to the Master's Degree, the remaining five referring to the ceremonies of the Order, which, in the American system, are contained in the Past Master's lecture. Preston has recapitulated the subjects of these several lectures in his *Illustrations of Masonry;* and if the book were not now so readily accessible, it would be worth while to copy his remarks. It is sufficient, however, to say that he has presented us with a philosophical system of Masonry, which, coming immediately after the unscientific and scanty details which up to his time had been the subjects of Lodge instructions, must have been like the bursting forth of a sun from the midst of midnight darkness. There was no twilight or dawn to warn the unexpectant Fraternity of the light that was about to shine upon them. But at once, without preparation—without any gradual progress or growth from almost nothing to superfluity—the Prestonian lectures were given to the Order in all their fulness of illustration and richness of symbolism and science, as a substitute for the plain and almost unmeaning systems that had previously prevailed. Not that Freemasonry had not always been a science, but that for all that time, and longer, her science had been dormant—had been in abeyance. From 1717 the Craft had been engaged in something less profitable, but more congenial than the cultivation of Masonic science. The pleasant suppers, the modicums of punch, the harmony of song, the miserable puns, which would have provoked the ire of Johnson beyond anything that Boswell has recorded, left no time for inquiry into abstruser matters. The revelations of Dr. Oliver's square furnish us abundant positive evidence of the low state of Masonic literature in those days; and if we need negative proof, we will find it in the entire absence of any readable book on Scientific Masonry, until the appearance of Hutchinson's and Preston's works. Preston's lectures were, therefore, undoubtedly the inauguration of a new era in the esoteric system of Freemasonry.

These lectures continued for nearly half a century to be the authoritative text of the Order in England. But in 1813 the two Grand Lodges—the "Moderns" and the "Ancients," as they were called—after years of antagonism, were happily united, and then, as the first exercise of this newly combined authority, it was determined "to revise" the system of lectures.

This duty was entrusted to the Rev. Dr. Hemming, the Senior Grand Warden, and the result was the Union or Hemming lectures, which are now the authoritative standard of English Masonry. In these lectures many alterations of the Prestonian system were made, and some of the most cherished symbols of the Fraternity were abandoned, as, for instance, the *twelve grand points, the initiation of the free born,* and *the lines parallel.* Preston's lectures were rejected in consequence, it is said, of their Christian references; and Dr. Hemming, in attempting to avoid this error, fell into a greater one, of omitting in his new course some of the important ritualistic landmarks of the Order.

[Nothing definite can be stated about the lectures used in America until near the end of the eighteenth century, when a system of lectures was put forth by Thomas Smith Webb. —E. L. H.]

The lectures of Webb contained much that was almost a verbal copy of parts of Preston; but the whole system was briefer, and the paragraphs were framed with an evident view to facility in committing them to memory. It is an herculean task to acquire the whole system of Prestonian lectures, while that of Webb may be mastered in a comparatively short time, and by much inferior intellects. There

have, in consequence, in former years, been many "bright Masons" and "skilful lecturers" whose brightness and skill consisted only in the easy repetition from memory of the set form of phrases established by Webb, and who were otherwise ignorant of all the science, the philosophy, and the history of Masonry. But in the later years, a perfect verbal knowledge of the lectures has not been esteemed so highly in America as in England, and the most erudite Masons have devoted themselves to the study of those illustrations and that symbolism of the Order which lie outside of the lectures. Book Masonry—that is, the study of the principles of the Institution as any other science is studied, by means of the various treatises which have been written on these subjects—has been, from year to year, getting more popular with the American Masonic public which is becoming emphatically a reading people.

The lecture on the Third Degree is eminently Hutchinsonian in its character, and contains the bud from which, by a little cultivation, we might bring forth a gorgeous blossom of symbolism. Hence, the Third Degree has always been the favorite of American Masons. But the lectures of the First and Second degrees, the latter particularly, are meager and unsatisfactory. The explanations, for instance, of the form and extent of the Lodge, of its covering, of the theological ladder, and especially of the point within the circle, will disappoint any intellectual student who is seeking, in a symbolical science, for some rational explanation of its symbols that promises to be worthy of his investigations.

Lefranc. The Abbé Lefranc, Superior of the House of the Eudistes at Caen, was a very bitter enemy of Freemasonry, and the author of two libelous works against Freemasonry, both published in Paris; the first and best known, entitled *Le Voile levé pour les curieux, ou le secret des révolutions, révélé à l'aide de la Franc-Maçonnerie*, 1791 (republished at Liege in 1827), and the other, *Conjuration contre la religion Catholique et les souverains, dont le projet, conçu eu France, doit s'éxécuter dans l'univers entier*, 1792. In these scandalous books, and especially in the former, Lefranc has, to use the language of Thory (*Acta Lat.*, i., 192), "vomited the most undeserved abuse of the Order." Of the *Veil Lifted*, the two great detractors of Masonry, Robison and Barruel, entertained different opinions. Robison made great use of it in his *Proofs of a Conspiracy;* but Barruel, while speaking highly of the Abbé's virtues, doubts his accuracy and declines to trust to his authority. Lefranc was slain in the massacre of September 2d, at the Convent of the Carmelites, in Paris, with one hundred and ninety-one other priests. Thory (*l. c.*) says that M. Ledhui, a Freemason, who was present at the sanguinary scene, attempted to save the life of Lefranc, and nearly lost his own in the effort. The Abbé says that, on the death of a friend, who was a zealous Mason and Master of a Lodge, he found among his papers a collection of Masonic writings containing the rituals of a great many degrees, and from these he obtained the information on which he has based his attacks upon the Order. Some idea may be formed of his accuracy and credibility, from the fact that he asserts that Faustus Socinus, the Father of Modern Unitarianism, was the contriver and inventor of the Masonic system—a theory so absurd that even Robison and Barruel both reject it.

Left Hand. Among the ancients the left hand was a symbol of equity and justice. Thus, Apuleius (*Met.*, l. xi.), when describing the procession in honor of Isis, says one of the ministers of the sacred rites "bore the symbol of equity, a left hand, fashioned with the palm extended; which seems to be more adapted to administering equity than the right, from its natural inertness, and its being endowed with no craft and no subtlety."

Left Side. In the symbolism of Masonry, the First Degree is represented by the left side, which is to indicate that as the left is the weaker part of the body, so is the Entered Apprentice's Degree the weakest part of Masonry. This doctrine, that the left is the weaker side of the body, is very ancient. Plato says it arises from the fact that the right is more used; but Aristotle contends that the organs of the right side are by nature more powerful than those of the left.

Legally Constituted. See *Constituted, Legally*.

Legate. In the Middle Ages, a legate, or *legatus*, was one who was, says Du Cange (*Glossar.*), "in provincias à Principe ad exercendas judicias mittebalur," sent by a prince into the provinces to exercise judicial functions. The word is now applied by the Supreme Council of the Ancient and Accepted Scottish Rite to designate certain persons who are sent into unoccupied territory to propagate the Rite. The word is, however, of recent origin, not having been used before 1866. A legate should be in possession of at least the Thirty-second Degree.

Legend. Strictly speaking, a legend, from the Latin, *legendus*, "to be read," should be restricted to a story that has been committed to writing; but by good usage the word has been applied more extensively, and now properly means a narrative, whether true or false, that has been traditionally preserved from the time of its first oral communication. Such is the definition of a Masonic legend. The authors of the *Conversations-Lexicon*, referring to the monkish lives of the saints which originated in the twelfth and thirteenth centuries, say that the title *legend* was given to all fictions which made pretensions to truth. Such a remark, however correct it may be in reference to these monkish narratives, which were often invented as ecclesiastical exercises, is by no means applicable to the legends of Freemasonry. These are not necessarily fictitious, but are either based on actual and historical facts which have been but slightly modified, or they are the offspring and expansion

of some symbolic idea; in which latter respect they differ entirely from the monastic legends, which often have only the fertile imagination of some studious monk for the basis of their construction.

The instructions of Freemasonry are given to us in two modes: by the *symbol* and by the *legend*. The symbol is a material, and the legend a mental, representation of a truth. The sources of neither can be in every case authentically traced. Many of them come to us, undoubtedly, from the old Operative Masons of the Medieval gilds. But whence they got them is a question that naturally arises, and which still remains unanswered. Others have sprung from a far earlier source; perhaps, as Creuzer has suggested in his *Symbolik*, from an effort to engraft higher and purer knowledge on an imperfect religious idea. If so, then the myths of the Ancient Mysteries, and the legends or traditions of Freemasonry, would have the same remote and the same final cause. They would differ in construction, but they would agree in design. For instance, the myth of Adonis in the Syrian mysteries, and the legend of Hiram Abif in the Third Degree, would differ very widely in their details; but the object of each would be the same, namely, to teach the doctrine of the restoration from death to eternal life.

The legends of Freemasonry constitute a considerable and a very important part of its ritual. Without them, its most valuable portions as a scientific system would cease to exist. It is, in fact, in the traditions and legends of Freemasonry, more, even, than in its material symbols, that we are to find the deep religious instructions which the Institution is intended to inculcate. It must be remembered that Freemasonry has been defined to be "a system of morality, veiled in allegory and illustrated by symbols." Symbols, then, alone, do not constitute the whole of the system: allegory comes in for its share; and this allegory, which veils the Divine truths of Masonry, is presented to the neophyte in the various legends which have been traditionally preserved in the Order.

They may be divided into three classes: 1. The Mythical legend. 2. The Philosophical legend. 3. The Historical legend. And these three classes may be defined as follows:

1. The myth may be engaged in the transmission of a narrative of early deeds and events having a foundation in truth, which truth, however, has been greatly distorted and perverted by the omission or introduction of circumstances and personages, and then it constitutes the *mythical legend*.

2. Or it may have been invented and adopted as the medium of enunciating a particular thought, or of inculcating a certain doctrine, when it becomes a *philosophical legend*.

3. Or, lastly, the truthful elements of actual history may greatly predominate over the fictitious and invented materials of the myth; and the narrative may be, in the main, made up of facts, with a slight coloring of imagination, when it forms an *historical legend*.

Legend of Enoch. See *Enoch*.

Legend of Euclid. See *Euclid, Legend of*.

Legend of the Craft. The Old Records of the Fraternity of Operative Freemasons, under the general name of *Old Constitutions* or *Constitutions of Masonry*, or *Old Charges*, were written in the fourteenth, fifteenth, sixteenth, and seventeenth centuries. The loss of many of these by the indiscretion of overzealous brethren was deplored by Anderson; but a few of them have been long known to us, and many more have been recently recovered, by the labors of such men as Hughan, from the archives of old Lodges and from manuscript collections in the British Museum. In these is to be found a history of Freemasonry; full, it is true, of absurdities and anachronisms, and yet exceedingly interesting, as giving us the belief of our ancient brethren on the subject of the origin of the Order. This history has been called by Masonic writers the "LEGEND OF THE CRAFT," because it is really a legendary narrative, having little or no historic authenticity. In all these *Old Constitutions*, the legend is substantially the same; showing, evidently, a common origin; most probably an oral teaching which prevailed in the earliest ages of the confraternity. In giving it, the Dowland Manuscript, as reproduced in Hughan's *Old Charges* (1872), has been selected for the purpose, because it is believed to be a copy of an older one of the beginning of the sixteenth century, and because its rather modernized spelling makes it more intelligible to the general reader.

THE LEGEND OF THE CRAFT.

"Before Noyes floode there was a man called Lameche as it is written in the Byble, in the iiijth chapter of Genesis; and this Lameche had two wives, and the one height Ada and the other height Sella; by his first wife Ada he gott two sonns, and that one Jahell, and thother Tuball, And by that other wife Sella he gott a son and a daughter. And these four children founden the begining of all the sciences in the world. And this elder son Jahell found the science of Geometrie, and he departed flocks of sheepe and lambs in the field, and first wrought house of stone and tree, as is noted in the chapter above said. And his brother Tuball found the science of Musicke, songe of tonge, harpe, and orgaine. And the third brother Tuball Cain found smithcraft of gold, silver, copper, iron, and steele; and the daughter found the craft of Weavinge. And these children knew well that God would take vengeance for synn, either by fire or by water; wherefore they writt their science that they had found in two pillars of stone, that they might be found after Noyes flood. And that one stone was *marble*, for that would not bren with fire; and that other stone was clepped *laterns*, and would not drown in noe water.

"Our intent is to tell you trulie how and in what manner these stones were found, that thise sciences were written in. The great Hermarynes that was Cubys son, the which Cub

was Sem's son, that was Noys son. This Hermarynes, afterwards was called Harmes the father of wise men: he found one of the two pillars of stone, and found the science written there, and he taught it to other men. And at the making of the Tower of Babylon there was Masonrye first made much of. And the Kinge of Babylon that height Nemrothe, was a mason himselfe, and loved well the science, as it is said with masters of histories. And when the City of Nyneve, and other cities of the East should be made, Nemrothe, the Kinge of Babilon, sent thither threescore Masons at the rogation of the Kinge of Nyneve his cosen. And when he sent them forth, he gave them a charge on this manner: That they should be true each of them to other, and that they should love truly together, and that they should serve their lord truly for their pay; soe that the master may have worshipp, and all that long to him. And other moe charges he gave them. And this was the first tyme that ever Masons had any charge of his science.

"Moreover, when Abraham and Sara his wife went into Egipt, there he taught the Seaven Scyences to the Egiptians; and he had a worthy Scoller that height Ewclyde, and he learned right well, and was a master of all the vij Sciences liberall. And in his dayes it befell that the lord and the estates of the realme had soe many sonns that they had gotten some by their wifes and some by other ladyes of the realme; for that land is a hott land and a plentious of generacion. And they had not competent livelode to find with their children; wherefore they made much care. And then the King of the land made a great Counsell and a parliament, to witt, how they might find their children honestly as gentlemen. And they could find noe manner of good way. And then they did crye through all the realme, if their were any man that could informe them, that he should come to them, and he should be soe rewarded for his travail, that he should hold him pleased.

"After that this cry was made, then came this worthy clarke Ewclyde, and said to the king and to all his great lords: 'If yee will, take me your children to governe, and to teache them one of the Seaven Scyences, wherewith they may live honestly as gentlemen should, under a condicion that yee will grant me and them a commission that I may have power to rule them after the manner that the science ought to be ruled.' And that the Kinge and all his Counsell granted to him anone, and sealed their commission. And then this worthy Doctor tooke to him these lords' sonns, and taught them the scyence of Geometrie in practice, for to work in stones all manner of worthy worke that belongeth to buildinge churches, temples, castells, towres, and mannors, and all other manner of buildings; and he gave them a charge on this manner:

"The first was, that they should be true to the Kinge, and to the lord that they owe. And that they should love well together, and be true each one to other. And that they should call each other his fellowe, or else brother, and not by servant, nor his nave, nor none other foule name. And that the should deserve their paie of the lord, or of the master that they serve. And that they should ordaine the wisest of them to be master of the worke; and neither for love nor great lynneage, ne ritches ne for noe favour to lett another that hath little conning for to be master of the lord's worke, wherethrough the lord should be evill served and they ashamed. And also that they should call their governors of the worke, Master, in the time that they worke with him. And other many moe charges that longe to tell. And to all these charges he made them to sweare a great oath that men used in that time; and ordayned them for reasonable wages, that they might live honestly by. And also that they should come and semble together every yeare once, how they might worke best to serve the lord for his profitt, and to their own worshipp; and to correct within themselves him that had trespassed against the science. And thus was the scyence grounded there; and that worthy Mr. Ewclide gave it the name of Geometrie. And now it is called through all this land Masonrye.

"Sythen longe after, when the Children of Israell were coming into the Land of Beheast, that is now called amongst us the Country of Jhrlm, King David began the Temple that they called Templum D'ni and it is named with us the Temple of Jerusalem. And the same King David loved Masons well and cherished them much, and gave them good paie. And he gave the charges and the manners as he had learned of Egipt given by Ewclyde, and other charges moe that ye shall heare afterwards. And after the decease of Kinge David, Salamon, that was David's sonn, performed out the Temple that his father begonne; and sent after Masons into divers countries and of divers lands; and gathered them together, so that he had fourscore thousand workers of stone, and were all named Masons. And he chose out of them three thousand that were ordayned to be maisters and governors of his worke. And furthermore, there was a Kinge of another region that men called Iram, and he loved well Kinge Solomon, and he gave him tymber to his worke. And he had a son that height Aynon, and he was a Master of Geometrie, and was chiefe Maister of all his Masons, and was Master of all his gravings and carvinge, and of all other manner of Masonrye that longed to the Temple; and this is witnessed by the Bible *in libro Regum* the third chapter. And this Solomon confirmed both charges and the manners that his father had given to Masons. And thus was that worthy science of Masonrye confirmed in the country of Jerusalem, and in many other kingdomes.

"Curious craftsmen walked about full wide into divers countryes, some because of learninge more craft and cunninge, and some to teach them that had but little conynge. And

soe it befell that there was one curious Mason that height Maymus Grecus, that had been at the making of Solomon's Temple, and he came into France, and there he taught the science of Masonrye to men of France. And there was one of the Regal lyne of France, that height Charles Martell; and he was a man that loved well such a science, and drew to this Maymus Grecus that is above said, and learned of him the science, and tooke upon him the charges and manners; and afterwards, by the grace of God, he was elect to be Kinge of France. And when he was in his estate he tooke Masons, and did helpe to make men Masons that were none; and set them to worke, and gave them both the charge and the manners and good paie, as he had learned of other Masons; and confirmed them a Chartor from yeare to yeare, to hold their semble wher they would; and cherished them right much; And thus came the science into France.

"England in all this season stood voyd as for any charge of Masonrye unto St. Albones tyme. And in his days the King of England that was a Pagan, he did wall the towne about that is called Sainct Albones. And Sainct Albones was a worthy Knight, and steward with the Kinge of his Household, and had governance of the realme, and also of the makinge of the town walls; and loved well Masons and cherished them much. And he made their paie right good, standinge as the realm did, for he gave them ij*s.* vj*d.* a weeke, and iij*d.* to their nonesynches. And before that time, through all this land, a Mason took but a penny a day and his meate, till Sainct Albone amended it, and gave them a chartour of the Kinge and his Counsell for to hold a general councell, and gave it the name of Assemble; and thereat he was himselfe, and helped to make Masons, and gave them charges as yee shall heare afterward.

"Right soone after the decease of Sainct Albone, there came divers warrs into the realme of England of divers Nations, soe that the good rule of Masonrye was destroyed unto the tyme of Kinge Athelstone days that was a worthy Kinge of England and brought this land into good rest and peace; and builded many great works of Abbyes and Towres, and other many divers buildings; and loved well Masons. And he had a son that height Edwinne, and he loved Masons much more than his father did. And he was a great practiser in Geometry; and he drew him much to talke and to commune with Masons, and to learne of them science; and afterward, for love that he had to Masons, and to the science, he was made a Mason, and he gatt of the Kinge his father a Chartour and Commission to hold every yeare once an Assemble, wher that ever they would within the realme of England; and to correct within themselves defaults and trespasses that were done within the science. And he held himself an Assemble at Yorke, and there he made Masons, and gave them charges, and taught them the manners, and commanded that rule to be kept ever after, and tooke then the Chartour and Commission to keepe, and made ordinance that it should be renewed from Kinge to Kinge.

"And when the assemble was gathered he made a cry that all old Masons and young that had any writeinge or understanding of the charges and the manners that were made before in this land or in any other, that they should show them forth. And when it was proved, there were founden some in Frenche, and some in Greek, and some in English, and some in other languages; and the intent of them all was founden all one. And he did make a booke thereof, and how the science was founded. And he himselfe bad and commanded that it should be readd or tould, when that any Mason should be made, for to give him his Charge. And fro that day unto this tyme manners of Masons have beene kept in that forme as well as men might governe it. And furthermore divers Assembles have beene put and ordayned certaine charges by the best advice of Masters and fellowes."

If anyone carefully examines this legend, he will find that it is really a history of the rise and progress of architecture, with which is mixed allusions to the ancient gilds of the Operative Masons. Geometry also, as a science essentially necessary to the proper cultivation of architecture, receives a due share of attention. In thus confounding architecture, geometry, and Freemasonry, the workmen of the Middle Ages were but obeying a natural instinct which leads every man to seek to elevate the character of his profession, and to give to it an authentic claim to antiquity. It is this instinct which has given rise to so much of the mythical element in the modern history of Masonry. Anderson has thus written his records in the very spirit of the legend of the Craft, and Preston and Oliver have followed his example. Hence this legend derives its great importance from the fact that it has given a complexion to all subsequent Masonic history. In dissecting it with critical hands, we shall be enabled to dissever its historical from its mythical portions, and assign to it its true value as an exponent of the Masonic sentiment of the Middle Ages.

Legend of the Gild. A title by which the Legend of the Craft is sometimes designated in reference to the Gild of Operative Masons.

Legend of the Royal Arch Degree. Much of this legend is a myth, having very little foundation, and some of it none, in historical accuracy. But underneath it all there lies a profound stratum of philosophical symbolism. The destruction and the rebuilding of the Temple by the efforts of Zerubbabel and his compatriots, the captivity and the return of the captives, are matters of sacred history; but many of the details have been invented and introduced for the purpose of giving form to a symbolic idea. And this idea, expressed in the symbolism of the Royal Arch, is the very highest form of that which the ancient Mystagogues called the *euresis*, or the *discovery*. There are some portions of the legend which do not bear directly on the sym-

bolism of the second Temple as a type of the second life, but which still have an indirect bearing on the general idea. Thus the particular legend of the *three weary sojourners* is undoubtedly a mere myth, there being no known historical testimony for its support; but it is evidently the enunciation symbolically of the religious and philosophical idea that Divine truth may be sought and won only by successful perseverance through all the dangers, trials, and tribulations of life, and that it is not in this, but in the next life, that it is fully attained.

The legend of the English and the American systems is identical; that of the Irish is very different as to the time and events; and the legend of the Royal Arch of the Scottish Rite is more usually called the *legend of Enoch*.

Legend of the Third Degree. The most important and significant of the legendary symbols of Freemasonry is, undoubtedly, that which relates to the fate of Hiram Abif, commonly called, "by way of excellence," the Legend of the Third Degree.

The first written record that I have been able to find of this legend is contained in the second edition of Anderson's *Constitutions*, published in 1738 (p. 14), and is in these words:

"It (the Temple) was finished in the short space of seven years and six months, to the amazement of all the world; when the capestone was celebrated by the Fraternity with great joy. But their joy was soon interrupted by the sudden death of their dear master, Hiram Abif, whom they decently interred in the Lodge near the Temple, according to ancient usage."

In the next edition of the same work, published in 1756 (p. 24), a few additional circumstances are related, such as the participation of King Solomon in the general grief, and the fact that the King of Israel "ordered his obsequies to be performed with great solemnity and decency." With these exceptions, and the citations of the same passages, made by subsequent authors, the narrative has always remained unwritten, and descended, from age to age, through the means of oral tradition.

The legend has been considered of so much importance that it has been preserved in the symbolism of every Masonic rite. No matter what modifications or alterations the general system may have undergone—no matter how much the ingenuity or the imagination of the founders of rites may have perverted or corrupted other symbols, abolishing the old and substituting new ones—the legend of the Temple Builder has ever been left untouched, to present itself in all the integrity of its ancient mythical form.

What, then, is the signification of this symbol so important and so extensively diffused? What interpretation can we give to it that will account for its universal adoption? How is it that it has thus become so intimately interwoven with Freemasonry as to make, to all appearances, a part of its very essence, and to have been always deemed inseparable from it?

To answer these questions satisfactorily, it is necessary to trace, in a brief investigation, the remote origin of the institution of Freemasonry and its connection with the ancient systems of initiation.

It was, then, the object of all the rites and mysteries of antiquity to teach the doctrine of the immortality of the soul. This dogma, shining as an almost solitary beacon-light in the surrounding gloom of Pagan darkness, had undoubtedly been received from that ancient people or priesthood, among whom it probably existed only in the form of an abstract proposition or a simple and unembellished tradition. But in the more sensual minds of the Pagan philosophers and mystics, the idea, when presented to the initiates in their mysteries, was always conveyed in the form of a scenic representation. The influence, too, of the early Sabian worship of the sun and heavenly bodies, in which the solar orb was adored on its resurrection, each morning, from the apparent death of its evening setting, caused this rising sun to be adopted in the more ancient mysteries as a symbol of the regeneration of the soul.

Thus, in the Egyptian mysteries we find a representation of the death and subsequent regeneration of Osiris; in the Phœnician, of Adonis; in the Syrian, of Dionysus; in all of which the scenic apparatus of initiation was intended to indoctrinate the candidate into the dogma of a future life.

It will be sufficient here to refer to the theory of Oliver, that through the instrumentality of the Tyrian workmen at the Temple of King Solomon, what he calls the spurious and pure branches of the Masonic system were united at Jerusalem, and that the same method of scenic representation was adopted by the latter from the former, and the narrative of the Temple Builder substituted for that of Dionysus, which was the myth peculiar to the mysteries practised by the Tyrian workmen.

The idea, therefore, proposed to be communicated in the myth of the ancient mysteries was the same as that which is now conveyed in the Masonic Legend of the Third Degree.

Hence, then, Hiram Abif is, in the Masonic system, the symbol of human nature, as developed in the life here and the life to come; and so, while the Temple was the visible symbol of the world, its builder became the mythical symbol of man, the dweller and worker in that world.

Man, setting forth on the voyage of life, with faculties and powers fitting him for the due exercise of the high duties to whose performance he has been called, holds, if he be "a curious and cunning workman," skilled in all moral and intellectual purposes (and it is only of such men that the Temple Builder can be the symbol), within the grasp of his attainment, the knowledge of all that Divine truth imparted to him as the heirloom of his race—

that race to whom it has been granted to look, with exalted countenance, on high; which Divine truth is symbolized by the WORD.

Thus provided with the word of life, he occupies his time in the construction of a spiritual temple, and travels onward in the faithful discharge of all his duties, laying down his designs upon the trestle-board of the future, and invoking the assistance and direction of God.

But is his path always over flowery meads and through pleasant groves? Is there no hidden foe to obstruct his progress? Is all before him clear and calm, with joyous sunshine and refreshing zephyrs? Alas! not so. "Man is born to trouble, as the sparks fly upward." At every "gate of life"—as the Orientalists have beautifully called the different ages—he is beset by peril. Temptations allure his youth; misfortunes darken the pathway of his manhood, and his old age is encumbered with infirmity and disease. But clothed in the armor of virtue he may resist the temptation; he may cast misfortunes aside and rise triumphantly above them; but to the last —the direst, the most inexorable foe of his race—he must eventually yield, and, stricken down by death, he sinks prostrate into the grave, *and is buried in the rubbish* of his sin and human frailty.

Here then, in Masonry, is what was called the *aphanism*, concealment or disappearance in the Ancient Mysteries. The bitter, but necessary lesson of death has been imparted. The living soul, with the lifeless body which encased it, has disappeared, and *can nowhere be found.* All is darkness—confusion—despair. Divine truth—the WORD—for a time is lost, and the Master Mason may now say, in the language of Hutchinson, "I prepare my sepulchre. I make my grave in the pollution of the earth. I am under the shadow of death."

But if the mythic symbolism ended here, with this lesson of death, then were the lesson incomplete. That teaching would be vain and idle—nay more, it would be corrupt and pernicious—which should stop short of the conscious and innate instinct for another existence. And hence the succeeding portions of the legend are intended to convey the sublime symbolism of a resurrection from the grave and a new birth into a future life. The discovery of the body, which, in the initiations of the ancient mysteries, was called the *euresis;* and its removal, from the polluted grave into which it had been cast, to an honored and sacred place within the precincts of the temple, are all profoundly and beautifully symbolic of that great truth, the discovery of which was the object of all the ancient initiations, as it is almost the whole design of Freemasonry, namely, that when man shall have passed the gates of life and have yielded to the inexorable fiat of death, he shall then (not in the pictured ritual of an earthly Lodge, but in the realities of that eternal one, of which the former is but an antitype) be raised, at the omnific word of the Grand Master of the Universe, from time to eternity—from the tomb of corruption to the chambers of hope—from the darkness of death to the celestial beams of life—and that his disembodied spirit shall be conveyed as near to the holy of holies of the Divine presence as humanity can ever approach to deity.

Such I conceive to be the true interpretation of the symbolism of the Legend of the Third Degree.

I have said that this mythical history of the Temple Builder was universal in all nations and all rites, and that in no place and at no time had it, by alteration, diminution, or addition, acquired any essentially new or different form: the myth has always remained the same.

But it is not so with its interpretation. That which I have just given, and which I conceive to be the correct one, has been very generally adopted by the Masons of America. But elsewhere, and by various writers, other interpretations have been made, very different in their character, although always agreeing in retaining the general idea of a resurrection or regeneration, or a restoration of something from an inferior to a higher sphere or function.

Thus, some of the earlier continental writers have supposed the myth to have been a symbol of the destruction of the Order of the Templars, looking upon its restoration to its original wealth and dignities as being prophetically symbolized.

In some of the high philosophical degrees it is taught that the whole legend refers to the sufferings and death, with the subsequent resurrection of Christ.

Hutchinson, who has the honor of being the earliest philosophical writer on Freemasonry in England, supposes it to have been intended to embody the idea of the decadence of the Jewish religion and the substitution of the Christian in its place and on its ruins.

Dr. Oliver thinks that it is typical of the murder of Abel and Cain, and that it symbolically refers to the universal death of our race through Adam and its restoration to life in the Redeemer, according to the expression of the Apostle, "as in Adam we all died, so in Christ we all live."

Ragon makes Hiram a symbol of the sun shorn of its vivifying rays and fructifying power by the three winter months, and its restoration to prolific heat by the season of spring.

And, finally, Des Etangs, adopting, in part, the interpretation of Ragon, adds to it another which he calls the moral symbolism of the legend, and supposes that Hiram is no other than eternal reason, whose enemies are the vices that deprave and destroy humanity.

To each of these interpretations it seems to me that there are important objections, though perhaps to some less so than to others.

As to those who seek for an astronomical interpretation of the legend, in which the annual changes of the sun are symbolized, while the ingenuity with which they press

their argument cannot but be admired, it is evident that, by such an interpretation, they yield all that Masonry has gained of religious development in past ages, and fall back upon that corruption and perversion of Sabaism from which it was the object, even of the Spurious Freemasonry of antiquity, to rescue its disciples.

The Templar interpretation of the myth must at once be discarded if we would avoid the difficulties of anachronism, unless we deny that the legend existed before the abolition of the Order of Knights Templar, and such denial would be fatal to the Antiquity of Freemasonry.

And as to the adoption of the Christian reference, Hutchinson and, after him, Oliver, profoundly philosophical as are the Masonic speculations of both, have, I am constrained to believe, fallen into a great error in calling the Master Mason's Degree a Christian institution. It is true that it embraces within its scheme the great truths of Christianity upon the subject of the immortality of the soul and the resurrection of the body; but this was to be presumed, because Freemasonry is truth, and Christianity is truth, and all truth must be identical. But the origin of each is different; their histories are dissimilar. The creed of Freemasonry is the primitive one of Noah and his immediate descendants. If Masonry were simply a Christian institution, the Jew and the Moslem, the Brahman and the Buddhist, could not conscientiously partake of its illumination; but its universality is its boast. In its language, citizens of every nation may converse; at its altar men of all religions may kneel; to its creed, disciples of every faith may subscribe.

But the true ancient interpretation of the legend—the universal, Masonic one—for all countries and all ages, undoubtedly, was that the fate of the Temple Builder is but figurative of the pilgrimage of man on earth, through trials and temptations, through sin and sorrow, until his eventual fall beneath the blow of death and his final and glorious resurrection to another and an eternal life.

And now, in conclusion, a word of historical criticism may not be misplaced. It is not at all essential to the value of the symbolism that the legend shall be proved to be historical. Whether considered as a truthful narrative of an event that actually transpired during the building of the Temple, or simply as a myth embodying the utterance of a religious sentiment, the symbolic lesson of life and death and immortality is still contained in its teachings, and commands our earnest attention.

Legislation. On the subject of that crying sin of the Order—over-legislation by Grand Lodges—Gov. Thomas Brown, formerly Grand Master of Florida, has wisely said: "Too much legislation is the vice of the present day, as well in *Masonic* as in civil government. The same thirst for change and innovation which has prompted tyros and demagogues to legislate upon constitutional law, and write expositions of the common law, has prompted uninformed and unscrupulous Masons to legislate upon the landmarks of Masonry."

Lehrling. German for an Entered Apprentice.

Leland, John. An eminent English antiquary, the chaplain of King Henry VIII., who appointed him "King's Antiquary," a title which he was the first and last to bear. The king also directed him to search after the antiquities of England, "and peruse the libraries of all cathedrals, abbies, priories, colleges, etc., as also all places wherein records, writings, and secrets of antiquity were deposited." Leland, accordingly, traveled over England for several years, and made many collections of manuscripts, which were afterward deposited in the Bodleian Library. He was a man of great learning and industry. He was born in London in the beginning of the sixteenth century (the exact year is uncertain), and died on the 18th of April, 1552. Anthony Wood says that he was by far the most eminent historian and antiquary ever born in England. His connection with Freemasonry arises from the manuscript containing the questions of King Henry VI., which he is said to have copied from the original. (See *Leland Manuscript.*)

Leland Manuscript. There is no one of the old Records of Freemasonry, except, perhaps, the Charter of Cologne, that has given rise to more controversy among the critics than the one generally known as the "Leland Manuscript." It derives this name from the statement made in its title, which is: "Certayne questyons with awnsweres to the same, concernynge the mystery of maconrye; wryttene by the hande of Kynge Henry the Sixthe of the name, and faythfullye copied by me, Johan Leylande Antiquarius, by the commaunde of His Highnesse." It first appeared in the *Gentleman's Magazine* for 1753 (p. 417), where it purports to be a reprint of a pamphlet published five years before at Frankfort. The title of the paper in the *Gentleman's Magazine* is: "Copy of a small pamphlet, consisting of twelve pages in 8vo, printed in Germany in 1748, entitled 'Ein Brief von dem berühmten Heren Johann Locke betreffend die Frey-Maurerein. So auf einem Schreib-Tisch eines verstorbnen Bruders ist gefunden worden.'" That is, "A Letter of the famous Mr. John Locke relating to Freemasonry. As found in the writing-desk of a deceased brother." Hearne copied it in his *Life of Leland* (p. 67), prefacing it with the remark that "it also appears that an ancient manuscript of Leland's has long remained in the Bodleian Library, unnoticed in any account of our author yet published." Hearne speaks of it thus:

"The original is said to be in the handwriting of King Henry VI., and copied by Leland by order of His Highness (King Henry VIII.). If the authenticity of this ancient monument of literature remains unquestioned, it demands particular notice in the present publication, on account of the singularity of the subject,

and no less from a due regard to the royal writer, and our author, his transcriber, indefatigable in every part of literature: it will also be admitted, acknowledgment is due to the learned Mr. Locke, who, amidst the closest studies and the most strict attention to human understanding, could unbend his mind in search of this ancient treatise, which he first brought from obscurity in the year 1696."

The Manuscript purports to be a series of questions proposed by Henry VI. and answers given by the Masons. It is accompanied by an introductory letter and a commentary by Mr. Locke, together with a glossary of the archaic words. The best account of the Manuscript is contained in the letter of Locke to a nobleman, said to be the Earl of Pembroke, dated May 6, 1696, in which, after stating that he had procured a copy of it from the Bodleian Library, he adds:

"The Manuscript of which this is a copy appears to be about one hundred and sixty years old; yet (as your Lordship will observe by the title) it is itself a copy of one yet more ancient by about one hundred years. For the original is said to have been in the handwriting of King Henry the VI. Where that prince had it is an uncertainty; but it seems to me to be an examination (taken, perhaps, before the King) of some one of the Brotherhood of Masons, among whom he entered himself, as 'tis said, when he came out of his minority, and thenceforth put a stop to a persecution that had been raised against them."

After its appearance in the *Gentleman's Magazine*, which first introduced the knowledge of it to the world, and in Huddesford's *L. of Leland*, who evidently copied it from the *Magazine*, it next appeared, in 1764, in the *Pocket Companion*, and in 1769 in Calcott's *Candid Disquisition*. In 1775, Hutchinson introduced it into his *Spirit of Masonry*. Dermott published it in his *Ahiman Rezon*, and Preston in his *Illustrations*. Noorthouck, in 1784, embodied it in his edition of the *Constitutions;* and it has since been repeatedly published in England and America, so that the Craft have had every opportunity of becoming familiar with its contents. Translations of it have also been given in French by Thory, in his *Acta Latomorum;* in German by Lenning, in his *Encyclopädie;* by Krause, in his *Kunsturkunden*, and also by Fessler and several other French and German writers.

This document—so important, if true, as a record of the condition of Freemasonry in the beginning of the fifteenth century—has been from an early period attacked and defended with equal vehemence by those who have denied and those who have maintained its authenticity. As early as 1787, the Baron de Chefdebien, in a discourse entitled *Recherches Maçonniques à l'usage des Frères de Régime primif de Narbonne*, read before the Congress of the Philalethans, attacked the authenticity of the document. Thory also, although acknowledging that he wished that the Manuscript was true, presented his objections to its authenticity in a memoir read in 1806 before the Tribunal of the Philosophic Rite. His objections are eight in number, and are to this effect: 1. That it was not published in any of the early editions of the works of Locke. 2. That it was printed for the first time at Frankfort, in 1748. 3. That it was not known in England until 1753. 4. That Anderson makes no mention of it. 5. That it is not in any of the editions of Leland's works printed before 1772. 6. That Dr. Plot contends that Henry VI. was never made a Mason. 7. That the Manuscript says that Masonry was brought from the East by the Venetians. 8. That the troubles in the reign of Henry VI., and his incapacity, render it improbable that he would have occupied his mind with the subject of Freemasonry. The sixth and eighth of these objections merely beg the question; and the seventh is puerile, founded on ignorance of the meaning of the word "Venetian." But the other objections have much weight. Sloane, in his *New Curiosities of Literature* (1849, vol. ii., p. 80), attacks the document with the bitterness which he usually displays wherever Freemasonry is concerned.

Halliwell, in his *Early History of Freemasonry in England* (p. 40), has advanced the following arguments against its authenticity:

"It is singular that the circumstances attending its publication should have led no one to suspect its authenticity. I was at the pains of making a long search in the Bodleian Library last summer, in the hopes of finding the original, but without success. In fact, there can be but little doubt that this celebrated and well-known document is a forgery!

"In the first place, why should such a document have been printed abroad? Was it likely that it should have found its way to Frankfort, nearly half a century afterwards, and been published without any explanation of the source whence it was obtained? Again, the orthography is most grotesque, and too gross ever to have been penned either by Henry VI. or Leland, or both combined. For instance, we have Peter Gower, a Grecian, explained in a note by the fabricator—for who else could have solved it?—to be Pythagoras! As a whole, it is but a clumsy attempt at deception, and is quite a parallel to the recently discovered one of the *first Englishe Mercurie*."

Among the German opponents of the Manuscript are Lessing, Keller, and Findel; and more recently, the iconoclasts of England, who have been attacking so many of the ancient records of the Craft, have not left this one unspared.

On the other hand, it has ranked among its advocates some of the most learned Masons of England, Germany, and France, of whom may be named Krause, Fessler, Lenning, Reghellini, Preston, Hutchinson, Calcott (these three, perhaps, without critical examination), and Oliver. Of these the language of the last may be cited as a specimen of the arguments adduced in its favor.

"This famous Manuscript," says Dr. Oliver (*Freemasons' Quart. Rev.*, 1840, p. 10), "pos-

sesses the reputation of having converted the learned Locke, who was initiated after carefully perusing and analyzing it. Before any faith can be placed on this invaluable document, it will be necessary to say a word respecting its authenticity. I admit that there is some degree of mystery about it, and doubts have been entertained whether it be not a forgery. We have the strongest presumptive proofs that it was in existence about the middle of the last century, because the utmost publicity was given to it; and as at that time Freemasonry was beginning to excite a considerable share of public attention, the deception, had it been such, would have been publicly exposed by its opponents, who appear to have used the lash of ridicule very freely, as witness Hogarth's picture of *Night*, where the principal figures represent some brethren, decorated with aprons and jewels, returning from the Lodge in a state of intoxication; the broad sheet of the *Scald Miserables*, and other prints and publications in which Freemasonry is burlesqued. But no attempt was ever made to invalidate its claim to be a genuine document."

After enumerating the several books in which it had been published, he resumes his argument, as follows:

"Being thus universally diffused, had it been a suspected document, its exposure would certainly have been attempted; particularly about the close of the last century, when the progress of Masonry was sensibly checked by the publication of works which charged it with being the depository of principles fatal equally to the peace and religion of civil society; and if a forgery, it would have been unable to have endured the test of a critical examination. But no such attempt was made; and the presumption therefore is that the document is authentic.

"I should be inclined to pronounce, from internal evidence only, that the 'Letter and Annotations' were written by Locke; but there are corroborating facts which appear conclusive; for this great philosopher was actually residing at Oates, the country-seat of Sir Francis Masham, at the time when the paper is dated; and shortly afterwards he went up to town, where he was initiated into Masonry. These facts are fully proved by Locke's Letters to Mr. Molyneux, dated March 30 and July 2, 1696. For these reasons I entertain no doubt of the genuineness and authenticity of this valuable Manuscript."

If my own opinion is worth giving on this subject, I should say with much reluctance, and against my own wishes, that there is neither internal nor external evidence of the authenticity of this document to make it a sufficient foundation for historical evidence. [R. F. Gould (*Hist. of F. M.*, i., 489) styles the document "an impudent forgery."—E. L. H.]

Lemanceau. A zealous French Mason, and the possessor of a fine collection of degrees, the nomenclature of which is preserved by Thory in his *Acta Latomorum*. The most important are referred to in the present work.

Lemierre, A. M. Born in 1733, died in 1793. A writer of merit who belonged to the "Neuf Sœurs," and was present at the reception of Voltaire.

Length of the Lodge. See *Extent of the Lodge*.

Lenning, C. The assumed name of a learned German Mason, who resided at Paris in 1817, where Krause speaks of him as an estimable man and well-informed Freemason. He was the first projector of the *Encyclopädie der Freimaurerei*, which Findel justly calls "one of the most learned and remarkable works in Masonic literature." The manuscript coming into the possession of the Leipsic bookseller, Brockhaus, he engaged Friedrich Mossdorf to edit it. He added so much to the original, revising and amplifying all the most important articles and adding many new ones, that Kloss catalogues it in his *Bibliographie* as the work of Mossdorf. The *Encyclopädie* is in three volumes, of which the first was published in 1822, the second in 1824, and the third in 1828. A second edition, under the title of *Handbuch der Freimaurerei*, was published under the editorship of Schletter and Zille. A third edition in two volumes was published in 1900 (first vol.) and 1901 (second vol.).

Lenoir, Alexandre. A celebrated archeologist, who was born at Paris in 1761. Having studied at the Mazarin College, he entered the studio of Doyeu, and successfully cultivated painting. In 1790, the National Assembly having decreed that the treasures of art in the suppressed churches and convents should be collected at the Petits-Augustins, he was appointed the Conservator of the depot, which was subsequently called the Museum, of which he was then made the Director. He there collected more than five hundred monuments rescued from destruction, and classified them with great care. On the conversion of the garden of Moasseaux into a Museum of Monuments, he was appointed one of the administrators, and subsequently the administrator of the monuments of the Church of St. Denis. In all these appointments, Lenoir exhibited his taste and judgment as an archeologist. He was a member of the Society of Antiquaries of France, to whose *Transactions* he contributed several memoirs.

The Metropolitan Chapter of France had, from the year 1777, annually held philosophical conventions, at which lectures on Masonic subjects were delivered by such men as Court de Gebelin. In 1789 these conventions were discontinued in consequence of the political troubles of the times, but they were renewed in 1812 by M. Lenoir, who delivered before the Chapter a course of eight lectures on the relations which exist between the ancient mysteries of the Egyptians and the Greeks and those of Freemasonry. In 1814, he published the substance of these lectures in a work entitled *La Franche-Maçonnerie rendue à sa veritable origine, ou l'Antiquité de la Franche-Maçon-*

nerie prouvée par l'Explication des Mystères Anciens et Modernes (Paris, 4to, p. 304). The theory of the author being that the mysteries of Freemasonry are only a repetition of those of antiquity, he attempts to support it by investigations into the ancient initiations that are marked with profound learning, although the work was severely criticised in the *Journal de Débats*. He had previously published, in 1809, a work in three volumes, entitled *Nouvelle Explication des Hieroglyphes ou Anciens Allegories sacrées des Egiptiennes*. He died at Paris, June 12, 1839.

Leontica. Ancient sacrificial festivals in honor of the sun; the officiating priests being termed Leontes.

Leo XII., Pope. Born in 1760, died in 1829. On the 13th of March, 1825, he issued the well-remembered bull, beginning "Quo graviora mala," against the Freemasons.

Lepage. One of those French Masons who in the latter part of the last century occupied themselves in the accumulation of *cahiers* or rituals of Masonic degrees. Most of the degrees in his collection, which is said to have been a valuable one, are referred to by Thory in the nomenclature contained in his *Acta Latomorum*.

Lerouge, André Joseph Etienne. A man of letters and zealous Mason of Paris, born at Commercy, April 25, 1766. He made a large and valuable collection of manuscript and printed degrees. He died in 1834, and on the 7th of January, 1835, his collection was sold at public auction. Thory has made use of it in his *Nomenclature des Grades*. Lerouge was the author of several didactic writings on Masonic subjects, all of which, however, have had but an ephemeral existence. He was one of the editors of the French Masonic journal *Hermes*, published in 1819, and of the *Melanges de Philosophic, d'Histoire et de Literature Maçonnique*. He was a man of much learning, and is said to have supplied several of his Masonic contemporaries with assistance in the preparation of their works.

Lesser Lights. In the lecture of the First Degree we are told that a Lodge has three symbolic lesser lights; one of these is in the East, one in the West, and one in the South. There is no light in the North, because King Solomon's Temple, of which every Lodge is a representation, was placed so far north of the ecliptic that the sun and moon, at their meridian height, could dart no rays into the northern part thereof. The North we therefore Masonically call a place of darkness.

This symbolic use of the three lesser lights is very old, being found in the earliest lectures of the last century.

The three lights, like the three principal officers and the three principal supports, refer, undoubtedly, to the three stations of the sun —its rising in the East, its meridian in the South, and its setting in the West; and thus the symbolism of the Lodge, as typical of the world, continues to be preserved.

The use of lights in all religious ceremonies is an ancient custom. There was a seven-branched candlestick in the tabernacle, and in the Temple "were the golden candlesticks, five on the right hand and five on the left." They were always typical of moral, spiritual, or intellectual light.

The custom prevalent in some localities, of placing the burning tapers, or three symbolic lesser lights, East, West, and South, near the altar, is sometimes changed so that these respective lights are burning on or beside the pedestals of the Master and his two Wardens at their several stations. In the old Teutonic mythology, and in accordance with Medieval court usage, flaming lights or fires burned before each column, similarly situated, on which rested the image of Odin, Thor, and Frey. These columns are further represented as Wisdom, Strength, and Beauty, sustaining the "Starry-decked Heaven," roof or ceiling colored blue, with stars.

Lessing, Gottfried Ephraim. A learned litterateur of Germany, who was born at Kaumitz, in the Neiderlausetz, January 22, 1729, and died on the 15th of February, 1781, at Woefenbutal, where he was librarian to the Duke of Brunswick. Lessing was initiated in a Lodge at Hamburg, and took great interest in the Institution. His theory, that it sprang out of a secret association of Templars which had long existed in London, and was modified in form by Sir Christopher Wren, has long been rejected, if it was ever admitted by any; but in his two works *Ernst und Falk* and *Nathan der Weise*, he has given profound and comprehensive views on the genius and spirit of Freemasonry. Lessing was the most eminent litterateur of his age, and has been styled "the man who was the forerunner of the philosophers, and whose criticisms supplied the place of poetry.". (See *Ernest and Falk*.)

Lessons. The passages of Scripture recited by the Prelate in the ceremony of inducting a candidate into the Masonic Order of Knights Templar. It is an ecclesiastical term, and is used by the Templars because these passages are intended to instruct the candidate in reference to the incidents of our Savior's life which are referred to in the ritual.

Letter of Application. More properly called a *Petition*, which see.

Letters Patent. See *Patents*.

Lettuce. A sacred plant used in the mysteries of Adonis, and therefore the analogue of the Acacia in the mysteries of Freemasonry.

Leucht. A Masonic charlatan of the eighteenth century, better known by his assumed name of *Johnson*, which see.

Level. In Freemasonry, the level is a symbol of equality; not of that social equality which would destroy all distinctions of rank and position, and beget confusion, insubordination, and anarchy; but of that fraternal equality which, recognizing the fatherhood of God, admits as a necessary corollary the brotherhood of man. It, therefore, teaches us that, in the sight of the Great Architect of the Universe, his creatures, who are at an im-

measurable distance from him, move upon the same plane; as the far-moving stars, which though millions of miles apart, yet seem to shine upon the same canopy of the sky. In this view, the level teaches us that all men are equal, subject to the same infirmities, hastening to the same goal, and preparing to be judged by the same immutable law.

The level is deemed, like the square and the plumb, of so much importance as a symbol, that it is repeated in many different relations. First, it is one of the jewels of the Lodge; in the English system a movable, in the American an immovable, one. This leads to its being adopted as the proper official ensign of the Senior Warden, because the Craft when at labor, at which time he presides over them, are on a common level of subordination. And then it is one of the working-tools of a Fellow-Craft, still retaining its symbolism of equality.

Levi, Eliphas. The pseudonym of Louis Alphonse Constance, a prolific writer on Magical Masonry, or of works in which he seeks to connect the symbols of Masonry with the dogmas of the High Magic. His principal works, which abound in dreamy speculations, are *Dogme et Rituel de la Haute Magie*, Paris, 1860; *Histoire de la Magie*, same place and year; and *Le Clef des Grand Mystères*, published a year afterward.

Levit, Der. The Levite was the fourth grade of the Order of the Knights of the True Light.

Levite, Knight. The Knight Levite was the fourth section of the Seventh Degree of the Rite of Clerks of Strict Observance.

Levite of the External Guard. The lowest of the nine Orders of the Priesthood, or highest of the Masonic degrees in the Order of the Temple as modified by Fabré-Palaprat. It was equivalent to Kadosh.

Levites. Those descendants of Levi who were employed in the lowest ministerial duties of the Temple, and were thus subordinate to the priests, who were the lineal descendants of Aaron. They are represented in some of the high degrees.

Levite, Sacrificer. A degree in the collection of the Mother Lodge of the Philosophic Scottish Rite.

Levitikon. There is a spurious Gospel of St. John, supposed to have been forged in the fifteenth century, which contradicts the genuine Gospel in many particulars. It contains an introduction and a commentary, said to have been written by Nicephorus, a Greek monk of Athens. This commentary is called the "Levitikon." Out of this Gospel and its commentary, Fabré-Palaprat, about the year 1814, composed a liturgy for the sect of Johannites, which he had established and attached to the Order of the Temple at Paris.

Levy. A collection of men raised for a particular purpose. The lectures tell us that the timbers for building the Temple at Jerusalem were felled in the forests of Lebanon, where a *levy* of thirty thousand men of Jerusalem were employed by monthly courses of ten thousand. Adoniram was placed over this levy. The facts are derived from the statement in 1 Kings v. 13, 14: "And King Solomon raised a levy out of all Israel; and the levy was thirty thousand men. And he sent them to Lebanon ten thousand a month by courses; a month they were in Lebanon and two months at home: and Adoniram was over the levy." These wood-cutters were not Tyrians, but all Israelites.

Lewis. 1. An instrument in Operative Masonry. It is an iron cramp which is inserted in a cavity prepared for that purpose in any large stone, so as to give attachment to a pulley and hook whereby the stone may be conveniently raised to any height and deposited in its proper position. It is well described by Mr. Gibson, in the *British Archæologia* (vol. x., p. 127); but he is in error in attributing its invention to a French architect in the time of Louis XIV., and its name to that monarch. The contrivance was known to the Romans, and several taken from old ruins are now in the Vatican. In the ruins of Whitby Abbey, in England, which was founded by Oswy, King of Northumberland, in 658, large stones were discovered, with the necessary excavation for the insertion of a lewis. The word is most probably derived from the old French *lévis*, any contrivance for lifting. The modern French call the instrument a *louve*.

2. In the English system, the lewis is found on the tracing-board of the Entered Apprentice, where it is used as a symbol of strength, because, by its assistance, the Operative Mason is enabled to lift the heaviest stones with a comparatively trifling exertion of physical power. It has not been adopted as a symbol by the American Masons, except in Pennsylvania, where, of course, it receives the English interpretation.

3. The son of a Mason is, in England, called a lewis, because it is his duty to support the sinking powers and aid the failing strength of his father; or, as Oliver has expressed it, "to bear the burden and heat of the day, that his parents may rest in their old age; thus rendering the evening of their lives peaceful and happy." In the rituals of the middle of the last century he was called a *louffton*. From this the French derived their word *lufton*, which they apply in the same way. They also employ the word *louveteau*, and call the daughter of a Mason *louvetine*. Louveteau is probably derived directly from the louve, the French name of the implement; but it is a singular coincidence that louveteau also means a young wolf, and that in the Egyptian mysteries of Isis the candidate was made to wear the mask of a wolf's head. Hence, a wolf and a candidate in these mysteries were often used as synonymous terms. Macrobius, in his *Saturnalia*, says, in reference to this custom, that the ancients perceived a relationship between the sun, the great symbol in these mysteries, and a wolf, which the candidate represented at his initiation. For, he remarks, as the flocks of sheep and cattle fly and disperse at the sight of the wolf, so the flocks of

stars disappear at the approach of the sun's light. The learned reader will also recollect that in the Greek language *lukos* signifies both the sun and a wolf. Hence some etymologists have sought to derive *louveteau*, the son of a Mason, from *louveteau*, a young wolf. But the more direct derivation from *louve*, the operative instrument is preferable.

In Browne's *Master Key*, which is supposed to represent the Prestonian lecture, we find the following definition:

"What do we call the son of a Freemason?

"A lewis.

"What does that denote?

"Strength.

"How is a lewis depicted in a Mason's Lodge?

"As a cramp of metal, by which, when fixed into a stone, great and ponderous weights are raised to a certain height and fixed upon their proper basis, without which Operative Masons could not so conveniently do.

"What is the duty of a lewis, the son of a Mason, to his aged parents?

"To bear the heavy burden in the heat of the day and help them in time of need, which, by reason of their great age, they ought to be exempted from, so as to render the close of their days happy and comfortable.

"His privilege for so doing?

"To be made a Mason before any other person, however dignified by birth, rank, or riches, unless he, through complaisance, waives this privilege."

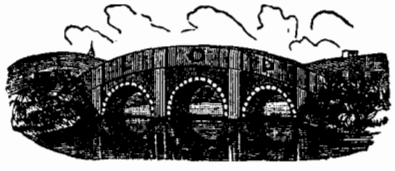
[The term occurs in this sense in the *Constitutions* of 1738 at the end of the Deputy Grand Master's song—in allusion to the expected birth of George III., son of Frederick, Prince of Wales:

"May a Lewis be born, whom the World shall admire, Serene as his Mother, August as his Sire."

It is sometimes stated that a Lewis may be initiated before he has reached the age of twenty-one; but this is not so under the English Constitution, by which a dispensation is required in all cases of initiation under age, as was distinctly stated at the meeting of the Grand Lodge of England held on December 2, 1874. The Scotch Constitution, however, does allow a Lewis to be entered at eighteen years of age. (Rule 180.)

No such right is recognized in America, where the symbolism of the Lewis is unknown, though it has been suggested, not without some probability, that the initiation of Washington when he was only twenty years and eight months old, may be explained by a reference to this supposed privilege of Lewis.—E. L. H.]

Lexington, Congress of. This Congress was convoked in 1853, at Lexington, Kentucky, for the purpose of attempting to form a General Grand Lodge.* A plan of constitution was proposed, but a sufficient number of Grand Lodges did not accede to the proposition to give it efficacy.



* See *General Grand Lodge.*

Libanus. The Latin name of *Lebanon*, which see.

Libation. Among the Greeks and Romans the libation was a religious ceremony, consisting of the pouring of wine or other liquid upon the ground, or, in a sacrifice, upon the head of the victim after it had been first tasted by the priest and by those who stood next to him. The libations were usually of unmixed wine, but were sometimes of mingled wine and water. Libations are used in some of the chivalric and the high degrees of Masonry.

Libavius, Andreas. A learned German physician, who was born at Halle, in Saxony, and died at Coburg, where he was rector of the Gymnasium in 1616. He was a vehement opponent of Paracelsus and of the Rosicrucians. In 1613 he published at Frankfort his *Syntagma selectorum alchimia arcanorum*, in two folio volumes, and two years after, an *Appendix*, in which he attacks the Society of the Rosicrucians, and analyzes the *Confessio* of Valentine Andreä. De Quincey has used the works of Libavius in his article on Secret Societies.

Liber. Liberty. Of which the eagle, in the Rose Croix Degree, is symbolical. Liberty of thought, speech, and action, within the bounds of civil, political, and conscientious law, without license. A book, and hence the word library, or collection of books. It was also one of the names of the god Bacchus. The freedom which knowledge confers. Liber, the bark, or inner rind of a tree, on which books were originally written; hence, leaves

of a book and leaves of a tree; or, similarly in Latin, folio of a book, the foliage of a tree. Thus, the "tree of knowledge" becomes the "book of wisdom"; the "tree of life" becomes the "book of life." (See *Lakak Deror Pessah* and *Libertas*.) The Bridge mentioned in the Sixteenth Degree, Scottish Rite, has the initials of Liberty of Passage over its arches.

Liberal Arts and Sciences. We are indebted to the Scholastic philosophers of the Middle Ages for the nomenclature by which they distinguished the seven sciences then best known to them. With the metaphorical spirit of the age in which they lived, they called the two classes into which they divided them the *trivium*, or meeting of three roads, and the *quadrivium*, or meeting of four roads; calling grammar, logic, and rhetoric the trivium, and arithmetic, geometry, music, and astronomy the quadrivium. These they styled the seven liberal arts and sciences, to separate them from the mechanical arts which were practised by the handicraftsmen. The liberal man, *liberalis homo*, meant, in the Middle Ages, the man

who was his own master—free, independent, and often a nobleman.

Mosheim, speaking of the state of literature in the eleventh century, uses the following language: "The seven liberal arts, as they were now styled, were taught in the greatest part of the schools that were erected in this century for the education of youth. The first stage of these sciences was grammar, which was followed successively by rhetoric and logic. When the disciple, having learned these branches, which were generally known by the name of *trivium*, extended his ambition further, and was desirous of new improvement in the sciences, he was conducted slowly through the *quadrivium* (arithmetic, music, geometry, and astronomy) to the very summit of literary fame."

The Freemasons of the Middle Ages, always anxious to elevate their profession above the position of a mere operative art, readily assumed these liberal arts and sciences as a part of their course of knowledge, thus seeking to assimilate themselves rather to the scholars who were above them than to the workmen who were below them.* Hence in all the Old Constitutions we find these liberal arts and sciences introduced at the beginning as forming an essential part of the body of Masonry. Thus, in the Lansdowne MS., whose date is about 1560 (and it may be taken as a fair specimen of all the others), these sciences are thus referred to:

"Wee minde to shew you the charge that belongs to every trew Mason to keep, for in good and ffaith if you take good heed it is well worthy to be kept for A worthy Craft and curious science,—Sirs, there be Seaven Liberall Sciencies of the which the Noble Craft of Masonry is one." And then the writer proceeds to define them in the order which they still retain. It is noteworthy, however, that that order must have been changed; for in what is probably the earliest of the manuscripts—the Regius MS.—geometry appears as the last, instead of the fifth of the sciences, and arithmetic as the sixth. (Lines 557–563.)

It is not therefore surprising that, on the revival of Masonry in 1717, these seven liberal arts and sciences were made a part of the system of instruction. At first, of course, they were placed in the Entered Apprentice's Degree, that being the most important degree of the period, and they were made to refer to the seven Masons who composed a Lodge. Afterward, on the more methodical division of the degrees, they were transferred to the Fellow-Craft, because that was the degree symbolic of science, and were made to refer to seven of the steps of the winding stairs, that being itself, when properly interpreted, a symbol of the progress of knowledge. And there they still remain.

Libertas. (Latin) Liberty. A significant word in the Red Cross Degree. It refers to the "liberty of passage" gained by the returning Jews over their opponents at the river Euphrates, as described in the Scottish Rite degree of Knight of the East, where the old French rituals have "liberté du passer."

Liberte, Ordre de la. (*Order of Liberty.*) A French androgyn Order existing in Paris in 1740, and the precursor of "La Maçonnerie d'Adoption." (Thory, *Acta Lat.*, i., 320.)

Libertine. The Charges of 1722 commence by saying that "a Mason is obliged by his tenure to obey the moral law; and if he rightly understands the art, he will never be a stupid Atheist, nor an *irreligious libertine*." (*Constitutions*, 1723, p. 50.) The word "libertine" there used conveyed a meaning different from that which it now bears. In the present usage of language it signifies a profligate and licentious person, but originally it meant a freethinker, or Deist. Derived from the Latin "libertinus," a man that was once a bondsman but who has been made free, it was metaphorically used to designate one who had been released, or who had released himself from the bonds of religious belief, and become in matters of faith a doubter or denier. Hence "a stupid Atheist" denoted, to use the language of the Psalmist, "the fool who has said in his heart there is no God," while an "irreligious libertine" designated the man who, with a degree less of unbelief, denies the distinctive doctrines of revealed religion. And this meaning of the expression connects itself very appropriately with the succeeding paragraph of the Charge. "But though in ancient times, Masons were charged in every country to be of the religion of that country or nation, whatever it was, yet 'tis now thought more expedient only to oblige them to that religion in which all men agree, leaving their particular opinions to themselves."

The expression "irreligious libertine," alluding, as it does, to a scoffer at religious truths, is eminently suggestive of the religious character of our Institution, which, founded as it is on the great doctrines of religion, cannot be properly appreciated by anyone who doubts or denies their truth.

"Liberty, Equality, Fraternity." The motto of the French Freemasons.

Liberty of Passage. A significant phrase in the high degrees. (See *Libertas*.) The French rituals designate it by the letters L.·. D.·. P.·. as the initials of *liberté de passer*, or liberty of passage. But Bro. Pike proposes to interpret these letters as *liberté de penser*, liberty of thought; the prerogative of a freeman and a Freemason.

Library. It is the duty as well as the interest of Lodges to facilitate the efforts of the members in the acquisition of Masonic knowledge, and no method is more appropriate than the formation of Masonic libraries. The establishment of a Grand Lodge library is of course not objectionable, but it is of far less value and importance than a Lodge library. The original outlay of a few dollars in the beginning for its establishment, and of a few

*The claim has been made that Charlemagne, in his castle at Aix-la-Chapelle, set apart a separate place where the Seven Liberal Arts and Sciences were taught. [E. E. C.]

more annually for its maintenance and increase, would secure to every Lodge in the land a rich treasury of Masonic reading for the information and improvement of its members. The very fact that Masonic books were within their reach, showing themselves on the well-filled shelves at every meeting, and ready at their hands for the mere asking or the trouble of taking them down, would induce many brethren to read who never yet have read a page or even a line upon the subject of Masonic history and science.

Considering the immense number of books that have been published on the subject of Speculative Masonry, many of which would be rendered accessible to every one by the establishment of Lodge libraries, the Mason who would then be ignorant of the true genius of his art would be worthy of all shame and reproach.

As thoughtful municipalities place public fountains in their parks and at the corners of streets, that the famished wayfarer may allay his thirst and receive physical refreshment, so should Masonic Lodges place such intellectual fountains in reach of their members, that they might enjoy mental refreshment. Such fountains are libraries; and the Lodge which spends fifty dollars, more or less, upon a banquet, and yet does without a library, commits a grave Masonic offense; for it refuses, or at least neglects, to diffuse that light among its children which its obligation requires it to do.

Of two Lodges—the one without and the other with a library—the difference is this, that the one will have more ignorance in it than the other. If a Lodge takes delight in an ignorant membership, let it forego a library. If it thinks there is honor and reputation and pleasure in having its members well informed, it will give them means of instruction.*

Libyan or **Lybic Chain.** The eighty-fifth grade of the Rite of Memphis; old style.

Licht, Ritter von Wahren. Knight of the True Light, presumed to have been founded in Austria, in 1780, by Hans Heinrich Freiherr von Ecker and Eckhoffen. It consisted of five grades.

Lichtseher, Oder Erleuchtete. (*The Enlightened.*) A mystical sect established at Schlettstadt by Küper Martin Steinbach, in the sixteenth century. Mentioned in the *Handbuch*, in 1566, by Pastor Reinhard Lutz. It delved in Scriptural interpretation.

Lieutenant Grand Commander. The title of the second and third officers of a Grand Consistory in the Ancient and Accepted Scottish Rite, and the second officer in a Supreme Council.

Life. The three stages of human life are said in the lectures to be symbolized by the three degrees of Ancient Craft Masonry, and the doctrine is illustrated in the Third Degree by the emblem of the *Steps on the Master's Carpet*, which see.

Life, Eternal. See *Eternal Life*.

Life Member. It is the custom in some Lodges to permit a member to become a life member by paying dues for some number of years (21 to 25) determined by the By-Laws of the Lodge or the immediate payment of a sum of money, after which he is released from any subsequent payment of quarterly or yearly dues. Such a system is of advantage in a pecuniary sense to the Lodge, if the money paid for life membership is invested in profitable stock, because the interest continues to accrue to the Lodge even after the death of a member. A Lodge consisting entirely of life members would be a Lodge the number of whose members might increase, but could never decrease. Life members are subject to all the discipline of the Lodge, such as suspension or expulsion, just as the other members. [Such Life Membership is, however, not recognized by the Grand Lodge of England, which restricts the privileges of the Craft to those who continue to be subscribing members of some Lodge. (*Report of G. L. of England for June, 1873.*)—E. L. H.]

Light. Light is an important word in the Masonic system. It conveys a far more recondite meaning than it is believed to possess by the generality of readers. It is in fact the first of all the symbols presented to the neophyte, and continues to be presented to him in various modifications throughout all his future progress in his Masonic career. It does not simply mean, as might be supposed, *truth* or *wisdom*, but it contains within itself a far more abstruse allusion to the very essence of Speculative Masonry, and embraces within its capacious signification all the other symbols of the Order. Freemasons are emphatically called the "sons of light," because they are, or at least are entitled to be, in possession of the true meaning of the symbol; while the profane or uninitiated who have not received this knowledge are, by a parity of expression, said to be in darkness.

The connection of material light with this emblematic and mental illumination, was prominently exhibited in all the ancient systems of religion and esoteric mysteries.

Among the Egyptians, the hare was the heiroglyphic of eyes that are open, because that animal was supposed to have his eyes always open. The priests afterward adopted the hare as the symbol of the moral illumination revealed to the neophytes in the contemplation of the Divine truth, and hence, according to Champollion, it was also the symbol of Osiris, their principal divinity, and the chief object of their mystic rites—thus showing the intimate connection that they maintained in their symbolic language between the

* The three most important Masonic libraries in America are: The Grand Lodge Library of Iowa, at Cedar Rapids, it having a separate building devoted entirely to its uses, and containing a large number of books and collections, many of which are rare. The Grand Lodges of both Pennsylvania and Massachusetts have been ardent collectors of Masonic literature. The Grand Lodge of Massachusetts has lately acquired by gift of the late Samuel R. Lawrence his own library and that of Enoch T. Carson, which he had purchased. [E. E. C.]

process of initiation and the contemplation of divinity. On this subject a remarkable coincidence has been pointed out by M. Portal (*Symb. des Egypt*, 69), in the Hebrew language. There the word for "hare" is *arnebet*, which seems to be compounded of *aur*, "light," and *nabat*, "to see"; so that the word which among the Egyptians was used to designate an initiation, among the Hebrews meant to see the light.

If we proceed to an examination of the other systems of religion which were practised by the nations of antiquity, we shall find that light always constituted a principal object of adoration, as the primordial source of knowledge and goodness, and that darkness was with them synonymous with ignorance and evil. Dr. Beard (*Encyc. Bib. Lit.*) attributes this view of the Divine origin of light among the Eastern nations, to the fact that "light in the East has a clearness and brilliancy, is accompanied by an intensity of heat, and is followed in its influence by a largeness of good, of which the inhabitants of less genial climates have no conception. Light easily and naturally became, in consequence, with Orientals, a representative of the highest human good. All the more joyous emotions of the mind, all the pleasing sensations of the frame, all the happy hours of domestic intercourse, were described under imagery derived from light. The transition was natural—from earthly to heavenly, from corporeal to spiritual things; and so light came to typify true religion and the felicity which it imparts. But as light not only came from God, but also makes man's way clear before him, so it was employed to signify moral truth, and pre-eminently that divine system of truth which is set forth in the Bible, from its earliest gleamings onward to the perfect day of the Great Sun of Righteousness."

As light was thus adored as the source of goodness, darkness, which is the negation of light, was abhorred as the cause of evil, and hence arose that doctrine which prevailed among the ancients, that there were two antagonistic principles continually contending for the government of the world.

"Light," says Duncan (*Relig. of Prof. Ant.*, 187), "is a source of positive happiness: without it man could barely exist. And since all religious opinion is based on the ideas of pleasure and pain, and the corresponding sensations of hope and fear, it is not to be wondered if the heathen reverenced light. Darkness, on the contrary, by replunging nature, as it were, into a state of nothingness, and depriving man of the pleasurable emotions conveyed through the organ of sight, was ever held in abhorrence, as a source of misery and fear. The two opposite conditions in which man thus found himself placed, occasioned by the enjoyment or the banishment of light, induced him to imagine the existence of two antagonistic principles in nature, to whose dominion he was alternately subjected."

Such was the dogma of Zoroaster, the great Persian philosopher, who, under the names of Ormuzd and Ahriman, symbolized these two principles of light and darkness.

Such was also the doctrine, though somewhat modified, of Manes, the founder of the sect of Manichees, who describes God the Father as ruling over the kingdom of light and contending with the powers of darkness.

Pythagoras also maintained this doctrine of two antagonistic principles. He called the one, unity, *light*, the right hand, equality, stability, and a straight line; the other he named binary, *darkness*, the left hand, inequality, instability, and a curved line. Of the colors, he attributed white to the good principle, and black to the evil one.

The Jewish Kabbalists believed that, before the creation of the world, all space was filled with the Infinite Intellectual Light, which afterward withdrew itself to an equal distance from a central point in space, and afterward by its emanation produced future worlds. The first emanation of this surrounding light into the abyss of darkness produced what they called the "Adam Kadmon," the first man, or the first production of the Divine energy.

In the Bhagvat Geeta (one of the religious books of the Brahmans), it is said: "Light and darkness are esteemed the world's eternal ways; he who walketh in the former path returneth not—that is, he goeth immediately to bliss; whilst he who walketh in the latter cometh back again upon the earth."

In fact, in all the ancient systems, this reverence for light, as an emblematic representation of the Eternal Principle of Good, is predominant. In the mysteries, the candidate passed, during his initiation, through scenes of utter darkness, and at length terminated his trials by an admission to the splendidly illuminated sacellum, where he was said to have attained pure and perfect light, and where he received the necessary instructions which were to invest him with that knowledge of the Divine truth which had been the object of all his labors.

Lights, Fixed. According to the old rituals of the last century, every Lodge room was furnished, or supposed to be furnished, with three windows, situated in the East, West, and South. They were called the *Fixed Lights*, and their uses were said to be "to light the men to, at, and from their work."

Lights, Greater. The *Bible*, and the *Square and Compasses*, which see. In the Persian initiations, the Archimagus informed the candidate, at the moment of illumination, that the *Divine Lights* were displayed before him.

Light, To Bring to. A technical expression in Masonry meaning to initiate; as, "He was brought to light in such a Lodge," that is, he was initiated in it.

Ligure. לשם. The first stone in the third row of the high priest's breastplate. Commentators have been divided in opinion as to the nature of this stone; but it is now supposed by the best authorities to have been the rubellite, which is a red variety of the tourma-

line. The ligure in the breastplate was referred to the tribe of Dan.

Lilis or **Lilith.** In the popular belief of the Hebrews, a female specter, in elegant attire, who secretly destroys children. The fabled wife of Adam, before he married Eve, by whom he begat devils.

Lily. The plant so frequently mentioned in the Old Testament under the name of lily, as an emblem of purity and peace, was the lotus lily of Egypt and India. It occupied a conspicuous place among the ornaments of the Temple furniture. The brim of the molten sea was wrought with flowers of the lotus; the chapiters on the tops of the pillars at the porch, and the tops of the pillars themselves, were adorned with the same plant. Sir Robert Ker Porter, describing a piece of sculpture which he found at Persepolis, says, "Almost every one in this procession holds in his hand a figure like the lotus. This flower was full of meaning among the ancients, and occurs all over the East. Egypt, Persia, Palestine, and India present it everywhere over their architecture, in the hands and on the heads of their sculptured figures, whether in statue or in bas-relief. We also find it in the sacred vestments and architecture of the tabernacle and Temple of the Israelites. The lily which is mentioned by our Savior, as an image of peculiar beauty and glory, when comparing the works of nature with the decorations of art, was a different flower; probably a species of *lilium*. This is also represented in all pictures of the salutation of Gabriel to the Virgin Mary; and, in fact, has been held in mysterious veneration by people of all nations and times. 'It is the symbol of divinity, of purity, and abundance, and of a love most complete in perfection, charity, and benediction; as in Holy Scripture, that mirror of purity, Susanna is defined *Susa*, which signified the lily flower, the chief city of the Persians, bearing that name for excellency. Hence, the lily's three leaves in the arms of France meaneth Piety, Justice, and Charity.' So far, the general impression of a peculiar regard to this beautiful and fragrant flower; but the early Persians attached to it a peculiar sanctity." We must not, however, forget the difference between the lotus of the Old Testament and the lily of the New. The former is a Masonic plant; the latter is scarcely referred to. Nevertheless, through the ignorance of the early translators as to sacred plants, the lotus is constantly used for the lily; and hence the same error has crept into the Masonic rituals. (See *Lotus*.)

Lily-of-the-Valley. A side degree in the Templar system of France.

Lily Work. The lily work which is described as a part of the ornamentation of the two pillars in the porch of Solomon's Temple is said to be, from the whiteness of the plant, symbolic of purity and peace. Properly, it is lotus work. (See *Lily*, *Lotus*, and *Pillars of the Porch*.)

Limbs. See *Qualifications, Physical*.

Lindner, Friederich Wilhelm. A professor of philosophy in Leipsic, who published in 1818–19 an attack on Freemasonry under the title of *Mac Benac; Er lebet im Sohne; oder das Positive der Freimaurerei*. This work contains some good ideas, although taken from an adverse point of view; but, as Lenning has observed, these bear little fruit because of the fanatical spirit of knight errantry with which he attacks the Institution.

Line. One of the working-tools of a Past Master, and presented to the Master of a Lodge at his installation. (See *Plumb Line*.)

Linear Triad. Oliver says that the Linear Triad is a figure which appears in some old Royal Arch floor-cloths. It bore a reference to the sojourners, who represented the three stones on which prayers and thanksgivings were offered on the discovery of the lost Word; thereby affording an example that it is our duty in every undertaking to offer up our prayers and thanksgivings to the God of our salvation.

Lines, Parallel. See *Parallel Lines*.

Lingam. The lingam and the youi of the Indian mysteries were the same as the phallus and cteis of the Grecian. (See *Phallic Worship*.)

Link. A degree formerly conferred in England, in connection with the Mark Degree, under the title of the "Mark and Link or Wrestle." It is now obsolete.

Linnecar, Richard. The author of the celebrated Masonic anthem beginning

> "Let there be Light! th' Almighty spoke;
> Refulgent beams from chaos broke,
> T' illume the rising earth."

Little is known of his personal history except that he was the Coroner of Wakefield, England, and for many years the Master of the Lodge of Unanimity, No. 238, in that town. He was a zealous and studious Mason. In 1789 he published, at Leeds, a volume of plays, poems, and miscellaneous writings, among which was an essay entitled *Strictures on Freemasonry*, and the anthem already referred to. He appears to have been a man of respectable abilities.

Lion, Chevalier du. (*Knight of the Lion*.) The twentieth grade of the third series of the Metropolitan Chapter of France.

Lion of the Tribe of Judah. See *Tribe of Judah, Lion of the*.

Lion's Paw. A mode of recognition so called because of the rude resemblance made by the hand and fingers to a lion's paw. It refers to the "Lion of the tribe of Judah."

Literature of Masonry. Freemasonry has its literature, which has been rapidly developed in the last few decades of the present century, far more than in any preceding ones. This literature is not to be found in the working of its degrees, in the institution of its Lodges, in the diffusion of its charities, or in the extension of its fraternal ties. Of all these, although necessary and important ingredients of the Order, its literature is wholly independent. This is connected with its ethics as a science of moral, social, and relig-

ious philosophy; with its history and archeology, as springing up out of the past times; with its biography as the field in which men of intellect have delighted to labor; and with its bibliography as the record of the results of that labor. It is connected, too, incidentally, with many other arts and sciences. Mythology affords an ample field for discussion in the effort to collate the analogies of classic myths and symbols with its own. Philology submits its laws for application to the origin of its mystic words, all of which are connected with its history. It has, in fine, its science and its philosophy, its poetry and romance. No one who has not studied the literature of Masonry can even dream of its beauty and extent; no one who has studied it can have failed to receive the reward that it bestows.

Litigation. See *Lawsuits*.

Livery. The word *livery* is supposed to be derived from the clothing *delivered* by masters to their servants. The trading companies or gilds of England began about the time of Edward I. to wear a suit of clothing of a form, color, and material peculiar to each company, which was called its livery, and also its clothing. To be admitted into the membership and privileges of the company was called "to have the clothing." The Grocers' Company, for instance, were ordered "to be *clothed* once a year in a suit of livery"; and there is an order in the reign of Henry V. to purchase cloth "for the *clothing* of the brethren of the brewers' craft." There can be no doubt that the usage of speaking of a Mason's clothing, or of his being clothed, is derived from the custom of the gilds. A Mason's clothing, "black dress and white gloves and apron," is, in fact, his livery. (See *Clothed*.)

Livre d'Architecture. The French designation of the book of minutes.

Livre d'Eloquence. A French expression for a collection of minutes of addresses made in a Lodge.

Livre d'Or. French. The *Book of Gold*, which see.

Local Laws. See *Laws of Masonry*.

Locke's Letter. The letter of John Locke which is said to have accompanied the Leland MS., and which contains his comments on it. (See *Leland Manuscript*.)

Lodge. There are three definitions which, in the technical language of Masonry, apply to the word *Lodge*.

1. It is a place in which Freemasons meet. In this sense the words more generally used are *Lodge Room*, which see.

2. It is the assembly or organized body of Freemasons duly congregated for labor or for business. These two distinctions are precisely the same as those to be found in the word "church," which is expressive both of the building in which a congregation meets to worship and the congregation of worshipers themselves. This second definition is what distinguishes a meeting of Symbolic Masons, who constitute a Lodge, from one of Royal Arch Masons, whose meeting would be called a Chapter, or of Cryptic Masons, whose assembly would be a Council.

The word appears in French as *loge;* German, *loge;* Spanish, *logia;* Portuguese, *loja;* and Italian, *loggia*. This is irrefragible evidence that the word was, with the Institution, derived by the Continent of Europe from England.

The derivation of the word is, I think, plain. Ragon says that it comes from the Sanskrit *loga*, signifying the world. There would, at first sight, seem to be a connection between this etymology and the symbolic meaning of a Lodge, which represents the world; but yet it is evidently far-fetched, since we have a much simpler root immediately at hand. Mr. Hope says, speaking of the Freemasons of the Middle Ages (and Wren had previously said the same thing), that wherever they were engaged to work, they "set themselves to building temporary huts, for their habitation, around the spot where the work was to be carried on." These huts the German Masons called *hutten;* the English, *lodges*, which is from the Anglo-Saxon, *logian*, to dwell. Lodge, therefore, meant the dwelling-place or lodging of the Masons; and this is undoubtedly the origin of the modern use of the word. To corroborate this, we find Du Cange (*Gloss.*) defining the Medieval Latin, *logia* or *logium*, as "a house or habitation." He refers to the Italian, *loggia*, and quotes Lambertus Ardensis as saying that "*logia* is a place next to the house, where persons were accustomed to hold pleasant conversation." Hence Lambertus thinks that it comes from the Greek, *logos*, a discourse. Du Cange asserts that there is no doubt that in the Middle Ages *logia* or *logium* was commonly used for an apartment or dwelling connected with the main building. Thus, the smallest apartments occupied by the cardinals when meeting in conclave were called *logiæ* or Lodges. All of which sustains the idea that the Lodges of the old Operative Masons were small dwellings attached, or at least contiguous, to the main edifice on which they were at work.

In the Old Charges, the word is not generally met with. The meeting of the Craft is there usually called *the Assembly*. But there are instances of its employment in those documents. Thus in the *Lodge of Antiquity MS.* whose date is 1686, the word occurs several times. There is also abundant documentary evidence to show that the word Lodge was long before the eighteenth century, applied to their meeting by the Freemasons of England and Scotland.

Before the restoration of the Grand Lodge of England in 1717, Preston tells us that any number of brethren might assemble at any place for the performance of work, and, when so assembled, were authorized to receive into the Order brothers and fellows, and to practise the rites of Masonry. The ancient charges were the only standard for the regulation of their conduct. The Master of the Lodge was elected *pro tempore*, and his authority terminated with the dissolution of the

meeting over which he had presided, unless the Lodge was permanently established at any particular place. To the general assembly of the Craft, held once or twice a year, all the brethren indiscriminately were amenable, and to that power alone. But on the formation of Grand Lodges, this inherent right of assembling was voluntarily surrendered by the brethren and the Lodges, and vested in the Grand Lodge. And from this time Warrants of Constitution date their existence.

The mode of bringing a Lodge into existence under the present system in America is as follows: Seven Master Masons, being desirous of establishing a Lodge, apply by petition to the Grand Master, who will, if he thinks proper, issue his dispensation authorizing them to congregate as Masons in a Lodge, and therein to confer the three degrees of Ancient Craft Masonry. This instrument is of force during the pleasure of the Grand Master. At the next meeting of the Grand Lodge it expires, and is surrendered to the Grand Lodge, which, if there be no objection, will issue a Charter, technically called a Warrant of Constitution, whereby the body is permanently established as a Lodge, and as one of the constituents of the Grand Lodge.

The power of granting Warrants of Constitution is vested in the Grand Lodges of Scotland, Ireland, Germany, and France, as it is in America; but in England the rule is different, and there the prerogative is vested in the Grand Master.

A Lodge thus constituted consists, in the American system, of the following officers: Worshipful Master, Senior and Junior Wardens, Treasurer, Secretary, Senior and Junior Deacons, two Stewards, and a Tiler.

Under the English Constitution the officers are, in addition to these, a Director of Ceremonies, a Chaplain, an Inner Guard, an Organist and an Almoner.

In a Lodge of the French Rite, the officers are still more numerous. They are Le Venerable or Worshipful Master, Premier and Second Surveillants or Senior and Junior Wardens, Orator, Treasurer, Secretary, Hospitaler or Collector of Alms, the Expert, combining the duties of the Senior Deacon and an examining committee, Master of Ceremonies, Architecte, who attends to the decoration of the Lodge, and superintends the financial department, Archiviste or Librarian, Keeper of the Seal, Master of the Banquets or Steward, and Guardian of the Temple or Tiler.

The officers in a Lodge of the Ancient and Accepted Scottish Rite are a Master, two Wardens, Orator, Treasurer, Secretary, Almoner, Expert, Assistant Expert, Master of Ceremonies, Almoner Steward, Tiler, and sometimes a few others as Pursuivant, and Keeper of the Seals.

In other Rites and countries the officers vary to a slight extent, but everywhere there are four officers who always are found, and who may therefore be considered as indispensable, namely, the Master, two Wardens and Tiler.

A Lodge thus constituted is a Lodge of Master Masons. Strictly and legally speaking, such a body as a Lodge of Entered Apprentices or of Fellow-Crafts is not known under the present Masonic system. No Warrant is ever granted for an Apprentices' or Fellow-Crafts' Lodge, and without a Warrant a Lodge cannot exist. The Warrant granted is always for a Masters' Lodge, and the members composing it are all Master Masons. The Lodges mentioned by Wren and Hope, to which allusion has been made, and which were congregated, in the Middle Ages, around the edifices which the Masons were constructing, were properly Fellow-Crafts' Lodge, because all the members were Fellow-Crafts; even the Master being merely a gradation of rank, not a degree of knowledge. So at the revival of Masonry in 1717, the Lodges were Entered Apprentices' Lodges, because in them nothing but the First Degree was conferred, and nearly all the members were Entered Apprentices. But when the Grand Lodge, where only at first the Fellow-Craft and Master's Degree were conferred, permitted them to be conferred in the subordinate Lodges, then the degree of Master Mason was sought for by all the Craft, and became the object of every Mason's ambition. From that time the Craft became master Masons, and the First and Second degrees were considered only as preliminary steps. So it has remained to this day; and all modern Lodges, wherever Masonry has extended, are Masters' Lodges, and nothing less.

Sometimes secretaries, ignorant of these facts, will record in their minutes that "the Lodge of Master Masons was closed and a Lodge of Entered Apprentices was opened." Neither written nor unwritten law sanctions any such phraseology. If the Lodge of Master Masons is closed, there is an end of the Masonic congregation. Where is the Warrant under which a Lodge of Entered Apprentices is opened, and how can a Lodge, in which there is not, probably, a single Apprentice, but where all the officers and all the members are Master Masons, be called a Lodge of Apprentices? The ritual has wisely provided for the avoidance of such an anomaly, and, seeing that the Warrant says that the Lodge of Master Masons is empowered to make Apprentices and Fellow-Crafts, it says "the Lodge was opened on the first degree." That is to say, the Lodge of Masters still retaining its character as a Masters' Lodge, without which it would lose its legality, and not venturing to open a kind of Lodge for which its members had no Warrant nor authority, simply placed itself on the points of a degree in which it was about to give instruction.

Some of the rituals speak, it is true, of Lodges composed in ancient times of Masters and Fellow-Crafts or Masters and Apprentices; and the Webb lectures tell us that at the Temple of Solomon the Lodges of Entered Apprentices consisted of one Master and six Apprentices, and the Lodges of Fellow-Crafts of two Masters and three Fellow-Crafts. But all this is purely symbolic, and has no real existence in the practical working

of the Order. No one in these days has seen a Lodge of one Master Mason and six Apprentices. The Masons working in the First Degree are as much Master Masons as the same Masons are when they are working in the Third. The Lodge legally is the same, though it may vary the subjects of its instruction so as to have them in the First, Second, or Third Degree.

So important a feature in Masonry as a Lodge, the congregations of Masons for work or worship, cannot be without its appropriate symbolism. Hence a Lodge when duly opened becomes a symbol of the world. Its covering is like the world's, a sky or clouded canopy, to reach which, as the abode of those who do the will of the Great Architect, it is furnished with the theological ladder, which reaches from earth to heaven; and it is illuminated as is the world, by the refulgent rays of the sun, symbolically represented in his rising in the East, his meridian height in the South, and his setting in the West; and lastly, its very form, a long quadrangle or oblong square, is in reference to the early tradition that such was the shape of the inhabited world.

3. The Lodge, technically speaking, is a piece of furniture made in imitation of the Ark of the Covenant, which was constructed by Bezaleel (Exodus xxxvii. 1) according to the form prescribed by God himself, and which, after the erection of the Temple, was kept in the Holy of Holies. As that contained the table of the laws, the Lodge contains the Book of Constitutions and the Warrant of Constitution granted by the Grand Lodge. It is used only in certain ceremonies, such as the constitution and consecration of new Lodges, but its use is obsolete in England.

Lodge Hours. Dermott says (*Ahim. Rez.*, p. xxiii.) "that Lodge hours, that is, the time in which it is lawful for a Lodge to work or do business, are from March 25th to September 25th, between the hours of seven and ten; and from September 25th to March 25th, between the hours of six and nine." Whence he derived the law is unknown; but it is certain that it has never been rigidly observed even by the "ancient Lodges," for whom his *Ahiman Rezon* was written.

Lodge, Just. See *Just Lodge.*

Lodge Master, English. (*Maître de Lodge Anglais.*) A degree in the nomenclature of Thory, inserted on the authority of Lemanceau.

Lodge Master, French. (*Maître de Loge Français.*) The Twenty-sixth Degree of the collection of the Metropolitan Chapter of France.

Lodge, Occasional. See *Occasional Lodge.*

Lodge of Instruction. These are assemblies of brethren congregated without a Warrant of Constitution, under the direction of a lecturer or skilful brother, for the purpose of improvement in Masonry, which is accomplished by the frequent rehearsal of the work and lectures of each degree. These bodies should consist exclusively of Master Masons; and though they possess no Masonic power, it is evident to every Mason that they are extremely useful as schools of preparation for the duties that are afterward to be performed in the regular Lodge. In England, these Lodges of Instruction are attached to regularly Warranted Lodges, or are specially licensed by the Grand Master. But they have an independent set of officers, who are elected at no stated periods—sometimes for a year, sometimes for six or three months, and sometimes changed at every night of meeting. They of course have no power of initiation, but simply meet for purposes of practise in the ritual. They are, however, bound to keep a record of their transactions, subject to the inspection of the superior powers.

Lodge of St. John. The Masonic tradition is that the primitive or mother Lodge was held at Jerusalem, and dedicated to St. John, first the Baptist, then the Evangelist, and finally to both. Hence this Lodge was called "The Lodge of the Holy St. John of Jerusalem." From this Lodge all other Lodges are supposed figuratively to descend, and they therefore receive the same general name, accompanied by another local and distinctive one. In all Masonic documents the words ran formerly as follows: "From the Lodge of the holy St. John of Jerusalem, under the distinctive appellation of Solomon's Lodge, No. 1," or whatever might be the local name. In this style foreign documents still run; and it is but a few years since it has been at all disused in America. Hence we say that every Mason hails from such a Lodge, that is to say, from a just and legally constituted Lodge. In the earliest catechisms of the eighteenth century we find this formula: "*Q.* What Lodge are you of? *A.* The Lodge of St. John." And another question is, "How many angles in St. John's Lodge?" In one of the high degrees it is stated that Lodges receive this title "because, in the time of the Crusades, the Perfect Masons communicated a knowledge of their Mysteries to the Knights of St. John of Jerusalem," and as both were thus under the same law, the Lodges were called St. John's Lodges. But this was only one of the attempts to connect Freemasonry with the Templar system.

Lodge, Regular. See *Regular Lodge.*

Lodge Room. The Masons on the Continent of Europe have a prescribed form or ritual of building, according to whose directions it is absolutely necessary that every hall for Masonic purposes shall be erected. No such regulation exists among the Fraternity of America or Great Britain. Still, the usages of the Craft, and the objects of convenience in

the administration of our rites, require that certain general rules should be followed in the construction of a Lodge room. These rules, as generally observed in America, are as follows:

A Lodge room should always, if possible, be situated due East and West. This position is not absolutely necessary; and yet it is so far so as to demand that some sacrifices should be

made, if possible, to obtain so desirable a position. It should also be isolated, where it is practicable, from all surrounding buildings, and should always be placed in an upper story. No Lodge should ever be held on the ground floor.

The form of a Lodge room should be that of a parallelogram or oblong square, at least one-third larger from East to West than it is from North to South. The ceiling should be lofty, to give dignity to the appearance of the hall, as well as for the purposes of health, by compensating, in some degree, for the inconvenience of closed windows, which necessarily will deteriorate the quality of the air in a very short time in a low room. The approaches to the Lodge room from without should be angular, for, as Oliver says, "A straight entrance is unmasonic, and cannot be tolerated." There should be two entrances to the room, which should be situated in the West, and on each side of the Senior Warden's station. The one on his right hand is for the introduction of visitors and members, and leading from the Tiler's room, is called the Tiler's, or the outer door; the other, on his left, leading from the preparation room, is known as the "inner door," and sometimes called the "northwest door." The situation of these two doors, as well as the rooms with which they are connected, and which are essentially necessary in a well-constructed Lodge room, may be seen from the diagram in opposite column, which also exhibits the seats of the officers and the arrangement of the altar and lights. For further observations, see *Hall, Masonic.*

Lodge, Royal. See *Royal Lodge.*

Lodge, Sacred. See *Sacred Lodge.*

Lodge, Symbol of the. The modern symbol or hieroglyphic of the word Lodge is the figure ▭, which undoubtedly refers to the form of the Lodge as an "oblong square." But in the old rituals of the early part of the last century we find this symbol:  The cross here, as Krause (*Kunsturk.*, i., 37) suggests, refers to the "four angles" of the Lodge, as in the question: "How many angles in St. John's Lodge? *A.* Four, bordering on squares"; and the delta is the Pythagorean symbol of Divine Providence watching over the Lodge. This symbol has long since become obsolete.

Loge. The French word for Lodge.

Logic. The art of reasoning, and one of the seven liberal arts and sciences, whose uses are inculcated in the Second Degree. The power of right reasoning, which distinguishes the man of sane mind from the madman and the idiot, is deemed essential to the Mason, that he may comprehend both his rights and his duties. And hence the unfortunate beings just named, who are without this necessary mental quality, are denied admission into the Order. The Old Charges define logic to be the art "that teacheth to discern truth from falsehood."

Loki. See *Balder.*

Lombardy. At the close of the dark ages, Lombardy and the adjacent Italian States were the first which awakened to industry. New cities arose, and the kings, lords, and municipalities began to encourage the artificers of different professions. Among the arts exercised and improved in Lombardy, the art of building held a preeminent rank, and from that kingdom, as from a center, the Comacine Masters were dispersed over all Europe. (See *Traveling Freemasons: Comacine.*)

London. With the city of London, the modern history of Freemasonry is intimately connected. A congress of Masons, as it may properly be called, was convened there by the four old Lodges, at the Apple-Tree Tavern, in 1717. Its results were the formation of

the Grand Lodge of England, and a modification of the Masonic system, whence the Freemasonry of the present day has descended. Anderson, in his second edition of the *Book of Constitutions* (1738), gives the account of this, as it is now called, *Revival of Masonry*, which see.

Lost Word. The mythical history of Freemasonry informs us that there once existed a WORD of surpassing value, and claiming a profound veneration; that this Word was known to but few; that it was at length lost; and that a temporary substitute for it was adopted. But as the very philosophy of Masonry teaches us that there can be no death without a resurrection—no decay without a subsequent restoration—on the same principle it follows that the loss of the Word must suppose its eventual recovery.

Now, this it is, precisely, that constitutes the myth of the Lost Word and the search for it. No matter what was the word, no matter how it was lost, nor why a substitute was provided, nor when nor where it was recovered. These are all points of subsidiary importance, necessary, it is true, for knowing the legendary history, but not necessary for understanding the symbolism. The only term of the myth that is to be regarded in the study of its interpretation, is the abstract idea of a word lost and afterward recovered.

The WORD, therefore, may be conceived to be the symbol of *Divine Truth;* and all its modifications—the loss, the substitution, and the recovery—are but component parts of the mythical symbol which represents a search after truth. In a general sense, the *Word* itself being then the symbol of *Divine Truth*, the narrative of its loss and the search for its recovery becomes a mythical symbol of the decay and loss of the true religion among the ancient nations, at and after the dispersion on the plains of Shinar, and of the attempts of the wise men, the philosophers, and priests, to find and retain it in their secret mysteries and initiations, which have hence been designated as the Spurious Freemasonry of Antiquity.

But there is a special or individual, as well as a general interpretation, and in this special or individual interpretation the Word, with its accompanying myth of a loss, a substitute, and a recovery, becomes a symbol of the personal progress of a candidate from his first initiation to the completion of his course, when he receives a full development of the mysteries.

Lotus. The lotus plant, so celebrated in the religions of Egypt and Asia, is a species of Nymphæa, or water-lily, which grows abundantly on the banks of streams in warm climates. Although more familiarly known as the lotus of the Nile, it was not indigenous to Egypt, but was probably introduced into that country from the East, among whose people it was everywhere consecrated as a sacred symbol. The Brahmanical deities were almost always represented as either decorated with its flowers, or holding it as a scepter, or seated on it as a throne. Coleman says (*Mythol. Hindus*, p. 388) that to the Hindu poets the lotus was what the rose was to the Persians. Floating on the water it is the emblem of the world, and the type also of the mountain Meru, the residence of the gods. Among the Egyptians, the lotus was the symbol of Osiris and Isis. It was esteemed a sacred ornament by the priests, and was placed as a coronet upon the heads of many of the gods. It was also much used in the sacred architecture of the Egyptians, being placed as an entablature upon the columns of their temples. Thence it was introduced by Solomon into Jewish architecture, being found, under the name of "lily work," as a part of the ornaments of the two pillars at the porch of the Temple. (See *Lily* and *Pillars of the Porch*.)

Louis Napoleon. Second Adjoint of the Grand Master of the G. Orient of France. Nominated, in 1806, King of Holland. Louis Napoleon III. was widely known as an interested Mason.

Louisiana. Masonry was introduced into Louisiana in 1793 by the organization of Perfect Union Lodge, under a Charter issued by the Grand Lodge of South Carolina. A second Lodge was established by the Mother Lodge of Marseilles, in France; and three others were subsequently chartered by the Grand Lodge of Pennsylvania. These five Lodges instituted a Grand Lodge on July 11, 1812, and Francis du Bourg was elected the first Grand Master. A difference of nationality and of Masonic rites have been a fertile source of controversy in Louisiana, the results of which it would be tedious to follow in detail. In 1848, there were two Grand Lodges, which were united in 1850 to constitute the present Grand Lodge.

The Grand Chapter of Louisiana was instituted on March 5, 1813; a Grand Council of Royal and Select Masters on February 16, 1856; and a Grand Commandery of Knights Templar on February 4, 1864. The Ancient and Accepted Scottish Rite has always held a prominent position in the Masonry of Louisiana, and it has a Grand Consistory and many subordinate bodies of the Rite in active and successful operation.

Louveteau. See *Lewis*.

Lowen. In the Lansdowne Manuscript we meet with this charge: "that a Master or ffellow make not a moulde stone square, nor rule to no *Lowen*, nor sett no *Lowen* worke within the Lodge." [This has been said to be an error for "*Cowan*," but it is more probably intended for "*Layer*" (*q. v.*), which is the word used in the parallel passage in other MSS.—E. L. H.]

Low Twelve. In Masonic language midnight is so called. The reference is to the sun, which is then below the earth. Low twelve in Masonic symbolism is an unpropitious hour.

Loyalty. Notwithstanding the calumnies of Barruel, Robison, and a host of other anti-Masonic writers who assert that Masonry is ever engaged in efforts to uproot the governments within which it may exist, there is

nothing more evident than that Freemasonry is a loyal institution, and that it inculcates, in all its public instructions, obedience to government. Thus, in the Prestonian charge given in the last century to the Entered Apprentice, and continued to this day in the same words in English Lodges, we find the following words:

"In the State, you are to be a quiet and peaceable subject, true to your sovereign, and just to your country; you are not to countenance disloyalty or rebellion, but patiently submit to legal authority, and conform with cheerfulness to the government under which you live, yielding obedience to the laws which afford you protection, but never forgetting the attachment you owe to the place of your nativity, or the allegiance due to the sovereign or protectors of that spot."

The charge given in American Lodges is of the same import, and varies but slightly in its language.

"In the State, you are to be a quiet and peaceful subject, true to your government, and just to your country; you are not to countenance disloyalty or rebellion, but patiently submit to legal authority, and conform with cheerfulness to the government of the country in which you live."

The charge given in French Lodges, though somewhat differing in form from both of these, is couched in the same spirit and teaches the same lesson. It is to this effect:

"Obedience to the laws and submission to the authorities are among the most imperious duties of the Mason, and he is forbidden at all times from engaging in plots and conspiracies."

Hence it is evident that the true Mason must be a true patriot.

Luchet, Jean Pierre Louis, Marquis de. A French historical writer, who was born at Saintes in 1740, and died in 1791. He was the writer of many works of but little reputation, but is principally distinguished in Masonic literature as the author of an attack upon Illuminism under the title of *Essai sur la Secte des Illuminés*. It first appeared anonymously in 1789. Four editions of it were published. The third and fourth with augmentations and revisions, which were attributed to Mirabeau, were printed with the outer title of *Histoire secret de la Cour de Berlin* (*par Mirabeau*). This work was published, it is known, without his consent, and was burned by the common executioner in consequence of its libelous character. Luchet's essay has become very scarce, and is now valued rather on account of its rarity than for its intrinsic excellence.

Ludewig, H. E. An energetic Mason, born in 1810, in Germany; died in 1856, in America. By "powers from home" this ardent brother attempted to set up an independent authority to the existing Grand Lodge system in the United States; but, like many such attempts, it flashed brilliantly for a season, but proved of ephemeral nature.

Lufton. One of the French terms for Louveteau, or *Lewis*, which see.

Lully, Raymond. A celebrated chemist and philosopher, the seneschal of Majorca, surnamed *le docteur illuminé*. His discoveries are most noted, such as the mode of rectifying spirits, the refining of silver, etc. He was born about 1234. In 1276 he founded a college of Franciscans at Palma, for instruction in Eastern lore, and especially the study of the Arabic language, for which purpose he instituted several colleges between the years 1293 and 1311. He died in 1314. He is known as an eminent Rosicrucian, and many fables as to his longevity are related of him.

Lumiere, La Grande. (*The Grand Light.*) A grade in the collection of Brother Viany.

Lumiere, La Vraie. (*The True Light, or Perfect Mason.*) A degree in the Chapter of the Grand Lodge of Royal York of Berlin. (Thory, *Acta Lat.*, i., 321.)

Luminaries. The first five officers in a French Lodge, namely, the Master, two Wardens, Orator, and Secretary, are called *luminaires* or luminaries, because it is by them that light is dispensed to the Lodge.

Lunus. An Egyptian deity, known as Khons Lunus, and represented as hawk-headed, surmounted by the crescent and disk. When appearing with the head of an ibis, he is called Thoth-Lunus. His worship was very extensive through ancient Egypt, where he was known as Aah, who presides over rejuvenation and resurrection. Champollion mentions in his *Pantheon* a Lunus bifrons.

Lustration. A religious rite practised by the ancients, and performed before any act of devotion. It consisted in washing the hands, and sometimes the whole body, in lustral or consecrated water. It was intended as a symbol of the internal purification of the heart. It was a ceremony preparatory to initiation in all the Ancient Mysteries. The ceremony is practised with the same symbolic import in some of the high degrees of Masonry. So strong was the idea of a connection between lustration and initiation, that in the low Latin of the Middle Ages *lustrare* meant to initiate. Thus Du Cange (*Glossarium*) cites the expression "lustrare religione Christianorum" as signifying "to initiate into the Christian religion."

Lux. Latin for *light*, which see. Freemasonry anciently received, among other names, that of "Lux," because it is that sublime doctrine of truth by which the pathway of him who has attained it is to be illumined in the pilgrimage of life. Among the Rosicrucians, light was the knowledge of the philosopher's stone; and Mosheim says that in chemical language the cross was an emblem of light, because it contains within its figure the forms of the three figures of which LVX, or light, is composed.

Lux e tenebris. *Light out of darkness.* A motto very commonly used in the caption of Masonic documents as expressive of the object of Masonry, and of what the true Mason supposes himself to have attained. It has a recondite meaning. In the primeval ages and in the early mythology, darkness preceded

light. "In the thought," says Cox, "of these early ages, the sun was the child of night or darkness." (*Aryan Myth.*, i., 43.) So *lux* being truth or Masonry, and *tenebræ*, or darkness, the symbol of initiation, *lux e tenebris* is Masonic truth proceeding from initiation.

Lux Fiat et Lux Fit. Latin. "Let there be light, and there was light." A motto sometimes prefixed to Masonic documents.

Luz. An ever-living power, according to the old Jewish Rabbis, residing in a small joint-bone existing at the base of the spinal column. To this undying principle, watered by the dew of heaven, is ascribed the immortality in man.

"R. Joshua Ben Hananiah replied to Hadrian, as to how man revived in the world to come, 'From *Luz*, in the back-bone.' When asked to demonstrate this, he took Luz, a little bone out of the back-bone, and put it in water, and it was not steeped; he put it in the fire, and it was not burned; he brought it to the mill, and that could not grind it; he laid it on the anvil, and knocked it with a hammer, but the anvil was cleft, and the hammer broken."

L. V. C. Letters inscribed on the rings of profession, worn by the Knights of Baron von Hund's Templar system. They are the initials of the sentence *Labor Viris Convenit. Labor is suitable for men.* It was also engraved on their seals.

Lyon, David Murray. This well-known writer and historian of Freemasonry in Scotland was initiated in 1856 in Lodge Ayr St. Paul, No. 204, on the roll of the Grand Lodge of Scotland. He was a printer by trade and was at one time employed by the Ayrshire Express Company. In 1877 he was appointed Grand Secretary of the Grand Lodge of Scotland and held the post until 1900. He died on January 30, 1903.

He was, without doubt, the foremost Masonic student of Scotland, either of this or any other period; and the results of his continuous and arduous researches are to be found in all the books and periodicals of the Craft for the last twenty years, both at home and abroad. It is simply impossible to furnish anything like an accurate and complete list of his many valuable contributions to Masonic magazines. . . . His chief works have been the *History of the Mother Lodge Kilwinning*, Scotland, the *History of the Old Lodge at Thornhill*, and, finally, the *History of the Ancient Lodge at Edinburgh* (Mary's Chapel), from the sixteenth century. This grand work, which was published in 1873, has placed its author in the front rank of Masonic authors.

[E. L. H.]

Lyons, Congress of. A Masonic congress was convoked in 1778, at the city of Lyons, France, by the Lodge of Chevaliers Bienfaisants. It was opened on the 26th of November, and continued in session until the 27th of December, under the presidency of M. Villermoz. Its ostensible object was to procure a reformation in Masonry by the abjuration of the Templar theory; but it wasted its time in the correction of rituals and in Masonic intrigues, and does not appear to have been either sagacious in its methods, or successful in its results. Even its abjuration of the Strict Observance doctrine that Templarism was the true origin of Freemasonry, is said to have been insincere, and forced upon it by the injunctions of the political authorities, who were opposed to the propagation of any system which might tend to restore the Order of Knights Templar.

M

M. (Heb., מ, Mem), which signifies water in motion, having for its hieroglyph a waving line, referring to the surface of the water. As a numeral, M stands for 1000. In Hebrew its numerical value is 40. The sacred name of Deity, applied to this letter, is מבורך, Meborach, Benedictus.

Maacha. In the Tenth Degree of the Scottish Rite we are informed that certain traitors fled to "Maacha king of Cheth," by whom they were delivered up to King Solomon on his sending for them. In 1 Kings ii. 39, we find it recorded that two of the servants of Shimei fled from Jerusalem to "Achish, son of Maachah king of Gath." There can be little doubt that the carelessness of the early copyists of the ritual led to the double error of putting *Cheth* for *Gath* and of supposing that Maacha was its king instead of its king's father. The manuscripts of the Ancient and Accepted Scottish Rite, too often copied by unlearned persons, show many such corruptions of Hebrew names, which modern researches must eventually correct. Delaunay, in his *Thuileur*, makes him King of Tyre, and calls him Mahakah.

Mac. Masonic writers have generally given to this word the meaning of "is smitten," deriving it probably from the Hebrew verb נכה, *macha*, to smite. Others, again, think it is the word מק, *mak*, rottenness, and suppose that it means "*he is rotten.*" Both derivations are, I think, incorrect.

Mac is a constituent part of the word *macbenac*, which is the substitute Master's word in the French Rite, and which is interpreted by the French ritualists as meaning "he lives in the son." But such a derivation can find no support in any known Hebrew root. Another interpretation must be sought. I think there is evidence, circumstantial at least, to show that the word was, if not an invention of the Ancient or Dermott Masons, at least adopted by them in distinction from the one used by the Moderns, which latter is the word now in use in this country. I am disposed to attribute the introduction of the word into Masonry to the adherents of the house of Stuart, who sought in every way to make the institution of Freemasonry a political instrument in their schemes for the restoration of their exiled monarch. Thus the old phrase, "the widow's son," was applied by them to James II., who was the son of Henrietta Maria, the widow of Charles I. So, instead of the old Master's word which had hitherto been used, they invented *macbenac* out of the Gaelic, which to them was, on account of their Highland supporters, almost a sacred language in the place of Hebrew. Now, in Gaelic, *Mac* is *son*, and *beanach* is *blessed*, from the active verb *beannaich, to bless.* The latest dictionary published by the Highland Society gives this example: "Benach De Righ Albane, Alexander, Mac Alexander," etc., i. e., Bless the King of Scotland, Alexander, son of Alexander, etc. Therefore we find, without any of those distortions to which etymologists so often recur, that *macbenac* means in Gaelic "the *blessed son.*" This word the Stuart Masons applied to their idol, the Pretender, the son of Charles I.

Macbenac. 1. A significant word in the Third Degree according to the French Rite and some other rituals. (See *Mac.*)

2. In the Order of Beneficent Knights of the Holy City, the recipiendary, or novice, is called *Macbenac.*

Maccabees. A heroic family, whose patriotism and valor form bright pictures in the Jewish annals. The name is generally supposed to be derived from the letters מ. כ. ב. י., M. C. B. I.—which were inscribed upon their banners—being the initials of the Hebrew sentence, "Mi Camocha, Baalim, Iehovah," *Who is like unto thee among the gods, O Jehovah.* The Hebrew sentence has been appropriated in some of the high Scottish degrees as a significant word.

Macerio. Du Cange gives this as one of the Middle Age Latin words for *mason*, deriving it from *maceria*, a wall. The word is now never employed.

Macio. Du Cange (*Gloss.*) defines Macio, Mattio, or Machio, on the authority of Isidore, as Maçon, latomus, a mason, a constructor of walls, from *machina*, the machines on which they stood to work on account of the height of the walls. He gives *Maço* also.

Mackenzie, Kenneth R. H. ("Cryptonymus.") Editor of *The Royal Masonic Cyclopædia of History, Rites, Symbolism, and Biography*, published in London in 1877, by Bro. John Hogg, Paternoster Row. He was one of the founders of the present Rosicrucian Society in England.

Macon. The following is extracted from *Kenning's Cyclopædia of Freemasonry*: "The Norman-French word for 'mason'—as the operative mason in early days was called 'le macon,' and this was corrupted into maccon, maccouyn, masoun, masouyn, messouyn, and even mageon. The word seems to come from 'maçonner,' which had both its operative meaning and derivative meaning of conspiring, in 1238, and which again comes from 'mansio,' a word of classic use. Some writers have derived the word 'maçon' from maison; but though 'maisonner' and maçonner appear eventually to be equivalent to 'mansionem facere,' in its first meaning, 'maison' seems to be simply a wooden house, as 'maisonage' is defined by Roquefort to be 'Bois de charpente propre à batir les maisons,' and then he adds, 'C'est aussi l'action de batir.' Roquefort seems to prefer to derive 'maisonner' from the Low Latin verb 'mansionare.' Be this as it may, we have in the word maçon, as it appears to us, a clear evidence of the development of

the operative guilds through the Norman-French artificers of the Conquest, who carried the operative guilds, as it were, back to Latin terminology, and to a Roman origin." (See *Mason.*)

Maçon dans la Voie Droite. (*The Mason in the Right Way.*) The second grade of the Hermetic system of Montpellier. (Thory, *Acta Lat.*, i., 321.)

Maçon du Secret. (*The Mason of the Secret.*) The sixth grade of the reformed rite of Baron Tschoudy, and the seventh in the reformed rite of St. Martin. (Thory, *Acta Lat.*, i., 321.)

Maçon, Ecossais, Maître. See *Mason, Scottish Master.*

Maçonetus. Low Latin, signifying a Mason, and found in documents of the fourteenth century.

Maçonne. A French word signifying a female Mason, that is to say, the degrees of the Rite of Adoption. It is a very convenient word. The formation of the English language would permit the use of the equivalent word *Masoness*, if custom would sanction it.

Maçonne Egyptienne. The Third Degree in Cagliostro's Rite of Adoption.

Maçonne Maitresse. Third grade of the Maçonnerie d'Adoption.

Maçonner. Du Cange gives citations from documents of the fourteenth century, where this word is used as signifying *to build.*

Maçonnerie Rouge. (*Red Freemasonry.*) The designation of the four high grades of the French Rite. Bazot says that the name comes from the color worn in the forth grade.

Maçonnieke Societeiten. Dutch Masonic Clubs, somewhat like unto the English Lodges of Instruction, with more, perhaps, of the character of a club. *Kenning's Cyclopædia* says "there were about nineteen of these associations in the principal towns of Holland in 1860."

"Macoy's Cyclopedia." "A General History, Clycopedia, and Dictionary of Freemasonry," containing some 300 engravings, by Robert Macoy, 33°, published in New York, which has passed through a number of editions. It was originally founded on *A Dictionary of Symbolical Masonry*, by George Oliver, D.D. Bro. Macoy has occupied the prominent position of Deputy G. Master of the G. Lodge of New York, and that of G. Recorder of the State G. Commandery of the Order of the Temple, K. T.

Macrocosm. (*μάκρος κόσμος, the great world.*) The visible system of worlds; the outer world or universe. It is opposed to Microcosm, the little world, as in man. It has been used as the Macric soul in opposition to the Micric animal life, and as the soul of the universe as opposed to the soul of a single world or being. A subject of much note to the Rosicrucians in the study of the Mysterium Magnum.

Maczo. Latin of the Middle Ages for a *mason.* Du Cange quotes a Computum of the year 1324, in which it is said that the work was done "per manum Petri, maczonis de Lagnicio."

Made. A technical word signifying initiated into Masonry. (See *Make.*)

Madman. Madmen are specially designated in the oral law as disqualified for initiation. (See *Qualifications.*)

Magazine. The earliest Masonic magazine was published at Leipsic in 1738 and named *Der Freymaurer.* In 1783 the *Freimaurerzeitung* appeared at Berlin, having only a short existence of six numbers. The *Journal für Freimaurer*, which appeared in 1784 at Vienna, had a longer life of some three years. In England, the first work of this kind was *The Freemasons' Magazine or General and Complete Library*, begun in 1793, and continued until 1798. In Ireland, in 1792, the *Sentimental and Masonic Magazine* appeared and ran to seven volumes (1792–5). In France the *Miroir de la vérité* seems to have been issued from 1800 to 1802, followed by *Hermes* in 1808.

In England the *Freemasons' Quarterly Review* commenced in 1834 and was continued until 1849, followed by the *Freemasons' Quarterly Magazine* in 1853, which lived until 1858. In 1873 a new *Masonic Magazine* was issued, but it had not a very long existence; and the nearest approach to a Masonic magazine now existing is the *Ars Quatuor Coronatorum*, published by the Quatuor Coronati Lodge. Of American Masonic magazines the earliest is the *Freemasons' Magazine and General Miscellany*, published at Philadelphia in 1811. The oldest periodical devoted to Masonry is the *Freemasons' Monthly Magazine*, published by Charles W. Moore, at Boston. It was established in the year 1842.

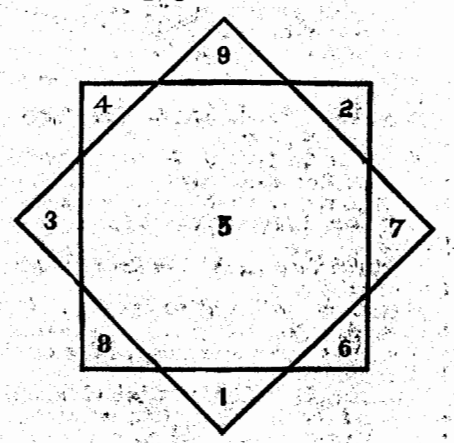
The *American Freemason* appears monthly, published at Storm Lake, Iowa, and has now reached a third volume; *The American Tyler-Keystone*, published at Ann Arbor, Michigan, twice a month, is in its 26th volume.

In Switzerland the "International Bureau for Masonic Affairs" issues a quarterly magazine, called the *Bulletin*, which is now in its 9th volume. [E. L. H.]

Magi. The ancient Greek historians so term the hereditary priests among the Persians and Medians. The word is derived from *mog* or *mag*, signifying priest, in the Pehlevi language. The Illuminati first introduced the word into Masonry, and employed it in the nomenclature of their degrees to signify men of superior wisdom.

Magi, The Three. The "Wise Men of the East" who came to Jerusalem, bringing gifts to the infant Jesus. The traditional names of the three are Melchior, an old man, with a long beard, offering gold; Jasper, a beardless youth, who offers frankincense; Balthazar, a black or Moor, with a large spreading beard, who tenders myrrh. The patron saints of travelers. "Tradition fixed their number at three, probably in allusion to the three races springing from the sons of Noah. The Empress Helena caused their corpses to be transported to Milan from Constantinople. Frederick Barbarossa carried them to Cologne, the

place of their special glory as the Three Kings of Cologne."—YONGE. The three principal officers ruling the society of the Rosicrucians are styled Magi.



Magic. The idea that any connection exists between Freemasonry and magic is to be attributed to the French writers, especially to Ragon, who gives many pages of his *Masonic Orthodoxy* to the subject of Masonic magic; and still more to Louis Constance, who has written three large volumes on the *History of Magic*, on the *Ritual and Dogma of the Higher Magic*, and on the *Key of the Grand Mysteries*, in all of which he seeks to trace an intimate connection between the Masonic mysteries and the science of magic. Ragon designates this sort of Masonry by the name of "Occult Masonry." But he loosely confounds magic with the magism of the ancient Persians, the Medieval philosophy and modern magnetism, all of which, as identical sciences, were engaged in the investigation of the nature of man, the mechanism of his thoughts, the faculties of his soul, his power over nature, and the essence of the occult virtues of all things. Magism, he says, is to be found in the sentences of Zoroaster, in the hymns of Orpheus, in the invocations of the Hierophants, and in the symbols of Pythagoras; it is reproduced in the philosophy of Agrippa and of Cardan, and is recognized under the name of *Magic* in the marvelous results of magnetism. Cagliostro, it is well known, mingled with his Spurious Freemasonry the Superstitions of Magic and the Operations of Animal Magnetism. But the writers who have sought to establish a scheme of Magical Masonry refer almost altogether to the supposed power of mystical names or words, which they say is common to both Masonry and magic. It is certain that onomatology, or the science of names, forms a very interesting part of the investigations of the higher Masonry, and it is only in this way that any connection can be created between the two sciences. Much light, it must be confessed, is thrown on many of the mystical names in the higher degrees by the dogmas of magic; and hence magic furnishes a curious and interesting study for the Freemason.

Magicians, Society of the. A society founded at Florence, which became a division of the Brothers of Rose Croix. They wore in their Chapters the habit of members of the Inquisition.

Magic Squares. A magic square is a series of numbers arranged in an equal number of cells constituting a square figure, the enumeration of all of whose columns, vertically, horizontally, and diagonally, will give the same sum. The Oriental philosophers, and especially the Jewish Talmudists, have indulged in many fanciful speculations in reference to these magic squares, many of which were considered as talismans. The following figure of nine squares, containing the nine digits so arranged as to make fifteen when counted in every way, was of peculiar import:

4	9	2
3	5	7
8	1	6

There was no talisman more sacred than this among the Orientalists, when arranged in the following figure:

3 L 31

Thus arranged, they called it by the name of the planet Saturn, ZaHaL, because the sum of the 9 digits in the square was equal to 45 (1+2+3+4+5+6+7+8+9), which is the numerical value of the letters in the word ZaHaL, in the Arabic alphabet. The Talmudists also esteemed it as a sacred talisman, because 15 is the numerical value of the letters of the word יה, JaH, which is one of the forms of the Tetragrammaton.

The Hermetic philosophers called these magic squares "tables of the planets," and attributed to them many occult virtues. The table of Saturn consisted of 9 squares, and has just been given. The table of Jupiter consisted of 16 squares of numbers, whose total value is 136, and the sum of them added, horizontally, perpendicularly, and diagonally, is always 34; thus:

4	14	15	1
9	7	6	12
5	11	10	8
16	2	3	13

So the table of Mars consists of 25 squares, of the Sun of 36, of Venus of 49, of Mercury of 64, and of the Moon of 81. These magic squares and their values have been used in the symbolism of numbers in some of the high degrees of Masonry.

Magister Cœmentariorum. A title applied in the Middle Ages to one who presided over the building of edifices = Master of the Masons.

Magister Hospitalis. See *Master of the Hospital*.

Magister Lapidum. Du Cange defines this as Master Mason; and he cites the statutes of Marseilles as saying: "Tres Magistros Lapidis bonos et legales," i. e., three good and lawful Master Masons "shall be selected to decide on all questions about water in the city."

Magister Militiæ Christi. See *Master of the Chivalry of Christ*.

Magister Perrerius. A name given in the Middle Ages to a Mason; literally, a Master of Stones, from the French *pierre*, a stone.

Magister Templi. See *Master of the Temple*.

Magistri Comacini. See *Comacine Masters*; also *Como*.

Magna est veritas et prævalebit. (*The truth is great, and will prevail.*) The motto of the Red Cross Degree, or Knights of the Red Cross.

Magnan, B. P. A marshal of France, nominated by Napoleon III., emperor, as Grand Master of the Grand Orient of France, in 1862, and, though not a member of the great Fraternity at the time, was initiated and installed Grand Master, February 8, 1862, and so remained until May 29, 1865.

Magnanimous. The title applied in modern usage to the Order of Knights Templar.

Magnetic Masonry. This is a form of Freemasonry which, although long ago practised by Cagliostro as a species of charlatanism, was first introduced to notice as a philosophic system by Ragon in his treatise on *Maçonnerie Occulte*. "The occult sciences," says this writer, "reveal to man the mysteries of his nature, the secrets of his organization, the means of attaining perfection and happiness; and, in short, the decree of his destiny. Their study was that of the high initiations of the Egyptians; it is time that they should become the study of modern Masons." And again he says: "A Masonic society which should establish in its bosom a *magnetic academy* would soon find the reward of its labors in the good that it would do, and the happiness which it would create." There can be no doubt that the Masonic investigator has a right to search everywhere for the means of moral, intellectual, and religious perfection; and if he can find anything in magnetism which would aid him in the search, it is his duty and wisest policy to avail himself of it. But, nevertheless, *Magnetic Masonry*, as a special *régime*, will hardly ever be adopted by the Fraternity.

Magus. 1. The Fourteenth Degree, and the first of the Greater Mysteries of the system of Illuminism. 2. The Ninth and last degree of the German Rosicrucians. It is the singular of *Magi*, which see.

Mah. The Hebrew interrogative pronoun מה, signifying *what?* It is a component part of a significant word in Masonry. The combination *mahhah*, literally "what! the," is equivalent, according to the Hebrew method of ellipsis, to the question, "What! is this the——?"

Mahabharata. A Sanskrit poem, recounting the rivalries of the descendants of King Bharata, and occupying a place among the Shasters of the Hindus. It contains many thousand verses, written at various unknown periods since the completion of the Ramayana.

Mahadeva. ("The great god.") One of the common names by which the Hindu god Siva is called. His consort, Durgà, is similarly styled Mahâdevi (the great goddess). In Buddhistic history, Mahadeva, who lived two hundred years after the death of the Buddha Sakyamuni, or 343, is a renowned teacher who caused a schism in the Buddhistic Church.

Mahakasyapa. The renowned disciple of Buddha Sakyamuni, who arranged the metaphysical portion of the sacred writings called Abhidharma.

Maher-Shalal-Hash-Baz. Hebrew. מהר שלל חש בז. Four Hebrew words which the prophet Isaiah was ordered to write upon a tablet, and which were afterward to be the name of his son. They signify, "make haste to the prey, fall upon the spoil," and were prognostic of the sudden attack of the Assyrians. They may be said, in their Masonic use, to be symbolic of the readiness for action which should distinguish a warrior, and are therefore of significant use in the system of Masonic Templarism.

Maier, Michael. A celebrated Rosicrucian and interpreter and defender of Rosicrucianism. He was born at Resinsburg, in Holstein, in 1568, and died at Magdeburg in 1620. He is said to have been the first to introduce Rosicrucianism into England. He wrote many works on the system, among which the most noted are *Atlanta Fugiens*, 1618; *Septimana Philosophica*, 1620; *De Fraternitate Rosæ Crucis*, 1618; and *Lusus Serius*, 1617. Some of his contemporaries having denied the existence of the Rosicrucian Order, Maier in his writings has refuted the calumny and warmly defended the society, of which, in one of his works, he speaks thus: "Like the Pythagoreans and Egyptians, the Rosicrucians exact vows of silence and secrecy. Ignorant men have treated the whole as a fiction; but this has arisen from the five years' probation to which they subject even well-qualified novices before they are admitted to the higher mysteries, and within this period they are to learn how to govern their own tongues."

Maine. Until the year 1820, the District of Maine composed a part of the political

territory of the State of Massachusetts, and its Lodges were under the obedience of the Grand Lodge of Massachusetts. In that year, a political division having taken place, and Maine having been erected into an independent State, the Masons of Maine took the preliminary steps toward an independent Masonic organization, in obedience to the universally recognized law that political territory makes Masonic territory, and that changes of political jurisdiction are followed by corresponding changes of Masonic jurisdiction. A memorial was addressed to the Grand Lodge of Massachusetts praying for its consent to the organization of an independent Grand Lodge and a just division of the charity and other funds. A favorable response having been received, a convention was held at Portland on June 1, 1820, consisting of delegates from twenty-four Lodges, when the Grand Lodge of Maine was organized, and William King elected Grand Master.

The Grand Royal Arch Chapter was organized in 1821, the Grand Council of Royal Arch Masons in 1855, and the Grand Commandery in 1852.

Maître Maçon. The name of the Third Degree in French.

Maîtresse Agissante. Acting Mistress. The title of the presiding officer of a female Lodge in the Egyptian Rite of Cagliostro.

Maîtresse Maçon. The Third Degree of the French Rite of Adoption. We have no equivalent word in English. It signifies a Mistress in Masonry.

Maîtrise. This expressive word wants an equivalent in English. The French use la Maîtrise to designate the Third or Master's Degree.

Major. The Sixth Degree of the German Rose Croix.

Major Illuminate. (*Illuminatus Major.*) The Eighth Degree of the Illuminati of Bavaria.

Majority. Elections in Masonic bodies are as a general rule decided by a majority of the votes cast. A plurality vote is not admissible unless it has been provided for by a special by-law.

Make. "To make Masons" is a very ancient term; used in the oldest charges extant as synonymous with the verb to initiate or receive into the Fraternity. It is found in the Lansdowne MS., whose date is the latter half of the sixteenth century. "These be all the charges . . . read at the making of a Mason."

Malach. מלאך. An angel. A significant word in the high degrees. Lenning gives it as *Melek* or *Melech*.

Malachi or **Malachias.** The last of the prophets. A significant word in the Thirty-second Degree of the Scottish Rite.

Malcolm III. (King of Scotland.) Reported to have chartered the Lodge "St. John of Glasgow" in the year 1051.

Malcolm Canmore Charter. See *Manuscripts, Apocryphal.*

Mallet. One of the working-tools of a Mark Master, having the same emblematic meaning as the common gavel in the Entered Apprentice's Degree. It teaches us to correct the irregularities of temper, and, like enlightened reason, to curb the aspirations of unbridled ambition, to depress the malignity of envy, and to moderate the ebullition of anger. It removes from the mind all the excrescences of vice, and fits it, as a well-wrought stone, for that exalted station in the great temple of nature to which, as an emanation of the Deity, it is entitled.

The mallet or setting maul is also an emblem of the Third Degree, and is said to have been the implement by which the stones were set up at the Temple. It is often improperly confounded with the common gavel.

The French Masons, to whom the word *gavel* is unknown, uniformly use *maillet*, or mallet, in its stead, and confound its symbolic use, as the implement of the presiding officer, with the mallet of the English and American Mark Master.

Malta. Anciently, *Melita.* A small island in the Mediterranean Sea, which, although occupying only about 170 sq. miles, possessed for several centuries a greater degree of celebrity than was attached to any other territory of so little extent. It is now a possession of the British Government, but was occupied from 1530 to 1798 by the Knights Hospitalers, then called Knights of Malta, upon whom it was conferred in the former year by Charles V.

Malta, Cross of. See *Cross, Maltese.*

Malta, Knight of. See *Knight of Malta.*

Maltese Cross. See *Cross, Maltese.*

Man. 1. Man has been called the microcosm, or little world, in contradistinction to the macrocosm, or great world, by some fanciful writers on metaphysics, by reason of a supposed correspondence between the different parts and qualities of his nature and those of the universe. But in Masonic symbolism the idea is borrowed from Christ and the Apostles, who repeatedly refer to man as a symbol of the Temple.

2. A man was inscribed on the standard of the tribe of Reuben, and is borne on the Royal Arch banners as appropriate to the Grand Master of the second veil. It was also the charge in the third quarter of the arms of the Atholl Grand Lodge.

3. Der Mann, or the man, is the Second Degree of the German Union.

4. To be "a man, not a woman," is one of the qualifications for Masonic initiation. It is the first, and therefore the most important, qualification mentioned in the ritual.

Man or **Perfected Creation.** The symbol representing *perfected creation*, which is "very common on ancient Hindu monuments in China," embraces so many of the Masonic emblems, and so directly refers to several of the elementary principles taught in philosophic Masonry, that it is here introduced with its explanations. Forlong, in his *Faiths of Man*, gives this arrangement:

A—is the *Earth*, or foundation on which all build.

Wa—*Water*, as in an egg, or as condensed fire and ether.

Ra—*Fire*, or the elements in motion.

Ka—*Air*, or wind—Juno, or *Io* ni; a condensed element.

Cha—*Ether*, or Heaven, the cosmical *Former*.

This figure is frequently found in India:

Ether, or Heaven,

Air,

Fire,

Water,

Earth.

As these symbols are readily interpretable by those conversant with Masonic hieroglyphs, it may be seen that the elements, in their ascending scale, show the perfected creation. Forlong remarks that "as it was difficult to show the *All-pervading Ether*, Egypt, for this purpose, surrounded her figures with a powder of stars instead of flame, which on Indra's garments were Yonis. This figure gradually developed, becoming in time a very concrete man, standing on two legs instead of a square base—the horns of the crescent (Air), being outstretched, formed the arms, and the refulgent Flame the head, which, with the Greeks and Romans, represented the Sun, or *Fire*, and gives Light to all. To this being, it was claimed, there were given seven senses; and thus, perfect and erect, stood Man, rising above the animal state."

The seven senses were seeing, hearing, tasting, feeling, smelling, understanding, and speech. See Ecclesiasticus xvii. 5:

"The Lord created man, and they received the use of the five operations of the Lord; and in the sixth place he imparted (to) them *understanding*, and in the seventh *speech*, an interpreter of the cogitations thereof."

The words "seven senses" also occur in the poem of Taliesin, called "Y Bid Mawr, or the Macrocosm" (*Brit. Mag.*, vol. 21, p. 30). See further the "Mysterium Magnum" of Jacob Boehmen, which teaches "how the soul of man, or his inward holy body," was compounded of the *seven properties* under the influence of the seven planets:

"I will adore my Father,
My God, my Supporter,
Who placed, throughout my head,
The soul of my reason,
And made for my perception
My seven faculties
Of Fire, and Earth, and Water, and Air,
And mist, and flowers,
And the southerly wind,
As it were seven senses of reason
For my Father to impel me:
With the first I shall be animated,
With the second I shall touch,
With the third I shall cry out,
With the fourth I shall taste,
With the fifth I shall see,
With the sixth I shall hear,
With the seventh I shall smell."
[C. T. McClenachan.]

Mandate. That which is commanded. The Benedictine editors of Du Cange define *mandatum* as "breve aut edictum regium," i. e., a royal brief or edict, and *mandamentum* as "literæ quibus magistratus aliquid mandat," i. e., letters in which a magistrate commands anything. Hence the orders and decrees of a Grand Master or a Grand Lodge are called mandates, and implicit obedience to them is of Masonic obligation. There is an appeal, yet not a suspensive one, from the mandate of a Grand Master to the Grand Lodge, but there is none from the latter.

Mango. The branches of this tree are a prominent feature in all Eastern religious ceremonies. The mango is the apple-tree of India, with which man, in Indian tale, tempted Eve.

Mangourit, Michel Ange Bernard de. A distinguished member of the Grand Orient of France. He founded in 1776, at Rennes, the Rite of *Sublimes Elus de la Vérité*, or Sublime Elects of Truth, and at Paris the androgynous society of Dames of Mount Thabor. He also created the Masonic Literary Society of Free Thinkers, which existed for three years. He delivered lectures which were subsequently published under the title of *Cours de Philosophie Maçonnique*, in 500 pp., 4to. He also delivered a great many lectures and discourses before different Lodges, several of which were published. He died, after a long and severe illness, February 17, 1829.

Manichæans. (Also termed Gnostics.) A sect taking its rise in the middle of the third century, whose belief was in two eternal principles of good and evil. They derived their name from Manes, a philosopher of Persian birth, sometimes called Manichæus. Of the two principles, Ormudz was the author of the good, while Ahriman was the master spirit of evil. The two classes of neophytes were, the true, *siddi kûn;* the listeners, *samma un.*

Manichéens, Les Frères. A secret Italian society, founded, according to Thory (*Acta Lat.*, i., 325) and Clavel (*Hist. Pitt.*, p. 407), in the eighteenth century, at which the doctrines of Manes were set forth in several grades.

Manitoba. In 1864 a dispensation was issued over the signature of M. W. Bro. A. T. Pierson, then Grand Master of Masons in Minnesota, and "Northern Light" Lodge was organized at Fort Garry (Winnipeg), with Bro. Dr. John Schultz, Worshipful Master, A. G. B. Bannatyne, S. W., and Wm. Inkster, J. W.

In 1867 Bro. Bannatyne was elected W. M. and the Lodge went out of existence shortly

before the Red River insurrection. At this time, the country was claimed by the "Hon. Hudson Bay Co."; but when the transfer was made to Canada in 1870 and the Red River Settlement, as it was then known, became the Province of Manitoba, the Grand Lodge of Canada assumed jurisdiction and shortly afterward issued Charters to "Prince Rupert's" Lodge, Winnipeg, December, 1870, and Lisgar Lodge, Selkirk.

On May 12, 1875, the three Lodges then existing, viz., "Prince Rupert," "Lisgar," and "Ancient Landmark," held a convention and formed the "Grand Lodge of Manitoba," electing M. W. Bro. the Rev. Dr. W. C. Clarke as Grand Master. [Will H. Whyte.]

Mann, Der. The Man, the second grade of the "Deutsche Union."

Manna, Pot of. Among the articles laid up in the Ark of the Covenant by Aaron was a Pot of Manna. In the substitute ark, commemorated in the Royal Arch Degree, there was, of course, a representation of it. Manna has been considered as a symbol of life; not the transitory, but the enduring one of a future world. Hence the Pot of Manna, Aaron's rod that budded anew, and the Book of the Law, which teaches Divine Truth, all found together, are appropriately considered as the symbols of that eternal life which it is the design of the Royal Arch Degree to teach.

Manningham, Thomas. Dr. Thomas Manningham was a physician, of London, of much repute in the last century. He took an active interest in the concerns of Freemasonry, being Deputy Grand Master of England, 1752–6. According to Oliver (*Revelations of a Square*, p. 86), he was the author of the prayer now so well known to the Fraternity, which was presented by him to the Grand Lodge, and adopted as a form of prayer to be used at the initiation of a candidate. Before that period, no prayer was used on such occasions, and the one composed by Manningham (Oliver says with the assistance of Anderson, which is doubtful, as Anderson died in 1739) is here given as a document of the time. It will be seen that in our day it has been somewhat modified, Preston making the first change; and that, originally used as one prayer, it has since been divided, in this country at least, into two, the first part being used as a prayer at the opening of a Lodge, and the latter at the initiation of a candidate.

"Most Holy and Glorious Lord God, thou Architect of heaven and earth, who art the giver of all good gifts and graces; and hath promised that where two or three are gathered together in thy Name, thou wilt be in the midst of them; in thy Name we assemble and meet together, most humbly beseeching thee to bless us in all our undertakings: to give us thy Holy Spirit, to enlighten our minds with wisdom and understanding; that we may know and serve thee aright, that all our doings may tend to thy glory and the salvation of our souls. And we beseech thee, O Lord God, to bless this our present undertaking, and to grant that this our Brother may dedicate his life to thy service, and be a true and faithful Brother amongst us. Endue him with Divine wisdom, that he may, with the secrets of Masonry, be able to unfold the mysteries of godliness and Christianity. This we humbly beg, in the name and for the sake of Jesus Christ our Lord and Saviour, Amen."

Dr. Manningham rendered other important services to Masonry by his advocacy of healthy reforms and his determined opposition to the schismatic efforts of the "Ancient Masons." He died February 3, 1794. The third edition of the *Book of Constitutions* (1756) speaks of him in exalted terms as "a diligent and active officer" (p. 258.) Two interesting letters written by Dr. Manningham are given at length in Gould's *Concise History of Freemasonry* (pp. 328–334); one dated December 3, 1756, and addressed to what was then the Provincial Grand Lodge of Holland, refusing leave for the holding of Scotch Lodges and pointing out that Freemasonry is the same in all parts of the world; and another dated July 12, 1757, also dealing with the so-called Scotch Masonry, and explaining that its orders of Knighthood were unknown in England, where the only Orders known are those of Masters, Fellow-Crafts, and Apprentices. [E. L. H.]

Mantle. A dress placed over all the others. It is of very ancient date, being a part of the costume of the Hebrews, Greeks, and Romans. Among the Anglo-Saxons it was the decisive mark of military rank, being confined to the cavalry. In the Medieval ages, and on the institution of chivalry, the long, trailing mantle was especially reserved as one of the insignia of knighthood, and was worn by the knight as the most august and noble decoration that he could have, when he was not dressed in his armor. The general color of the mantle, in imitation of that of the Roman soldiers, was scarlet, which was lined with ermine or other precious furs. But some of the Orders wore mantles of other colors. Thus the Knights Templar were clothed with a white mantle having a red cross on the breast, and the Knights Hospitalers a black mantle with a white cross. The mantle is still worn in England and other countries of Europe as a mark of rank on state occasions by peers, and by some magistrates as a token of official rank.

Mantle of Honor. The mantle worn by a knight was called the Mantle of Honor. This mantle was presented to a knight whenever he was made by the king.

Manu. By reference to the *Book of the Dead*, it will be found that this word covers an ideal space corresponding to the word west, in whose bosom is received the setting sun. (See *Truth*.)

Manual. Relating to the hand, from the Latin *manus*, a hand. See the Masonic use of the word in the next two articles.

Manual Point of Entrance. Masons are, in a peculiar manner, reminded, by the hand, of the necessity of a prudent and careful observance of all their pledges and duties, and

hence this organ suggests certain symbolic instructions in relation to the virtue of prudence.

Manual Sign. In the early English lectures this term is applied to what is now called the Manual Point of Entrance.

Manuscripts. Anderson tells us, in the second edition of his *Constitutions*, that in the year 1717 Grand Master Payne "desired any brethren to bring to the Grand Lodge any old writings and records concerning Masons and Masonry, in order to show the usages of ancient times, and several old copies of the Gothic Constitutions were produced and collated" (*Constitutions*, 1738, p. 110); but in consequence of a jealous supposition that it would be wrong to commit anything to print which related to Masonry, an act of Masonic vandalism was perpetrated. For Anderson further informs us that in 1720, "at some private Lodges, several very valuable manuscripts (for they had nothing yet in print), concerning the Fraternity, their Lodges, Regulations, Charges, Secrets, and Usages, (particularly one written by Mr. Nicholas Stone, the Warden of Inigo Jones,) were too hastily burnt by some scrupulous Brothers, that those papers might not fall into strange hands." (*Ibid.* p., 111.)

The recent labors of Masonic scholars in England, among whom the late William James Hughan deserves especial notice, have succeeded in rescuing many of the old Masonic manuscripts from oblivion, and we are now actually in possession of more of these heretofore unpublished treasures of the Craft than were probably accessible to Anderson and his contemporaries. (See *Records, Old.*)

Manuscripts, Apocryphal. There are certain documents that at various times have been accepted as genuine, but which are now rejected, and considered to be fabrications, by most, if not by all, critical Masonic writers.

The question of their authenticity has been thoroughly gone into by R. F. Gould in Ch. XI. of his *History of Freemasonry*, and he places them all "within the category of Apocryphal MSS."

The first is the "Leland-Locke MS." (See *Leland MS.*) The second is the "Steinmetz Catechism," given by Krause as one of the three oldest documents belonging to the Craft, but of which Gould says, "there appears to me nothing in the preceding 'examination' (or *catechism*) that is capable of sustaining the claims to antiquity which have been advanced on its behalf." The third is the *Malcolm Canmore Charter*, which came to light in 1806, consequent upon the "claim of the 'Glasgow Freemen Operative St. John's Lodge' to take precedence of the other Lodges in the Masonic procession, at the laying of the foundation-stone of Nelson's monument on 'Glasgow Green,' although at that time it was an independent organization." According to the Charter, the Glasgow St. John's Lodge was given priority over all the other Lodges in Scotland by Malcolm III., King of Scots, in 1051. The controversy as to the document was lively, but finally it was pronounced to be a manufactured parchment, and the Grand Lodge of Scotland declined to recognize it of value. The fourth MS. is that of Krause, known as *Prince Edwin's Constitution of 926*. Upon this unquestioned reliance had for decades been placed, then it came to be doubted, and is now little credited by inquiring Masons. Bro. Gould closes his recital of criticisms with the remark: "The original document, as commonly happens in forgeries of this description, is missing; and how, under all the circumstances of the case Krause could have constituted himself the champion of its authenticity, it is difficult to conjecture. Possibly, however, the explanation may be, that in impostures of this character, credulity, on the one part, is a strong temptation to deceit on the other, especially to deceit of which no personal injury is the consequence, and which flatters the student of old documents with his own ingenuity." These remarks are specially quoted as relating to almost all apocryphal documents. The fifth is the *Charter of Cologne*, a document in cipher, bearing the date June 24, 1535, as to which see *Cologne, Charter of*. The sixth is the *Larmenius Charter*, or *The Charter of Transmission*, upon which rest the claims of the French Order of the Temple to being the lineal successors of the historic Knights Templar, for which see *Temple, Order of the*. [E. L. H.]

Manuscripts, Old. The following is a list, arranged as far as possible in sequence of age, of the old Masonic MSS., now usually known as the *Old Charges*. They generally consist of three parts—*first*, an opening prayer or invocation; *second*, the legendary history of the Craft; *third*, the peculiar statutes and duties, the regulations and observances, incumbent on Masons. There is no doubt that they were read to candidates on their initiation, and probably each Lodge had a copy which was used for this purpose. The late Bro. W. J. Hughan made a special study of these old MSS., and was instrumental in discovering a great many of them; and his book *The Old Charges of British Freemasons*, published in 1895, is the standard work on the subject.

[E. L. H.]

Marcheshvan. מרחשון. The second month of the Jewish civil year. It begins with the new moon in November, and corresponds, therefore, to a part of that month and of December.

Marconis, Gabriel Mathieu, more frequently known as De Negre, from his dark complexion, was the founder and first G. Master and G. Hierophant of the Rite of Memphis, brought by Sam'l Honis, a native of Cairo, from Egypt, in 1814, who with Baron Dumas and the Marquis de la Rogne, founded a Lodge of the Rite at Montauban, France, on April 30, 1815, which was closed March 7, 1816. In a work entitled *The Sanctuary of Memphis*, by Jacques Etienne Marconis, the author—presumptively the son of G. M. Marconis—who styles himself the founder of the Rite of Memphis, thus briefly gives an account of its origin: "The Rite of Memphis, or Oriental Rite, was introduced into Europe by Ormus, a seraphic priest of Alexandria and Egyptian sage, who had been converted by St. Mark, and reformed the doctrines of the Egyptians in accordance with the principles of Christianity. The disciples of Ormus continued until 1118 to be the sole guardians of ancient Egyptian wisdom, as purified by Christianity and Solomonian science. This science they communicated to the Templars. They were then known by the title of Knights of Palestine, or Brethren Rose Croix of the East. In them the Rite of Memphis recognizes its immediate founders."

The above, coming from the G. Hierophant and founder, should satisfy the most scrupulous as to the conversion of Ormus by St. Mark, and his then introducing the Memphis Rite. But Marconis continues as to the object and intention of his Rite: "The Masonic Rite of Memphis is a combination of the ancient mysteries; it taught the first men to render homage to the Deity. Its dogmas are based on the principles of humanity; its mission is the study of that wisdom which serves to discern truth; it is the beneficent dawn of the development of reason and intelligence; it is the worship of the qualities of the human heart and the impression of its vices; in fine, it is the echo of religious toleration, the union of all belief, the bond between all men, the symbol of sweet illusions of hope, preaching the faith in God that saves, and the charity that blesses."

We are further told by the Hierophant founder that "The Rite of Memphis is the sole depository of High Masonry, the true primitive Rite, the Rite par excellence, which has come down to us without any alteration, and is consequently the only Rite that can justify its origin and the combined exercise of its rights by constitutions, the authenticity of which cannot be questioned. The Rite of Memphis, or Oriental Rite, is the veritable Masonic tree, and all systems, whatsoever they be, are but detached branches of this institution, venerable for its great antiquity, and born in Egypt. The real deposit of the principles of Masonry, written in the Chaldee language, is preserved in the sacred ark of the Rite of Memphis, and in part in the Grand Lodge of Scotland, at Edinburgh, and in the Maronite Convent on Mount Lebanon." "Brother Marconis de Negre, the Grand Hierophant, is the sole consecrated depositary of the traditions of this Sublime Order."

The above is enough to reveal the character of the father and reputed son for truth, as also of the institution founded by them, which, like the firefly, is seen now here, now there, but with no steady beneficial light. (See *Memphis, Rite of.*)

Marconis, Jacques Etienne. Born at Montauban, January 3, 1795; died at Paris, November 21, 1868. (See *Memphis, Rite of.*)

Marduk. A victorious warrior-god, described on one of the Assyrian clay tablets of the British Museum, who was said to have engaged the monster Tiamat in a cosmogonic struggle. He was armed with a namzar (grappling-hook), ariktu (lance), shibbu (lasso), qashtu (bow), zizpau (club), and kabab (shield), together with a dirk in each hand.

Maria Theresa. Empress of Austria, who showed great hostility to Freemasonry, presumably from religious leanings and advisers. Her husband was Francis I., elected Emperor of Germany in 1745. He was a zealous Mason, and had been initiated at The Hague in 1731, at a Special Lodge, at which Lord Chesterfield and Dr. Desaguliers were present. He was raised at Houghton Hall, the same year, while on a visit to England. He assisted to found the Lodge "Drei Kanonen," at Vienna, constituted in 1742. During the forty years' reign of Maria Theresa, Freemasonry was tolerated in Vienna doubtless through the intercession of the Emperor. It is stated in the *Pocket Companion* of 1754, one hundred grenadiers

were sent to break up the Lodge, taking twelve prisoners, the Emperor escaping by a back staircase. He answered for and freed the twelve prisoners. His son, Emperor Joseph, inherited good-will to Masonry. He was G. Master of the Viennese Masons at the time of his death.

Mark. The appropriate jewel of a Mark Master. It is made of gold or silver, usually of the former metal, and must be in the form of a keystone. On the obverse or front surface, the device or "mark" selected by the owner must be engraved within a circle composed of the following letters: H. T. W. S. S. T. K. S. On the reverse or posterior surface, the name of the owner, the name of his Chapter, and the date of his advancement, may be inscribed, although this is not absolutely necessary. The "mark" consists of the device and surrounding inscription on the obverse. The Mark jewel, as prescribed by the Supreme Grand Chapter of Scotland, is of mother-of-pearl. The circle on one side is inscribed with the Hebrew letters חצנאשאמש, and the circle on the other side with letters containing the same meaning in the vernacular tongue of the country in which the Chapter is situated, and the wearer's mark in the center. The Hebrew letters are the initials of a Hebrew sentence equivalent to the English one familiar to Mark Masons. It is but a translation into Hebrew of the English mystical sentence.

It is not requisite that the device or mark should be of a strictly Masonic character, although Masonic emblems are frequently selected in preference to other subjects. As soon as adopted it should be drawn or described in a book kept by the Chapter for that purpose, and it is then said to be "recorded in the Book of Marks," after which time it can never be changed by the possessor for any other, or altered in the slightest degree, but remains as his "mark" to the day of his death.

This mark is not a mere ornamental appendage of the degree, but is a sacred token of the rites of friendship and brotherly love, and its presentation at any time by the owner to another Mark Master, would claim, from the latter, certain acts of friendship which are of solemn obligation among the Fraternity. A mark thus presented, for the purpose of obtaining a favor, is said to be *pledged;* though remaining in the possession of the owner, it ceases, for any actual purposes of advantage, to be his property; nor can it be again used by him until, either by the return of the favor, or with the consent of the benefactor, it has been redeemed; for it is a positive law of the Order, that no Mark Master shall "pledge his mark a second time until he has redeemed it from its previous pledge." By this wise provision, the unworthy are prevented from making an improper use of this valuable token, or from levying contributions on their hospitable brethren. Marks or pledges of this kind were of frequent use among the ancients, under the name of *tessera hospitalis* and "arrhabo." The nature of the *tessera hospitalis*, or, as the Greeks called it, *σύμβολον*, cannot be better described than in the words of the Scholiast on the *Medea of Euripides*, v. 613, where Jason promises Medea, on her parting from him, to send her the symbols of hospitality which should procure her a kind reception in foreign countries. It was the custom, says the Scholiast, when a guest had been entertained, to break a die in two parts, one of which parts was retained by the guest, so that if, at any future period he required assistance, on exhibiting the broken pieces of the die to each other, the friendship was renewed. Plautus, in one of his comedies, gives us an exemplification of the manner in which these *tesseræ* or pledges of friendship were used at Rome, whence it appears that the privileges of this friendship were extended to the descendants of the contracting parties. Pœnulus is introduced, inquiring for Agorastocles, with whose family he had formerly exchanged the *tessera.*

Ag. Siquidem Antidimarchi quæris adoptatitium.
Ego sum ipsus quem tu quæris.
Pœn. Hem! quid ego audio?
Ag. Antidamæ me gnatum esse.
Pœn. Si ita est, tesseram
Conferre si vis hospitalem, eccam, attuli.
Ag. Agedum huc ostende; est par probe; nam habeo domum.
Pœn. O mi hospes, salve multum; nam mihi tuus pater,
Pater tuus ergo hospes, Antidamas fuit:
Hæc mihi hospitalis tessera cum illo fuit.
Pœnul., act. v., s. c. 2, *ver.* 85.

Ag. Antidimarchus' adopted son,
If you do seek, I am the very man.
Pœn. How! do I hear aright?
Ag. I am the son
Of old Antidamus.
Pœn. If so, I pray you
Compare with me the hospitable die
I've brought this with me.
Ag. Prithee, let me see it.
It is, indeed, the very counterpart
Of mine at home.
Pœn. All hail, my welcome guest,
Your father was my guest, Antidamus.
Your father was my honored guest, and then
This hospitable die with me he parted.

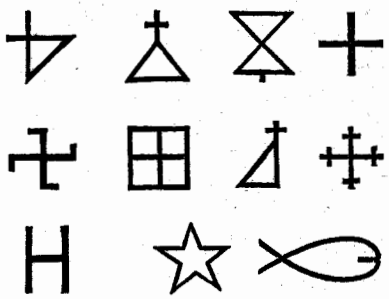
These *tesseræ*, thus used, like the Mark Master's mark, for the purposes of perpetuating friendship and rendering its union more sacred, were constructed in the following manner: they took a small piece of bone, ivory, or stone, generally of a square or cubical form, and dividing it into equal parts, each wrote his own name, or some other inscription, upon one of the pieces; they then made a mutual exchange, and, lest falling into other hands it should give occasion to imposture, the pledge was preserved with the greatest secrecy, and no one knew the name inscribed upon it except the possessor.

The primitive Christians seem to have adopted a similar practise, and the *tessera* was carried by them in their travels, as a means of introduction to their fellow Christians. A favorite inscription with them were the letters Π. Υ. Α. Π., being the initials of Πατηρ, Υιος, Αγιον Πνευμα, or Father, Son, and Holy Ghost.

The use of these *tesseræ*, in the place of written certificates, continued, says Dr. Harris (*Diss. on the Tess. Hosp.*), until the eleventh century, at which time they are mentioned by Burchardus, Archbishop of Worms, in a visitation charge.

The "arrhabo" was a similar keepsake, formed by breaking a piece of money in two. The etymology of this word shows distinctly that the Romans borrowed the custom of these pledges from the ancient Israelites, for it is derived from the Hebrew *arabon*, a pledge.

With this detail of the customs of the ancients before us, we can easily explain the well-known passage in Revelation ii. 17: "To him that overcometh will I give a white stone, and in it a new name written, which no man knoweth saving he that receiveth it." That is, to borrow the interpretation of Harris, "To him that overcometh will I give a pledge of my affection, which shall constitute him my friend, and entitle him to privileges and honors of which none else can know the value or the extent."



Mark Man. According to Masonic tradition, the Mark Men were the Wardens, as the Mark Masters were the Masters of the Fellow-Craft Lodges, at the building of the Temple. They distributed the marks to the workmen, and made the first inspection of the work, which was afterward to be approved by the overseers. As a degree, the Mark Man is not recognized in the United States. In England it is sometimes, but not generally, worked as preparatory to the degree of Mark Master. In Scotland, in 1778, it was given to Fellow-Crafts, while the Mark Master was restricted to Master Masons. It is not recognized in the present regulations of the Supreme Grand Chapter of Scotland. Much of the esoteric ritual of the Mark Man has been incorporated into the Mark Master of the American System.

Mark Master. The Fourth Degree of the American Rite. The traditions of the degree make it of great historical importance, since by them we are informed that by its influence each Operative Mason at the building of the Temple was known and distinguished, and the disorder and confusion which might otherwise have attended so immense an undertaking was completely prevented. Not less useful is it in its symbolic signification. As illustrative of the Fellow-Craft, the Fourth Degree is particularly directed to the inculcation of order, regularity, and discipline. It teaches us that we should discharge all the duties of our several stations with precision and punctuality; that the work of our hands and the thoughts of our hearts should be good and true—not unfinished and imperfect, not sinful and defective—but such as the Great Overseer and Judge of heaven and earth will see fit to approve as a worthy oblation from his creatures. If the Fellow-Craft's Degree is devoted to the inculcation of learning, that of the Mark Master is intended to instruct us how that learning can most usefully and judiciously be employed for our own honor and the profit of others. And it holds forth to the desponding the encouraging thought that although our motives may sometimes be misinterpreted by our erring fellow mortals, our attainments be underrated, and our reputations be traduced by the envious and malicious, there is one, at least, who sees not with the eyes of man, but may yet make that stone which the builders rejected, the head of the corner. The intimate connection then, between the Second and Fourth degrees of Masonry, is this, that while one inculcates the necessary exercise of all the duties of life, the other teaches the importance of performing them with systematic regularity. The true Mark Master is a type of that man mentioned in the sacred parable, who received from his master this approving language—"Well done, good and faithful servant; thou hast been faithful over a few things, I will make thee ruler over many things: enter thou into the joys of thy Lord."

In America, the Mark Master's is the first degree given in a Royal Arch Chapter. Its officers are a Right Worshipful Master, Senior and Junior Wardens, Secretary, Treasurer, Senior and Junior Deacons, Master, Senior and Junior Overseers. The degree cannot be conferred when less than six are present, who, in that case, must be the first and last three officers above named. The working tools are the *Mallet* and *Indenting Chisel* (which see). The symbolic color is purple. The Mark Master's Degree is now given in England under the authority of the Grand Lodge of Mark Masters, which was established in June, 1856, and is a jurisdiction independent of the Grand Lodge. The officers are the same as in America, with the addition of a Chaplain, Director of Ceremonies, Assistant Director, Registrar of Marks, Inner Guard or Time Keeper, and two Stewards. Master Masons are eligible for initiation. Bro. Hughan says that the degree is virtually the same in England, Scotland, and Ireland. It differs, however, in some respects from the American degree.

Mark of the Craft, Regular. In the Mark Degree there is a certain stone which is said, in the ritual, not to have upon it *the regular mark of the Craft*. This expression is derived from the following tradition of the degree. At the building of the Temple, each workman placed his own mark upon his own materials, so that the workmanship of every Mason might be readily distinguished, and praise or blame be justly awarded. These marks, according to the lectures, consisted of mathematical figures, squares, angles, lines, and perpendiculars, and hence any figure of a different kind, such as a circle, would not be deemed "the regular mark of the Craft." Of the three stones used in the Mark Degree, one is inscribed with a square and another with a plumb or perpendicular, because these were marks familiar to the Craft; but the third, which is inscribed with a circle and certain hieroglyphics, was not known, and was not, therefore, called "regular."

Marks of the Craft. In former times, Operative Masons, the "Steinmetzen" of Germany, were accustomed to place some mark or sign of their own invention, which, like the monogram of the painters, would seem to identify the work of each. They are to be found upon the cathedrals, churches, castles, and other stately buildings erected since the twelfth century, or a little earlier, in Germany, France, England, and Scotland. As Mr. Godwin has observed in his *History in Ruins*, it is curious to see that these marks are of the same character, in form, in all these different countries. They were principally crosses, triangles, and other mathematical figures, and many of them were religious symbols. Specimens taken from different buildings supply such forms as follow.

The last of these is the well-known *vesica piscis*, the symbol of Christ among the primitive Christians, and the last but one is the Pythagorean pentalpha. A writer in the *London Times* (August 13, 1835) is incorrect in stating that these marks are confined to Germany, and are to be found only since the twelfth or thirteenth centuries. More recent researches have shown that they existed in many other countries, especially in Scotland, and that they were practised by the builders of ancient times. Thus Ainsworth, in his *Travels* (ii., 167), tells us, in his description of the ruins of Al-Hadhv in Mesopotamia, that "every stone, not only in the chief building, but in the walls and bastions and other public monuments, when not defaced by time, is marked with a character which is for the most part either a Chaldean letter or numeral." M. Didron, who reported a series of observations on the subject of these Masons' marks to the *Comitè Historique des Arts et Monumens* of Paris, believes that he can discover in them references to distinct schools or Lodges of Masons. He divides them into two classes: those of the overseers, and those of the men who worked the stones. The marks of the first class consist of monogrammatic characters; those of the second, are of the nature of symbols, such as shoes, trowels, mallets, etc.

A correspondent of the *Freemasons' Quarterly Review* states that similar marks are to be found on the stones which compose the walls of the fortress of Allahabad, which was erected in 1542, in the East Indies. "The walls," says this writer, "are composed of large oblong blocks of red granite, and are almost everywhere covered by Masonic emblems, which evince something more than mere ornament. They are not confined to one particular spot, but are scattered over the walls of the fortress, in many places as high as thirty or forty feet from the ground. It is quite certain that thousands of stones on the walls, bearing these Masonic symbols, were carved, marked, and numbered in the quarry previous to the erection of the building."

In the ancient buildings of England and France, these marks are to be found in great abundance. In a communication, on this subject, to the London Society of Antiquaries, Mr. Godwin states that, "in my opinion, these marks, if collected and compared might assist in connecting the various bands of operatives, who, under the protection of the Church—mystically united—spread themselves over Europe during the Middle Ages, and are known as Freemasons." Mr. Godwin describes these marks as varying in length from two to seven inches, and as formed by a single line, slightly indented, consisting chiefly of crosses, known Masonic symbols, emblems of the Trinity and of eternity, the double triangle, trowel, square, etc.

The same writer observes that, in a conversation, in September, 1844, with a Mason at work on the Canterbury Cathedral, he "found that many Masons (*all* who were Freemasons) had their mystic marks handed down from generation to generation; this man had his mark from his father, and he received it from his grandfather."

Marrow in the Bone. An absurd corruption of a Jewish word, and still more absurdly said to be its translation. It has no appropriate signification in the place to which it is applied, but was once religiously believed in by many Masons, who, being ignorant of the Hebrew language, accepted it as a true interpretation. It is now universally rejected by the intelligent portion of the Craft.

Marseilles, Mother Lodge of. A Lodge was established in 1748, at Marseilles, in France, Thory says, by a traveling Mason, under the name of St. Jean d'Ecosse. It afterward assumed the name of Mother Lodge of Marseilles, and still later the name of Scottish Mother Lodge of France. It granted Warrants of its own authority for Lodges in France and in the colonies; among others for one at New Orleans, in Louisiana.

Marshal. An officer common to several Masonic bodies, whose duty is to regulate processions and other public solemnities. In Grand bodies he is called a Grand Marshal. In the American Royal Arch System, the Captain of the Host acts on public occasions as the Marshal. The Marshal's ensign of office is a baton or short rod. The office of Marshal in State affairs is very ancient. It was found in the court of the Byzantine emperors, and was introduced into England from France at the period of the conquest. His badge of office was at first a rod or verge, which was afterward abbreviated to the baton, for, as an old writer

has observed (Thinne), "the verge or rod was the ensign of him who had authority to reform evil in warre and in peace, and to see quiet and order observed among the people."

Martel. Charles Martel, who died in 741, although not actually king, reigned over France under the title of Mayor of the Palace. Rebold (*Hist. Gen.*, p. 69) says that "at the request of the Anglo-Saxon kings, he sent workmen and Masters into England." The Operative Masons of the Middle Ages considered him as one of their patrons, and give the following account of him in their Legend of the Craft. "There was one of the Royal line of France called *Charles Marshall*, and he was a man that loved well the said Craft and took upon him the Rules and Manners, and after that By the Grace of God he was elect to be the *King* of France, and when he was in his Estate, he helped to make those Masons that were now, and sett them on Work and gave them Charges and Manners and good pay as he had learned of other Masons, and confirmed them a Charter from yeare to yeare to hold their Assembly when they would, and Cherished them right well, and thus came this Noble Craft into France." (Lansdowne MS.)

Martha. The Fourth Degree of the Eastern Star; a Rite of American Adoptive Masonry.

Martinism. The Rite of Martinism, called also the Rectified Rite, was instituted at Lyons, by the Marquis de St. Martin, a disciple of Martinez Paschalis, of whose Rite it was pretended to be a reform. Martinism was divided into two classes, called Temples, in which were the following degrees:

I. Temple. 1. Apprentice. 2. Fellow-Craft. 3. Master Mason. 4. Past Master. 5. Elect. 6. Grand Architect. 7. Mason of the Secret.

II. Temple. 8. Prince of Jerusalem. 9. Knight of Palestine. 10. Kadosh.

The degrees of Martinism abounded in the reveries of the Mystics. (See *Saint Martin.*)

Martin, Louis Claude de St. See *Saint Martin.*

Martyr. A title bestowed by the Templars on their last Grand Master, James de Molay. If, as Du Cange says, the Church sometimes gives the title of martyr to men of illustrious sanctity, who have suffered death not for the confession of the name of Christ, but for some other cause, being slain by impious men, then De Molay, as the innocent victim of the malignant schemes of an atrocious pope and king, was clearly entitled to the appellation.

Martyrs, Four Crowned. See *Four Crowned Martyrs.*

Maryland. Freemasonry was introduced into Maryland, in 1750, by the Provincial Grand Lodge of Massachusetts, which issued a Charter for the establishment of a Lodge at Annapolis. Five other Lodges were subsequently chartered by the Provincial Grand Lodge of Pennsylvania, and one in 1765, at Joppa, by the Grand Lodge of England. On the 31st of July, 1783, these five Lodges held a convention at Talbot Court-House, and informally organized a Grand Lodge. But as the Lodge at Annapolis had taken no part in this movement, another convention of all the Lodges was held at Baltimore on the 17th of April, 1787, and the Grand Lodge of Maryland was duly organized, John Coates being elected the Grand Master. The Grand Chapter was established in 1812.

Mason Crowned. (*Maçon Couronne.*) A degree in the nomenclature of Fustier.

Mason, Derivation of the Word. The search for the etymology or derivation of the word *Mason* has given rise to numerous theories, some of them ingenious, but many of them very absurd. Thus, a writer in the *European Magazine* for February, 1792, who signs his name as "George Drake," lieutenant of marines, attempts to trace the Masons to the Druids, and derives *Mason* from *May's on*, *May's* being in reference to *May-day*, the great festival of the Druids, and *on* meaning *men*, as in the French *on dit*, for *homme dit*. According to this, *May's on* therefore means the *Men of May*. This idea is not original with Drake, since the same derivation was urged in 1766 by Cleland, in his essays on *The Way to Things in Words*, and on *The Real Secret of Freemasons*.

Hutchinson, in his search for a derivation, seems to have been perplexed with the variety of roots that presented themselves, and, being inclined to believe that the name of *Mason* "has its derivation from a language in which it implies some strong indication or distinction of the nature of the society, and that it has no relation to architects," looks for the root in the Greek tongue. Thus he thinks that *Mason* may come from Μαω Σαον, *Mao Soon*, "I seek salvation," or from Μυστης, *Mystes*, "an initiate"; and that *Masonry* is only a corruption of Μεσουρανεω, *Mesouraneo*, "I am in the midst of heaven"; or from Μαζουρουθ, *Mazourouth*, a constellation mentioned by Job, or from Μυστηριον, *Mysterion*, "a mystery."

Lessing says, in his *Ernst und Falk*, that *Masa* in the Anglo-Saxon signifies a *table*, and that *Masonry*, consequently, is *a society of the table*.

Nicolai thinks he finds the root in the Low Latin word of the Middle Ages *Massonya*, or *Masonia*, which signifies an exclusive society or club, such as that of the round table.

Coming down to later times, we find Bro. C. W. Moore, in his *Boston Magazine*, of May, 1844, deriving *Mason* from Λιθοτομος, *Lithotomos*, "a Stone-cutter." But although fully aware of the elasticity of etymological rules, it surpasses our ingenuity to get *Mason* etymologically out of *Lithotomos*.

Bro. Giles F. Yates sought for the derivation of *Mason* in the Greek word Μαζονες, *Mazones*, a festival of Dionysus, and he thought that this was another proof of the lineal descent of the Masonic order from the Dionysiac Artificers.

The late William S. Rockwell, who was accustomed to find all his Masonry in the Egyptian mysteries, and who was a thorough student of the Egyptian hieroglyphic system,

derives the word *Mason* from a combination of two phonetic signs, the one being MAI, and signifying "to love," and the other being SON, which means "a brother." Hence, he says, "this combination, MAISON, expresses exactly in sound our word MASON, and signifies literally *loving brother*, that is, *philadelphus, brother of an association*, and thus corresponds also in sense."

But all of these fanciful etymologies, which would have terrified Bopp, Grimm, or Müller, or any other student of linguistic relations, forcibly remind us of the French epigrammatist, who admitted that *alphina* came from *equus*, but that, in so coming, it had very considerably changed its route.

What, then, is the true derivation of the word *Mason*? Let us see what the orthoepists, who had no Masonic theories, have said upon the subject.

Webster, seeing that in Spanish *masa* means *mortar*, is inclined to derive *Mason*, as denoting one that works in mortar, from the root of *mass*, which of course gave birth to the Spanish word.

In Low or Medieval Latin, *Mason* was *machio* or *macio*, and this Du Cange derives from the Latin *maceria*, "a long wall." Others find a derivation in *machinæ*, because the builders stood upon machines to raise their walls. But Richardson takes a common-sense view of the subject. He says, "It appears to be obviously the same word as *maison*, a house or *mansion*, applied to the person who builds, instead of the thing built. The French *Maissoner* is to build houses; *Masonner*, to build of stone. The word *Mason* is applied by usage to a builder in stone, and *Masonry* to work in stone."

Carpenter gives *Massom*, used in 1225, for a building of stone, and *Massonus*, used in 1304, for a *Mason;* and the Benedictine editors of Du Cange define *Massoneria* "a building, the French Maçonnerie, and *Massonerius*," as Latomus or a Mason, both words in manuscripts of 1385.

[Dr. Murray, in the *New English Dictionary*, says of the word *Mason:* "the ulterior etymology is obscure, possibly the word is from the root of Latin 'maceria' (a wall)."]

As a practical question, we are compelled to reject all those fanciful derivations which connect the Masons etymologically and historically with the Greeks, the Egyptians, or the Druids, and to take the word *Mason* in its ordinary signification of a worker in stone, and thus indicate the origin of the Order from a society or association of practical and operative builders. We need no better root than the Medieval Latin *Maçonner*, to build, or *Maçonetus*, a builder.

Masoney. Used in the Strassburg Constitutions, and other German works of the Middle Ages, as equivalent to the modern Masonry. Kloss translates it by *Masonhood*. Lessing derives it from *masa*, Anglo-Saxon, a *table*, and says it means a Society of the Table. Nicolai deduces it from the Low Latin *massonya*, which means both a *club* and a *key*, and says it means an exclusive society or club, and so, he thinks, we get our word *Masonry*. Krause traces it to *mas*, *mase*, food or a banquet. It is a pity to attack these speculations, but we are inclined to look at *Masonry* as simply a corruption of the English *Masonrie*.

Mason Hermetic. (*Maçon Hermétique.*) A degree in the Archives of the Mother Lodge of the Eclectic Philosophic Rite.

Masonic Colors. The colors appropriated by the Fraternity are many, and even shades of the same color. The principal ones are *blue*, to the Craft degrees; *purple*, to the Royal Arch; *white* and *black*, to the Order of the Temple; while all colors are used in the respective degrees of the A. A. Scottish Rite: notably, the nine-colored girdle, intertwined with a tenth, worn in the Fourteenth Degree of the last-named system.

Masonic Hall. See *Hall, Masonic.*

Masonic Literature. See *Literature of Masonry.*

Mason, Illustrious and Sublime Grand Master. (*Maçon Illustre et Sublime Grand Maître.*) A degree in the manuscript collection of Peuvret.

Mason of the Secret. (*Maçon du Secret.*) 1. The Sixth Degree of the Rite of Tschoudy. 2. The Seventh Degree of the Rite of Saint Martin.

Mason, Operative. See *Operative Masons.*

Mason, Perfect. (*Maçon Parfait.*) The Twenty-seventh Degree of the collection of the Metropolitan Chapter of France.

Mason Philosopher. (*Maçon Philosophe.*) A degree in the manuscript collection of Peuvret.

Mason, Practical. The French so call an Operative Mason, *Maçon de Pratique.*

Masonry. Although Masonry is of two kinds, Operative and Speculative, yet Masonic writers frequently employ the word *Masonry* as synonymous with *Freemasonry.*

Masonry, Operative. See *Operative Masonry.*

Masonry, Origin of. See *Origin of Freemasonry.*

Masonry, Speculative. See *Speculative Masonry.*

Masons, Company of. One of the ninety-one livery companies of London, but not one of the twelve greater ones. Their arms are azure, on a chevron, between three castles argent, a pair of compasses somewhat extended of the 1st; crest, a castle of the 2d; and motto, "In the Lord is all our trust." These were granted by Clarencieux, King of arms, in 1472, but they were not incorporated until Charles II. gave them a charter in 1677. They are not to be confounded with the Fraternity of Freemasons, but originally there was some connection between the two. At their hall in Basinghall Street, Ashmole says that in 1682 he attended a meeting at which several persons were "admitted into the Fellowship of Freemasons." (See *Ashmole, Elias*, and *Accepted*).

Mason, Scottish Master. (*Maçon Ecossais Maître.*) Also called Perfect Elect, *Elu*

parfait. A degree in the Archives of the Mother Lodge of the Philosophic Scottish Rite.

Masons, Emperor of all the. (*Maçons, Empereur de tous les.*) A degree cited in the nomenclature of Fustier.

Mason, Speculative. See *Speculative Masonry.*

Mason, Stone. See *Stone Masons.*

Mason Sublime. (*Maçon sublime.*) A degree in the manuscript collection of Peuvret.

Mason, Sublime Operative. (*Maçon Sublime Pratique.*) A degree in the manuscript collection of Peuvret.

Mason's Wife and Daughter. A degree frequently conferred in the United States on the wives, daughters, sisters, and mothers of Masons, to secure to them, by investing them with a peculiar mode of recognition, the aid and assistance of the Fraternity. It may be conferred by any Master Mason, and the requirement is that the recipient shall be the wife, unmarried daughter, unmarried sister, or widowed mother of a Master Mason. It is sometimes called the Holy Virgin, and has been by some deemed of so much importance that a Manual of it, with the title of *The Ladies' Masonry, or Hieroglyphic Monitor,* was published at Louisville, Kentucky, in 1851, by Past Grand Master William Leigh, of Alabama.

Mason, True. (*Maçon Vrai.*) A degree composed by Pernetty. It is the only one of the high Hermetic degrees of the Rite of Avignon, and it became the first degree of the same system after it was transplanted to Montpellier. (See *Academy of True Masons.*)

Masora. A Hebrew work on the Bible, intended to secure it from any alterations or innovations. Those who composed it were termed Masorites, who taught from tradition, and who invented the Hebrew points. They were also known as Melchites.

Masoretic Points. The Hebrew alphabet is without vowels, which were traditionally supplied by the reader from oral instruction, hence the true ancient sounds of the words have been lost. But about the eighth or ninth century a school of Rabbis, called Masorites, invented vowel points, to be placed above or below the consonants, so as to give them a determined pronunciation. These *Masoretic Points* are never used by the Jews in their rolls of the law, and in all investigations into the derivation and meaning of Hebrew names, Masonic scholars and other etymologists always reject them.

Massachusetts. Freemasonry was introduced into Massachusetts, in 1733, by a Deputation granted to Henry Price as Grand Master of North America, dated April 30, 1733. Price, on July 30th of the same year, organized the "St. John's Grand Lodge," which immediately granted a Warrant to "St. John's Lodge" in Boston, which is now the oldest Lodge existing in America. In 1752 some brethren in Boston formed a Lodge, which was afterward known as "St. Andrew's Lodge," and received a Warrant from the Grand Lodge of Scotland; the rivalry between the two Lodges continued for forty years. On December 27, 1769, St. Andrew's Lodge, with the assistance of three traveling Lodges in the British army, organized the Grand Lodge of Massachusetts, and elected Joseph Warren Grand Master. In 1792, the two Grand Lodges united and formed the "Grand Lodge of the Most Ancient and Honorable Society of Free and Accepted Masons for the Commonwealth of Massachusetts," and elected John Cutler Grand Master.

The Grand Chapter of Massachusetts was organized June 12, 1798, and the Grand Council of Royal and Select Masters in 1826. The Grand Commandery, which exercises jurisdiction over both Massachusetts and Rhode Island, was established May 6, 1805. In 1807 it extended its jurisdiction, and called itself "The United States Grand Encampment." In 1816, it united with other Encampments at a convention in Philadelphia, where a General Grand Encampment of the United States was formed; and in 1819, at the meeting of that body, the representatives of the "Grand Encampment of Massachusetts and Rhode Island" are recorded as being present. And from that time it has retained that title, only changing it, in 1859, to "Grand Commandery," in compliance with the new Constitution of the Grand Encampment of the United States.

Massena, Andre. Duke of Rivoli, Prince of Essling, and a Marshal of France, born at Nice in 1758. Early in the French Revolution he joined a battalion of volunteers, and soon rose to high military rank. He was a prominent Grand Officer of the French Grand Orient. He was designated by Napoleon, his master, as the Robber, in consequence of his being so extortionate.

Massonus. Used in the thirteenth and fourteenth centuries, according to Carpenter (*Gloss.*), for Mason.

Master, Absolute Sovereign Grand. (*Souverain Grand Maître absolu.*) The Ninetieth and last degree of the Rite of Mizraim.

Master ad Vitam. In the French Masonry of the earlier part of the last century, the Masters of Lodges were not elected annually, but held their office for life. Hence they were called *Masters ad Vitam,* or Masters for life.

Master, Ancient. (*Maître Ancien.*) The Fourth Degree of the Rite of Martinism. This would more properly be translated Past Master, for it has the same position in the *régime* of St. Martin that the Past Master has in the English system.

Master Architect, Grand. See *Grand Master Architect.*

Master Architect, Perfect. (*Maître Architecte Parfait.*) A degree in the Archives of the Mother Lodge of the Philosophic Scottish Rite, and in some other collections.

Master Architect, Prussian. (*Maître Architecte Prussien.*) A degree in the Archives of the Mother Lodge of the Philosophic Scottish Rite.

Master, Blue. A name sometimes given, in the Scottish Rite, to Master Masons of the Third Degree, in contradistinction to some of the higher degrees, and in reference to the color of their collar.

Master Builder. Taking the word *master* in the sense of one possessed of the highest degree of skill and knowledge, the epithet "Master Builder" is sometimes used by Masons as an epithet of the Great Architect of the Universe. Urquhart (*Pillars of Hercules*, ii., 67) derives it from the ancient Hebrews, who, he says, "used *alqabil*, the Master Builder, as an epithet of God."

Master, Cohen. (*Maître Coën.*) A degree in the collection of the Mother Lodge of the Philosophic Scottish Rite.

Master, Crowned. (*Maître Couronne.*) A degree in the collection of the Lodge of Saint Louis des Amis-Réunis at Calais.

Master, Egyptian. (*Maître Egyptien.*) A degree in the Archives of the Mother Lodge of the Philosophic Scottish Rite.

Master, Elect. See *Elect Master.*

Master, English. (*Maître Anglais.*) The Eighth Degree of the Rite of Mizraim.

Master, English Perfect. (*Maître Parfait Anglais.*) A degree in the collection of Le Rouge.

Master, Four Times Venerable. (*Maître quatre fois Vénérable.*) A degree introduced into Berlin by the Marquis de Bernez.

Master, Grand. See *Grand Master.*

Master Hermetic. (*Maître Hermétique.*) A degree in the collection of Lemanceau.

Master, Illustrious. (*Maître Illustre.*) A degree in the collection of Lemanceau.

Master, Illustrious Symbolic. (*Maître Symbolique Illustre.*) A degree in the nomenclature of Fustier.

Master in Israel. See *Intendant of the Building.*

Master in Perfect Architecture. (*Maître en la Parfaite Architecture.*) A degree in the nomenclature of Fustier.

Master in the Chair. (*Meister im Stuhl.*) The name given in Germany to the presiding officer of a Lodge. It is the same as the Worshipful Master in English.

Master, Irish. (*Maître Irlandais.*) The Seventh Degree of the Rite of Mizraim. Ramsay gave this name at first to the degree which he subsequently called Maître Ecossais or Scottish Master. It is still the Seventh Degree of the Rite of Mizraim.

Master, Kabbalistic. (*Maître Cabalistique.*) A degree in the collection of the Mother Lodge of the Philosophic Scottish Rite.

Master, Little Elect. (*Petit Maître élu.*) A degree in the Archives of the Mother Lodge of the Philosophic Scottish Rite.

Master Mason. In all the Rites of Masonry, no matter how variant may be their organization in the high degrees, the Master Mason constitutes the Third Degree. In form this degree is also everywhere substantially the same, because its legend is an essential part of it; and, as on that legend the degree must be founded, there can nowhere be any important variation, because the tradition has at all times been the same.

The Master Mason's Degree was originally called the summit of Ancient Craft Masonry; and so it must have been before the disseverance from it of the Royal Arch, by which is meant not the ritual, but the symbolism of Arch Masonry. But under its present organization the degree is actually incomplete, because it needs a complement that is only to be supplied in a higher one. Hence its symbolism is necessarily restricted, in its mutilated form, to the first Temple and the present life, although it gives the assurance of a future one.

As the whole system of Craft Masonry is intended to present the symbolic idea of man passing through the pilgrimage of life, each degree is appropriated to a certain portion of that pilgrimage. If, then, the First Degree is a representation of youth, the time to learn, and the Second of manhood or the time to work, the Third is symbolic of old age, with its trials, its sufferings, and its final termination in death. The time for toiling is now over—the opportunity to learn has passed away—the spiritual temple that we all have been striving to erect in our hearts, is now nearly completed, and the wearied workman awaits only the word of the Grand Master of the Universe, to call him from the labors of earth to the eternal refreshments of heaven. Hence, this is, by far, the most solemn and sacred of the degrees of Masonry; and it has, in consequence of the profound truths which it inculcates, been distinguished by the Craft as the sublime degree. As an Entered Apprentice, the Mason was taught those elementary instructions which were to fit him for further advancement in his profession, just as the youth is supplied with that rudimentary education which is to prepare him for entering on the active duties of life; as a Fellow-Craft, he is directed to continue his investigations in the science of the Institution, and to labor diligently in the tasks it prescribes, just as the man is required to enlarge his mind by the acquisition of new ideas, and to extend his usefulness to his fellow-creatures; but, as a Master Mason, he is taught the last, the most important, and the most necessary of truths, that having been faithful to all his trusts, he is at last to die, and to receive the reward of his fidelity.

It was the single object of all the ancient rites and mysteries practised in the very bosom of Pagan darkness, shining as a solitary beacon in all that surrounding gloom, and cheering the philosopher in his weary pilgrimage of life, to teach the immortality of the soul. This is still the great design of the Third Degree of Masonry. This is the scope and aim of its ritual. The Master Mason represents man, when youth, manhood, old age, and life itself, have passed away as fleeting shadows, yet raised from the grave of iniquity, and quickened into another and a better existence. By its legend and all its

G

ritual, it is implied that we have been redeemed from the death of sin and the sepulcher of pollution. "The ceremonies and the lecture," says Dr. Crucefix, "beautifully illustrate this all-engrossing subject; and the conclusion we arrive at is, that youth, properly directed, leads us to honorable and virtuous maturity, and that the life of man, regulated by morality, faith, and justice, will be rewarded at its closing hour, by the prospect of eternal bliss."

Masonic historians have found much difficulty in settling the question as to the time of the invention and composition of the degree. The theory that at the building of the Temple of Jerusalem the Craft were divided into three or even more degrees, being only a symbolic myth, must be discarded in any historical discussion of the subject. The real question at issue is whether the Master Mason's Degree, as a degree, was in existence among the Operative Freemasons before the eighteenth century, or whether we owe it to the Revivalists of 1717. Bro. Wm. J. Hughan, in a very able article on this subject, published in 1873, in the *Voice of Masonry*, says that "so far the evidence respecting its history goes no farther back than the early part of the last century." The evidence, however, is all of a negative character. There is none that the degree existed in the seventeenth century or earlier, and there is none that it did not. All the old manuscripts speak of Masters and Fellows, but these might have been and probably were only titles of rank. The Sloane MS., No. 3329, speaks, it is true, of modes of recognition peculiar to Masters and Fellows, and also of a Lodge consisting of Masters, Fellows, and Apprentices. But even if we give to this MS. its earliest date, that which is assigned to it by Findel, near the end of the seventeenth century, it will not necessarily follow that these Masters, Fellows, and Apprentices had each a separate and distinct degree. Indeed, it refers only to one Lodge, which was, however, constituted by three different ranks; and it records but one oath, so that it is possible that there was only one common form of initiation.

The first positive historical evidence that we have of the existence of a Master's Degree is to be found in the General Regulations compiled by Payne in 1720. It is there declared that Apprentices must be admitted Masters and Fellow-Crafts only in the Grand Lodge. The degree was then in existence. But this record would not militate against the theory advanced by some that Desaguliers was its author in 1717. Dermott asserts that the degree, as we now have it, was the work of Desaguliers and seven others, who, being Fellow-Crafts, but not knowing the Master's part, boldly invented it, that they might organize a Grand Lodge. He intimates that the true Master's Degree existed before that time, and was in possession of the Ancients. But Dermott's testimony is absolutely worth nothing, because he was a violent partisan, and because his statements are irreconcilable with other facts. If the Ancients were in possession of the degree which had existed before 1717, and the Moderns were not, where did the former get it?

Documentary evidence is yet wanting to settle the precise time of the composition of the Third Degree as we now have it. But it would not be prudent to oppose too positively the theory that it must be traced to the second decade of the eighteenth century. The proofs, as they arise day by day, from the resurrection of old manuscripts, seem to incline that way.

But the legend, perhaps, is of much older date. It may have made a part of the general initiation; but there is no doubt that, like the similar one of the Compagnons de la Tour in France, it existed among the Operative Gilds of the Middle Ages as an esoteric narrative. Such a legend all the histories of the Ancient Mysteries prove to us belongs to the spirit of initiation. There would have been no initiation worth preservation without it.

Master, Most High and Puissant. (*Maître très haut et très puissant.*) The Sixty-second Degree of the Rite of Mizraim.

Master, Most Wise. The title of a presiding officer of a Chapter of Rose Croix, usually abbreviated as Most Wise.

Master, Mystic. (*Maître Mystique.*) A degree in the collection of Pyron.

Master of all Symbolic Lodges, Grand. See *Grand Master of all Symbolic Lodges.*

Master of a Lodge. See *Worshipful.*

Master of Cavalry. An officer in a Council of Companions of the Red Cross, whose duties are, in some respects, similar to those of a Junior Deacon in a symbolic Lodge. The two offices of Master of Cavalry and Master of Infantry were first appointed by Constantine the Great.

Master of Ceremonies. An officer found in many American Lodges and at one time in the Lodges of England and the Continent. In English Lodges the office is almost a nominal one, without any duties, but in the continental Lodges he acts as the conductor of the candidate. Oliver says that the title should be, properly, Director of Ceremonies, and he objects to Master of Ceremonies as "unmasonic." In the Constitutions of the Grand Lodge of England, issued in 1884, the title is changed to "Director of Ceremonies."

Master of Dispatches. The Secretary of a Council of Companions of the Red Cross. The *Magister Epistolarum* was the officer under the Empire who conducted the correspondence of the Emperor.

Master of Finances. The Treasurer of a Council of Companions of the Red Cross.

Master of Hamburg, Perfect. (*Maître parfait de Hamburg.*) A degree in the nomenclature of Fustier.

Master of Infantry. The Treasurer of a Council of Companions of the Red Cross. (See *Master of Cavalry.*)

Master of Lodges. (*Maître des Loges.*) The Sixty-first Degree of the Rite of Mizraim.

Master of Masters, Grand. (*Grand Maître des Maîtres.*) The Fifty-ninth Degree of the Metropolitan Chapter of France.

Master of Paracelsus. (*Maître de Paracelse.*) A degree in the collection of Pyron.

Master of Secrets, Perfect. (*Maître parfait des Secrets.*) A degree in the manuscript collection of Peuvret.

Master of St. Andrew. The Fifth Degree of the Swedish Rite; the same as the Grand Elu Ecossais of the Clermont system.

Master of the Chivalry of Christ. So St. Bernard addresses Hugh de Payens, Grand Master of the Templars. "Hugoni Militi Christi et Magistro Militiæ Christi, Bernardus Clercevallus," etc.

Master of the Hermetic Secrets, Grand. (*Maître des Secrets Hermétique, Grand.*) A degree in the manuscript collection of Peuvret.

Master of the Hospital. "Sacri Domus Hospitalis Sancto Joannis Hierosolymitani Magister," or Master of the Sacred House of the Hospital of St. John of Jerusalem, was the official title of the chief of the Order of Knights of Malta; more briefly, "Magister Hospitalis," or Master of the Hospital. Late in their history, the more imposing title of "Magnus Magister," or Grand Master, was sometimes assumed; but the humbler designation was still maintained. On the tomb of Zacosta, who died in 1467, we find "Magnus Magister"; but twenty-three years after, D'Aubusson signs himself "Magister Hospitalis Hierosolymitani."

Master of the Key to Masonry, Grand. (*Grand Maître de la Clef de la Maçonnerie.*) The Twenty-first Degree of the Chapter of the Emperors of the East and West.

Master of the Legitimate Lodges, Grand. (*Maître des Loges légitimes.*) A degree in the Archives of the Mother Lodge of the Eclectic Philosophic Rite.

Master of the Palace. An officer in a Council of Companions of the Red Cross, whose duties are peculiar to the degree.

Master of the Sages. The Fourth Degree of the Initiated Knights and Brothers of Asia.

Master of the Seven Kabbalistic Secrets, Illustrious. (*Maître Illustre des sept Secrets Cabalistiques.*) A degree in the manuscript collection of Peuvret.

Master of the Temple. Originally the official title of the Grand Master of the Templars. After the dissolution of the Order in England, the same title was incorrectly given to the *custos* or guardian of the Temple Church at London, and the error is continued to the present day.

Master of the Work. The chief builder or architect of a cathedral or other important edifice in the Middle Ages was called the *Master of the work;* thus, Jost Dotzinger was, in the fifteenth century, called the Master of the work at the cathedral of Strasburg. In the Middle Ages the "Magister operis" was one to whom the public works was entrusted. Such an officer existed in the monasteries. He was also called *operarius* and *magister operarum.* Du Cange says that kings had their *operarii, magistri operarum* or masters of the works. It is these Masters of the works whom Anderson has constantly called Grand Masters. Thus, when he says (*Constitutions,* 1738, p. 69) that "King John made Peter de Cole-Church Grand Master of the Masons in rebuilding London bridge," he should have said that he was appointed *operarius* or Master of the works. The use of the correct title would have made Anderson's history more valuable.

Master, Past. See *Past Master.*

Master, Perfect. See *Perfect Master.*

Master, Perfect Architect. The Twenty-seventh Degree of the Rite of Mizraim.

Master, Perfect Irish. See *Perfect Irish Master.*

Master Philosopher by the Number 3. (*Maître philosophe par le Nombre 3.*) A degree in the manuscript collection of Peuvret.

Master Philosopher by the Number 9. (*Maître philosophe par le Nombre 9.*) A degree in the manuscript collection of Peuvret.

Master Philosopher Hermetic. (*Maître philosophe Hermétique.*) A degree in the collection of Peuvret.

Master, Private. (*Maître Particulier.*) The Nineteenth Degree of the Metropolitan Chapter of France.

Master Provost and Judge. (*Maître Prevôt et Juge.*) The Eighth Degree of the Metropolitan Chapter of France.

Master, Puissant Irish. See *Puissant Irish Master.*

Master, Pythagorean. (*Maître Pythagoricien.*) Thory says that this is the Third and last degree of the Masonic system instituted according to the doctrine of Pythagoras.

Master, Royal. See *Royal Master.*

Master, Secret. See *Secret Master.*

Master, Select. See *Select Master.*

Master, Supreme Elect. (*Maître suprême Elu.*) A degree in the Archives of the Philosophic Scottish Rite.

Master Theosophist. (*Maître Théosophie.*) The Third Degree of the Rite of Swedenborg.

Master through Curiosity. (*Maître par Curiosite.*) 1. The Sixth Degree of the Rite of Mizraim; 2. The Sixth Degree of the collection of the Metropolitan Chapter of France. It is a modification of the Intimate Secretary of the Scottish Rite.

Master to the Number 15. (*Maître au Nombre 15.*) A degree in the manuscript collection of Peuvret.

Master, True. (*Vrai Maître.*) A degree of the Chapter of Clermont.

Master, Worshipful. See *Worshipful.*

Materials of the Temple. Masonic tradition tells us that the trees out of which the timbers were made for the Temple were felled and prepared in the forest of Lebanon, and that the stones were hewn, cut, and squared in the quarries of Tyre. But both the Book of Kings and Josephus concur in the statement that Hiram of Tyre furnished only cedar and fir trees for the Temple. The stones

were most probably (and the explorations of modern travelers confirm the opinion) taken from the quarries which abound in and around Jerusalem. The tradition, therefore, which derives these stones from the quarries of Tyre, is incorrect.

Maters. In the Cooke MS. (line 825)—and it is the only Old Constitution in which it occurs—we find the word *maters:* "Hit is seyd in ye art of Masonry yt no man scholde make ende so well of worke begonne bi another to ye profite of his lorde as he began hit for to end hit bi his *maters* or to whom he scheweth his *maters,*" where, evidently, *maters* is a corruption of the Latin *matrix,* a mold; this latter being the word used in all the other Old Constitutions in the same connection. (See *Mold.*)

Mathoc. (*Amiability, sweetness.*) The name of the Third Step of the Mystic Ladder of the Kadosh of the A. A. Scottish Rite.

Matriculation Book. In the Rite of Strict Observance, the register which contained the lists of the Provinces, Lodges, and members of the Rite was called the Matriculation Book. The term was borrowed from the usage of the Middle Ages, where *matricula* meant "a catalogue." It was applied by the ecclesiastical writers of that period to lists of the clergy, and also of the poor, who were to be provided for by the churches, whence we have *matricula clericorum* and *matricula pauperum.*

Matter. A subject deemed of important study to the alchemical and hermetical devotee. The subject will not be discussed here. It holds a valued position for instruction in the Society of the Rosicrucians, who hold that matter is subject to change, transformation, and apparent dissolution; but, in obedience to God's great laws of economy, nothing is lost, but is simply transferred.

Mature Age. The Charges of 1722 prescribe that a candidate for initiation must be of "mature and discreet age"; but the usage of the Craft has differed in various countries as to the time when maturity of age is supposed to have arrived. In the Regulations of 1663, it is set down at twenty-one years (*Constitutions,* 1738, p. 102); and this continues to be the construction of maturity in all English Lodges both in Great Britain and this country. France and Switzerland have adopted the same period. At Frankfort-on-the-Main it is fixed at twenty, and in Prussia and Hanover at twenty-five. The Grand Lodge of Hamburg has decreed that the age of Masonic maturity shall be that which is determined by the laws of the land to be the age of legal majority. [Under the Scotch Constitution the age was eighteen until 1891, when it was raised to twenty-one; and under the Irish Constitution it was twenty-one until 1741, when it was raised to twenty-five and so remained until 1817, when it was again lowered to twenty-one.]

Maul or **Setting Maul.** See *Mallet.*

Maurer. German for Mason, as Maurerei is for Masonry, and Freimaurer for Freemason.

Maurer, Gruss. A German Masonic operative expression, divided by some into Gruss Maurer, Wort Maurer, Schrift Maurer, and Briefträger—that is, those who claimed aid and recognition through signs and proving, and those who carried written documents.

Maut. The consort of the god Amon, usually crowned with a pschent or double diadem, emblem of the sovereignty of the two regions. Sometimes a vulture, the symbol of maternity, of heaven, and knowledge of the future, shows its head on the forehead of the goddess, its wings forming the head-dress. Horapollo says the vulture designates *maternal love* because it feeds its young with its own blood; and, according to Pliny, it represents heaven because no one can reach its nest, built on the highest rocks, and, therefore, that it is begotten of the winds. Maut is clothed in a long, close-fitting robe, and holds in her hand the sacred Anch, or sign of life.

Maximilian, Joseph I. King of Bavaria, who, becoming incensed against the Fraternity, issued edicts against Freemasons in 1799 and 1804, which he renewed in 1814.

Mecklenburg. Masonry was introduced here in 1754, but not firmly rooted until 1799. There are two Provincial G. Lodges, with 13 Lodges and 1,250 Brethren.

Medals. A medal is defined to be a piece of metal in the shape of a coin, bearing figures or devices and mottoes, struck and distributed in memory of some person or event. When Freemasonry was in its operative stage, no medals were issued. The medals of the Operative Masons were the monuments which they erected in the form of massive buildings, adorned with all the beauties of architectural art. But it was not long after its transformation into a Speculative Order before it began to issue medals. Medals are now struck every year by Lodges to commemorate some distinguished member or some remarkable event in the annals of the Lodge. Many Lodges in Europe have cabinets of medals, of which the Lodge Minerva of the Three Palms at Leipsic is especially valuable. In America no Lodge has made such a collection except Pythagoras Lodge at New York.

No Masonic medal appears to have been found earlier than that of 1733, commemorative of a Lodge being established at Florence, by Lord Charles Sackville. The Lodge appears not to have been founded by regular authority; but, however that may be, the event was commemorated by a medal, a copy of which exists in the collection in possession of the Lodge "Minerva of the Three Palms," at Leipsic. The *obverse* contains a bust representation of Lord Sackville, with the inscription—"Carolvs Sackville, Magister, Fl." The *reverse* represents Harpocrates in the attitude of silence, leaning upon a broken column, and holding in his left arm the cornucopia filled with rich fruits, also the implements of Masonry, with a thyrsus, staff, and serpent resting upon the fore and back ground.

The minimum of charity found among Mark

Masters is the Roman penny (*denarius*), weighing 60 grains silver, worth fifteen cents.

THE PENNY OF THE MARK MASTER.

The above was struck at Rome, under Tiberius, A.D. 18. The portrait is "Tiberius"; the reverse the "Goddess Clemency." The inscription reads: "Tiberius Cæsar Augustus, the son of the Deified Augustus, the High Priest."

Two medals, weighing 120 grains each, of silver, about thirty cents, were struck off at

THE JEWISH HALF-SHEKEL OF SILVER. (TWO SPECIMENS.)

Jerusalem, under Simon Maccabee, the Jewish ruler, B.C. 138, 139. They are the oldest money coined by the Jews. The devices are the brazen laver that stood before the Temple, and three lilies springing from one stem. The inscriptions, translated from the Hebrew of the oldest style, say, "Half-shekel; Jerusalem the Holy."

Bro. Robt. Morris and Bro. Coleman, in their *Calendar*, furnish much valuable information on this subject.

[The earliest work on Masonic Medals is by Ernest Zacharias, entitled *Numotheca Numismatica Latomorum*. It was issued at Dresden in parts, the first appearing on September 13, 1840, the eighth and last on January 29, 1846. It gave 48 medals in all. Then came *Die Denkmünzen der Freimaurerbruderschaft*, by Dr. J. F. L. Theodor Merzdorf, published at Oldenburg in 1851, and describing 334 medals.

The standard work now on the subject is *The Medals of the Masonic Fraternity*, by W. T. R. Marvin, privately printed at Boston in 1880, in which over 700 medals are described.

Mediterranean Pass. A side degree sometimes conferred in America on Royal Arch Masons. It has no lecture or legend, and should not be confounded, as it sometimes is, with the very different degree of Knight of the Mediterranean Pass. It is, however, now nearly obsolete.

Meeting of a Chapter. See *Convocation.*

Meeting of a Lodge. See *Communication.*

Meet on the Level. In the Prestonian lectures as practised in the beginning of the last century, it was said that Masons met on the square and hoped to part on the level. In the American system of Webb a change was made, and we were instructed that they *meet on the level and part on the square.* And in 1842 the Baltimore Convention made a still further change, by adding that *they act by the plumb;* and this formula is now, although quite modern, generally adopted by the Lodges in America.

Megacosm. An intermediate world, great, but not equal to the Macrocosm, and yet greater than the Microcosm, or little world, man.

Mehen. An Egyptian mythological serpent, the winding of whose body represented the tortuous course of the sun in the nocturnal regions. The serpentine course taken when traveling through darkness. The direction metaphorically represented by the initiate in his first symbolic journey as Practicus in the Society of the Rosicrucians.

Mehour. Space, the name given to the feminine principle of the Deity by the Egyptians.

Meister. German for Master; in French, Maître; in Dutch, Meester; in Swedish, Mastar; in Italian, Maestro; in Portuguese, Mestre. The old French word appears to have been Meistrier. In old French operative laws, Le Mestre was frequently used.

Meister im Stuhl. (*Master in the Chair.*) The Germans so call the Master of a Lodge.

Melancthon, Philip. The name of this celebrated reformer is signed to the Charter of Cologne as the representative of Dantzic. The evidence of his connection with Freemasonry depends entirely on the authenticity of that document.

Melchizedek. King of Salem, and a priest of the Most High God, of whom all that we know is to be found in the passages of Scripture read at the conferring of the degree of High Priesthood. Some theologians have supposed him to have been Shem, the son of Noah. The sacrifice of offering bread and wine is first attributed to Melchizedek; and hence, looking to the similar Mithraic sacrifice, Higgins is inclined to believe that he professed the religion of Mithras. He abandoned the sacrifice of slaughtered animals, and, to quote the words of St. Jerome, "offered bread and wine as a type of Christ." Hence, in the New Testament, Christ is represented as a priest after the order of Melchizedek. In Masonry, Melchizedek is connected with the order or degree of High Priesthood, and some of the high degrees.

Melchizedek, Degree of. The Sixth Degree of the Order of Brothers of Asia.

Melech. Properly, *Malach*, a messenger, and hence an angel, because the angels were

supposed to be the messengers of God. In the ritual of one of the high degrees we meet with the sentence *hamelech Gebalim*, which has been variously translated. The French ritualists handle Hebrew words with but little attention to Hebrew grammar, and hence they translate this sentence as "Jabulum est un bon Maçon." The former American ritualists gave it as meaning "Guibulum is a good man." Guibulum is undoubtedly used as a proper name, and is a corrupt derivation from the Hebrew Masonic *Giblim*, which means stonesquarers or masons, and *melach* for *malach* means a messenger, one sent to accomplish a certain task. Bros. Pike and Rockwell make the first word *hamalek*, the king or chief. If the words were reversed, we should have the Hebrew vocative, "O! Gibulum the messenger." As it is, Bro. Pike makes it vocative, and interprets it, "Oh! thou glory of the Builders." Probably, however, the inventor of the degree meant simply to say that Gibulum was a messenger, or one who had been sent to make a discovery, but that he did not perfectly express the idea according to the Hebrew idiom, or that his expression has since been corrupted by the copyists.

Melesino, Rite of. This is a Rite scarcely known out of Russia, where it was founded about the year 1765, by Melesino, a very learned man and Mason, a Greek by birth, but high in the military service of Russia. It consisted of seven degrees, viz.: 1. Apprentice. 2. Fellow-Craft. 3. Master Mason. 4. The Mystic Arch. 5. Scottish Master and Knight. 6. The Philosopher. 7. The Priest or High Priest of the Templars. The four higher degrees abounded in novel traditions and myths unknown to any of the other Rites, and undoubtedly invented by the founder. The whole Rite was a mixture of Kabbalism, magic, Gnosticism, and the Hermetic philosophy mixed in almost inextricable confusion. The Seventh or final degree was distinctly Rosicrucian, and the religion of the Rite was Christian, recognizing and teaching the belief in the Messiah and the dogma of the Trinity.

Melita. The ancient name of the island of Malta.

Member, Honorary. See *Honorary Members*.

Member, Life. See *Life Member*.

Member of a Lodge. As soon as permanent Lodges became a part of the Masonic organization, it seems to have been required that every Mason should belong to one, and this is explicitly stated in the charges approved in 1722. (See *Affiliated Mason*.)

Membership, Right of. The first right which a Mason acquires, after the reception of the Third Degree, is that of claiming membership in the Lodge in which he has been initiated. The very fact of his having received that degree makes him at once an inchoate member of the Lodge—that is to say, no further application is necessary, and no new ballot is required; but the candidate, having now become a Master Mason, upon signifying his submission to the regulations of the Society by affixing his signature to the book of by-laws, is constituted, by virtue of that act, a full member of the Lodge, and entitled to all the rights and prerogatives accruing to that position.

[Under the English Constitution (Rule 191), initiation is sufficient for membership.]

Memphis, Rite of. In 1839, two French Masons, named respectively Marconis and Moullet, of whom the former was undoubtedly the leader, instituted, first at Paris, then at Marseilles, and afterward at Brussels, a new Rite which they called the "Rite of Memphis," and which consisted of ninety-one degrees. Subsequently, another degree was added to this already too long list. The Rite, however, has repeatedly undergone modifications. The Rite of Memphis was undoubtedly founded on the extinct Rite of Mizraim; for, as Ragon says, the Egyptian Rite seems to have inspired Marconis and Moullet in the organization of their new Rite. It is said by Ragon, who has written copiously on the Rite, that the first series of degrees, extending to the Thirty-fifth Degree, is an assumption of the thirty-three degrees of the Ancient and Accepted Rite, with scarcely a change of name. The remaining degrees of the Rite are borrowed, according to the same authority, from other well-known systems, and some, perhaps, the invention of their founders.

The Rite of Memphis was not at first recognized by the Grand Orient of France, and consequently formed no part of legal French Masonry. So about 1852 its Lodges were closed by the civil authority, and the Rite, to use a French Masonic phrase, "went to sleep."

In the year 1862, Marconis, still faithful to the system which he had invented, applied to the Grand Master of France to give to it a new life. The Grand College of Rites was consulted on the subject, and the Council of the Order having made a favorable decree, the Rite of Memphis was admitted, in November, 1862, among those Masonic systems which acknowledge obedience to the Grand Orient of France, and perform their functions within its bosom. To obtain this position, however, the only one which, in France, preserves a Masonic system from the reputation of being clandestine, it was necessary that Marconis, who was then the Grand Hierophant, should, as a step preliminary to any favorable action on the part of the Grand Orient, take an obligation by which he forever after divested himself of all authority, of any kind whatsoever, over the Rite. It passed entirely out of his hands, and, going into "obedience" to the Grand Orient, that body has taken complete and undivided possession of it, and laid its high degrees upon the shelf, as Masonic curiosities, since the Grand Orient only recognizes, in practise, the thirty-three degrees of the Ancient and Accepted Rite.

This, then, is the present position of the Rite of Memphis in France. Its original possessors have disclaimed all further control or direction of it. It has been admitted by the Grand Orient among the eight systems of

Rites which are placed "under its obedience"; that is to say, it admits its existence, but it does not suffer it to be worked. Like all Masonic Rites that have ever been invented, the organization of the Rite of Memphis is founded on the first three degrees of Ancient Craft Masonry. These three degrees, of course, are given in Symbolic Lodges. In 1862, when Marconis surrendered the Rite into the hands of the ruling powers of French Masonry, many of these Lodges existed in various parts of France, although in a dormant condition, because, as we have already seen, ten years before they had been closed by the civil authority. Had they been in active operation, they would not have been recognized by the French Masons; they would have been looked upon as clandestine, and there would have been no affiliation with them, because the Grand Orient recognizes no Masonic bodies as legal which do not in return recognize it as the head of French Masonry.

But when Marconis surrendered his powers as Grand Hierophant of the Rite of Memphis to the Grand Orient, that body permitted these Lodges to be resuscitated and reopened only on the conditions that they would acknowledge their subordination to the Grand Orient; that they would work only in the first three degrees and never confer any degree higher than that of Master Mason; the members of these Lodges, however high might be their dignities in the Rite of Memphis, were to be recognized only as Master Masons; every Mason of the Rite of Memphis was to deposit his Masonic titles with the Grand Secretary of the Grand Orient; these titles were then to be *visé* or approved and regularized, but only as far as the degree of Master Mason; no Mason of the Rite of Memphis was to be permitted to claim any higher degree, and if he attempted to assume any such title of a higher degree which was not approved by the Grand Master, he was to be considered as irregular, and was not to be affiliated with by the members of any of the regular Lodges.

Such is now the condition of the Rite of Memphis in France. It has been absorbed into the Grand Orient; Marconis, its founder and head, has surrendered all claim to any jurisdiction over it; there are Lodges under the jurisdiction of the Grand Orient which originally belonged to the Rite of Memphis, and they practise its ritual, but only so far as to give the degrees of Apprentice, Fellow-Craft, and Master Mason. Its "Sages of the Pyramids," its "Grand Architects of the Mysterious City," its "Sovereign Princes of the Magi of the Sanctuary of Memphis," with its "Sanctuary," its "Mystical Temple," its "Liturgical College," its "Grand Consistory," and its "Supreme Tribunal," exist no longer except in the diplomas and charters which have been quietly laid away on the shelves of the Secretariat of the Grand Orient. To attempt to propagate the Rite is now in France a high Masonic offense. The Grand Orient alone has the power, and there is no likelihood that it will ever exercise it. Some circumstances which have recently occurred in the Grand Orient of France very clearly show the true condition of the Rite of Memphis. A meeting was held in Paris by the Council of the Order, a body which, something like the Committee of General Purposes of the Grand Lodge of England, does all the preliminary business for the Grand Orient, but which is possessed of rather extensive legislative and administrative powers, as it directs the Order during the recess of the Grand Orient. At that meeting, a communication was received from a Lodge in Moldavia, called "The Disciples of Truth," which Lodge is under the jurisdiction of the Grand Orient of France, having been chartered by that body. This communication stated that certain brethren of that Lodge had been invested by one Carence with the degree of Rose Croix in the Rite of Memphis, and that the diplomas had been dated at the "Grand Orient of Egypt," and signed by Bro. Marconis as Grand Hierophant. The commission of the Council of the Order, to whom the subject was referred, reported that the conferring of these degrees was null and void; that neither Carence nor Marconis had any commission, authority, or power to confer degrees of the Memphis Rite or to organize bodies; and that Marconis had, by oath, solemnly divested himself of all right to claim the title of Grand Hierophant of the Rite; which oath, originally taken in May, 1862, had at several subsequent times, namely, in September, 1863, March, 1864, September, 1865, and March, 1866, been renewed. As a matter of clemency, the Council determined not, for the present at least, to prefer charges against Marconis and Carence before the Grand Orient, but to warn them of the error they committed in making a traffic of Masonic degrees. It also ordered the report to be published and widely diffused, so that the Fraternity might be apprised that there was no power outside of the Grand Orient which could confer the high degrees of any Rite.

An attempt having been made, in 1872, to establish the Rite in England, Bro. Montague, the Secretary-General of the Supreme Council, wrote to Bro. Thevenot, the Grand Secretary of the Grand Orient of France, for information as to its validity. From him he received a letter containing the following statements, from which official authority we gather the fact that the Rite of Memphis is a dead Rite, and that no one has authority in any country to propagate it.

"Neither in 1866, nor at any other period, has the Grand Orient of France recognized 'the Ancient and Primitive Rite of Masonry,' concerning which you inquire, and which has been recently introduced in Lancashire.

"At a particular time, and with the intention of causing the plurality of Rites to disappear, the Grand Orient of France annexed and absorbed the Rite of Memphis, under the express condition that the Lodges of that Rite, which were received under its jurisdiction, should confer only the three symbolic degrees of Apprentice, Fellow-Craft, and Master, ad-

cording to its special rituals, and refused to recognize any other degree, or any other title, belonging to such Rite.

"At the period when this treaty was negotiated with the Supreme Chief of this Rite by Bro. Marconis de Nègre, Bro. H. J. Seymour was at Paris, and seen by us, but no power was conferred on him by the Grand Orient of France concerning this Rite; and, what is more, the Grand Orient of France does not give, and has never given, to any single person the right to make Masons or to create Lodges.

"Afterwards, and in consequence of the bad faith of Bro. Marconis de Nègre, who pretended he had ceded his Rite to the Grand Orient of France for France alone, Bro. Harry J. Seymour assumed the title of Grand Master of the Rite of Memphis in America, and founded in New York a Sovereign Sanctuary of this Rite. A correspondence ensued between this new power and the Grand Orient of France, and even the name of this Sovereign Sanctuary appeared in our Calendar for 1867. But when the Grand Orient of France learned that this power went beyond the three symbolic degrees, and that its confidence had been deceived, the Grand Orient broke off all connection with this power, and personally with Bro. Harry J. Seymour; and, in fact, since that period, neither the name of Bro. Harry J. Seymour, as Grand Master, nor the Masonic power which he founded, have any longer appeared in the Masonic Calendar of the Grand Orient.

"Your letter leads me to believe that Bro. Harry J. Seymour is endeavoring, I do not know with what object, to introduce a new Rite into England, in that country of the primitive and only true Masonry, one of the most respectable that I know of. I consider this event as a misfortune.

"The Grand Orient of France has made the strongest efforts to destroy the Rite of Memphis; it has succeeded. The Lodges of the Rite, which it at first received within its jurisdiction, have all abandoned the Rite of Memphis to work according to the French Rite. I sincerely desire that it may be the same in the United Kingdom, and you will ever find me ready to second your efforts.

"Referring to this letter, I have, very illustrious brother, but one word to add, and that is, that the Constitution of the Grand Orient of France interdicts its founding Lodges in countries where a regular Masonic power already exists; and if it cannot found Lodges *à fortiori*, it cannot grant charters to establish Grand Masonic Powers: in other terms, the Grand Orient of France never has given to Bro. Harry J. Seymour, nor to any other person, powers to constitute a Lodge, or to create a Rite, or to make Masons. Bro. Harry J. Seymour may perfectly well have the signatures of the Grand Master and of the Chief of the Secretary's office of the Grand Orient of France on a diploma, as a fraternal *visé;* but certainly *he has neither a charter nor a power.* I also beg you to make every effort to obtain the textual copy of the documents of which Bro. Harry J. Seymour takes advantage. It is by the inspection of this document it will be necessary to judge the question, and I await new communications on this subject from your fraternal kindness."

Menatzchim. In 2 Chron. ii. 18, it is said that at the building of the Temple there were "three thousand and six hundred overseers to set the people awork." The word translated "overseers" is, in the original, מְנַצְּחִים, MeNaTZCHIM. Anderson, in his catalogue of workmen at the Temple, calls these Menatzchim "expert Master Masons"; and so they have been considered in all subsequent rituals.

Mental Qualifications. See *Qualifications.*

Menu. In the Indian mythology, Menu is the son of Brahma, and the founder of the Hindu religion. Thirteen other Menus are said to exist, seven of whom have already reigned on earth. But it is the first one whose instructions constitute the whole civil and religious polity of the Hindus. The code attributed to him by the Brahmans has been translated by Sir William Jones, with the title of *The Institutes of Menu.*

Mercy. The point of a Knights Templar's sword is said to be characterized by the quality of "mercy unrestrained"; which reminds us of the Shakespearian expression—"the quality of mercy is not strained." In the days of chivalry, mercy to the conquered foe was an indispensable quality of a knight. An act of cruelty in battle was considered infamous, for whatever was contrary to the laws of generous warfare was also contrary to the laws of chivalry.

Mercy, Prince of. See *Prince of Mercy.*

Mercy-Seat. The lid or cover of the ark of the covenant was called the Mercy-seat or the Propitiatory, because on the day of the atonement the High Priest poured on it the blood of the sacrifice for the sins of the people.

Meridian Sun. The sun in the South is represented in Masonry by the Junior Warden, for this reason: when the sun has arrived at the zenith, at which time he is in the South, the splendor of his beams entitles him to the appellation which he receives in the ritual as "the beauty and glory of the day." Hence, as the Pillar of Beauty which supports the Lodge is referred to the Junior Warden, that officer is said to represent "the sun in the South at High Twelve," at which hour the Craft are called by him to refreshment, and therefore is he also placed in the South that he may the better observe the time and mark the progress of the shadow over the dial-plate as it crosses the meridian line.

Merit. The Old Charges say, "all preferment among Masons is grounded upon real worth and personal merit only; that so the Lords may be well served, the Brethren not put to shame, nor the Royal Craft despised. Therefore no Master or Warden is chosen by seniority, but for his merit." (See *Preferment.*)

Mer-Sker. The space in which the sun moves, as an Egyptian personification, signifying the habitation of Horus.

Merzdorf, J. L. T. A learned German Mason, born in 1812. Initiated in Apollo Lodge, at Leipsic, in 1834. He resuscitated the Lodge "Zum goldenen Hirsch," Oldenburg, and was for years Deputy Master. He published *Die Symbole*, etc., Leipsic, 1836, and later several other works.

Meshia, Meshiane. Corresponding to Adam and Eve, in accordance with Persian cosmogony.

Mesmer, Friedrich Anton. A German physician who was born in Suabia, in 1734, and, after a long life, a part of which was passed in notoriety and the closing years in obscurity, died in 1815. He was the founder of the doctrine of animal magnetism, called after him *Mesmerism*. He visited Paris, and became there in some degree intermixed with the Masonic charlatanism of Cagliostro, who used the magnetic operations of Mesmer's new science in his initiations. (See *Mesmeric Masonry*.)

Mesmeric Masonry. In the year 1782, Mesmer established in Paris a society which he called "the Order of Universal Harmony." It was based on the principles of animal magnetism or mesmerism, and had a form of initiation by which the founder claimed that its adepts were purified and rendered more fit to propagate the doctrines of his science. French writers have dignified this Order by the title of "Mesmeric Masonry."

Mesopolyte. The Fourth Degree of the German Union of XXII.

Mesouraneo. A Greek word, *μεσουρανεω*, signifying, *I am in the center of heaven*. Hutchinson fancifully derives from it the word Masonry, which he says is a corruption of the Greek, and refers to the constellation Magaroth mentioned by Job; but he fails to give a satisfactory reason for his etymology. Nevertheless, Oliver favors it.

Metals. In the divestiture of metals as a preliminary to initiation, we are symbolically taught that Masonry regards no man on account of his wealth. The Talmudical treatise "Beracoth," with a like spirit of symbolism, directs in the Temple service that no man shall go into the mountain of the house, that is, into the Holy Temple, "with money tied up in his purse."

Metal Tools. We are told in Scripture that the Temple was "built of stone made ready before it was brought thither: so that there was neither hammer, nor axe, nor any tool of iron heard in the house while it was in building." (1 Kings vi. 7.) Masonry has adopted this as a symbol of the peace and harmony which should reign in a Lodge, itself a type of the world. But Clarke, in his commentary on the place, suggests that it was intended to teach us that the Temple was a type of the kingdom of God, and that the souls of men are to be prepared *here* for *that* place of blessedness. *There* is no repentance, tears, nor prayers: the stones must be all squared, and fitted *here* for their place in the New Jerusalem; and, being *living stones*, must be built up a holy temple for the habitation of God.

Metropolitan Chapter of France. There existed in France, toward the end of the last century, a body calling itself the Grand Chapter General of France. It was formed out of the *débris* of the Council of Emperors of the East and West, and the Council of Knights of the East, which had been founded by Pirlet. In 1786, it united with the schismatic Grand Orient, and then received the title of the Metropolitan Chapter of France. It possessed in its archives a large collection of manuscript *cahiers* of degrees, most of them being mere Masonic curiosities.

Metusael. The name given to the Hebrew quarryman, who is represented in some legends as one of the assassins, Fanor and Amru being the other two.

Mexico. Masonry was introduced into Mexico, in the Scottish Rite, some time prior to 1810, by the civil and military officers of Spain, but the exact period of its introduction is unknown. The first Work Charters were granted for a Lodge at Vera Cruz in 1816, and one at Campeche in 1817, by the Grand Lodge of Louisiana, followed by a Charter for a Lodge at Vera Cruz in 1823 by the "City" Grand Lodge of New York, and one in the same city in 1824 from the Grand Lodge of Pennsylvania. February 10, 1826, five Charters were granted for Lodges in the City of Mexico by the "Country" Grand Lodge of New York, on the recommendation of Joel R. Poinsett, Past Deputy Grand Master of South Carolina, at that time United States Minister to Mexico, who constituted the Lodges and organized them into a Grand Lodge with Jose Ignacio Esteva as Grand Master.

The Masonic bodies, both York and Scottish Rite, however, soon degenerated into rival political clubs, and the bitter factionalism became so strong that in 1833 the authorities issued an edict suppressing all secret societies. The bodies met, however, secretly, and about 1834 the National Mexican Rite was organized with nine degrees copied after the Scottish Rite. In 1843 a Lodge was chartered at Vera Cruz, and in 1845 at Mexico by the Grand Orient of France. In 1859 a Supreme Council 33°, with jurisdiction over the Symbolic degrees, was organized by authority of Albert Pike, and for a time the Supreme Council dominated all the bodies. In 1865 the Grand Lodge Valle de Mexico was organized as a York Rite Grand Lodge, and worked as such until 1911, when a number of the Lodges, under the leadership of Past Grand Masters Levi and Pro, left the Grand Lodge and organized a rival body, under the obedience of the Supreme Council. [W. J. A.]

Mezuza. The third fundamental principle of Judaism, or the sign upon the door-post. The precept is founded upon the command, "And thou shalt write them upon the posts of thy house, and on thy gates." (Deut. vi. 4–9; xi. 13–21.) The door-posts must be those of a dwelling; synagogues are excluded.

The Karaite Jews affix Mezuzas to synagogues, and not to private houses. The Mezuza is constructed as follows: the two above-mentioned portions of Scripture are written on ruled vellum prepared according to Rabbinical rules, then rolled and fitted into a metallic tube. The word Shaddai (Almighty) is written on the outside of the roll, and can be read, when in the tube, through a slot. The Mezuza is then nailed at each end on the right-hand doorpost, while the following prayer is being said: "Blessed art thou, O Lord our God! King of the Universe, who hath sanctified us with His laws, and commanded us to fix the Mezuza." Under the word Shaddai some Jews write the three angelic names Coozu, Bemuchsaz, Coozu. To these some pray for success in business.

The Talmud estimates the virtue of the Talith, the Phylacteries, and the Mezuza in the following terms: "Whosoever has the phylacteries bound to his head and arm, and the fringes thrown over his garments, and the Mezuza fixed on his door-post, is safe from sin; for these are excellent memorials, and the angels secure him from sin; as it is written, 'The angel of the Lord encamped round about them that fear Him, and delivereth them.'" (Ps. xxxiv. 7.) [C. T. McClenachan.]

Michael. מיכאל. *Who is like unto God.* The chief of the seven archangels. He is the leader of the celestial host, as Lucifer is of the infernal spirits, and the especial protector of Israel. He is prominently referred to in the Twenty-eighth Degree of the Ancient and Accepted Scottish Rite, or Knight of the Sun.

Michigan. A Charter was issued by the Prov. Grand Master of New York under date of April 27, 1764, for a Lodge at Detroit, and upon this foundation it has been customary to rest the claim that Michigan Masonry dates from 1764. In fact, there is no evidence that any work was ever done under the Charter of 1764, and if a Lodge ever came into existence thereunder, as is probable, it is certain that it was short-lived, and differed in no respect from several other Lodges known to have been temporarily held at Detroit at various times prior to 1794 by British soldiers and other sojourners.

In 1794 Detroit was still garrisoned by British soldiers and it was British soldiers who were founders of the Lodge of 1794. Afterward, when the British Government had tardily turned the post over to the Americans, and the British soldiers had been removed and the region had become somewhat Americanized, a sentiment arose in favor of building under some American Grand Lodge in preference to a Canadian, and in October, 1803, the members of the Lodge voted to petition the Grand Lodge of New York for a Charter, proposing to surrender their Canadian Charter. Chiefly on account of the slowness of communication in those days, this transaction was not brought to a close until the session of the Grand Lodge of New York, held in September, 1806. Zion Lodge died in 1812, owing to the capture of Detroit by the British, but after the war the Grand Lodge of New York gave the members a new Charter.

Other Lodges were subsequently established, and on July 31, 1826, a Grand Lodge was organized by them, and Lewis Cass elected Grand Master. In consequence of the political pressure of the anti-Masonic party at that time, the Grand Lodge suspended its labors in 1829, and remained in a dormant condition until 1841, when, at a general meeting of the Masons of the State, it was resolved that the old Grand Officers who were still alive should, on the principle that their prerogatives had never ceased, but only been in abeyance, grant dispensations for the revival of the Lodges and the renewal of labor. But this course having been objected to as irregular by most of the Grand Lodges of the United States, delegates of a constitutional number of Lodges met in September, 1844, and organized the Grand Lodge, electing John Mullett Grand Master.

The Grand Chapter was organized in 1848, the Grand Commandery in 1857, and the Grand Council in 1858. [A. G. Pitts.]

Microcosm. See *Man*.

Middle Ages. These are supposed by the best historians to extend from the time Theodoric liberated Rome (493) to the end of the fifteenth century, the important events being the fall of Constantinople in 1453, the discovery of America in 1492, and the doubling of the Cape of Good Hope in 1497. This period of ten centuries is one of great importance to the Masonic student, because it embraces within its scope events intimately connected with the history of the Order, such as the diffusion throughout Europe of the Roman Colleges of Artificers, the establishment of the architectural school of Como, the rise of the gilds, the organization of the building corporations of Germany, and the company of Freemasons of England, as well as many customs and usages which have descended with more or less modification to the modern Institution.

Middle Chamber. There were three stories of side chambers built around the Temple on three sides; what, therefore, is called in the authorized version a *middle chamber* was really the middle story of those three. The Hebrew word is יָצִיעַ, *yatsang*. They are thus described in 1 Kings vi. 5, 6, 8. "And against the wall of the house he built chambers round about, against the walls of the house round about, both of the temple and of the oracle: and he made chambers round about. The nethermost chamber was five cubits broad, and the middle was six cubits broad,

and the third was seven cubits broad: for without in the wall of the house he made narrowed rests round about, that the beams should not be fastened in the walls of the house. The door for the *middle chamber* was in the right side of the house: and they went up with *winding stairs* into the middle chamber, and out of the middle into the third."

These chambers, after the Temple was completed, served for the accommodation of the priests when upon duty; in them they deposited their vestments and the sacred vessels. But the knowledge of the purpose to which the middle chamber was appropriated while the Temple was in the course of construction, is only preserved in Masonic tradition. This tradition is, however, altogether mythical and symbolical in its character, and belongs to the symbolism of the *Winding Stairs*, which see.

Miles. 1. In pure Latin, *miles* means a soldier; but in Medieval Latin the word was used to designate the military knights whose institution began at that period. Thus a Knight Templar was called Miles Templarius, and a Knight Banneret, Miles Bannerettus. The pure Latin word *eques*, which signified a knight in Rome, was never used in that sense in the Middle Ages. (See *Knighthood*.)

2. The Seventh Degree of the Rite of African Architects.

Military Lodges. Lodges established in an army. They are of an early date, having long existed in the British army. In America, the first Lodge of this kind of which we have any record was one the Warrant for which was granted by the Grand Lodge of Massachusetts, in 1738, to Abraham Savage, to be used in the expedition against Canada. A similar one was granted by the same authority, in 1756, to Richard Gridley, for the expedition against Crown Point. In both of these instances the Warrants were of a general character, and might rather be considered as deputations, as they authorized Savage and Gridley to congregate Masons into one or more Lodges. In 1779, the Grand Lodge of Pennsylvania granted a Warrant to Col. Proctor, of the artillery, to open a Military Lodge, which in the Warrant is called a "Movable Lodge." In the Civil War in the United States between 1861 and 1865, many Military Lodges were established on both sides; but it is questionable whether they had a good effect. They met, certainly, with much opposition in many jurisdictions. In England, the system of Military Lodges is regulated by special provisions of the Grand Lodge Constitution. They are strictly limited to the purposes for which the Warrants were granted, and no new Lodge can be established in a regiment without the concurrence of the commanding officer. They cannot make Masons of any but military men who have attained some rank in the army above that of a private soldier, although the latter may by dispensation be admitted as Serving Brethren; and they are strictly enjoined not to interfere with the Masonic jurisdiction of any country in which they may be stationed. Military Lodges also exist on the Continent of Europe. We find one at Berlin, in Prussia, as far back as 1775, under the name of the "Military Lodge of the Blazing Star," of which Wadzeck, the Masonic writer, was the orator.

Militia. In Medieval Latin, this word signifies chivalry or the body of knighthood. Hence *Militia Templi*, a title sometimes given to Knights Templar, does not signify, as it has sometimes been improperly translated, the *army of the Temple*, but the *chivalry of the Temple*.

Millin de Grand Maison, A. L. Born, 1759; died, 1818. Founder of the *Magasin Encyclopædique*. He was a Mason under the Rite Ecossais, and also belonged to the "Mère Loge" of the "Rite Ecossais Philosophique."

Minerval. The Third Degree of the Illuminati of Bavaria.

Minister of State. An officer in the Supreme Councils, Grand Consistories, and some of the high degrees of the Ancient and Accepted Scottish Rite.

Minnesota. Masonry was introduced into this State in 1849 by the constitution in the city of St. Paul of a Lodge under a Warrant issued by the Grand Lodge of Ohio. Two other Lodges were subsequently constituted by the Grand Lodges of Wisconsin and Illinois. A convention of delegates from these Lodges was held at St. Paul, and a Grand Lodge organized on February 12, 1853. A. E. Ames was elected Grand Master. The Grand Chapter was organized December 17, 1859, and the Grand Commandery was organized in 1866.

Minor. The Fifth Degree of the German Rose Croix.

Minor Illuminate. (*Illuminatus Minor*.) The Fourth Degree of the Illuminati of Bavaria.

Minute-Book. The records of a Lodge are kept by the Secretary in a journal, which is called the Minute-Book. The French call it *Planche tracée*, and the Minutes a *Morceau d'Architecture*.

Minutes. The records of a Lodge are called its minutes. The minutes of the proceedings of the Lodge should always be read just before closing, that any alterations or amendments may be proposed by the brethren; and again immediately after opening at the next communication, that they may be confirmed. But the minutes of a regular communication are not to be read at a succeeding extra one, because, as the proceedings of a regular communication cannot be discussed at an extra, it would be unnecessary to read them, for, if incorrect, they could not be amended until the next regular communication.

Mischchan, Mischaphereth, Mischtai, משכן העדות, *Tent of Testimony*. משכן זמנא, *Tent of Festival*. (See *Twenty-fourth Degree of the Scottish Rite*.) משמי is used in the Thirtieth Degree.

Misconduct. The Constitution of the Grand Lodge of England provides that "if any brother behave in such a manner as to disturb the harmony of the Lodge, he shall be thrice formally admonished by the Master;

and if he persist in his irregular conduct, he shall be punished according to the by-laws of that particular Lodge, or the case may be reported to higher Masonic authority." A similar rule prevails wherever Masonry exists. Every Lodge may exercise instant discipline over any member or visitor who violates the rules of order and propriety, or disturbs the harmony of the Lodge, by extrusion from the room.

Miserable Scald Masons. See *Scald Miserables.*

Mishna. See *Talmud.*

Mississippi. Masonry was introduced into this State at least as far back as 1801, in which year the Grand Lodge of Kentucky chartered a Lodge at Natchez, which became extinct in 1814. The Grand Lodge of Kentucky subsequently granted charters to two other Lodges in 1812 and 1815. Two Lodges were also constituted by the Grand Lodge of Tennessee. The delegates of three of these Lodges met in convention at the city of Natchez in July and August, 1818, and on the 25th of the latter month organized the Grand Lodge of Mississippi, Henry Tooley being elected Grand Master. The Grand Chapter was organized at Vicksburg, May 18, 1846; the Grand Council of R. and S. Master, January 19, 1856; and the Grand Commandery, January 22, 1857. Scottish Masonry was introduced into the State in 1815 by the establishment of a Grand Council of Princes of Jerusalem under the obedience of the Southern Supreme Council.

Missouri. Masonry was introduced into this State in 1807 by the constitution of a Lodge in the town of St. Genevieve, under a charter granted by the Grand Lodge of Pennsylvania, which body granted a charter for another Lodge in 1809. Several charters were subsequently granted by the Grand Lodge of Tennessee. In 1821 there appear to have been but three Lodges in the State. Delegates from these organized, April 23, 1821, a Grand Lodge at St. Louis, and elected Thomas F. Riddick Grand Master. The Grand Chapter was organized May 18, 1846, and the Grand Commandery May 22, 1860.

Mistletoe. (*Viscum Album.*) A sacred plant among the Druids. It was to them a symbol of immortality, and hence an analogue of the Masonic Acacia. "The mistletoe," says Vallancey, in his *Grammar of the Irish Language*, "was sacred to the Druids, because not only its berries but its leaves also grow in clusters of three united to one stock. The Christian Irish hold the shamrock (clover, trefoil) sacred, in like manner, because of the three leaves united to one stalk."

In Scandinavian countries it is called Mistel. It is a parasitic evergreen plant bearing a glutinous fruit. It was from a fragment of this plant that the dart was made which cost the life of Balder, according to the Scandinavian Mysteries. (See *Balder.*)

The *Mistletoe*, to the Scandinavian, is the coincident symbol of the *acacia* to the Mason, the *ivy* to those of the Mysteries of Dionysius, the *myrtle* to those of Ceres, the *erica* or *heath* to those of the Osirian, the *lettuce* to those of the Adonisian, and the *lotus* or *water-lily* to those of India and Egypt. The Mistletoe that caused the death of Balder was deemed sacred as the representative of the number three. The berries and leaves of the plant or vine grow in clusters of three united on one stalk. It was profanation to touch it. It was gathered with ceremony, and then consecrated, when it was reputed to possess every sanative virtue, and denominated "All Heal."

Mitchell, James W. S. A Masonic writer and journalist, was born in the State of Kentucky, in the year 1800. He was initiated into Masonry in Owen Lodge, at Port William, now Carrollton, Kentucky, in the year 1821. He subsequently removed to the State of Missouri, where he took a prominent position in the Masonic Fraternity, and held the offices of Grand Master of the Grand Lodge, Grand High Priest of the Grand Chapter, and Grand Commander of the Grand Commandery of Knights Templar. In 1848 he established, in the city of St. Louis, a monthly journal entitled the *Masonic Signet and Literary Mirror*, which he removed to Montgomery, Alabama, in 1852, where it lasted for a short time, and then was discontinued for want of patronage. In 1858 he published *The History of Freemasonry and Masonic Digest*, in two volumes, octavo. Bro. Mitchell was a warm-hearted and devoted Mason, but, unfortunately for his reputation as an author, not an accomplished scholar, hence his style is deficient, not only in elegance, but even in grammatical purity. His natural capacity, however, was good, and his arguments as a controversialist were always trenchant, if the language was not polished. As a Masonic jurist his decisions have been considered generally, but by no means universally, correct. His opinions were sometimes eccentric, and his *History* possesses much less value than such a work should have, in consequence of its numerous inaccuracies, and the adoption by its author of all the extravagant views of earlier writers on the origin of Masonry. He died at Griffin, Georgia, November 12, 1873, having been for many years a great sufferer from illness.

Mithras, Mysteries of. There are none of the Ancient Mysteries which afford a more interesting subject of investigation to the Masonic scholar than those of the Persian god Mithras. Instituted, as it is supposed, by Zeradusht or Zoroaster, as an initiation into the principles of the religion which he had founded among the ancient Persians, they in time extended into Europe, and lasted so long that traces of them have been found in the fourth century. "With their penances," says Mr. King (*Gnostics*, p. 47), "and tests of the courage of the candidate for admission, they have been maintained by a constant tradition through the secret societies of the Middle Ages and the Rosicrucians down to the modern faint reflex of the latter—the Freemasons."

Of the identity of Mithras with other deities there have been various opinions. Herodotus says he was the Assyrian Venus and the Arabian Alitta; Porphyry calls him the Demiurgos, and Lord of Generation; the Greeks identified him with Phœbus; and Higgins supposed that he was generally considered the same as Osiris. But to the Persians, who first practised his mysteries, he was a sun god, and worshiped as the God of Light. He was represented as a young man covered with a Phrygian turban, and clothed in a mantle and tunic. He presses with his knee upon a bull, one of whose horns he holds in his left hand, while with the right he plunges a dagger into his neck, while a dog standing near laps up the dripping blood.

This symbol has been thus interpreted: His piercing the throat with his dagger signifies the penetration of the solar rays into the bosom of the earth, by which action all nature is nourished; the last idea being expressed by the dog licking up the blood as it flows from the wound. But it will be seen hereafter that this last symbol admits of another interpretation.

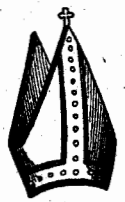
The mysteries of Mithras were always celebrated in caves. They were divided into seven stages or degrees (Suidas says twelve), and consisted of the most rigorous proofs of fortitude and courage. Nonnus the Greek poet says, in his *Dionysiaca*, that these proofs were eighty in number, gradually increasing in severity. No one, says Gregory Nazianzen, could be initiated into the mysteries of Mithras unless he had passed through all the trials, and proved himself passionless and pure. The aspirant at first underwent the purifications by water, by fire, and by fasting; after which he was introduced into a cavern representing the world, on whose walls and roof were inscribed the celestial signs. Here he submitted to a species of baptism, and received a mark on his forehead. He was presented with a crown on the point of a sword, which he was to refuse, declaring at the same time, "Mithras alone is my crown." He was prepared, by anointing him with oil, crowning him with olive, and clothing him in enchanted armor, for the seven stages of initiation through which he was about to pass. These commenced in the following manner: In the first cavern he heard the howling of wild beasts, and was enveloped in total darkness, except when the cave was illuminated by the fitful glare of terrific flashes of lightning. He was hurried to the spot whence the sounds proceeded, and was suddenly thrust by his silent guide through a door into a den of wild beasts, where he was attacked by the initiated in the disguise of lions, tigers, hyenas, and other ravenous beasts. Hurried through this apartment, in the second cavern he was again shrouded in darkness, and for a time in fearful silence, until it was broken by awful peals of thunder, whose repeated reverberations shook the very walls of the cavern, and could not fail to inspire the aspirant with terror. He was conducted through four other caverns, in which the methods of exciting astonishment and fear were ingeniously varied. He was made to swim over a raging flood; was subjected to a rigorous fast; exposed to all the horrors of a dreary desert; and finally, if we may trust the authority of Nicætas, after being severely beaten with rods, was buried for many days up to the neck in snow. In the seventh cavern or Sacellum, the darkness was changed to light, and the candidate was introduced into the presence of the Archimagus, or chief priest, seated on a splendid throne, and surrounded by the assistant dispensers of the mysteries. Here the obligation of secrecy was administered, and he was made acquainted with the sacred words. He received also the appropriate investiture, which, says Maurice (*Ind. Antiq.*, V., ch. i.), consisted of the Kara or conical cap, and *candys* or loose tunic of Mithras, on which was depicted the celestial constellations, the zone, or belt, containing a representation of the figures of the zodiac, the pastoral staff or crozier, alluding to the influence of the sun in the labors of agriculture, and the golden serpent, which was placed in his bosom as an emblem of his having been regenerated and made a disciple of Mithras, because the serpent, by casting its skin annually, was considered in these mysteries as a symbol of regeneration.

He was instructed in the secret doctrines of the rites of Mithras, of which the history of the creation, already recited, formed a part. The mysteries of Mithras passed from Persia into Europe, and were introduced into Rome in the time of Pompey. Here they flourished, with various success, until the year 378, when they were proscribed by a decree of the Senate, and the sacred cave, in which they had been celebrated, was destroyed by the pretorian prefect.

The Mithraic monuments that are still extant in the museums of Europe evidently show that the immortality of the soul was one of the doctrines taught in the Mithraic initiation. The candidate was at one time made to personate a corpse, whose restoration to life dramatically represented the resurrection. Figures of this corpse are found in several of the monuments and talismans. There is circumstantial evidence that there was a Mithraic death in the initiation, just as there was a Carbiric death in the mysteries of Samothrace, and a Dionysiac in those of Eleusis. Commodus, the Roman emperor, had been initiated into the Mithraic mysteries at Rome, and is said to have taken great pleasure in the ceremonies. Lampridius, in his *Lives of the Emperors*, records, as one of the mad freaks of Commodus, that during the Mithraic ceremonies, where "a certain thing was to be done for the sake of inspiring terror, he polluted the rites by a *real murder*"; an expression which evidently shows that a scenic representation of a fictitious murder formed a part of the ceremony of initiation. The dog swallowing the blood of the bull was also considered as a symbol of the resurrection.

It is in the still existing talismans and gems that we find the most interesting memorials

of the old Mithraic initiation. One of these is thus described by Mr. C. W. King, in his valuable work on the *Gnostics and their Remains* (London, 1864):



"There is a talisman which, from its frequent repetition, would seem to be a badge of some particular degree amongst the initiated, perhaps of the first admission. A man blindfolded, with hands tied behind his back, is bound to a pillar, on which stands a gryphon holding a wheel; the latter a most ancient emblem of the sun. Probably it was in this manner that the candidate was tested by the appearance of imminent death when the *bandage was suddenly removed from his eyes.*"

As Mithras was considered as synonymous with the sun, a great deal of solar symbolism clustered around his name, his doctrines, and his initiation. Thus, ΜΕΙΘΡΑΣ was found, by the numerical value of the letters in the Greek alphabet, to be equal to 365, the number of days in a solar year; and the decrease of the solar influence in the winter, and its revivification in the summer, was made a symbol of the resurrection from death to life.

Miter. The head-covering of the high priest of the Jews was called מִצְנֶפֶת, *metznephet*, which, coming from the verb NAPHAT, to *roll around*, signified something rolled around the head, a turban; and this was really the form of the Jewish miter. It is described by Leusden, in his *Philologus Hebræo-Mixtus*, as being made of dark linen twisted in many folds around the head. Many writers contend that the miter was peculiar to the high priest; but Josephus and the Mishna assert that it was worn by all the priests, that of the high priest being distinguished from the rest by the golden band, or holy crown, which was attached to its lower rim and fastened around the forehead, and on which was inscribed the words קדש ליהוה, KADOSH L'YEHOVAH, *Holiness to Jehovah*, or, as it is commonly translated, *Holiness to the Lord*. The miter is worn by the High Priest of a Royal Arch Chapter, because he represents the Jewish high priest; but the form is inaccurate. The vestment, as usually made, is a representation rather of the modern Episcopal than of the Jewish miter.

The modern miter—which is but an imitation of the Phrygian cap, and peculiar to bishops of the Christian Church, and which should therefore be worn by the Prelate of a Commandery of Knights Templar, who is supposed to hold Episcopal rank—differs in form from the Jewish vestment. It is a conical cap, divided in the middle so as to come to two points or horns, one in front and one behind, which, Durandus says, are symbolic of the two laws of the Old and New Testament.

Mizraim. Often by Masonic writers improperly spelled *Misraim*. It is the ancient Hebrew name of Egypt, and was adopted as the name of a Rite to indicate the hypothesis that it was derived from the old Egyptian initiation.

Mizraim, Rite of. This Rite originated, says Clavel, at Milan, in the year 1805, in consequence of several brethren having been refused admission into the Supreme Council of the Ancient and Accepted Rite, which had just been established in that city. One Lechangeur has the credit of organizing the Rite and selecting the statutes by which it was to be governed. It consisted at first of only eighty-seven degrees, to which three others were subsequently added. Sixty-six of the ninety degrees thus formed are said to have been taken from the Ancient and Accepted Rite, while the remaining twenty-four were either borrowed from other systems or were the invention of Lechangeur and his colleagues, Joly and Bedarride. The system of Mizraim spread over Italy, and in 1814 was introduced into France. Dissensions in the Rite soon took place, and an attempt was unsuccessfully made to obtain the recognition of the Grand Orient of France. This having been refused, the Supreme Council was dissolved in 1817; but the Lodges of the Rite still continued to confer the degrees, although, according to the constitution of French Masonry, their non-recognition by the Grand Orient had the effect of making them illegal. But eventually the Rite ceased altogether to exist as an active and independent system, and its place in Masonic history seems only to be preserved by two massive volumes on the subject, written by Mark Bedarride, the most intelligent and indefatigable of its founders, who published at Paris, in 1835, a history of the Rite, under the title of *De l'Ordre de Misraim*.

The Rite of Mizraim consisted of 90 degrees, divided into 4 series and 17 classes. Some of these degrees are entirely original, but many of them are borrowed from the Scottish Rite.

For the gratification of the curious inspector, the following list of these degrees is subjoined. The titles are translated as literally as possible from the French.

I. Series—Symbolic.

1*st Class:* 1, Apprentice; 2, Fellow-Craft; 3, Master. 2*d Class:* 4, Secret Master; 5, Perfect Master; 6, Master through Curiosity; 7, Provost and Judge or Irish Master; 8, English Master. 3*d Class:* 9, Elect of Nine; 10, Elect of the Unknown; 11, Elect of Fifteen; 12, Perfect Elect; 13, Illustrious Elect. 4*th Class:* 14, Scottish Trinitarian; 15, Scottish Fellow-Craft; 16, Scottish Master; 17, Scottish panisière; 18, Master Ecossais; 19, Ecossais of the three J. J. J.; 20, Ecossais of the Sacred Vault of James VI.; 21, Ecossais of St. Andrew. 5*th Class:* 22, Little Architect; 23, Grand Architect; 24, Architecture; 25, Apprentice Perfect Architect; 26, Fellow-Craft Perfect Architect; 27, Master Perfect Architect; 28, Perfect Architect; 29, Sublime Ecossais; 30, Sublime Ecossais of Heroden. 6*th Class:* 31, Grand Royal Arch; 32, Grand Ax;

33, Sublime Knight of Election, Chief of the First Symbolic Series.

II. Series—Philosophic.

7th Class: 34, Knight of the Sublime Election; 35, Prussian Knight; 36, Knight of the Temple; 37, Knight of the Eagle; 38, Knight of the Black Eagle; 39, Knight of the Red Eagle; 40, White Knight of the East; 41, Knight of the East. *8th Class:* 42, Commander of the East; 43, Grand Commander of the East; 44, Architecture of the Sovereign Commanders of the Temple; 45, Prince of Jerusalem. *9th Class:* 46, Sovereign Prince Rose Croix of Kilwinning and Heroden; 47, Knight of the West; 48, Sublime Philosopher; 49, Chaos the first, discreet; 50, Chaos the second, wise; 51, Knight of the Sun. *10th Class:* 52, Supreme Commander of the Stars; 53, Sublime Philosopher; 54, First Degree of the Key of Masonry, Minor; 55, Second Degree, Washer; 56, Third Degree, Bellows-blower; 57, Fourth Degree, Caster; 58, True Mason Adept; 59, Sovereign Elect; 60, Sovereign of Sovereigns; 61, Grand Master of Symbolic Lodges; 62, Most High and Most Powerful Grand Priest Sacrificer; 63, Knight of Palestine; 64, Grand Knight of the White and Black Eagle; 65, Grand Elect Knight Kadosh; 66, Grand Inquiring Commander, Chief of the Second Series.

III. Series—Mystical.

11th Class: 67, Benevolent Knight; 68, Knight of the Rainbow; 69, Knight Chanuka, called Hynaroth; 70, Most Wise Israelitish Prince. *12th Class:* 71, Sovereign Princes Talmudim; 72, Sovereign Prince Zadkim; 73, Grand Haram. *13th Class:* 74, Sovereign Princes Haram; 75, Sovereign Princes Hasidim; 77, Grand Inspector Intendant, Regulator General of the Order, Chief of the Third Series.

IV. Series—Kabbalistic.

15th and *16th Classes:* 78, 79, 80, 81, 82, 83, 84, 85, 86, degrees whose names are concealed from all but the possessors. *17th Class:* 87, Sovereign Grand Princes, constituted Grand Masters, and legitimate representatives of the order for the First Series; 88, Ditto for the Second Series; 89, Ditto for the Third Series; 90, Absolute Sovereign Grand Master, Supreme Power of the Order, and Chief of the Fourth Series.

The chiefs of this Rite demanded the privilege—which, of course, was never conceded to them—of directing and controlling all the other Rites of Freemasonry, as their common source. Its friends claimed for it an eminently philosophical character. The organization of the Rite is, however, too complicated and diffuse to have ever been practically convenient. Many of its degrees were founded upon, or borrowed from, the Egyptian rites, and its ritual is a very close imitation of the ancient system of initiation.

The legend of the Third Degree in this Rite is abolished. HAB is said to have returned to his family, after the completion of the Temple, and to have passed the remainder of his days in peace and opulence. The legend, substituted by the Rite of Mizraim for that admitted by all the other rites, is carried back to the days of Lamech, whose son Jubal, under the name of Hario-Jubal-Abi, is reported to have been slain by three traitors, Hagava, Hakina, and Heremda.

Lenning calls the Rite of Mizraim "one of the latest of the monstrous visionary schemes introduced into Freemasonry"; and Ragon characterizes it as a "fantastical connection of various rites and degrees."

Moabite Stone. A relic of black basalt, rounded at the top, two by four feet, across it being an inscription of thirty-four lines in the letters of the Hebrew-Phœnician alphabet, discovered in the ruins of ancient Dibon, by Dr. Klein, a German missionary, in 1869. A record of Mesha, King of Moab, who (2 Kings iii. 5), after Ahab's death, "rebelled against the King of Israel." Chemosh was the national god of the Moabites. The covenant name of the God of Israel occurs in the inscription, showing that the name was not then unpronounceable, or unknown to the neighboring nations. The described wars date in the tenth century B.C.

Moabon (מואבן). He whom the Junior Warden represents in the Fourteenth Degree of the A. A. Scottish Rite, as the tried and trusty friend of Hiram the Builder. (See Gen. xix. 36.)

Moabon. This word is found in some of the high degrees according to the French ritual, where it is explained as expressing "Praised be God that the crime and the criminal are punished." (*Les plus secrets des hauts grades*, etc., p. 33.) There is no such word in Hebrew, and the explanation is a fanciful one. The word is undoubtedly a Gallic corruption, first in sound and then in letters, of the Master's Word.

Mock Masons. A name given, says Noorthouck, to the unfaithful brethren and profanes who, in 1747, got up a procession in ridicule of that made at the Grand Feast. (*Constitutions*, 1784, p. 252.) (See *Scald Miserables.*)

Modern Rite. (*Rite Moderne.*) See *French Rite.*

Moderns. The Irish Masons who formed a rival Grand Lodge in London in 1751, called the supporters of the original Grand Lodge established in 1717 *Moderns*, while for themselves they assumed the title of *Ancients.* (See *Ancients.*)

Mohammed. See *Koran.*

Mohrims. Initiates, pilgrims, those entering upon an important undertaking.

Moira, Francis Rawdon, Baron. Born 1754, died 1826. A distinguished statesman and Mason. He was Acting Grand Master of England from 1790 to 1812. Also Grand Master of Scotland in 1806. As a Mason he was always energetic. Dr. Oliver says, "To no person had Masonry for many years been more indebted than to the Earl of Moira, now

Marquess Hastings." He died while Governor of Malta.

Molart, William. Anderson (*Constitutions*, 1738, p. 74) writes: "Nay, even during this King's (Henry VI.) Minority, there was a good Lodge under Grand Master Chicheley held at Canterbury, as appears from the Latin Register of William Molart (entitled *Liberatis generalis Domini Gulielmi Prioris Ecclesiæ Christi Cantuariensis erga Festum Natalis Domini 1429*) Prior of Canterbury, in Manuscript, pap. 88, in which are named Thomas Stapylton the Master, and John Morris Custos de la Lodge Lathomorum or Warden of the Lodge of Masons, with fifteen Fellow Crafts, and three Enter'd Prentices all named there."

What appears to be the register alluded to by Anderson is among the Tanner MSS. (165) in the Bodleian Library, Oxford, and proves to be merely a list kept by William *Molassh* or *Molessh* (the name occurs in both forms, but not as *Molart*), the Prior, of persons connected with the Priory and receiving livery from it. On page 133 there is a list of persons for 1429, which contains "Magr Thom Mapylton Mgr Lathamorum, Morys custos de la loygge Lathamorum" and a list headed "Lathami" with 16 names including Mapylton and below "Apprenticii idem" followed by three names. Similar lists are given for subsequent years, and thus it is plain that there was an organized body of Operative Masons attached to the Priory at that time.

[E. L. H.]

Molay, James de. The twenty-second and last Grand Master of the Templars at the destruction of the Order in the fourteenth century. He was born about the year 1240, at Besançon, in Burgundy, being descended from a noble family. He was received into the Order of Knights Templar in 1265, by Imbert de Peraudo, Preceptor of France, in the Chapel of the Temple at Beaune. He immediately proceeded to Palestine, and greatly distinguished himself in the wars against the infidels, under the Grand Mastership of William de Beaujeu. In 1298, while absent from the Holy Land, he was unanimously elected Grand Master upon the death of Theobald Gaudinius. In 1305, he was summoned to France by Pope Clement V., upon the pretense of a desire, on the part of the Pontiff, to effect a coalition between the Templars and the Hospitalers. He was received by Philip the Fair, the treacherous King of France, with the most distinguished honors, and even selected by him as the godfather of one of his children. In April, 1307, he repaired, accompanied by three of his knights, to Poitiers, where the Pope was then residing, and as he supposed satisfactorily exculpated the Order from the charges which had been preferred against it. But both Pope and King were guilty of the most infamous deceit.

On the 12th of September, 1307, the order was issued for the arrest of the Templars, and De Molay endured an imprisonment for five years and a half, during which period he was subjected to the utmost indignities and sufferings for the purpose of extorting from him a confession of the guilt of his Order. But he was firm and loyal, and on the 11th of March, 1314, he was publicly burnt in front of the Cathedral of Nôtre Dame, in Paris. When about to die, he solemnly affirmed the innocence of the Order, and, it is said, summoned Pope Clement to appear before the judgment-seat of God in forty days and the King of France within a year, and both, it is well known, died within the periods specified. (See *Transactions of the Quatuor Coronati Lodge*, Vol. 20.)

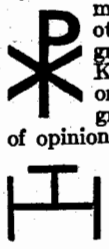
Moloch. (Heb. *Molech*, *king*.) The chief god of the Phœnicians, and a god of the Ammonites. Human sacrifices were offered at his shrine, and it was chiefly in the valley of Tophet, to the east of Jerusalem, that this brutal idolatry was perpetrated. Solomon built a temple to Moloch upon the Mount of Olives, and Manasseh, long after, imitated his impiety by making his son pass through the fire kindled in honor of this deity. Wierus calls Moloch Prince of the realm of tears.

> First Moloch, horrid king, besmeared with blood
> Of human sacrifice and parents' tears;
> Though for the noise of drums and timbrels loud,
> Their children's cries unheard, that passed through fire
> To his grim idol. . . . Nor content with such
> Audacious neighborhood, the wisest heart
> Of Solomon he led, by fraud, to build
> His temple right against the temple of God,
> On that opprobrious hill; and made his grove,
> The pleasant valley of Hinnom, Tophet thence
> And black Gehenna called, the type of Hell.
>
> —*Par. Lost*, B. 1.

Monad. The Monad in the Pythagorean system of numbers was unity or the number one. (See *Numbers* and *One*.)

Monitor. Those manuals published for the convenience of Lodges, and containing the charges, general regulations, emblems, and account of the public ceremonies of the Order, are called Monitors. The amount of ritualistic information contained in these works has gradually increased: thus the monitorial instructions in Preston's *Illustrations*, the earliest Monitor in the English language, are far more scanty than those contained in Monitors of the present day. As a general rule, it may be said that American works of this class give more instruction than English ones, but that the French and German manuals are more communicative than either.

Of the English and American manuals published for monitorial instruction, the first was by Preston, in 1772. This has been succeeded by the works of the following authors: Webb, 1797; Dalcho, 1807; Cole, 1817; Hardie, 1818; Cross, 1819; Tannehill, 1824; Parmele, 1825; Charles W. Moore, 1846; Cornelius Moore, 1846; Dove, 1847; Davis, 1849; Stewart, 1851; Mackey, 1852; Macoy, 1853; Sickels, 1866.



Monitorial Instruction. The instruction contained in Monitors is called *monitorial*, to distinguish it from esoteric instruction,

which is not permitted to be written, and can be obtained only in the precincts of the Lodge.

Monitorial Sign. A sign given in the English system, but not recognized in this country. Oliver says of it that it "reminds us of the weakness of human nature, unable of itself to resist the power of Darkness, unless aided by that Light which is from above."

Monitor, Secret. See *Secret Monitor*.

Monogram. An abbreviation of a name by means of a cipher composed of two or more letters intertwined with each other. The Constantinian monogram of Christ is often used by Knights Templar. The Triple Tau, or Royal Arch badge, is also a monogram; although there is a difference of opinion as to its real meaning, some supposing that it is a monogram of Templum Hierosolymæ or the Temple of Jerusalem, others of Hiram of Tyre, and others, again, bestowing on it different significations.

Montana. April 27, 1863, the Grand Lodge of Nebraska granted a Warrant for a Lodge at Bannack, in Montana; but in consequence of the removal of the petitioners, the Lodge was never organized. Three other Lodges were subsequently established by Warrants from the Grand Lodges of Kansas and Colorado. On January 24, 1866, three Lodges met in convention at Virginia City, and organized the Grand Lodge of Montana, John J. Hull being elected Grand Master.

Royal Arch Masonry and Templarism were introduced, the one by the General Grand Chapter, and the other by the Grand Encampment of the United States.

Montfauçon, Prior of. One of the two traitors on whose false accusations was based the persecution of the Templars. (See *Squin de Flexian.*)

Months, Hebrew. Masons of the Ancient and Accepted Scottish Rite use in their documents the Hebrew months of the civil year. Hebrew months commence with the full moon; and as the civil year began about the time of the autumnal equinox, the first Hebrew month must have begun with the new moon in September, which is also used by Scottish Masons as the beginning of their year. Annexed is a table of the Hebrew months, and their correspondence with our own calendar.

תשרי	Tisri,	Sept. and Oct.
חשון	Khesvan,	Oct. and Nov.
כסלו	Kislev,	Nov. and Dec.
טבת	Tebeth,	Dec. and Jan.
שבט	Schebet,	Jan. and Feb.
אדר	Adar,	Feb. and March.
ניסן	Nisan,	March and April.
אייר	Ijar,	April and May.
סיון	Sivan,	May and June.
תמוז	Tamuz,	June and July.
אב	Ab,	July and Aug.
אלול	Elul,	August and Sept.

As the Jews computed time by the appearance of the moon, it is evident that there soon would be a confusion as to the keeping of these feasts, if some method had not been taken to correct it; since the lunar year is only 354 days, 8 hours, and 48 minutes, and the solar year is 365 days, 6 hours, 15 minutes, and 20 seconds. Accordingly, they intercalated a month after their 12th month, Adar, whenever they found that the 15th day of the following month, Abib, would fall before the vernal equinox. This intercalated month was named ואדר, Ve-adar, or "the second Adar," and was inserted every second or third year, as they saw occasion; so that the difference between the lunar and solar year could never, in this way, be more than a month.

Months, Masonic. In the French Rite the old calendar is retained, and the year begins with the month of March, the months being designated numerically and not by their usual names. Thus we find in French Masonic documents such dates as this: "Le 10me jour du 3me mois Maçonnique," that is, the 10th day of the 3d Masonic month, or the 10th of May.

Montpellier, Hermetic Rite of. The Hermetic Rite of Pernetty, which had been established at Avignon in 1770, was in 1778 transported to Montpellier, in France, by a Past Master, and some of the members of the Lodge of Persecuted Virtue in the former place, who laid the foundations of the *Academy of True Masons*, which see. Hence the degrees given in that Academy constituted what is known as the Hermetic Rite of Montpellier.

Monument. It is impossible to say exactly at what period the idea of a monument in the Third Degree was first introduced into the symbolism of Freemasonry. The early expositions of the eighteenth century, although they refer to a funeral, make no allusion to a monument. The monument adopted in the American system, and for which we are indebted, it is said, to the inventive genius of Cross, consists of a weeping virgin, holding in one hand a sprig of acacia and in the other an urn; before her is a broken column, on which rests a copy of the *Book of Constitutions*, while Time behind her is attempting to disentangle the ringlets of her hair. The explanation of these symbols will be found in their proper places in this work. Oliver, in his *Landmarks* (ii., 146), cites this monument without any reference to its American origin. Early in the last century the Master's monument was introduced into the French system, but its form was entirely different from the one adopted in this country. It is described as an obelisk, on which is inscribed a golden triangle, in the center of which the Tetragrammaton is engraved. On the top of the obelisk is sometimes seen an urn pierced by a sword. In the Scottish Rite an entire degree has been consecrated to the subject of the Hiramic monument. Altogether, the monument is simply the symbolic expression

of the idea that veneration should always be paid to the memory of departed worth.

Moon. The adoption of the moon in the Masonic system as a symbol is analogous to, but could hardly be derived from, the employment of the same symbol in the ancient religions. In Egypt, Osiris was the sun, and Isis the moon; in Syria, Adonis was the sun, and Ashtoroth the moon; the Greeks adored her as Diana, and Hecate; in the mysteries of Ceres, while the hierophant or chief priest represented the Creator, and the torch-bearer the sun, the ἐπιβώμιος, or officer nearest the altar, represented the moon. In short, moon-worship was as widely disseminated as sun-worship. Masons retain her image in their Rites, because the Lodge is a representation of the universe, where, as the sun rules over the day, the moon presides over the night; as the one regulates the year, so does the other the months, and as the former is the king of the starry hosts of heaven, so is the latter their queen; but both deriving their heat, and light, and power from him, who, as the third and the greatest light, the master of heaven and earth, controls them both.

Moore, Charles Whitlock. A distinguished American Masonic journalist, born in Boston, Mass., March 29, 1801. His own account of his initiation into Masonry is in the following words: "In February, 1822, I was proposed for the degrees of Masonry in Massachusetts Lodge, then, as now, one of the three oldest in Boston, and but for the intervention of business engagements, I should have been received into Masonry on the evening of my coming of age. Before that evening arrived, however, I was called temporarily to the State of Maine, where, in May following, I was admitted into Kennebec Lodge, at Hallowell, with the consent and approbation of the Lodge in which I had been originally proposed. I received the third degree on the evening of the 12th of June."

On October 10, 1822, he affiliated with the Lodge St. Andrew. In October, 1872, that Lodge celebrated his semicentennial membership by a festival.

In 1825 he took the Capitular Degrees in St. Andrew's Chapter, and was elected High Priest in 1840, and subsequently Grand High Priest of the Grand Chapter. He was made a Knights Templar in Boston Encampment about the year 1830, and was Eminent Commander in 1837. In 1841 he was elected Grand Master of the Grand Encampment of Massachusetts and Rhode Island, which office he held for three years. In 1832 he received the Royal and Select degrees in Boston Council, over which he presided for twelve years. He was elected General Grand Captain-General of the Grand Encampment of the United States in 1847, and General Grand Generalissimo in 1850. In 1844 he was received into the Ancient Accepted Scottish Rite, and in the same year was elected Secretary-General of the Holy Empire in the Supreme Council for the Northern Jurisdiction of the United States, an office which he held until his resignation in 1862.

"When he was elected R. G. Secretary of the Grand Lodge in 1834," says Bro. John T. Heard, in his *Historical Account of Columbian Lodge* (p. 472), "it was the moment when the anti-Masonic excitement was raging with its greatest violence in this State, and his first official act was to attest the memorial written by him, surrendering to the Legislature the act of incorporation of the Grand Lodge."

The Grand Lodge surrendered its charter and its corporate powers that it might escape the persecution of an anti-Masonic Legislature. The memorial, however, boldly stated that "by divesting itself of its corporate powers, the Grand Lodge has relinquished none of its Masonic attributes or prerogatives." In Masonic authorship, Bro. Moore is principally distinguished as a journalist. In 1825 he established the *Masonic Mirror*, which was merged in 1834 in the *Bunker Hill Aurora*, a paper with whose Masonic department he was associated. In 1841 he commenced the publication of the *Freemasons' Monthly Magazine*, which he published for thirty-three years; in fact, until his death. In 1828 and 1829 he published the *Amaranth, or Masonic Garland*, and in 1843 the *Masonic Trestle-Board*. Bro. Moore died at Boston, Mass., of pneumonia, on December 12, 1873.

[C. T. McClenachan.]

Moore, James. He was, in 1808, the Senior Grand Warden of the Grand Lodge of Kentucky, and in conjunction with Carey L. Clarke compiled, by order of that body, the *Masonic Constitutions or Illustrations of Masonry*, Lexington, 1808, pp. 191, 12mo. This was the first Masonic work published in the Western States. With the exception of the Constitution of the Grand Lodge, it is little more than a compilation taken from Anderson, Preston, and Webb. It was adopted by the Grand Lodge of Kentucky as its official Book of Constitutions.

Mopses. In 1738 Pope Clement XII. issued a bull, condemning and forbidding the practise of the rites of Freemasonry. Several brethren in the Catholic States of Germany, unwilling to renounce the Order, and yet fearful of offending the ecclesiastical authority, formed at Vienna, September 22, 1738, under the name of *Mopses*, what was pretended to be a new association, but which was in truth nothing else than an imitation of Freemasonry under a less offensive appellation. It was patronized by the most illustrious persons of Germany, and many Princes of the Empire were its Grand Masters; the Duke of Bavaria especially took it under his protection. The title is derived from the German word *mops*, signifying a pug-dog, and was indicative of the mutual fidelity and attachment of the brethren, these virtues being characteristic of that animal. The alarm made for entrance was to imitate the barking of a dog.

The Mopses were an androgynous Order,

and admitted females to all the offices, except that of Grand Master, which was held for life. There was, however, a Grand Mistress, and the male and female heads of the Order alternately assumed, for six months each, the supreme authority. With the revival of the spirit of Masonry, which had been in some degree paralyzed by the attacks of the Church, the society of Mopses ceased to exist.

Morality. In the American system it is one of the three precious jewels of a Master Mason.

Morality of Freemasonry. No one who reads our ancient Charges can fail to see that Freemasonry is a strictly moral Institution, and that the principles which it inculcates inevitably tend to make the brother who obeys their dictates a more virtuous man. Hence the English lectures very properly define Freemasonry to be "a system of morality."

Moral Law. "A Mason," say the old Charges of 1722, "is obliged by his tenure to obey the moral law." Now, this moral law is not to be considered as confined to the decalogue of Moses, within which narrow limits the ecclesiastical writers technically restrain it, but rather as alluding to what is called the *lex naturæ*, or the law of nature. This law of nature has been defined, by an able but not recent writer on this subject, to be "the will of God, relating to human actions, grounded on the moral differences of things; and because discoverable by natural light, obligatory upon all mankind." (Grove, *System of Moral Philosophy*, vol. ii., p. 122. London, 1749.) This is the "moral law," to which the old Charge already cited refers, and which it declares to be the law of Masonry. And this was wisely done, for it is evident that no law less universal could have been appropriately selected for the government of an Institution whose prominent characteristic is its universality.

Morana. The Bohemian goddess of winter and death, Maryana of Scandinavia.

Moravian Brethren. The religious sect of Moravian Brethren, which was founded in Upper Lusatia, about 1722, by Count Zinzendorf, is said at one time to have formed a society of religious Freemasons. For an account of which, see *Mustard Seed, Order of*.

Morgan, William. Born in Culpeper County, in Virginia, in 1775. He published in 1826 a pretended *Exposition of Masonry*, which attracted at the time more attention than it deserved. Morgan soon after disappeared, and the Masons were charged by some enemies of the Order with having removed him by foul means. What was the real fate of Morgan has never been ascertained. There are various myths of his disappearance, and subsequent residence in other countries. They may or may not be true, but it is certain that there is no evidence of his death that would be admitted in a Court of Probate. He was a man of questionable character and dissolute habits, and his enmity to Masonry is said to have originated from the refusal of the Masons of Le Roy to admit him to membership in their Lodge and Chapter.

Moriah, Mount. An eminence situated in the southeastern part of Jerusalem. In the time of David it must have been cultivated, for it is called "the threshing-floor of Ornan the Jebusite," from whom that monarch purchased it for the purpose of placing there an altar. Solomon subsequently erected there his magnificent Temple. Mount Moriah was always profoundly venerated by the Jews, among whom there is an early tradition that on it Abraham was directed to offer up his son. The truth of this tradition has, it is true, been recently denied by some Biblical writers, but it has been as strenuously maintained by others. The Masons, however, have always accepted it, and to them, as the site of the Temple, it is especially sacred, and, combining with this the Abrahamic legend, they have given to Mount Moriah the appellation of the ground floor of the Lodge, and assign it as the place where what are called "the three grand offerings were made."

Morin, Stephen. The founder of the Scottish Rite in America. On the 27th of August, 1761, the "Deputies General of the Royal Art, Grand Wardens, and officers of the Grand Sovereign Lodge of St. John of Jerusalem established at Paris" (so reads the document itself) granted a Patent to Stephen Morin, by which he was empowered "to multiply the sublime degrees of High Perfection, and to create Inspectors in all places where the sublime degrees are not established." This Patent was granted, Thory, Ragon, Clavel, and Lenning say, by the Grand Council of Emperors of the East and West. Others say by the Grand Lodge. Dalcho says by the Grand Consistory of Princes of the Royal Secret at Paris. Bro. Albert Pike, who has very elaborately investigated the question, says that the authority of Morin was "a joint authority" of the two then contending Grand Lodges of France and the Grand Council, which is, I suppose, what Dalcho and the Supreme Council of Charleston call the Grand Consistory. From the Grand Lodge he received the power to establish a Symbolic Lodge, and from the Grand Council or Consistory the power to confer the higher degrees.

Not long after receiving these powers, Morin sailed for America, and established Bodies of the Scottish Rite in St. Domingo and Jamaica. He also appointed M. M. Hayes a Deputy Inspector-General for North America. Hayes, subsequently, appointed Isaac da Costa a Deputy for South Carolina, and through him the Sublime degrees were disseminated among the Masons of the United States. (See *Scottish Rite.*) After appointing several Deputies and establishing some Bodies in the West India Islands, Morin is lost sight of. We know not anything of his subsequent history, or of the time or place of his death. Ragon, Thory, and Clavel say that Morin was a Jew; but as these writers have *judaized* all the founders of the Scottish Rite in America,

we have no right to place any confidence in their statements. The name of Morin has been borne by many French Christians of literary reputation, from Peter Morin, a learned ecclesiastical writer of the sixteenth century, to Stephen Morin, an antiquary and Protestant clergyman, who died in 1700, and his son Henry, who became a Catholic, and died in 1728.

Moritz, Carl Philipp. A Privy Councillor, Professor, and Member of the Academy of Sciences in Berlin, was born at Hameln on the 15th of September, 1757, and died the 26th of June, 1793. Gädicke says that he was one of the most celebrated authors of his age, and distinguished by his works on the German language. He was the author of several Masonic works, among which are his *Contributions to the Philosophy of Life and the Diary of a Freemason*, Berlin, 1793, and a *Book of Masonic Songs*.

Mormon Faith. See *Book of Mormon*.

Morphey. The name of one of the twelve Inspectors in the Eleventh Degree of the Ancient and Accepted Scottish Rite. This name, like the others in the same catalogue, bids defiance to any Hebraic derivation. They are all either French corruptions, worse even than *Jakinai* for *Shekinah*, or they have some allusion to names or events connected with the political intrigues of the exiled house of Stuart, which had, it is known, a connection with some of the higher degrees which sprang up at Arras, and other places where Masonry is said to have been patronized by the Pretender. This word Morphey may, for instance, be a corruption of Murray. James Murray, the second son of Lord Stormont, escaped to the court of the Stuarts in 1715. He was a devoted adherent of the exiled family, and became the governor of the young prince and the chief minister of his father, who conferred upon him the empty title of Earl of Dunbar. He died at Avignon in 1770. But almost every etymology of this kind must be entirely conjectural.

Morris, Robert, LL.D. Born August 31, 1818. Was first brought to Masonic light March 5, 1846, in Oxford Lodge, at a place of the same name in Mississippi. The life of Bro. Morris was so active and untiring for the benefit of the Institution of Masonry, that he had the opportunity of filling very many positions in all the departments of Masonry, and was Grand Master of Masons of the Grand Lodge of Kentucky in 1858–59. His writings cover Masonic jurisprudence, rituals and handbooks, Masonic belles-lettres, history and biography, travels, and contributions to *The Review*, *Keystone*, *Advocate*, *N. Y. Dispatch*, and other papers and periodicals. His Masonic songs and poetic effusions stand out in prominent volumes. He was the author of *We Meet upon the Level*, which is sufficient to render his name immortal. A complete biography of Bro. Robert Morris would fill volumes. He died in 1888.

Mortality, Symbol of. The ancient Egyptians introduced a skeleton at their feasts, to impress the idea of the evanescence of all earthly enjoyments; but the skeletons or deaths' heads did not make their appearance in Grecian art, as symbols of mortality, until later times, and on monuments of no artistic importance. In the earliest periods of ancient art, the Greeks and Romans employed more pleasing representations, such as the flower plucked from its stem, or the inverted torch. The moderns have, however, had recourse to more offensive symbolization. In their hatchments or funeral achievements the heralds employ a *death's head and crossed bones*, to denote that the deceased person is the last of his family. The Masons have adopted the same symbol, and in all the degrees where it is necessary to impress the idea of mortality, a skull, or a skull and crossed bones, are used for that purpose.

Mortar, Untempered. See *Untempered Mortar*.

Mosaic Pavement. Mosaic work consists properly of many little stones of different colors united together in patterns to imitate a painting. It was much practised among the Romans, who called it *musivum*, whence the Italians get their *musaico*, the French their *mosaique*, and we our *mosaic*. The idea that the work is derived from the fact that Moses used a pavement of colored stones in the tabernacle has been long since exploded by etymologists. The Masonic tradition is that the floor of the Temple of Solomon was decorated with a mosaic pavement of black and white stones. There is no historical evidence to substantiate this statement. Samuel Lee, however, in his diagram of the Temple, represents not only the floors of the building, but of all the outer courts, as covered with such a pavement. The Masonic idea was perhaps first suggested by this passage in the Gospel of St. John (xix. 13), "when Pilate, therefore, heard that saying, he brought Jesus forth, and sat down in the judgment-seat in a place that is called the Pavement, but in the Hebrew, Gabbatha." The word here translated Pavement is in the original *Lithostroton*, the very word used by Pliny to denote a mosaic pavement. The Greek word, as well as its Latin equivalent, is used to denote a pavement formed of ornamental stones of various colors, precisely what is meant by a mosaic pavement.

There was, therefore, a part of the Temple which was decorated with a mosaic pavement. The Talmud informs us that there was such a pavement in the conclave where the Grand Sanhedrim held its sessions.

By a little torsion of historical accuracy, the Masons have asserted that the ground floor of the Temple was a mosaic pavement, and hence, as the Lodge is a representation of the Temple, that the floor of the Lodge should also be of the same pattern.

The mosaic pavement is an old symbol of the Order. It is met with in the earliest rituals of the last century. It is classed among the ornaments of the Lodge in combination with the indented tessel and the blazing star.

Its party-colored stones of black and white have been readily and appropriately interpreted as symbols of the evil and good of human life.

Mosaic Symbolism. In the religion of Moses, more than in any other which preceded or followed it, is symbolism the predominating idea. From the tabernacle, which may be considered as the central point of the whole system, down to the vestments which clothed the servants at the altar, there will be found an underlying principle of symbolism. Long before the days of Pythagoras the mystical nature of numbers had been inculcated by the Jewish lawgiver, and the very name of God was constructed in a symbolical form, to indicate his eternal nature. Much of the Jewish ritual of worship, delineated in the Pentateuch with so much precision as to its minutest details, would almost seem puerile were it not for the symbolic idea that is conveyed. So the fringes of the garments are patiently described, not as decorations, but that by them the people, in looking upon the fringe, might "remember all the commandments of the Lord and do them." Well, therefore, has a modern writer remarked, that in the symbolism of the Mosaic worship it is only ignorance that can find the details trifling or the prescriptions minute; for if we recognize the worth and beauty of symbolism, we shall in vain seek in the Mosaic symbols for one superfluous enactment or one superstitious idea. To the Mason the Mosaic symbolism is very significant, because from it Freemasonry has derived and transmitted for its own uses many of the most precious treasures of its own symbolical art. Indeed, except in some of the higher, and therefore more modern degrees, the symbolism of Freemasonry is almost entirely deduced from the symbolism of Mosaism. Thus the symbol of the Temple, which persistently pervades the whole of the ancient Masonic system, comes to us directly from the symbolism of the Jewish tabernacle. If Solomon is revered by the Masons as their traditional Grand Master, it is because the Temple constructed by him was the symbol of the Divine life to be cultivated in every heart. And this symbol was borrowed from the Mosaic tabernacle; and the Jewish thought, that every Hebrew was to be a tabernacle of the Lord, has been transmitted to the Masonic system, which teaches that every Mason is to be a temple of the Grand Architect. The Papal Church, from which we get all ecclesiastical symbolism, borrowed its symbology from the ancient Romans. Hence most of the high degrees of Masonry which partake of a Christian character are marked by Roman symbolism transmuted into Christian. But Craft Masonry, more ancient and more universal, finds its symbolic teachings almost exclusively in the Mosaic symbolism instituted in the wilderness.

If we inquire whence the Jewish lawgiver derived the symbolic system which he introduced into his religion, the history of his life will readily answer the question. Philo-Judæus says that "Moses was instructed by the Egyptian priests in the philosophy of symbols and hieroglyphics as well as in the mysteries of the sacred animals." The sacred historian tells us that he was "learned in all the wisdom of the Egyptians"; and Manetho and other traditionary writers tell us that he was educated at Heliopolis as a priest, under his Egyptian name of Osarsiph, and that there he was taught the whole range of literature and science, which it was customary to impart to the priesthood of Egypt. When, then, at the head of his people, he passed away from the servitude of Egyptian taskmasters, and began in the wilderness to establish his new religion, it is not strange that he should have given a holy use to the symbols whose meaning he had learned in his ecclesiastical education on the banks of the Nile.

Thus is it that we find in the Mosaic symbolism so many identities with the Egyptian ritual. Thus the Ark of the Covenant, the Breastplate of the High Priest, the Miter, and many other of the Jewish symbols, will find their analogies in the ritualistic ceremonies of the Egyptians. Reghellini, who has written an elaborate work on *Masonry considered as the result of the Egyptian, Jewish, and Christian Religions*, says on the subject: "Moses, in his mysteries, and after him Solomon, adopted a great part of the Egyptian symbols, which, after them, we Masons have preserved in our own."

Moses, משה, which means *drawn out;* but the true derivation is from two Egyptian words, *μο, mo,* and *ουκε, oushes,* signifying *saved from the water.* The lawgiver of the Jews, and referred to in some of the higher degrees, especially in the Twenty-fifth Degree, or Knight of the Brazen Serpent in the Scottish Rite, where he is represented as the presiding officer. He plays also an important part in the Royal Arch of the York and American Rites, all of whose ritual is framed on the Mosaic symbolism.

Mossdorf, Friedrich. An eminent German Mason, who was born March 2, 1757, at Eckartsberge, and died about 1830. He resided in Dresden, and took an active part in the affairs of Masonry. He was a warm supporter of Fessler's Masonic reforms, and made several contributions to the Freyberg *Freimaurerischen Taschenbuche* in defense of Fessler's system. He became intimately connected with the learned Krause, the author of *The Three Most Ancient Records of the Masonic Fraternity,* and wrote and published in 1809 a critical review of the work, in consequence of which the Grand Lodge commanded him to absent himself for an indefinite period from the Lodges. Mosdorf then withdrew from any further connection with the Fraternity. His most valuable contributions to Masonic literature are his additions and emendations to Lenning's *Encyclopädie der Freimaurerei.* He is the author also of several other works of great value.

Most Excellent. The title given to a Royal Arch Chapter, and to its presiding offi-

cer, the High Priest; also to the presiding officer of a Lodge of Most Excellent Masters.

Most Excellent Master. The Sixth Degree in the York Rite. Its history refers to the dedication of the Temple by King Solomon, who is represented by its presiding officer under the title of Most Excellent. Its officers are the same as those in a Symbolic Lodge. There are, however, some rituals in which the Junior Warden is omitted. This degree is peculiarly American, it being practised in no other country. It was the invention of Webb, who organized the capitular system of Masonry as it exists in America, and established the system of lectures which is the foundation of all subsequent systems taught there.

Most Puissant. The title of the presiding officer of a Grand Council of Royal and Select Masters.

Most Worshipful. The title given to a Grand Lodge and to its presiding officer, the Grand Master. The title of Grand Master of Pennsylvania is Right Worshipful.

Mot de Semestre. Half yearly word. Every six months the Grand Orient of France sends to each of the Lodges of its obedience a password, to be used by its members as an additional means of gaining admission into a Lodge. Each Mason obtains this word only from the Venerable of his own Lodge. It was instituted October 28, 1773, when the Duke of Chartres was elected Grand Master.

Mother Council. The Supreme Council of the Ancient and Accepted Scottish Rite for the Southern Jurisdiction of the United States of America, which was organized in 1801, at Charleston, is called the "Mother Council of the World," because from it have issued directly or indirectly all the other Supreme Councils of the Rite which are now in existence, or have existed since its organization.

Mother Lodge. In the last century certain Lodges in France and Germany assumed an independent position, and issued Charters for the constitution of Daughter Lodges claiming the prerogatives of Grand Lodges. Thus we find the Mother Lodge of Marseilles, in France, which constituted many Lodges. In Scotland the Lodge of Kilwinning took the title of Mother Lodge, and issued Charters until it was merged in the Grand Lodge of Scotland. The system is altogether irregular, and has no sanction in the present laws of the Fraternity.

Motion. A motion when made by a member cannot be brought before the Lodge for deliberation unless it is seconded by another member. Motions are of two kinds, principal and subsidiary; a principal motion is one that presents an independent proposition for discussion. Subsidiary motions are those which are intended to affect the principal motion—such as to amend it, to lay it on the table, to postpone it definitely or indefinitely, or to reconsider it, all of which are governed by the parliamentary law under certain modifications to suit the spirit and genius of the Masonic organization. (See Dr. Mackey's *Treatise on Parliamentary Law as applied to Masonic Bodies.*)

Motto. In imitation of the sentences appended to the coats of arms and seals of the gilds and other societies, the Masons have for the different branches of their Order mottoes, which are placed on their banners or put at the head of their documents, which are expressive of the character and design, either of the whole Order or of the particular branch to which the motto belongs. Thus, in Ancient Craft Masonry, we have as mottoes the sentences, *Ordo ab Chao*, and *Lux e tenebris;* in Capitular Masonry, *Holiness to the Lord;* in Templar Masonry, *In hoc signo vinces;* in Scottish Masonry, *Ne plus ultra* is the motto of the Thirtieth Degree, and *Spes mea in deo est* of the Thirty-second; while the Thirty-third has for its motto *Deus meumque Jus.* All of these will be found with their signification and origin in their appropriate places.

Mold. This word is very common in the Old Constitutions, where it is forbidden that a Freemason should give a mold to a rough Mason, whereby, of course, he would be imparting to him the secrets of the Craft. Thus, in the Harleian MS., No. 2054: "Alsoe that noe Mason make moulds, square or rule to any rough layers. Also, that no Mason set noe layes within a lodge or without to haue Mould Stones with one Mould of his worke-ing." We find the word in *Piers Ploughman's Vision:*

> "If eny Mason there do makede a molde
> With alle here wyse castes."

Parker (*Gloss. Architect.*, p. 313) thus defines it: "The model or pattern used by workmen, especially by Masons, as a guide in working mouldings and ornaments. It consists of a thin board or plate of metal, cut to represent the exact section of the mouldings to be worked from it." In the Cooke MS. the word *maters* is used, which is evidently a corruption of the Latin *matrix.*

Mold Stone. In the quotation from the Harleian MS. in the preceding article, the expression *mould stones* occurs, as it does in other Constitutions and in many old contracts. It means, probably, large and peaked stones for those parts of the building which were to have moldings cut upon them, as window and door jambs.

Mount Calvary. See *Calvary.*

Mount Caf. In the Mohammedan mythology, a fabulous mountain which encircles the earth. The home of the giants and fairies, and rests upon the sacred stone *Sakhral,* of which a single grain gives miraculous powers. It is of an emerald color, and its reflected light is the cause of the tints of the sky.

Mount Moriah. See *Moriah.*

Mount Sinai. See *Sinai.*

Mourning. The mourning color has been various in different times and countries. Thus, the Chinese mourn in white; the Turks in blue or in violet; the Egyptians in yellow; the Ethiopians in gray. In all the degrees and rites of Masonry, with a single exception

black is the symbol of grief, and therefore the mourning color. But in the highest degrees of the Scottish Rite the mourning color, like that used by the former kings of France, is violet.

Mouth to Ear. The Mason is taught by an expressive symbol, to whisper good counsel in his brother's ear, and to warn him of approaching danger. "It is a rare thing," says Bacon, "except it be from a perfect and entire friend, to have counsel given that is not bowed and crooked to some ends which he hath that giveth it." And hence it is an admirable lesson, which Masonry here teaches us, to use the lips and the tongue only in the service of a brother.

Movable Jewels. See *Jewels of a Lodge.*

Mozart, J. C. W. G. Born in 1756 at Salzburg, and died December 5, 1791, at Vienna. One of the greatest and most delightful of musical composers. He first saw the Masonic light about 1780, and was a member of the Lodge "Zur gekrönten Hoffnung." There were many musical compositions and dedications to Masonry by this eminent composer.

Muenter, Friederich. Born in 1761, and died in 1830. He was Professor of Theology in the University of Copenhagen, and afterward Bishop of Seeland. He was the author of a treatise *On the Symbols and Art Representations of the Early Christians.* In 1794 he published his *Statute Book of the Order of Knights Templar,* "Statutenbuch des Ordens der Tempelherren"; a work which is one of the most valuable contributions that we have to the history of Templarism.

Munkhouse, D.D., Rev. Richard. The author of *A Discourse in Praise of Freemasonry,* 8vo, Lond., 1805; *An Exhortation to the Practice of those Specific Virtues which ought to prevail in the Masonic Character, with Historical Notes,* 8vo, Lond., 1805; and *Occasional Discourses on Various Subjects, with Copious Annotations,* 3 vols., 8vo, Lond., 1805. This last work contains many discourses on Masonic subjects. Dr. Munkhouse was an ardent admirer and defender of Freemasonry, into which he was initiated in the Phœnix Lodge of Sunderland. On his removal to Wakefield, where he was rector of St. John the Baptist's Church, he united with the Lodge of Unanimity, under the Mastership of Richard Linnecar, to whose virtues and Masonic knowledge he has paid a high tribute. Dr. Munkhouse died in the early part of this century.

Murat, Joachim. Born in 1771, executed in 1815. The great cavalry general of Napoleon, and titular king of Naples. In 1803 he was appointed S. G. Warden in the Grand Orient of France. When the fifth Supreme Council of the World was established at Naples, on June 11, 1809, by the Supreme Council at Milan, a concordat became necessary, and was executed May 3, 1811, between the Grand Orient which was created June 24, 1809, and the Supreme Council of Naples, whereby the latter should have sole control over the degrees beyond the eighteenth, in like manner as signified in the concordat of France. King Joachim Murat accepted the supreme command of both bodies. The change in his political surroundings allowed him no permanent rest.

Murat, Joachim, Prince. Son of the King of Naples. Was appointed Grand Master of the Grand Orient of France, and initiated February 26, 1825. He resigned the office in 1861.

Murr, Christoph Gottlieb von. A distinguished historical and archeological writer, who was born at Nuremberg, in 1733, and died April 8, 1811. In 1760 he published an *Essay on the History of the Greek Tragic Poets,* in 1777–82, six volumes of *Antiquities of Herculanæum,* and several other historical works. In 1803 he published an essay *On the True Origin of the Orders of Rosicrucianism and Freemasonry, with an Appendix on the History of the Order of Templars.* In this work, Murr attempts to trace Freemasonry to the times of Oliver Cromwell, and maintains that it and Rosicrucianism had an identical origin, and the same history until the year 1633, when they separated.

Muscus Domus. In the early rituals of the last century, the tradition is given, that certain Fellow-Crafts, while pursuing their search, discovered a grave covered with green moss and turf, when they exclaimed, *Muscus Domus, Deo gratias,* which was interpreted, "Thanks be to God, our Master has a mossy house." Whence a Mason's grave came to be called *Muscus Domus.* But both the tradition and its application have become obsolete in the modern rituals.

Music. One of the seven liberal arts and sciences, whose beauties are inculcated in the Fellow-Craft's Degree. Music is recommended to the attention of Masons, because as the "concord of sweet sounds" elevates the generous sentiments of the soul, so should the concord of good feeling reign among the brethren, that by the union of friendship and brotherly love the boisterous passions may be lulled and harmony exist throughout the Craft.

Musical Instruments, Ancient. As in the Fellow-Craft's Degree, music is dilated upon as one of the liberal arts, the sweet and harmonious sounds being the representative of that harmony which should ever exist among the brethren, we are apt to inquire what were the instruments used by the ancients in their mystical service. The oldest ever discovered, we believe, is a small clay pipe not over three inches in length, found by Captain Willock among the presumed ruins of Babylon; if so, it must be 2,600 years old. By the use of the two finger holes, the intervals of the common chord, C, E, and G, are produced, or the harmonic triad. From the ruins of Nineveh we have countless representations of the harp, with strings varying from ten to twenty-six; the lyre, identical in structure with that of the Greeks; a harp-shaped instrument held horizontally, and the six to ten strings struck with a plectrum, which has been termed the Asor, from its resemblance to

the Hebrew instrument of that name. There is also the guitar-shaped instrument, and a double pipe with a single mouthpiece and finger-holes on each pipe. The Assyrians used musical bells, trumpets, flutes, drums, cymbals, and tambourines. The Abyssinians call their lyre the Kissar (Greek, *kithara*). There is also the flute, called Monaulos, which is of great antiquity, and named by the Egyptians Photins, or curved flute. The crooked horn or trumpet, called Buccina, and the Cithara, held sacred in consequence of its shape being that of the Greek delta.

Mustard-Seed, Order of. (*Der Orden vom Senfkorn.*) This association, whose members also called themselves "The Fraternity of Moravian Brothers of the Order of Religious Freemasons," was one of the first innovations introduced into German Freemasonry. It was instituted in the year 1739. Its mysteries were founded on that passage in the fourth chapter of St. Mark's Gospel in which Christ compares the kingdom of heaven to a mustard-seed. The brethren wore a ring, on which was inscribed *Keiner von uns lebt ihm selber*, i. e., "No one of us lives for himself." The jewel of the Order was a cross of gold surmounted by a mustard-plant in full bloom, with the motto, *Quod fuit ante nihil*, i. e., "What was before nothing." It was suspended from a green ribbon. The professed object of the association was, through the instrumentality of Freemasonry, to extend the kingdom of Christ over the world. It has long been obsolete.

Muta. The Roman goddess of silence.

Muttra or **Mathura.** The birthplace of the Hindu Redeemer, Krishna. The capital of a district in the Northwest Provinces of British India.

Myrrh. A resinous gum of a tree growing in Arabia, valued from the most ancient times. (Gen. xxxvii. 25.) It was among the presents Jacob sent to Egypt, and those brought to the infant Jesus by the wise men of the East.

Myrtle. The sacred plant of the Eleusinian mysteries, and analogous in its symbolism to the acacia of the Masons.

Mystagogue. The one who presided at the Ancient Mysteries, and explained the sacred things to the candidate. He was also called the hierophant. The word, which is Greek, signifies literally one who makes or conducts an initiate.

Mysteries, Ancient. Each of the Pagan gods, says Warburton (*Div. Leg.*, I., ii., 4), had, besides the public and open, a secret worship paid to him, to which none were admitted but those who had been selected by preparatory ceremonies called *Initiation*. This secret worship was termed the *Mysteries*. And this is supported by Strabo (lib. x., cap. 3), who says that it was common, both to the Greeks and the Barbarians, to perform their religious ceremonies with the observance of a festival, and that they are sometimes celebrated publicly, and sometimes in mysterious privacy. Noel (*Dict. de la Fable*) thus defines them: Secret ceremonies which were practised in honor of certain gods, and whose secret was known to the initiates alone, who were admitted only after long and painful trials, which it was more than their life was worth to reveal.

As to their origin, Warburton is probably not wrong in his statement that the first of which we have any account are those of Isis and Osiris in Egypt; for although those of Mithras came into Europe from Persia, they were, it is supposed, carried from Egypt by Zoroaster.

The most important of these mysteries were the Osiric in Egypt, the Mithraic in Persia, the Cabiric in Thrace, the Adonisian in Syria, the Dionysiac and Eleusinian in Greece, the Scandinavian among the Gothic nations, and the Druidical among the Celts.

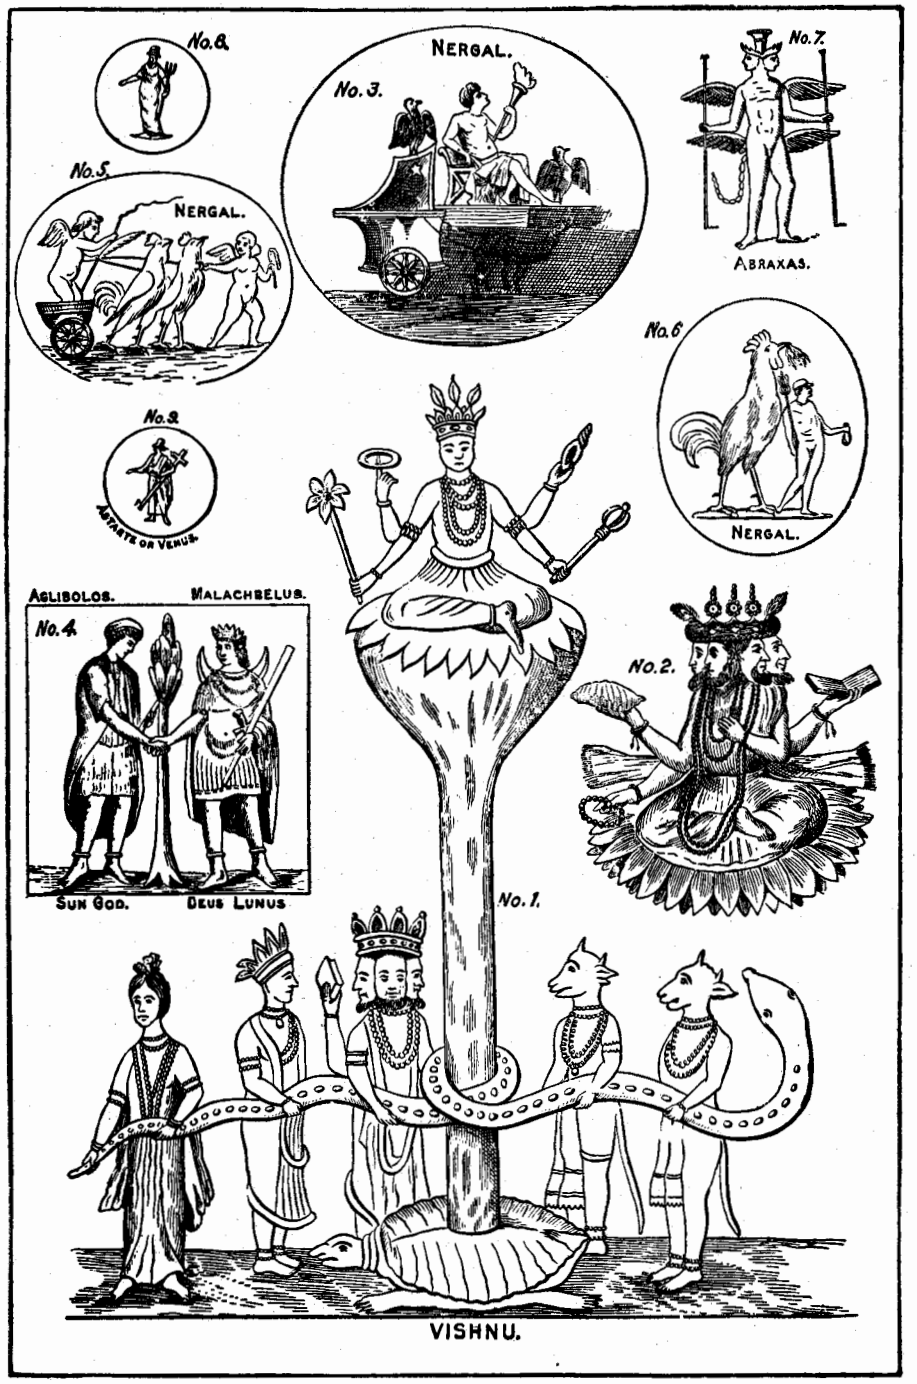
In all these mysteries we find a singular unity of design, clearly indicating a common origin, and a purity of doctrine as evidently proving that this common origin was not to be sought for in the popular theology of the Pagan world. The ceremonies of initiation were all funereal in their character. They celebrated the death and the resurrection of some cherished being, either the object of esteem as a hero, or of devotion as a god. Subordination of degrees was instituted, and the candidate was subjected to probations varying in their character and severity; the rites were practised in the darkness of night, and often amid the gloom of impenetrable forests or subterranean caverns; and the full fruition of knowledge, for which so much labor was endured, and so much danger incurred, was not attained until the aspirant, well tried and thoroughly purified, had reached the place of wisdom and of light.

These mysteries undoubtedly owed their origin to the desire to establish esoteric philosophy, in which should be withheld from popular approach those sublime truths which it was supposed could only be entrusted to those who had been previously prepared for their reception. Whence these doctrines were originally derived it would be impossible to say; but I am disposed to accept Creuzer's hypothesis of an ancient and highly instructed body of priests, having their origin either in Egypt or in the East, from whom was derived religious, physical, and historical knowledge, under the veil of symbols.

By this confinement of these doctrines to a system of secret knowledge, guarded by the most rigid rites, could they only expect to preserve them from the superstitions, innovations, and corruptions of the world as it then existed. "The distinguished few," says Oliver (*Hist. Init.*, p. 2), "who retained their fidelity, uncontaminated by the contagion of evil example, would soon be able to estimate the superior benefits of an isolated institution, which afforded the advantage of a select society, and kept at an unapproachable distance the profane scoffer, whose presence might pollute their pure devotions and social converse, by contumelious language or unholy mirth." And doubtless the prevention of this intrusion, and the preservation of these sublime truths,

was the original object of the institution of the ceremonies of initiation, and the adoption of other means by which the initiated could be recognized, and the uninitiated excluded. Such was the opinion of Warburton, who says that "the mysteries were at first the retreats of sense and virtue, till time corrupted them in most of the gods."

The Abbé Robin in a learned work on this subject entitled *Récherches sur les Initiations Anciens et Modernes* (Paris, 1870), places the origin of the initiations at that remote period when crimes first began to appear upon earth. The vicious, he remarks, were urged by the terror of guilt to seek among the virtuous for intercessors with the Deity. The latter, retiring into solitude to avoid the contagion of growing corruption, devoted themselves to a life of contemplation and the cultivation of several of the useful sciences. The periodical return of the seasons, the revolution of the stars, the productions of the earth, and the various phenomena of nature, studied with attention, rendered them useful guides to men, both in their pursuits of industry and in their social duties. These recluse students invented certain signs to recall to the remembrance of the people the times of their festivals and of their rural labors, and hence the origin of the symbols and hieroglyphics that were in use among the priests of all nations. Having now become guides and leaders of the people, these sages, in order to select as associates of their learned labors and sacred functions only such as had sufficient merit and capacity, appointed strict courses of trial and examination, and this, our author thinks, must have been the source of the initiations of antiquity. The Magi, Brahmans, Gymnosophists, Druids, and priests of Egypt, lived thus in sequestered habitations and subterranean caves, and obtained great reputation by their discoveries in astronomy, chemistry, and mechanics, by their purity of morals, and by their knowledge of the science of legislation. It was in these schools, says M. Robin, that the first sages and legislators of antiquity were formed, and in them he supposes the doctrines taught to have been the unity of God and the immortality of the soul; and it was from these mysteries, and their symbols and hieroglyphics, that the exuberant fancy of the Greeks drew much of their mythology.



Warburton deduces from the ancient writers—from Cicero and Porphyry, from Origen and Celsus, and from others—what was the true object of the mysteries. They taught the dogma of the unity of God in opposition to the polytheistic notions of the people, and in connection with this the doctrine of a future life, and that the initiated should be happier in that state than all other mortals; that while the souls of the profane, at their leaving the body, stuck fast in mire and filth and remained in darkness, the souls of the initiated winged their flight directly to the happy islands and the habitations of the gods. "Thrice happy they," says Sophocles, "who descended to the shades below after having beheld these rites; for they alone have life in Hades, while all others suffer there every kind of evil." And Isocrates declares that "those who have been initiated in the mysteries, entertain better hopes both as to the end of life and the whole of futurity."

Others of the ancients have given us the same testimony as to their esoteric character. "All the mysteries," says Plutarch, "refer to a future life and to the state of the soul after death." In another place, addressing his wife, he says, "We have been instructed, in the religious rites of Dionysus, that the soul is immortal, and that there is a future state of existence." Cicero tells us that, in the mysteries of Ceres at Eleusis, the initiated were taught to live happily and to die in the hope of a blessed futurity. And, finally, Plato informs us that the hymns of Musæus, which were sung in the mysteries, celebrated the rewards and pleasures of the virtuous in another life, and the punishments which awaited the wicked.

These sentiments, so different from the debased polytheism which prevailed among the uninitiated, are the most certain evidence that the mysteries arose from a purer source than that which gave birth to the religion of the vulgar.

I must not pass unnoticed Faber's notion of their arkite origin. Finding, as he did, a prototype for every ancient cultus in the ark of Noah, it is not surprising that he should apply his theory to the mysteries. "The initiations," he says (*Orig. Pag. Idol.*, II., iv., 5), "into the mysteries scenically represented the mythic descent into Hades and the return from thence to the light of day, by which was meant the entrance into the ark and the subsequent liberation from its dark enclosure. They all equally related to the allegorical disappearance, or death, or descent of the great father, at their commencement; and his invention, or revival, or return from Hades, at their conclusion."

Döllinger (*Gent. and Jew*, i., 126) says, speaking of the mysteries, "the whole was a drama, the prelude to which consisted in purifications, sacrifices, and injunctions with regard to the behavior to be observed. The adventures of certain deities, their sufferings and joys, their appearance on earth, and relations to mankind, their death, or descent to the nether world, their return, or their rising again—all these, as symbolizing the life of nature, were represented in a connected series of theatrical scenes. These representations, tacked on to a nocturnal solemnity, brilliantly got up, particularly at Athens, with all the resources of art and sensual beauty, and accompanied with dancing and song, were eminently calculated to take a powerful hold on the imagination and the heart, and to excite in the spectators alternately conflicting sentiments of terror, and calm, sorrow, and fear, and hope. They worked upon them, now by agitating, now by soothing, and meanwhile had a strong bearing upon susceptibilities and capacities of individuals, according as their several

dispositions inclined them more to reflection and observation, or to a resigned credulity."

Bunsen (*God in History*, II., b. iv., ch. 6) gives the most recent and the most philosophic idea of the character of the mysteries. They did, he says, "indeed exhibit to the initiated coarse physical symbols of the generative powers of Nature, and of the universal Nature herself, eternally, self-sustaining through all transformations; but the religious element of the mysteries consisted in the relations of the universe to the soul, more especially after death. Thus, even without philosophic proof, we are justified in assuming that the Nature symbolism referring to the Zodiac formed a mere framework for the doctrines relating to the soul and to the ethical theory of the universe. So, likewise, in the Samothracian worship of the Kabiri, the contest waged by the orb of day was represented by the story of the three brothers (the seasons of the year), one of whom is continually slain by the other two, but ever and anon arises to life again. But here, too, the beginning and end of the worship were ethical. A sort of confession was demanded of the candidates before admission, and at the close of the service the victorious God (Dionysus) was displayed as the Lord of the spirit. Still less, however, did theorems of natural philosophy form the subject-matter of the Eleusinian mysteries, of which, on the contrary, psychical conceptions were the beginning and the end. The predominating idea of these conceptions was that of the soul as a Divine, vital force, held captive here on earth and sorely tried; but the initiated were further taught to look forward to a final redemption and blessedness for the good and pious, and eternal torment after death for the wicked and unjust."

The esoteric character of the mysteries was preserved by the most powerful sanctions. An oath of secrecy was administered in the most solemn form to the initiate, and to violate it was considered a sacrilegious crime, the prescribed punishment for which was immediate death, and we have at least one instance in Livy of the infliction of the penalty. The ancient writers were therefore extremely reluctant to approach the subject, and Lobeck gives, in his *Aglaophamus* (vol. i., app. 131, 151; ii., 12, 87), several examples of the cautious manner in which they shrunk from divulging or discussing any explanation of a symbol which had been interpreted to them in the course of initiation. I would forbid, says Horace (L. iii., Od. 2, 26), that man who would divulge the sacred rites of mysterious Ceres from being under the same roof with me, or from setting sail with me in the same precarious bark.

On the subject of their relation to the rites of Freemasonry, to which they bear in many respects so remarkable a resemblance, that some connection seems necessarily implied, there are five principal theories. The first is that embraced and taught by Dr. Oliver, namely, that they are but deviations from that common source, both of them and of Freemasonry, the patriarchal mode of worship established by God himself. With this pure system of truth, he supposes the science of Freemasonry to have been coeval and identified. But the truths thus revealed by divinity came at length to be doubted or rejected through the imperfection of human reason, and though the visible symbols were retained in the mysteries of the Pagan world, their true interpretation was lost.

There is a second theory which, leaving the origin of the mysteries to be sought in the patriarchal doctrines, where Oliver has placed it, finds the connection between them and Freemasonry commencing at the building of King Solomon's Temple. Over the construction of this building, Hiram, the Architect of Tyre, presided. At Tyre the mysteries of Bacchus had been introduced by the Dionysian Artificers, and into their fraternity Hiram, in all probability, had, it is necessarily suggested, been admitted. Freemasonry, whose tenets had always existed in purity among the immediate descendants of the patriarchs, added now to its doctrines the guard of secrecy, which, as Dr. Oliver himself remarks, was necessary to preserve them from perversion or pollution.

A third theory has been advanced by the Abbé Robin, in which he connects Freemasonry indirectly with the mysteries, through the intervention of the Crusaders. In the work already cited, he attempts to deduce, from the ancient initiations, the orders of chivalry, whose branches, he says, produced the Institution of Freemasonry.

A fourth theory, and this has been recently advanced by the Rev. Mr. King in his treatise *On the Gnostics*, is that as some of them, especially those of Mithras, were extended beyond the advent of Christianity, and even to the very commencement of the Middle Ages, they were seized upon by the secret societies of that period as a model for their organization, and that through these latter they are to be traced to Freemasonry.

But perhaps, after all, the truest theory is that which would discard all successive links in a supposed chain of descent from the mysteries to Freemasonry, and would attribute their close resemblance to a natural coincidence of human thought. The legend of the Third Degree, and the legends of the Eleusinian, the Cabiric, the Dionysian, the Adonic, and all the other mysteries, are identical in their object to teach the reality of a future life; and this lesson is taught in all by the use of the same symbolism, and, substantially, the same scenic representation. And this is not because the Masonic rites are a lineal succession from the Ancient Mysteries, but because there has been at all times a proneness of the human heart to nourish this belief in a future life, and the proneness of the human mind to clothe this belief in a symbolic dress. And if there is any other more direct connection between them it must be sought for in the Roman Colleges of Artificers, who did, most probably, exercise some influence over the rising Freemasons of

the early ages, and who, as the contemporaries of the mysteries, were, we may well suppose, imbued with something of their organization.

I conclude with a notice of their ultimate fate. They continued to flourish until long after the Christian era; but they at length degenerated. In the fourth century, Christianity had begun to triumph. The Pagans, desirous of making converts, threw open the hitherto inaccessible portals of their mysterious rites. The strict scrutiny of the candidate's past life, and the demand for proofs of irreproachable conduct, were no longer deemed indispensable. The vile and the vicious were indiscriminately, and even with avidity, admitted to participate in privileges which were once granted only to the noble and the virtuous. The sun of Paganism was setting, and its rites had become contemptible and corrupt. Their character was entirely changed, and the initiations were indiscriminately sold by peddling priests, who wandered through the country, to every applicant who was willing to pay a trifling fee for that which had once been refused to the entreaties of a monarch. At length these abominations attracted the attention of the emperors, and Constantine and Gratian forbade their celebration by night, excepting, however, from these edicts, the initiations at Eleusis. But finally Theodosius, by a general edict of proscription, ordered the whole of the Pagan mysteries to be abolished, in the four hundred and thirty-eighth year of the Christian era, and eighteen hundred years after their first establishment in Greece.

Clavel, however, says that they did not entirely cease until the era of the restoration of learning, and that during a part of the Middle Ages the mysteries of Diana, under the name of the "Courses of Diana," and those of Pan, under that of the "Sabbats," were practised in country places. But these were really only certain superstitious rites connected with the belief in witchcraft. The mysteries of Mithras, which, continually attacked by the Fathers of the Church, lived until the beginning of the fifth century, were, I think, the last of the old mysteries which had once exercised so much influence over the Pagan world and the Pagan religions.

Mysteries, Mexican. Instituted among the Mexicans (Aztecs), and were of a sacred nature. The adherents adopted the worship of some special deity, Quetzalcoatl (the Mexican Savior), under secret rites, and rendered themselves seclusive. A similar order was that called Tlamacazajotl, also the order known as Telpochtliztli. It is understood that under the sway of the Aztecs, the Mexican Mysteries had some Masonic affinities. (See *Aztec Writings.*)

Mystery. From the Greek μυστηριον, *a secret*, something to be concealed. The gilds or companies of the Middle Ages, out of which we trace the Masonic organization, were called *mysteries*, because they had trade-secrets, the preservation of which was a primary ordination of these fraternities. "Mystery" and "Craft" came thus to be synonymous words. In this secondary sense we speak of the "Mystery of the Stone-Masons" as equivalent to the "Craft of the Stone-Masons." But the Mystery of Freemasonry refers rather to the primary meaning of the word as immediately derived from the Greek.

Mystes. (From the Greek μύω, *to shut the eyes.*) One who had been initiated into the Lesser Mysteries of Paganism. He was now blind; but when he was initiated into the Greater Mysteries, he was called an Epopt, or one who saw.

The Mystes was permitted to proceed no farther than the vestibule or porch of the temple. To the Epopts only was accorded the privilege of admission to the adytum or sanctuary. A female initiate was called a Mystis.

Mystical. A word applied to any language, symbol, or ritual which is understood only by the initiated. The word was first used by the priests to describe their mysterious rites, and then borrowed by the philosophers to be applied to the inner, esoteric doctrines of their schools. In this sense we speak of the mystical doctrines of Speculative Masonry. Suidas derives the word from the Greek μύω, *to close*, and especially *to close the lips*. Hence the mystical is that about which the mouth should be closed.

Mysticism. A word applied in religious phraseology to any views or tendencies which aspire to more direct communication between God and man by the inward perception of the mind than can be obtained through revelation. "Mysticism," says Vaughan (*Hours with the Mystics*, i., 19), "presents itself in all its phases as more or less the religion of internal as opposed to external revelation—of heated feeling, sickly sentiment, or lawless imagination, as opposed to that reasonable belief in which the intellect and the heart, the inward witness and the outward, are alike engaged." The Pantheism of some of the ancient philosophers and of the modern Spinozaists, the Speculations of the Neoplatonists, the Anabaptism of Munster, the system of Jacob Behmen, the Quietism of Madame Guyon, the doctrines of the Bavarian Illuminati, and the reveries of Swedenborg, all partake more or less of the spirit of mysticism. The Germans have two words, *mystik* and *mysticismus*—the former of which they use in a favorable, the latter in an unfavorable sense. Mysticism is with them only another word for Pantheism, between which and Atheism there is but little difference. Hence a belief in mysticism is with the German Freemasons a disqualification for initiation into the Masonic rites. Thus the second article of the Statutes of the Grand Lodge of Hanover prescribes that "ein Freimaurer muss vom Mysticismus und Atheismus gleich weit entfernt stehen," i. e., "a Freemason must be equally distant from Mysticism and Atheism." Gädicke (*Freimaurer-Lexicon*) thus expresses the German sentiment: "Etwas *mystisch* sollte wohl jeder Mensch seyn, aber man hüte sich vor grobem Mysticismus," i. e.,

"Every man ought to be somewhat *mystical*, but should guard against coarse *mysticism*."

Mystic Crown, Knights and Companions of the. A society formed by the adherents of Mesmer, in August, 1787, of a beneficent, non-political, and non-sectarian nature, to which Master Masons only were admitted.

Mystic Tie. That sacred and inviolable bond which unites men of the most discordant opinions into one band of brothers, which gives but one language to men of all nations and one altar to men of all religions, is properly, from the mysterious influence it exerts, denominated the mystic tie; and Freemasons, because they alone are under its influence, or enjoy its benefits, are called "Brethren of the mystic tie."

Myth. The word *myth*, from the Greek μῦθος, *a story*, in its original acceptation, signified simply a statement or narrative of an event, without any necessary implication of truth or falsehood; but, as the word is now used, it conveys the idea of a personal narrative of remote date, which, although not necessarily untrue, is certified only by the internal evidence of the tradition itself. This definition, which is substantially derived from Mr. Grote (*Hist. of Greece*, vol. i., ch. xvi., p. 295), may be applied without modification to the myths of Freemasonry, although intended by the author only for the myths of the ancient Greek religion.

The myth, then, is a narrative of remote date, not necessarily true or false, but whose truth can only be certified by internal evidence. The word was first applied to those fables of the Pagan gods which have descended from the remotest antiquity, and in all of which there prevails a symbolic idea, not always, however, capable of a positive interpretation. As applied to Freemasonry, the words *myth* and *legend* are synonymous.

From this definition it will appear that the myth is really only the interpretation of an idea. But how we are to read these myths will best appear from these noble words of Max Müller (*Science of Lang.*, 2d Ser., p. 578): "Everything is true, natural, significant, if we enter with a reverent spirit into the meaning of ancient art and ancient language. Everything becomes false, miraculous, and unmeaning, if we interpret the deep and mighty words of the seers of old in the shallow and feeble sense of modern chroniclers."

A fertile source of instruction in Masonry is to be found in its traditions and mythical legends; not only those which are incorporated into its ritual and are exemplified in its ceremonies, but those also which, although forming no part of the Lodge lectures, have been orally transmitted as portions of its history, and which, only within a comparatively recent period, have been committed to writing. But for the proper appreciation of these traditions some preparatory knowledge of the general character of Masonic myths is necessary. If all the details of these traditions be considered as asserted historical facts, seeking to convey nothing more nor less than historical information, then the improbabilities and anachronisms, and other violations of historical truth which distinguish many of them, must cause them to be rejected by the scholar as absurd impostures. But there is another and a more advantageous view in which these traditions are to be considered. Freemasonry is a symbolic institution—everything in and about it is symbolic—and nothing more eminently so than its traditions. Although some of them—as, for instance, the legend of the Third Degree—have in all probability a deep substratum of truth lying beneath, over this there is superposed a beautiful structure of symbolism. History has, perhaps, first suggested the tradition; but then the legend, like the myths of the ancient poets, becomes a symbol, which is to enunciate some sublime philosophical or religious truth. Read in this way, and in this way only, the myths or legends and traditions of Freemasonry will become interesting and instructive. (See *Legend*.)

Myth, Historical. An historical myth is a myth that has a known and recognized foundation in historical truth, but with the admixture of a preponderating amount of fiction in the introduction of personages and circumstances. Between the historical myth and the mythical history, the distinction cannot always be preserved, because we are not always able to determine whether there is a preponderance of truth or of fiction in the legend or narrative under examination.

Mythical History. A myth or legend, in which the historical and truthful greatly preponderate over the inventions of fiction, may be called a mythical history. Certain portions of the legend of the Third Degree have such a foundation in fact that they constitute a mythical history, while other portions, added evidently for the purposes of symbolism, are simply an historical myth.

Mythology. Literally, the science of myths; and this is a very appropriate definition, for mythology is the science which treats of the religion of the ancient Pagans, which was almost altogether founded on myths or popular traditions and legendary tales; and hence Keightly (*Mythol. of Ancient Greece and Italy*, p. 2) says that "mythology may be regarded as the repository of the early religion of the people." Its interest to a Masonic student arises from the constant antagonism that existed between its doctrines and those of the Primitive Freemasonry of antiquity and the light that the mythological mysteries throw upon the ancient organization of Speculative Masonry.

Myth, Philosophical. This is a myth or legend that is almost wholly unhistorical, and which has been invented only for the purpose of enunciating and illustrating a particular thought or dogma. The legend of Euclid is clearly a philosophical myth.

N

N. (Heb. נ.) The fourteenth letter in the English and Hebrew alphabets; its numerical value is 50, and its definition, *fish*. As a final, Nun is written ן, and then is of the value of 700. The Hebrew Divine appellation is נורא, or *Formidabilis*.

Naamah. The daughter of Lamech. To her the "Legend of the Craft" attributes the invention of the art of weaving, and she is united with her three brothers, by the same legend, in the task of inscribing the several sciences on two pillars, that the knowledge of them might be preserved after the flood.

Nabalm. See *Schools of the Prophets*.

Naharda, Brotherhood of. After the destruction of the Solomonial Temple, the captives formed an association while slaves at Naharda, on the Euphrates, and are there said to have preserved the secret mysteries.

Naked. In Scriptural symbology, *nakedness* denoted sin, and *clothing*, protection. But the symbolism of Masonry on this subject is different. There, to be "neither naked nor clothed" is to make no claim through worldly wealth or honors to preferment in Masonry, where nothing but internal merit, which is unaffected by the outward appearance of the body, is received as a recommendation for admission.

Name of God. A reverential allusion to the name of God, in some especial and peculiar form, is to be found in the doctrines and ceremonies of almost all nations. This *unutterable name* was respected by the Jews under the sacred form of the word Jehovah. Among the Druids, the three letters I. O. W. constituted the name of Deity. They were never pronounced, says Giraldus Cambrensis, but another and less sacred name was substituted for them. Each letter was a name in itself. The first is the Word, at the utterance of which in the beginning the world burst into existence; the second is the Word, whose sound still continues, and by which all things remain in existence; the third is the Word, by the utterance of which all things will be consummated in happiness, forever approaching to the immediate presence of the Deity. The analogy between this and the past, present, and future significations contained in the Jewish Tetragrammaton will be evident.

Among the Mohammedans there is a science called ISM ALLAH, or the science of the name of God. "They pretend," says Niebuhr, "that God is the lock of this science, and Mohammed the key; that, consequently, none but Mohammedans can attain it; that it discovers what passes in different countries; that it familiarizes the possessors with the genii, who are at the command of the initiated, and who instruct them; that it places the winds and the seasons at their disposal, and heals the bites of serpents, the lame, the maimed, and the blind."

In the chapter of the Koran entitled *Araaf*, it is written: "God has many excellent names. Invoke him by these names, and separate yourselves from them who give him false names." The Mohammedans believe that God has ninety-nine names, which, with that of ALLAH, make one hundred; and, therefore, their chaplets or rosaries are composed of one hundred beads, at each of which they invoke one of these names; and there is a tradition, that whoever frequently makes this invocation will find the gates of Paradise open to him. With them ALLAH is the *Ism al adhem*, the Great Name, and they bestow upon it all the miraculous virtues which the Jews give to the Tetragrammaton. This, they say, is the name that was engraven on the stone which Japheth gave to his children to bring down rain from heaven; and it was by virtue of this name that Noah made the ark float on the waters, and governed it at will, without the aid of oars or rudder.

Among the Hindus there was the same veneration of the name of God, as is evinced in their treatment of the mystical name AUM. The "Institutes of Menu" continually refer to the peculiar efficacy of this word, of which it is said, "All rites ordained in the Veda, oblations to fire, and solemn sacrifices pass away; but that which passes not away is the syllable AUM, thence called *aishara*, since it is a symbol of God, the Lord of created beings."

There was in every ancient nation a sacred name given to the highest god of its religious faith, besides the epithets of the other and subordinate deities. The old Aryans, the founders of our race, called their chief god DYAUS, and in the Vedas we have the invocation to *Dyaus Pitar*, which is the same as the Greek Ζευ πάτηρ, and the Latin, *Jupiter*, all meaning the Heaven-Father, and at once reminding us of the Christian invocation to "Our Father which art in heaven."

There is one incident in the Hindu mythology which shows how much the old Indian heart yearned after this expression of the nature of Deity by a name. There was a nameless god, to whom, as the "source of golden light," there was a worship. This is expressed in one of the Veda hymns, where the invocation in every stanza closes with the exclamation, "Who is the god to whom we shall offer our sacrifice?" Now, says Bunsen (*God in History*, i., 302), "the Brahmanic expositors must needs find in every hymn the name of a god who is invoked in it, and so, in this case, they have actually invented a grammatical divinity, the god *Who*." What more pregnant testimony could we have of the tendency of man to seek a knowledge of the Divine nature in the expression of a name?

The Assyrians worshiped *Assur*, or *Asarac*, as their chief god. On an obelisk, taken from the palace of Nimrod, we find the inscription, "to Asarac, the Great Lord, the King of all the great gods."

Of the veneration of the Egyptians for the name of their supreme god, we have a striking

evidence in the writings of Herodotus, the Father of History, as he has been called, who during a visit to Egypt was initiated into the Osirian mysteries. Speaking of these initiations, he says (B. ii., c. 171), "the Egyptians represent by night *his sufferings, whose name I refrain from mentioning.*" It was no more lawful among the Egyptians than it was among the Jews, to give utterance aloud to that Holy Name.

At Byblos the Phœnicians worshiped *Eliun*, the Most High God. From him was descended *El*, whom Philo identifies with Saturn, and to whom he traces the Hebrew *Elohim*. Of this EL, Max Müller says that there was undeniably a primitive religion of the whole Semitic race, and that the Strong One in Heaven was invoked under this name by the ancestors of the Semitic races, before there were Babylonians in Babylonia, Phœnicians in Sidon and Tyre, or Jews in Mesopotamia and Jerusalem. If so, then the Mosaic adoption of Jehovah, with its more precise teaching of the Divine essence, was a step in the progress to the knowledge of the Divine Truth.

In China there is an infinite variety of names of elemental powers, and even of ancestral spirits, who are worshiped as subordinate deities; but the ineffable name is TIEN, compounded of the two signs for *great* and *one*, and which the *Imperial Dictionary* tells us signifies "The Great One—He that dwells on high, and regulates all below."

Drummond (*Origines*) says that ABAUR was the name of the Supreme Deity among the ancient Chaldeans. It is evidently the Hebrew אב אור, and signifies "The Father of Light."

The Scandinavians had twelve subordinate gods, but their chief or supreme deity was *Al-Fathr*, or the *All Father*.

Even among the red men of America we find the idea of an invisible deity, whose name was to be venerated. Garcilasso de la Vega tells us that while the Peruvians paid public worship to the sun, it was but as a symbol of the Supreme Being, whom they called *Pachacamac*, a word meaning "the soul of the world," and which was so sacred that it was spoken only with extreme dread.

The Jews had, besides the Tetragrammaton or four-lettered name, two others: one consisting of twelve and the other of forty-two letters. But Maimonides, in his *More Nevochim* (p. i., clxii.), remarks that it is impossible to suppose that either of these constituted a single name, but that each must have been composed of several words, which must, however, have been significant in making man approximate to a knowledge of the true essence of God. The Kabbalistical book called the *Sohar* confirms this when it tells us that there are ten names of God mentioned in the Bible, and that when these ten names are combined into one word, the number of the letters amounts to forty-two. But the Talmudists, although they did not throw around the forty-two-lettered name the sanctity of the Tetragrammaton, prescribed that it should be communicated only to men of middle age and of virtuous habits, and that its knowledge would confirm them as heirs of the future as well as the present life. The twelve-lettered name, although once common, became afterward occult; and when, on the death of Simon I., the priests ceased to use the Tetragrammaton, they were accustomed to bless the people with the name of twelve letters. Maimonides very wisely rejects the idea, that any power was derived from these letters or their pronunciation, and claims that the only virtue of the names consisted in the holy ideas expressed by the words of which they were composed.

The following are the ten Kabbalistic names of God, corresponding to the ten Sephiroth: 1. Eheyeh; 2. Jah; 3. Jehovah; 4. El; 5. Eloah; 6. Elohim; 7. Jehovah Sabaoth; 8. Elohim Sabaoth; 9. Elhi; 10. Adonai.

Lanzi extends his list of Divine names to twenty-six, which, with their signification, are as follows:

1. *At.* The Aleph and Tau, that is, Alpha and Omega. A name figurative of the Tetragrammaton.
2. *Ihoh.* The eternal, absolute principle of creation, and
3. *Hoh.* Destruction, the male and female principle, the author and regulator of time and motion.
4. *Jah.* The Lord and Remunerator.
5. *Oh.* The severe and punisher.
6. *Jao.* The author of life.
7. *Azazel.* The author of death.
8. *Jao-Sabaoth.* God of the coordinations of loves and hatreds. Lord of the solstices and the equinoxes.
9. *Ehie.* The Being; the Ens.
10. *El.* The first cause. The principle or beginning of all things.
11. *Elo-hi.* The good principle.
12. *Elo-ho.* The evil principle.
13. *El-raccum.* The succoring principle.
14. *El-cannum.* The abhorring principle.
15. *Ell.* The most luminous.
16. *Il.* The omnipotent.
17. *Ellohim.* The omnipotent and beneficent.
18. *Elohim.* The most beneficent.
19. *Elo.* The Sovereign, the Excelsus.
20. *Adon.* The Lord, the Dominator.
21. *Eloi.* The illuminator, the most effulgent.
22. *Adonai.* The most firm, the strongest.
23. *Elion.* The most high.
24. *Shaddai.* The most victorious.
25. *Yeshurun.* The most generous.
26. *Noil.* The most sublime.

Like the Mohammedan *Ism Allah*, Freemasonry presents us as its most important feature with this science of the names of God. But here it elevates itself above Talmudical and Rabbinical reveries, and becomes a symbol of Divine Truth. The names of God were undoubtedly intended originally to be a means of communicating

the knowledge of God himself. The name was, from its construction and its literal powers, used to give some idea, however scanty, in early times, of the true nature and essence of the Deity. The ineffable name was the symbol of the unutterable sublimity and perfection of truth which emanate from the Supreme God, while the subordinate names were symbols of the subordinate manifestations of truth. Freemasonry has availed itself of this system, and, in its reverence for the Divine Name, indicates its desire to attain to that truth as the ultimate object of all its labor. The significant words of the Masonic system, which describe the names of God wherever they are found, are not intended merely as words of recognition, but as indices, pointing—like the symbolic ladder of Jacob of the First Degree, or the winding stairs of the Second, or the three gates of the Third—the way of progress from darkness to light, from ignorance to knowledge, from the lowest to the highest conceptions of Divine Truth. And this is, after all, the real object of all Masonic science.

Names of Lodges. The precedency of Lodges does not depend on their names, but on their numbers. The rule declaring that "the precedency of Lodges is grounded on the seniority of their Constitution" was adopted on the 27th of December, 1727, (*Constitutions*, 1738, p. 154.) The number of the Lodge, therefore, by which its precedency is established, is always to be given by the Grand Lodge.

In England, Lodges do not appear to have received distinctive names before the latter part of the last century. Up to that period the Lodges were distinguished simply by their numbers. Thus, in the first edition of the *Book of Constitutions*, published in 1723, we find a list of twenty Lodges, registered by their numbers, from "No. 1" to "No. 20," inclusive. Subsequently, they were further designated by the name of the tavern at which they held their meetings. Thus, in the second edition of the same work, published in 1738, we meet with a list of one hundred and six Lodges, designated sometimes, singularly enough, as *Lodge No. 6, at the Rummer Tavern*, in Queen Street; *No. 84, at the Black Dog*, in Castle Street; or *No. 98, at the Bacchus Tavern*, in Little Bush Lane. With such names and localities, we are not to wonder that the "three small glasses of punch," of which Dr. Oliver so feelingly speaks in his *Book of the Lodge*, were duly appreciated; nor, as he admits, that "there were some brethren who displayed an anxiety to have the allowance increased."

In 1766 we read of four Lodges that were erased from the Register, under the similar designations of the *Globe*, Fleet Street; the *Red Cross Inn*, Southwark; *No. 85, at the George*, Ironmongers' Lane; and the *Mercers' Arms*, Mercers' Street. To only one of these, it will be perceived, was a number annexed. The name and locality of the tavern was presumed to be a sufficient distinction. It was not until about the close of the eighteenth century, as has been already observed, that we find distinctive names beginning to be given to the Lodges; for in 1793 we hear of the *Shakspeare Lodge*, at Stratford-on-Avon; the *Royal Brunswick*, at Sheffield; and the *Lodge of Apollo*, at Alcester. From that time it became a usage among our English brethren, from which they have never since departed.

But a better taste began to prevail at a much earlier period in Scotland, as well as in the continental and colonial Lodges. In Scotland, especially, distinctive names appear to have been used from a very early period, for in the very old charter granting the office of Hereditary Grand Masters to the Barons of Rosslyn, of which the date cannot be more recent than 1600, we find among the signatures the names of the officers of the *Lodge of Dunfermline* and the *Lodge of St. Andrew's*. Among the names in the list of the Scotch Lodges, in 1736 are those of *St. Mary's Chapel*, *Kilwinning*, *Aberdeen*, etc. These names were undoubtedly borrowed from localities; but in 1763, while the English Lodges were still content with their numerical arrangement only, we find in Edinburgh such designations as *St. Luke's*, *St. Giles's*, and *St. David's* Lodges.

The Lodges on the Continent, it is true, at first adopted the English method of borrowing a tavern sign for their appellation; whence we find the *Lodge at the Golden Lion*, in Holland, in 1734, and before that the *Lodge at Hure's Tavern*, in Paris, in 1725. But they soon abandoned this inefficient and inelegant mode of nomenclature; and accordingly, in 1739, a Lodge was organized in Switzerland under the appropriate name of *Stranger's Perfect Union*. Tasteful names, more or less significant, began thenceforth to be adopted by the continental Lodges. Among them we may meet with the *Lodge of the Three Globes*, at Berlin, in 1740; the *Minerva Lodge*, at Leipsic, in 1741; *Absalom Lodge*, at Hamburg, in 1742; *St. George's Lodge*, at the same place, in 1743; the *Lodge of the Crowned Column*, at Brunswick, in 1745; and an abundance of others, all with distinctive names, selected sometimes with much and sometimes with but little taste. But the worst of them was undoubtedly better than the *Lodge at the Goose and Gridiron*, which met in London in 1717.

In America, from the very introduction of Masonry into the continent, significant names were selected for the Lodges; and hence we have, in 1734, *St. John's Lodge*, at Boston; a *Solomon's Lodge*, in 1735, at both Charleston and Savannah; and a *Union Kilwinning*, in 1754, at the former place.

This brief historical digression will serve as an examination of the rules which should govern all founders in the choice of Lodge names. The first and most important rule is that the name of a Lodge should be technically significant; that is, it must allude

to some Masonic fact or characteristic; in other words, there must be something Masonic about it. Under this rule, all names derived from obscure or unmasonic localities should be rejected as unmeaning and inappropriate. Dr. Oliver, it is true, thinks otherwise, and says that "the name of a hundred, or wahpentake, in which the Lodge is situated, or of a navigable river, which confers wealth and dignity on the town, are proper titles for a Lodge." But a name should always convey an idea, and there can be conceived no idea worth treasuring in a Mason's mind to be deduced from bestowing such names as *New York*, *Philadelphia*, or *Baltimore*, on a Lodge. The selection of such a name shows but little originality in the chooser; and, besides, if there be two Lodges in a town, each is equally entitled to the appellation; and if there be but one, the appropriation of it would seem to indicate an intention to have no competition in the future.

Yet, barren of Masonic meaning as are such geographical names, the adoption of them is one of the most common faults in American Masonic nomenclature. The examination of a very few Registers, taken at random, will readily evince this fact. Thus, eighty-eight, out of one hundred and sixty Lodges in Wisconsin, are named after towns or counties; of four hundred and thirty-seven Lodges in Indiana, two hundred and fifty-one have names derived from the same source; geographical names are found in one hundred and eighty-one out of four hundred and three Lodges in Ohio, and in twenty out of thirty-eight in Oregon. But, to compensate for this, we have seventy-one Lodges in New Hampshire, and only two local geographical appellations in the list.

There are, however, some geographical names which are admissible, and, indeed, highly appropriate. These are the names of places celebrated in Masonic history. Such titles for Lodges as *Jerusalem*, *Tyre*, *Lebanon*, and *Joppa* are unexceptionable. *Patmos*, which is the name of a Lodge in Maryland, seems, as the long residence of one of the patrons of the Order, to be unobjectionable. So, too, *Bethel*, because it signifies "the house of God"; *Mount Moriah*, the site of the ancient Temple; *Calvary*, the small hill on which the sprig of acacia was found; *Mount Ararat*, where the ark of our father Noah rested; *Ophir*, whence Solomon brought the gold and precious stones with which he adorned the Temple; *Tadmor*, because it was a city built by King Solomon; and *Salem* and *Jebus*, because they are synonyms of Jerusalem, and because the latter is especially concerned with Ornan the Jebusite, on whose "threshing-floor" the Temple was subsequently built—are all excellent and appropriate names for Lodges. But all Scriptural names are not equally admissible. *Cabul*, for instance, must be rejected, because it was the subject of contention between Solomon and Hiram of Tyre; and *Babylon*, because it was the place where "language was confounded and Masonry lost," and the scene of the subsequent captivity of our ancient brethren; *Jericho*, because it was under a curse; and *Misgab* and *Tophet*, because they were places of idol worship. In short, it may be adopted as a rule, that no name should be adopted whose antecedents are in opposition to the principles of Masonry.

The ancient patrons and worthies of Freemasonry furnish a very fertile source of Masonic nomenclature, and have been very liberally used in the selection of names of Lodges. Among the most important may be mentioned *St. John*, *Solomon*, *Hiram*, *King David*, *Adoniram*, *Enoch*, *Archimedes*, and *Pythagoras*. *The Widow's Son Lodge*, of which there are several instances in the United States, is an affecting and significant title, which can hardly be too often used.

Recourse is also to be had to the names of modern distinguished men who have honored the Institution by their adherence to it, or who, by their learning in Masonry, and by their services to the Order, have merited some marks of approbation. And hence we meet, in England, as the names of Lodges, with *Sussex*, *Moira*, *Frederick*, *Zetland*, and *Robert Burns*; and in this country with *Washington*, *Lafayette*, *Clinton*, *Franklin*, and *Clay*. Care must, however, be taken that no name be selected except of one who was both a Mason and had distinguished himself, either by services to his country, to the world, or to the Order. Oliver says that "the most appropriate titles are those which are assumed from the name of some ancient benefactor or meritorious individual who was a native of the place where the Lodge is held; as, in a city, the builder of the cathedral church." In this country we are, it is true, precluded from a selection from such a source; but there are to be found some of those old benefactors of Freemasonry, who, like Shakespeare and Milton, or Homer and Virgil, have ceased to belong to any particular country, and have now become the common property of the world-wide Craft. There are, for instance, *Carausius*, the first royal patron of Masonry in England; and *St. Alban*, the first Grand Master; and *Athelstan* and *Prince Edwin*, both active encouragers of the art in the same kingdom. There are *Wykeham*, *Gundulph*, *Giffard*, *Langham*, *Yevele* (called, in the old records, the King's Freemason), and *Chicheley*, *Jermyn*, and *Wren*, all illustrious Grand Masters of England, each of whom would be well entitled to the honor of giving name to a Lodge, and any one of whom would be better, more euphonious, and more spirit-stirring than the unmeaning, and oftentimes crabbed, name of some obscure village or post-office, from which too many of our Lodges derive their titles.

And, then, again, among the great benefactors to Masonic literature and laborers in Masonic science there are such names as

Anderson, *Dunckerley*, *Preston*, *Hutchinson*, *Town*, *Webb*, and a host of others, who, though dead, still live by their writings in our memories.

The virtues and tenets—the inculcation and practise of which constitute an important part of the Masonic system—form very excellent and appropriate names for Lodges, and have always been popular among correct Masonic nomenclators. Thus we everywhere find such names as *Charity*, *Concord*, *Equality*, *Faith*, *Fellowship*, *Harmony*, *Hope*, *Humility*, *Mystic Tie*, *Relief*, *Truth*, *Union*, and *Virtue*. Frequently, by a transposition of the word "Lodge" and the distinctive appellation, with the interposition of the preposition "of," a more sonorous and emphatic name is given by our English and European brethren, although the custom is but rarely followed in this country. Thus we have by this method the *Lodge of Regularity*, the *Lodge of Fidelity*, the *Lodge of Industry*, and the *Lodge of Prudent Brethren*, in England; and in France, the *Lodge of Benevolent Friends*, the *Lodge of Perfect Union*, the *Lodge of the Friends of Peace*, and the celebrated *Lodge of the Nine Sisters*.

As the names of illustrious men will sometimes stimulate the members of the Lodges which bear them to an emulation of their characters, so the names of the Masonic virtues may serve to incite the brethren to their practise, lest the inconsistency of their names and their conduct should excite the ridicule of the world.

Another fertile and appropriate source of names for Lodges is to be found in the symbols and implements of the Order. Hence, we frequently meet with such titles as *Level*, *Trowel*, *Rising Star*, *Rising Sun*, *Olive Branch*, *Evergreen*, *Doric*, *Corinthian*, *Delta*, and *Corner-Stone* Lodges. *Acacia* is one of the most common, and at the same time one of the most beautiful, of these symbolic names; but, unfortunately, through gross ignorance, it is often corrupted into *Cassia*—an insignificant plant, which has no Masonic or symbolic meaning.

An important rule in the nomenclature of Lodges, and one which must at once recommend itself to every person of taste, is that the name should be euphonious. This principle of euphony has been too little attended to in the selection of even geographical names in this country, where names with impracticable sounds, or with ludicrous associations, are often affixed to our towns and rivers. Speaking of a certain island, with the unpronounceable name of "Srh," Lieber says, "If Homer himself were born on such an island, it could not become immortal, for the best-disposed scholar would be unable to remember the name"; and he thinks that it was no trifling obstacle to the fame of many Polish heroes in the revolution of that country, that they had names which left upon the mind of foreigners no effect but that of utter confusion. An error like this must always be avoided in bestowing a name upon a Lodge. The word selected should be soft, vocal—not too long nor too short—and, above all, be accompanied in its sound or meaning by no low, indecorous, or ludicrous association. For this reason such names of Lodges should be rejected as *Sheboygan* and *Oconomowoc* from the registry of Wisconsin, because of the uncouthness of the sound; and *Rough and Ready* and *Indian Diggings* from that of California, on account of the ludicrous associations which these names convey. Again, *Pythagoras* Lodge is preferable to *Pythagorean*, and *Archimedes* is better than *Archimedean*, because the noun is more euphonious and more easily pronounced than the adjective. But this rule is difficult to illustrate or enforce; for, after all, this thing of euphony is a mere matter of taste, and we all know the adage, "de gustibus."

A few negative rules, which are, however, easily deduced from the affirmative ones already given, will complete the topic.

No name of a Lodge should be adopted which is not, in some reputable way, connected with Masonry. Everybody will acknowledge that *Morgan* Lodge would be an anomaly, and that *Cowan* Lodge would, if possible, be worse. But there are some names which, although not quite as bad as these, are on principle equally as objectionable. Why should any of our Lodges, for instance, assume, as many of them have, the names of *Madison*, *Jefferson*, or *Taylor*, since none of these distinguished men were Masons or patrons of the Craft?

The indiscriminate use of the names of saints unconnected with Masonry is for a similar reason objectionable. Beside our patrons St. John the Baptist and St. John the Evangelist, but three other saints can lay any claims to Masonic honors, and these are St. Alban, who introduced, or is said to have introduced, the Order into England, and has been liberally complimented in the nomenclature of Lodges; and St. Swithin, who was at the head of the Craft in the reign of Ethelwolf; and St. Benedict, who was the founder of the Masonic fraternity of Bridge Builders. But St. Mark, St. Luke, St. Andrew, all of whom have given names to numerous Lodges, can have no pretensions to assist as sponsors in these Masonic baptisms, since they were not at all connected with the Craft.

To the Indian names of Lodges there is a radical objection. It is true that their names are often very euphonious and always significant, for the red men of our continent are tasteful and ingenious in their selection of names—much more so, indeed, than the whites, who borrow from them; but their significance has nothing to do with Masonry.

What has been said of Lodges may with equal propriety be said, *mutatis mutandis*, of Chapters, Councils, and Commanderies.

Namur. A city of Belgium, where the Primitive Scottish Rite was first established; hence sometimes called the Rite of Namur.

Naos. The ark of the Egyptian gods. A chest or structure with more height than depth, and thereby unlike the Israelitish Ark of the Covenant. The winged figures embraced the lower part of the Naos, while the cherubim of the Ark of Yahveh were placed above its lid. Yahveh took up his abode above the propitiatory or covering between the wings of the cherubim, exteriorly, while the gods of Egypt were reputed as hidden in the interior of the Naos of the sacred barks, behind hermetically closed doors. (See *Cherubim.*)

Naphtali. The territory of the tribe of Naphtali adjoined, on its western border, to Phœnicia, and there must, therefore, have been frequent and easy communication between the Phœnicians and the Naphtalites, resulting sometimes in intermarriage. This will explain the fact that Hiram the Builder was the son of a widow of Naphtali and a man of Tyre.

Naples. Freemasonry must have been practised in Naples before 1751, for in that year King Charles issued an edict forbidding it in his dominions. The author of *Anti-Saint Nicaise* says that there was a Grand Lodge at Naples, in 1756, which was in correspondence with the Lodges of Germany. But its meetings were suspended by a royal edict in September, 1775. In 1777 this edict was repealed at the instigation of the Queen, and Masonry was again tolerated. This toleration lasted, however, only for a brief period. In 1781 Ferdinand IV. renewed the edict of suppression, and from that time until the end of the century Freemasonry was subjected in Italy to the combined persecutions of the Church and State, and the Masons of Naples met only in secret. In 1793, after the French Revolution, many Lodges were openly organized. A Supreme Council of the Scottish Rite was established on the 11th of June, 1809, of which King Joachim was elected Grand Master, and the Grand Orient of Naples on the 24th of the same month. The fact that the Grand Orient worked according to the French Rite, and the Supreme Council according to the Scottish, caused dissensions between the two bodies, which, however, were finally healed. And on the 23d of May, 1811, a Concordat was established between the Supreme Council and the Grand Orient, by which the latter took the supervision of the degrees up to the Eighteenth, and the former of those from the Eighteenth to the Thirty-third. In October, 1812, King Joachim accepted the presidency of the Supreme Council as its Grand Commander. Both bodies became extinct in 1815, on the accession of the Bourbons.

Napoleon I. It has been claimed, and with much just reason, as shown in his course of life, that Napoleon the Great was a member of the Brotherhood, and it is said was initiated at Malta, between June 12 and July 19, 1798. The *Abeille Maçonnique* of 1829, and Clavel, in 1830, allege that he visited a Lodge incognito in Paris. His life indicated favor to the Fraternity, and in 1804 he appointed Joseph Buonaparte G. Master of the Grand Orient. Lucien and Louis Buonaparte were of the Fraternity, as also Jerome. Louis Napoleon III. was a member of the Supreme Council A. A. Scottish Rite of France.

Napoleonic Masonry. An Order under this name, called also the French Order of Noachites, was established at Paris, in 1816, by some of the adherents of the Emperor Napoleon. It was divided into three degrees: 1. Knight; 2. Commander; 3. Grand Elect. The last degree was subdivided into three points: i. Secret Judge; ii. Perfect Initiate; iii. Knight of the Crown of Oak. The mystical ladder in this Rite consisted of eight steps or stages, whose names were Adam, Eve, Noah, Lamech, Naamah, Peleg, Oubal, and Orient. The initials of these words, properly transposed, compose the word NAPOLEON, and this is enough to show the character of the system. General Bertrand was elected Grand Master, but, as he was then in the island of St. Helena, the Order was directed by a Supreme Commander and two Lieutenants. It was Masonic in form only, and lasted but for a few years.

Narbonne, Rite of. See *Primitive Rite.*

National Grand Lodge of Germany. The Royal Mother Lodge of the Three Globes, which had been established at Berlin in 1740, and recognized as a Grand Lodge by Frederick the Great in 1744, renounced the Rite of Strict Observance in 1771, and, declaring itself free and independent, assumed the title of "The Grand National Mother Lodge of the Three Globes," by which appellation it is still known.

The Grand Orient of France, among its first acts, established, as an integral part of itself, a National Grand Lodge of France, which was to take the place of the old Grand Lodge, which, it declared, had ceased to exist. But the year after, in 1773, the National Grand Lodge was suppressed by the power which had given it birth; and no such power is now recognized in French Masonry.

Naymus Grecus. The Grand Lodge, No. 1., MS. contains the following passage: "Yt befell that their was on' curious Masson that height [was called] Naymus Grecus that had byn at the making of Sallomon's Temple, and he came into ffraunce, and there he taught the science of Massonrey to men of ffraunce." Who was this "Naymus Grecus"? The writers of these old records of Masonry are notorious for the way in which they mangle all names and words that are in a foreign tongue. Hence it is impossible to say who or what is meant by this word. It is differently spelled in the various manuscripts: *Namas Grecious* in the Lansdowne, *Naymus Græcus* in the Sloane, *Grecus* alone in the Edinburgh-Kilwinning, and *Maymus Grecus* in the Dowland.* Anderson, in the second

* For a table of the various spellings, see *Ars Quatuor Coronatorum*, iii., 163.

edition of his *Constitutions* (1738, p. 16), calls him *Ninus*. Now, it would not be an altogether wild conjecture to suppose that some confused idea of Magna Græcia was floating in the minds of these unlettered Masons, especially since the Leland Manuscript records that in Magna Græcia Pythagoras established his school, and then sent Masons into France. Between *Magna Græcia* and *Maynus Grecus* the bridge is a short one, not greater than between Tubal-*cain* and *Wackan*, which we find in a German Middle Age document. The one being the name of a place and the other of a person would be no obstacle to these accommodating record writers; nor must we flinch at the anachronism of placing one of the disciples of Pythagoras at the building of the Solomonic Temple, when we remember that the same writers make Euclid and Abraham contemporaries.

Nazareth. A city of Galilee, in which our Savior spent his childhood and much of his life, and whence he is often called, in the New Testament, the Nazarene, or Jesus of Nazareth. *Jesus Nazarenus* was a portion of the inscription on the cross. (See *I. N. R. I.*) In the Rose Croix, Nazareth is a significant word, and Jesus is designated as "our Master of Nazareth," to indicate the origin and nature of the new dogmas on which the Order of the Rosy Cross was instituted.

Nebraska. Masonry was introduced into Nebraska in October, 1855, by a Charter from the Grand Lodge of Illinois to Nebraska Lodge. Two other Lodges were subsequently chartered by the Grand Lodges of Missouri and Iowa. In September, 1857, the Grand Lodge of Nebraska was organized by a convention of delegates from these three Lodges, and R. C. Jordan was elected Grand Master. The Grand Chapter was organized March 19, 1867. The Grand Commandery of Nebraska was instituted at Omaha, December 28, 1871.

Nebuchadnezzar. About 630 years B. C. the empire and city of Babylon were conquered by Nebuchadnezzar, the king of the Chaldeans, a nomadic race, who, descending from their homes in the Caucasian mountains, had overwhelmed the countries of Southern Asia. Nebuchadnezzar was engaged during his whole reign in wars of conquest. Among other nations who fell beneath his victorious arms was Judea, whose king, Jehoiakim, was slain by Nebuchadnezzar, and his son, Jehoiachin, ascended the Jewish throne. After a reign of three years, he was deposed by Nebuchadnezzar, and his kingdom given to his uncle, Zedekiah, a monarch distinguished for his vices. Having repeatedly rebelled against the Babylonian king, Nebuchadnezzar repaired to Jerusalem, and, after a siege of eighteen months, reduced it. The city was leveled with the ground, the Temple pillaged and burned, and the inhabitants carried captive to Babylon. These events are commemorated in the first section of the English and American Royal Arch system.

Nebuzaradan. A captain, or, as we would now call him, a general of Nebuchadnezzar, who commanded the Chaldean army at the siege of Jerusalem, and who executed the orders of his sovereign by the destruction of the city and Temple, and by carrying the inhabitants, except a few husbandmen, as captives to Babylon.

Negro Lodges. The subject of Lodges of colored persons, commonly called "Negro Lodges," was for many years a source of agitation in the United States, not on account, generally, of the color of the members of these Lodges, but on account of the supposed illegality of their Charters. The history of their organization was thoroughly investigated, many years ago, by Bro. Philip S. Tucker, of Vermont, and Charles W. Moore, of Massachusetts, and the result is here given, with the addition of certain facts derived from a statement made by the officers of the Lodge in 1827.

Prince Hall and thirteen other negroes were made Masons in a military Lodge in the British Army then at Boston, on March 6, 1775. When the Army was withdrawn these negroes applied to the Grand Lodge of England for a Charter and on the 20th of September, 1784, a Charter for a Master's Lodge was granted, although not received until 1787, to Prince Hall and others, all colored men, under the authority of the Grand Lodge of England. The Lodge bore the name of "African Lodge, No. 429," and was situated in the city of Boston. This Lodge ceased its connection with the Grand Lodge of England for many years, and about the beginning of the present century its registration was stricken from the rolls of the United Grand Lodge of England, when new lists were made as were many other Lodges in distant parts of the world, its legal existence, in the meantime, never having been recognized by the Grand Lodge of Massachusetts, to which body it had always refused to acknowledge allegiance.

After the death of Hall and his colleagues, to whom the Charter had been granted, the Lodge, for want of some one to conduct its affairs, fell into abeyance, or, to use the technical phrase, became dormant. After some years it was revived, but by whom, or under what process of Masonic law, is not stated, and information of the revival given to the Grand Lodge of England, but no reply or recognition was received from that body. After some hesitation as to what would be the proper course to pursue, they came to the conclusion, as they have themselves stated, "that, with what knowledge they possessed of Masonry, and as people of color by themselves, they were, and ought by rights to be, free and independent of other Lodges." Accordingly, on the 18th of June, 1827, they issued a protocol, in which they said: "We publicly declare ourselves free and independent of any Lodge from this day, and we will not be tributary or governed by any Lodge but that of our own."

They soon after assumed the name of the "Prince Hall Grand Lodge," and issued Charters for the constitution of subordinates, and from it have proceeded all the Lodges of colored persons now existing in the United States.

Admitting even the legality of the English Charter of 1784—it will be seen that there was already a Masonic authority in Massachusetts upon whose prerogatives of jurisdiction such Charter was an invasion—it cannot be denied that the unrecognized self-revival of 1827, and the subsequent assumption of Grand Lodge powers, were illegal, and rendered both the Prince Hall Grand Lodge and all the Lodges which emanated from it clandestine. And this has been the unanimous opinion of all Masonic jurists in America.

[However, Masonry has spread among the negroes until now they have Lodges and Grand Lodges in most of the States and in Canada and Liberia. As they wear emblems of all the other bodies it is presumable they have them as well.]

Neighbor. All the Old Constitutions have the charge that "every Mason shall keep true counsel of Lodge and Chamber." (Sloane MS., No. 3848.) This is enlarged in the Andersonian Charges of 1722 thus: "You are not to let your family, friends, and *neighbours* know the concerns of the Lodge." (*Constitutions*, 1723, p. 55.) However loquacious a Mason may be in the natural confidence of neighborhood intercourse, he must be reserved in all that relates to the esoteric concerns of Masonry.

Neith. The Egyptian synonym of the Greek Athené or Minerva.

Nekam. נקם. But properly according to the Masoretic pointing, **NAKAM.** A Hebrew word signifying *Vengeance*, and a significant word in the high degrees. (See *Vengeance.*)

Nekamah. נקמה. Hebrew, signifying *Vengeance*, and, like *Nakam*, a significant word in the high degrees.

Nembroth. A corruption of Nimrod, frequently used in the Old Records.

Nemesis. According to Hesiod, the daughter of Night, originally the personification of the moral feeling of right and a just fear of criminal actions; in other words, Conscience. A temple was erected to Nemesis at Attica. She was at times called Adrastea and Rhamnusia, and represented in the earliest days a young virgin like unto Venus; at a later period, as older and holding a helm and wheel. At Rhamnus there was a statue of Nemesis of Parian marble executed by Phidias. The festival in Greece held in her honor was called Nemesia.

Neocorus. A name of the guardian of the Temple.

Neophyte. Greek, *νέοφυτος, newly planted.* In the primitive church, it signified one who had recently abandoned Judaism or Paganism and embraced Christianity; and in the Roman Church those recently admitted into its communion are still so called. Hence it has also been applied to the young disciple of any art or science. Thus Ben Jonson calls a young actor, at his first entrance "on the boards," a *neophyte player.* In Freemasonry the newly initiated and uninstructed candidate is sometimes so designated.

Neoplatonism. A philosophical school, founded at Alexandria in Egypt, which added to the theosophic theories of Plato many mystical doctrines borrowed from the East. The principal disciples of this school were Philo-Judæus, Plotinus, Porphyry, Jamblichus, Proclus, and Julian the Apostate. Much of the symbolic teaching of the higher degrees of Masonry has been derived from the school of the Neoplatonists, especially from the writings of Jamblichus and Philo-Judæus.

Nephalia. Festivals, without wine, celebrated in honor of the lesser deities.

Nergal. (Heb. נרגל.) The synonym of misfortune and ill-luck. The Hebrew name for Mars; and in astrology the lesser Malefic. The word in Sanskrit is *Nrigal.*

Ne plus ultra. Latin. *Nothing more beyond.* The motto adopted for the degree of Kadosh by its founders, when it was supposed to be the summit of Masonry, beyond which there was nothing more to be sought. And, although higher degrees have been since added, the motto is still retained.

Netherlands. Speculative Masonry was first introduced in the Netherlands by the opening at The Hague, in 1731, of an occasional Lodge under a Deputation granted by Lord Lovel, G. M. of England, of which Dr. Desaguliers was Master, for the purpose of conferring the First and Second degrees on the Duke of Lorraine, afterward the Emperor Francis I. He received the Third Degree subsequently in England. But it was not until September 30, 1734, that a regular Lodge was opened by Bro. Vincent de la Chapelle, as Grand Master of the United Provinces, who may therefore be regarded as the originator of Masonry in the Netherlands. In 1735, this Lodge received a Patent or Deputation from the Grand Lodge of England, John Cornelius Rademaker being appointed Provincial Grand Master, and several daughter Lodges were established by it. In the same year the States General prohibited all Masonic meetings by an edict issued November 30, 1735. The Roman clergy actively persecuted the Masons, which seems to have produced a reaction, for in 1737 the magistrates repealed the edict of suppression, and forbade the clergy from any interference with the Order, after which Masonry flourished in the United Provinces. The Masonic innovations and controversies that had affected the rest of the continent never successfully obtruded on the Dutch Masons, who practised with great fidelity the simple rite of the Grand Lodge of England, although an attempt had been made in 1757 to introduce them. In 1798, the Grand Lodge adopted a Book of Statutes, by which it accepted the three Symbolic degrees, and referred the four high degrees of the French Rite to a Grand Chapter. In 1816, Prince Frederick attempted a reform in the degrees, which was, however, only partially successful. The Grand Lodge

of the Netherlands, whose Orient is at The Hague, tolerates the high degrees without actually recognizing them. Most of the Lodges confine themselves to the Symbolic degrees of St. John's Masonry, while a few practise the reformed system of Prince Frederick.

Network. One of the decorations of the pillars at the porch of the Temple. (See *Pillars of the Porch.*)

Nevada. Nevada was originally a part of California, and when separated from it in 1865, there were eight Lodges in it working under Charters from the Grand Lodge of California. These Lodges in that year held a convention at Virginia, and organized the Grand Lodge of Nevada.

Ne Varietur. Latin. *Lest it should be changed.* These words refer to the Masonic usage of requiring a Brother, when he receives a certificate from a Lodge, to affix his name, in his own handwriting, in the margin, as a precautionary measure, which enables distant brethren, by a comparison of the handwriting, to recognize the true and original owner of the certificate, and to detect any impostor who may surreptitiously have obtained one.

New Brunswick. Freemasonry was introduced into this province about the middle of the last century by both the Grand Lodges of Scotland and England, and afterward by that of Ireland. The former two bodies appointed, at a later period, Provincial Grand Masters, and in 1844 the Provincial Grand Lodge of Nova Scotia and New Brunswick was organized on the registry of Scotland. The province of New Brunswick becoming an independent portion of the Dominion of Canada, a Grand Lodge was established in October, 1867, by a majority of the Lodges of the territory, and B. Lester Peters was elected Grand Master. Capitular, Cryptic, and Templar Masonry each have bodies in the Province.

Newfoundland. The Ancient Colony of Newfoundland still remains without the Confederation of the Canadian Provinces. Masonry in this island dates back to 1746, the first Warrant being granted by the Provincial Grand Lodge at Boston. Bro. J. Lane's list gives six Lodges warranted in the eighteenth century. The Grand Lodge of the Ancients (England) is credited with four—one in 1774 and three in 1788—and the Grand Lodge of England (Moderns) with two—one each in 1784 and 1785. Nine others were chartered by the present Grand Lodge of England up to 1881, a number still remaining active.

New Hampshire. Freemasonry was introduced into New Hampshire in June, 1734, by the constitution of St. John's Lodge at Portsmouth, under a Charter from the Grand Lodge of Massachusetts. Several other Lodges were subsequently constituted by the same authority. In 1789 a convention of these Lodges was held at Dartmouth, and the Grand Lodge of New Hampshire organized, and John Sullivan, the President of the State, was elected Grand Master. A Grand Chapter was organized in 1819, and a Grand Commandery in 1860.

New Jersey. The history of Freemasonry in New Jersey prior to the establishment of the Grand Lodge in A.D. 1786, was involved in such obscurity that only by the diligence and perseverance of the late Grand Secretary Joseph H. Hough, and the cooperation of an intelligent historical committee, has it been possible to ascertain and collate the fragmentary and scanty data into a sequent, albeit incomplete, narrative.

The general upturning due to the Revolutionary War, the unsettled conditions which prevailed for many years, and the infrequency of opportunity for Masonic meetings, must account for the dispersion of such records as were kept, and suggest why it was that the information contained in the earlier works purporting to be Masonic history was so brief and unsatisfactory as to appear to be traditional rather than authentic. The researches of this committee of the Grand Lodge of New Jersey have removed much of the obscurity surrounding the few obtainable facts.

It proved the issue of the first deputation by the Duke of Norfolk, then Grand Master of England, to Daniel Coxe, on June 5, 1730, empowering the latter as "Provincial Grand Master of the Provinces of New York, New Jersey and Pensilvania, in America." Diligent search in the archives of the Grand Lodge of England, and thorough inquiry for the letters and papers bearing upon the subject among the descendants of Bro. Coxe, failed to disclose any testimony whatever of the exercise by him, or by anyone acting under his authority, of the prerogatives contained in that deputation. The chronological fact remains, however, that Daniel Coxe was the first appointed Provincial Grand Master of Masons in the new world.

The establishment of the first Lodges in New Jersey appears to be recorded as follows: The Provincial Grand Master of New York, George Harrison, issued a warrant erecting a Lodge in the city of Newark, dated May 13, 1761, and although the minutes of this Lodge are not continuous, and the meetings were intermitted, once, apparently for sixteen years, yet it survives, venerated and held in high regard for its honorable history, as St. John's Lodge, No. 1, upon the present register.

A year later Provincial Grand Master Jeremy Gridley of Massachusetts procured the issue of a deputation to erect Temple Lodge, No. I in Elizabethtown, dated June 24, 1762, and on December 27, 1763, the same Grand Lodge granted a petition for the erection of a Lodge by the name of St. John's, at Princeton. No record of the actual transactions of these two Lodges has been discovered, but the late Recording Grand Secretary of Massachusetts, was the sufficient authority for the averment that both Lodges had been duly organized, and did Masonic work, evidenced by documents regarding them, which were subsequently destroyed in the burning of the Masonic Temple in Boston in 1865. After an interval of three years, Provincial Grand Master Ball of Pennsylvania warranted a

Lodge at Baskingridge, N. J., as No. 10, on the register of Pennsylvania, another was warranted in 1779 at Middletown, and in 1781 Burlington Lodge, No. 32, was given existence.

A word as to the organization of the Grand Lodge of New Jersey. A convention of Free and Accepted Masons was held pursuant to notice in the city of New Brunswick on December 18, 1786, and "being Master Masons, as every one of them find upon strict trial and due examination, and residing in the state of New Jersey, taking into consideration the propriety and necessity of forming a Grand Lodge of F. & A. M. of the state of New Jersey, do hereby unanimously nominate and elect the following Master Masons to the several offices following, to wit."

The civic titles of the respective officers follow: Chief Justice, Vice President of New Jersey, late High Sheriff, Representative in the Assembly, late Colonel in the Army of the U. S., Clerk of the General Assembly and another High Sheriff.

Individual Masons therefore, not Lodges, had the honor of establishing this Grand Lodge, the complete records of which, carefully preserved, are in print and available for information respecting the growth of the Fraternity in New Jersey.

The Grand Chapter was organized at Burlington, December 30, 1856; the Grand Council, November 26, 1860; and the Grand Commandery, February 14, 1860. [R. A. S.]

New Mexico. The Grand Lodge of Missouri issued warrants to the following Lodges in New Mexico, viz.: Aztec Lodge, No. 108; Chapman Lodge, No. 95; and Montezuma Lodge, No. 109.

These Lodges met in convention, August 6, 1877, at Santa Fé, for the purpose of discussing the question of forming a Grand Lodge. Bro. Simon B. Newcomb presided. The committee on credentials found the representatives of the three above-mentioned Lodges to be present.

The next day a Constitution and By-Laws were adopted, the Grand Officers were elected and installed, Bro. Wm. W. Griffin being M. W. Grand Master, and David J. Miller R. W. Grand Secretary.

New Templars. An Order of five degrees instituted in France in the early part of this century. The degrees were termed—Initiati; Intimi Initiati; Adepti; Orientales Adepti; and Magnæ aquilæ nigræ sancti Johannes Apostoli Adepti.

New York. The first Deputation for the American Colonies was that of Daniel Coxe by the Duke of Norfolk, for the Provinces of New York, New Jersey and Pennsylvania, and was for two years. There are no authentic records that he exercised his authority. Richard Riggs was appointed by the Earl of Darnley, November 15, 1737, but, as with his predecessor, there are no records extant except newspaper notices of meetings of "the Lodge." Francis Goelet was appointed by Lord Byron in 1751, and was succeeded by George Harrison, appointed June 9, 1753, by Lord Carysfort. Harrison chartered Lodges in New York, New Jersey, Connecticut, and Michigan. Sir John Johnson was appointed by Lord Blany in 1767, but did not assume office until 1771, and was the last of the "Modern" Provincial Grand Masters. The present Grand Lodge was organized December 15, 1782, under a Provincial Grand Warrant from the "Atholl" Grand Lodge, dated September 5, 1781, declared its independence June 6, 1787, and assumed the title of the "Grand Lodge of Free and Accepted Masons of the State of New York." There have been four schisms, all of which were creditably adjusted. A Grand Chapter was organized in 1783, which had but a short existence and was succeeded by the present Grand Chapter March 4, 1798. The Grand Commandery was organized June 18, 1814, and the Grand Council Royal and Select Masters January 25, 1823. The Supreme Council, Northern Jurisdiction, A. A. S. R. was organized by Emmanuel De La Motta in New York City in 1813, but was preceded by a Lodge of Perfection at Albany. N. Y., in 1767. [W. J. A.]

Nick. (Danish, *Nikken.*) The spirit of the waters, an enemy of man, the devil, or in the vulgate "Old Nick."

Nicolai, Christoph Friedrich. Christopher Frederick Nicolai, author of a very interesting essay on the origin of the Society of Freemasons, was a bookseller of Berlin, and one of the most distinguished of the German savants of that Augustan age of German literature in which he lived. He was born at Berlin on the 18th of March, 1733, and died in the same city on the 8th of January, 1811. He was the editor of, and an industrious contributor to, two German periodicals of high literary character, a learned writer on various subjects of science and philosophy, and the intimate friend of Lessing, whose works he edited, and of the illustrious Mendelssohn.

In 1782–3, he published a work with the following title: *Versuch über die Beschuldigungen welche dem Tempelherrnorden gemacht worden und über dessen Geheimniss; nebst einem Anhange über das Entstehen der Freimaurergesellschaft;* i. e., "An Essay on the accusations made against the Order of Knights Templars and their mystery; with an Appendix on the origin of the Fraternity of Freemasons." In this work Nicolai advanced his peculiar theory on the origin of Freemasonry, which is substantially as follows:

Lord Bacon, taking certain hints from the writings of Andreä, the founder of Rosicrucianism and his English disciple, Fludd, on the subject of the regeneration of the world, proposed to accomplish the same object, but by a different and entirely opposite method. For, whereas, they explained everything esoterically, Bacon's plan was to abolish all distinction between the esoteric and the exoteric, and to demonstrate everything by proofs from nature. This idea he first promulgated in his *Instauratio Magna*, but afterward more fully developed in his *New Atlantis*. In this latter work, he introduced his beautiful apo-

logue, abounding in Masonic ideas, in which he described the unknown island of Bensalem, where a king had built a large edifice, called after himself, Solomon's House. Charles I., it is said, had been much attracted by this idea, and had intended to found something of the kind upon the plan of Solomon's Temple, but the occurrence of the Civil War prevented the execution of the project.

The idea lay for some time dormant, but was subsequently revived, in 1646, by Wallis, Wilkins, and several other learned men, who established the Royal Society for the purpose of carrying out Bacon's plan of communicating to the world scientific and philosophical truths. About the same time another society was formed by other learned men, who sought to arrive at truth by the investigations of alchemy and astrology. To this society such men as Ashmole and Lily were attached, and they resolved to construct a House of Solomon in the island of Bensalem, where they might communicate their instructions by means of secret symbols. To cover their mysterious designs, they got themselves admitted into the Masons' Company, and held their meetings at Masons' Hall, in Masons' Alley, Basinghall Street. As freemen of London, they took the name of Freemasons, and naturally adopted the Masonic implements as symbols. Although this association, like the Royal Society, sought, but by a different method, to inculcate the principles of natural science and philosophy, it subsequently took a political direction. Most of its members were strongly opposed to the puritanism of the dominant party and were in favor of the royal cause, and hence their meetings, ostensibly held for the purpose of scientific investigation, were really used to conceal their secret political efforts to restore the exiled house of Stuart. From this society, which subsequently underwent a decadence, sprang the revival in 1717, which culminated in the establishment of the Grand Lodge of England.

Such was the theory of Nicolai. Few will be found at the present day to concur in all his views, yet none can refuse to award to him the praise of independence of opinion, originality of thought, and an entire avoidance of the beaten paths of hearsay testimony and unsupported tradition. His results may be rejected, but his method of attaining them must be commended.

Nicotiates, Order of. A secret order mentioned by Clavel, teaching the doctrines of Pythagoras.

Night. Lodges, all over the world, meet, except on special occasions, at night. In this selection of the hours of night and darkness for initiation, the usual coincidence will be found between the ceremonies of Freemasonry and those of the Ancient Mysteries, showing their evident derivation from a common origin. Justin says that at Eleusis, Triptolemus invented the art of sowing corn, and that, in honor of this invention, the nights were consecrated to initiation. The application is, however, rather abstruse.

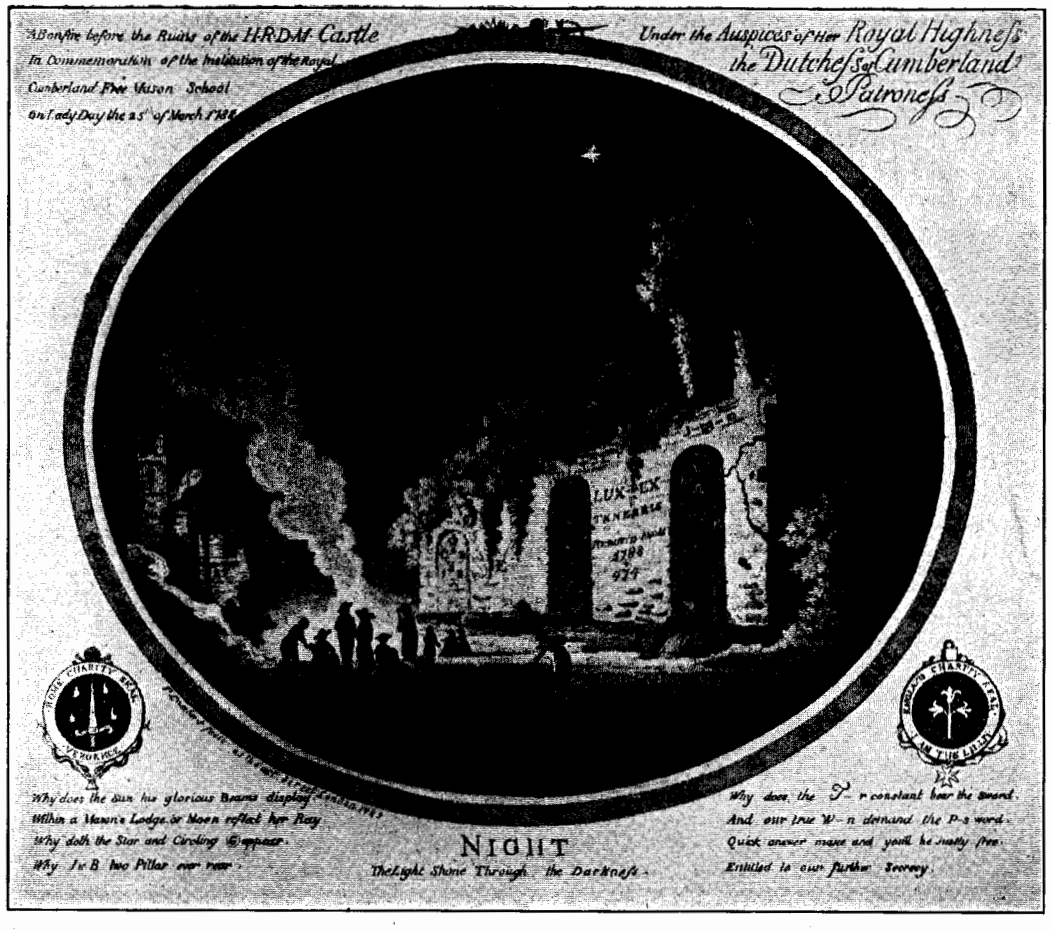
In the *Bacchæ* of Euripides, that author introduces the god Bacchus, the supposed inventor of the Dionysian mysteries, as replying to the question of King Pentheus in the following words:

ΠΕΝ. Τὰ δ'ἱερὰ νύκτωρ, ἢ μεθ' ἡμέραν τελεῖς;
ΔΘΙ. Νύκτωρ τα πολλὰ σεμνότητ' ἔχει σκότος.
Eurip. Bacch. Act II., l. 485.

"*Pentheus.*—By night or day, these sacred rites perform'st thou?
Bacchus.—Mostly by night, for venerable is darkness";

and in all the other mysteries the same reason was assigned for nocturnal celebrations, since night and darkness have something solemn and august in them which is disposed to fill the mind with sacred awe. And hence black, as an emblem of darkness and night, was considered as the color appropriate to the mysteries.

In the mysteries of Hindustan, the candidate for initiation, having been duly prepared by previous purifications, was led at the dead of night to the gloomy cavern, in which the mystic rites were performed.



The same period of darkness was adopted for the celebration of the mysteries of Mithras, in Persia. Among the Druids of Britain and Gaul, the principal annual initiation commenced at "low twelve," or midnight of the eve of May-day. In short, it is indisputable that the initiations in all the Ancient Mysteries were nocturnal in their character.

The reason given by the ancients for this selection of night as the time for initiation, is equally applicable to the system of Freemasonry. "Darkness," says Oliver, "was an emblem of death, and death was a prelude to resurrection. It will be at once seen, therefore, in what manner the doctrine of the resurrection was inculcated and exemplified in these remarkable institutions."

Death and the resurrection were the doctrines taught in the Ancient Mysteries; and night and darkness were necessary to add to the sacred awe and reverence which these doctrines ought always to inspire in the rational and contemplative mind. The same doctrines form the very groundwork of Freemasonry; and as the Master Mason, to use the language of Hutchinson, "represents a man saved from the grave of iniquity and raised to the faith of salvation," darkness and night are the appropriate accompaniments to the solemn ceremonies which demonstrate this profession.

Nihongi. ("Chronicles of Nihon.") The companion of the Kojiki; the two works together forming the doctrinal and historic basis of Sintonism. The Japanese adherents of Sinsyn are termed Sintus, or Sintoos, who worship the gods, the chief of which is Ten-sio-dai-yin. The Nihongi was composed about 720 A.D., with the evident design of giving a Chinese coloring to the subject-matter of the Kojiki, upon which it is founded.

Nile. There is a tradition in the old Masonic Records that the inundations of the river

A Bonfire before the Ruins of the H.R.D.M. Castle

Why the B. two Pillar ever rear
NIGHT
The Light Shone Through the Darkness
Why does the P-r constant hear the Sound.
And our true W-n demand the P-s word.
Quick answer make and youll be justly free.
Entitled to our further Secrecy.

Nile, in Egypt, continually destroying the perishable landmarks by which one man could distinguish his possessions from those of another, Euclid instructed the people in the art of geometry, by which they might measure their lands; and then taught them to bound them with walls and ditches, so that after an inundation each man could identify his own boundaries.

The tradition is given in the Cooke MS. thus: "Euclyde was one of the first founders of Geometry, and he gave hit name, for in his tyme there was a water in that lond of Egypt that is called Nilo, and hit flowid so ferre into the londe that men myght not dwelle therein. Then this worthi clerke Enclide taught hem to make grete wallys and diches to holde owt the watyr, and he by Gemetria mesured the londe and departyd hit in divers partys, and made every man to close his owne parte with walles and diches." (Lines 455–472.) This legend of the origin of the art of geometry was borrowed by the old Operative Masons from the *Origines* of St. Isidore of Seville, where a similar story is told.

Nil nisi clavis deest. Latin. *Nothing but the key is wanting.* A motto or device often attached to the double triangle of Royal Arch Masonry. It is inscribed on the Royal Arch badge or jewel of the Grand Chapter of Scotland, the other devices being a double triangle and a triple tau.

Nimrod. The legend of the Craft in the Old Constitutions refers to Nimrod as one of the founders of Masonry. Thus in the York MS., No. 1, we read: "At ye makeing of ye Toure of Babell there was Masonrie first much esteemed of, and the King of Babilon yt was called Nimrod was A mason himselfe and loved well Masons." And the Cooke MS. thus repeats the story: "And this same Nembroth began the towre of babilon and he taught to his werkemen the craft of Masonrie, and he had with him many Masons more than forty thousand. And he loved and cherished them well." (Line 343.) The idea no doubt sprang out of the Scriptural teaching that Nimrod was the architect of many cities; a statement not so well expressed in the authorized version, as it is in the improved one of Bochart, which says: "From that land Nimrod went forth to Asshur, and builded Nineveh, and Rehoboth city, and Calah, and Resen between Nineveh and Calah, that is the great city."

Nine. If the number three was celebrated among the ancient sages, that of three times three had no less celebrity; because, according to them, each of the three elements which constitute our bodies is ternary: the water containing earth and fire; the earth containing igneous and aqueous particles; and the fire being tempered by globules of water and terrestrial corpuscles which serve to feed it. No one of the three elements being entirely separated from the others, all material beings composed of these three elements, whereof each is triple, may be designated by the figurative number of three times three, which has become the symbol of all formations of bodies. Hence the name of ninth envelop given to matter. Every material extension, every circular line, has for its representative sign the number nine among the Pythagoreans, who had observed the property which this number possesses of reproducing itself incessantly and entire in every multiplication; thus offering to the mind a very striking emblem of matter, which is incessantly composed before our eyes, after having undergone a thousand decompositions.

The number nine was consecrated to the Spheres and the Muses. It is the sign of every circumference; because a circle or 360 degrees is equal to 9, that is to say, $3 + 6 + 0 = 9$. Nevertheless, the ancients regarded this number with a sort of terror; they considered it a bad presage; as the symbol of versatility, of change, and the emblem of the frailty of human affairs. Wherefore they avoided all numbers where nine appears, and chiefly 81, the produce of 9 multiplied by itself, and the addition whereof, $8 + 1$, again presents the number 9.

As the figure of the number 6 was the symbol of the terrestrial globe, animated by a Divine spirit, the figure of the number 9 symbolized the earth, under the influence of the Evil Principle; and thence the terror it inspired. Nevertheless, according to the Kabbalists, the cipher 9 symbolizes the generative egg, or the image of a little globular being, from whose lower side seems to flow its spirit of life.

The Ennead, signifying an aggregate of nine things or persons, is the first square of unequal numbers.

Everyone is aware of the singular properties of the number 9, which, multiplied by itself or any other number whatever, gives a result whose final sum is always 9, or always divisible by 9.

9, multiplied by each of the ordinary numbers, produces an arithmetical progression, each member whereof, composed of two figures, presents a remarkable fact; for example:

1 . 2 . 3 . 4 . 5 . 6 . 7 . 8 . 9 . 10
9 . 18 . 27 . 36 . 45 . 54 . 63 . 72 . 81 . 90

The first line of figures gives the regular series, from 1 to 10.

The second reproduces this line doubly; first ascending from the first figure of 18, and then returning from the second figure of 81.

In Freemasonry, 9 derives its value from its being the product of 3 multiplied into itself, and consequently in Masonic language the number 9 is always denoted by the expression 3 times 3. For a similar reason, 27, which is 3 times 9, and 81, which is 9 times 9, are esteemed as sacred numbers in the higher degrees.

Nineveh. The capital of the ancient kingdom of Assyria, and built by Nimrod. The traditions of its greatness and the magnificence of its buildings were familiar to the

Arabs, the Greeks, and the Romans. The modern discoveries of Rich, of Botta, and other explorers, have thrown much light upon its ancient condition, and have shown that it was the seat of much architectural splendor and of a profoundly symbolical religion, which had something of the characteristics of the Mithraic worship. In the mythical relations of the Old Constitutions, which make up the legend of the Craft, it is spoken of as the ancient birthplace of Masonry, where Nimrod, who was its builder, and "was a Mason and loved well the Craft," employed 60,000 Masons to build it, and gave them a charge "that they should be true," and this, says the Harleian MS., No. 1942, was the first time that any Mason had any charge of Craft.

Nisan. נִיסָן. The seventh month of the Hebrew civil year, and corresponding to the months of March and April, commencing with the new moon of the former.

Noachidæ. The descendants of Noah. A term applied to Freemasons on the theory, derived from the "legend of the Craft," that Noah was the father and founder of the Masonic system of theology. And hence the Freemasons claim to be his descendants, because in times past they preserved the pure principles of his religion amid the corruptions of surrounding faiths.

Dr. Anderson first used the word in this sense in the second edition of the *Book of Constitutions:* "A Mason is obliged by his tenure to observe the moral law as a true Noachida." But he was not the inventor of the term, for it occurs in a letter sent by the Grand Lodge of England to the Grand Lodge of Calcutta in 1735, which letter is preserved among the Rawlinson MSS. in the Bodleian Library, Oxford. (See *Ars Quatuor Coronatorum*, xi., 35.)

Noachite, or Prussian Knight. (*Noachite ou Chevalier Prussien.*) 1. The Twenty-first Degree of the Ancient and Accepted Scottish Rite. The history as well as the character of this degree is a very singular one. It is totally unconnected with the series of Masonic degrees which are founded upon the Temple of Solomon, and is traced to the tower of Babel. Hence the Prussian Knights call themselves Noachites, or Disciples of Noah, while they designate all other Masons as Hiramites, or Disciples of Hiram. The early French rituals state that the degree was translated in 1757 from the German by M. de Beraye, Knight of Eloquence in the Lodge of the Count St. Gelaire, Inspector-General of Prussian Lodges in France. Lenning gives no credit to this statement, but admits that the origin of the degree must be attributed to the year above named. The destruction of the tower of Babel constitutes the legend of the degree, whose mythical founder is said to have been Peleg, the chief builder of that edifice. A singular regulation is that there shall be no artificial light in the Lodge room, and that the meetings shall be held on the night of the full moon of each month.

The degree was adopted by the Council of Emperors of the East and West, and in that way became subsequently a part of the system of the Scottish Rite. But it is misplaced in any series of degrees supposed to emanate from the Solomonic Temple. It is, as an unfitting link, an unsightly interruption of the chain of legendary symbolism substituting Noah for Solomon, and Peleg for Hiram Abif. The Supreme Council for the Southern Jurisdiction has abandoned the original ritual and made the degree a representation of the Vehmgericht or Westphalian Franc Judges. But this by no means relieves the degree of the objection of Masonic incompatibility. That it was ever adopted into the Masonic system is only to be attributed to the passion for high degrees which prevailed in France in the middle of the last century.

In the modern ritual the meetings are called Grand Chapters. The officers are a Lieutenant Commander, two Wardens, an Orator, Treasurer, Secretary, Master of Ceremonies, Warder, and Standard-Bearer. The apron is yellow, inscribed with an arm holding a sword and the Egyptian figure of silence. The order is black, and the jewel a full moon or a triangle traversed by an arrow. In the original ritual there is a coat of arms belonging to the degree, which is thus emblazoned: Party per fess; in chief, *azure*, semé of stars, *or* a full moon, *argent;* in base, *sable*, an equilateral triangle, having an arrow suspended from its upper point, barb downward, *or*.

The legend of the degree describes the travels of Peleg from Babel to the north of Europe, and ends with the following narrative: "In trenching the rubbish of the salt-mines of Prussia was found in A. D. 553, at a depth of fifteen cubits, the appearance of a triangular building in which was a column of white marble, on which was written in Hebrew the whole history of the Noachites. At the side of this column was a tomb of freestone on which was a piece of agate inscribed with the following epitaph: Here rest the ashes of Peleg, our Grand Architect of the tower of Babel. The Almighty had pity on him because he became humble."

This legend, although wholly untenable on historic grounds, is not absolutely puerile. The dispersion of the human race in the time of Peleg had always been a topic of discussion among the learned. Long dissertations had been written to show that all the nations of the world, even America, had been peopled by the three sons of Noah and their descendants. The object of the legend seems, then, to have been to impress the idea of the thorough dispersion. The fundamental idea of the degree is, under the symbol of Peleg, to teach the crime of assumption and the virtue of humility.

2. The degree was also adopted into the Rite of Mizraim, where it is the Thirty-fifth.

Noachite, Sovereign. (*Noachite Souverain.*) A degree contained in the nomenclature of Fustier.

Noachites. The same as *Noachidæ*, which see.

Noah. In all the old Masonic manuscript Constitutions that are extant, Noah and the flood play an important part in the "Legend of the Craft." Hence, as the Masonic system became developed, the Patriarch was looked upon as what was called a patron of Masonry. And this connection of Noah with the mythic history of the Order was rendered still closer by the influence of many symbols borrowed from the Arkite worship, one of the most predominant of the ancient faiths. So intimately were incorporated the legends of Noah with the legends of Masonry that Freemasons began, at length, to be called, and are still called, "Noachidæ," or the descendants of Noah, a term first applied by Anderson, and very frequently used at the present day.

It is necessary, therefore, that every scholar who desires to investigate the legendary symbolism of Freemasonry should make himself acquainted with the Noachic myths upon which much of it is founded. Dr. Oliver, it is true, accepted them all with a childlike faith; but it is not likely that the skeptical inquirers of the present day will attribute to them any character of authenticity. Yet they are interesting, because they show us the growth of legends out of symbols, and they are instructive because they are for the most part symbolic.

The "Legend of the Craft" tells us that the three sons of Lamech and his daughter, Naamah, "did know that God would take vengeance for sin, either by fire or water; wherefore they wrote these sciences which they had found in two pillars of stone, that they might be found after the flood." Subsequently, this legend took a different form, and to Enoch was attributed the precaution of burying the stone of foundation in the bosom of Mount Moriah, and of erecting the two pillars above it.

The first Masonic myth referring to Noah that presents itself is one which tells us that, while he was piously engaged in the task of exhorting his contemporaries to repentance, his attention had often been directed to the pillars which Enoch had erected on Mount Moriah. By diligent search he at length detected the entrance to the subterranean vault, and, on pursuing his inquiries, discovered the stone of foundation, although he was unable to comprehend the mystical characters there deposited. Leaving these, therefore, where he had found them, he simply took away the stone of foundation on which they had been deposited, and placed it in the ark as a convenient altar.

Another myth, preserved in one of the ineffable degrees, informs us that the ark was built of cedars which grew upon Mount Lebanon, and that Noah employed the Sidonians to cut them down, under the superintendence of Japheth. The successors of these Sidonians, in after times, according to the same tradition, were employed by King Solomon to fell and prepare cedars on the same mountain for his stupendous Temple.

The record of Genesis lays the foundation for another series of symbolic myths connected with the dove, which has thus been introduced into Masonry.

After forty days, when Noah opened the window of the ark that he might learn if the waters had subsided, he despatched a raven, which, returning, gave him no satisfactory information. He then sent forth a dove three several times, at an interval of seven days between each excursion. The first time, the dove, finding no resting-place, quickly returned; the second time she came back in the evening, bringing in her mouth an olive-leaf, which showed that the waters must have sufficiently abated to have exposed the tops of the trees; but on the third departure, the dry land being entirely uncovered, she returned no more.

In the Arkite rites, which arose after the dispersion of Babel, the dove was always considered as a sacred bird, in commemoration of its having been the first discoverer of land. Its name, which in Hebrew is *ionah*, was given to one of the earliest nations of the earth; and, as the emblem of peace and good fortune, it became the bird of Venus. Modern Masons have commemorated the messenger of Noah in the honorary degree of "Ark and Dove," which is sometimes conferred on Royal Arch Masons.

On the 27th day of the second month, equivalent to the 12th of November, in the year of the world 1657, Noah, with his family, left the ark. It was exactly one year of 365 days, or just one revolution of the sun, that the patriarch was enclosed in the ark. This was not unobserved by the descendants of Noah, and hence, in consequence of Enoch's life of 365 days, and Noah's residence in the ark for the same apparently mystic period, the Noachites confounded the worship of the solar orb with the idolatrous adoration which they paid to the patriarchs who were saved from the deluge. They were led to this, too, from an additional reason, that Noah, as the restorer of the human race, seemed, in some sort, to be a type of the regenerating powers of the sun.

So important an event as the deluge, must have produced a most impressive effect upon the religious dogmas and rites of the nations which succeeded it. Consequently, we shall find some allusion to it in the annals of every people and some memorial of the principal circumstances connected with it, in their religious observances. At first, it is to be supposed that a veneration for the character of the second parent of the human race must have been long preserved by his descendants. Nor would they have been unmindful of the proper reverence due to that sacred vessel—sacred in their eyes—which had preserved their great progenitor from the fury of the waters. "They would long cherish," says Alwood (*Lit. Antiq. of Greece*, p. 182), "the memory of those worthies who were rescued from the common lot of utter ruin; they would call to mind, with an extravagance of admiration, the means adopted for their pres-

ervation; they would adore the wisdom which contrived, and the goodness which prompted to, the execution of such a plan." So pious a feeling would exist, and be circumscribed within its proper limits of reverential gratitude, while the legends of the deluge continued to be preserved in their purity, and while the Divine preserver of Noah was remembered as the one god of his posterity. But when, by the confusion and dispersion at Babel, the true teachings of Enoch and Noah were lost, and idolatry or polytheism was substituted for the ancient faith, then Noah became a god, worshiped under different names in different countries, and the ark was transformed into the temple of the Deity. Hence arose those peculiar systems of initiations which, known under the name of the "Arkite rites," formed a part of the worship of the ancient world, and traces of which are to be found in almost all the old systems of religion.

It was in the six hundredth year of his age, that Noah, with his family, was released from the ark. Grateful for his preservation, he erected an altar and prepared a sacrifice of thank-offerings to the Deity. A Masonic tradition says, that for this purpose he made use of that stone of foundation which he had discovered in the subterranean vault of Enoch, and which he had carried with him into the ark. It was at this time that God made his covenant with Noah, and promised him that the earth should never again be destroyed by a flood. Here, too, he received those commandments for the government of himself and his posterity which have been called "the seven precepts of the Noachidæ."

It is to be supposed that Noah and his immediate descendants continued to live for many years in the neighborhood of the mountain upon which the ark had been thrown by the subsidence of the waters. There is indeed no evidence that the patriarch ever removed from it. In the nine hundred and fiftieth year of his age he died, and, according to the tradition of the Orientalists, was buried in the land of Mesopotamia. During that period of his life which was subsequent to the deluge, he continued to instruct his children in the great truths of religion. Hence, Masons are sometimes called Noachidæ, or the sons of Noah, to designate them, in a peculiar manner, as the preservers of the sacred deposit of Masonic truth bequeathed to them by their great ancestor; and circumstances intimately connected with the transactions of the immediate descendants of the patriarch are recorded in a degree which has been adopted by the Ancient and Accepted Scottish Rite under the name of "Patriarch Noachite."

The primitive teachings of the patriarch, which were simple but comprehensive, continued to be preserved in the line of the patriarchs and the prophets to the days of Solomon, but were soon lost to the other descendants of Noah, by a circumstance to which we must now refer. After the death of Noah, his sons removed from the region of Mount Ararat, where, until then, they had resided, and "travelling from the East, found a plain in the land of Shinar, and dwelt there." Here they commenced the building of a lofty tower. This act seems to have been displeasing to God, for in consequence of it, he confounded their language, so that one could not understand what another said; the result of which was that they separated and dispersed over the face of the earth in search of different dwelling-places. With the loss of the original language, the great truths which that language had conveyed, disappeared from their minds. The worship of the one true God was abandoned. A multitude of deities began to be adored. Idolatry took the place of pure theism. And then arose the Arkite rites, or the worship of Noah and the Ark, Sabaism, or the adoration of the stars, and other superstitious observances, in all of which, however, the priesthood, by their mysteries or initiations into a kind of Spurious Freemasonry, preserved, among a multitude of errors, some faint allusions to the truth, and retained just so much light as to make their "darkness visible."

Such are the Noachic traditions of Masonry, which, though if considered as materials of history, would be worth but little, yet have furnished valuable sources of symbolism, and in that way are full of wise instruction.

Noah, Precepts of. The precepts of the patriarch Noah, which were preserved as the Constitutions of our ancient brethren, are seven in number, and are as follows:

1. Renounce all idols.
2. Worship the only true God.
3. Commit no murder.
4. Be not defiled by incest.
5. Do not steal.
6. Be just.
7. Eat no flesh with blood in it.

The "proselytes of the gate," as the Jews termed those who lived among them without undergoing circumcision or observing the ceremonial law, were bound to obey the seven precepts of Noah. The Talmud says that the first six of these precepts were given originally by God to Adam, and the seventh afterward to Noah. These precepts were designed to be obligatory on all the Noachidæ, or descendants of Noah, and consequently, from the time of Moses, the Jews would not suffer a stranger to live among them unless he observed these precepts, and never gave quarter in battle to an enemy who was ignorant of them.

Noffodei. The name of this person is differently spelled by different writers. Villani, and after him Burnes, call him *Noffo Dei*, Reghellini *Neffodei*, and Addison *Nosso de Florentin;* but the more usual spelling is *Noffodei*. He and Squin de Flexian were the first to make those false accusations against the Knights Templars which led to the downfall of the Order. Naffodei, who was a Florentine, is asserted by some writers to have been an apostate Templar, who had been condemned

by the Preceptor and Chapter of France to perpetual imprisonment for impiety and crime. But Dupui denies this, and says that he never was a Templar, but that, having been banished from his native country, he had been condemned to rigorous penalties by the Prevost of Paris for his crimes. For a history of his treachery to the Templars, see *Squin de Flexian*.

Nomenclature. There are several Masonic works, printed or in manuscript, which contain lists of the names of degrees in Masonry. Such a list is called by the French writers a nomenclature. The most important of these nomenclatures are those of Peuvret, Fustier, Pyron, and Lemanceau. Ragon has a nomenclature of degrees in his *Tuileur Générale*. And Thory has an exhaustive and descriptive one in his *Acta Latomorum*. Oliver also gives a nomenclature, but an imperfect one, of one hundred and fifty degrees in his *Historical Landmarks*.

Nomination. It is the custom in some Grand Lodges and Lodges to nominate candidates for election to office, and in others this custom is not adopted. But the practise of nomination has the sanction of ancient usage. Thus the records of the Grand Lodge of England, under date of June 24, 1717, tell us that "before dinner the oldest Master Mason . . . in the chair proposed a list of proper candidates, and the brethren, by a majority of hands, elected Mr. Anthony Sayer, Gentleman, Grand Master of Masons." (*Constitutions*, 1738, p. 109.) And the present Constitution of the Grand Lodge of England requires that the Grand Master shall be nominated in December, and the Grand Treasurer in September, but that the election shall not take place until the following March. Nominations appear, therefore, to be the correct Masonic practise; yet, if a member be elected to any office to which he had not previously been nominated, the election will be valid, for a nomination is not essential.

Non-Affiliation. The state of being unconnected by membership with a Lodge. (See *Unaffiliated Mason*.)

Nonesynches. In the Old Constitutions known as the Dowland MS. is found the following passage: "St. Albones loved well Masons and cherished them much. And he made their paie right good, . . . for he gave them ijs-vjd, a weeke, and iijd. to their nonesynches." This word, which cannot, in this precise form, be found in any archaic dictionary, evidently means food or refreshment, for in the parallel passage in other Constitutions the word used is *cheer*, which has the same meaning. The old English word from which we get our *luncheon* is *noonshun*, which is defined to be the refreshment taken at *noon*, when laborers desist from work to *shun* the heat. Of this, *nonesynches* is a corrupt form.

Nonis. A significant word in the Thirty-second Degree of the Scottish Rite. The original old French rituals endeavor to explain it, and say that it and two other words in conjunction are formed out of the initials of the words of a particular aphorism which has reference to the secret arcana and "sacred treasure" of Masonry. Out of several interpretations, no one can be positively asserted as the original, although the intent is apparent to him to whom the same may lawfully belong. (See *Salix* and *Tengu*.)

Non nobis. It is prescribed that the motto beneath the Passion Cross on the Grand Standard of a Commandery of Knights Templar shall be "Non nobis Domine! non nobis, sed nomini tuo da Gloriam." That is, *Not unto us, O Lord! not unto us, but unto Thy name give Glory*. It is the commencement of the 115th Psalm, which is sung in the Christian church on occasions of thanksgiving. It was the ancient Templar's shout of victory.

Non-Resident. The members of a Lodge who do not reside in the locality of a Lodge, but live at a great distance from it in another State, or, perhaps, country, but still continue members of it, and contribute to its support by the payment of Lodge dues, are called "non-resident members." Many Lodges, in view of the fact that such members enjoy none of the local privileges of their Lodges, require from them a less amount of annual payment than they do from their resident members.

Noorthouck, John. The editor of the fifth, and by far the best, edition of the *Book of Constitutions*, which was published in 1784. He was the son of Herman Noorthouck, a bookseller, and was born in London about the year 1746. Oliver describes him as "a clever and intelligent man, and an expert Mason." His literary pretensions were, however, greater than this modest encomium would indicate. He was patronized by the celebrated printer, William Strahan, and passed nearly the whole of his life in the occupations of an author, an index maker, and a corrector of the press. He was, besides his edition of the *Book of Constitutions*, the writer of a *History of London*, 4to, published in 1773, and an *Historical and Classical Dictionary*, 2 vols., 8vo, published in 1776. To him also, as well as to some others, has been attributed the authorship of a once popular book entitled *The Man after God's own Heart*. In 1852, J. R. Smith, a bookseller of London, advertised for sale "the original autograph manuscript of the life of John Noorthouck." He calls this "a very interesting piece of autobiography, containing many curious literary anecdotes of the last century, and deserving to be printed." Noorthouck died in 1816, aged about seventy years.

Normal. A perpendicular to a curve; and included between the curve and the axis of the abscissas. Sometimes a square, used by Operative Masons, for proving angles.

Nornæ. In the Scandinavian Mysteries these were three maidens, known as Urd, Verdandi, and Skuld, signifying Past, Present, and Future. Their position is seated near the Urdar-wells under the world-tree Yggdrasil,

and there they determine the fate of both gods and men. They daily draw water from the spring, and with it and the surrounding clay sprinkle the ash-tree Yggdrasil, that the branches may not wither and decay.

North. The north is Masonically called a place of darkness. The sun in his progress through the ecliptic never reaches farther than 23° 28′ north of the equator. A wall being erected on any part of the earth farther north than that, will therefore, at meridian, receive the rays of the sun only on its south side, while the north will be entirely in shadow at the hour of meridian. The use of the north as a symbol of darkness is found, with the present interpretation, in the early rituals of the last century. It is a portion of the old sun worship, of which we find so many relics in Gnosticism, in Hermetic philosophy, and in Freemasonry. The east was the place of the sun's daily birth, and hence highly revered; the north the place of his annual death, to which he approached only to lose his vivific heat, and to clothe the earth in the darkness of long nights and the dreariness of winter.

However, this point of the compass, or place of Masonic darkness, must not be construed as implying that in the Temple of Solomon no light or ventilation was had from this direction. The Talmud, and as well Josephus, allude to an extensive opening toward the North, framed with costly magnificence, and known as the great "Golden Window." There were as many openings in the outer wall on the north as on the south side. There were three entrances through the "Chel" on the north and six on the south. (See *Temple*.)

While once within the walls and Chel of the Temple all advances were made from east to west, yet the north side was mainly used for stabling, slaughtering, cleansing, etc., and contained the chambers of broken knives, defiled stones, of the house of burning, and of sheep. The Masonic symbolism of the entrance of an initiate from the north, or more practically from the northwest, and advancing toward the position occupied by the corner-stone in the northeast, forcibly calls to mind the triplet of Homer:

> "Two marble doors unfold on either side;
> Sacred the South by which the gods descend;
> But mortals enter on the Northern end."

So in the Mysteries of Dionysos, the gate of entrance for the aspirant was from the north; but when purged from his corruptions, he was termed indifferently new-born or immortal, and the sacred south door was thence accessible to his steps.

In the Middle Ages, below and to the right of the judges stood the accuser, facing north; to the left was the defendant, in the north facing south. Bro. George F. Fort, in his *Antiquities of Freemasonry*, says: "In the centre of the court, directly before the judge, stood an altar piece or shrine, upon which an open Bible was displayed. The south, to the right of the justiciaries, was deemed honorable and worthy for a plaintiff; but the north was typical of a frightful and diabolical sombreness." Thus, when a solemn oath of purgation was taken in grievous criminal accusations, the accused turned toward the north. "The judicial headsman, in executing the extreme penalty of outraged justice, turned the convict's face northward, or towards the place whence emanated the earliest dismal shades of night. When Earl Hakon bowed a tremulous knee before the deadly powers of Paganism, and sacrificed his seven-year-old child, he gazed out upon the far-off, gloomy north.

"In Nastrond, or shores of death, stood a revolting hall, whose portals opened toward the north—the regions of night. North, by the Jutes, was denominated black or sombre; the Frisians called it fear corner. The gallows faced the north, and from these hyperborean shores everything base and terrible proceeded. In consequence of this belief, it was ordered that, in the adjudication of a crime, the accused should be on the north side of the court enclosure. And in harmony with the Scandinavian superstition, no Lodge of Masons illumines the darkened north with a symbolic light, whose brightness would be unable to dissipate the gloom of that cardinal point with which was associated all that was sinstrous and direful." (P. 292.)

North Carolina. The early history of Masonry in no State is more uncertain than in that of North Carolina, in consequence of the carelessness of the authorities who have attempted to write its early annals. Thus, Robert Williams, the Grand Secretary, in a letter written to the Grand Lodge of Kentucky in 1808, said that "the Grand Lodge of North Carolina was constituted by Charter issued from the Grand Lodge of Scotland in the year 1761, signed by Henry Somerset, Duke of Beaufort . . . as Grand Master; and attested by George John Spencer, Earl of Spencer . . . as Grand Secretary." Now this statement contains on its face the evidences of flagrant error. 1. The Duke of Beaufort never was Grand Master of Scotland. 2. The Grand Master of Scotland in 1761 was the Earl of Elgin. 3. The Earl of Spencer never was Grand Secretary either of England or Scotland, but Samuel Spencer was Grand Secretary of the Grand Lodge of England from 1757 to 1767, and died in 1768. 4. The Duke of Beaufort was not Grand Master of England in 1761, but held that office from 1767 to 1771. There is no mention in the printed records of the Grand Lodge of England of a Charter at any time granted for a Provincial Grand Lodge in North Carolina. But in two lists of Lodges chartered by that body, we find that on August 21, 1767, a Warrant was granted for the establishment of "Royal White Hart Lodge," at Halifax, in North Carolina. Probably this is the true date of the introduction of Masonry

into that State. A record in the transactions of the St. John's Grand Lodge of Massachusetts says that on October 2, 1767, that body granted a deputation to Thomas Cooper, Master of Pitt County Lodge, as Deputy Grand Master of the province; but there is no evidence that he ever exercised the prerogatives of the office. Judge Martin, in a discourse delivered on June 24, 1789, says that Joseph Montford was appointed, toward the year 1769, as Provincial Grand Master by the Duke of Beaufort, and that in 1771 he constituted St. John's Lodge at Newbern. This was probably the true date of the Provincial Grand Lodge of North Carolina, for in 1787 we find nine Lodges in the territory, five of which, at least, had the provincial numbers 2, 3, 4, 5, and 8, while the Royal Hart Lodge retained its number on the English Register as 403, a number which agrees with that of the English lists in my possession. On December 16, 1787, a convention of Lodges met at Tarborough and organized the "Grand Lodge of the State of North Carolina," electing Hon. Samuel Johnston Grand Master.

There was a Grand Chapter in North Carolina at an early period in the present century, which ceased to exist about the year 1827; but Royal Arch Masonry was cultivated by four Chapters instituted by the General Grand Chapter. On June 28, 1847, the Grand Chapter was reorganized.

The Grand Council was organized in June, 1860, by Councils which had been established by Dr. Mackey, under the authority of the Supreme Council of the Ancient and Accepted Scottish Rite.

North Dakota. As soon as it was determined by the Grand Lodge of Dakota, at its session, held June 11–13, 1889, that there should be a division of the Grand Lodge of Dakota to correspond with the political division of the Territory into North and South Dakota, a convention was held June 12, 1889, at the city of Mitchell, where the Grand Lodge was in session, and the following Lodges of North Dakota were represented, viz.:

Shiloh, No. 8; Pembina, No. 10; Casselton, No. 12; Acacia, No. 15; Bismarck, No. 16; Jamestown, No. 19; Valley City, No. 21; Mandan, No. 23; Cereal, No. 29; Hillsboro, No. 32; Crescent, No. 36; Cheyenne Valley, No. 41; Ellendale, No. 49; Sanborn, No. 51; Wahpeton, No. 58; North Star, No. 59; Minto, No. 60; Mackey, No. 63; Goose River, No. 64; Hiram, No. 74; Minnewaukan, No. 75; Tongue River, No. 78; Bathgate, No. 80; Euclid, No. 84; Anchor, No. 88; Golden Valley, No. 90; Occidental, No. 99.

The convention resolved that it was expedient to organize a Grand Lodge for North Dakota. A constitution and by-laws were adopted.

On June 13th, the first session of the Grand Lodge was held in the city of Mitchell. The elected and appointed officers were present and representatives of the above twenty Lodges.

North Star. This star is frequently used as a Masonic symbol, as are the morning star, the day star, the seven stars. Thus, the morning star is the forerunner of the Great Light that is about to break upon the Lodge; or, as in the grade of G. Master Architect, twelfth of the Scottish system, the initiate is received at the hour "when the day star has risen in the east, and the north star looked down upon the seven stars that circle round him." The symbolism is truth; thus, the North star is the pole star, the Polaris of the mariner, the Cynosura, that guides Masons over the stormy seas of time. The seven stars are the symbol of right and justice to the order and the country.

Northeast Corner. In the "Institutes of Menu," the sacred book of the Brahmans, it is said: "If any one has an incurable disease, let him advance in a straight path towards the invincible *northeast* point, feeding on water and air till his mortal frame totally decays, and his soul becomes united with the supreme."

It is at the same northeast point that those first instructions begin in Masonry which enable the true Mason to commence the erection of that spiritual temple in which, after the decay of his mortal frame, "his soul becomes united with the supreme."

In the important ceremony which refers to the northeast corner of the Lodge, the candidate becomes as one who is, to all outward appearance, *a perfect and upright man and Mason*, the representative of a spiritual corner-stone, on which he is to erect his future moral and Masonic edifice.

This symbolic reference of the corner-stone of a material edifice to a Mason when, at his first initiation, he commences the moral and intellectual task of erecting a spiritual temple in his heart, is beautifully sustained when we look at all the qualities that are required to constitute a "well-tried, true, and trusty" corner-stone. The squareness of its surface, emblematic of morality—its cubical form, emblematic of firmness and stability of character—and the peculiar finish and fineness of the material, emblematic of virtue and holiness—show that the ceremony of the northeast corner of the Lodge was undoubtedly intended to portray, in the consecrated language of symbolism, the necessity of integrity and stability of conduct, of truthfulness and uprightness of character, and of purity and holiness of life, which, just at that time and in that place, the candidate is most impressively charged to maintain.

Notuma. A significant word in some of the high degrees of the Templar system. It is the anagram of AUMONT, who is said to have been the first Grand Master of the Templars in Scotland, and the restorer of the Order after the death of De Molay.

Nova Scotia. The first Lodge established in Nova Scotia was at Annapolis and under authority from Boston by the St. John's

Grand Lodge of Massachusetts. Under date of 1740 the minutes read: "The Rt. Worsh'l Grand Master granted a Deputation at the Petition of sundry Brethren for holding a lodge at Annapolis in Nova Scotia, and appointed the Right Worshipful Erasmus James Phillips, D.G.M., there, who afterward erected a Lodge at Halifax and appointed His Excellency Edward Cornwallis their first Master." For the next hundred years, Lodges were instituted and Provincial Masters appointed by England and Scotland, and Lodges alone without superior provincial authority by Ireland. In June, 1866, an independent Grand Lodge was instituted and recognized by most of the Masonic powers of the United States. But as none of the Lodges holding Warrants from the Grand Lodge of Scotland would recognize it, a subsequent and more satisfactory arrangement took place, and on June 24, 1869, a Grand Lodge was organized by the union of all the subordinate Lodges and Alexander Keith was elected Grand Master.

Novice. 1. The Second Degree of the Illuminati of Bavaria. 2. The Fifth Degree of the Rite of Strict Observance.

Novice, Maçonne. That is to say, a female Mason who is a Novice. It is the First Degree of the Moral Order of the Dames of Mount Tabor.

Novice, Mythological. (*Novice Mythologique.*) The First Degree of the Historical Order of the Dames of Mount Tabor.

Novice, Scottish. (*Novice Ecossaise.*) The First Degree of initiation in the Order of Mount Tabor.

Novitiate. The time of probation, as well as of preparatory training, which, in all religious orders, precedes the solemn profession at least one year. By dispensation only can the period of time be reduced. Novices are immediately subject to a superior called Master of Novices, and their time must be devoted to prayer and to liturgical training.

Nuk-pe-nuk. The Egyptian equivalent for the expression "I am that I am."

Numbers. The symbolism which is derived from numbers was common to the Pythagoreans, the Kabbalists, the Gnostics, and all mystical associations. Of all superstitions, it is the oldest and the most generally diffused. Allusions are to be found to it in all systems of religion; the Jewish Scriptures, for instance, abound in it, and the Christian shows a share of its influence. It is not, therefore, surprising that the most predominant of all symbolism in Freemasonry is that of numbers.

The doctrine of numbers as symbols is most familiar to us because it formed the fundamental idea of the philosophy of Pythagoras. Yet it was not original with him, since he brought his theories from Egypt and the East, where this numerical symbolism had always prevailed. Jamblichus tells us (*Vit. Pyth.*, c. 28) that Pythagoras himself admitted that he had received the doctrine of numbers from Orpheus, who taught that numbers were the most provident beginning of all things in heaven, earth, and the intermediate space, and the root of the perpetuity of Divine beings, of the gods and of demons. From the disciples of Pythagoras we learn (for he himself taught only orally, and left no writings) that his theory was that numbers contain the elements of all things, and even of the sciences. Numbers are the invisible covering of beings as the body is the visible one. They are the primary causes upon which the whole system of the universe rests; and he who knows these numbers knows at the same time the laws through which nature exists. The Pythagoreans, said Aristotle (*Metaph.*, xii., 8), make all things proceed from numbers. Dacier (*Vie de Pyth.*), it is true, denies that this was the doctrine of Pythagoras, and contends that it was only a corruption of his disciples. It is an immaterial point. We know that the symbolism of numbers was the basis of what is called the Pythagorean philosophy. But it would be wrong to suppose that from it the Masons derived their system, since the two are in some points antagonistic; the Masons, for instance, revere the nine as a sacred number of peculiar significance, while the Pythagoreans looked upon it with detestation. In the system of the Pythagoreans, ten was, of all numbers, the most perfect, because it symbolizes the completion of things; but in Masonic symbolism the number ten is unknown. Four is not, in Masonry, a number of much representative importance; but it was sacredly revered by the Pythagoreans as the tetractys, or figure derived from the Jewish Tetragrammaton, by which they swore.

Plato also indulged in a theory of symbolic numbers, and calls him happy who understands spiritual numbers and perceives their mighty influences. Numbers, according to him, are the cause of universal harmony, and of the production of all things. The Neoplatonists extended and developed this theory, and from them it passed over to the Gnostics; from them probably to the Rosicrucians, to the Hermetic philosophers, and to the Freemasons.

Cornelius Agrippa has descanted at great length, in his *Occult Philosophy*, on the subject of numbers. "That there lies," he says, "wonderful efficacy and virtue in numbers, as well for good as for evil, not only the most eminent philosophers teach, but also the Catholic Doctors." And he quotes St. Hilary as saying that the seventy Elders brought the Psalms into order by the efficacy of numbers.

Of the prevalence of what are called representative numbers in the Old and New Testament, there is abundant evidence. "However we may explain it," says Dr. Mahan (*Palmoni*, p. 67), "certain numerals in the Scriptures occur so often in connection with certain classes of ideas, that we are naturally led to associate the one with the

other. This is more or less admitted with regard to the numbers *Seven, Twelve, Forty, Seventy*, and it may be a few more. The Fathers were disposed to admit it with regard to many others, *and to see in it the marks of a supernatural design.*"

Among the Greeks and the Romans there was a superstitious veneration for certain numbers. The same practise is found among all the Eastern nations; it entered more or less into all the ancient systems of philosophy; constituted a part of all the old religions; was accepted to a great extent by the early Christian Fathers; constituted an important part of the Kabbala; was adopted by the Gnostics, the Rosicrucians, and all the mystical societies of the Middle Ages; and finally has carried its influence into Freemasonry.

The respect paid by Freemasons to certain numbers, all of which are odd, is founded not on the belief of any magical virtue, but because they are assumed to be the types or representatives of certain ideas. That is to say, a number is in Masonry a symbol, and no more. It is venerated, not because it has any supernatural efficacy, as thought the Pythagoreans and others, but because it has concealed within some allusion to a sacred object or holy thought, which it symbolizes. The number *three*, for instance, like the *triangle*, is a symbol; the number *nine*, like the *triple triangle*, another. The Masonic doctrine of sacred numbers must not, therefore, be confounded with the doctrine of numbers which prevailed in other systems.

The most important symbolic or sacred numbers in Masonry are *three, five, seven, nine, twenty-seven*, and *eighty-one*. Their interpretation will be found under their respective titles.

Numeration by Letters. There is a Kabbalistical process especially used in the Hebrew language, but sometimes applied to other languages, for instance, to the Greek, by which a mystical meaning of a word is deduced from the numerical value of the words of which it is composed, each letter of the alphabet being equivalent to a number. Thus in Hebrew the name of God, יהוה, JAH, is equivalent to 15, because י=10 and ה=5, and 15 thus becomes a sacred number. In Greek, the Kabbalistic word Abraxas, or αβραξας, is made to symbolize the solar year of 365 days, because the sum of the value of the letters of the word is 365; thus, α=1, β=2, ρ=100, α=1, ξ=60, α=1, and ς=200. To facilitate these Kabbalistic operations, which are sometimes used in the high and especially the Hermetical Masonry, the

Hebrew.		Greek.	
א	1	Α, α	1

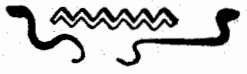
		Ψ, ψ	700
		Ω, ω	800



numerical value of the Hebrew and Greek letters is here given.

Nun. (Heb. נון, a *fish*, in Syriac an *inkhorn*.) The Chaldaic and hieroglyphic form of this Hebrew letter was like Fig. 1, and the Egyptian like Fig. 2, signifying

Fig. 1.

Fig. 2.

fishes in any of these forms. Joshua was the son of Nun, or a fish, the deliverer of Israel. As narrated of the Noah in the Hindu account of the deluge, whereby the forewarning of a fish caused the construction of an ark and the salvation of one family of the human race from the flood of waters. (See *Beginnings of History*, by Lenormant.)

Nursery. The first of the three classes into which Weishaupt divided his Order of Illuminati, comprising three degrees. (See *Illuminati*.)

Nyaya. The name of the second of the three great systems of ancient Hindu philosophy.

Nyctazontes. An ancient sect who praised God by day, but rested in quiet and presumed security during the night.

O

O. The fifteenth letter in the English and in most of the Western alphabets. The corresponding letter in the Hebrew and Phœnician alphabets was called *Ayn*, that is, *eye;* the primitive form of the Phœnician letter being the rough picture of an eye, or a circle with a dot in the center. This dot will be observed in ancient MSS., but being dropped the circle forms the letter O. The numerical value is 70, and in Hebrew is formed thus, ע, the hieroglyphic being a plant, as well as at times a circle or an eye.

Oak Apple, Society of the. Instituted about 1658, and lapsed under the disturbances in England during the reign of James II., but it lingered among the Stuart adherents for many years.

Oannes. The earliest instructor of man in letters, sciences, and arts, especially in architecture, geometry, botany, and agriculture, and in all other useful knowledge, was the fish god Oannes (myth). This universal teacher, according to Berossus, appeared in the Persian Gulf, bordering on Babylonia, and, although an animal, was endowed with reason and great knowledge. The usual appearance of the creature was that of a fish, having a human head beneath that of a fish, and feet like unto a man. This personage conversed with men during the day, but never ate with them. At Kouyunjik there was a colossal statue of the fish-god Oannes. The following is from the *Book of Enoch* (vol. ii., p. 154): "The Masons hold their grand festival on the day of St. John, not knowing that therein they merely signify the fish-god Oannes, the first Hermes and the first founder of the Mysteries, the first messenger to whom the Apocalypse was given, and whom they ignorantly confound with the fabulous author of the common Apocalypse. The sun is then (midsummer day) in its greatest altitude. In this the Naros is commemorated."

Oath. In the year 1738, Clement XII., at that time Pope of Rome, issued a bull of excommunication against the Freemasons, and assigned, as the reason of his condemnation, that the Institution confederated persons of all religions and sects in a mysterious bond of union, and compelled them to secrecy by an oath taken on the Bible, accompanied by certain ceremonies, and the imprecation of heavy punishments.

This persecution of the Freemasons, on account of their having an obligatory promise of secrecy among their ceremonies, has not been confined to the Papal see. We shall find it existing in a sect which we should suppose, of all others, the least likely to follow in the footsteps of a Roman pontiff. In 1757, the Associate Synod of Seceders of Scotland adopted an act, concerning what they called "the Mason oath," in which it is declared that all persons who shall refuse to make such revelations as the Kirk Sessions may require, and to promise to abstain from all future connection with the Order, "shall be reputed under scandal and incapable of admission to sealing ordinances," or as Pope Clement expressed it, be "ipso facto excommunicated."

In the preamble to the act, the Synod assign the reasons for their objections to this oath, and for their ecclesiastical censure of all who contract it. These reasons are: "That there were very strong presumptions, that, among Masons, an oath of secrecy is administered to entrants into their society, even under a capital penalty, and before any of those things, which they swear to keep secret, be revealed to them; and that they pretend to take some of these secrets from the Bible; besides other things which are ground of scruple in the manner of swearing the said oath."

These have, from that day to this, constituted the sum and substance of the objections to the obligation of Masonic secrecy, and, for the purpose of brief examination, they may be classed under the following heads:

First. It is an oath.

Secondly. It is administered before the secrets are communicated.

Thirdly. It is accompanied by certain superstitious ceremonies.

Fourthly. It is attended by a penalty.

Fifthly. It is considered, by Masons, as paramount to the obligations of the laws of the land.

In replying to these statements, it is evident that the conscientious Freemason labors under great disadvantage. He is at every step restrained by his honor from either the denial or admission of his adversaries in relation to the mysteries of the Craft. But it may be granted, for the sake of argument, that every one of the first four charges is true, and then the inquiry will be in what respect they are offensive or immoral.

First. The oath or promise cannot, in itself, be sinful, unless there is something immoral in the obligation it imposes. Simply to promise secrecy, or the performance of any good action, and to strengthen this promise by the solemnity of an oath, is not, in itself, forbidden by any Divine or human law. Indeed, the infirmity of human nature demands, in many instances, the sacred sanction of such an attestation; and it is continually exacted in the transactions of man with man, without any notion

of sinfulness. Where the time, and place, and circumstances are unconnected with levity, or profanity, or crime, the administration of an obligation binding to secrecy, or obedience, or veracity, or any other virtue, and the invocation of Deity to witness, and to strengthen that obligation, or to punish its violation, is incapable, by any perversion of Scripture, of being considered a criminal act.

Secondly. The objection that the oath is administered before the secrets are made known, is sufficiently absurd to provoke a smile. The purposes of such an oath would be completely frustrated, by revealing the thing to be concealed before the promise of concealment was made. In that case, it would be optional with the candidate to give the obligation, or to withhold it, as best suited his inclinations. If it be conceded that the exaction of a solemn promise of secrecy is not, in itself, improper, then certainly the time of exacting it is before and not after the revelation.

Dr. Harris (*Masonic Discourses*, Disc. IX., p. 184) has met this objection in the following language:

"What the ignorant call 'the oath,' is simply an obligation, covenant, and promise, exacted previously to the divulging of the specialties of the Order, and our means of recognizing each other; that they shall be kept from the knowledge of the world, lest their original intent should be thwarted, and their benevolent purport prevented. Now, pray, what harm is there in this? Do you not all, when you have anything of a private nature which you are willing to confide in a particular friend, *before you tell him what it is*, demand a solemn promise of secrecy? And is there not the utmost propriety in knowing whether your friend is determined to conceal your secret, before you presume to reveal it? Your answer confutes your cavil."

Thirdly. The objection that the oath is accompanied by certain superstitious ceremonies does not seem to be entitled to much weight. Oaths, in all countries and at all times, have been accompanied by peculiar rites, intended to increase the solemnity and reverence of the act. The ancient Hebrews, when they took an oath, placed the hand beneath the thigh of the person to whom they swore. Sometimes the ancients took hold of the horns of the altar, and touched the sacrificial fire, as in the league between Latinus and Æneas, where the ceremony is thus described by Virgil:

"Tango aras; mediosque ignes, et numina, testor."

Sometimes they extended the right hand to heaven, and swore by earth, sea, and stars. Sometimes, as among the Romans in private contracts, the person swearing laid his hand upon the hand of the party to whom he swore. In all solemn covenants the oath was accompanied by a sacrifice; and some of the hair being cut from the victim's head, a part of it was given to all present, that each one might take a share in the oath, and be subject to the imputation. Other ceremonies were practised at various times and in different countries, for the purpose of throwing around the act of attestation an increased amount of awe and respect. The oath is equally obligatory without them; but they have their significance, and there can be no reason why the Freemasons should not be allowed to adopt the mode most pleasing to themselves of exacting their promises or confirming their covenants.

Fourthly. It is objected that the oath is attended with a penalty of a serious or capital nature. If this be the case, it does not appear that the expression of a penalty of any nature whatever can affect the purport or augment the solemnity of an oath, which is, in fact, an attestation of God to the truth of a declaration, as a witness and avenger; and hence every oath includes in itself, and as its very essence, the covenant of God's wrath, the heaviest of all penalties, as the necessary consequence of its violation. A writer, in reply to the Synod of Scotland (*Scot's Mag.*, October, 1757), quotes the opinion of an eminent jurist to this effect:

"It seems to be certain that every promissory oath, in whatever form it may be conceived, whether explicitly or implicitly, virtually contains both an attestation and an obsecration; for in an oath the execration supposes an attestation as a precedent, and the attestation infers an execration as a necessary consequence.

"Hence, then, to the believer in a superintending Providence, every oath is an affirmation, negation, or promise, corroborated by the attestation of the Divine Being." This attestation includes an obsecration of Divine punishment in case of a violation, and it is, therefore, a matter of no moment whether this obsecration or penalty be expressed in words or only implied; its presence or absence does not, in any degree, alter the nature of the obligation. If in any promise or vow made by Masons, such a penalty is inserted, it may probably be supposed that it is used only with a metaphorical and paraphrastical signification, and for the purpose of symbolic or historical allusion. Any other interpretation but this would be entirely at variance with the opinions of the most intelligent Masons, who, it is to be presumed, best know the intent and meaning of their own ceremonies.

Fifthly. The last, and, indeed, the most important objection urged is, that these oaths are construed by Masons as being of higher obligation than the law of the land. It is in vain that this charge has been repeatedly and indignantly denied; it is in vain that Masons point to the integrity of character of thousands of eminent men who have been members of the Fraternity; it is in vain that they recapitulate the order-loving and law-fearing regulations of the Institution; the charge is

renewed with untiring pertinacity, and believed with a credulity that owes its birth to rancorous prejudice alone. To repeat the denial is but to provoke a repetition of the charge. The answer is, however, made by one who, once a Mason, was afterward an opponent and an avowed enemy of the Institution, W. L. Stone (*Letters on Masonry and Anti-Masonry*, Let. VII., p. 69), who uses the following language:

"Is it, then, to be believed that men of acknowledged talents and worth in public stations, and of virtuous and, frequently, religious habits, in the walks of private life, with the Holy Bible in their hands—which they are solemnly pledged to receive as the rule and guide of their faith and practice—and under the grave and positive charge from the officer administering the obligation, that it is to be taken in strict subordination to the civil laws—can understand that obligation, whatever may be the peculiarities of its phraseology, as requiring them to countenance vice and criminality even by silence? Can it for a moment be supposed that the hundreds of eminent men, whose patriotism is unquestioned, and the exercise of whose talents and virtues has shed a lustre upon the church history of our country, and who, by their walk and conversation, have, in their own lives, illustrated the beauty of holiness? Is it to be credited that the tens of thousands of those persons, ranking among the most intelligent and virtuous citizens of the most moral and enlightened people on earth—is it, I ask, possible that any portion of this community can, on calm reflection, believe that such men have oaths upon their consciences binding them to eternal silence in regard to the guilt of any man because he happens to be a Freemason, no matter what be the grade of offence, whether it be the picking of a pocket or the shedding of blood? It does really seem to me impossible that such an opinion could, at any moment, have prevailed, to any considerable extent, amongst reflecting and intelligent citizens."

Oath, Corporal. The modern form of taking an oath is by placing the hands on the Gospels or on the Bible. The *corporale*, or *corporal cloth*, is the name of the linen cloth on which, in the Roman Catholic Church, the sacred elements consecrated as "the body of our Lord" are placed. Hence the expression *corporal oath* originated in the ancient custom of swearing while touching the corporal cloth. Relics were sometimes made use of. The laws of the Allemanni (cap. 657) direct that he who swears shall place his hand upon the coffer containing the relics. The idea being that something sacred must be touched by the hand of the jurator to give validity to the oath, in time the custom was adopted of substituting the holy Gospels for the corporal cloth or the relics, though the same title was retained. Haydn (*Dict. of Dates*) says that the practise of swearing on the Gospels prevailed in England as early as A.D. 528. The laws of the Lombards repeatedly mention the custom of swearing on the Gospels. The sanction of the church was given at an early period to the usage. Thus, in the history of the Council of Constantinople (Anno 381), it is stated that "George, the well-beloved of God, a deacon and keeper of the records, having touched the Holy Gospels of God, swore in this manner," etc. And a similar practise was adopted at the Council of Nice, fifty-six years before. The custom of swearing on the book, thereby meaning the Gospels, was adopted by the Medieval gild of Freemasons, and allusions to it are found in all the Old Constitutions. Thus in the York MS., No. 1, about the year 1600, it is said, "These charges . . . you shall well and truly keep to your power; so help you God and by the contents of that book." And in the Grand Lodge MS., No. 1, in 1583 we find this: "These charges ye shall keepe, so healpe you God, and your haly dome and by this booke in your hande unto your power." The form of the ceremony required that the corporal oath should be taken with both hands on the book, or with one hand, and then always the right hand.

Oath of the Gild. The oath that was administered in the English Freemasons' gild of the Middle Ages is first met with in the Harleian MS., No. 1942, written about the year 1670. The 31st article prescribes: "That noe person shall bee accepted a Free Mason, or know the secrets of the said Society, until hee hath first taken the oath of secrecy hereafter following:

"I, A. B. Doe, in the presence of Almighty God and my Fellowes and Brethren here present, promise and declare that I will not at any time hereafter, by any act or circumstance whatsoever, directly or indirectly, publish, discover, reveale, or make knowne any of the secrets, priviledges or counsells of the Fraternity or fellowship of Free Masonry, which at this time, or any time hereafter, shall be made knowne unto mee; soe helpe mee God and the holy contents of this booke." In the Roberts *Constitutions*, published in 1722, this oath, substantially in the same words, is for the first time printed with the amendment of "privities" for "priviledges."

Oath, Tiler's. Before any strange and unknown visitor can gain admission into a Masonic Lodge, he is required in America to take the following oath:

"I, A. B., do hereby and hereon solemnly and sincerely swear that I have been regularly initiated, passed, and raised to the sublime degree of a Master Mason in a just and legally constituted Lodge of such; that I do not now stand suspended or expelled; and know of no reason why I should not hold Masonic communication with my brethren."

It is called the "Tiler's oath," because it is usually taken in the Tiler's room, and was formerly administered by that officer, whose duty it is to protect the Lodge from the approach of unauthorized visitors. It is now administered by the committee of examination, and not only he to whom it is adminis-

tered, but he who administers it, and all who are present, must take it at the same time. It is a process of purgation, and each one present, the visitor as well as the members of the Lodge, is entitled to know that all the others are legally qualified to be present at the esoteric examination which is about to take place. [This custom is unknown in English Masonry.]

OB. A Masonic abbreviation of the word *Obligation*, sometimes written O. B.

Obed. (Heb. עוֹבֵד, *serving*.) One of nine favored officials, selected by Solomon after the death of H. Abif.

Obedience. The doctrine of obedience to constituted authority is strongly inculcated in all the Old Constitutions as necessary to the preservation of the association. In them it is directed that "every Mason shall prefer his elder and put him to worship." Thus the Master Mason obeys the order of his Lodge, the Lodge obeys the mandates of the Grand Lodge, and the Grand Lodge submits to the landmarks and the old regulations. The doctrine of passive obedience and non-resistance in politics, however much it may be supposed to be inimical to the progress of free institutions, constitutes undoubtedly the great principle of Masonic government. Such a principle would undoubtedly lead to an unbearable despotism, were it not admirably modified and controlled by the compensating principle of appeal. The first duty of every Mason is to obey the mandate of the Master. But if that mandate should have been unlawful or oppressive, he will find his redress in the Grand Lodge, which will review the case and render justice. This spirit of instant obedience and submission to authority constitutes the great safeguard of the Institution. Freemasonry more resembles a military than a political organization. The order must at once be obeyed; its character and its consequences may be matters of subsequent inquiry. The Masonic rule of obedience is like the nautical, imperative: "Obey orders, even if you break owners."

Obedience of a Grand Body. Obedience, used in the sense of *being under the jurisdiction*, is a technicality borrowed only recently by Masonic authorities from the French, where it has always been regularly used. Thus "the Grand Lodge has addressed a letter to all the Lodges *of its obedience*" means "to all the Lodges under its jurisdiction." In French, "à toutes les Loges de sou obedience." It comes originally from the usage of the Middle Ages, in the Low Latin of which *obedientia* meant the homage which a vassal owed to his lord. In the ecclesiastical language of the same period, the word signified the duty or office of a monk toward his superior.

Obelisk. The obelisk is a quadrangular, monolithic column, diminishing upward, with the sides gently inclined, but not so as to terminate in a pointed apex, but to form at the top a flattish, pyramidal figure, by which the whole is finished off and brought to a point. It was the most common species of monument in ancient Egypt, where they are still to be found in great numbers, the sides being covered with hieroglyphic inscriptions. Obelisks were, it is supposed, originally erected in honor of the sun god. Pliny says (Holland's trans.), "The kings of Egypt in times past made of this stone certain long beams, which they called obelisks, and consecrated them unto the sun, whom they honored as a god; and, indeed, some resemblance they carry of sunbeams." In continental Masonry the monument in the Master's Degree is often made in the form of an obelisk, with the letters M. B. inscribed upon it. And this form is appropriate, because in Masonic, as in Christian, iconography the obelisk is a symbol of the resurrection.

Objections to Freemasonry. The principal objections that have been urged by its opponents to the Institution of Freemasonry may be arranged under six heads: 1. Its *secrecy;* 2. The *exclusiveness* of its charity; 3. Its admission of *unworthy members;* 4. Its claim to be a *religion;* 5. Its administration of unlawful *oaths;* and, 6. Its *puerility* as a system of instruction. Each of these objections is replied to in this work under the respective heads of the words which are italicized above.

Obligated. *To be obligated*, in Masonic language, is to be admitted into the covenant of Masonry. "An obligated Mason" is tautological, because there can be no Mason who is not an obligated one.

Obligation. The solemn promise made by a Mason on his admission into any degree is technically called his obligation. In a legal sense, obligation is synonymous with duty. Its derivation shows its true meaning, for the Latin word *obligatio* literally signifies a *tying* or *binding*. The *obligation* is that which binds a man to do some act, the doing of which thus becomes his duty. By his obligation, a Mason is bound or tied to his Order. Hence the Romans called the military oath which was taken by the soldier his obligation, and, too, it is said that it is the obligation that makes the Mason. Before that ceremony, there is no tie that binds the candidate to the Order so as to make him a part of it; after the ceremony, the tie has been completed, and the candidate becomes at once a Mason, entitled to all the rights and privileges and subject to all the duties and responsibilities that enure in that character. The jurists have divided obligations into imperfect and perfect, or natural and civil. In Masonry there is no such distinction. The Masonic obligation is that moral one which, although it cannot be enforced by the courts of law, is binding on the party who makes it, in conscience and according to moral justice. It varies in each degree, but in each is perfect. Its different clauses, in which different duties are prescribed, are called its *points*, which are either affirmative or negative, a division like that of the precepts of the Jewish law. The *affirmative points* are those which require certain acts to be performed; the *negative points* are those

which forbid certain other acts to be done. The whole of them is preceded by a general point of secrecy, common to all the degrees, and this point is called the *tie*.

Oblong Square. A parallelogram, or four-sided figure, all of whose angles are equal, but two of whose sides are longer than the others. [Of course the term "oblong square" is strictly without any meaning, but it is used to denote two squares joined together to form a rectangle.]

This is the symbolic form of a Masonic Lodge, and it finds its prototype in many of the structures of our ancient brethren. The ark of Noah, the camp of the Israelites, the Ark of the Covenant, the Tabernacle, and, lastly, the Temple of Solomon, were all oblong squares. (See *Ground-Floor of the Lodge*.)

Oboth. Ventriloquism. It will be found so denominated in the Septuagint version, Isaiah xxix. 3, also xix. 3.

Obrack, Hibernus. Grand Master of the Order of the Temple in 1392, according to the chronology of the Strict Observance of Germany.

Observance, Clerks of Strict. See *Clerks of Strict Observance*.

Observance, Lax. See *Lax Observance*.

Observance, Relaxed. (*Observance Relachée*.) This is the term by which Ragon translates the *lata observantia* or lax observance applied by the disciples of Von Hund to the other Lodges of Germany. Ragon (*Orth. Maçon.*, p. 236) calls it incorrectly a Rite, and confounds it with the Clerks of Strict Observance. (See *Lax Observance*.)

Observance, Strict. See *Strict Observance, Rite of*.

Obverse. In numismatics that side of a coin or medal which contains the principal figure, generally a face in profile or a full or half-length figure, is called the obverse.

Occasional Lodge. A temporary Lodge convoked by a Grand Master for the purpose of making Masons, after which the Lodge is dissolved. The phrase was first used by Anderson in the second edition of the *Book of Constitutions*, and is repeated by subsequent editors. To make a Mason in an Occasional Lodge is equivalent to making him "at sight." But any Lodge, called temporarily by the Grand Master for a specific purpose and immediately afterward dissolved, is an Occasional Lodge. Its organization as to officers, and its regulations as to ritual, must be the same as in a permanent and properly warranted Lodge. (See *Sight, Making Masons at*.)

Occult Masonry. Ragon, in his *Orthodoxie Maçonnique*, proposes the establishment of a Masonic system, which he calls "Occult Masonry." It consists of three degrees, which are the same as those of Ancient Craft Masonry, only that all the symbols are interpreted after alchemical principles. It is, in fact, the application of Masonic symbolism to Hermetic symbolism—two things that never did, according to Hitchcock, materially differ.

Occult Sciences. This name is given to the sciences of alchemy, magic, and astrology, which existed in the Middle Ages. Many of the speculations of these so-called sciences were in the eighteenth century made use of in the construction of the high degrees. We have even a "Hermetic Rite" which is based on the dogmas of alchemy.

Occupied Territory. A state or kingdom where there is a Grand Lodge organization and subordinate Lodges working under it is said to be occupied territory, and, by the American and English law, all other Grand Lodges are precluded from entering in it and exercising jurisdiction. (See *Jurisdiction of a Grand Lodge*.)

Octagon. The regular octagon is a geometrical figure of eight equal sides and angles. It is a favorite form in Christian ecclesiology, and most of the Chapter-Houses of the cathedrals in England are eight sided. It is sometimes used in rituals of Knights of Malta, and then, like the eight-pointed cross of the same Order, is referred symbolically to the eight beatitudes of our Savior.

Odd Numbers. In the numerical philosophy of the Pythagoreans, odd numbers were male and even numbers female. It is wrong, however, to say, as Oliver and some others after him have, that odd numbers were perfect, and even numbers imperfect. The combination of two odd numbers would make an even number, which was the most perfect. Hence, in the Pythagorean system, 4, made by the combination of 1 and 3, and 10, by the combination of 3 and 7, are the most perfect of all numbers. Herein the Pythagorean differs from the Masonic system of numerals. In this latter all the sacred numbers are odd, such as 3, 5, 7, 9, 27, and 81. Thus it is evident that the Masonic theory of sacred numbers was derived, not, as it has been supposed, from the school of Pythagoras, but from a much older system.

Odem. (Heb. אדם.) The carnelian or agate in the high priest's breastplate. It was of a red color, and claimed to possess medical qualities.

Odin. The chief Scandinavian deity and father of *Balder*, which see. The counterpart of Hermes and Mercury in the Egyptian and Roman mythologies. Odin and his brothers Vili and Ve, the sons of Boer, or the first-born, slew Ymir or Chaos, and from his body created the world. As ruler of heaven, he sends daily his two black ravens, Thought and Memory, to gather tidings of all that is being done throughout the world.

Offenses, Masonic. See *Crimes, Masonic*.

Offerings, The Three Grand. See *Ground Floor of the Lodge*.

Officers. The officers of a Grand Lodge, Grand Chapter, or other Supreme body in Masonry, are divided into Grand and Subordinate; the former, who are the Grand and Deputy Grand Master, the Grand Wardens and Grand Treasurer, Secretary, and Chaplain, are also sometimes called the Dignitaries. The officers of a Lodge or Chapter are divided into the Elected and the Appointed, the former in America being the Master,

Wardens, Treasurer, and Secretary, while in England only the Master and Treasurer are elected.

Officers' Jewels. See *Jewels, Official.*

Office, Tenure of. In Masonry the tenure of every office is not only for the time for which the incumbent was elected or appointed, but extends to the day on which his successor is installed. During the period which elapses from the election of that successor until his installation, the old officer is technically said to "hold over."

Ogmius. The Druidical name for Hercules, who is represented with numberless fine chains proceeding from the mouth to the ears of other people, hence possessing the powers of eloquence and persuasion.

Oheb Eloah. אהב אלוה. *Love of God.* This and OHEB KAROBO, *Love of our Neighbor*, are the names of the two supports of the Ladder of Kadosh. Collectively, they allude to that Divine passage, "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the first and great commandment. And the second is like unto it, Thou shalt love thy neighbor as thyself. On these two commandments hang all the law and the prophets." Hence the Ladder of Kadosh is supported by these two Christian commandments.

Oheb Karobo. See *Oheb Eloah.*

Ohio. Freemasonry was introduced into Ohio early in the present century. On January 4, 1808, a convention of delegates from the five Lodges then in the State met at Chillicothe, and on January 7th organized a Grand Lodge, electing Rufus Putnam first Grand Master. The Grand Chapter of Ohio was organized in 1816, the Grand Council in 1829, and the Grand Commandery in 1843.

Oklahoma. The Grand Lodge of Oklahoma was organized at a convention of ten Lodges, holding warrants from the Grand Lodge of Indian Territory, held at Oklahoma City, November 10, 1892, when after electing Grand Officers, who were installed at a special communication of the Grand Lodge of Indian Territory, the Grand Lodge was opened and a constitution adopted. The first annual communication was held at El Reno, February 14, 1893. February 10, 1909, the Grand Lodges of Oklahoma and Indian Territory were merged together under the title of "The Grand Lodge of Ancient Free and Accepted Masons of the State of Oklahoma."

[W. J. A.]

Oil. The Hebrews anointed their kings, prophets, and high priests with oil mingled with the richest spices. They also anointed themselves with oil on all festive occasions, whence the expression in Psalm xlv. 7, "God hath anointed thee with the oil of gladness." (See *Corn, Wine and Oil.*)

Old Charges. See *Manuscripts, Old.*

Old Man. Old men in their dotage are by the laws of Masonry disqualified for initiation. For the reason of this law, see *Dotage.*

Old Regulations. The regulations for the government of the Craft, which were first compiled by Grand Master Payne in 1720, and approved by the Grand Lodge in 1721 were published by Anderson in 1723, in the first edition of the *Book of Constitutions*, under the name of General Regulations. In 1738 Anderson published a second edition of the *Book of Constitutions*, and inserted these regulations under the name of Old Regulations, placing in an opposite column the alterations which had been made in them by the Grand Lodge at different times between 1723 and 1737, and called these New Regulations. When Dermott published his *Ahiman Rezon*, or Book of Constitutions of the rival Grand Lodge, he adopted Anderson's plan, publishing in two columns the Old and the New Regulations. But he made some important changes in the latter to accommodate the policy of his own Grand Lodge. The Old Regulations, more properly known as the "General Regulations of 1722," are recognized as the better authority in questions of Masonic law.

Olive. In a secondary sense, the olive plant is a symbol of peace and victory; but in its primary sense, like all the other sacred plants of antiquity, it was a symbol of resurrection and immortality. Hence in the Ancient Mysteries it was the analogue of the Acacia of Freemasonry.

Olive-Branch in the East, Brotherhood of the. A new Order, which was proposed at Bombay, in 1845, by Dr. James Burnes, the author of a *History of the Knights Templar*, who was then the Provincial Grand Master of India for Scotland. It was intended to provide a substitute for native Masons for the chivalric degrees, from which, on account of their religious faith, they were excluded. It consisted of three classes, Novice, Companion, and Officer. For the first, it was requisite that the candidate should have been initiated into Masonry; for the second, that he should be a Master Mason; and for the third it was recommended, but not imperatively required, that he should have attained the Royal Arch Degree. The badge of the Order was a dove descending with a green olive-branch in its mouth. The new Order was received with much enthusiasm by the most distinguished Masons of India, but it did not secure a permanent existence.

Oliver, George. The Rev. George Oliver, D.D., one of the most distinguished and learned of English Masons, was descended from an ancient Scottish family of that name, some of whom came into England in the time of James I., and settled at Clipstone Park, Nottinghamshire. He was the eldest son of the Rev. Samuel Oliver, rector of Lambley, Nottinghamshire, and Elizabeth, daughter of George Whitehead, Esq. He was born at Pepplewick, November 5, 1782, and received a liberal education at Nottingham. In 1803, when but twenty-one years of age, he was elected second master of the grammar school at Caiston, Lincoln. In 1809 he was appointed to the head mastership of King Edward's Grammar School at Great Grimsby. In 1813 he entered holy orders in the Church

of England, and was ordained a deacon. The subsequent year he was made a priest. In the spring of 1815, Bishop Tomline collated him to the living of Clee, his name being at the time placed on the boards of Trinity College, Cambridge, as a ten-year man by Dr. Bayley, Subdean of Lincoln and examining Chaplain to the Bishop. In the same year he was admitted as Surrogate and a Steward of the Clerical Fund. In 1831, Bishop Kaye gave him the living of Scopwick, which he held to the time of his death. He graduated as Doctor of Divinity in 1836, being then rector of Wolverhampton, and a prebendary of the collegiate church at that place, both of which positions had been presented to him by Dr. Hobart, Dean of Westminster. In 1846 the Lord Chancellor conferred on him the rectory of South Hykeham, which vacated the incumbency of Wolverhampton. At the age of seventy-two Dr. Oliver's physical powers began to fail, and he was obliged to confine the charge of his parishes to the care of curates, and he passed the remaining years of his life in retirement at Lincoln. In 1805 he had married Mary Ann, the youngest daughter of Thomas Beverley, Esq., by whom he left five children. He died March 3, 1867, at Eastgate, Lincoln.

To the literary world Dr. Oliver was well known as a laborious antiquary, and his works on ecclesiastical antiquities during fifty years of his life, from fifty-five, earned for him a high reputation. Of these works the most important were, *History and Antiquities of the Collegiate Church of Beverley, History and Antiquities of the Collegiate Church of Wolverhampton, History of the Conventual Church of Grimsby, Monumental Antiquities of Grimsby, History of the Gild of the Holy Trinity, Sleaford, Letters on the Druidical Remains near Lincoln, Guide to the Druidical Temple at Nottingham* and *Remains of Ancient Britons between Lincoln and Sleaford.*

But it is as the most learned Mason and the most indefatigable and copious Masonic author of his age that Dr. Oliver principally claims our attention. He had inherited a love of Freemasonry from his father, the Rev. Samuel Oliver, who was an expert Master of the work, the Chaplain of his Lodge, and who contributed during a whole year, from 1797 to 1798, an original Masonic song to be sung on every Lodge night. His son has repeatedly acknowledged his indebtedness to him for valuable information in relation to Masonic usages.

Dr. Oliver was initiated by his father, in the year 1801, in St. Peter's Lodge, in the city of Peterborough. He was at that time but nineteen years of age, and was admitted by dispensation during his minority, according to the practise then prevailing, as a lewis, or the son of a Mason.

Under the tuition of his father, he made much progress in the rites and ceremonies then in use among the Lodges. He read with great attention every Masonic book within his reach, and began to collect that store of knowledge which he afterward used with so much advantage to the Craft.

Soon after his appointment as head master of King Edward's Grammar School at Grimsby, he established a Lodge in the borough, the chair of which he occupied for fourteen years. So strenuous were his exertions for the advancement of Masonry, that in 1812 he was enabled to lay the first stone of a Masonic hall in the town, where, three years before, there had been scarcely a Mason residing.

About this time he was exalted as a Royal Arch Mason in the Chapter attached to the Rodney Lodge at Kingston-on-Hull. In Chapters and Consistories connected with the same Lodge he also received the high degrees and those of Masonic Knighthood. In 1813, he was appointed a Provincial Grand Steward; in 1816, Provincial Grand Chaplain; and in 1832, Provincial Deputy Grand Master of the Province of Lincolnshire. These are all the official honors that he received, except that of Past Deputy Grand Master, conferred, as an honorary title, by the Grand Lodge of Massachusetts. In the year 1840, Dr. Crucefix had undeservedly incurred the displeasure of the Grand Master, the Duke of Sussex. Dr. Oliver, between whom and Dr. Crucefix there had always been a warm personal friendship, assisted in a public demonstration of the Fraternity in honor of his friend and brother. This involved him in the odium, and caused the Provincial Grand Master of Lincolnshire, Bro. Charles Tennyson D'Eyncourt, to request the resignation of Dr. Oliver as his Deputy. He complied with the resignation, and after that time withdrew from all active participation in the labors of the Lodge. The transaction was not considered by any means as creditable to the independence of character or sense of justice of the Provincial Grand Master, and the Craft very generally expressed their indignation of the course which he had pursued, and their warm appreciation of the Masonic services of Dr. Oliver. In 1844, this appreciation was marked by the presentation of an offering of plate, which had been very generally subscribed for by the Craft throughout the kingdom.

Dr. Oliver's first contribution to the literature of Freemasonry, except a few Masonic sermons, was a work entitled *The Antiquities of Freemasonry, comprising illustrations of the five Grand Periods of Masonry, from the Creation of the World to the Dedication of King Solomon's Temple,* which was published in 1823. His next production was a little work entitled *The Star in the East,* intended to show, from the testimony of Masonic writers, the connection between Freemasonry and religion. In 1841 he published twelve lectures on the *Signs and Symbols* of Freemasonry, in which he went into a learned detail of the history and signification of all the recognized symbols of the Order. His next important contribution to Freemasonry was *The History of Initiation in twelve lectures; comprising a detailed account of the Rites and Ceremonies, Doctrines and Discipline, of all the Secret and Mysterious*

Institutions of the Ancient World, published in 1840. The professed object of the author was to show the resemblances between these ancient systems of initiation and the Masonic, and to trace them to a common origin; a theory which, under some modification, has been very generally accepted by Masonic scholars.

Following this was *The Theocratic Philosophy of Freemasonry*, a highly interesting work, in which he discusses the speculative character of the Institution. *A History of Freemasonry from 1829 to 1840* has proved a valuable appendix to the work of Preston, an edition of which he had edited in the former year. His next and most important, most interesting, and most learned production was his *Historical Landmarks and other Evidences of Freemasonry Explained*. No work with such an amount of facts in reference to the Masonic system had ever before been published by any author. It will forever remain as a monument of his vast research and his extensive reading. But it would be no brief task to enumerate merely the titles of the many works which he produced for the instruction of the Craft. A few of them must suffice. These are the *Revelations of a Square*, a sort of Masonic romance, detailing, in a fictitious form, many of the usages of the last centuries, with anecdotes of the principal Masons of that period; *The Golden Remains of the Early Masonic Writers*, in 5 volumes, each of which contains an interesting introduction by the editor; *The Book of the Lodge*, a useful manual, intended as a guide to the ceremonies of the Order; *The Symbol of Glory*, intended to show the object and end of Freemasonry; *A Mirror for the Johannite Masons*, in which he discusses the question of the dedication of Lodges to the two Saints John; *The Origin and Insignia of the Royal Arch Degree*, a title which explains itself; *A Dictionary of Symbolic Masonry*, by no means the best of his works. Almost his last contribution to Masonry was his *Institutes of Masonic Jurisprudence*, a book in which he expressed views of law that did not meet with the universal concurrence of his English readers. Besides these elaborate works, Dr. Oliver was a constant contributor to the early volumes of the London *Freemasons' Quarterly Review*, and published a valuable article, "On the Gothic Constitutions," in the *American Quarterly Review of Freemasonry*.

The great error of Dr. Oliver, as a Masonic teacher, was a too easy credulity or a too great warmth of imagination, which led him to accept without hesitation the crude theories of previous writers, and to recognize documents and legends as unquestionably authentic whose truthfulness subsequent researches have led most Masonic scholars to doubt or to deny. His statements, therefore, as to the origin or the history of the Order, have to be received with many grains of allowance. Yet it must be acknowledged that no writer in the English language has ever done so much to elevate the scientific character of Freemasonry.

Dr. Oliver was in fact the founder of what may be called the literary school of Masonry. Bringing to the study of the Institution an amount of archeological learning but seldom surpassed, an inexhaustible fund of multifarious reading, and all the laborious researches of a genuine scholar, he gave to Freemasonry a literary and philosophic character which has induced many succeeding scholars to devote themselves to those studies which he had made so attractive. While his erroneous theories and his fanciful speculations will be rejected, the form and direction that he has given to Masonic speculations will remain, and to him must be accredited the enviable title of the *Father of Anglo-Saxon Masonic Literature*.

In reference to the personal character of Dr. Oliver, a contemporary journalist (*Stanford Mercury*) has said that he was of a kind and genial disposition, charitable in the highest sense of the word, courteous, affable, self-denying, and beneficent; humble, unassuming, and unaffected; ever ready to oblige, easy of approach, and amiable, yet firm in the right.

Dr. Oliver's theory of the system of Freemasonry may be briefly stated in these words: He believed that the Order was to be found in the earliest periods of recorded history. It was taught by Seth to his descendants, and practised by them under the name of Primitive or Pure Freemasonry. It passed over to Noah, and at the dispersion of mankind suffered a division into Pure and Spurious. Pure Freemasonry descended through the Patriarchs to Solomon, and thence on to the present day. The Pagans, although they had slight glimmerings of the Masonic truths which had been taught by Noah, greatly corrupted them, and presented in their mysteries a system of initiation to which he gave the name of the Spurious Freemasonry of Antiquity. These views he had developed and enlarged and adorned out of the similar but less definitely expressed teachings of Hutchinson. Like that writer also, while freely admitting the principle of religious tolerance, he contended for the strictly Christian character of the Institution, and that, too, in the narrowest sectarian view, since he believed that the earliest symbols taught the dogma of the Trinity, and that Christ was meant by the Masonic reference to the Deity under the title of Great Architect of the Universe.

Omega. See *Alpha and Omega*.

Omnific Word. The Tetragrammaton is so called because of the omnific powers attributed by the Kabbalists to its possession and true pronunciation. (See *Tetragrammaton*.) The term is also applied to the most significant word in the Royal Arch system.

On. This is a significant word in Royal Arch Masonry, and has been generally explained as being the name by which Jehovah was worshiped among the Egyptians. As this has been recently denied, and the word asserted to be only the name of a city in Egypt, it is proper that some inquiry should be made into the authorities on the subject.

The first mention of On in the Bible is in the history of Joseph, to whom Pharaoh gave "to wife Asenath, the daughter of Poti-pherah, priest of On." The city of On was in Lower Egypt, between the Nile and the Red Sea, and "adorned," says Philippson, "by a gorgeous temple of the sun, in which a numerous priesthood officiated."

The investigations of modern Egyptologists have shown that this is an error. On was the name of a city where the sun-god was worshiped, but On was not the name of that god.

Champollioin, in his *Dictionnaire Egyptien*,  gives the phonetic characters, with the figurative symbols of a serpent and disk, and a seated figure, as the name of the sun-god. Now, of these two characters, the upper one has the power of R, and the lower of A, and hence the name of the god is *Ra*. And this is the concurrent testimony of Bunsen, Lepsius, Gliddon, and all recent authorities.

But although On was really the name of a city, the founders of the Royal Arch had, with the lights then before them, assumed that it was the name of a god, and had so incorporated it with their system. With better light than theirs, we can no longer accept their definition; yet the word may still be retained as a symbol of the Egyptian god. I know not who has power to reject it; and if scholars preserve, outside of the symbolism, the true interpretation, no harm will be done. It is not the only significant word in Masonry whose old and received meaning has been shown to be incorrect, and sometimes even absurd. Higgins (*Celt. Druids*, 171) quotes an Irish commentator as showing that the name AIN or ON was the name of a triad of gods in the Irish language. "All etymologists," Higgins continues, "have supposed the word On to mean the sun; but how the name arose has not before been explained." In another work (*Anacalypsis*, vol. i., p. 109), Higgins makes the following important remarks: "Various definitions are given of the word ON; but they are all unsatisfactory. It is written in the Old Testament in two ways, אוֹן, *aun*, and אן, *an*. It is usually rendered in English by the word On. This word is supposed to mean the sun, and the Greeks translated it by the word ἥλιος, or Sol. But I think it only stood for the sun, as the emblem of the procreative power of nature." Bryan says (*Ant. Mythol.*, i., 19), when speaking of this word: "On, Eon or Aon, was another title of the sun among the Amonians. The Seventy, where the word occurs in the Scriptures, interpret it the sun, and call the city of On, Heliopolis; and the Coptic Pentateuch renders the city On by the city of the sun." Plato, in his *Timæus*, says: "Tell me of the god ON, which is, and never knew beginning." And although Plato may have been here thinking of the Greek word ΩΝ, which means *Being*, it is not improbable that he may have referred to the god worshiped at On, or Heliopolis, as it was thence that the Greeks derived so much of their learning. It would be vain to attempt to make an analogy between the Hindu sacred word AUM and the Egyptian ON. The fact that the M in the former word is the initial of some secret word, renders the conversion of it into N impossible, because it would thereby lose its signification.

The old Masons, misled by the authority of St. Cyril, and by the translation of the name of the city into "City of the Sun" by the Hebrews and the Greeks, very naturally supposed that On was the Egyptian sun-god, their supreme deity, as the sun always was, wherever he was worshiped. Hence, they appropriated that name as a sacred word explanatory of the Jewish Tetragrammaton.

Onech. (Heb. עֹנֶךְ.) The bird Phœnix, named after Enoch or Phenoch. Enoch signifies initiation. The Phœnix, in Egyptian mythological sculptures, as a bird, is placed in the mystical palm-tree. The Phœnix is the representative of eternal and continual regeneration, and is the Holy Spirit which brooded as a dove over the face of the waters, the dove of Noah and of Hasisatra or Xysuthrus (which see), which bore a sprig in its mouth.

Ontario. Lodge No. 156, in the Eighth Regiment of Foot, appears to have been the first Lodge to hold meetings in this Province, at Fort Niagara, about 1755–80. From 1780 to 1792 some ten lodges appear to have worked in what was called "Upper Canada." Some chartered by England, others by the Provincial Grand Lodge at Quebec, among them St. James in the Kings' Rangers, No. 14, at Cataraqui (Kingston), 1781; St. John's, No. 15, at Michilimakinac (Michigan), then part of Canada; St. John's, No. 19, at Niagara and Oswegatchie Lodge, 1786, at Elizabethtown (Brockville).

On March 7, 1792, Bro. William Jarvis was appointed Provincial Grand Master of Upper Canada by the "Ancient" or "Athol" Grand Lodge of England. Bro. Jarvis resided at Newark (Niagara), the then capital of the Province. During his Grand Mastership, 1792 to 1804, twenty warrants for lodges were issued.

In 1797 Bro. Jarvis removed from Newark to York (now Toronto).

The Brethren at Niagara continued to be active and enthusiastic, and urged Bro. Jarvis to assemble Grand Lodge there, but he refused. This refusal caused much dissatisfaction, and the Brethren of Niagara District met in 1803 and elected Bro. Geo. Forsyth as Provincial Grand Master, and trouble and friction ensued.

In 1817, at Kingston, a Grand Convention was called by the Lodges in the Midland District under R. W. Bro. Ziba M. Phillips. All the lodges attended excepting those in the Niagara District. This convention was held annually during the years 1817, 1818, 1820, 1821, 1822.

After repeated entreaty to England during these years, R. W. Bro. Simon McGillivray came to Canada in September, 1822, with authority from the Duke of Sussex to reorganize the Craft in Upper Canada. The Second Provincial Grand Lodge was thus formed at York in 1822, with R. W. Bro. Simon McGillivray as Provincial Grand Master, and met regularly up to 1830, but

the Provincial Grand Lodge became dormant and remained so until 1845, when Masonic enthusiasm once more gained the ascendency. An urgent appeal was sent out and a Third Provincial Grand Lodge organized in Hamilton with Bro. Sir Allan MacNab Provincial Grand Master of "Canada West," appointed by the Earl of Zetland. This body continued work until 1858.

In 1853 a number of the lodges holding Irish Warrants organized a Grand Lodge, but it was not very successful. They then endeavored to secure the co-operation of the Provincial Grand Lodge in forming a Grand Lodge for Canada, but the Provincial Grand Body declined. But Home Rule and a self-governing body for Canada was the idea uppermost and would not down, and finally, on October 10, 1855, a convention of all the lodges in the two Provinces was called at Hamilton and the Grand Lodge of Canada was formed. Forty-one lodges were represented, twenty-eight in Canada West (Ontario) and thirteen in Canada East (Quebec), and M. W. Bro. William Mercer Wilson was elected Grand Master.

In September, 1857, the Provincial Grand Lodge under England met and resolved itself into an independent Grand Lodge, under the name of "Ancient Grand Lodge of Canada," but the next year in July, 1858, they united with the Grand Lodge of Canada. In October, 1869, the majority of the lodges in the Province of Quebec held a convention and decided to form a Grand Lodge for that Province. The Grand Lodge of Canada strenuously opposed this new body, and an edict of suspension covering all the lodges and Brethren taking part was issued. The Grand Lodge of Quebec, however, becoming duly recognized by all the leading Grand Lodges of the world, the Grand Lodge of Canada, in 1874, likewise decided to do the same and withdrew from the Province, all the lodges of her obedience joining the Quebec Grand Body. In 1875 a schism occurred and a number of Brethren organized a "Grand Lodge of Ontario." This breach was finally healed and the Brethren and lodges became of allegiance to the Grand Lodge of Canada in 1896.

In 1886 the words "in the Province of Ontario" were added to the title of the "Grand Lodge of Canada."

Onyx, שֹׁהַם. (*Shohem.*) The second stone in the fourth row of the high priest's breastplate. It is of a bluish-black color, and represented the tribe of Joseph.

Opening of the Lodge. The necessity of some preparatory ceremonies, of a more or less formal character, before proceeding to the despatch of the ordinary business of any association, has always been recognized. Decorum and the dignity of the meeting alike suggest, even in popular assemblies called only for a temporary purpose, that a presiding officer shall, with some formality, be inducted into the chair, and he then, to use the ordinary phrase, "opens" the meeting with the appointment of his necessary assistants, and with the announcement, in an address to the audience, explanatory of the objects that have called them together.

If secular associations have found it expedient, by the adoption of some preparatory forms, to avoid the appearance of an unseeming abruptness in proceeding to business, it may well be supposed that religious societies have been still more observant of the custom, and that, as their pursuits are more elevated, the ceremonies of their preparation for the object of their meeting should be still more impressive.

In the Ancient Mysteries (those sacred rites which have furnished so many models for Masonic symbolism) the opening ceremonies were of the most solemn character. The sacred herald commenced the ceremonies of opening the greater initiations by the solemn formula of "Depart hence, ye profane!" to which was added a proclamation which forbade the use of any language which might be deemed of unfavorable augury to the approaching rites.

In like manner a Lodge of Masons is opened with the employment of certain ceremonies in which, that attention may be given to their symbolic as well as practical importance, every member present is expected to take a part.

These ceremonies, which slightly differ in each of the degrees—but differ so slightly as not to affect their general character—may be considered, in reference to the several purposes which they are designed to effect, to be divided into eight successive steps or parts.

1. The Master having signified his intention to proceed to the labors of the Lodge, every brother is expected to assume his necessary Masonic clothing and, if an officer, the insignia of his office, and silently and decorously to repair to his appropriate station.

2. The next step in the ceremony is, with the usual precautions, to ascertain the right of each one to be present. It is scarcely necessary to say that, in the performance of this duty, the officers who are charged with it should allow no one to remain who is not either well known to themselves or properly vouched for by some discreet and experienced brother.

3. Attention is next directed to the external avenues of the Lodge, and the officers within and without who are entrusted with the performance of this important duty, are expected to execute it with care and fidelity.

4. By a wise provision, it is no sooner intimated to the Master that he may safely proceed, than he directs his attention to an inquiry into the knowledge possessed by his officers of the duties that they will be respectively called upon to perform.

5. Satisfied upon this point, the Master then announces, by formal proclamation, his intention to proceed to business; and, mindful of the peaceful character of our Institution, he strictly forbids all immoral or unmasonic conduct whereby the harmony of the Lodge may be impeded, under no less a penalty than the by-laws may impose, or a majority of the brethren present may see fit to inflict. Nor, after this, is any brother permitted to leave the Lodge during Lodge hours

(that is, from the time of opening to that of closing) without having first obtained the Worshipful Master's permission

6. Certain mystic rites, which can here be only alluded to, are then employed, by which each brother present signifies his concurrence in the ceremonies which have been performed, and his knowledge of the degree in which the Lodge is about to be opened.

7. It is a lesson which every Mason is taught, as one of the earliest points of his initiation, that he should commence no important undertaking without first invoking the blessing of Deity. Hence the next step in the progress of the opening ceremonies is to address a prayer to the Supreme Architect of the Universe. This prayer, although offered by the Master, is to be participated in by every brother, and, at its conclusion, the audible response of "So mote it be: Amen," should be made by all present.

8. The Lodge is then declared, in the name of God and the Holy Saints John, to be opened in due form on the First, Second, or Third Degree of Masonry, as the case may be.

A Lodge is said to be opened *in the name of God and the Holy Saints John*, as a declaration of the sacred and religious purposes of the meeting, of profound reverence for that Divine Being whose name and attributes should be the constant themes of contemplation, and of respect for those ancient patrons whom the traditions of Masonry have so intimately connected with the history of the Institution.

It is said to be opened *in due form*, to intimate that all that is necessary, appropriate, and usual in the ceremonies, all that the law requires or ancient usage renders indispensable, have been observed.

And it is said to be opened *on*, and not *in*, a certain degree (which latter expression is often incorrectly used) in reference rather to the speculative than to the legal character of the meeting, to indicate, not that the members are to be circumscribed *in* the limits of a particular degree, but that they are met together to unite in contemplation *on* the symbolic teachings and divine lessons, to inculcate which is the peculiar object of that degree.

The manner of opening in each degree slightly varies. In the English system, the Lodge is opened in the First Degree "in the name of T. G. A. O. T. U."; in the Second, "on the square, in the name of the Grand Geometrician of the Universe"; and in the Third, "on the center, in the name of the Most High."

It is prescribed as a ritual regulation that the Master shall never open or close his Lodge without a lecture or part of a lecture. Hence, in each of the degrees a portion of a part of the lecture of that degree is incorporated into the opening and closing ceremonies.

There is in every degree of Masonry, from the lowest to the highest, an opening ceremony peculiar to the degree. This ceremony has always more or less reference to the symbolic lesson which it is the design of the degree to teach, and hence the varieties of openings are as many as the degrees themselves.

Operative Art. Masonry is divided by Masonic writers into two branches, an operative art and a speculative science. The operative art is that which was practised by the Stone-Masons of the Middle Ages. The speculative science is that which is practised by the Freemasons of the present day. The technicalities and usages of the former have been incorporated into and modified by the latter. Hence, Freemasonry is sometimes defined as a speculative science founded on an operative art.

Operative Masonry. Freemasonry, in its character as an operative art, is familiar to everyone. As such, it is engaged in the application of the rules and principles of architecture to the construction of edifices for private and public use, houses for the dwelling-place of man, and temples for the worship of the Deity. It abounds, like every other art, in the use of technical terms, and employs, in practise, an abundance of implements and materials which are peculiar to itself.

This operative art has been the foundation on which has been built the speculative science of Freemasonry. (See *Speculative Masonry*.)

Operative Masons. Workers in stone, who construct material edifices, in contradistinction to Speculative Masons, who construct only spiritual edifices.

Ophites. The Brotherhood of the Serpent, which flourished in the second century, and held that there were two principles of æons and the accompanying theogony. This Egyptian fraternity displayed a living serpent in their ceremonies, which was reverenced as a symbol of wisdom and a type of good.

Option. When a Masonic obligation leaves to the person who assumes it the option to perform or omit any part of it, it is not to be supposed that such option is to be only his arbitrary will or unreasonable choice. On the contrary, in exercising it, he must be governed and restrained by the principles of right and duty, and be controlled by the circumstances which surround the case, so that this option, which at first would seem to be a favor, really involves a great and responsible duty, that of exercising a just judgment in the premises. That which at one time would be proper to perform, at another time and in different circumstances it would be equally proper to omit.

Oral Instruction. Much of the instruction which is communicated in Freemasonry, and, indeed, all that is esoteric, is given orally; and there is a law of the Institution that forbids such instruction to be written. There is in this usage and regulation a striking analogy to what prevailed on the same subject in all the secret institutions of antiquity.

In all the ancient mysteries, the same reluctance to commit the esoteric instructions of the hierophants to writing is apparent; and hence the secret knowledge taught in their initiations was preserved in symbols, the true meaning of which was closely concealed from the profane.

The Druids had a similar regulation; and Cæsar informs us that, although they made use of the letters of the Greek alphabet to record their ordinary or public transactions, yet it was not considered lawful to entrust their

sacred verses to writing, but these were always committed to memory by their disciples.

The secret doctrine of the Kabbala, or the mystical philosophy of the Hebrews, was also communicated in an oral form, and could be revealed only through the medium of allegory and similitude. The Kabbalistic knowledge, traditionally received, was, says Maurice (*Ind. Antiq.*, iv., 548), "transmitted verbally down to all the great characters celebrated in Jewish antiquity, among whom both David and Solomon were deeply conversant in its most hidden mysteries. Nobody, however, had ventured to commit anything of this kind to paper."

The Christian church also, in the age immediately succeeding the apostolic, observed the same custom of oral instruction. The early Fathers were eminently cautious not to commit certain of the mysterious dogmas of their religion to writing, lest the surrounding Pagans should be made acquainted with what they could neither understand nor appreciate. St. Basil (*De Spiritu Sancto*), treating of this subject in the fourth century, says: "We receive the dogmas transmitted to us by writing, and those which have descended to us from the apostles, beneath the mystery of oral tradition; for several things have been handed down to us without writing, lest the vulgar, too familiar with our dogmas, should lose a due respect for them." And he further asks, "How should it ever be becoming to write and circulate among the people an account of those things which the uninitiated are not permitted to contemplate?"

A custom, so ancient as this, of keeping the landmarks unwritten, and one so invariably observed by the Masonic Fraternity, it may very naturally be presumed, must have been originally established with the wisest intentions; and, as the usage was adopted by many other institutions whose organization was similar to that of Freemasonry, it may also be supposed that it was connected, in some way, with the character of an esoteric instruction.

Two reasons, it seems to me, may be assigned for the adoption of the usage among Freemasons.

In the first place, by confining our secret doctrines and landmarks to the care of tradition, all danger of controversies and schisms among Masons and in Lodges is effectually avoided. Of these traditions, the Grand Lodge in each jurisdiction is the interpreter, and to its authoritative interpretation every Mason and every Lodge in the jurisdiction is bound to submit. There is no book, to which every brother may refer, whose language each one may interpret according to his own views, and whose expressions—sometimes, perhaps, equivocal and sometimes obscure—might afford ample sources of wordy contest and verbal criticism. The doctrines themselves, as well as their interpretation, are contained in the memories of the Craft; and the Grand Lodges, as the lawful representatives of the Fraternity, are alone competent to decide whether the tradition has been correctly preserved, and what is its true interpretation. And hence it is that there is no institution in which there have been so few and such unimportant controversies with respect to essential and fundamental doctrines.

In illustration of this argument, Dr. Oliver, while speaking of what he calls the antediluvian system of Freemasonry—a part of which must necessarily have been traditional, and transmitted from father to son, and a part entrusted to symbols—makes the following observations:

"Such of the legends as were communicated orally would be entitled to the greatest degree of credence, while those that were committed to the custody of symbols, which, it is probable, many of the collateral legends would be, were in great danger of perversion, because the truth could only be ascertained by those persons who were intrusted with the secret of their interpretation. And if the symbols were of doubtful character, and carried a double meaning, as many of the Egyptian hieroglyphics of a subsequent age actually did, the legends which they embodied might sustain very considerable alteration in sixteen or seventeen hundred years, although passing through very few hands."

Maimonides (*More Nevochim*, c. lxxi.) assigns a similar reason for the unwritten preservation of the Oral Law. "This," he says, "was the perfection of wisdom in our law, that by this means those evils were avoided into which it fell in succeeding times, namely, the variety and perplexity of sentiments and opinions, and the doubts which so commonly arise from written doctrines contained in books, besides the errors which are easily committed by writers and copyists, whence, afterwards, spring up controversies, schisms, and confusion of parties."

A second reason that may be assigned for the unwritten ritual of Masonry is, that by compelling the craftsman who desires to make any progress in his profession, to commit its doctrines to memory, there is a greater probability of their being thoroughly studied and understood. In confirmation of this opinion, it will, I think, be readily acknowledged by anyone whose experience is at all extensive, that, as a general rule, those skilful brethren who are technically called "bright Masons," are better acquainted with the esoteric and unwritten portion of the lectures, which they were compelled to acquire under a competent instructor, and by oral information, than with that which is published in the Monitors, and, therefore, always at hand to be read.

Cæsar (*Bell. Gall.*, vi., 14) thought that this was the cause of the custom among the Druids, for, after mentioning that they did not suffer their doctrines to be committed to writing, he adds: "They seem to me to have adopted this method for two reasons: that their mysteries might be hidden from the common people, and to exercise the memory of their disciples, which would be neglected if they had books on which they might rely, as, we find, is often the case."

A third reason for this unwritten doctrine of Masonry, and one, perhaps, most familiar to the Craft, is also alluded to by Cæsar in the case of the Druids, "because they did not

wish their doctrines to be divulged to the common people." Maimonides, in the conclusion of the passage which we have already quoted, makes a similar remark with respect to the oral law of the Jews. "But if," says he, "so much care was exercised that the oral law should not be written in a book and laid open to all persons, lest, peradventure, it should become corrupted and depraved, how much more caution was required that the secret interpretations of that law should not be divulged to every person, and pearls be thus thrown to swine." "Wherefore," he adds, "they were intrusted to certain private persons, and by them were transmitted to other educated men of excellent and extraordinary gifts." And for this regulation he quotes the Rabbis, who say that the secrets of the law are not delivered to any person except a man of prudence and wisdom.

It is, then, for these excellent reasons—to avoid idle controversies and endless disputes; to preserve the secrets of our Order from decay; and, by increasing the difficulties by which they are to be obtained, to diminish the probability of their being forgotten; and, finally, to secure them from the unhallowed gaze of the profane—that the oral instruction of Masonry was first instituted, and still continues to be religiously observed. Its secret doctrines are the precious jewels of the Order, and the memories of Masons are the well-guarded caskets in which those jewels are to be preserved with unsullied purity. And hence it is appropriately said in our ritual, that "the attentive ear receives the sound from the instructive tongue, and the secrets of Freemasonry are safely lodged in the depository of faithful breasts."

Oral Law. The Oral Law is the name given by the Jews to the interpretation of the written code, which is said to have been delivered to Moses at the same time, accompanied by the Divine command: "Thou shalt not divulge the words which I have said to thee out of my mouth." The Oral Law was, therefore, never entrusted to books; but, being preserved in the memories of the judges, prophets, priests, and other wise men, was handed down, from one to the other, through a long succession of ages.

Maimonides has described, according to the Rabbinical traditions, the mode adopted by Moses to impress the principles of this Oral Law upon the people. As an example of perseverance in the acquirement of information by oral instruction, it may be worthy of the consideration and imitation of all those Masons who wish to perfect themselves in the esoteric lessons of their Institution.

When Moses had descended from Mount Sinai, and had spoken to the people, he retired to his tent. Here he was visited by Aaron, to whom, sitting at his feet, he recited the law and its explanation, as he had received it from God. Aaron then rose and seated himself on the right hand of Moses. Eleazar and Ithamar, the sons of Aaron, now entered the tent, and Moses repeated to them all that he had communicated to their father; after which, they seated themselves, one on the left hand of Moses and the other on the right hand of Aaron. Then went in the seventy elders, and Moses taught them, in the same manner as he had taught Aaron and his sons. Afterward, all of the congregation who desired to know the Divine will came in; and to them, also, Moses recited the law and its interpretation, in the same manner as before. The law, thus orally delivered by Moses, had now been heard four times by Aaron, three times by his sons, twice by the seventy elders, and once by the rest of the people. After this, Moses withdrawing, Aaron repeated all that he had heard from Moses, and retired; then Eleazar and Ithamar repeated it, and also withdrew; and, finally, the same thing was done by the seventy elders; so that each of them having heard the law repeated four times, it was thus, finally, fixed in their memories.

The *written* law, divided by the Jewish lawgivers into 613 precepts, is contained in the Pentateuch. But the *oral* law, transmitted by Moses to Joshua, by him to the elders, and from them conveyed by traditionary relation to the time of Judah the Holy, was by him, to preserve it from being forgotten and lost, committed to writing in the work known as the Mishna. And now, no longer an Oral Law, its precepts are to be found in that book, with the subsidiary aid of the Constitutions of the prophets and wise men, the Decrees of the Sanhedrim, the decisions of the Judges, and the Expositions of the Doctors.

Orator. An officer in a Lodge whose duty it is to explain to a candidate after his initiation the mysteries of the degree into which he has just been admitted. The office is therefore, in many respects, similar to that of a lecturer. The office was created in the French Lodges early in the eighteenth century, soon after the introduction of Masonry into France. A writer in the London *Freemasons' Magazine* for 1859 attributes its origin to the constitutional deficiency of the French in readiness of public speaking. From the French it passed to the other continental Lodges, and was adopted by the Scottish Rite. The office is not recognized in the English and American system, where its duties are performed by the Worshipful Master. [Though a few Lodges under the English Constitution do appoint an Orator, e. g., the Lodge of Antiquity, No. 2, the Pilgrim Lodge, No. 238, the Constitutional Lodge, No. 294, and the La Césarée Lodge, No. 590.]

Order. An Order may be defined to be a brotherhood, fellowship, or association of certain persons, united by laws and statutes peculiar to the society, engaged in a common object or design, and distinguished by particular habits, ensigns, badges, or symbols.

Johnson's definition is that an Order is "a regular government, a society of dignified persons distinguished by marks of honor, and a religious fraternity." In all of these senses Freemasonry may be styled an Order.

Its government is of the most regular and systematic character; men the most eminent for dignity and reputation have been its members; and if it does not constitute a religion in itself, it is at least religion's handmaid.

The ecclesiastical writers define an Order to be a congregation or society of religious persons, governed by particular rules, living under the same superior, in the same manner, and wearing the same habit; a definition equally applicable to the society of Freemasons. These ecclesiastical Orders are divided into three classes: 1. Monastic, such as the Benedictines and the Augustinians. 2. The Mendicant, as the Dominicans and the Franciscans. 3. The Military, as the Hospitalers, the Templars, and the Teutonic Knights. Only the first and the third have any connection with Freemasonry; the first because it was by them that architecture was fostered, and the Masonic gilds patronized in the Middle Ages; and the third because it was in the bosom of Freemasonry that the Templars found a refuge after the dissolution of their Order.

Order Book. The book to which all appeals were made, in the Order of Strict Observance, as to matters of history, usage, or ritual. It was invariably bound in red.

Order Name. The name or designation assumed by the Illuminati, the members of the Rite of Strict Observance, and of the Royal Order of Scotland, was called the Order Name, or the Characteristic Name. (See *Eques.*)

The Illuminati selected classical names, of which the following are specimens:

Weishaupt	was	Spartacus.
Knigge	"	Philo.
Bode	"	Amelius.
Nicolai	"	Lucian.
Westenreider	"	Pythagoras.
Constanza	"	Diomedes.
Zwack	"	Cato.
Count Savioli	"	Brutus.
Busche	"	Bayard.
Ecker	"	Saladin.

The members of the Strict Observance formed their Order Names in a different way. Following the custom of the combatants in the old tournaments, each called himself an *eques*, or knight of some particular object; as, Knight of the Sword, Knight of the Star, etc. Where one belonged both to this Rite and to that of Illuminism, his Order Name in each was different. Thus Bode, as an Illuminatus, was, we have seen, called "Amelius," but as a Strict Observant, he was known as "Eques à lilio convallium," or Knight of the Lily-of-the-Valleys. The following examples may suffice. A full list will be found in Thory's *Acta Latomorum.*

Hund was Eques ab ense = Knight of the Sword.
Jacobi was Eques à stellâ = Knight of the Star.
Count Bruhl was Eques à gladio ancipiti = Knight of the Double-edged Sword.
Bode was Eques à lilio convallium = Knight of the Lily-of-the-Valleys.
Beyerle was Eques à fasciâ = Knight of the Girdle.
Berend was Eques à septem stellis = Knight of the Seven Stars.
Decker was Eques à plagula = Knight of the Curtain.
Lavater was Eques ab Æsculapio = Knight of Esculapius.
Seckendorf was Eques à capricorno = Knight of Capricorn.
Prince Charles Edward was Eques à sole aureo = Knight of the Golden Sun.
Zinnendorf was Eques à lapide nigro = Knight of the Black Stone.

Order of Business. In every Masonic body, the by-laws should prescribe an "Order of Business," and in proportion as that order is rigorously observed will be the harmony and celerity with which the business of the Lodge will be despatched.

In Lodges whose by-laws have prescribed no settled order, the arrangement of business is left to the discretion of the presiding officer, who, however, must be governed, to some extent, by certain general rules founded on the principles of parliamentary law, or on the suggestions of common sense.

The order of business may, for convenience of reference, be placed in the following tabular form:

1. Opening of the Lodge.
2. Reading and confirmation of the minutes.
3. Reports on petitions.
4. Balloting for candidates.
5. Reports of special committees.
6. Reports of standing committees.
7. Consideration of motions made at a former meeting, if called up by a member.
8. New business.
9. Initiations.
10. Reading of the minutes for information and correction.
11. Closing of the Lodge.

Order of Christ. See *Christ, Order of.*

Order of the Temple. See *Temple, Order of the.*

Order, Rules of. Every permanent deliberative body adopts a code of rules of order to suit itself; but there are certain rules derived from what may be called the common law of Parliament, the wisdom of which having been proven by long experience, that have been deemed of force at all times and places, and are, with a few necessary exceptions, as applicable to Lodges as to other societies.

The rules of order, sanctioned by uninterrupted usage and approved by all authorities, may be enumerated under the following distinct heads, as applied to a Masonic body:

1. Two independent original propositions cannot be presented at the same time to the meeting.

2. A subsidiary motion cannot be offered out of its rank of precedence.

3. When a brother intends to speak, he is required to stand up in his place, and to address himself always to the presiding officer.

4. When two or more brethren rise nearly at the same time, the presiding officer will

indicate, by mentioning his name, the one who, in his opinion, is entitled to the floor.

5. A brother is not to be interrupted by any other member, except for the purpose of calling him to order.

6. No brother can speak oftener than the rules permit; but this rule may be dispensed with by the Master.

7. No one is to disturb the speaker by hissing, unnecessary coughing, loud whispering, or other unseemly noise, nor should he pass between the speaker and the presiding officer.

8. No personality, abusive remarks, or other improper language should be used by any brother in debate.

9. If the presiding officer rises to speak while a brother is on the floor, that brother should immediately sit down, that the presiding officer may be heard.

10. Everyone who speaks should speak to the question.

11. As a sequence to this, it follows that there can be no speaking unless there be a question before the Lodge. There must always be a motion of some kind to authorize a debate.

Orders of Architecture. An order in architecture is a system or assemblage of parts subject to certain uniform established proportions regulated by the office which such part has to perform, so that the disposition, in a peculiar form, of the members and ornaments, and the proportion of the columns and pilasters, is called an order. There are five orders of architecture, the Doric, Ionic, Corinthian, Tuscan, and Composite—the first three being of Greek and the last two of Italian origin. (See each under its respective title.)

Considering that the orders of architecture must have constituted one of the most important subjects of contemplation to the Operative Masons of the Middle Ages, and that they afforded a fertile source for their symbolism, it is strange that so little allusion is made to them in the primitive lectures and in the earliest catechisms of the last century. In the earliest catechism extant, they are simply enumerated, and said to answer "to the base, perpendicular, diameter, circumference, and square"; but no explanation is given of this reference. Nor are they referred to in the "Legend of the Craft," or in any of the Old Constitutions. Preston, however, introduced them into his system of lectures, and designated the three most ancient orders—the Ionic, Doric, and Corinthian—as symbols of wisdom, strength, and beauty, and referred them to the three original Grand Masters. This symbolism has ever since been retained; and, notwithstanding the reticence of the earlier ritualists, there is abundant evidence, in the architectural remains of the Middle Ages, that it was known to the old Operative Freemasons.

Orders of Architecture, Egyptian. The Egyptians had a system of architecture peculiar to themselves, which, says Barlow (*Essays on Symbolism*, p. 30), "would indicate a people of grand ideas, and of confirmed religious convictions." It was massive, and without the airy proportions of the Greek orders. It was, too, eminently symbolic, and among its ornaments the lotus leaf and plant predominated as a symbol of regeneration. Among the peculiar forms of the Egyptian architecture were the fluted column, which suggested the Ionic order to the Greeks, and the basket capital adorned with the lotus, which afterward became the Corinthian. To the Masonic student, the Egyptian style of architecture becomes interesting, because it was undoubtedly followed by King Solomon in his construction of the Temple. The great similarity between the pillars of the porch and the columns in front of Egyptian temples is very apparent. Our translators have, however, unfortunately substituted the *lily* for the *lotus* in their version.

Orders of Knighthood. An order of knighthood is a confraternity of knights bound by the same rules. Of these there are many in every kingdom of Europe, bestowed by sovereigns on their subjects as marks of honor and rewards of merit. Such, for instance, are in England the Knights of the Garter; in Scotland the Knights of Saint Andrew; and in Ireland the Knights of Saint Patrick. But the only Orders of Knighthood that have had any historical relation to Masonry, except the Order of Charles XII. in Sweden, are the three great religious and military Orders which were established in the Middle Ages. These are the Knights Templar, the Knights Hospitalers or Knights of Malta, and the Teutonic Knights, each of which may be seen under its respective title. Of these three, the Masons can really claim a connection only with the Templars. They alone had a secret initiation, and with them there is at least traditional evidence of a fusion. The Knights of Malta and the Teutonic Knights have always held themselves aloof from the Masonic Order. They never had a secret form of initiation; their reception was open and public; and the former Order, indeed, during the latter part of the eighteenth century, became the willing instruments of the Church in the persecution of the Masons who were at that time in the island of Malta. There is, indeed, a Masonic degree called Knight of Malta, but the existing remnant of the historical order has always repudiated it. With the Teutonic Knights, the Freemasons have no other connection than this, that in some of the high degrees their peculiar cross has been adopted. An attempt has been made, but without reason, to identify the Teutonic Knights with the Prussian Knights, or Noachites.

Orders of the Day. In parliamentary law, propositions which are appointed for consideration at a particular hour and day are called the orders of the day. When the day arrives for their discussion, they take precedence of all other matters, unless passed over by mutual consent or postponed to another day. The same rules in reference to these orders prevail in Masonic as in other assem-

blies. The parliamentary law is here applicable without modification to Masonic bodies.

Ordinacio. The Old Constitutions known as the Halliwell or Regius MS. (fourteenth century) speak of an *ordinacio* in the sense of a law. "*Alia ordinacio artis gemetriæ.*" (L. 471.) It is borrowed from the Roman law, where *ordinatio* signified an imperial edict. In the Middle Ages, the word was used in the sense of a statute, or the decision of a judge.

Ordination. At the close of the reception of a neophyte into the order of Elect Cohens, the Master, while communicating to him the mysterious words, touched him with the thumb, index, and middle fingers (the other two being closed) on the forehead, heart, and side of the head, thus making the figure of a triangle. This ceremony was called the *ordination*.

Ordo ab Chao. *Order out of Chaos.* A motto of the Thirty-third Degree, and having the same allusion as *lux e tenebris*, which see. The invention of this motto is to be attributed to the Supreme Council of the Ancient and Accepted Scottish Rite at Charleston, and it is first met with in the Patent of Count de Grasse, dated February 1, 1802. When De Grasse afterward carried the Rite over to France and established a Supreme Council there, he changed the motto, and, according to Lenning, *Ordo ab hoc* was used by him and his Council in all the documents issued by them. If so, it was simply a blunder.

Oregon. The first Lodges instituted in Oregon were under Warrants from the Grand Lodge of California, in the year 1849. On August 16, 1851, a convention of three Lodges was held in Oregon City, and the Grand Lodge of Oregon was there organized, Berryman Jennings being elected Grand Master. The Grand Chapter was organized at Salem, September 18, 1860. Templarism was introduced by the organization of Oregon Commandery, No. 1, at Oregon City, on July 24, 1860.

Organist, Grand. An officer in the Grand Lodge of England, Scotland, and Ireland whose duty it is to superintend the musical exercises on private and public occasions. He must be a Master Mason, and is required to attend the Quarterly and other communications of the Grand Lodge. His jewel is an antique lyre. Grand Lodges in this country do not recognize such an officer. But an organist has been recently employed since the introduction of musical services into Lodge ceremonies by some Lodges.

Organization of the Grand Lodges. See *Grand Lodge*.

Orient. The East. The place where a Lodge is situated is sometimes called its "Orient," but more properly its "East." The seat of a Grand Lodge has also sometimes been called its "Grand Orient"; but here "Grand East" would, perhaps, be better. The term "Grand Orient" has been used to designate certain of the Supreme Bodies on the Continent of Europe, and also in South America; as, the Grand Orient of France, the Grand Orient of Portugal, the Grand Orient of Brazil, the Grand Orient of New Grenada, etc. The title always has reference to the East as the place of honor in Masonry. (See *East, Grand.*)

Orient, Grand. See *Grand Orient.*

Orient, Grand Commander of the. (*Grand Commandeur d'Orient.*) The Forty-third Degree of the Rite of Mizraim.

Orient, Interior. A name sometimes used in Germany to designate a Grand Chapter or superintending body of the higher degrees.

Orient of France, Grand. See *France.*

Orient, Order of the. (*Ordre d'Orient.*) An Order founded, says Thory (*Act. Lat.*, i., 330), at Paris, in 1806, on the system of the Templars, to whom it traced its origin.

Oriental Chair of Solomon. The seat of the Master in a Symbolic Lodge, and so called because the Master is supposed symbolically to fill the place over the Craft once occupied by King Solomon. For the same reason, the seat of the Grand Master in the Grand Lodge receives the same appellation. In England it is called the *throne*.

Oriental Philosophy. A peculiar system of doctrines concerning the Divine Nature which is said to have originated in Persia, its founder being Zoroaster, whence it passed through Syria, Asia Minor, and Egypt, and was finally introduced among the Greeks, whose philosophical systems it at times modified. Pliny calls it "a magical philosophy," and says that Democritus, having traveled into the East for the purpose of learning it, and returning home, taught it in his mysteries. It gave birth to the sect of Gnostics, and most of it being adopted by the school of Alexandria, it was taught by Philo, Jamblichus, and other disciples of that school. Its essential feature was the theory of emanations (which see). And the Oriental Philosophy permeates, sometimes to a very palpable extent, Ineffable, Philosophic, and Hermetic Masonry, being mixed up and intertwined with the Jewish and Kabbalistic Philosophy. A knowledge of the Oriental Philosophy is therefore essential to the proper understanding of these high degrees.

Oriental Rite. The title first assumed by the Rite of Memphis.

Orientation. The orientation of a Lodge is its situation due east and west. The word is derived from the technical language of architecture, where it is applied, in the expression "orientation of churches," to designate a similar direction in building. Although Masonic Lodges are still, when circumstances will permit, built on an east and west direction, the explanation of the usage, contained in the old lectures of the last century, that it was "because all chapels and churches are, or ought to be so," has become obsolete, and other symbolic reasons are assigned. Yet there can be no doubt that such was really the origin of the usage. The orientation of churches was a principle of ecclesiastical architecture very generally observed by builders, in accordance with ecclesiastical law from the earliest times after the apostolic age. Thus in the Apostolic Constitutions, which, although falsely attrib-

uted to St. Clement, are yet of great antiquity, we find the express direction, "sit ædes oblonga ad orientem versus"—*let the church be of an oblong form, directed to the east*—a direction which would be strictly applicable in the building of a Lodge room. St. Charles Borromeo, in his *Instructiones Fabricæ Ecclesiasticæ*, is still more precise, and directs that the rear or altar part of the church shall look directly to the east, "in orientem versus recta spectat," and that it shall be not "ad solstitialem sed ad æquinoctialem orientem" —not to the solstitial east, which varies by the deflection of the sun's rising, but to the equinoctial east, where the sun rises at the equinoxes, that is to say, *due east*. But, as Bingham (*Antiq.*, b. viii., c. iii.) admits, although the usage was very general to erect churches toward the east, yet "it admitted of exceptions, as necessity or expediency"; and the same exception prevails in the construction of Lodges, which, although always erected due east and west, where circumstances will permit, are sometimes from necessity built in a different direction. But whatever may be externally the situation of the Lodge with reference to the points of the compass, it is always considered internally that the Master's seat is in the east, and therefore that the Lodge is "situated due east and west."

As to the original interpretation of the usage, there is no doubt that the Masonic was derived from the ecclesiastical, that is, that Lodges were at first built east and west because churches were; nor can we help believing that the church borrowed and Christianized its symbol from the Pagan reverence for the place of sunrising. The admitted reverence in Masonry for the east as the *place of light*, gives to the usage the modern Masonic interpretation of the symbol of orientation.

Oriflamme. The ancient banner which originally belonged to the Abbey of St. Denis, and was borne by the Counts of Vezin, patrons of that church, but which, after the country of Vezin fell into the hands of the French crown, became the principal banner of the kingdom. It was charged with a saltire wavy Or, with rays issuing from the center crossways; Seccee into five points, each bearing a tassel of green silk.

Original Points. The old lectures of the last century, which are now obsolete, contained the following instruction: "There are in Freemasonry twelve original points, which form the basis of the system and comprehend the whole ceremony of initiation. Without the existence of these points, no man ever was, or can be, legally and essentially received into the Order. Every person who is made a Mason must go through all these twelve forms and ceremonies, not only in the first degree, but in every subsequent one."

Origin of Freemasonry. The origin and source whence first sprang the institution of Freemasonry, such as we now have it, has given rise to more difference of opinion and discussion among Masonic scholars than any other topic in the literature of the Institution. Writers on the history of Freemasonry have, at different times, attributed its origin to the following sources. 1. To the Patriarchal religion. 2. To the Ancient Pagan Mysteries. 3. To the Temple of King Solomon. 4. To the Crusaders. 5. To the Knights Templar. 6. To the Roman Colleges of Artificers. 7. To the Operative Masons of the Middle Ages. 8. To the Rosicrucians of the sixteenth century. 9. To Oliver Cromwell, for the advancement of his political schemes. 10. To the Pretender, for the restoration of the House of Stuart to the British throne. 11. To Sir Christopher Wren at the building of St. Paul's Cathedral. 12. To Dr. Desaguliers and his associates in the year 1717. Each of these twelve theories has been from time to time, and the twelfth within a recent period, sustained with much zeal, if not always with much judgment, by their advocates. A few of them, however, have long since been abandoned, but the others still attract attention and find defenders. Dr. Mackey has his own views of the subject in his book *History of Freemasonry*, to which the reader is referred.*

Orleans, Duke of. Louis Philippe Joseph, Duke of Orleans, better known in history by his revolutionary name of Egalité, was the fifth Grand Master of the Masonic Order in France. As Duke of Chartres, the title which he held during the life of his father, he was elected Grand Master in the year 1771, upon the death of the Count de Clermont. Having appointed the Duke of Luxemburg his Substitute, he did not attend a meeting of the Grand Lodge until 1777, but had in the meantime paid much attention to the interests of Masonry, visiting many of the Lodges, and laying the foundation-stone of a Masonic Hall at Bordeaux.

His abandonment of his family and his adhesion to the Jacobins during the revolution, when he repudiated his hereditary title of Duke of Orleans and assumed the republican one of Egalité, forms a part of the history of the times. On the 22d of February, 1793, he wrote a letter to Milsent, the editor, over the signature of "Citoyen Egalité," which was published in the *Journal de Paris*, and which contains the following passages:

"This is my Masonic history. At one time, when certainly no one could have foreseen our revolution, I was in favor of Freemasonry, which presented to me a sort of *image of equality*, as I was in favor of the parliament, which presented a sort of *image of liberty*. I have since *quitted the phantom for the reality*. In the month of December last, the secretary of the Grand Orient having addressed himself to the person who discharged the functions, near me, of secre-

*See *Antiquity of Masonry; Egyptian Mysteries; Roman College Artificers; Como; Comacine Masters; Traveling Masons; Stone-Masons of Middle Ages; Four Old Lodges; Revival; Speculative Masonry.*

tary of the Grand Master, to obtain my opinion on a question relating to the affairs of that society, I replied to him on the 5th of January as follows: 'As I do not know how the Grand Orient is composed, and as, besides, I think that there should be no mystery nor secret assembly in a republic, especially at the commencement of its establishment, I desire no longer to mingle in the affairs of the Grand Orient, nor in the meetings of the Freemasons.'"

In consequence of the publication of this letter, the Grand Orient on May 13, 1793, declared the Grand Mastership vacant, thus virtually deposing their recreant chief. He soon reaped the reward of his treachery and political debasement. On the 6th of November in the same year he suffered death on the guillotine.

Ormus or **Ormesius.** See *Rose Croix of Gold, Brethren of the.*

Ormusd and Ahriman. Ormusd was the principle of good and the symbol of light, and Ahriman the principle of evil and the symbol of darkness, in the old Persian religion. (See *Zoroaster.*)

Ornaments of a Lodge. The lectures describe the ornaments of a Lodge as consisting of the *Mosaic Pavement*, the *Indented Tessel*, and the *Blazing Star*. They are called ornaments because they are really the decorations with which a properly furnished Lodge is adorned. See these respective words.

Ornan the Jebusite. He was an inhabitant of Jerusalem, at the time that that city was called Jebus, from the son of Canaan, whose descendants peopled it. He was the owner of the threshing-floor situated on Mount Moriah, in the same spot on which the Temple was afterward built. This threshing-floor David bought to erect on it an altar to God. (1 Chron. xxi. 18–25.) On the same spot Solomon afterward built the Temple. Hence, in Masonic language, the Temple of Solomon is sometimes spoken of as "the threshing-floor of Ornan the Jebusite." (See *Threshing-Floor.*)

Orphan. The obligation that Masons should care for the children of their deceased brethren has been well observed in the Institution by many Grand Lodges, independent associations of Masons, and of asylums for the support and education of Masonic orphans. Among these, perhaps one of the most noteworthy, is the orphan asylum founded at Stockholm, in 1753, by the contributions of the Swedish Masons, which, by subsequent bequests and endowments, has become one of the richest private institutions of the kind in the world.

Orpheus. There are no less than four persons to whom the ancients gave the name of Orpheus, but of these only one is worthy of notice as the inventor of the mysteries, or, at least, as the introducer of them into Greece. The genuine Orpheus is said to have been a Thracian, and a disciple of Linus, who flourished when the kingdom of the Athenians was dissolved. From him the Thracian or Orphic mysteries derived their name, because he first introduced the sacred rites of initiation and mystical doctrines into Greece. He was, according to fabulous tradition, torn to pieces by Ciconian women, and after his death he was deified by the Greeks. The story, that by the power of his harmony he drew wild beasts and trees to him, has been symbolically interpreted, that by his sacred doctrines he tamed men of rustic and savage disposition. An abundance of fables has clustered around the name of Orpheus; but it is at least generally admitted by the learned, that he was the founder of the system of initiation into the sacred mysteries as practised in Greece. The Grecian theology, says Thomas Taylor—himself the most Grecian of all moderns—originated from Orpheus, and was promulgated by him, by Pythagoras, and by Plato; by the first, mystically and symbolically; by the second, enigmatically and through images; and by the last, scientifically. The mysticism of Orpheus should certainly have given him as high a place in the esteem of the founders of the present system of Speculative Masonry as has been bestowed upon Pythagoras. But it is strange that, while they delighted to call Pythagoras an "ancient friend and brother," they have been utterly silent as to Orpheus.

Orphic Mysteries. These rites were practised in Greece, and were a modification of the mysteries of Bacchus or Dionysus, and they were so called because their institution was falsely attributed to Orpheus. They were, however, established at a much later period than his era. Indeed, M. Freret, who has investigated this subject with much learning in the *Memoires de l'Academie des Inscriptions* (tom. xxiii.), regards the Orphics as a degenerate branch of the school of Pythagoras, formed, after the destruction of that school, by some of its disciples, who, seeking to establish a religious association, devoted themselves to the worship of Bacchus, with which they mingled certain Egyptian practises, and out of this mixture made up a species of life which they called the Orphic life, and the origin of which, to secure greater consideration, they attributed to Orpheus, publishing under his name many apocryphal works.

The Orphic rites differed from the other Pagan rites, in not being connected with the priesthood, but in being practised by a fraternity who did not possess the sacerdotal functions. The initiated commemorated in their ceremonies, which were performed at night, the murder of Bacchus by the Titans, and his final restoration to the supreme government of the universe, under the name of Phanes.

Demosthenes, while reproaching Æschines for having engaged with his mother in these mysteries, gives us some notion of their nature.

In the day, the initiates were crowned with fennel and poplar, and carried serpents in their hands, or twined them around their heads, crying with a loud voice, *enos, sabos*, and danced to the sound of the mystic words, *hyes, attes, attes, hyes.* At night the mystes was bathed in the lustral water, and having

been rubbed over with clay and bran, he was clothed in the skin of a fawn, and having risen from the bath, he exclaimed, "I have departed from evil and have found the good."

The Orphic poems made Bacchus identical with Osiris, and celebrated the mutilation and palingenesis of that deity as a symbol teaching the resurrection to eternal life, so that their design was similar to that of the other Pagan mysteries.

The Orphic initiation, because it was not sacerdotal in its character, was not so celebrated among the ancients as the other mysteries. Plato, even, calls its disciples charlatans. It nevertheless existed until the first ages of the Christian religion, being at that time adopted by the philosophers as a means of opposing the progress of the new revelation. It fell, however, at last, with the other rites of Paganism, a victim to the rapid and triumphant progress of the Gospel.

Osiris. He was the chief god of the old Egyptian mythology, the husband of Isis, and the father of Horus. Jabloniski says that Osiris represented the sun only, but Plutarch, whose opportunity of knowing was better, asserts that, while generally considered as a symbol of the solar orb, some of the Egyptian philosophers regarded him as a river god, and called him Nilus. But the truth is, that Osiris represented the male, active or generative, powers of nature; while Isis represented its female, passive or prolific, powers. Thus, when Osiris was the sun, Isis was the earth, to be vivified by his rays; when he was the Nile, Isis was the land of Egypt, fertilized by his overflow. Such is the mythological or mystical sense in which Osiris was received.

Historically, he is said to have been a great and powerful king, who, leaving Egypt, traversed the world, leading a host of fauns or satyrs, and other fabulous beings in his train, actually an army of followers. He civilized the whole earth, and taught mankind to fertilize the soil and to perform the works of agriculture. We see here the idea which was subsequently expressed by the Greeks in their travels of Dionysus, and the wanderings of Ceres; and it is not improbable that the old Masons had some dim perception of this story, which they have incorporated, under the figure of Euclid, in their "Legend of the Craft."

Osiris, Mysteries of. The Osirian mysteries consisted in a scenic representation of the murder of Osiris by Typhon, the subsequent recovery of his mutilated body by Isis, and his deification, or restoration to immortal life. Julius Firmicus, in his treatise *On the Falsity of the Pagan Religions*, thus describes the object of the Osirian Mysteries: "But in those funerals and lamentations which are annually celebrated in honor of Osiris, the defenders of the Pagan rites pretend a physical reason. They call the seeds of fruit, Osiris; the earth, Isis; the natural heat, Typhon; and because the fruits are ripened by the natural heat and collected for the life of man, and are separated from their natural tie to the earth, and are sown again when winter approaches, this they consider is the death of Osiris; but when the fruits, by the genial fostering of the earth, begin again to be generated by a new procreation, this is the finding of Osiris." This explanation does not essentially differ from that already given in the article *Egyptian Mysteries*. The symbolism is indeed precisely the same—that of a restoration or resurrection from death to life. (See *Egyptian Mysteries*.)

Oterfut. The name of the assassin at the west gate in the legend of the Third Degree, according to some of the high degrees. I have vainly sought the true meaning or derivation of this word, which is most probably an anagram of a name. It was, I think, invented by the Stuart Masons, and refers to some person who was inimical to that party.

Otreb. The pseudonym of the celebrated Rosicrucian Michael Maier, under which he wrote his book on *Death and the Resurrection*. (See *Maier*.)

Ouriel. See *Uriel*.

Out of the Lodge. The charges of a Freemason, compiled by Anderson from the Ancient Records, contain the regulations for the behavior of Masons out of the Lodge under several heads; as, behavior after the Lodge is over, when brethren meet without strangers, in the presence of strangers, at home, and toward a strange brother. Gädicke gives the same directions in the following words:

"A brother Freemason shall not only conduct himself in the Lodge, but also out of the Lodge, as a brother towards his brethren; and happy are they who are convinced that they have in this respect ever obeyed the laws of the Order."

Oval Temples. The temple in the Druidical mysteries was often of an oval form. As the oblong temple was a representation of the inhabited world, whence is derived the form of the Lodge, so the oval temple was a representation of the mundane egg, which was also a symbol of the world. The symbolic idea in both was the same.

Overseer. The title of three officers in a Mark Lodge, who are distinguished as the Master, Senior, and Junior Overseer. The jewel of their office is a square. In Mark Lodges attached to Chapters, the duties of these officers are performed by the three Grand Masters of the Veils.

Ox. The ox was the device on the banner of the tribe of Ephraim. The ox on a scarlet field is one of the Royal Arch banners, and is borne by the Grand Master of the Third Veil.

Oyres de Ornellas, Praçao. A Portuguese gentleman, who was arrested as a Freemason, at Lisbon, in 1776, was thrown into a dungeon, where he remained fourteen months. (See *Alincourt*.)

Ozee. Sometimes Osee. The acclamation of the Scottish Rite is so spelled in many French Cahiers. Properly Hoschea, which Delaunay (*Thuileur*, p. 141) derives from the Hebrew הושׁע, *hossheah*, deliverance, safety, or, as he says, a savior. But see *Hoschea*, where another derivation is suggested.

Oziah. (Heb. עזיה; Latin, *Fortitudo domini*.) A prince of Judah, and the name of the Senior Warden in the Fifth Degree of the French Rite of Adoption.

P

P. The sixteenth letter of the English and Greek alphabets, and the seventeenth of the Hebrew, in which last-mentioned language its numerical value is 80, is formed thus ק, signifying a mouth in the Phœnician. The sacred name of God associated with this letter is פודה, *Phodeh* or *Redeemer*.

Pachacamac. The Peruvian name for the Creator of the universe.

Paganis, Hugo de. The Latinized form of the name of Hugh de Payens, the first Grand Master of the Templars. (See *Payens.*)

Paganism. A general appellation for the religious worship of the whole human race, except of that portion which has embraced Christianity, Judaism, or Mohammedanism. Its interest to the Masonic student arises from the fact that its principal development was the ancient mythology, in whose traditions and mysteries are to be found many interesting analogies with the Masonic system. (See *Dispensations of Religion.*)

Paine, Thomas. A political writer of eminence during the Revolutionary War in America. He greatly injured his reputation by his attacks on the Christian religion. He was not a Mason, but wrote *An Essay on the Origin of Freemasonry*, with no other knowledge of the Institution than that derived from the writings of Smith and Dodd, and the very questionable authority of Prichard's *Masonry Dissected*. He sought to trace Freemasonry to the Celtic Druids. For one so little acquainted with his subject, he has treated it with considerable ingenuity. Paine was born in England in 1737, and died in New York, in 1809.

Palestine, called also the *Holy Land* on account of the sacred character of the events that have occurred there, is situated on the coast of the Mediterranean, stretching from Lebanon south to the borders of Egypt, and from the thirty-fourth to the thirty-ninth degrees of longitude. It was conquered from the Canaanites by the Hebrews under Joshua 1450 years B.C. They divided it into twelve confederate states according to the tribes. Saul united it into one kingdom, and David enlarged its territories. In 975 B.C. it was divided into the two kingdoms of Israel and Judea, the latter consisting of the tribes of Judah and Benjamin, and the former of the rest of the tribes. About 740 B.C., both kingdoms were subdued by the Persians and Babylonians, and after the captivity only the two tribes of Judah and Benjamin returned to rebuild the Temple. With Palestine, or the Holy Land, the mythical, if not the authentic, history of Freemasonry has been closely connected. There stood, at one time, the Temple of Solomon, to which some writers have traced the origin of the Masonic Order; there fought the Crusaders, among whom other writers have sought, with equal boldness, to find the cradle of the Fraternity; there certainly the Order of the Templars was instituted, whose subsequent history has been closely mingled with that of Freemasonry; and there occurred nearly all the events of sacred history that, with the places where they were enacted, have been adopted as important Masonic symbols.

Palestine, Explorations in. The desire to obtain an accurate knowledge of the archeology of Palestine, gave rise in 1866 to an association, which was permanently organized in London, as the "Palestine Exploration Fund," with the Queen as the chief patron, and a long list of the nobility and the most distinguished gentlemen in the kingdom, added to which followed the Grand Lodge of England and forty-two subordinate and provincial Grand Lodges and Chapters. Early in the year 1867 the committee began the work of examination, by mining in and about the various points which had been determined upon by a former survey as essential to a proper understanding of the ancient city, which had been covered up by *débris* from age to age, so that the present profiles of the ground, in every direction, were totally different from what they were in the days of David and Solomon, or even the time of Christ.

Lieutenant Charles Warren, R.E. [as he then was, now Lieut.-General Sir Charles Warren, G.C.M.G., K.C.B., F.R.S.], was sent out with authority to act as circumstances might demand, and as the delicacy and the importance of the enterprise required. He arrived in Jerusalem February 17, 1867, and continued his labors of excavating in many parts of the city, with some interruptions, until 1871, when he returned to England. During his operations, he kept the society in London constantly informed of the progress of the work in which he and his associates were so zealously engaged, in a majority of cases at the imminent risk of their lives and always that of their health. The result of these labors has been a vast accumulation of facts in relation to the topography of the holy city which throw much light on its archeology. A branch of the society has been established in this country, and it is still in successful operation.

Palestine, Knight of. See *Knight of Palestine.*

Palestine, Knight of St. John of. See *Knight of St. John of Palestine.*

Palestine, Order of. Mentioned by Baron de Tschoudy, and said to have been the fountain whence the Chevalier Ramsay obtained his information for the regulation of his system.

Palla. An altar-cloth, also a canopy borne over the head of royalty in Oriental lands.

Palladic Masonry. The title given to the Order of the Seven Sages and the Order of the Palladium. (See *Palladium, Order of the.*)

Palladium, Order of the. An androgynous society of Masonic adoption, established, says Ragon, at Paris in 1737. It made great

pretensions to high antiquity, claiming that it had its origin in the instructions brought by Pythagoras from Egypt into Greece, and having fallen into decay after the decline of the Roman Emperor, it was revived in 1637 by Fénelon, Archbishop of Canbray; all of which is altogether mythical. Fénelon was not born until 1651. It was a very moral society, consisting of two degrees: 1. Adelph; 2. Companion of Ulysses. When a female took the Second Degree, she was called a Companion of Penelope.

Palmer. From the Latin, *palmifer*, a palm-bearer. A name given in the time of the Crusades to a pilgrim, who, coming back from the holy war after having accomplished his vow of pilgrimage, exhibited upon his return home a branch of palm bound round his staff in token of it.

Palmer, Henry L. Born in New York, October 18, 1819. He was the author of the celebrated report, in October, 1849, which resulted in the union of the two Grand Lodges in New York, the "Herring-Phillips" and the "New York" Grand Lodge. Bro. Palmer occupied almost every known position in Craft Masonry, and was the commanding officer of every one of its departments. He was P. G. Master of the G. Encampment of K. T. of the U. S., and G. Commander of the Supreme Council of the A. A. Scottish Rite, Northern Jurisdiction of the U. S. of America. He died on May 7, 1909.

Pantacle. The pentalpha of Pythagoras is so called in the symbolism of High Magic and the Hermetic Philosophy. (See *Pentalpha*.)

Pantheism. A speculative system, which, spiritually considered, identifies the universe with God, and, in the material form, God with the universe. Material Pantheism is subject to the criticism, if not to the accusation, of being atheistic. Pantheism is as aged as religion, and was the system of worship in India, as it was in Greece. Giordano Bruno was burned for his pantheistic opinions at Rome in 1600.

Pantheistic Brotherhood. Described by John Toland, in his *Pantheisticon*, as having a strong resemblance to Freemasonry. The Socratic Lodge in Germany, based on the Brotherhood, was of short duration.

Papworth Manuscript. A manuscript in the possession of Mr. Wyatt Papworth, of London, who purchased it from a bookseller of that city in 1860. As some of the watermarks of the paper on which it is written bear the initials G. R., with a crown as a watermark, it is evident that the manuscript cannot be older than 1714, that being the year in which the first of the Georges ascended the throne. It is most probably of a still more recent date, perhaps 1720. The Rev. A. F. A. Woodford has thus described its appearance: "The scroll was written originally on pages of foolscap size, which were then joined into a continuous roll, and afterwards, probably for greater convenience, the pages were again separated by cutting them, and it now forms a book, containing twenty-four folios, sewed together in a light-brown paper cover. The text is of a bold character, but written so irregularly that there are few consecutive pages which have the same number of lines, the average being about seventeen to the page." The manuscript is not complete, three or four of the concluding charges being omitted, although some one has written, in a hand different from that of the text, the word *Finis* at the bottom of the last page. The manuscript appears to have been simply a copy, in a little less antiquated language, of some older Constitution. It has been published by Bro. Hughan in his *Old Charges of the British Freemasons*. (1872.)

Papyrus. "The papyrus leaf," says J. W. Simons, in his *Egyptian Symbols*, "is

that plant which formed tablets and books, and forms the first letter of the name of the only eternal and all-powerful god of Egypt, *Amon*, who in the beginning of things created the world," whose name signified *occult* or *hidden*. The word עלה, *ole*, which signifies a leaf, and to inscribe on tablets forms עלם, *olm*, the antique origin of things, obscure time, hidden eternity.

The *Turin Funeral Papyrus* is a book published by Dr. Lepsius in original character, but translated by Dr. Birch. This Book of the Dead is invaluable as containing the true philosophic belief of the Egyptians respecting the resurrection and immortality. The manuscript has been gathered from portions which it was obligatory to bury with the dead. The excavations of mummies in Egypt have been fruitful in furnishing the entire work.

Paracelsus. Philippus Aureolus Theophrastus Bombastus Paracelsus de Hohenheim, as he styled himself, was born in Germany in 1493, and died in 1541. He devoted his youth to the study and practise of astrology, alchemy, and magic, and passed many years of his life in traveling over Europe and acquiring information in medicine, of which he proclaimed himself to be the monarch. He was, perhaps, the most distinguished charlatan who ever made a figure in the world. The followers of his school were called Paracelsists, and they continued for more than a century after the death of their master to influence the schools of Germany. Much of the Kabbalistic and mystical science of Paracelsus was incorporated into Hermetic Masonry by the founders of the high degrees.

Paracelsus, Sublime. A degree to be found in the manuscript collections of Peuvret.

Parallel Lines. In every well-regulated Lodge there is found a point within a circle, which circle is imbordered by two perpendicular parallel lines. These lines are representative of St. John the Baptist and St. John the Evangelist, the two great patrons of Masonry to whom our Lodges are dedicated, and who are said to have been "perfect parallels in Christianity as well as Masonry." In those English Lodges which have adopted the "Union System" established by the Grand

Lodge of England in 1813, and where the dedication is "to God and his service," the lines parallel represent Moses and Solomon. As a symbol, the parallel lines are not to be found in the earlier rituals of Masonry. Although Oliver defines the symbol on the authority of what he calls the "Old Lectures," it is not to be found in any anterior to Preston, and even he only refers to the parallelism of the two Sts. John.

Parikchai, Agrouchada. An occult scientific work of the Brahmans. According to a work by Louis Jacolliot, 1884, the Fakirs produced phenomena at will with superior intervention or else with shrewd charlatanism: processes that were known to the Egyptians and Jewish Kabbalists. The doctrines are those known to the Alexandrian school, to the Gauls, and as well to the Christians. In the division of the Kabbala, the first treated of the History of the Genesis or Creation, and taught the science of nature; the second, or Mercaba, of the History of the Chariot, and contained a treatise on theology.

There were three degrees of initiation among the Brahmans:

1st. According to selection, the candidate became a Grihasta, a Pourohita or Fakir, or in twenty years a Guru.

2d. A Sannyassis or Cenobite and Vanaprasthas, and lived in the Temple.

3d. A Sannyassis-Nirvany or Naked Cenobite.

Those of the third degree were visible only once in five years, appearing in a column of light created by themselves, at midnight, and on a stand in the center of a great tank. Strange sounds and terrific shrieks were heard as they were gazed upon as demigods, surrounded by thousands of Hindus.

The government was by a Supreme Council of seventy Brahmans, over seventy years of age, selected from the Nirvany, and chosen to see enforced the *Law of the Lotus*. The Supreme Chief, or Brahmatna, was required to be over eighty years of age, and was looked upon as immortal by the populace. This Pontiff resided in an immense palace surrounded by twenty-one walls.

The primitive holy word composed of the three letters A. U. M., comprises the Vedic trinity, signifying Creation, Preservation, and Transformation, and symbolize all the initiatory secrets of the occult sciences. By some it has been taught that the "*Honover*," or primordial germ, as defined in the Avesta, existed before all else. Also see *Manou*, Book xi., Sloca 265. The following unexplained magical words were always inscribed in two triangles: L'OM. *L'rhom-sh'hrum.* SHO'RIM. *Ramaya-Nahama.*

He who possessed the word greater than the A. U. M. was deemed next to Brahma. The word was transmitted in a sealed box.

The Hindu triad, of which in later times OM is the mystic name, represents the union of the three gods, viz., *a* (Vishnu), *u* (Siva), *m* (Brahma). It may also be typical of the three Vedas. *Om* appears first in the Upanishads as a mystical monosyllable, and is thus set forth as the object of profound meditation. It is usually called *pranava*, more rarely *aksharam*. The Buddhists use *Om* at the beginning of their Vidyā Shad-akshari or mystical formulary in six syllables (viz., Om māni pad me hūm). (See *Pitris Indische Mysterien* and *Aum.*) [C. T. McClenachan.]

Paris, Congresses of. Three important Masonic Congresses have been held in the city of Paris. The first was convened by the Rite of Philalethes in 1785, that by a concourse of intelligent Masons of all rites and countries, and by a comparison of oral and written traditions, light might be educed on the most essential subjects of Masonic science, and on the nature, origin, and historic application as well as the actual state of the Institution. Savalette de Lauges was elected President. It closed after a protracted session of three months, without producing any practical result. The second was called in 1787, as a continuation of the former, and closed with precisely the same negative result. The third was assembled in 1855, by Prince Murat, for the purpose of effecting various reforms in the Masonic system. At this Congress, ten propositions, some of them highly important, were introduced, and their adoption recommended to the Grand Lodges of the world. But the influence of this Congress has not been more successful than that of its predecessors.

Paris Constitutions. A copy of these Constitutions, said to have been adopted in the thirteenth century, will be found in G. P. Depping's *Collection de Documents inedits sur l'Histoire de France.* (Paris, 1837.) A part of this work contains the *Reglemens sur les arts et métiers de Paris, redigés au 13me siecle et connus sous le nom de livre des métiers d'Etienne Boileau.* This treats of the masons, stonecutters, plasterers, and mortar-makers, and, as Steinbrenner (*Or. and Hist. of Mas.*, p. 104) says, "is interesting, not only as exhibiting the peculiar usages and customs of the Craft at that early period, but as showing the connection which existed between the laws and regulations of the French Masons and those of the Steinmetzen of Germany and the Masons of England." A translation of the Paris Constitutions was published in the *Freemasons' Magazine*, Boston, 1863, p. 201. In the year 1743, the "English Grand Lodge of France" published, in Paris, a series of statutes, taken principally from Anderson's work of the editions of 1723 and 1738. It consisted of twenty articles, and bore the title of *General Regulations taken from the Minutes of the Lodges, for the use of the French Lodges, together with the alterations adopted at the General Assembly of the Grand Lodge, December 11, 1743, to serve as a rule of action for the said kingdom.* A copy of this document, says Findel, was translated into German, with annotations, and published in 1856 in the *Zeitschrift für Freimaurer* of Altenberg.

Parliamentary Law. Parliamentary Law, or the *Lex Parliamentaria*, is that code origi-

nally framed for the government of the Parliament of Great Britain in the transaction of its business, and subsequently adopted, with necessary modifications, by the Congress of the United States.

But what was found requisite for the regulation of public bodies, that order might be secured and the rights of all be respected, has been found equally necessary in private societies. Indeed, no association of men could meet together for the discussion of any subject, with the slightest probability of ever coming to a conclusion, unless its debates were regulated by certain and acknowledged rules.

The rules thus adopted for its government are called its parliamentary law, and they are selected from the parliamentary law of the national assembly, because that code has been instituted by the wisdom of past ages, and modified and perfected by the experience of subsequent ones, so that it is now universally acknowledged that there is no better system of government for deliberative societies than the code which has so long been in operation under the name of parliamentary law.

Not only, then, is a thorough knowledge of parliamentary law necessary for the presiding officer of a Masonic body, if he would discharge the duties of the chair with credit to himself and comfort to the members, but he must be possessed of the additional information as to what parts of that law are applicable to Masonry, and what parts are not; as to where and when he must refer to it for the decision of a question, and where and when he must lay it aside, and rely for his government upon the organic law and the ancient usages of the Institution.

Parlirer. In the Lodges of Stone-Masons of the Middle Ages, there was a rank or class of workmen called Parlirers, literally, spokesmen. They were an intermediate class of officers between the Masters of the Lodges and the Fellows, and were probably about the same as our modern Wardens. Thus, in the *Strasbourg Constitutions of 1459*, it is said: "No Craftsman or Mason shall promote one of his apprentices as a parlirer whom he has taken as an apprentice from his rough state, or who is still in the years of apprenticeship," which may be compared with the old English charge that "no Brother can be a Warden until he has passed the part of a Fellow-Craft." (*Constitutions*, 1723, p. 52.) They were called Parlirers, properly, says Heldmann, *Parlierers*, or Spokesmen, because, in the absence of the Masters, they spoke for the Lodge, to traveling Fellows seeking employment, and made the examination. There are various forms of the word. Kloss, citing the *Strasbourg Constitutions*, has *Parlirer;* Krause has, from the same document, *Parlierer*, but says it is usually *Polier;* Heldmann uses *Parlierer*, which has been now generally adopted.

Parole. A *Mot de sémestre* (*q. v.*), communicated by the Grand Orient of France, and in addition an annual word in November, which tends to show at once whether a member is in good standing.

Parrot Masons. One who commits to memory the questions and answers of the catechetical lectures, and the formulas of the ritual, but pays no attention to the history and philosophy of the Institution, is commonly called a *Parrot Mason*, because he is supposed to repeat what he has learned without any conception of its true meaning. In former times, such superficial Masons were held by many in high repute, because of the facility with which they passed through the ceremonies of a reception, and they were generally designated as "Bright Masons." But the progress of Masonry as a science now requires something more than a mere knowledge of the lectures to constitute a Masonic scholar.

Parsees. The descendants of the original fire-worshipers of Persia, or the disciples of Zoroaster, who emigrated to India about the end of the eighth century. There they now constitute a body very little short of a million of industrious and moral citizens, adhering with great tenacity to the principles and practises of their ancient religion. Many of the higher classes have become worthy members of the Masonic fraternity, and it was for their sake principally that Dr. Burnes attempted some years ago to institute his new Order, entitled the Brotherhood of the Olive-Branch, as a substitute for the Christian degrees of Knighthood, from which, by reason of their religion, they were excluded. (See *Olive-Branch in the East, Brotherhood of the,* and *Zendavesta.*)

Particular Lodges. In the Regulations of 1721, it is said that the Grand Lodge consists of the representatives of all the *particular* Lodges on record. (*Constitutions*, 1723, p. 61.) In the modern Constitutions of England, the term used is *private* Lodges. In America, they are called *subordinate* Lodges.

Parts. In the old obligations, which may be still used in some portions of the country, there was a provision which forbade the revelation of any of the *arts, parts, or points of Masonry*. Oliver explains the meaning of the word parts by telling us that it was "an old word for degrees or lectures." (See *Points.*)

Parvin, Theodore S. Born January 15, 1817, in Cumberland County, New Jersey. His journey in life gradually tending westward, he located in Ohio, and graduated in 1837 at the Cincinnati Law School. He was appointed private secretary by Robert Lucas, first Governor of Iowa, in which state he became Judge of the Probate Court and afterward Curator and Librarian of the State University at Iowa City. Bro. Parvin was initiated in Nova Cesarea Lodge, No. 2, Cincinnati, Ohio, March 14, 1838, and raised the 9th of the May following, and the same year demitted and removed to Iowa. He participated in the organization of the first Lodge, Des Moines, No. 1, and also of the second, Iowa Lodge, No. 2, at Muscatine. He was elected Grand Secretary of the Grand Lodge at its organization (1844), and held the office continuously to the time of his death, with the exception of the year 1852–3, when he served as Grand Master. He founded and organized

the Grand Lodge Library and held the office of Grand Librarian until his death. His official signature is on every charter of the Grand Lodge of Iowa from 1844 to 1900.

He was exalted in Iowa City Chapter, No. 2, January 7, 1845, and held the offices of Grand High Priest of the Grand Chapter, 1854, and Grand Secretary of the Grand Chapter, 1855–56, and represented the Grand Chapter in the General Grand Chapter for many years.

He was created a Royal Select Master in Dubuque Council, No. 3, September 27, 1847, and presided over the Convention organizing the Grand Council of Iowa, 1857.

Knighted January 18, 1855, in Apollo Encampment, No. 1, Chicago, Ill., he was a member of the Convention organizing the Grand Commandery of Iowa, 1864, being the first Grand Commander. He was Grand Recorder of the Grand Encampment K. T. of the U. S. for fifteen years, 1871–86.

In 1859 he received the degrees of the Scottish Rite and was crowned in that year an Inspector-General, Thirty-third Degree.

In addition to this record, our brother also organized the Grand Bodies of Dakota, and the Grand Commandery of Nebraska, and his contributions to Masonic literature placed him among the leading writers and thinkers of the Craft.

He died at Cedar Rapids, Iowa, June 28, 1901.

Parvis. In the French system, the room immediately preceding a Masonic Lodge is so called. It is equivalent to the Preparation Room of the American and English systems.

Paschal Feast. Celebrated by the Jews in commemoration of the Passover, by the Christians in commemoration of the resurrection of our Lord. The Paschal Feast, called also the Mystic Banquet, is kept by all Princes of the Rose Croix. Where two are together on Maundy Thursday, it is of obligation that they should partake of a portion of roasted lamb. This banquet is symbolic of the doctrine of the resurrection.

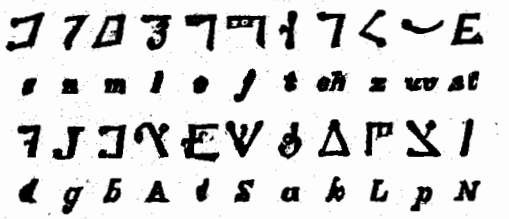
Paschalis, Martines. The founder of a new Rite or modification of Masonry, called by him *the Rite of Elected Cohens or Priests*. It was divided into two classes, in the first of which was represented the fall of man from virtue and happiness, and in the second, his final restoration. It consisted of nine degrees, namely: 1. Apprentice; 2. Fellow-Craft; 3. Master; 4. Grand Elect; 5. Apprentice Cohen; 6. Fellow-Craft Cohen; 7. Master Cohen; 8. Grand Architect; 9. Knight Commander. Paschalis first introduced this Rite into some of the Lodges of Marseilles, Toulouse, and Bordeaux, and afterward, in 1767, he extended it to Paris, where, for a short time, it was rather popular, ranking some of the Parisian literati among its disciples. It has now ceased to exist.

Paschalis was a German, born about the year 1700, of poor but respectable parentage. At the age of sixteen he acquired a knowledge of Greek and Latin. He then traveled through Turkey, Arabia, and Palestine, where he made himself acquainted with the Kabbalistic learning of the Jews. He subsequently repaired to Paris, where he established his Rite.

Paschalis was the Master of St. Martin, who afterward reformed his Rite. After living for some years at Paris, he went to St. Domingo, where he died in 1779. Thory, in his *Histoire de la Fondation du Grand Orient de France* (pp. 239–253), has given very full details of this Rite and of its receptions.

Paschal Lamb. See *Lamb, Paschal.*

Pas perdus. The French call the room appropriated to visitors the *Salle des pas perdus*. It is the same as the Tiler's Room in the English and American Lodges.



Passage. The Fourth Degree of the Fessler Rite, of which Patria forms the Fifth.

Passages of the Jordan. See *Fords of the Jordan.*

Passed. A candidate, on receiving the Second Degree, is said to be "passed as a Fellow-Craft." It alludes to his having passed through the porch to the middle chamber of the Temple, the place in which Fellow-Crafts received their wages. In America "crafted" is often improperly used in its stead.

Passing of Conyng. That is, *surpassing in skill.* The expression occurs in the Cooke MS. (line 676), "The forsayde Maister Euglet ordeynet thei were passing of conyng schold be passing honoured"; i. e., The aforesaid Master, Euclid, ordained that they that were surpassing in skill should be exceedingly honored. It is a fundamental principle of Masonry to pay all honor to knowledge.

"Passing the River." A mystical alphabet said to have been used by the Kabbalists. These characters, with certain explanations, become the subject of consideration with brethren of the Fifteenth Degree, A. A. Scottish Rite. The following are the characters:

Password. A word intended, like the military countersign, to prove the friendly nature of him who gives it, and is a test of his right to pass or be admitted into a certain place. Between a *Word* and a *Password* there seems to be this difference: the former is given for instruction, as it always contains a symbolic meaning; the latter, for recognition only. Thus, the author of the life of the celebrated Elias Ashmole says, "Freemasons are known to one another all over the world by certain passwords known to them alone; they have Lodges in different countries, where they are relieved by the brotherhood if they are in distress." (See *Sign.*)

Past. An epithet applied in Masonry to an officer who has held an office for the prescribed period for which he was elected, and has then retired. Thus, a Past Master is one who has presided for twelve months over a Lodge, and the Past High Priest one who, for the same period, has presided over a Chapter. The French use the word *passé* in the same sense, but they have also the word *ancien*, with a similar meaning. Thus, while they would employ *Maître passé* to designate the degree of Past Master, they would call the official Past Master, who had retired from the chair at the expiration of his term of service, an *Ancien Vénérable*, or *Ancien Maître*.

Past Master. An honorary degree conferred on the Master of a Lodge at his installation into office. In this degree the necessary instructions are conferred respecting the various ceremonies of the Order, such as installations, processions, the laying of corner-stones, etc.

When a brother, who has never before presided, has been elected the Master of a Lodge, an emergent Lodge of Past Masters, consisting of not less than three, is convened, and all but Past Masters retiring, the degree is conferred upon the newly elected officer.

Some form of ceremony at the installation of a new Master seems to have been adopted at an early period after the revival. In the "manner of constituting a new Lodge," as practised by the Duke of Wharton, who was Grand Master in 1723, the language used by the Grand Master when placing the candidate in the chair is given, and he is said to use "some other expressions that are proper and usual on that occasion, *but not proper to be written.*" (*Constitutions*, 1738, p. 150.) Whence we conclude that there was an esoteric ceremony. Often the rituals tell us that this ceremony consisted only in the outgoing Master communicating certain modes of recognition to his successor. And this actually, even at this day, constitutes the essential ingredient of the Past Master's Degree.

The degree is also conferred in Royal Arch Chapters, where it succeeds the Mark Master's Degree. The conferring of this degree, which has no historical connection with the rest of the degrees, in a Chapter, arises from the following circumstance: Originally, when Chapters of Royal Arch Masonry were under the government of Lodges in which the degree was then always conferred, it was a part of the regulations that no one could receive the Royal Arch Degree unless he had previously presided in the Lodge as Master. When the Chapters became independent, the regulation could not be abolished, for that would have been an innovation; the difficulty has, therefore, been obviated, by making every candidate for the degree of Royal Arch a Past Virtual Master before his exaltation.

[Under the English Constitution this practise was forbidden in 1826, but seems to have lingered on in some parts until 1850.]

Some extraneous ceremonies, by no means creditable to their inventor, were at an early period introduced into America. In 1856, the General Grand Chapter, by a unanimous vote, ordered these ceremonies to be discontinued, and the simpler mode of investiture to be used; but the order has only been partially obeyed, and many Chapters still continue what one can scarcely help calling the indecorous form of initiation into the degree.

For several years past the question has been agitated in some of the Grand Lodges of the United States, whether this degree is within the jurisdiction of Symbolic or of Royal Arch Masonry. The explanation of its introduction into Chapters, just given, manifestly demonstrates that the jurisdiction over it by Chapters is altogether an assumed one. The Past Master of a Chapter is only a *quasi* Past Master; the true and legitimate Past Master is the one who has presided over a Symbolic Lodge.

Past Masters are admitted to membership in many Grand Lodges, and by some the inherent right has been claimed to sit in those bodies. But the most eminent Masonic authorities have made a contrary decision, and the general, and, indeed, almost universal opinion now is that Past Masters obtain their seats in Grand Lodges by courtesy, and in consequence of local regulations, and not by inherent right.

The jewel of a Past Master in the United States is a pair of compasses extended to sixty degrees on the fourth part of a circle, with a sun in the center. In England it was formerly the square on a quadrant, but is at present the square with the forty-seventh problem of Euclid engraved on a silver plate suspended within it.

The French have two titles to express this degree. They apply *Maître passé* to the Past Master of the English and American system, and they call in their own system one who has formerly presided over a Lodge an *Ancien Maître*. The indiscriminate use of these titles sometimes leads to confusion in the translation of their rituals and treatises.

Pastophori. Couch or shrine bearers. The company of Pastophori constituted a sacred college of priests in Egypt, whose duty it was to carry in processions the image of the god. Their chief, according to Apuleius (*Met.* xi.), was called a Scribe. Besides acting as mendicants in soliciting charitable donations from the populace, they took an important part in the mysteries.

Pastos. (Greek, *παστος*, *a couch*.) The pastos was a chest or close cell, in the Pagan mysteries (among the Druids, an excavated stone), in which the aspirant was for some time placed, to commemorate the mystical death of the god. This constituted the symbolic death which was common to all the mysteries. In the Arkite rites, the pastos represented the ark in which Noah was confined. It is represented among Masonic symbols by the coffin.

Patents. Diplomas or certificates of the higher degrees in the Scottish Rite are called Patents. The term is also sometimes applied to commissions granted for the exercise of high

Masonic authority. *Literæ patentes* or *apertæ*, that is, letters patent or open letters, was a term used in the Middle Ages in contradistinction to *literæ clausæ*, or closed letters, to designate those documents which were spread out on the whole length of the parchment, and sealed with the public seal of the sovereign; while the secret or private seal only was attached to the closed patents. The former were sealed with green wax, the latter with white. There was also a difference in their heading; letters patent were directed "universis tum præsentibus quam futuris," i. e., *to all present or to come;* while closed letters were directed "universis præsentibus literas inspecturis," i. e., *to all present who shall inspect these letters.* Masonic diplomas are therefore properly called letters patent, or, more briefly, patents.

Patience. In the ritual of the Third Degree according to the American Rite, it is said that "time, patience, and perseverance will enable us to accomplish all things, and perhaps at last to find the true Master's Word." The idea is similar to one expressed by the Hermetic philosophers. Thus Pernetty tells us (*Dict. Mythol. Herm.*) that the alchemists said: "The work of the philosopher's stone is a work of patience, on account of the length of time and of labor that is required to conduct it to perfection; and Geber says that many adepts have abandoned it in weariness, and others, wishing to precipitate it, have never succeeded." With the alchemists, in their esoteric teaching, the philosopher's stone had the same symbolism as the WORD has in Freemasonry.

Patriarchal Masonry. The theory of Dr. Oliver on this subject has, we think, been misinterpreted. He does not maintain, as has been falsely supposed, that the Freemasonry of the present day is but a continuation of that which was practised by the patriarchs, but simply that, in the simplicity of the patriarchal worship, unencumbered as it was with dogmatic creeds, we may find the true model after which the religious system of Speculative Masonry has been constructed. Thus he says: "Nor does it (Freemasonry) exclude a survey of the patriarchal mode of devotion, which indeed forms the primitive model of Freemasonry. The events that occurred in these ages of simplicity of manners and purity of faith, when it pleased God to communicate with his favoured creature, necessarily, therefore, form subjects of interesting illustration in our Lodges, and constitute legitimate topics on which the Master in the chair may expatiate and exemplify, for the edification of the brethren and their improvement in morality and the love and fear of God." (*Hist. Landm.*) i., 207.) There is here no attempt to trace an historical connection, but simply to claim an identity of purpose and character in the two religious systems, the Patriarchal and the Masonic.

Patriarch, Grand. The Twentieth Degree of the Council of Emperors of the East and West. The same as the Twentieth Degree, or Noachite, of the Ancient and Accepted Rite.

Patriarch of the Crusades. One of the names formerly given to the degree of Grand Scottish Knight of St. Andrew, the Twenty-ninth of the Ancient and Accepted Scottish Rite. The legend of that degree connects it with the Crusades, and hence the name; which, however, is never used officially, and is retained by regular Supreme Councils only as a synonym.

Patriarch of the Grand Luminary. A degree contained in the nomenclature of Le Page.

Patron. In the year 1812, the Prince of Wales, becoming Regent of the kingdom, was constrained by reasons of state to resign the Grand Mastership of England, but immediately afterward accepted the title of Grand Patron of the Order in England, and this was the first time that the title was officially recognized. George IV. held it during his life, and on his death, William IV., in 1830, officially accepted the title of "Patron of the United Grand Lodge." On the accession of Victoria, the title fell into abeyance, because it was understood that it could only be assumed by a sovereign who was a member of the Craft, but King Edward VII. became "Protector of English Freemasons" on his accession to the throne in 1901. The office is not known in other countries.

Patrons of Masonry. St. John the Baptist and St. John the Evangelist. At an early period we find that the Christian church adopted the usage of selecting for every trade and occupation its own patron saint, who is supposed to have taken it under his especial charge. And the selection was generally made in reference to some circumstance in the life of the saint, which traditionally connected him with the profession of which he was appointed the patron. Thus St. Crispin, because he was a shoemaker, is the patron saint of the "gentle craft," and St. Dunstan, who was a blacksmith, is the patron of blacksmiths. The reason why the two Saints John were selected as the patron saints of Freemasonry will be seen under the head of *Dedication of Lodges*.

Paul, Confraternity of Saint. In the time of the Emperor Charles V. there was a secret community at Trapani, in Sicily, which called itself *La Confraternità di San Paolo.* These people, when assembled, passed sentence on their fellow-citizens; and if anyone was condemned, the waylaying and putting him to death was allotted to one of the members, which office he was obliged, without murmuring, to execute. (*Stolberg's Travels*, vol. iii., p. 472.) In the travels of Brocquire to and from Palestine in 1432 (p. 328), an instance is given of the power of the association over its members. In the German romance of *Hermann of Unna*, of which there are an English and French translation, this tribunal plays an important part.

Paul I. This emperor of Russia was induced by the machinations of the Jesuits,

whom he had recalled from banishment, to prohibit in his domains all secret societies, and especially the Freemasons. This prohibition lasted from 1797 to 1803, when it was repealed by his successor. Paul had always expressed himself an enthusiastic admirer of the Knights of Malta; in 1797 he had assumed the title of Protector of the Order, and in 1798 accepted the Grand Mastership. This is another evidence, if one was needed, that there was no sympathy between the Order of Malta and the Freemasons.

Pavement, Mosaic. See *Mosaic Pavement.*

Pax Vobiscum. ("Peace be with you!") Used in the Eighteenth Degree, A .A. Scottish Rite.

Payens, Hugh de. In Latin, Hugo de Paganis. The founder and the first Grand Master of the Order of Knights Templar. He was born at Troyes, in the kingdom of Naples. Having, with eight others, established the Order at Jerusalem, in 1118 he visited Europe, where, through his representations, its reputation and wealth and the number of its followers were greatly increased. In 1129 he returned to Jerusalem, where he was received with great distinction, but shortly afterward died, and was succeeded in the Grand Mastership by Robert de Craon, surnamed the Burgundian.

P. D. E. P. Letters placed on the ring of profession of the Order of the Temple, being the initials of the Latin sentence, *Pro Deo et Patria*, i. e., For God and my country.

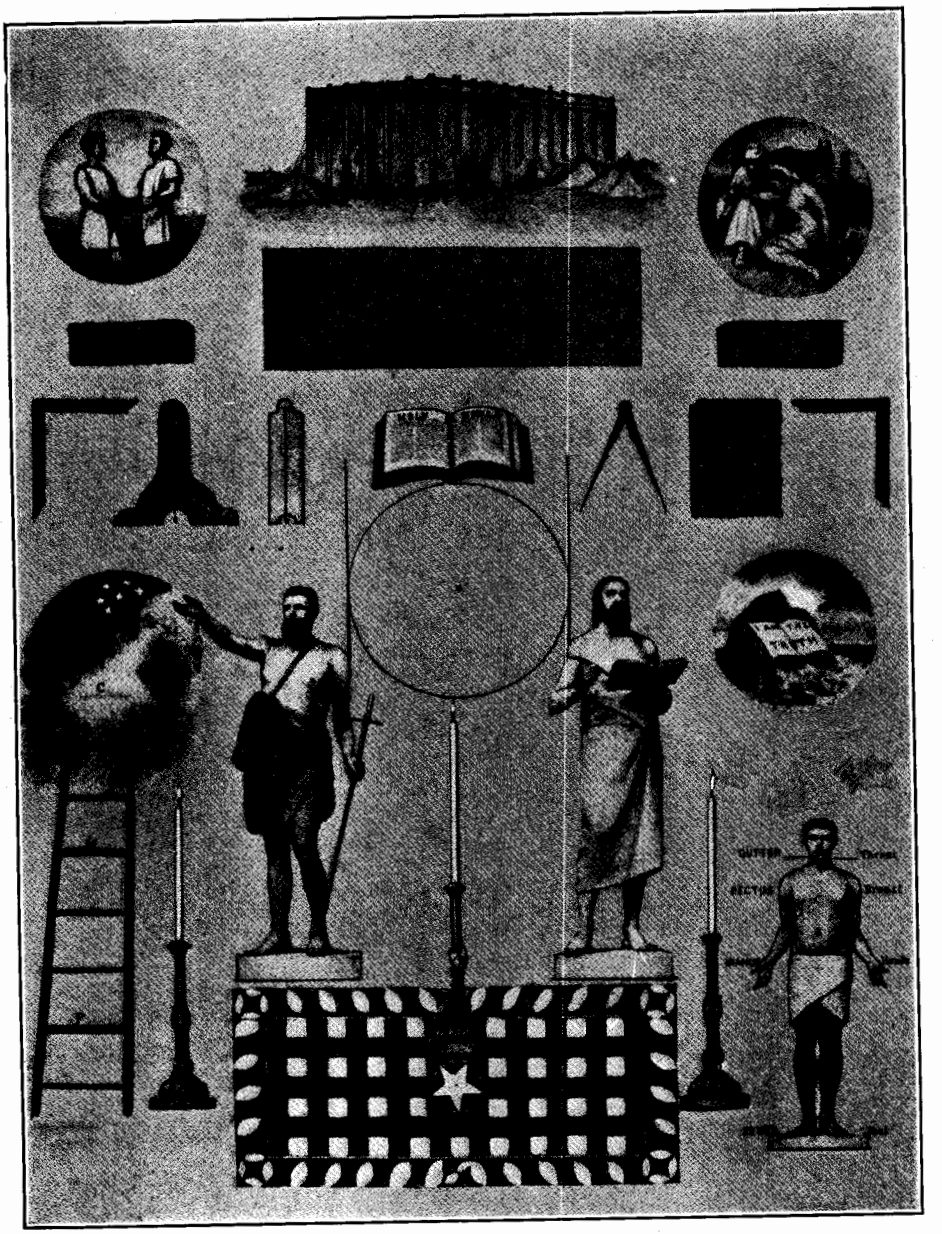
Peace. The spirit of Freemasonry is antagonistic to war. Its tendency is to unite all men in one brotherhood, whose ties must necessarily be weakened by all dissension. Hence, as Bro. Albert Pike says, "Masonry is the great peace society of the world. Wherever it exists, it struggles to prevent international difficulties and disputes, and to bind republics, kingdoms, and empires together in one great band of peace and amity."

Pectoral. Belonging to the breast; from the Latin *pectus*, the breast. The heart has always been considered the seat of fortitude and courage, and hence by this word is suggested to the Mason certain symbolic instructions in relation to the virtue of fortitude. In the earliest lectures of the last century it was called one of the "principal signs," and had this hieroglyphic, X; but in the modern rituals the hieroglyphic has become obsolete, and the word is appropriated to one of the perfect points of entrance.

Pectoral of the High Priest. The breastplate worn by the high priest of the Jews was so called from *pectus*, the breast, upon which it rested. (See *Breastplate.*)

Pedal. Belonging to the feet, from the Latin *pedes*, the feet. The just man is he who, firmly planting his feet on the principles of right, is as immovable as a rock, and can be thrust from his upright position neither by the allurements of flattery, nor the frowns of arbitrary power. And hence by this word is suggested to the Mason certain symbolic instructions in relation to the virtue of justice. Like "Pectoral," this word was assigned, in the oldest rituals, to the principal signs of a Mason, having < for its hieroglyphic; but in the modern lectures it is one of the perfect points of entrance, and the hieroglyphic is no longer used.

Pedestal. The pedestal is the lowest part or base of a column on which the shaft is placed. In a Lodge, there are supposed to be three columns, the column of Wisdom in the east, the column of Strength in the west, and the column of Beauty in the south. These columns are not generally erected in the Lodge, but their pedestals always are, and at each pedestal sits one of the three superior officers of the Lodge. Hence we often hear such expressions as these, *advancing to the pedestal*, or *standing before the pedestal*, to signify advancing to or standing before the seat of the Worshipful Master. The custom in some Lodges of placing tables or desks before the three principal officers is, of course, incorrect. They should, for the reason above assigned, be representations of the pedestals of columns, and should be painted to represent marble or stone.



Pedum. Literally, a shepherd's crook, and hence sometimes used in ecclesiology for the bishop's crozier. In the statutes of the Order of the Temple at Paris, it is prescribed that the Grand Master shall carry a "pedum magistrale seu patriarchale." But the better word for the staff of the Grand Master of the Templars is *baculus*, which see.

Peetash. The demon of calumny in the religious system of Zoroaster, Persia.

Pelasgian Religion. The Pelasgians were the oldest, if not the aboriginal, inhabitants of Greece. Their religion differed from that of the Hellenes, who succeeded them, in being less poetical, less mythical, and more abstract. We know little of their religious worship except by conjecture; but we may suppose it resembled in some respects the doctrines of what Dr. Oliver calls the Primitive Freemasonry. Creuzer thinks that the Pelasgians were either a nation of priests or a nation ruled by priests.

Peleg. פֶּלֶג, *Division.* A son of Eber. In his day the world was divided. A significant word in the high degrees. In the Noachite, or Twentieth Degree of the Scottish Rite, there is a singular legend of Peleg, which of course is altogether mythical, in which he is represented as the architect of the Tower of Babel.

Pelican. The pelican feeding her young with her blood is a prominent symbol of the Eighteenth or Rose Croix Degree of the Ancient and Accepted Scottish Rite, and was adopted as such from the fact that the pelican, in ancient Christian art, was considered as an emblem of the Savior. Now this symbolism of the pelican, as a representative of the Savior, is almost universally supposed to be derived from the common belief that the pelican feeds her young with her blood, as the Savior shed his blood for

mankind; and hence the bird is always represented as sitting on her nest, and surrounded by her brood of young ones, who are dipping their bills into a wound in their mother's breast. But this is not the exact idea of the symbolism, which really refers to the resurrection, and is, in this point of view, more applicable to our Lord, as well as to the Masonic degree of which the resurrection is a doctrine.

In an ancient *Bestiarium*, or Natural History, in the Royal Library at Brussels, cited by Larwood and Hotten in a recent work on *The History of Sign-Boards*, this statement is made: "The pelican is very fond of his young ones, and when they are born and begin to grow, they rebel in their nest against their parent, and strike him with their wings, flying about him, and beat him so much till they wound him in his eyes. Then the father strikes and kills them. And the mother is of such a nature that she comes back to the nest on the third day, and sits down upon her dead young ones, and opens her side with her bill and pours her blood over them, and so resuscitates them from death; for the young ones, by their instinct, receive the blood as soon as it comes out of the mother, and drink it."

The *Ortus Vocabulorum*, compiled early in the fifteenth century, gives the fable more briefly: "It is said, if it be true, that the pelican kills its young, and grieves for them for three days. Then she wounds herself, and with the aspersione of her blood resuscitates her children." And the writer cites, in explanation, the verses

"Ut pelicanu. fit matris sanguine sanus,
Sic Sancti sumus nos omnes sanguine nati."

i. e., "As the Pelican is restored by the blood of its mother, so are we all born by the blood of the Holy One," that is, of Christ.

St. Jerome gives the same story, as an illustration of the destruction of man by the old serpent, and his salvation by the blood of Christ. And Shelton, in an old work entitled the *Armorie of Birds*, expresses the same sentiment in the following words:

"Then said the pelican,
When my birds be slain,
With my blood I them revive;
Scripture doth record
The same did our Lord,
And rose from death to life."

This romantic story was religiously believed as a fact of natural history in the earliest ages of the church. Hence the pelican was very naturally adopted as a symbol of the resurrection and, by consequence, of him whose resurrection is, as Cruden terms it, "the cause, pattern, and argument of ours."

But in the course of time the original legend was, to some extent, corrupted, and a simpler one was adopted, namely, that the pelican fed her young with her own blood merely as a means of sustenance, and the act of maternal love was then referred to Christ as shedding his blood for the sins of the world. In this view of the symbolism, Pugin has said that the pelican is "an emblem of our Blessed Lord shedding his blood for mankind, and therefore a most appropriate symbol to be introduced on all vessels or ornaments connected with the Blessed Sacrament." And in the *Antiquities of Durham Abbey*, we learn that "over the high altar of Durham Abbey hung a rich and most sumptuous canopy for the Blessed Sacrament to hang within it, whereon stood a pelican, all of silver, upon the height of the said canopy, very finely gilt, giving her blood to her young ones, in token that Christ gave his blood for the sins of the world."

But I think the true theory of the pelican is, that by restoring her young ones to life by her blood, she symbolizes the resurrection. The old symbologists said, after Jerome, that the male pelican, who destroyed his young, represents the serpent, or evil principle, which brought death into the world; while the mother, who resuscitates them, is the representative of that Son of Man of whom it is declared, "except ye drink of his blood, ye have no life in you."

And hence the pelican is very appropriately assumed as a symbol in Masonry, whose great object is to teach by symbolism the doctrine of the resurrection, and especially in that sublime degree of the Scottish Rite wherein, the old Temple being destroyed and the old Word being lost, a new temple and a new word spring forth—all of which is but the great allegory of the destruction by death and the resurrection to eternal life.

Pellegrini, Marquis of. One of the pseudonyms assumed by Joseph Balsamo, better known as Count Cagliostro (*q. v.*).

Penal Sign. That which refers to a penalty.

Penalty. The adversaries of Freemasonry have found, or rather invented, abundant reasons for denouncing the Institution; but on nothing have they more strenuously and fondly lingered than on the accusation that it makes, by horrid and impious ceremonies, all its members the willing or unwilling executioners of those who prove recreant to their vows and violate the laws which they are stringently bound to observe. Even a few timid and uninstructed Masons have been found who were disposed to believe that there was some weight in this objection. The fate of Morgan, apocryphal as it undoubtedly was, has been quoted as an instance of Masonic punishment inflicted by the regulations of the Order; and, notwithstanding the solemn asseverations of the most intelligent Masons to the contrary, men have been found, and still are to be found, who seriously entertain the opinion that every member of the Fraternity becomes, by the ceremonies of his initiation and by the nature of the vows which he has taken, an active Nemesis of the Order, bound by some unholy promise to avenge the Institution upon any treach-

erous or unfaithful brother. All of this arises from a total misapprehension, in the minds of those who are thus led astray, of the true character and design of vows or oaths which are accompanied by an imprecation. It is well, therefore, for the information both of our adversaries—who may thus be deprived of any further excuse for slander, and of our friends—who will be relieved of any continued burden on their consciences, that we should show that, however solemn may be the promises of secrecy, of obedience, and of charity which are required from our initiates, and however they may be guarded by the sanctions of punishment upon their offenders, they never were intended to impose upon any brother the painful and—so far as the laws of the country are concerned—the illegal task of vindicating the outrage committed by the violator. The only Masonic penalty inflicted by the Order upon a traitor, is the scorn and detestation of the Craft whom he has sought to betray.

But that this subject may be thoroughly understood, it is necessary that some consideration should be given to oaths generally, and to the character of the imprecations by which they are accompanied.

The obsecration, or imprecation, is that part of every oath which constitutes its sanction, and which consists in calling some superior power to witness the declaration or promise made, and invoking his protection for or anger against the person making it, according as the said declaration or promise is observed or violated. This obsecration has, from the earliest times, constituted a part of the oath—and an important part, too—among every people, varying, of course, according to the varieties of religious beliefs and modes of adoration. Thus, among the Jews, we find such obsecrations as these: *Co yagnasheh li Elohim*, "So may God do to me." A very common obsecration among the Greeks was, *isto Zeus* or *theon marturomai*, "May Jove stand by me," or "I call God to witness." And the Romans, among an abundance of other obsecrations, often said, *dii me perdant*, "May the gods destroy me," or *ne vivam*, "May I die."

These modes of obsecration were accompanied, to make them more solemn and sacred, by certain symbolic forms. Thus the Jews caused the person who swore to hold up his right hand toward heaven, by which action he was supposed to signify that he appealed to God to witness the truth of what he had averred or the sincerity of his intention to fulfil the promise that he had made. So Abraham said to the King of Sodom, "I have lift up my hand unto the Lord, . . . that I will not take anything that is thine." Sometimes, in taking an oath of fealty, the inferior placed his hand under the thigh of his lord, as in the case of Eliezer and Abraham, related in the 24th chapter of Genesis. Among the Greeks and Romans, the person swearing placed his hands, or sometimes only the right hand, upon the altar, or upon the victims when, as was not unusual, the oath was accompanied by a sacrifice, or upon some other sacred thing. In the military oath, for instance, the soldiers placed their hands upon the *signa*, or standards.

The obsecration, with an accompanying form of solemnity, was indeed essential to the oath among the ancients, because the crime of perjury was not generally looked upon by them in the same light in which it is viewed by the moderns. It was, it is true, considered as a heinous crime, but a crime not so much against society as against the gods, and its punishment was supposed to be left to the deity whose sanctity had been violated by the adjuration of his name to a false oath or broken vow. Hence, Cicero says that "death was the divine punishment of perjury, but only dishonor was its human penalty." And therefore the crime of giving false testimony under oath was not punished in any higher degree than it would have been had it been given without the solemnity of an oath. Swearing was entirely a matter of conscience, and the person who was guilty of false swearing, where his testimony did not affect the rights or interests of others, was considered as responsible to the deity alone for his perjury.

The explicit invocation of God as a witness to the truth of the thing said, or, in promissory oaths, to the faithful observance of the act promised, the obsecration of Divine punishment upon the jurator if what he swore to be true should prove to be false, or if the vow made should be thereafter violated, and the solemn form of lifting up the hand to heaven or placing it upon the altar or the sacred victims, must necessarily have given confidence to the truth of the attestation, and must have been required by the hearers as some sort of safeguard or security for the confidence they were called upon to exercise. This seems to have been the true reason for the ancient practise of solemn obsecration in the administration of oaths.

Among modern nations, the practise has been continued, and from the ancient usage of invoking the names of the gods and of placing the hands of the person swearing upon their altars, we derive the present method of sanctifying every oath by the attestation contained in the phrase "So help me God," and the concluding form of kissing the Holy Scriptures.

And now the question naturally occurs as to what is the true intent of this obsecration, and what practical operation is expected to result from it. In other words, what is the nature of a penalty attached to an oath, and how is it to be enforced? When the ancient Roman, in attesting with the solemnity of an oath to the truth of what he had just said or was about to say, concluded with the formula, "May the gods destroy me," it is evident that he simply meant to say that he was so convinced of the truth

of what he had said that he was entirely willing that his destruction by the gods whom he had invoked should be the condition consequent upon his falsehood. He had no notion that he was to become outlawed among his fellow-creatures, and that it should be not only the right, but the duty, of any man to destroy him. His crime would have been one against the Divine law, and subject only to a Divine punishment.

In modern times, perjury is made a penal offense against human laws, and its punishment is inflicted by human tribunals. But here the punishment of the crime is entirely different from that inferred by the obsecration which terminates the oath. The words "So help me God," refer exclusively to the withdrawal of Divine aid and assistance from the jurator in the case of his proving false, and not to the human punishment which society would inflict.

In like manner, we may say of what are called Masonic penalties, that they refer in no case to any kind of human punishment; that is to say, to any kind of punishment which is to be inflicted by human hand or instrumentality. The true punishments of Masonry affect neither life nor limb. They are expulsion and suspension only. But those persons are wrong, be they mistaken friends or malignant enemies, who suppose or assert that there is any other sort of penalty which a Mason recreant to his vows is subjected to by the laws of the Order, or that it is either the right or duty of any Mason to inflict such penalty on an offending brother. The obsecration of a Mason simply means that if he violates his vows or betrays his trust he is worthy of such penalty, and that if such penalty were inflicted on him it would be but just and proper. "May I die," said the ancient, "if this be not true, or if I keep not this vow." Not may any man put me to death, nor is any man required to put me to death, but only, if I so act, then would I be worthy of death. The ritual penalties of Masonry, supposing such to be, are in the hands not of man, but of God, and are to be inflicted by God, and not by man.

Bro. Fort says, in the 29th chapter of his *Early History and Antiquities of Freemasonry*, that "Penalties inflicted upon convicts of certain grades during the Middle Ages, were terrible and inhuman.

"The most cruel punishment awaited him who broke into and robbed a Pagan temple. According to a law of the Frisians, such desecration was redressed by dragging the criminal to the seashore and burying the body at a point in the sands where the tide daily ebbed and flowed." (*Lex Frision.*, Add. Sap., Tit. 12.)

"A creditor was privileged to subject his delinquent debtor to the awful penalty of having the flesh torn from his breast and fed to birds of prey. Convicts were frequently adjudged by the ancient Norse code to have their hearts torn out." (Grimm, *Deutsche Rechts-Alterthümer*, p. 690. And for the following, see pp. 693 and 700.) "The oldest death penalties of the Scandinavians prescribed that the body should be exposed to fowls of the air to feed upon. Sometimes it was decreed that the victim be disemboweled, his body burnt to ashes and scattered as dust to the winds. Judges of the secret Vehmgericht passed sentences of death as follows: 'Your body and flesh to the beasts of the field, to the birds of the air, and to the fishes in the stream.' The judicial executioner, in carrying into effect this decree, severed the body in twain, so that, to use the literal text, 'the air might strike together between the two parts.' The tongue was oftentimes torn out as a punishment. A law of the early Roman Empire, known as *ex Jure Orientis Cæsareo*, enacted that any person, suitor at law or witness, having sworn upon the evangelists, and proving to be a perjurer, should have the tongue cut from its roots. A cord about the neck was used symbolically, in criminal courts, to denote that the accused was worthy of the extreme penalty of law by hanging or decapitation. When used upon the person of a freeman, it signified a slight degree of subjection or servitude." (Pp. 318–320.)

Some eminent brethren of the Fraternity insist that the penalty had its origin in the manner in which the lamb was sacrificed under the charge of the Captain of the Temple, who directed the priests: and said, "Come and cast lots." "Who is to slaughter?" "Who is to sprinkle?" "Go and see if the time for slaughter approaches?" "Is it light in the whole East, even to Hebron?" and when the priest said "Yes," he was directed to "go and bring the lamb from the lamb-chamber"; this was in the northwest corner of the court. The lamb was brought to the north of the altar, its head southward and its face northward. The lamb was then slaughtered; a hole was made in its side, and thus it was hung up. The priest skinned it downward until he came to the breast, then he cut off the head, and finished the skinning; he tore out the heart; subsequently he cleft the body, and it became all open before him; he took out the intestines, etc.; and the various portions were divided as they had cast lots. (*The Talmud*, Joseph Barclay, LL.D.)

Pencil. In the English system this is one of the working-tools of a Master Mason, and is intended symbolically to remind us that our words and actions are observed and recorded by the Almighty Architect, to whom we must give an account of our conduct through life. In the American system the pencil is not specifically recognized. The other English working-tools of a Master Mason are the skirrit and compasses.

In the French Rite "to hold the pencil," *tener le crayon*, is to discharge the functions of a secretary during the communication of a lodge.

Penitential Sign. Called also the Supplicatory Sign. It is the third sign in the

English Royal Arch system. It denotes that frame of heart and mind without which our prayers and oblations will not obtain acceptance; in other words, it is a symbol of humility.

Pennsylvania. [The early history of Freemasonry in this State is wrapped in obscurity; the first mention of it as yet discovered is in the *Pennsylvania Gazette* for December 5–8, 1730, which contains the following: "As there are several Lodges of Freemasons erected in this Province, and People have lately been much amus'd with Conjectures concerning them; we think the following account of Freemasonry from London will not be unacceptable to our readers," and then follows a Masonic catechism. Benjamin Franklin, the editor of the paper, was not then a Mason, but became one in the following year, and makes frequent references to the Craft in the *Gazette*, from which we learn that he was appointed J. G. W. by Grand Master Allen in June, 1732, and elected Grand Master of this Grand Lodge of Pennsylvania in 1734.

From this it is quite plain that there were Masonic Lodges in Pennsylvania in 1730 and a Provincial Grand Lodge there in 1732, and it seems fairly certain that these early Lodges were formed by brethren from the Mother Country acting on their own authority.

In 1743 Thomas Oxnard of Boston was appointed by the Grand Master of England to be Provincial Grand Master of all North America, and in 1749 he appointed Benjamin Franklin to be Provincial Grand Master of Pennsylvania.

In 1755 there were three Lodges in Philadelphia, and in 1758 a Lodge was warranted there by the "Ancients," followed by another in 1761, and in 1764 authority was granted by the "Ancients" for forming a Provincial Grand Lodge in Philadelphia, which in 1786 became the Grand Lodge of Pennsylvania.—E. L. H.]

The Grand Chapter of Pennsylvania was established in 1795. The Grand Chapter was at first only an integral part of the Grand Lodge, but in 1824 it became an independent body, except so far as that members of the Grand Lodge, who were Royal Arch Masons, were declared to be members of the Grand Chapter.

The Royal and Select degrees were formerly conferred in Pennsylvania by the Chapters, but on October 16, 1847, a Grand Council was organized.

A Grand Encampment, independent of the General Grand Encampment of the United States, was organized on February 16, 1814. On April 14, 1854, a Grand Commandery was organized under the authority of the Grand Encampment of the United States, and in February, 1857, both of these bodies united to form the present Grand Commandery of Pennsylvania.

Pennsylvania Work. The method of Entering, Passing, and Raising candidates in the Lodges of Pennsylvania differs so materially from that practised in the other States of the Union, that it cannot be considered as a part of the American Rite as first taught by Webb, but rather as an independent, Pennsylvania modification of the York Rite of England. Indeed, the Pennsylvania system of work much more resembles the English than the American. Its ritual is simple and didactic, like the former, and is almost entirely without the impressive dramatization of the latter. Bro. Vaux, a Past Grand Master of Pennsylvania, thus speaks of the Masonic work of his State with pardonable, although not with impartial, commendations: "The Pennsylvania work is sublime from its simplicity. That it is the ancient work is best shown conclusively, however, from this single fact, it is so simple, so free from those displays of modern inventions to attract the attention, without enlightening, improving, or cultivating the mind. In this work every word has its significance. Its types and symbols are but the language in which truth is conveyed. These are to be studied to be understood. In the spoken language no synonyms are permitted. In the ceremonial no innovations are tolerated. In the ritual no modern verbiage is allowed."

Penny. In the parable read in the Mark Degree a penny is the amount given to each of the laborers in the vineyard for his day's labor. Hence, in the ritual, a penny a day is said to be the wages of a Mark Master. In several passages of the authorized version of the New Testament, *penny* occurs as a translation of the Greek, δηνάριον, which was intended as the equivalent of the Roman *denarius*. This was the chief silver coin of the Romans from the beginning of the coinage of the city to the early part of the third century. Indeed, the name continued to be employed in the coinage of the continental States, which imitated that of the Byzantine empire, and was adopted by the Anglo-Saxons. The specific value of each of so many coins, going under the same name, cannot be ascertained with any precision. In its Masonic use, the penny is simply a symbol of the reward of faithful labor. The smallness of the sum, whatever may have been its exact value, to our modern impressions is apt to give a false idea of the liberality of the owner. Dr. Lightfoot, in his essay on a *Fresh Revision of the New Testament*, remarks: "It is unnecessary to ask what impression the mention of this sum will leave on the minds of an uneducated peasant or shopkeeper of the present day. Even at the time when our version was made, and when wages were lower, it must have seemed wholly inadequate." However improper the translation is, it can have no importance in the Masonic application of the parable, where the "penny" is, as has already been said, only a symbol, meaning any reward or compensation.

Pentacle, The. The "*pentaculum Salomonis*," or magical pentalpha, not to be confounded with Solomon's seal. The pen-

tacle is frequently referred to in Hermetic formulæ.

Pentagon. A geometrical figure of five sides and five angles. It is the third figure from the exterior, in the camp of the Sublime Princes of the Royal Secret, or Thirty-second Degree of the Scottish Rite. In the Egyptian Rite of Cagliostro, he constructed, with much formality, an implement called the "sacred pentagon," and which, being distributed to his disciples, gave, as he affirmed, to each one the power of holding spiritual intercourse.

Pentagram. From the Greek *pente*, five, and *gramma*, a letter. In the science of magic the pentalpha is called the holy and mysterious pentagram. Eliphas Levi says (*Dog. et Rituel de la Haute Magie*, ii., 55) that the pentagram is the star of the Magians; it is the sign of the word made flesh; and according to the direction of its rays, that is, as it points upward with one point or with two, it represents the good or the evil principle, order or disorder; the blessed lamb of Ormuzd and of St. John, or the accursed god of Mendes; initiation or profanation; Lucifer or Vesper; the morning or the evening star; Mary or Lilith; victory or death; light or darkness. (See *Pentalpha*.)

Pentalpha. The triple triangle, or the pentalpha of Pythagoras, is so called from the Greek πεντε, *pente*, five, and αλφα, *alpha*, the letter A, because in its configuration it presents the form of that letter in five different positions. It was a doctrine of Pythagoras, that all things proceeded from numbers, and the number five, as being formed by the union of the first odd and the first even, was deemed of peculiar value; and hence Cornelius Agrippa says (*Philos. Occult.*) of this figure, that, "by virtue of the number five, it has great command over evil spirits because of its five double triangles and its five acute angles within and its five obtuse angles without, so that this interior pentangle contains in it many great mysteries." The disciples of Pythagoras, who were indeed its real inventors, placed within each of its interior angles one of the letters of the Greek word ΥΓΙΕΙΑ, or the Latin one SALUS, both of which signify *health;* and thus it was made the talisman of health. They placed it at the beginning of their epistles as a greeting to invoke secure health to their correspondent. But its use was not confined to the disciples of Pythagoras. As a talisman, it was employed all over the East as a charm to resist evil spirits. Moné says that it has been found in Egypt on the statue of the god Anubis. Lord Brougham says, in his *Italy*, that it was used by Antiochus Epiphanes, and a writer in *Notes and Queries* (3 Ser., ix., 511) says that he has found it on the coins of Lysimmachus. On old British and Gaulish coins it is often seen beneath the feet of the sacred and mythical horse, which was the ensign of the ancient Saxons. The Druids wore it on their sandals as a symbol of Deity, and hence the Germans call the figure "Druttenfuss," a word originally signifying *Druid's foot*, but which, in the gradual corruptions of language, is now made to mean *Witche's foot*. Even at the present day it retains its hold upon the minds of the common people of Germany, and is drawn on or affixed to cradles, thresholds of houses, and stable-doors, to keep off witches and elves.

The early Christians referred it to the five wounds of the Savior, because, when properly inscribed upon the representation of a human body, the five points will respectively extend to and touch the side, the two hands, and the two feet.

The Medieval Masons considered it a symbol of deep wisdom, and it is found among the architectural ornaments of most of the ecclesiastical edifices of the Middle Ages.

But as a Masonic symbol it peculiarly claims attention from the fact that it forms the outlines of the *five-pointed star*, which is typical of the bond of brotherly love that unites the whole Fraternity. It is in this view that the pentalpha or triple triangle is referred to in Masonic symbolism as representing the intimate union which existed between our three ancient Grand Masters, and which is commemorated by the living pentalpha at the closing of every Royal Arch Chapter.

Many writers have confounded the pentalpha with the seal of Solomon, or shield of David. This error is almost inexcusable in Oliver, who constantly commits it, because his Masonic and archeological researches should have taught him the difference, Solomon's seal being a double, interlaced triangle, whose form gives the outline of a star of six points.

Perau, Gabriel Louis Calabre. A man of letters, an Abbé, and a member of the Society of the Sorbonne. He was born at Semur, in Auxois, in 1700, and died at Paris, March 31, 1767. De Feller (*Biog. Univ.*) speaks of his uprightness and probity, his frankness, and sweetness of disposition which endeared him to many friends. Certainly, the only work which gives him a place in Masonic history indicates a gentleness and moderation of character with which we can find no fault. In general literature, he was distinguished as the continuator of d'Avrigny's *Vies des Hommes illustres de la France;* which, however, a loss of sight prevented him from completing. In 1742, he published at Geneva a work entitled *Le Secret des Franc-Maçons*. This work at its first appearance attracted much attention and went through many editions, the title being sometimes changed to a more attractive one by booksellers. The Abbé Larudan attempted to palm off his libelous and malignant work on the Abbé Perau, but without success; for while the work of Larudan is marked with the bitterest malignity to the Order of Freemasonry, that of Perau is simply

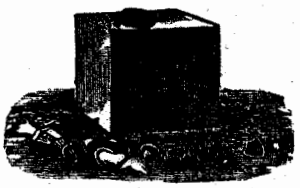
a detail of the ceremonies and ritual of Masonry as then practised, under the guise of friendship.

Perfect Ashlar. See *Ashlar*.

Perfect Initiates, Rite of. A name given to the Egyptian Rite when first established at Lyons by Cagliostro.

Perfect Irish Master. (*Parfait Maître Irlandais.*) One of the degrees given in the Irish Colleges instituted by Ramsay.

Perfect Lodge. See *Just Lodge*.



Perfect Master. (*Maître Parfait.*) The Fifth Degree in the Ancient and Accepted Scottish Rite. The ceremonies of this degree were originally established as a grateful tribute of respect to a worthy departed brother. The officers of the Lodge are a Master, who represents Adoniram, the Inspector of the Works at Mount Lebanon, and one Warden. The symbolic color of the degree is green, to remind the Perfect Master that, being dead in vice, he must hope to revive in virtue. His jewel is a compass extended sixty degrees, to teach him that he should act within measure, and ever pay due regard to justice and equity.

The apron is white, with a green flap; and in the middle of the apron must be embroidered or painted, within three circles, a cubical stone, in the center of which the letter J is inscribed, according to the old rituals; but the Samaritan *yod* and *he*, according to the ritual of the Southern Jurisdiction.

Delaunay, in his *Thuileur de l'Ecossisme*, gives the Tetragrammaton in this degree, and says the degree should more properly be called Past Master, *Ancien Maître*, because the Tetragrammaton makes it in some sort the complement of the Master's Degree. But the Tetragrammaton is not found in any of the approved rituals, and Delaunay's theory falls therefore to the ground. But besides, to complete the Master's with this degree would be to confuse all the symbolism of the Ineffable degrees, which really conclude with the Fourteenth.

Perfect Prussian. (*Parfait Prussien.*) A degree invented at Geneva, in 1770, as a second part of the Order of Noachites.

Perfect Stone. A name frequently given to the cubic stone discovered in the Thirteenth Degree of Perfection, the tenth of the In-

effable Series. It denotes justice and firmness, with all the moral lessons and duties in which the mystic cube is calculated to instruct us.

Perfect Union, Lodge of. A Lodge at Rennes, in France, where the Rite of Elect of Truth was instituted. (See *Elect of Truth, Rite of.*)

Perfection. The Ninth and last degree of Fessler's Rite. (See *Fessler, Rite of.*)

Perfectionists. The name by which Weishaupt first designated the Order which he founded in Bavaria, and which he subsequently changed for that of the Illuminati.

Perfection, Lodge of. The Lodge in which the Fourteenth Degree of the Ancient and Accepted Scottish Rite is conferred. In England and America this degree is called Grand Elect Perfect and Sublime Mason, but the French designate it Grand Scottish Mason of the Sacred Vault of James VI., or *Grand écossais de la Voûte Sacrée du Jacques VI.* This is one of the evidences—and a very pregnant one—of the influence exercised by the exiled Stuarts and their adherents on the Masonry of that time in making it an instrument for the restoration of James II., and then of his son, to the throne of England.

This degree, as concluding all reference to the first Temple, has been called the ultimate degree of ancient Masonry. It is the last of what is technically styled the Ineffable degrees, because their instructions relate to the Ineffable word.

Its place of meeting is called the Sacred Vault. Its principal officers are a Thrice Puissant Grand Master, two Grand Wardens, a Grand Treasurer, and Grand Secretary. In the first organization of the Rite in this country, the Lodges of Perfection were called "Sublime Grand Lodges," and, hence, the word "Grand" is still affixed to the title of the officers.

The following mythical history is connected with and related in this degree.

When the Temple was finished, the Masons who had been employed in constructing it acquired immortal honor. Their Order became more uniformly established and regulated than it had been before. Their caution and reserve in admitting new members produced respect, and merit alone was required of the candidate. With these principles instilled into their minds, many of the Grand Elect left the Temple after its dedication, and, dispersing themselves among the neighboring nations, instructed all who applied and were found worthy in the sublime degrees of Ancient Craft Masonry.

The Temple was completed in the year of the world 3000. Thus far, the wise King of Israel had behaved worthy of himself, and gained universal admiration; but in process of time, when he had advanced in years, his understanding became impaired; he grew deaf to the voice of the Lord, and was strangely irregular in his conduct. Proud of having erected an edifice to his Maker, and intoxicated with his great power, he plunged into all manner of licentiousness and debauchery, and profaned the Temple, by offering to the idol Moloch that incense which should have been offered only to the living God.

The Grand Elect and Perfect Masons

saw this, and were sorely grieved, afraid that his apostasy would end in some dreadful consequences, and bring upon them those enemies whom Solomon had vainglorioously and wantonly defied. The people, copying the vices and follies of their King, became proud and idolatrous, and neglected the worship of the true God for that of idols.

As an adequate punishment for this defection, God inspired the heart of Nebuchadnezzar, King of Babylon, to take vengeance on the kingdom of Israel. This prince sent an army with Nebuzaradan, Captain of the Guards, who entered Judah with fire and sword, took and sacked the city of Jerusalem, razed its walls, and destroyed the Temple. The people were carried captive to Babylon, and the conquerors took with them all the vessels of silver and gold. This happened four hundred and seventy years, six months, and ten days after its dedication.

When, in after times, the princes of Christendom entered into a league to free the Holy Land from the oppression of the infidels, the good and virtuous Masons, anxious for the success of so pious an undertaking, voluntarily offered their services to the confederates, on condition that they should be permitted a chief of their own election, which was granted; they accordingly rallied under their standard and departed.

The valor and fortitude of these elected knights was such that they were admired by, and took the lead of, all the princes of Jerusalem, who, believing that their mysteries inspired them with courage and fidelity in the cause of virtue and religion, became desirous of being initiated. Upon being found worthy, their desires were complied with; and thus the royal art, meeting the approbation of great and good men, became popular and honorable, was diffused through their various dominions, and has continued to spread through a succession of ages to the present day.

The symbolic color of this degree is red —emblematic of fervor, constancy, and assiduity. Hence, the Masonry of this degree was formerly called Red Masonry on the Continent of Europe.

The jewel of the degree is a pair of compasses extended on an arc of ninety degrees, surmounted by a crown, and with a sun in the center. In the Southern Jurisdiction the sun is on one side and a five-pointed star on the other.

The apron is white with red flames, bordered with blue, and having the jewel painted on the center and the stone of foundation on the flap.

Perfection, Rite of. In 1754, the Chevalier de Bonneville established a Chapter of the high degrees at Paris, in the College of Jesuits of Clermont, hence called the Chapter of Clermont. The system of Masonry he there practised received the name of the Rite of Perfection, or Rite of Heredom. The College of Clermont was, says Rebold (*Hist. de 3 G. L.*, 46), the asylum of the adherents of the house of Stuart, and hence the Rite is to some extent tinctured with Stuart Masonry. It consisted of twenty-five degrees, as follows: 1. Apprentice; 2. Fellow-Craft; 3. Master; 4. Secret Master; 5. Perfect Master; 6. Intimate Secretary; 7. Intendant of the Building; 8. Provost and Judge; 9. Elect of Nine; 10. Elect of Fifteen; 11. Illustrious Elect, Chief of the Twelve Tribes; 12. Grand Master Architect; 13. Royal Arch; 14. Grand, Elect, Ancient, Perfect Master; 15. Knight of the Sword; 16. Prince of Jerusalem; 17. Knight of the East and West; 18. Rose Croix Knight; 19. Grand Pontiff; 20. Grand Patriarch; 21. Grand Master of the Key of Masonry; 22. Prince of Libanus; 23. Sovereign Prince Adept Chief of the Grand Consistory; 24. Illustrious Knight, Commander of the Black and White Eagle; 25. Most Illustrious Sovereign Prince of Masonry, Grand Knight, Sublime Commander of the Royal Secret. It will be seen that the degrees of this Rite are the same as those of the Council of Emperors of the East and West, which was established four years later, and to which the Chapter of Clermont gave way. Of course, they are the same, so far as they go, as those of the Ancient and Accepted Scottish Rite which succeeded the Council of Emperors.

The distinguishing principle of this Rite is, that Freemasonry was derived from Templarism, and that consequently every Freemason was a Knight Templar. It was there that the Baron von Hund was initiated, and from it, through him, proceeded the Rite of Strict Observance; although he discarded the degrees and retained only the Templar theory.

Perignan. When the Elu degrees were first invented, the legend referred to an unknown person, a tiller of the soil, to whom King Solomon was indebted for the information which led to the discovery of the craftsmen who had committed the crime recorded in the Third Degree. This unknown person, at first designated as "l'inconnu," afterward received the name of Perignan, and a degree between the *elu of nine* and the *elu of fifteen* was instituted, which was called the "Elu of Perignan," and which became the Sixth Degree of the Adonhiramite Rite. The derivation or radical meaning of the word is unknown, but it may contain, as do many other words in the high degrees, a reference to the adherents, or to the enemies, of the exiled house of Stuart, for whose sake several of these degrees were established. (See *Elect of Perignan.*)

Periods of the Grand Architect. See *Six Periods.*

Perjury. In the municipal law perjury is defined to be a wilful false swearing to a material matter, when an oath has been administered by lawful authority. The violation of vows or promissory oaths taken before one who is not legally authorized to administer them, that is to say, one who is not a magis-

trate, does not in law involve the crime of perjury. Such is the technical definition of the law; but the moral sense of mankind does not assent to such a doctrine, and considers perjury, as the root of the word indicates, the doing of that which one has sworn not to do, or the omitting to do that which he has sworn to do. The old Romans seem to have taken a sensible view of the crime of perjury. Among them oaths were not often administered, and, in general, a promise made under oath had no more binding power in a court of justice than it would have had without the oath. False swearing was with them a matter of conscience, and the person who was guilty of it was responsible to the Deity alone. The violation of a promise under oath and of one not under such a form was considered alike, and neither was more liable to human punishment than the other. But perjury was not deemed to be without any kind of punishment. Cicero expressed the Roman sentiment when he said "perjurii pœna divina exitium; humana dedecus—*the divine punishment of perjury is destruction; the human, infamy.*" Hence every oath was accompanied by an execration, or an appeal to God to punish the swearer should he falsify his oath. "In the case of other sins," says Archbishop Sharp, "there may be an appeal made to God's mercy, yet in the case of perjury there is none; for he that is perjured hath precluded himself of this benefit, because he hath braved God Almighty, and hath in effect told him to his face that if he was foresworn he should desire no mercy."

It is not right thus to seek to restrict God's mercy, but there can be no doubt that the settlement of the crime lies more with him than with man. Freemasons look in this light on what is called the *penalty;* it is an invocation of God's vengeance on him who takes the vow, should he ever violate it; men's vengeance is confined to the contempt and infamy which the foreswearer incurs.

Pernetti or **Pernety, Antoine Joseph.** Born at Roanne, in France, in 1716. At an early age he joined the Benedictines, but in 1765 applied, with twenty-eight others, for a dispensation of his vows. A short time after, becoming disgusted with the Order, he repaired to Berlin, where Frederick the Great made him his librarian. In a short time he returned to Paris, where the archbishop strove in vain to induce him to reenter his monastery. The parliament supported him in his refusal, and Pernetti continued in the world. Not long after, Pernetti became infected with the mystical theories of Swedenborg, and published a translation of his *Wonders of Heaven and Hell.* He then repaired to Avignon, where, under the influence of his Swedenborgian views, he established an academy of Illuminati, based on the three primitive grades of Masonry, to which he added a mystical one, which he called the *True Mason.* This Rite was subsequently transferred to Montpellier by some of his disciples, and modified in form under the name of the "Academy of True Masons." Pernetti, besides his Masonic labors at Avignon, invented several other Masonic degrees, and to him is attributed the authorship of the degree of Knight of the Sun, now occupying the twenty-eighth place in the Ancient and Accepted Scottish Rite. He was a very learned man and a voluminous writer of versatile talents, and published numerous works on mythology, the fine arts, theology, geography, philosophy, and the mathematical sciences, besides some translations from the Latin. He died at Valence, in Dauphiny, in the year 1800.

Perpendicular. In a geometrical sense, that which is upright and erect, leaning neither one way nor another. In a figurative and symbolic sense, it conveys the signification of Justice, Fortitude, Prudence, and Temperance. Justice, that leans to no side but that of Truth; Fortitude, that yields to no adverse attack; Prudence, that ever pursues the straight path of integrity; and Temperance, that swerves not for appetite nor passion.

Persecutions. Freemasonry, like every other good and true thing, has been subjected at times to suspicion, to misinterpretation, and to actual persecution. Like the church, it has had its martyrs, who, by their devotion and their sufferings, have vindicated its truth and its purity.

With the exception of the United States, where the attacks on the Institution can hardly be called persecutions—not because there was not the will, but because the power to persecute was wanting—all the persecutions of Freemasonry have, for the most part, originated with the Roman Church. "Notwithstanding," says a writer in the *Freemasons' Quarterly Magazine* (1851, p. 141), "the greatest architectural monuments of antiquity were reared by the labors of Masonic gilds, and the Church of Rome owes the structure of her magnificent cathedrals, her exquisite shrines, and her most splendid palaces, to the skill of the wise master-builders of former ages, she has been for four centuries in antagonism to the principles inculcated by the Craft."

Leaving unnoticed the struggles of the corporations of Freemasons in the fifteenth, sixteenth, and seventeenth centuries, we may begin the record with the persecutions to which the Order has been subjected since the revival in 1717.

One of the first persecutions to which Masonry, in its present organization, was subjected, occurred in the year 1735, in Holland. On the 16th of October of that year, a crowd of ignorant fanatics, whose zeal had been enkindled by the denunciations of some of the clergy, broke into a house in Amsterdam, where a Lodge was accustomed to be held, and destroyed all the furniture and ornaments of the Lodge. The States General, yielding to the popular excitement, or rather desirous of giving no occasion for its action, prohibited the future meetings of the Lodges. One, however, continuing, regardless of the

edict, to meet at a private house, the members were arrested and brought before the Court of Justice. Here, in the presence of the whole city, the Masters and Wardens defended themselves with great dexterity; and while acknowledging their inability to prove the innocence of their Institution by a public exposure of their secret doctrines, they freely offered to receive and initiate any person in the confidence of the magistrates, and who could then give them information upon which they might depend, relative to the true designs of the Institution. The proposal was acceded to, and the town clerk was chosen. He was immediately initiated, and his report so pleased his superiors, that all the magistrates and principal persons of the city became members and zealous patrons of the Order.

In France, the fear of the authorities that the Freemasons concealed, within the recesses of their Lodges, designs hostile to the government, gave occasion to an attempt, in 1737, on the part of the police, to prohibit the meeting of the Lodges. But this unfavorable disposition did not long continue, and the last instance of the interference of the government with the proceedings of the Masonic body was in June, 1745, when the members of a Lodge, meeting at the Hotel de Soissons, were dispersed, their furniture and jewels seized, and the landlord amerced in a penalty of three thousand livres.

The persecutions in Germany were owing to a singular cause. The malice of a few females had been excited by their disappointed curiosity. A portion of this disposition they succeeded in communicating to the Empress, Maria Theresa, who issued an order for apprehending all the Masons in Vienna, when assembled in their Lodges. The measure was, however, frustrated by the good sense of the Emperor, Joseph I., who was himself a Mason, and exerted his power in protecting his brethren.

The persecutions of the church in Italy, and other Catholic countries, have been the most extensive and most permanent. On the 28th of April, 1738, Pope Clement XII. issued the famous bull against Freemasons whose authority is still in existence. In this bull, the Roman Pontiff says, "We have learned, and public rumor does not permit us to doubt the truth of the report, that a certain society has been formed, under the name of Freemasons, into which persons of all religions and all sects are indiscriminately admitted, and whose members have established certain laws which bind themselves to each other, and which, in particular, compel their members, under the severest penalties, by virtue of an oath taken on the Holy Scriptures, to preserve an inviolable secrecy in relation to every thing that passes in their meetings." The bull goes on to declare, that these societies have become suspected by the faithful, and that they are hurtful to the tranquillity of the state and to the safety of the soul; and after making use of the now threadbare argument, that if the actions of Freemasons were irreproachable, they would not so carefully conceal them from the light, it proceeds to enjoin all bishops, superiors, and ordinaries to punish the Freemasons "with the penalties which they deserve, as people greatly suspected of heresy, having recourse, if necessary, to the secular arm."

What this delivery to the secular arm means, we are at no loss to discover, from the interpretation given to the bull by Cardinal Firrao in his edict of publication in the beginning of the following year, namely, "that no person shall dare to assemble at any Lodge of the said society, nor be present at any of their meetings, under *pain of death* and confiscation of goods, the said penalty to be without hope of pardon."

The bull of Clement met in France with no congenial spirits to obey it. On the contrary, it was the subject of universal condemnation as arbitrary and unjust, and the parliament of Paris positively refused to enroll it. But in other Catholic countries it was better respected. In Tuscany the persecutions were unremitting. A man named Crudeli was arrested at Florence, thrown into the dungeons of the Inquisition, subjected to torture, and finally sentenced to a long imprisonment, on the charge of having furnished an asylum to a Masonic Lodge. The Grand Lodge of England, upon learning the circumstances, obtained his enlargement, and sent him pecuniary assistance. Francis de Lorraine, who had been initiated at The Hague in 1731, soon after ascended the grand ducal throne, and one of the first acts of his reign was to liberate all the Masons who had been incarcerated by the Inquisition; and still further to evince his respect for the Order, he personally assisted in the constitution of several Lodges at Florence, and in other cities of his dominions.

The other sovereigns of Italy were, however, more obedient to the behests of the holy father, and persecutions continued to rage throughout the peninsula. Nevertheless, Masonry continued to flourish, and in 1751, thirteen years after the emission of the bull of prohibition, Lodges were openly in existence in Tuscany, at Naples, and even in the "eternal city" itself.

The priesthood, whose vigilance had abated under the influence of time, became once more alarmed, and an edict was issued in 1751 by Benedict XIV., who then occupied the papal chair, renewing and enforcing the bull which had been fulminated by Clement.

This, of course, renewed the spirit of persecution. In Spain, one Tournon, a Frenchman, was convicted of practising the rites of Masonry, and after a tedious confinement in the dungeons of the Inquisition, he was finally banished from the kingdom.

In Portugal, at Lisbon, John Coustos, a native of Switzerland, was still more severely treated. He was subjected to the torture, and suffered so much that he was unable to move his limbs for three months. Coustos,

with two companions of his reputed crime, was sentenced to the galleys, but was finally released by the interposition of the English ambassador.

In 1745, the Council of Berne, in Switzerland, issued a decree prohibiting, under the severest penalties, the assemblages of Freemasons. In 1757, in Scotland, the Synod of Sterling adopted a resolution debarring all adhering Freemasons from the ordinances of religion. And, as if to prove that fanaticism is everywhere the same, in 1748 the Divan at Constantinople caused a Masonic Lodge to be demolished, its jewels and furniture seized, and its members arrested. They were discharged upon the interposition of the English minister; but the government prohibited the introduction of the Order into Turkey.

America has not been free from the blighting influence of this demon of fanaticism. But the exciting scenes of anti-Masonry are too recent to be treated by the historian with coolness or impartiality. The political party to which this spirit of persecution gave birth was the most abject in its principles, and the most unsuccessful in its efforts, of any that our times have seen. It has passed away; the clouds of anti-Masonry have been, we trust, forever dispersed, and the bright sun of Masonry, once more emerging from its temporary eclipse, is beginning to bless our land with the invigorating heat and light of its meridian rays.

Perseverance. A virtue inculcated, by a peculiar symbol in the Third Degree, in reference to the acquisition of knowledge, and especially the knowledge of the True Word. (See *Patience.*)

Perseverance, Order of. An Adoptive Order established at Paris, in 1771, by several nobles and ladies. It had but little of the Masonic character about it; and, although at the time of its creation it excited considerable sensation, it existed but for a brief period. It was instituted for the purpose of rendering services to humanity. Ragon says (*Tuileur Gen.*, p. 92) that there was kept in the archives of the Order a quarto volume of four hundred leaves, in which was registered all the good deeds of the brethren and sisters. This volume is entitled *Livre d'Honneur de l'Ordre de la Perseverance.* Ragon intimates that this document is still in existence. Thory (*Fondation G. O.*, p. 383) says that there was much mystification about the establishment of the Order in Paris. Its institutors contended that it originated from time immemorial in Poland, a pretension to which the King of Poland lent his sanction. Many persons of distinction, and among them Madame de Genlis, were deceived and became its members.

Persia. Neither the Grand Lodge of England, nor any other of the European Powers, seem ever to have organized Lodges in the kingdom of Persia; yet very strange and somewhat incomprehensible stories are told by credible authorities of the existence either of the Masonic institution, or something very much like it, in that country. In 1808, on November 24th, Askeri Khan, the Ambassador of Persia near the court of France, was received into the Order at Paris by the Mother Lodge of the Philosophic Scottish Rite, on which occasion the distinguished neophyte presented his sword, a pure Damascus blade, to the Lodge, with these remarks: "I promise you, gentlemen, friendship, fidelity, and esteem. I have been told, and I cannot doubt it, that Freemasons were virtuous, charitable, and full of love and attachment for their sovereigns. Permit me to make you a present worthy of true Frenchmen. Receive this sabre, which has served me in twenty-seven battles. May this act of homage convince you of the sentiments with which you have inspired me, and of the gratification that I feel in belonging to your Order." The Ambassador subsequently seems to have taken a great interest in Freemasonry while he remained in France, and consulted with the Venerable of the Lodge on the subject of establishing a Lodge at Ispahan. This is the first account that we have of the connection of any inhabitant of Persia with the Order. Thory, who gives this account (*Act. Lat.*, i., 237), does not tell us whether the project of an Ispahan Lodge was ever executed. But it is probable that on his return home the Ambassador introduced among his friends some knowledge of the Institution, and impressed them with a favorable opinion of it. At all events, the Persians in later times do not seem to have been ignorant of its existence.

Mr. Holmes, in his *Sketches on the Shores of the Caspian*, gives the following as the Persian idea of Freemasonry:

"In the morning we received a visit from the Governor, who seemed rather a dull person, though very polite and civil. He asked a great many questions regarding the *Feramoosh Khoneh*, as they called the Freemasons' Hall in London; which is a complete mystery to all the Persians who have heard of it. Very often, the first question we have been asked is, 'What do they do at the Feramoosh Khoneh? What is it?' They generally believe it to be a most wonderful place, where a man may acquire in one day the wisdom of a thousand years of study; but every one has his own peculiar conjectures concerning it. Some of the Persians who went to England became Freemasons; and their friends complain that they will not tell what they saw at the Hall, and cannot conceive why they should all be so uncommunicative."

And now we have, from the *London Freemason* (June 28, 1873), this further account; but the conjecture as to the time of the introduction of the Order unfortunately wants confirmation:

"Of the Persian officers who are present in Berlin pursuing military studies and making themselves acquainted with Prussian military organization and arrangements, one belongs to the Masonic Order. He is a Mussulman. He seems to have spontaneously sought recognition as a member of the Craft at a Berlin

Lodge, and his claim was allowed only after such an examination as satisfied the brethren that he was one of the brethren. From the statement of this Persian Mason it appears that nearly all the members of the Persian Court belong to the mystic Order, even as German Masonry enjoys the honor of counting the emperor and crown prince among its adherents. The appearance of this Mohammedan Mason in Berlin seems to have excited a little surprise among some of the brethren there, and the surprise would be natural enough to persons not aware of the extent to which Masonry has been diffused over the earth. Account for it as one may, the truth is certain that the mysterious Order was established in the Orient many ages ago. Nearly all of the old Mohammedan buildings in India, such as tombs, mosques, etc., are marked with the Masonic symbols, and many of these structures, still perfect, were built in the time of the Mogul Emperor Akbar, who died in 1605. Thus Masonry must have been introduced into India from Middle Asia by the Mohammedans hundreds of years ago."

Since then there was an initiation of a Persian in the Lodge Clémente Amitié at Paris. There is a Lodge at Teheran, of which many native Persians are members.

Persian Philosophical Rite. A Rite which its founders asserted was established in 1818, at Erzerum, in Persia, and which was introduced into France in the year 1819. It consisted of seven degrees, as follows: 1. Listening Apprentice; 2. Fellow-Craft, Adept, Esquire of Benevolence; 3. Master, Knight of the Sun; 4. Architect of all Rites, Knight of the Philosophy of the Heart; 5. Knight of Eclecticism and of Truth; 6. Master Good Shepherd; 7. Venerable Grand Elect. This Rite never contained many members, and has been long extinct.

Personal Merit. "All preferment among Masons is grounded upon real worth and *personal merit* only, that so the Lords may be well served, the Brethren not put to shame, nor the Royal Craft despised. Therefore no Master or Warden is chosen by seniority, but for his *merit*." *Charges of* 1723. (*Constitutions*, 1723, p. 51.)

Peru. Freemasonry was first introduced into Peru about the year 1807, during the French invasion, and several Lodges worked until the resumption of the Spanish authority and the Papal influence, in 1813, when their existence terminated. In 1825, when the independence of the republic, declared some years before, was completely achieved, several Scottish Rite Lodges were established, first at Lima and then at other points, by the Grand Orient of Colombia. A Supreme Council of the Ancient and Accepted Rite was instituted in 1830. In 1831 an independent Grand Lodge, afterward styled the Grand Orient of Peru, was organized by the Symbolic Lodges in the republic. Political agitations have, from time to time, occasioned a cessation of Masonic labor, but both the Supreme Council and the Grand Orient are now in successful operation. The Royal Arch Degree was introduced in 1852 by the establishment of a Royal Arch Chapter at Callao, under a Warrant granted by the Supreme Chapter of Scotland.

Petition for a Charter. The next step in the process of organizing a Lodge, after the Dispensation has been granted by the Grand Master, is an application for a Charter or Warrant of Constitution. The application may be, but not necessarily, in the form of a petition. On the report of the Grand Master, that he had granted a Dispensation, the Grand Lodge, if the new Lodge is recommended by some other, generally the nearest Lodge, will confirm the Grand Master's action and grant a Charter; although it may refuse to do so, and then the Lodge will cease to exist. Charters or Warrants for Lodges are granted only by the Grand Lodge in America, Ireland and Scotland. In England this great power is vested in the Grand Master. The Constitutions of the Grand Lodge of England say that "every application for a Warrant to hold a new Lodge must be, by petition to the Grand Master, signed by at least seven regularly registered Masons." Although, in the United States, it is the general usage that a Warrant must be preceded by a Dispensation, yet there is no general law which would forbid the Grand Lodge to issue a Charter in the first place, no Dispensation having been previously granted.

The rule for issuing Charters to Lodges prevails, with no modification in relation to granting them by Grand Chapters, Grand Councils, or Grand Commanderies for the bodies subordinate to them.

Petition for a Dispensation. When it is desired to establish a new Lodge, application by petition must be made to the Grand Master. This petition ought to be signed by at least seven Master Masons, and be recommended by the nearest Lodge; and it should contain the proposed name of the Lodge and the names of the three principal officers. This is the usage of America; but it must be remembered that the Grand Master's prerogative of granting Dispensations cannot be rightfully restricted by any law. Only, should the Grand Master grant a Dispensation for a Lodge which, in its petition, had not complied with these prerequisites, it is not probable that, on subsequent application to the Grand Lodge, a Warrant of Constitution would be issued.

Petition for Initiation. According to American usage any person who is desirous of initiation into the mysteries of Masonry must apply to the Lodge nearest to his place of residence, by means of a petition signed by himself, and recommended by at least two members of the Lodge to which he applies. The application of a Mason to a Chapter, Council, or Commandery for advancement to higher degrees, or of an unaffiliated Mason for membership in a Lodge, is also called a petition. For the rules that govern the disposition of these petitions, see Dr.

Mackey's *Text Book of Masonic Jurisprudence*, Book I., ch. ii.

Peuvret, Jean Eustache. An usher of the parliament of Paris, and Past Master of the Lodge of St. Pierre in Martinico, and afterward a dignitary of the Grand Orient at France. Peuvret was devoted to Hermetic Masonry, and acquired some reputation by numerous compilations on Masonic subjects. During his life he amassed a valuable library of mystical, alchemical, and Masonic books, and a manuscript collection of eighty-one degrees of Hermetic Masonry in six quarto volumes. He asserts in this work that the degrees were brought from England and Scotland; but this Thory (*Act. Lat.*, i., 205) denies, and says that they were manufactured in Paris. Peuvret's exceeding zeal without knowledge made him the victim of every charlatan who approached him. He died at Paris in 1800.

Phainoteletian Society. (*Société Phaïnotélète.*) A society founded at Paris, in 1840, by Louis Theodore Juge, the editor of the *Globe*, composed of members of all rites and degrees, for the investigation of all non-political secret associations of ancient and modern times. The title is taken from the Greek, and signifies literally the society of the explainers of the mysteries of initiation.

Phallic Worship. The Phallus was a sculptured representation of the *membrum virile*, or male organ of generation; and the worship of it is said to have originated in Egypt, where, after the murder of Osiris by Typhon, which is symbolically to be explained as the destruction or deprivation of the sun's light by night, Isis, his wife, or the symbol of nature, in the search for his mutilated body, is said to have found all the parts except the organs of generation, which myth is simply symbolic of the fact that the sun having set, its fecundating and invigorating power had ceased. The Phallus, therefore, as the symbol of the male generative principle, was very universally venerated among the ancients, and that too as a religious rite, without the slightest reference to any impure or lascivious application.

As a symbol of the generative principle of nature, the worship of the Phallus appears to have been very nearly universal. In the mysteries it was carried in solemn procession. The Jews, in their numerous deflections into idolatry, fell readily into that of this symbol. And they did this at a very early period of their history, for we are told that even in the time of the Judges (Jud. iii. 7) they "served Baalim and the groves." Now the word translated, here and elsewhere, as *groves*, is in the original *Asherah*, and is by all modern interpreters supposed to mean a species of Phallus. Thus Movers (*Phönix.*, p. 56) says that Asherah is a sort of Phallus erected to the telluric goddess Baaltes, and the learned Holloway (*Originals*, i., 18) had long before come to the same conclusion.

But the Phallus, or, as it was called among the Orientalists, the Lingam, was a representation of the male principle only. To perfect the circle of generation, it is necessary to advance one step farther. Accordingly we find in the *Cteis* of the Greeks, and the *Yoni* of the Indians, a symbol of the female generative principle of coextensive prevalence with the Phallus. The *Cteis* was a circular and concave pedestal, or receptacle, on which the Phallus or column rested, and from the center of which it sprang.

The union of these two, as the generative and the producing principles of nature, in one compound figure, was the most usual mode of representation. And here, I think, we undoubtedly find the remote origin of the *point within a circle*, an ancient symbol which was first adopted by the old sun-worshipers, and then by the ancient astronomers, as a symbol of the sun surrounded by the earth or the universe—the sun as the generator and the earth as the producer—and afterward modified in its signification and incorporated into the symbolism of Freemasonry. (See *Point within a Circle.*)

Phallus. Donegan says from an Egyptian or Indian root. (See *Phallic Worship.*)

Pharaxal. A significant word in the high degrees, and there said, in the old rituals, to signify "we shall all be united." Delaunay gives it as *pharas kol*, and says it means "all is explained." If it is derived from פרשׂ, and the adverbial כּל, *kol*, "altogether," it certainly means not to be united, but to be separated, and has the same meaning as its cognate *polkal*. This incongruity in the words and their accepted explanation has led Bro. Pike to reject them both from the degree in which they are originally found. And it is certain that the radical *pal* and *phar* both have everywhere in Hebrew the idea of separation. But my reading of the old rituals compels me to believe that the degree in which these words are found always contained an idea of separation and subsequent reunion. It is evident that there was either a blunder in the original adoption of the word *pharaxal*, or more probably a corruption by subsequent copyists. I am satisfied that the ideas of division, disunion, or separation, and of subsequent reunion, are correct; but I am equally satisfied that the Hebrew form of this word is wrong.

Pharisees. A school among the Jews at the time of Christ, so called from the Aramaic *Perushim*, Separated, because they held themselves apart from the rest of the nation. They claimed to have a mysterious knowledge unknown to the mass of the people, and pretended to the exclusive possession of the true meaning of the Scriptures, by virtue of the oral law and the secret traditions which, having been received by Moses on Mount Sinai, had been transmitted to successive generations of initiates. They are supposed to have been essentially the same as the Assideans or Chasidim. The character of their organization is interesting to the Masonic student. They held a secret doctrine, of which the dogma of the resurrec-

tion was an important feature; they met in sodalities or societies, the members of which called themselves *chabirim*, fellows or associates; and they styled all who were outside of their mystical association, *yom haharetz*, or people of the land.

Phœnicia. The Latinized form of the Greek *Phoinikia*, from φοίνιξ, a palm, because of the number of palms anciently, but not now, found in the country. A tract of country on the north of Palestine, along the shores of the Mediterranean, of which Tyre and Sidon were the principal cities. The researches of Gesenius and other modern philologers have confirmed the assertions of Jerome and Augustine, that the language spoken by the Jews and the Phœnicians was almost identical; a statement interesting to the Masonic student as giving another reason for the bond which existed between Solomon and Hiram, and between the Jewish workmen and their fellow-laborers of Tyre, in the construction of the Temple. (See *Tyre*.)

Philadelphia. Placed on the imprint of some Masonic works of the last century as a pseudonym of Paris.

Philadelphians, Rite of the. See *Primitive Rite*.

Philadelphes, Lodge of the. The name of a Lodge at Narbonne, in France, in which the Primitive Rite was first instituted; whence it is sometimes called the "Rite of the Philadelphians." (See *Primitive Rite*.)

Philalethes, Rite of the. Called also the *Seekers of Truth*, although the word literally means *Friends of Truth*. It was a Rite founded in 1773 at Paris, in the Lodge of Amis Réunis, by Savalette de Langes, keeper of the Royal Treasury, with whom were associated the Vicomte de Tavannes, Court de Gebelin, M. de Sainte-Jamos, the President d'Hericourt, and the Prince of Hesse. The Rite, which was principally founded on the system of Martinism, did not confine itself to any particular mode of instruction, but in its reunions, called "convents," the members devoted themselves to the study of all kinds of knowledge that were connected with the occult sciences, and thus they welcomed to their association all who had made themselves remarkable by the singularity or the novelty of their opinions, such as Cagliostro, Mesmer, and Saint Martin. It was divided into twelve classes or chambers of instruction. The names of these classes or degrees were as follows: 1. Apprentice; 2. Fellow-Craft; 3. Master; 4. Elect; 5. Scottish Master; 6. Knight of the East; 7. Rose Croix; 8. Knight of the Temple; 9. Unknown Philosopher; 10. Sublime Philosopher; 11. Initiate; 12. Philalethes, or Searcher after Truth. The first six degrees were called Petty, and the last six High Masonry. The Rite did not increase very rapidly; nine years after its institution, it counted only twenty Lodges in France and in foreign countries which were of its obedience. In 1785 it attempted a radical reform in Masonry, and for this purpose invited the most distinguished Masons of all countries to a congress at Paris. But the project failed, and Savalette de Langes dying in 1788, the Rite, of which he alone was the soul, ceased to exist, and the Lodge of Amis Réunis was dissolved.

Philip IV. Surnamed "le Bel," or "the Fair," who ascended the throne of France in 1285. He is principally distinguished in history on account of his persecution of the Knights Templar. With the aid of his willing instrument, Pope Clement V., he succeeded in accomplishing the overthrow of the Order. He died in 1314, execrated by his subjects, whose hearts he had alienated by the cruelty, avarice, and despotism of his administration.

Philippian Order. Finch gives this as the name of a secret Order instituted by King Philip "for the use only of his first nobility and principal officers, who thus formed a select and secret council in which he could implicitly confide." It has attracted the attention of no other Masonic writer, and was probably no more than a coinage of a charlatan's brain.

Philocoreites, Order of. An androgynous secret society established in the French army in Spain, in 1808. The members were called Knights and Ladies Philocoreites, or Lovers of Pleasure. It was not Masonic in character. But Thory has thought it worth a long description in his *History of the Foundation of the Grand Orient of France*.

Philo Judæus. A Jewish philosopher of the school of Alexandria, who was born about thirty years before Christ. Philo adopted to their full extent the mystical doctrines of his school, and taught that the Hebrew Scriptures contained, in a system of allegories, the real source of all religious and philosophical knowledge, the true meaning of which was to be excluded from the vulgar, to whom the literal signification alone was to be made known. Whoever, says he, has meditated on philosophy, has purified himself by virtue, and elevated himself by a contemplative life to God and the intellectual world, receiving their inspiration, thus pierces the gross envelop of the letter, and is initiated into mysteries of which the literal instruction is but a faint image. A fact, a figure, a word, a rite or custom, veils the profoundest truths, to be interpreted only by him who has the true key of science. Such symbolic views were eagerly seized by the early inventors of the high, philosophical degrees of Masonry, who have made frequent use of the esoteric philosophy of Philo in the construction of their Masonic system.

Philosopher, Christian. (*Philosophe Chrétien*.) The Fourth Degree of the Order of African Architects.

Philosopher, Grand and Sublime Hermetic. (*Grand et Sublime Philosophe Hermétique*.) A degree in the manuscript collection of Peuvret. Twelve other degrees of Philosopher were contained in the same collection, namely, Grand Neapolitan Philoso-

pher, Grand Practical Philosopher, Kabbalistic Philosopher, Kabbalistic Philosopher to the Number 5, Perfect Mason Philosopher, Perfect Master Philosopher, Petty Neapolitan Philosopher, Petty Practical Philosopher, Sublime Philosopher, Sublime Philosopher to the Number 9, and Sublime Practical Philosopher. They are probably all Kabbalistic or Hermetic degrees.

Philosopher of Hermes. (*Philosophe d'Hermes.*) A degree contained in the Archives of the Lodge of St. Louis des Amis Réunis at Calais.

Philosopher, Sublime. (*Sublime Philosophe.*) 1. The Fifty-third Degree of the Rite of Mizraim. 2. The tenth class of the Rite of the Philalethes.

Philosopher, Sublime Unknown. (*Sublime Philosophe Inconnu.*) The Seventy-ninth Degree of the Metropolitan Chapter of France.

Philosopher, The Little. (*Le petit Philosophe.*) A degree in the collection of Pyron.

Philosopher, Unknown. (*Philosophe Inconnu.*) The ninth class of the Rite of the Philalethes. It was so called in reference to St. Martin, who had adopted that title as his pseudonym, and was universally known by it among his disciples.

Philosopher's Stone. It was the doctrine of the alchemists, that there was a certain mineral, the discovery of which was the object of their art, because, being mixed with the baser metals, it would transmute these into gold. This mineral, known only to the adepts, they called *lapis philosophorum*, or the philosopher's stone. Hitchcock, who wrote a book in 1857 (*Alchemy and the Alchemists*), to maintain the proposition that alchemy was a symbolic science, that its subject was *Man*, and its object the perfection of men, asserts that the philosopher's stone was a symbol of man. He quotes the old Hermetic philosopher, Isaac Holland, as saying that "though a man be poor, yet may he very well attain unto it [the work of perfection], and may be employed in making the philosopher's stone." And Hitchcock (p. 76), in commenting on this, says: "That is, every man, no matter how humble his vocation, may do the best he can in his place—may 'love mercy, do justly, and walk humbly with God'; and what more doth God require of any man?"

If this interpretation be correct, then the philosopher's stone of the alchemists, and the spiritual temple of the Freemasons are identical symbols.

Philosophic Degrees. All the degrees of the Ancient and Accepted Scottish Rite above the Eighteenth and below the Thirty-third are called philosophic degrees, because, abandoning the symbolism based on the Temple, they seek to develop a system of pure theosophy. Some writers have contended that the Seventeenth and Eighteenth degrees should be classed with the philosophic degrees. But this is not correct, since both of those degrees have preserved the idea of the Temple system. They ought rather to be called apocalyptic degrees, the Seventeenth especially, because they do not teach the ancient philosophies, but are connected in their symbolism with the spiritual temple of the New Jerusalem.

Philosophic Scottish Rite. This Rite consists of twelve degrees, as follows: 1. 2. 3. Knight of the Black Eagle or Rose Croix of Heredom, divided into three parts; 4. Knight of the Phenix; 5. Knight of the Sun; 6. Knight of the Rainbow; 7. True Mason; 8. Knight of the Argonaut; 9. Knight of the Golden Fleece; 10. Perfectly Initiated Grand Inspector; 11. Grand Scottish Inspector; 12. Sublime Master of the Luminous Ring.

The three degrees of Ancient Craft Masonry form the necessary basis of this system, although they do not constitute a part of the Rite. In its formation it expressly renounced the power to constitute Symbolic Lodges, but reserved the faculty of affiliating regularly constituted Lodges into its high degrees. Thory (*Fond. du G. O.*, p. 162) seems desirous of tracing the origin of the Rite to the Rosicrucians of the fourteenth century. But the reasons which he assigns for this belief are by no means satisfactory. The truth is, that the Rite was founded in 1775, in the celebrated Lodge of the Social Contract (*Contrat Social*), and that its principal founder was M. Boileau, a physician of Paris, who had been a disciple of Pernetti, the originator of the Hermetic Rite at Avignon, whose Hermetic principles he introduced into the Philosophic Scottish Rite. Some notion may be formed of the nature of the system which was taught in this Rite, from the name of the degree which is at its summit. The Luminous Ring is a Pythagorean degree. In 1780, an Academy of the Sublime Masters of the Luminous Ring was established in France, in which the doctrine was taught that Freemasonry was originally founded by Pythagoras, and in which the most important portion of the lectures was engaged in an explanation of the peculiar dogmas of the sage of Samos.

The chief seat of the Rite had always been in the Lodge of Social Contract until 1792, when, in common with all the other Masonic bodies of France, it suspended its labors. It was resuscitated at the termination of the Revolution, and in 1805 the Lodge of the Social Contract, and that of St. Alexander of Scotland, assumed the title of the "Mother Lodge of the Philosophic Scottish Rite in France." This body was eminently literary in its character, and in 1811 and 1812 possessed a mass of valuable archives, among which were a number of old charters, manuscript rituals, and Masonic works of great interest, in all languages.

Philosophus. The fourth grade of the First Order of the Society of Rosicrucians, as practised in Europe and America.

Philosophy Sublime. (*Philosophie Sublime.*) The Forty-eighth Degree of the Rite of Mizraim.

Phœnix. The old mythological legend of the phœnix is a familiar one. The bird was described as of the size of an eagle, with a head finely crested, a body covered with beautiful plumage, and eyes sparkling like stars. She was said to live six hundred years in the wilderness, when she built for herself a funereal pile of aromatic woods, which she ignited with the fanning of her wings, and emerged from the flames with a new life. Hence the phœnix has been adopted universally as a symbol of immortality. Higgins (*Anacalypsis*, ii., 441) says that the phœnix is the symbol of an ever-revolving solar cycle of six hundred and eight years, and refers to the Phœnician word *phen*, which signifies a cycle. Aumont, the first Grand Master of the Templars after the martyrdom of De Molay, and called the "Restorer of the Order," took, it is said, for his seal, a phœnix brooding on the flames, with the motto, "Ardet ut vivat" —*She burns that she may live.* The phœnix was adopted at a very early period as a Christian symbol, and several representations of it have been found in the catacombs. Its ancient legend, doubtless, caused it to be accepted as a symbol of the resurrection.

Phylacteries. The second fundamental principle of Judaism is the wearing of phylacteries; termed by some writers Tataphoth, "ornaments," and refer to the law and commandments, as "Bind them about thy neck; write them upon the table of thine head." (Prov. iii. 3; vi. 21; viii. 3.) The phylacteries are worn on the forehead and arm, and are called in Hebrew *Tephillin*, from *Palal*, to pray. These consist of two leathern boxes. One contains four compartments, in which are enclosed four portions of the law written on parchment and carefully folded. The box is made of leather pressed upon blocks of wood specially prepared, the leather being well soaked in water. The following passages of the law are sewn into it: Ex. xiii. 1–10, 11–16; Deut. vi. 4–9; xi. 13–21. On this box is the letter ש (*shin*), with three strokes for the right side, and the same letter with four strokes for the left side of the wearer. The second box has but one compartment, into which the same passages of Scripture are sewed with the sinews of animals, specially prepared for this object. The phylacteries are bound on the forehead and arm by long leathern straps. The straps on the head must be tied in a knot shaped like the letter ד (*daleth*). The straps on the arm must go round it seven times, and three times round the middle finger, with a small surplus over in the form of the letter י (*yod*). Thus we have the שדי, Shaddai, or Almighty. The phylacteries are kept in special bags, with greatest reverence, and the Rabbis assert "that the single precept of the phylacteries is equal to all the commandments."

Physical Qualifications. The physical qualifications of a candidate for initiation into Masonry may be considered under the three heads of Sex, Age, and Bodily Conformation. 1. *As to Sex.* It is a landmark that the candidate shall be a man. This, of course, prohibits the initiation of a woman. 2. *As to Age.* The candidate must, say the Old Regulations, be of "mature and discreet age." The ritual forbids the initiation of an "old man in his dotage, or a young man under age." The man who has lost his faculties by an accumulation of years, or not yet acquired them in their full extent by immaturity of age, is equally incapable of initiation. (See *Dotage* and *Mature Age.*) 3. *As to Bodily Conformation.* The Gothic Constitutions of 926, or what is said to be that document, prescribe that the candidate "must be without blemish, and have the full and proper use of his limbs"; and the Charges of 1722 say "that he must have no maim or defect in his body that may render him incapable of learning the art, of serving his Master's lord, and of being made a brother." (*Constitutions*, 1723, p. 51.) And although a few jurists have been disposed to interpret this law with unauthorized laxity, the general spirit of the Institution, and of all its authorities, is to observe it rigidly. (See the subject fully dicussed in Dr. Mackey's *Text Book of Masonic Jurisprudence*, pp. 100–113.)

Picart's Ceremonies. Bernard Picart was a celebrated engraver of Amsterdam, and the author of a voluminous work, which was begun in 1723, and continued after his death, until 1737, by J. F. Bernard, entitled *Cérémonies Religieuses de tous les peuple du monde.* A second edition was published at Paris, in 1741, by the Abbés Banier and Le Mascrier, who entirely remodeled the work; and a third in 1783 by a set of free-thinkers, who disfigured, and still further altered the text to suit their own views. Editions, professing to be reprints of the original one, have been subsequently published in 1807–9 and 1816. The book has been recently deemed of some importance by the investigators of the Masonic history of the last century, because it contains an engraved list in two pages of the English Lodges which were in existence in 1735. The plate is, however, of no value as an original authority, since it is merely a copy of the *Engraved List of Lodges*, published by J. Pine in 1735.

Pickax. An instrument used to loosen the soil and prepare it for digging. It is one of the working-tools of a Royal Arch Mason, and symbolically teaches him to loosen from his heart the hold of evil habits.

Piece of Architecture. (*Morçeau d'Architecture.*) The French so call a discourse, poem, or other production on the subject of Freemasonry. The definition previously given in this work under the title *Architecture*, in being confined to the minutes of the Lodge, is not sufficiently comprehensive.

Pike, Albert. Born at Boston, Mass., December 29, 1809, and died April 2, 1891. After a sojourn in early life in Mexico, he returned to the United States and settled in Little Rock, Arkansas, as an editor and lawyer. Subsequent to the War of the Rebellion, in which he had cast his fortunes

with the South, he located in Washington, D. C., uniting with ex-Senator Robert Johnson in the profession of the law, making his home, however, in Alexandria. His library, in extent and selections, was a marvel, especially in all that pertains to the wonders in ancient literature. Bro. Pike was the Sov. G. Commander of the Southern Supreme Council, A. A. Scottish Rite, having been elected in 1859. He was Prov. G. Master of the G. Lodge of the Royal Order of Scotland in the U. S., and an honorary member of almost every Supreme Council in the world. His standing as a Masonic author and historian, and withal as a poet, was most distinguished, and his untiring zeal was without a parallel.

Pilgrim. A pilgrim (from the Italian *pelegrino*, and that from the Latin *peregrinus*, signifying a traveler) denotes one who visits holy places from a principle of devotion. Dante (*Vita Nuova*) distinguishes pilgrims from palmers thus: palmers were those who went beyond the sea to the East, and often brought back staves of palm-wood; while pilgrims went only to the shrine of St. Jago, in Spain. But Sir Walter Scott says that the palmers were in the habit of passing from shrine to shrine, living on charity; but pilgrims made the journey to any shrine only once; and this is the more usually accepted distinction of the two classes.

In the Middle Ages, Europe was filled with pilgrims repairing to Palestine to pay their veneration to the numerous spots consecrated in the annals of Holy Writ, more especially to the sepulcher of our Lord.

"It is natural," says Robertson (*Hist.*, ch. v., i., 19), "to the human mind, to view those places which have been distinguished by being the residence of any illustrious personage, or the scene of any great transaction, with some degree of delight and veneration. From this principle flowed the superstitious devotion with which Christians, from the earliest ages of the church, were accustomed to visit that country which the Almighty had selected as the inheritance of his favorite people, and in which the Son of God had accomplished the redemption of mankind. As this distant pilgrimage could not be performed without considerable expense, fatigue, and danger, it appeared the more meritorious, and came to be considered as an expiation for almost every crime."

Hence, by a pilgrimage to the Holy Land or to the shrine of some blessed martyr, the thunders of the church, and the more quiet, but not less alarming, reproaches of conscience were often averted. And as this was an act of penance, sometimes voluntarily assumed, but oftener imposed by the command of a religious superior, the person performing it was called a "*Pilgrim Penitent.*"

While the Califs of the East, a race of monarchs equally tolerant and sagacious, retained the sovereignty of Palestine, the penitents were undisturbed in the performance of their pious pilgrimages. In fact, their visits to Jerusalem were rather encouraged by these sovereigns as a commerce which, in the language of the author already quoted, "brought into their dominions gold and silver, and carried nothing out of them but relics and consecrated trinkets."

But in the eleventh century, the Turks, whose bigoted devotion to their own creed was only equaled by their hatred of every other form of faith, but more especially of Christianity, having obtained possession of Syria, the pilgrim no longer found safety or protection in his pious journey. He who would then visit the sepulcher of his Lord must be prepared to encounter the hostile attacks of ferocious Saracens, and the "*Pilgrim Penitent,*" laying aside his peaceful garb, his staff and russet cloak, was compelled to assume the sword and coat of mail and become a "*Pilgrim Warrior.*"

Having at length, through all the perils of a distant journey, accomplished the great object of his pilgrimage, and partly begged his way amid poor or inhospitable regions, where *a crust of bread and a draft of water* were often the only alms that he received, and partly fought it amid the gleaming scimitars of warlike Turks, the Pilgrim Penitent and Pilgrim Warrior was enabled to kneel at the sepulcher of Christ, and offer up his devotions on that sacred spot consecrated in his pious mind by so many religious associations.

But the experience which he had so dearly bought was productive of a noble and a generous result. The Order of Knights Templar was established by some of those devoted heroes, who were determined to protect the pilgrims who followed them from the dangers and difficulties through which they themselves had passed, at times with such remote prospects of success. Many of the pilgrims having performed their vow of visiting the holy shrine, returned home, to live upon the capital of piety which their penitential pilgrimage had gained for them; but others, imitating the example of the defenders of the sepulcher, doffed their pilgrim's garb and united themselves with the knights who were contending with their infidel foes, and thus the *Pilgrim Penitent*, having by force of necessity become a *Pilgrim Warrior*, ended his warlike pilgrimage by assuming the vows of a *Knights Templar*.

In this brief synopsis, the modern and Masonic Knights Templar will find a rational explanation of the ceremonies of that degree.

Pilgrim Penitent. A term in the ritual of Masonic Templarism. It refers to the pilgrimage, made as a penance for sin, to the sepulcher of the Lord; for the church promised the remission of sins and various spiritual advantages as the reward of the pious and faithful pilgrim. (See *Pilgrim.*)

Pilgrim's Shell. See *Scallop Shell.*

Pilgrim's Weeds. The costume of a pilgrim was thus called. It may be described as follows: In the first place, he wore a *sclavina*, or long gown, made of the darkest colors and the coarsest materials, bound by a

leathern girdle, as an emblem of his humility and an evidence of his poverty; a *bourdon*, or staff, in the form of a long walking stick, with two knobs at the top, supported his weary steps; the *rosary* and *cross*, suspended from his neck, denoted the religious character he had assumed; a *scrip*, or bag, held his scanty supply of provisions; a pair of sandals on his feet, and a coarse round hat turned before, in the front of which was fastened a scallop shell, completed the rude toilet of the pilgrim of the Middle Ages. Spenser's description, in the *Fairie Queen* (B. I., c. vi., st. 35), of a pilgrim's weeds, does not much differ from this:

"A silly man in simple weeds foreworn,
And soiled with dust of the long dried way;
His sandals were with toilsome travel torne,
And face all tann'd with scorching sunny ray;
As he had travell'd many a summer's day,
Through boiling sands of Araby and Inde;
And in his hand a Jacob's staff to stay
His weary limbs upon; and eke behind
His scrip did hang, in which his needments
he did bind."

Pilgrim Templar. The part of the pilgrim represented in the ritual of the Masonic Knights Templar Degree is a symbolic reference to the career of the pilgrim of the Middle Ages in his journey to the sepulcher in the Holy Land. (See *Pilgrim*.)

Pilgrim Warrior. A term in the ritual of Masonic Templarism. It refers to the pilgrimage of the knights to secure possession of the holy places. This was considered a pious duty. "Whoever goes to Jerusalem," says one of the canons of the Council of Clermont, "for the liberation of the Church of God, in a spirit of devotion only, and not for the sake of glory or of gain, that journey shall be esteemed a substitute for every kind of penance." The difference between the pilgrim penitent and the pilgrim warrior was this: that the former bore only his staff, but the latter wielded his sword.

Pilier. The title given to each of the conventual bailiffs or heads of the eight languages of the Order of Malta, and by which they were designated in all official records. It signifies a pillar or support of an edifice, and was metaphorically applied to these dignitaries as if they were the supports of the Order.

Pillar. In the earliest times it was customary to perpetuate remarkable events, or exhibit gratitude for providential favors, by the erection of pillars, which by the idolatrous races were dedicated to their spurious gods. Thus Sanconiatho tells us that Hypsourianos and Ousous, who lived before the flood, dedicated two pillars to the elements fire and air. Among the Egyptians the pillars were, in general, in the form of obelisks from fifty to one hundred feet high, and exceedingly slender in proportion. Upon their four sides hieroglyphics were often engraved. According to Herodotus, they were first raised in honor of the sun, and their pointed form was intended to represent his rays. Many of these monuments still remain.

In the antediluvian ages, the posterity of Seth erected pillars; "for," says the Jewish historian, "that their inventions might not be lost before they were sufficiently known, upon Adam's prediction, that the world was to be destroyed at one time by the force of fire, and at another time by the violence of water, they made two pillars, the one of brick, the other of stone; they inscribed their discoveries on them both, that in case the pillar of brick should be destroyed by the flood, the pillar of stone might remain, and exhibit those discoveries to mankind, and also inform them that there was another pillar of brick erected by them." Jacob erected a pillar at Bethel, to commemorate his remarkable vision of the latter, and afterward another one at Galeed as a memorial of his alliance with Laban. Joshua erected one at Gilgal to perpetuate the remembrance of his miraculous crossing of the Jordan. Samuel set up a pillar between Mizpeh and Shen, on account of a defeat of the Philistines, and Absalom erected another in honor of himself.

The doctrine of gravitation was unknown to the people of the primitive ages, and they were unable to refer the support of the earth in its place to this principle. Hence they looked to some other cause, and none appeared to their simple and unphilosophic minds more plausible than that it was sustained by pillars. The Old Testament abounds with reference to this idea. Hannah, in her song of thanksgiving, exclaims: "The pillars of the earth are the Lord's, and he hath set the world upon them." (1 Sam. ii. 8.) The Psalmist signifies the same doctrine in the following text: "The earth and all the inhabitants thereof are dissolved; I bear up the pillars of it." (Ps. lxxv. 3.) And Job says: "He shaketh the earth out of her places, and the pillars thereof tremble." (xxvi. 7.) All the old religions taught the same doctrine; and hence pillars being regarded as the supporters of the earth, they were adopted as the symbol of strength and firmness. To this, Dudley (*Naology*, 123) attributes the origin of pillar worship, which prevailed so extensively among the idolatrous nations of antiquity. "The reverence," says he, "shown to columns, as symbols of the power of the Deity, was readily converted into worship paid to them as idols of the real presence." But here he seems to have fallen into a mistake. The double pillars or columns, acting as an architectural support, were, it is true, symbols derived from a natural cause of strength and permanent firmness. But there was another more prevailing symbology. The monolith, or circular pillar, standing alone, was, to the ancient mind, a representation of the Phallus, the symbol of the creative and generative energy of Deity, and it is in these Phallic pillars that we are to find the true origin of pillar worship, which was only one form of Phallic worship, the most predominant of all the cults to which the ancients were addicted.

Pillars of Cloud and Fire. The pillar of cloud that went before the Israelites by day, and the pillar of fire that preceded them by night, in their journey through the wilderness, are supposed to be alluded to by the pillars of Jachin and Boaz at the porch of Solomon's Temple. We find this symbolism at a very early period in the last century, having been incorporated into the lecture of the Second Degree, where it still remains. "The pillar on the right hand," says Calcott (*Cand. Disq.*, 66), "represented the pillar of the cloud, and that on the left the pillar of fire." If this symbolism be correct, the pillars of the porch, like those of the wilderness, would refer to the superintending and protecting power of Deity.

Pillars of Enoch. Two pillars which were erected by Enoch, for the preservation of the antediluvian inventions, and which are repeatedly referred to in the "Legend of the Craft," contained in the *Old Constitutions*, and in the high degrees of modern times. (See *Enoch.*)

Pillars of the Porch. The pillars most remarkable in Scripture history were the two erected by Solomon at the porch of the Temple, and which Josephus (*Antiq.*, lib. i., cap. ii.) thus describes: "Moreover, this Hiram made two hollow pillars, whose outsides were of brass, and the thickness of the brass was four fingers' breadth, and the height of the pillars was eighteen cubits, (27 feet,) and the circumference twelve cubits, (18 feet;) but there was cast with each of their chapiters lily-work, that stood upon the pillar, and it was elevated five cubits, (7½ feet,) round about which there was net-work interwoven with small palms made of brass, and covered the lily-work. To this also were hung two hundred pomegranates, in two rows. The one of these pillars he set at the entrance of the porch on the right hand, (*or south,*) and called it Jachin, and the other at the left hand, (*or north,*) and called it Boaz."

It has been supposed that Solomon, in erecting these pillars, had reference to the pillar of cloud and the pillar of fire which went before the Israelites in the wilderness, and that the right hand or south pillar represented the pillar of cloud, and the left hand or north pillar represented that of fire. Solomon did not simply erect them as ornaments to the Temple, but as memorials of God's repeated promises of support to his people of Israel. For the pillar יכין (*Jachin*), derived from the words יה (*Jah*), "Jehovah," and הכין (*achin*), "to establish," signifies that "God will establish his house of Israel"; while the pillar בעז (*Boaz*), compounded of ב (*b*), "in" and עז (*oaz*), "strength," signifies that "in strength shall it be established." And thus were the Jews, in passing through the porch to the Temple, daily reminded of the abundant promises of God, and inspired with confidence in his protection and gratitude for his many acts of kindness to his chosen people.

The construction of these pillars.—There is no part of the architecture of the ancient Temple which is so difficult to be understood in its details as the Scriptural account of these memorable pillars. Freemasons, in general, intimately as their symbolical signification is connected with some of the most beautiful portions of their ritual, appear to have but a confused notion of their construction and of the true disposition of the various parts of which they are composed. Mr. Ferguson says (Smith, *Dict. Bib.*) that there are no features connected with the Temple which have given rise to so much controversy, or been so difficult to explain, as the form of these two pillars.

Their situation, according to Lightfoot, was *within* the porch, at its very entrance, and on each side of the gate. They were therefore seen, one on the right and the other on the left, as soon as the visitor stepped within the porch. And this, it will be remembered, in confirmation, is the very spot in which Ezekiel (xi. 49) places the pillars that he saw in his vision of the Temple. "The length of the porch was twenty cubits, and the breadth eleven cubits; and he brought me by the steps whereby they went up to it, and there were pillars by the posts, one on this side, and another on that side." The assertion made by some writers, that they were not columns intended to support the roof, but simply obelisks for ornament, is not sustained by sufficient authority; and as Ferguson very justly says, not only would the high roof look painfully weak, but it would have been impossible to construct it, with the imperfect science of those days, without some such support.

These pillars, we are told, were of brass, as well as the chapiters that surmounted them, and were cast hollow. The thickness of the brass of each pillar was "four fingers, or a hand's breadth," which is equal to three inches. According to the accounts in 1 Kings viii. 15, and in Jeremiah lii. 21, the circumference of each pillar was twelve cubits. Now, according to the Jewish computation, the cubit used in the measurement of the Temple buildings was six hands' breadth, or eighteen inches. According to the tables of Bishop Cumberland, the cubit was rather more, he making it about twenty-two inches; but I adhere to the measure laid down by the Jewish writers as probably more correct, and certainly more simple for calculation. The circumference of each pillar, reduced by this scale to English measure, would be eighteen feet, and its diameter about six.

The reader of the Scriptural accounts of these pillars will be not a little puzzled with the apparent discrepancies that are found in the estimates of their height as given in the Books of Kings and Chronicles. In the former book, it is said that their height was eighteen cubits, and in the latter it was thirty-five, which latter height Whiston observes would be contrary to all the rules of architecture. But the discrepancy is easily reconciled by supposing—which, indeed, must have been the case—that in the Book of Kings the pillars are spoken of separately, and that in

Chronicles their aggregate height is calculated; and the reason why, in this latter book, their united height is placed at thirty-five cubits instead of thirty-six, which would be the double of eighteen, is because they are there measured as they appeared with the chapiters upon them. Now half a cubit of each pillar was concealed in what Lightfoot calls "the whole of the chapiter," that is, half a cubit's depth of the lower edge of the chapiter covered the top of the pillar, making each pillar, apparently, only seventeen and a half cubits' high, or the two thirty-five cubits as laid down in the Book of Chronicles.

This is a much better method of reconciling the discrepancy than that adopted by Calcott, who supposes that the pedestals of the pillars were seventeen cubits high—a violation of every rule of architectural proportion with which we would be reluctant to charge the memory of so "cunning a workman" as Hiram the Builder. The account in Jeremiah agrees with that in the Book of Kings. The height, therefore, of each of these pillars was, in English measure, twenty-seven feet. The chapiter or pommel was five cubits, or seven and a half feet more; but as half a cubit, or nine inches, was common to both pillar and chapiter, the whole height from the ground to the top of the chapiter was twenty-two cubits and a half, or thirty-three feet and nine inches.

Mr. Ferguson has come to a different conclusion. He says in the article *Temple*, in Smith's *Dictionary of the Bible*, that "according to 1 Kings vii. 15, the pillars were eighteen cubits high and twelve in circumference, with capitals five cubits in height. Above this was (ver. 19) another member, called also chapiter of lily-work, four cubits in height, but which, from the second mention of it in ver. 22, seems more probably to have been an entablature, which is necessary to complete the order. As these members make out twenty-seven cubits, leaving three cubits, or 4½ feet, for the slope of the roof, the whole design seems reasonable and proper." He calculates, of course, on the authority of the Book of Kings, that the height of the roof of the porch was thirty cubits, and assumes that these pillars were columns by which it was supported, and connected with it by an entablature.

Each of these pillars was surmounted by a chapiter, which was five cubits, or seven and a half feet in height. The shape and construction of this chapiter require some consideration. The Hebrew word which is used in this place is כותרת (*koteret*). Its root is to be found in the word כתר (*keter*), which signified "a crown," and is so used in Esther vi. 8, to designate the royal diadem of the King of Persia. The Chaldaic version expressly calls the chapiter "a crown"; but Rabbi Solomon, in his commentary, uses the word סומי (*pomel*), signifying "a globe or spherical body," and Rabbi Gershom describes it as "like two crowns joined together." Lightfoot says, "it was a huge, great oval, five cubits high, and did not only sit upon the head of the pillars, but also flowered or spread them, being larger about, a great deal, than the pillars themselves." The Jewish commentators say that the two lower cubits of its surface were entirely plain, but that the three upper were richly ornamented. To this ornamental part we now come.

In the 1st Book of Kings, ch. vii., verses 17, 20, 22, the ornaments of the chapiters are thus described:

"And nets of checker-work and wreaths of chain-work, for the chapiters which were upon the tops of the pillars; seven for the one chapiter, and seven for the other chapiter.

"And he made the pillars, and two rows round about upon the one net-work, to cover the chapiters that were upon the top, with pomegranates; and so did he for the other chapiter.

"And the chapiters that were upon the top of the pillars were of lily-work in the porch, four cubits.

"And the chapiters upon the two pillars had pomegranates also above, over against the belly, which was by the net-work; and the pomegranates were two hundred in rows, round about upon the other chapiter.

"And upon the top of the pillars was lily-work; so was the work of the pillars finished."

Let us endeavor to render this description, which appears somewhat confused and unintelligible, plainer and more comprehensible.

The "nets of checker-work" is the first ornament mentioned. The words thus translated are in the original מעשה שבכה שבכים, which Lightfoot prefers rendering "thickets of branch work"; and he thinks that the true meaning of the passage is, that "the chapiters were curiously wrought with branch work, seven goodly branches standing up from the belly of the oval, and their boughs and leaves curiously and lovelily intermingled and interwoven one with another." He derives his reason for this version from the fact that the same word, שבכה, is translated "thicket" in the passage in Genesis (xxii. 13), where the ram is described as being "caught in a thicket by his horns"; and in various other passages the word is to be similarly translated. But, on the other hand, we find it used in the Book of Job, where it evidently signifies a net made of meshes: "For he is cast into a *net* by his own feet and he walketh upon a snare." (Job xvii. 8.) In 2 Kings i. 2, the same word is used, where our translators have rendered it a *lattice;* "Ahaziah fell down through a lattice in his upper chamber." I am, therefore, not inclined to adopt the emendation of Lightfoot, but rather coincide with the received version, as well as the Masonic tradition, that this ornament was a simple network or fabric consisting of reticulated lines—in other words, a lattice-work.

The "wreaths of chain-work" that are next spoken of are less difficult to be understood. The word here translated "wreath" is גר ים, and is to be found in Deuteronomy xxii. 12, where it distinctly means *fringes:* "Thou shalt

make thee fringes upon the four quarters of thy vesture." *Fringes* it should also be translated here. "The fringes of chain-work," I suppose, were therefore attached to, and hung down from, the network spoken of above, and were probably in this case, as when used upon the garments of the Jewish high priest, intended as a "memorial of the law."

The "lily-work" is the last ornament that demands our attention. And here the description of Lightfoot is so clear and evidently correct, that I shall not hesitate to quote it at length. "At the head of the pillar, even at the setting on of the chapiter, there was a curious and a large border or circle of lily-work, which stood out four cubits under the chapiter, and then turned down, every lily or long tongue of brass, with a neat bending, and so seemed as a flowered crown to the head of the pillar, and as a curious garland whereon the chapiter had its seat."

There is a very common error among Masons, which has been fostered by the plates in our Monitors, that there were on the pillars chapiters, and that these chapiters were again surmounted by globes. The truth, however, is that the chapiters themselves were "the pomels or globes," to which our lecture, in the Fellow-Craft's Degree, alludes. This is evident from what has already been said in the first part of the preceding description. The lily here spoken of is not at all related, as might be supposed, to the common lily—that one spoken of in the New Testament. It was a species of the lotus, the Nymphæa lotos, or lotus of the Nile. This was among the Egyptians a sacred plant, found everywhere on their monuments, and used in their architectural decorations. It is evident, from their description in Kings, that the pillars of the porch of King Solomon's Temple were copied from the pillars of the Egyptian temples. The maps of the earth and the charts of the celestial constellations which are sometimes said to have been engraved upon these globes, must be referred to the pillars, where, according to Oliver, a Masonic tradition places them—an ancient custom, instances of which we find in profane history. This is, however, by no means of any importance, as the symbolic allusion is perfectly well preserved in the shapes of the chapiters, without the necessity of any such geographical or astronomical engraving upon them. For being globular, or nearly so, they may be justly said to have represented the celestial and terrestrial spheres.

The true description, then, of these memorable pillars, is simply this. Immediately within the porch of the Temple, and on each side of the door, were placed two hollow brazen pillars. The height of each was twenty-seven feet, the diameter about six feet, and the thickness of the brass three inches. Above the pillar, and covering its upper part to the depth of nine inches, was an oval body or chapiter seven feet and a half in height. Springing out from the pillar, at the junction of the chapiter with it, was a row of lotus petals, which, first spreading around the chapiter, afterward gently curved downward toward the pillar, something like the Acanthus leaves on the capital of a Corinthian column. About two-fifths of the distance from the bottom of the chapiter, or just below its most bulging part, a tissue of network was carved, which extended over its whole upper surface. To the bottom of this network was suspended a series of fringes, and on these again were carved two rows of pomegranates, one hundred being in each row.

This description, it seems to me, is the only one that can be reconciled with the various passages in the Books of Kings, Chronicles, and Josephus, which relate to these pillars, and the only one that can give the Masonic student a correct conception of the architecture of these important symbols.

And now as to the Masonic symbolism of these two pillars. As symbols they have been very universally diffused and are to be found in all rites. Nor are they of a very recent date, for they are depicted on the earliest tracing-boards, and are alluded to in the catechisms before the middle of the last century. Nor is this surprising; for as the symbolism of Freemasonry is founded on the Temple of Solomon, it was to be expected that these important parts of the Temple would be naturally included in the system. But at first the pillars appear to have been introduced into the lectures rather as parts of an historical detail than as significant symbols—an idea which seems gradually to have grown up. The catechism of 1731 describes their name, their size, and their material, but says nothing of their symbolic import. Yet this had been alluded to in the Scriptural account of them, which says that the names bestowed upon them were significant.

What was the original or Scriptural symbolism of the pillars has been very well explained by Dudley, in his *Naology*. He says (p. 121) that "the pillars represented the sustaining power of the great God. The flower of the lotus or water-lily rises from a root growing at the bottom of the water, and maintains its position on the surface by its columnar stalk, which becomes more or less straight as occasion requires; it is therefore aptly symbolical of the power of the Almighty constantly employed to secure the safety of all the world. The chapiter is the body or mass of the earth; the pomegranates, fruits remarkable for the number of their seeds, are symbols of fertility; the wreaths, drawn variously over the surface of the chapiter or globe, indicate the courses of the heavenly bodies in the heavens around the earth, and the variety of the seasons. The pillars were properly placed in the porch or portico of the Temple, for they suggested just ideas of the power of the Almighty, of the entire dependence of man upon him, the Creator; and doing this, they exhorted all to fear, to love, and obey him."

It was, however, Hutchinson who first introduced the symbolic idea of the pillars into the Masonic system. He says: "The pillars

erected at the porch of the Temple were not only ornamental, but also carried with them an emblematical import in their names: Boaz being, in its literal translation, *in thee is strength;* and Jachin, *it shall be established*, which, by a very natural transposition, may be put thus: O Lord, thou art mighty, and thy power is established from everlasting to everlasting."

Preston subsequently introduced the symbolism, considerably enlarged, into his system of lectures. He adopted the reference to the pillars of fire and cloud, which is still retained.

The Masonic symbolism of the two pillars may be considered, without going into minute details, as being twofold. First, in reference to the names of the pillars, they are symbols of the *strength* and *stability* of the Institution; and then in reference to the ancient pillars of fire and cloud, they are symbolic of our dependence on the superintending guidance of the Great Architect of the Universe, by which alone that strength and stability are secured.

Pinceau. French, a *pencil;* but in the technical language of French Masonry it is a *pen*. Hence, in the minutes of French Lodges, *tenir le pinceau* means *to act as Secretary*.

Pine-Cone. The tops or points of the rods of deacons are often surmounted by a pine-cone or pineapple. This is in imitation of the *Thyrsus*, or sacred staff of Bacchus, which was a lance or rod enveloped in leaves of ivy, and having on the top a cone or apple of the pine. To it surprising virtues were attributed, and it was introduced into the Dionysiac mysteries as a sacred symbol.

Pinnacles. Generally ornamented terminations much used in Gothic architecture. They are prominently referred to in the Eleventh Degree of the A. A. Scottish Rite, where the pinnacles over the three gates support the warning to all evil-doers, and give evidence of the certainty of punishment following crime.

Pirlet. The name of a tailor of Paris, who, in 1762, organized a body called "Council of Knights of the East," in opposition to the Council of Emperors of the East and West.

Pitaka. ("Basket.") The Bible of Buddhism, containing 116 volumes, divided into three classes, collectively known as the Tripitaka or Pitakattayan, that is, the "Triple Basket"; the Soutras, or discourses of Buddha; the Vinaga, or Discipline; and the Abhadharma, or Metaphysics. The canon was fixed about 240 B.C., and commands a following of more than one-third of the human race —the estimates vary from 340,000,000 to 500,000,000. Masonically considered, this indeed must be a great Light or Trestle-Board, if it is the guide of the conduct and practise of so vast a number of our brethren; for are not all men our brethren?

Pitdah. (Heb. פטדה.) One of the twelve stones in the breastplate of the high priest, of a yellow color. The Sanskrit for yellow is *pita*.

Pitris. Spirits. Among the Hindus, Pitris were spirits; so mentioned in the *Agrouchada Parikchai*, the philosophical compendium of the Hindu spiritists, a scientific work giving an account of the creation and the Mercaba, and finally the Zohar; the three principal parts of which treat "of the attributes of God," "of the world," and "of the human soul." A fourth part sets forth the relevancy of souls to each other, and the evocation of Pitris. The adepts of the occult sciences were said by the votaries of the Pitris of India to have "entered the garden of delights." (See *Parikchai, Agrouchada;* also, *Indische Mysterien.*)

Pius VII. On the 13th of August, 1814, Pope Pius VII. issued an edict forbidding the meetings of all secret societies, and especially the Freemasons and Carbonari, under heavy corporal penalties, to which were to be added, according to the malignity of the cases, partial or entire confiscation of goods, or a pecuniary fine. The edict also renewed the bull of Clement XII., by which the punishment of death was incurred by those who obstinately persisted in attending the meetings of Freemasons.

Place. In strict Masonic ritualism the positions occupied by the Master and Wardens are called *stations;* those of the other officers, *places*. This distinction is not observed in the higher degrees. (See *Stations.*)

Planche Tracee. The name by which the minutes are designated in French Lodges. Literally, *planche* is a board, and *tracée*, delineated. The *planche tracée* is therefore the board on which the plans of the Lodge have been delineated.

Plans and Designs. The plans and designs on the Trestle-Board of the Master, by which the building is erected, are, in Speculative Masonry, symbolically referred to the moral plans and designs of life by which we are to construct our spiritual temple, and in the direction of which we are to be instructed by some recognized Divine authority. (See *Trestle-Board.*)

Platonic Academy. See *Academy, Platonic.*

Plenty. The ear of corn, or sheaf of wheat, is, in the Masonic system, the symbol of plenty. In ancient iconography, the goddess Plenty was represented by a young nymph crowned with flowers, and holding in the right hand the horn of Amalthea, the goat that suckled Jupiter, and in her left a bundle of sheaves of wheat, from which the ripe grain is falling profusely to the ground. There have been some differences in the representation of the goddess on various medals; but, as Montfaucon shows, the ears of corn are an indispensable part of the symbolism. (See *Shibboleth.*)

Plot Manuscript. Dr. Plot, in his *Natural History of Staffordshire*, published in 1686, speaks of "a scrole or parchment volume," in the possession of the Masons of the seventeenth century, in which it is stated that the "charges and manners were after perused and approved by King Henry VI." Dr. Oliver (*Golden Remains*, iii., 35) thinks that Plot here

referred to what is known as the Leland MS., which, if true, would be a proof of the authenticity of that document. But Oliver gives no evidence of the correctness of his assumption. It is more probable that the manuscript which Dr. Plot loosely quotes has not yet been recovered.

Plot, Robert, M.D. Born in 1651, and died in 1696. He was a Professor of Chemistry at Oxford, and Keeper of the Ashmolean Museum, to which position he had been appointed by Elias Ashmole, to whom, however, he showed but little gratitude. Dr. Plot published, in 1686, *The Natural History of Staffordshire*, a work in which he went out of his way to attack the Masonic institution. An able defense against this attack will be found in the third volume of Oliver's *Golden Remains of the Early Masonic Writers*. The work of Dr. Plot is both interesting and valuable to the Masonic student, as it exhibits the condition of Freemasonry in the latter part of the seventeenth century, certainly, if not at a somewhat earlier period, and is an anticipated answer to the assertions of the iconoclasts who would give Freemasonry its birth in 1717. For this purpose, I insert so much of his account as refers to the customs of the society in 1686.

"They have a custom in Staffordshire, of admitting men into the Society of Freemasons, that in the moorelands of this county seems to be of greater request than anywhere else, though I find the custom spread more or less all over the nation; for here I found persons of the most eminent quality that did not disdain to be of this fellowship. Nor, indeed, need they, were it of that antiquity and honor, that is pretended in a large parchment volum they have amongst them, containing the history and rules of the Craft of Masonry. Which is there deduced not only from sacred writ, but profane story; particularly that it was brought into England by St. Amphibal, and first communicated to St. Alban, who set down the charges of Masonry, and was made paymaster and governor of the king's works, and gave them charges and manners as St. Amphibal had taught him. Which were after confirmed by King Athelstan, whose youngest son Edwyn loved well Masonry, took upon him the charges, and learned the manners, and obtained for them of his father a free charter. Whereupon he caused them to assemble at York, and to bring all the old books of their Craft, and out of them ordained such charges and manners as they then thought fit; which charges in the said Schrole, or parchment volum, are in part declared; and thus was the Craft of Masonry grounded and confirmed in England. It is also there declared that these charges and manners were after perused and approved by King Henry VI. and his council, both as to Masters and fellows of this Right Worshipful Craft.

"Into which Society, when they are admitted, they call a meeting (or Lodg, as they term it in some places), which must consist at least of five or six of the ancients of the Order, whom the candidates present with gloves, and so likewise to their wives, and entertain with a collation, according to the custom of the place: this ended, they proceed to the admission of them, which chiefly consists in the communication of certain secret signes, whereby they are known to one another all over the nation, by which means they have maintenance whither ever they travel, for if any man appear, though altogether unknown, that can show any of these signs to a fellow of the Society, whom they otherwise call an Accepted Mason, he is obliged presently to come to him, from what company or place soever he be in; nay, though from the top of a steeple (what hazard or inconvenience soever he run), to know his pleasure and assist him; viz., if he want work, he is bound to find him some; or if he cannot do that, to give him mony, or otherwise support him till work can be had, which is one of their articles; and it is another, that they advise the masters they work for according to the best of their skill, acquainting them with the goodness or badness of their materials, and if they be any way out in the contrivance of the buildings, modestly to rectify them in it, that Masonry be not dishonored; and many such like that are commonly known; but some others they have (to which they are sworn after their fashion) that none know but themselves." (*Nat. Hist. of Staffordshire*, ch. viii., p. 316.)

Plumb. An instrument used by Operative Masons to erect perpendicular lines, and adopted in Speculative Masonry as one of the working-tools of a Fellow-Craft. It is a symbol of rectitude of conduct, and inculcates that integrity of life and undeviating course of moral uprightness which can alone distinguish the good and just man. As the operative workman erects his temporal building with strict observance of that plumb-line, which will not permit him to deviate a hair's breadth to the right or to the left, so the Speculative Mason, guided by the unerring principles of right and truth inculcated in the symbolic teachings of the same implement, is steadfast in the pursuit of truth, neither bending beneath the frowns of adversity nor yielding to the seductions of prosperity.

To the man thus just and upright, the Scriptures attribute, as necessary parts of his character, kindness and liberality, temperance and moderation, truth and wisdom; and the Pagan poet Horace (lib. iii., od. 3) pays, in one of his most admired odes, an eloquent tribute to the stern immutability of the man who is upright and tenacious of purpose.

It is worthy of notice that, in most languages, the word which is used in a direct sense to indicate straightness of course or perpendicularity of position, is also employed in a figurative sense to express uprightness of conduct. Such are the Latin "*rectum*," which signifies at the same time a *right line* and *honesty* or *integrity;* the Greek, ὀρθός, which means *straight, standing upright,* and also *equitable, just, true;* and the Hebrew *tsedek*, which in a physical sense denotes *right-*

ness, straightness, and in a moral, *what is right and just*. Our own word RIGHT partakes of this peculiarity, *right* being *not wrong*, as well as *not crooked*.

As to the name, it may be remarked that *plumb* is the word used in Speculative Masonry. Webster says that as a noun the word is seldom used except in composition. Its constant use, therefore, in Masonry, is a peculiarity.

Plumb-Line. A line to which a piece of lead is attached so as to make it hang perpendicularly. The plumb-line, sometimes called simply the *line*, is one of the working-tools of the Past Master. According to Preston, it was one of the instruments of Masonry which was presented to the Master of a Lodge at his installation, and he defines its symbolism as follows: "The line teaches the criterion of rectitude, to avoid dissimulation in conversation and action, and to direct our steps in the path which leads to immortality." This idea of the immortal life was always connected in symbology with that of the perpendicular—something that rose directly upward. Thus in the primitive church, the worshiping Christians stood up at prayer on Sunday, as a reference to the Lord's resurrection on that day. This symbolism is not, however, preserved in the verse of the prophet Amos (vii. 7), which is read in this country as the Scripture passage of the Second Degree, where it seems rather to refer to the strict justice which God will apply to the people of Israel. It there coincides with the first Masonic definition that the line teaches the criterion of moral rectitude.

Plumb-Rule. A narrow board, having a plumb-line suspended from its top and a perpendicular mark through its middle. It is one of the working-tools of a Fellow-Craft, but in Masonic language is called the *Plumb*, which see.

Plurality of Votes. See *Majority*.

Poetry of Masonry. Although Freemasonry has been distinguished more than any other single institution for the number of verses to which it has given birth, it has not produced any poetry of a very high order, except a few lyrical effusions. Rime, although not always of transcendent merit, has been a favorite form of conveying its instructions. The oldest of the Constitutions, that known as the Halliwell or Regius MS., is written in verse; and almost all the early catechisms of the degrees were in the form of rime, which, although often doggerel in character, served as a convenient method of assisting the memory. But the imagination, which might have been occupied in the higher walks of poetry, seems in Freemasonry to have been expended in the construction of its symbolism, which may, however, be considered often as the results of true poetic genius. There are, besides the songs, of which the number in all languages is very great, an abundance of prologues and epilogues, of odes and anthems, some of which are not discreditable to their authors or to the Institution. But there are very few poems on Masonic subjects of any length. The French have indulged more than any other nation in this sort of composition, and the earliest Masonic poem known is one published at Frankfort, 1756, with the title of *Noblesse des Franc-Maçons ou Institution de leur Société avant le deluge universel et de son renouwellement après le Deluge*.

It was printed anonymously, but the authorship of it is attributed to M. Jartigue. It is a transfer to verse of all the Masonic myths contained in the "Legend of the Craft" and the traditional history of Anderson. Neither the material nor the execution exempt the author from Horace's denunciation of poetic mediocrity.

Pointed Cubical Stone. The "Broached Thurnel" (*q. v.*) mentioned by Dr. Oliver and others in the Tracing-Board of an Entered Apprentice, and known to the French Mason as the *pierre cubique*, has an ax inserted in the apex. Bro. William S. Rockwell considered this feature in the Tracing-Board remarkable and suggestive of curious reflections, and thus reasoned: "The cubic stone pointed with an axe driven into it, is strikingly similar to a peculiar hieroglyphic of the Egyptians.

The name of one of their gods is written with a determinative sign affixed to it, consisting of a smooth rectangular stone with a knife over it; but the most singular portion of the circumstance is, that this hieroglyphic, which is read by Egyptologists, *Seth*, is the symbol of falsehood and error, in contradistinction to the rough (Brute) stone, which is the symbol of faith and truth. The symbol of error was the soft stone, which could be cut; the symbol of truth, the hard stone, on which no tool could be used."

Seth is the true Egyptian name of the god known afterward by the name of Typhon, at one time devoutly worshiped and profoundly venerated in the culminating epoch of the Pharaonic empire, as the monuments of Karnac and Medinet-Abou testify. But in time his worship was overthrown, his shrines desecrated, his name and titles chiseled from the monumental granite, and he himself, from being venerated as the giver of life and blessings to the rulers of Egypt, degraded from his position, treated as a destroying demon, and shunned as the personification of evil. This was not long before the exode of the children of Israel. Seth was the father of Judæus and Palestinus, is the god of the Semitic tribes who

rested on the seventh day, and bears the swarthy complexion of the hated race. Seth is also known by other names in the hieroglyphic legends, among the most striking of which is Bar, that is Bal, known to us in sacred history as the fatal stumbling-block of idolatry to the Jewish people. (See *Triangle and Square.*) [C. T. McClenachan.]

Points. In the *Old Constitutions* known as the Halliwell or Regius MS., there are fifteen regulations which are called *points*. The fifteen articles which precede are said to have been in existence before the meeting at York, and then only collected after search, while the fifteen points were then enacted. Thus we are told—

"Fifteen artyculus they there sougton, (*sought, found out,*)
And fifteen poyntys there they wrogton, (*wrought, enacted.*)"

The *points* referred to in the ritualistic phrase, "arts, parts, and points of the hidden mysteries of Masonry," are the rules and regulations of the Institution. Phillips's *New World of Words* (edit. 1706) defines *point* as "an head or chief matter." It is in this sense that we speak of the "points of Masonry."

Points of Entrance, Perfect. In the earliest lectures of the last century these were called "Principal Points." The designation of them as "Perfect Points of Entrance" was of a later date. They are described both in the English and the American systems. Their specific names, and their allusion to the four cardinal virtues, are the same in both; but the verbal explanations differ, although not substantially. They are so called because they refer to four important points of the initiation. The Guttural refers to the entrance upon the penal responsibilities; the Pectoral, to the entrance into the Lodge; the Manual, to the entrance on the covenant; and the Pedal, to the entrance on the instructions in the northeast.

Points of Fellowship, Five. There are duties owing by every Mason to his brethren, which, from their symbolic allusion to certain points of the body, and from the lesson of brotherly love which they teach, are called the "Five Points of Fellowship." They are symbolically illustrated in the Third Degree, and have been summed up by Oliver as "assisting a brother in his distress, supporting him in his virtuous undertakings, praying for his welfare, keeping inviolate his secrets, and vindicating his reputation as well in his absence as in his presence." (*Landm.*, i., 185.)

Cole, in the *Freemasons' Library* (p. 190), gives the same ideas in diffuser language, as follows:

"First. When the necessities of a brother call for my aid and support, I will be ever ready to lend him such assistance, to save him from sinking, as may not be detrimental to myself or connections, if I find him worthy thereof.

"Second. Indolence shall not cause my footsteps to halt, nor wrath turn them aside; but forgetting every selfish consideration, I will be ever swift of foot to serve, help, and execute benevolence to a fellow-creature in distress, and more particularly to a brother Mason.

"Third. When I offer up my ejaculations to Almighty God, a brother's welfare I will remember as my own; for as the voices of babes and sucklings ascend to the Throne of Grace, so most assuredly will the breathings of a fervent heart arise to the mansions of bliss, as our prayers are certainly required of each other.

"Fourth. A brother's secrets, delivered to me as such, I will keep as I would my own; as betraying that trust might be doing him the greatest injury he could sustain in this mortal life; nay, it would be like the villany of an assassin, who lurks in darkness to stab his adversary, when unarmed and least prepared to meet an enemy.

"Fifth. A brother's character I will support in his absence as I would in his presence: I will not wrongfully revile him myself, nor will I suffer it to be done by others, if in my power to prevent it."

The enumeration of these Points by some other more recent authorities differs from Cole's, apparently, only in the order in which the Points are placed. The latter order is given as follows in Mackey's *Lexicon of Freemasonry:*

"First. Indolence should not cause our footsteps to halt, or wrath turn them aside; but with eager alacrity and swiftness of foot, we should press forward in the exercise of charity and kindness to a distressed fellow-creature.

"Secondly. In our devotions to Almighty God, we should remember a brother's welfare as our own; for the prayers of a fervent and sincere heart will find no less favor in the sight of Heaven, because the petition for self is mingled with aspirations of benevolence for a friend.

"Thirdly. When a brother intrusts to our keeping the secret thoughts of his bosom, prudence and fidelity should place a sacred seal upon our lips, lest, in an unguarded moment, we betray the solemn trust confided to our honor.

"Fourthly. When adversity has visited our brother, and his calamities call for our aid, we should cheerfully and liberally stretch forth the hand of kindness, to save him from sinking, and to relieve his necessities.

"Fifthly. While with candor and kindness we should admonish a brother of his faults, we should never revile his character behind his back, but rather, when attacked by others, support and defend it."

The difference here is apparently only in the order of enumeration, but really there is an important difference in the symbols on which the instructions are founded. In the old system, the symbols are the hand, the foot, the knee, the breast, and the back. In the new system, the first symbol or the hand is omitted, and the mouth and the ear substituted. There is no

doubt that this omission of the first and insertion of the last are innovations, which sprung up in 1842 at the Baltimore Convention, and the enumeration given by Cole is the old and genuine one, which was originally taught in England by Preston, and in this country by Webb.

Points, The Five. See *Chromatic Calendar*.

Points, Twelve Grand. See *Twelve Original Points of Masonry*.

Point within a Circle. This is a symbol of great interest and importance, and brings us into close connection with the early symbolism of the solar orb and the universe, which was predominant in the ancient sun-worship. The lectures of Freemasonry give what modern Monitors have made an exoteric explanation of the symbol, in telling us that the point represents an individual brother, the circle the boundary line of his duty to God and man, and the two perpendicular parallel lines the patron saints of the Order—St. John the Baptist and St. John the Evangelist.

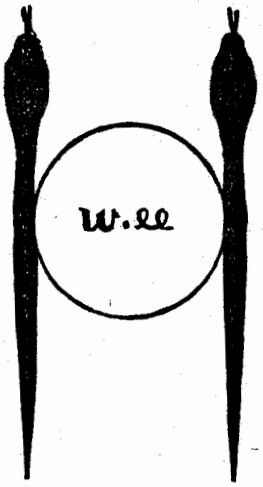
But that this was not always its symbolic signification, we may collect from the true history of its connection with the phallus of the Ancient Mysteries. The phallus, as I have already shown under the word, was among the Egyptians the symbol of fecundity, expressed by the male generative principle. It was communicated from the rites of Osiris to the religious festivals of Greece. Among the Asiatics the same emblem, under the name of lingam, was, in connection with the female principle, worshiped as the symbols of the Great Father and Mother, or producing causes of the human race, after their destruction by the deluge. On this subject, Captain Wilford (*Asiat. Res.*) remarks "that it was believed in India, that, at the general deluge, everything was involved in the common destruction except the male and female principles, or organs of generation, which were destined to produce a new race, and to repeople the earth when the waters had subsided from its surface. The female principle, symbolized by the moon, assumed the form of a lunette or crescent; while the male principle, symbolized by the sun, assuming the form of the lingam, placed himself erect in the center of the lunette, like the mast of a ship. The two principles, in this united form, floated on the surface of the waters during the period of their prevalence on the earth; and thus became the progenitors of a new race of men." Here, then, was the first outline of the point within a circle, representing the principle of fecundity, and doubtless the symbol, connected with a different history, that, namely, of Osiris, was transmitted by the Indian philosophers to Egypt, and to the other nations, who derived, as I have elsewhere shown, all their rites from the East.

It was in deference to this symbolism that, as Higgins remarks (*Anacal.*, ii., 306), circular temples were in the very earliest ages universally erected in cyclar numbers to do honor to the Deity.

In India, stone circles, or rather their ruins, are everywhere found; among the oldest of which, according to Moore (*Panth.*, 242), is that of Dipaldiana, and whose execution will compete with that of the Greeks. In the oldest monuments of the Druids we find, as at Stonehenge and Abury, the circle of stones. In fact, all the temples of the Druids were circular, with a single stone erected in the center. A Druidical monument in Pembrokeshire, called Y Cromlech, is described as consisting of several rude stones pitched on end in a circular order, and in the midst of the circle a vast stone placed on several pillars. Near Keswick, in Cumberland, says Oliver (*Signs and Symbols*, 174), is another specimen of this Druidical symbol. On a hill stands a circle of forty stones placed perpendicularly, of about five feet and a half in height, and one stone in the center of greater altitude.

Among the Scandinavians, the hall of Odin contained twelve seats, disposed in the form of a circle, for the principal gods, with an elevated seat in the center for Odin. Scandinavian monuments of this form are still to be found in Scania, Zealand, and Jutland.

But it is useless to multiply examples of the prevalence of this symbol among the ancients. And now let us apply this knowledge to the Masonic symbol.



We have seen that the phallus and the point within a circle come from the same source, and must have been identical in signification. But the phallus was the symbol of fecundity, or the male generative principle, which by the ancients was supposed to be the sun (they looking to the creature and not to the Creator), because by the sun's heat and light the earth is made prolific, and its productions are brought to maturity. The point within the circle was then originally the symbol of the sun; and as the lingam of India stood in the center of the lunette, so it stands within the center of the Universe, typified by the circle, impregnating and vivifying it with its heat. And thus the astronomers have been led to adopt the same figure as their symbol of the sun.

Now it is admitted that the Lodge represents the world or the universe, and the Master and Wardens within it represent the sun in three positions. Thus we arrive at the true interpretation of the Masonic symbolism of the point within the circle. It is the same thing, but under a different form, as the Master and Wardens of a Lodge. The Master and Wardens are symbols of the sun, the Lodge of the universe, or world, just as the point is the symbol of the same sun, and the surrounding circle of the universe.

*An addition to the above may be given, by referring to one of the oldest symbols among the Egyptians, and found upon their monuments, which was a circle centered by an A U M, supported by two erect parallel serpents; the circle being expressive of the collective people of the world, protected by the parallel attributes, the Power and Wisdom of

* From this point the article is by C. T. McClenachan.

the Creator. The Alpha and Omega, or the 𐤉.𐤋𐤋 representing the Egyptian omnipotent God, surrounded by His creation, having for a boundary no other limit than what may come within his boundless scope, his Wisdom and Power. At times this circle is represented

by the Ananta (Sanskrit, *eternity*), a serpent with its tail in its mouth. The parallel serpents were of the cobra species.

It has been suggestively said that the Masonic symbol refers to the circuits or circumambulation of the initiate about the sacred Altar, which supports the three Great Lights as a central point, while the brethren stand in two parallel lines.

Poland. Freemasonry was introduced into Poland, in 1736, by the Grand Lodge of England; but in 1739 the Lodges were closed in consequence of the edict of King Augustus II., who enforced the bull of Pope Clement XII. From 1742 to 1749 Masonry was revived and several Lodges erected, which flourished for a time, but afterward fell into decay. In 1766 Count Mosrynski sought to put it on a better footing, and in 1769 a Grand Lodge was formed, of which he was chosen Grand Master. The Grand Lodge of England recognized this body as a Provincial Grand Lodge. On the first division of Poland, the labors of the Grand Lodge were suspended; but they were revived in 1773 by Count Bruhl, who introduced the ritual of the Strict Observance, established several new Lodges, and acknowledged the supremacy of the United Lodges of Germany. There was a Lodge in Warsaw, working in the French Rite, under the authority of the Grand Orient of France, and another under the English system. These differences of Rites created many dissensions, but in August, 1781, the Lodge Catherine of the North Star received a Warrant as a Provincial Grand Lodge, and on December 27th of the same year the body was organized, and Ignatius Pococki elected Grand Master of all Polish and Lithuanian Lodges, the English system being provisionally adopted. In 1794, with the dissolution of the kingdom, the Lodges in the Russian and Austrian portions of the partition were suppressed, and those only in Prussian Poland continued their existence. Upon the creation, by Napoleon, of the Grand Duchy of Warsaw, a Grand Orient of Poland was immediately established. This body continued in operation until 1823, with more than forty Lodges under its obedience. In November of that year the Order was interdicted in consequence of the ukase of the Emperor Alexander prohibiting all secret societies, and all the Lodges were thereon closed. During the revolt of 1830 a few Lodges arose, but they lasted only until the insurrection was suppressed.

Politics. There is no charge more frequently made against Freemasonry than that of its tendency to revolution, and conspiracy, and to political organizations which may affect the peace of society or interfere with the rights of governments. It was the substance of all Barruel's and Robison's accusations, that the Jacobinism of France and Germany was nurtured in the Lodges of those countries; it was the theme of all the denunciations of the anti-Masons of America, that the Order was seeking a political ascendancy and an undue influence over the government; it has been the unjust accusation of every enemy of the Institution in all times past, that its object and aim is the possession of power and control in the affairs of state. It is in vain that history records no instance of this unlawful connection between Freemasonry and politics; it is in vain that the libeler is directed to the Ancient Constitutions of the Order, which expressly forbid such connection; the libel is still written, and Masonry is again and again condemned as a political club.

Polkal. A significant word in the high degrees, which means *altogether separated*, in allusion to the disunited condition of the Masonic Order at the time, divided as it was into various and conflicting rites. The word is corrupted from *palcol*, and is derived from the radical פַּל, *pal*, which, as Gesenius says, everywhere implies separation, and the adverbial כֹּל, *kol*, wholly, altogether.

Polychronicon. Ranulf Higden, a monk of Chester, wrote, about 1350, under this title a Latin chronicle, which was translated into English in 1387 by John Trevisa, and published by William Caxton, in 1482, as *The Polychronicon;* "conteynyng the Berynges and Dedes of many Tymes." Another edition was published (though, perhaps, it was the same book with a new title) by Wynkyn de Woorde, in 1485, as *Policronicon, in which booke ben comprysed bryefly many wonderful hystoryes, Englished by one Trevisa, vicarye of Barkley*, etc., a copy of which sold in 1857 for £37. There was another translation in the same century by an unknown author. The two translations made the book familiar to the English public, with whom it was at one time a favorite work. It was much used by the compiler or compilers of the *Old Consti-*

tutions now known as the Cooke Manuscript. Indeed, there is very little doubt that the writers of the old Masonic records borrowed from the *Polychronicon* many of their early legends of Masonry. In 1865 there was published at London, under the authority of the Master of the Rolls, an edition of the original Latin chronicle, with both the English translations, that of Trevisa and that of the unknown writer.

Pomegranate. The pomegranate, as a symbol, was known to and highly esteemed by the nations of antiquity. In the description of the pillars which stood at the porch of the Temple (see 1 Kings vii. 15), it is said that the artificer "made two chapiters of molten brass to set upon the tops of the pillars." Now the Hebrew word *caphtorim*, which has been translated "chapiters," and for which, in Amos ix. 1, the word "lintel" has been incorrectly substituted (though the marginal reading corrects the error), signifies an *artificial large pomegranate*, or *globe*. The original meaning is not preserved in the Septuagint, which has σφαιρωτηρ, nor in the Vulgate, which uses "sphærula," both meaning simply "a round ball." But Josephus, in his *Antiquities*, has kept to the literal Hebrew. It was customary to place such ornaments upon the tops or heads of columns, and in other situations. The skirt of Aaron's robe was ordered to be decorated with golden bells and pomegranates, and they were among the ornaments fixed upon the golden candelabra. There seems, therefore, to have been attached to this fruit some mystic signification, to which it is indebted for the veneration thus paid to it. If so, this mystic meaning should be traced into Spurious Freemasonry; for there, after all, if there be any antiquity in our Order, we shall find the parallel of all its rites and ceremonies.

The Syrians at Damascus worshiped an idol which they called Rimmon. This was the same idol that was worshiped by Naaman before his conversion, as recorded in the Second Book of Kings. The learned have not been able to agree as to the nature of this idol, whether he was a representation of Helios or the Sun, the god of the Phœnicians, or of Venus, or according to Grotius, in his commentary on the passage in Kings, of Saturn, or what, according to Statius, seems more probable, of Jupiter Cassius. But it is sufficient for the present purpose to know that *Rimmon* is the Hebrew and Syriac for *pomegranate*.

Cumberland, the learned Bishop of Peterborough (*Orig. Gent. Ant.*, p. 60), quotes Achilles Statius, a converted Pagan, and Bishop of Alexandria, as saying that on Mount Cassius (which Bochart places between Canaan and Egypt) there was a temple wherein Jupiter's image held a pomegranate in his hand, which Statius goes on to say, "had a mystical meaning." Sanconiathon thinks this temple was built by the descendants of the Cabiri. Cumberland attempts to explain this mystery thus: "Agreeably hereunto I guess that the pomegranate in the hand of Jupiter or Juno, (because, when it is opened, it discloses a great number of seeds,) signified only, that those deities were, being long-lived, the parents of a great many children, and families that soon grew into nations, which they planted in large possessions, when the world was newly begun to be peopled, by giving them laws and other useful inventions to make their lives comfortable."

Pausanias (*Corinthiaca*, p. 59) says he saw, not far from the ruins of Mycenæ, an image of Juno holding in one hand a scepter, and in the other a pomegranate; but he likewise declines assigning any explanation of the emblem, merely declaring that it was ἀπορρητότερος λόγος—"a forbidden mystery." That is, one which was forbidden by the Cabiri to be divulged.

In the festival of the Thesmophoria, observed in honor of the goddess Ceres, it was held unlawful for the celebrants (who were women) to eat the pomegranate. Clemens Alexandrinus assigns as a reason, that it was supposed that this fruit sprang from the blood of Bacchus.

Bryant (*Anc. Myth.*, iii., 237) says that the Ark was looked upon as the mother of mankind, and on this account it was figured under the semblance of a pomegranate; for as this fruit abounds with seeds, it was thought no improper emblem of the Ark, which contained the rudiments of the future world. In fact, few plants had among the ancients a more mythical history than the pomegranate.

From the Hebrews, who used it mystically at the Temple, it passed over to the Masons, who adopted it as the symbol of plenty, for which it is well adapted by its swelling and seed-abounding fruit.

Pomme Verte (Green Apple), **Order of the.** An androgynous Order, instituted in Germany in 1780, and afterward introduced into France. (Thory, *Acta Lat.*, i., 333.)

Pommel. A round knob; a term applied to the globes or balls on the top of the pillars which stood at the porch of Solomon's Temple. It was introduced into the Masonic lectures from Scriptural language. *The two pommels of the chapiters* is in 2 Chron. iv. 13. It is, however, an architectural term, thus defined by Parker (*Gloss. Arch.*, p. 365): "Pommel denotes generally any ornament of a globular form."

Pontifes Frères. See *Bridge Builders*.

Pontifex. See *Bridge Builders*.

Pontiff. In addition to what has been said of this word in the article on the "Bridge Builders of the Middle Ages," the following from Athanase Coquerel, fils, in a recent essay entitled *The Rise and Decline of the Romish Church*, will be interesting.

"What is the meaning of 'pontiff'? 'Pontiff' means bridge maker, bridge builder. Why are they called in that way? Here is the explanation of the fact: In the very first years of the existence of Rome, at a time of which we have a very fabulous history and but few existing monuments, the little town of Rome, not built on seven hills, as is generally supposed—there are eleven of them now; then

there were within the town less than seven, even—that little town had a great deal to fear from an enemy which should take one of the hills that were out of town—the Janiculum—because the Janiculum is higher than the others, and from that hill an enemy could very easily throw stones, fire, or any means of destruction into the town. The Janiculum was separated from the town by the Tiber. Then the first necessity for the defense of that little town of Rome was to have a bridge. They had built a wooden bridge over the Tiber, and a great point of interest to the town was, that this bridge should be kept always in good order, so that at any moment troops could pass over. Then, with the special genius of the Romans, of which we have other instances, they ordained, curiously enough, that the men, who were a corporation, to take care of that bridge should be sacred; that their function, necessary to the defense of the town, should be considered holy; that they should be priests; and the highest of them was called 'the high bridge maker.' So it happened that there was in Rome a corporation of bridge makers—*pontifices*—of whom the head was the most sacred of all Romans; because in those days his life and the life of his companions was deemed necessary to the safety of the town."

And thus it is that the title of Pontifex Maximus, assumed by the Pope of Rome, literally means the Grand Bridge Builder.

Pontiff, Grand. See *Grand Pontiff.*

Poor Fellow-Soldiers of Jesus Christ. (*Pauperes commilitones Jesu Christi.*) This was the title first assumed by the Knights Templars.

Pooroosh. The spirit or essence of Brahm in the Indian religious system.

Poppy. In the mysteries of the ancients, the poppy was the symbol of regeneration. The somniferous qualities of the plant expressed the idea of quiescence; but the seeds of a new existence which it contained were thought to show that nature, though her powers were suspended, yet possessed the capability of being called into a renewed existence. Thus the poppy planted near a grave symbolized the idea of a resurrection. Hence, it conveyed the same symbolism as the evergreen or sprig of acacia does in the Masonic mysteries.

Porch of the Temple. See *Temple of Solomon.*

Porta, Gambattista. A physicist of Naples, who was born in 1545 and died in 1615. He was the founder of the *Segreti*, or "Academy of Secrets," which see. He devoted himself to the study of the occult sciences, was the inventor of the camera obscura, and the author of several treatises on Magic, Physiognomy, and Secret Writing. De Feller (*Biog. Univ.*) classes him with Cornelius Agrippa, Cardan, Paracelsus, and other disciples of occult philosophy.

Portiforium. A banner like unto the *gonfalon*, used as an ensign in cathedrals, and borne at the head of religious processions.

Portugal. Freemasonry was introduced into Portugal in 1736, when a Lodge was instituted at Lisbon, under a Deputation to George Gordon from Lord Weymouth, Grand Master of England. An attempt was made by John Coustos to establish a second in 1743, but he and his companions were arrested by the Inquisition, and the Lodge suppressed. Freemasonry must, however, have continued to exist, although secretly practised, for in 1776 other arrests of Freemasons were made by the Holy Office. But through the whole of the eighteenth century the history of Masonry in Portugal was the history of an uninterrupted persecution by the Church and the State. In 1805 a Grand Lodge was established at Lisbon, and Egaz-Moritz was elected Grand Master. John VI., during his exile, issued from Santa Cruz, in 1818, a decree against the Masons, which declared that every Mason who should be arrested should suffer death, and his property be confiscated to the State; and this law was extended to foreigners residing in Portugal, as well as to natives. This bigoted sovereign, on his restoration to the throne, promulgated in 1823 another decree against the Order, and Freemasonry fell into abeyance; but in 1834 the Lodges were again revived. But dissensions in reference to Masonic authority unfortunately arose among the Fraternity of Portugal, which involved the history of the Order in that country in much confusion. There were in a few years no less than four bodies claiming Masonic jurisdiction, namely, a Grande Oriente Lusitano, which had existed for more than a quarter of a century, and which, in 1846, received Letters-Patent from the Supreme Council of Brazil for the establishment of a Supreme Council; a Provincial Grand Lodge, under the jurisdiction of the Grand Lodge of Ireland, with a Chapter of Rose Croix working under the authority of the Grand Council of Rites of Ireland; and two Grand Orients working under contending Grand Masters. Many attempts were made to reconcile these opposing bodies, but without success; and, to add to the difficulty, we find, about 1862, another body calling itself the Orient of the Masonic Confederation. But all embarrassments were at length removed by the alliance, in 1871, of the United Grand Orient with the Supreme Council, and the Masonic interests of Portugal are now prosperously conducted by the "Grande Oriente Lusitano Unido, Supremo Conselho de Maçonaria Portugueza."

Postulant. The title given to the candidate in the degree of Knight Kadosh. From the Latin *postulans*, asking for, wishing to have.

Pot of Incense. As a symbol of the sacrifice which should be offered up to Deity, it has been adopted in the Third Degree. (See *Incense.*)

Pot of Manna. See *Manna, Pot of.*

Poursuivant. More correctly, *Pursuivant*, which see.

Practicus. The Third Degree of the German Rose Croix.

Praxoeans. The followers of Praxeas in the second century, who proclaimed a unity in God, and that He had suffered upon the cross.

Prayer. Freemasonry is a religious institution, and hence its regulations inculcate the use of prayer "as a proper tribute of gratitude," to borrow the language of Preston, "to the beneficent Author of Life." Hence it is of indispensable obligation that a Lodge, a Chapter, or any other Masonic body, should be both opened and closed with prayer; and in the Lodges working in the English and American systems the obligation is strictly observed. The prayers used at opening and closing in America differ in language from the early formulas found in the second edition of Preston, and for the alterations we are probably indebted to Webb. The prayers used in the middle and perhaps the beginning of the eighteenth century are to be found in Preston (ed. 1775), and are as follows:

At Opening.—"May the favor of Heaven be upon this our happy meeting; may it be begun, carried on, and ended in order, harmony, and brotherly love: Amen."

At Closing.—"May the blessing of Heaven be with us and all regular Masons, to beautify and cement us with every moral and social virtue: Amen."

There is also a prayer at the initiation of a candidate, which has, at the present day, been very slightly varied from the original form. This prayer, but in a very different form, is much older than Preston, who changed and altered the much longer formula which had been used previous to his day. It was asserted by Dermott that the prayer at initiation was a ceremony only in use among the "Ancients" or Atholl Masons, and that it was omitted by the "Moderns." But this cannot be so, as is proved by the insertion of it in the earliest editions of Preston. We have moreover a form of prayer "to be used at the admission of a brother," contained in the *Pocket Companion*, published in 1754, by John Scott, an adherent of the "Moderns," which proves that they as well as the "Ancients" observed the usage of prayer at an initiation. There is a still more ancient formula of "Prayer to be used of Christian Masons at the empointing of a brother," said to have been used in the reign of Edward IV., from 1461 to 1483, which is as follows:

"The might of God, the Father of Heaven, with the wisdom of his glorious Son through the goodness of the Holy Ghost, that hath been three persons in one Godhead, be with us at our beginning, give us grace to govern in our living here, that we may only come to his bliss that shall never have an end."

The custom of commencing and ending labor with prayer was adopted at an early period by the Operative Freemasons of England. Findel says (*Hist.*, p. 78), that "their Lodges were opened at sunrise, the Master taking his station in the East and the brethren forming a half circle around him. After prayer, each craftsman had his daily work pointed out to him, and received his instructions. At sunset they again assembled after labor, prayer was offered, and their wages paid to them." We cannot doubt that the German Stone-Masons, who were even more religiously demonstrative than their English brethren, must have observed the same custom.

As to the posture to be observed in Masonic prayer, it may be remarked that in the lower degrees the usual posture is standing. At an initiation the candidate kneels, but the brethren stand. In the higher degrees the usual posture is to kneel on the right knee. These are at least the usages which are generally practised in America.

Preadamite. A degree contained in the Archives of the Mother Lodge of the Philosophic Scottish Rite.

Precaution. In opening and closing the Lodge, in the admission of visitors, in conversation with or in the presence of strangers, the Mason is charged to use the necessary precaution, lest that should be communicated to the profane which should only be known to the initiated.

Precedency of Lodges. The precedency of Lodges is always derived from the date of their Warrants of Constitution, the oldest Lodge ranking as No. 1. As this precedency confers certain privileges, the number of the Lodge is always determined by the Grand Lodge, while the name is left to the selection of the members.

Preceptor. Grand Preceptor, or Grand Prior, or Preceptor, or Prior, was the title indifferently given by the Knights Templar to the officer who presided over a province or kingdom, as the Grand Prior or Grand Preceptor of England, who was called in the East the Prior or Preceptor of England. The principal of these Grand Preceptors were those of Jerusalem, Tripolis, and Antioch.

Preceptory. The houses or residences of the Knights Templar were called Preceptories, and the superior of such a residence was called the Preceptor. Some of the residences were also called Commanderies. The latter name has been adopted by the Masonic Templars of America. An attempt was made in 1856, at the adoption of a new Constitution by the Grand Encampment of the United States, which met at Hartford, to abolish the title "Commanderies," and adopt that of "Preceptories," for the Templar organizations; a change which would undoubtedly have been more in accordance with history, but unfortunately the effort to effect the change was not successful.

Precious Jewels. See *Jewels, Precious.*

Preferment. In all the Old Constitutions we find a reference made to ability and skill as the only claims for preferment or promotion. Thus in one of them, the Lansdowne Manuscript, whose date is about 1560, it is said that Nimrod gave a charge to the Masons that "they should ordaine the most wise and cunninge man to be Master of the King or Lord's worke that was amongst

them, and neither for love, riches, nor favour, to sett another that had little cunninge to be Master of that worke, whereby the Lord should bee ill served and the science ill defamed." And again, in another part of the same Manuscript, it is ordered, "that noe Mason take on him noe Lord's worke nor other man's but if he know himselfe well able to performe the worke, so that the Craft have noe slander." Charges to the same effect, almost, indeed, in the same words, are to be found in all the Old Constitutions. So Anderson, when he compiled *The Charges of a Freemason*, which he says were "extracted from the ancient records," and which he published in 1723, in the first edition of the *Book of Constitutions*, lays down the rule of preferment in the same spirit, and in these words:

"All preferment among Masons is grounded upon real worth and personal merit only; that so the Lords may be well served, the brethren not put to shame, nor the royal Craft despised; therefore no Master or Warden is chosen by seniority, but for his merit."

And then he goes on to show how the skilful and qualified Apprentice may in due time become a Fellow-Craft, and, "when otherwise qualified, arrive to the Honour of being the Warden, and then the Master of the Lodge, the Grand Warden, and at length the Grand Master of all the Lodges, according to his merit." (*Constitutions*, 1723, p. 51.) This ought to be now, as it has always been, the true law of Masonry; and when ambitious men are seen grasping for offices, and seeking for positions whose duties they are not qualified to discharge, one is inclined to regret that the Old Charges are not more strictly obeyed.

Prelate. The fourth officer in a Commandery of Knights Templar and in a Council of Companions of the Red Cross. His duties are to conduct the religious ceremonies of the organization. His jewel is a triple triangle, the symbol of Deity, and within each of the triangles is suspended a cross, in allusion to the Christian character of the chivalric institution of which he is an officer. The corresponding officer in a Grand Commandery and in the Grand Encampment is called a Grand Prelate.

Prelate of Lebanon. (*Prélat du Liban.*) A mystical degree in the collection of Pyron.

Prentice. An archaism, or rather a vulgarism for *Apprentice*, constantly found in the Old Records. It is now never used.

Prentice Pillar. In the southeast part of the Chapel of Roslyn Castle, in Scotland, is the celebrated column which goes by this name, and with which a Masonic legend is connected. The pillar is a plain fluted shaft, having a floral garland twined around it, all carved out of the solid stone. The legend is, that when the plans of the chapel were sent from Rome, the master builder did not clearly understand about this pillar, or, as another account states, had lost this particular portion of the plans, and, in consequence, had to go to Rome for further instructions or to procure a fresh copy. During his absence, a clever apprentice, the only son of a widow, either from memory or from his own invention, carved and completed the beautiful pillar. When the master returned and found the work completed, furious with jealous rage, he killed the apprentice, by striking him a frightful blow on the forehead with a heavy setting-maul. In testimony of the truth of the legend, the visitor is shown three heads in the west part of the chapel—the master's, the apprentice's (with the gash on his forehead), and the widow's. There can be but little doubt that this legend referred to that of the Third Degree, which is thus shown to have existed, at least substantially, at that early period.

Preparation of the Candidate. Great care was taken of the personal condition of every Israelite who entered the Temple for Divine worship. The Talmudic treatise entitled *Baracoth*, which contains instructions as to the ritual worship among the Jews, lays down the following rules for the preparation of all who visit the Temple: "No man shall go into the Temple with his staff, nor with shoes on his feet, nor with his outer garment, nor with money tied up in his purse." There are certain ceremonial usages in Freemasonry which furnish what may be called at least very remarkable coincidences with this old Jewish custom.

The preparation of the candidate for initiation in Masonry is entirely symbolic. It varies in the different degrees, and therefore the symbolism varies with it. Not being arbitrary and unmeaning, but, on the contrary, conventional and full of signification, it cannot be altered, abridged, or added to in any of its details, without affecting its esoteric design. To it, in its fullest extent, every candidate must, without exception, submit.

The preparation of a candidate is one of the most delicate duties we have to perform and care should be taken in appointing the officer, who should bear in mind that "that which is not permittible among gentlemen should be impossible among Masons." [E. E. C.]

Preparing Brother. The brother who prepares the candidate for initiation. In English, he has no distinctive title. In French Lodges he is called "Frère terrible," and in German he is called "Vorbereitender Bruder," or "Fürchterlicher Bruder." His duties require him to have a competent knowledge of the ritual of reception, and therefore an experienced member of the Lodge is generally selected to discharge the functions of this office. In most jurisdictions in America this is performed by the Master of Ceremonies.

President. The presiding officer in a convention of High Priests, according to the American system, is so called. The second officer is styled Vice-President. On September 6, 1871, the Grand Orient of France, in violation of the landmarks, abolished the

office of Grand Master, and conferred his powers on a Council of the Order. The President of the Council is now the official representative of the Grand Orient and the Craft, and exercises several of the prerogatives hitherto administered by the Grand Master.

Presiding Officer. Whoever acts, although temporarily and *pro hac vice*, as the presiding officer of a Masonic body, assumes for the time all the powers and functions of the officer whom he represents. Thus, in the absence of the Worshipful Master, the Senior Warden presides over the Lodge, and for the time is invested with all the prerogatives that pertain to the Master of a Lodge, and can, while he is in the chair, perform any act that it would be competent for the Master to perform were he present.

Press, Masonic. The number of the Masonic press throughout the world is small, but the literary ability commands attention. In every nation Masonry has its advocate and newsbearer, in the form of a weekly or semi-monthly chronicle of events, or the more sedate magazine or periodical, sustaining the literature of the Fraternity.

Preston, William. This distinguished Mason was born at Edinburgh on the 7th of August, 1742. The usual statement, that he was born on the 28th of July, refers to old style, and requires therefore to be amended. He was the son of William Preston, Esq., a writer to the Signet, and Helena Cumming. The elder Preston was a man of much intellectual culture and abilities, and in easy circumstances, and took, therefore, pains to bestow upon his son an adequate education. He was sent to school at a very early age, and having completed his preliminary education in English under the tuition of Mr. Stirling, a celebrated teacher in Edinburgh, he entered the High School before he was six years old, and made considerable progress in the Latin tongue. From the High School he went to college, where he acquired a knowledge of the rudiments of Greek.

After the death of his father he retired from college, and became the amanuensis of that celebrated linguist, Thomas Ruddiman, to whose friendship his father had consigned him. Mr. Ruddiman having greatly impaired and finally lost his sight by his intense application to his classical studies, Preston remained with him as his secretary until his decease. His patron had, however, previously bound young Preston to his brother, Walter Ruddiman, a printer, but on the increasing failure of his sight, Mr. Thomas Ruddiman withdrew Preston from the printing-office, and occupied him in reading to him and translating such of his works as were not completed, and in correcting the proofs of those that were in the press. Subsequently Preston compiled a catalogue of Ruddiman's books, under the title of *Bibliotheca Ruddimana*, which is said to have exhibited much literary ability.

After the death of Mr. Ruddiman, Preston returned to the printing-office, where he remained for about a year; but his inclinations leading him to literary pursuits, he, with the consent of his master, repaired to London in 1760, having been furnished with several letters of introduction by his friends in Scotland. Among them was one to William Strahan, the king's printer, in whose service, and that of his son and successor, he remained for the best years of his life as a corrector of the press, devoting himself, at the same time, to other literary vocations, editing for many years the *London Chronicle*, and furnishing materials for various periodical publications.

Mr. Preston's critical skill as a corrector of the press led the literary men of that day to submit to his suggestions as to style and language; and many of the most distinguished authors who were contemporary with him honored him with their friendship. As an evidence of this, there were found in his library, at his death, presentation copies of their works, with their autographs, from Gibbon, Hume, Robertson, Blair, and many others.

It is, however, as a distinguished teacher of the Masonic ritual, and as the founder of a system of lectures which still retain their influence, that William Preston more especially claims our attention.

Stephen Jones, the disciple and intimate friend of Preston, published in 1795, in the *Freemasons' Magazine*, a sketch of Preston's life and labors; and as there can be no doubt, from the relations of the author and the subject, of the authenticity of the facts related, I shall not hesitate to use the language of this contemporary sketch, interpolating such explanatory remarks as I may deem necessary.

Soon after Preston's arrival in London, a number of brethren from Edinburgh resolved to institute a Freemasons' Lodge in that city, under the sanction of a Constitution from Scotland; but not having succeeded in their application, they were recommended by the Grand Lodge of Scotland to the ancient Lodge in London, which immediately granted them a Dispensation to form a Lodge and to make Masons. They accordingly met at the White Hart in the Strand, and Mr. Preston was the second person initiated under that Dispensation. This was in 1762. Lawrie records the application as having been in that year to the Grand Lodge of Scotland. It thus appears that Preston was made a Mason under the Dermott system. It will be seen, however, that he subsequently went over to the legitimate Grand Lodge.

The Lodge was soon after regularly constituted by the officers of the ancient Grand Lodge in person. Having increased considerably in numbers, it was found necessary to remove to the Horn Tavern in Fleet Street, where it continued some time, till, that house being unable to furnish proper

accommodations, it was removed to Scots' Hall, Blackfriars. Here it continued to flourish about two years, when the decayed state of that building obliged it to remove to the Half Moon Tavern, Cheapside, where it continued to meet for a considerable time.

At length Mr. Preston and some others of the members having joined the Lodge, under the regular English Constitution, at the Talbot Inn, in the Strand, they prevailed on the rest of the Lodge at the Half Moon Tavern to petition for a Constitution. Lord Blaney, at that time Grand Master, readily acquiesced with the desire of the brethren, and the Lodge was soon after constituted a second time, in ample form, by the name of "The Caledonian Lodge." The ceremonies observed, and the numerous assembly of respectable brethren who attended the Grand Officers on that occasion, were long remembered to the honor of the Lodge.

This circumstance, added to the absence of a very skilful Mason, to whom Mr. Preston was attached, and who had departed for Scotland on account of his health, induced him to turn his attention to the Masonic lectures; and to arrive at the depths of the science, short of which he did not mean to stop, he spared neither pains nor expense.

Preston's own remarks on this subject, in the introduction to his *Illustrations of Masonry*, are well worth the perusal of every brother who intends to take office. "When," says he, "I first had the honor to be elected Master of a Lodge, I thought it proper to inform myself fully of the general rules of the society, that I might be able to fulfil my own duty, and officially enforce obedience in others. The methods which I adopted, with this view, excited in some of superficial knowledge an absolute dislike of what they considered as innovations; and in others, who were better informed, a jealousy of pre-eminence, which the principles of Masonry ought to have checked. Notwithstanding these discouragements, however, I persevered in my intention of supporting the dignity of the society, and of discharging with fidelity the trust reposed in me." Masonry has not changed. We still too often find the same mistaking of research for innovation, and the same ungenerous jealousy of preeminence of which Preston complains.

Wherever instruction could be acquired, thither Preston directed his course; and with the advantage of a retentive memory, and an extensive Masonic connection, added to a diligent literary research, he so far succeeded in his purpose as to become a competent master of the subject. To increase the knowledge he had acquired, he solicited the company and conversation of the most experienced Masons from foreign countries; and, in the course of a literary correspondence with the Fraternity at home and abroad, made such progress in the mysteries of the art as to become very useful in the connections he had formed. He was frequently heard to say, that in the ardor of his inquiries he had explored the abodes of poverty and wretchedness, and, where it might have been least expected, acquired very valuable scraps of information. The poor brother in return, we are assured, had no cause to think his time or talents ill bestowed. He was also accustomed to convene his friends once or twice a week, in order to illustrate the lectures; on which occasion objections were started, and explanations given, for the purpose of mutual improvement. At last, with the assistance of some zealous friends, he was enabled to arrange and digest the whole of the first lecture. To establish its validity, he resolved to submit to the society at large the progress he had made; and for that purpose he instituted, at a very considerable expense, a grand gala at the Crown and Anchor Tavern, in the Strand, on Thursday, May 21, 1772, which was honored with the presence of the then Grand Officers, and many other eminent and respectable brethren. On this occasion he delivered an oration on the Institution, which, having met with general approbation, was afterward printed in the first edition of the *Illustrations of Masonry*, published by him the same year.

Having thus far succeeded in his design, Mr. Preston determined to prosecute the plan he had formed, and to complete the lectures. He employed, therefore, a number of skilful brethren, at his own expense, to visit different town and country Lodges, for the purpose of gaining information; and these brethren communicated the result of their visits at a weekly meeting.

When by study and application he had arranged his system, he issued proposals for a regular course of lectures on all the degrees of Masonry, and these were publicly delivered by him at the Miter Tavern, in Fleet Street, in 1774.

For some years afterward, Mr. Preston indulged his friends by attending several schools of instruction, and other stated meetings, to propagate the knowledge of the science, which had spread far beyond his expectations, and considerably enhanced the reputation of the society. Having obtained the sanction of the Grand Lodge, he continued to be a zealous encourager and supporter of all the measures of that assembly which tended to add dignity to the Craft, and in all the Lodges in which his name was enrolled, which were very numerous, he enforced a due obedience to the laws and regulations of that body. By these means the subscriptions to the charity became much more considerable; and daily acquisitions to the society were made of some of the most eminent and distinguished characters. At last he was invited by his friends to visit the Lodge of Antiquity, No. 1, then held at the Miter Tavern, in Fleet Street, when on June 15, 1774, the brethren of that Lodge were pleased to admit him a member, and, what was very unusual, elected him Master at the same meeting.

He had been Master of the Philanthropic Lodge at the Queen's Head, Gray's-inn-gate, Holborn, for over six years, and of several other Lodges before that time. But he was now taught to consider the importance of the first Master under the English Constitution; and he seemed to regret that some eminent character in the walks of life had not been selected to support so distinguished a station. Indeed, this too small consideration of his own importance pervaded his conduct on all occasions; and he was frequently seen voluntarily to assume the subordinate offices of an assembly, over which he had long presided, on occasions where, from the absence of the proper persons, he had conceived that his services would promote the purposes of the meeting.

To the Lodge of Antiquity he now began chiefly to confine his attention, and during his Mastership, which continued for some years, the Lodge increased in numbers and improved in its finances.

That he might obtain a complete knowledge of the state of the society under the English Constitution, he became an active member of the Grand Lodge, was admitted a member of the hall committee, and during the secretaryship of Mr. Thomas French, under the auspices of the Duke of Beaufort, then Grand Master, had become a useful assistant in arranging the general regulations of the society, and reviving the foreign and country correspondence. Having been appointed to the office of Deputy Grand Secretary under James Heseltine, Esq., he compiled, for the benefit of the charity, the *History of Remarkable Occurrences*, inserted in the first two publications of the *Freemasons' Calendar;* prepared for the press an *Appendix to the Book of Constitutions*, and attended so much to the correspondence with the different Lodges as to merit the approbation of his patron. This enabled him, from the various memoranda he had made, to form the History of Masonry, which was afterward printed in his *Illustrations*. The office of Deputy Grand Secretary he afterward resigned.

An unfortunate dispute having arisen in the society in 1777, between the Grand Lodge and the Lodge of Antiquity, in which Mr Preston took the part of the Lodge and his private friends, his name was ordered to be erased from the hall committee; and he was afterward, with a number of gentlemen, members of that Lodge, expelled.

The treatment he and his friends received at that time was circumstantially narrated in a well-written pamphlet, printed by Mr. Preston at his own expense, and circulated among his friends, but never published, and the leading circumstances were recorded in some of the later editions of the *Illustrations of Masonry*. Ten years afterward, however, on a reinvestigation of the subject in dispute, the Grand Lodge was pleased to reinstate Mr. Preston, with all the other members of the Lodge of Antiquity, and that in the most handsome manner, at the grand feast in 1790, to the general satisfaction of the Fraternity.

During Mr. Preston's exclusion, he seldom or ever attended any of the Lodges, though he was actually an enrolled member of a great many Lodges at home and abroad, all of which he politely resigned at the time of his suspension, and directed his attention to his other literary pursuits, which may fairly be supposed to have contributed more to the advantage of his fortune.

So much of the life of Preston we get from the interesting sketch of Stephen Jones. To other sources we must look for a further elucidation of some of the circumstances which he has so concisely related.

The expulsion of such a man as Preston from the Order was a disgrace to the Grand Lodge which inflicted it. It was, to use the language of Oliver, who himself, in after-times, had undergone a similar act of injustice, "a very ungrateful and inadequate return for his services."

The story was briefly this: It had been determined by the brethren of the Lodge of Antiquity, held on December 17, 1777, that at the annual festival on St. John's day, a procession should be formed to St. Dunstan's Church, a few steps only from the tavern where the Lodge was held; a protest of a few of the members was entered against it on the day of the festival. In consequence of this only ten members attended, who, having clothed themselves as Masons in the vestry room, sat in the same pew and heard a sermon, after which they crossed the street in their gloves and aprons to return to the Lodge room. At the next meeting of the Lodge, a motion was made to repudiate this act; and while speaking against it, Mr. Preston asserted the inherent privileges of the Lodge of Antiquity, which, not working under a Warrant of the Grand Lodge, was, in his opinion, not subject in the matter of processions to the regulations of the Grand Lodge. It was for maintaining this opinion, which, whether right or wrong, was after all only an opinion, Preston was, under circumstances which exhibited neither magnanimity nor dignity on the part of the Grand Lodge, expelled from the Order. One of the unhappy results of this act of oppression was that the Lodge of Antiquity severed itself from the Grand Lodge, and formed a rival body under the style of the "Grand Lodge of England South of the River Trent," acting under authority from the Lodge of All England at York.

But ten years afterward, in 1787, the Grand Lodge saw the error it had committed, and Preston was restored with all his honors and dignities and the new Grand Lodge collapsed. And now, while the name of Preston is known and revered by all who value Masonic learning, the names of all his bitter enemies, with the exception of Noorthouck, have sunk into a well-deserved oblivion.

Preston had no sooner been restored to his Masonic rights than he resumed his labors for the advancement of the Order. In 1787 he organized the Order of Harodim, a society in which it was intended to thoroughly teach the lectures which he had prepared. Of this Order some of the most distinguished Masons of the day became members, and it is said to have produced great benefits by its well-devised plan of Masonic instruction.

But William Preston is best known to us by his invaluable work entitled *Illustrations of Masonry*. The first edition of this work was published in 1772. Although it is spoken of in some resolutions of a Lodge, published in the second edition, as "a very ingenious and elegant pamphlet," it was really a work of some size, consisting, in its introduction and text, of 288 pages. It contained an account of the "grand gala," or banquet, given by the author to the Fraternity in May, 1772, when he first proposed his system of lectures. This account was omitted in the second and all subsequent editions "to make room for more useful matter." The second edition, enlarged to 324 pages, was published in 1775, and this was followed by others in 1776, 1781, 1788, 1792, 1799, 1801, and 1812. There must have been three other editions, of which I can find no account in the bibliographies, for Wilkie calls his 1801 edition the tenth, and the edition of 1812, the last published by the author, is called the twelfth. The thirteenth and fourteenth editions were published after the author's death, with additions—the former by Stephen Jones in 1821, and the latter by Dr. Oliver in 1829. Other English editions have been subsequently published. [The last being edited by Dr. Oliver in 1861.] The work was translated into German, and two editions published, one in 1776 and the other in 1780. In America, two editions were published in 1804, one at Alexandria, in Virginia, and the other, with numerous important additions, by George Richards, at Portsmouth, New Hampshire. Both claim, on the title-page, to be the "first American edition"; and it is probable that both works were published by their respective editors about the same time, and while neither had any knowledge of the existence of a rival copy.

Preston died, after a long illness, in Dean Street, Fetter Lane, London, on April 1, 1818, at the age of seventy-six, and was buried in St. Paul's Cathedral. In the latter years of his life he seems to have taken no active public part in Masonry, for in the very full account of the proceedings at the union in 1813 of the two Grand Lodges, his name does not appear as one of the actors, and his system was then ruthlessly surrendered to the newer but not better one of Dr. Hemming. But he had not lost his interest in the Institution which he had served so well and so long, and by which he had been so illy requited. For he bequeathed at his death £300 in Consols, the interest of which was to provide for the annual delivery of a lecture according to his system. He also left £500 to the Royal Freemasons' Charity, for female children, and a like sum to the General Charity Fund of the Grand Lodge. He was never married, and left behind him only his name as a great Masonic teacher and the memory of his services to the Craft. Jones's edition of his *Illustrations* contains an excellently engraved likeness of him by Ridley, from an original portrait said to be by S. Drummond, Royal Academician. There is an earlier engraved likeness of him in the *Freemasons' Magazine* for 1795, from a painting known to be by Drummond, and taken in 1794. They present the differences of features which may naturally be ascribed to a lapse of twenty-six years. The latter print is said, by those who personally knew him, to be an excellent likeness.

Prestonian Lecture. In 1818, Bro. Preston, the author of the *Illustrations of Masonry*, bequeathed £300 in Consols, the interest of which was to provide for the annual delivery of a lecture according to the system which he had elaborated. The appointment of the Lecturer was left to the Grand Master for the time being. Stephen Jones, a Past Master of the Lodge of Antiquity, and an intimate friend of Preston, received the first appointment; and it was subsequently given to Bro. Laurence Thompson, the only surviving pupil of Preston. He held it until his death, after which no appointment of a Lecturer was made until 1857, when the W. M. of the Royal York Lodge was requested by Lord Zetland, Grand Master, to deliver the lecture, which he did in January, 1858; twice again in the same year the lecture was delivered, and again, in subsequent years until 1862, since which time the lecture seems to have been abandoned.

Prestonian Lectures. About the year 1772, Preston submitted his course of lectures on the first three degrees to the Craft of England. These lectures were a revision of those which had been practised, with various modifications, since the revival of 1717, and were intended to confer a higher literary character on the Masonic ritual. Preston had devoted much time and labor to the compilation of these lectures, a syllabus of which will be found in his *Illustrations*. They were adopted eagerly by the English Fraternity, and continued to be the authoritative system of the Grand Lodge of England until the union in 1813, when, for the sake of securing uniformity, the new and inferior system of Dr. Hemming was adopted. But the Prestonian lectures and ritual are still used by many Lodges in England. In America they were greatly altered by Webb, and are no longer practised there.

Pretender. James Stuart, the son of James II., who abdicated the throne of Great Britain, and Charles Edward, his son, are known in history as the Old and the Young Pretender. Their intrigues with Masonry, which they are accused of attempting to

use as an instrument to aid in a restoration to the throne, constitute a very interesting episode in the history of the Order. (See *Stuart Masonry.*)

Previous Question. A parliamentary motion intended to suppress debate. It is utterly unknown in the parliamentary law of Masonry, and it would be always out of order to move it in a Masonic body.

Prichard, Samuel. "An unprincipled and needy brother," as Oliver calls him, who published at London, in 1730, a book with the following title: *Masonry Dissected; being a Universal and Genuine Description of all its Branches, from the Original to this Present Time: as it is delivered in the constituted, regular Lodges, both in City and Country, according to the several Degrees of Admission; giving an impartial account of their regular Proceedings in initiating their New Members in the whole Three Degrees of Masonry, viz., I. Entered Prentice; II. Fellow Craft; III. Master. To which is added, The Author's Vindication of Himself, by Samuel Prichard, Late Member of a constituted Lodge.* This work, which contained a great deal of plausible matter, mingled with some truth as well as falsehood, passed through a great many editions, was translated into the French, German, and Dutch languages, and became the basis or model on which all the subsequent so-called expositions, such as Tubal-Cain, Jachin and Boaz, etc., were framed. In the same year of the appearance of Prichard's book, a *Defence of Masonry*, as a reply to the *Masonry Dissected* was anonymously published, and has often been erroneously attributed to Dr. Anderson, but it has been discovered that its author was Bro. Martin Clare (*q. v.*). No copy is now known to exist of this *Defence*, but it will be found at the end of the 1738 edition of the *Constitutions*. It is not, however, a reply to Prichard, but rather an attempt to interpret the ceremonies which are described in the *Masonry Dissected* in their symbolic import, and this it is that gives to the *Defence* a value which ought to have made it a more popular work among the Fraternity than it is. Prichard died in obscurity; but the Abbé Larudan, in his *Franc-Maçons ecrasés* (p. 135), has manufactured a wild tale about his death; stating that he was carried by force at night into the Grand Lodge at London, put to death, his body burned to ashes, and all the Lodges in the world informed of the execution. The Abbé is satisfied of the truth of this wondrous narrative because he had heard it told in Holland and in Germany, all of which only proves that the French calumniator of Masonry abounded either in an inventive faculty or in a trusting faith.

Price, Henry. He received a Deputation as Provincial Grand Master of New England, which was issued on April 30, 1733, by Viscount Montague, Grand Master of England. On the 30th of the following July, Price organized a Provincial Grand Lodge; and he may thus be considered as the founder of Masonry in New England. He was born in England about the year 1697, and died in Massachusetts in 1780. A very able memoir of Price, by Bro. William Sewell Gardner, will be found in the Proceedings of the Grand Lodge of Massachusetts for the year 1871.

Priest. In the primitive ages of the world every father was the priest of his family, and offered prayer and sacrifice for his household. So, too, the patriarchs exercised the same function. Melchizedek is called "the priest of the most high God"; and everywhere in Scripture we find the patriarchs performing the duties of prayer and sacrifice. But when political society was organized, a necessity was found, in the religious wants of the people, for a separate class, who should become, as they have been described, the mediators between men and God, and the interpreters of the will of the gods to men. Hence arose the sacerdotal class—the *cohen* among the Hebrews, the *hiereus* among the Greeks, and the *sacerdos* among the Romans. Thereafter prayer and sacrifice were entrusted to these, and the people paid them reverence for the sake of the deities whom they served. Ever since, in all countries, the distinction has existed between the priest and the layman, as representatives of two distinct classes.

But Masonry has preserved in its religious ceremonies, as in many of its other usages, the patriarchal spirit. Hence the Master of the Lodge, like the father of a primitive family, on all occasions offers up prayer and serves at the altar. A chaplain is sometimes, through courtesy, invited to perform the former duty, but the Master is really the priest of the Lodge.

Having then such solemn duties to discharge, and sometimes, as on funereal occasions, in public, it becomes every Master so to conduct his life and conversation as not, by contrast, to make his ministration of a sacred office repulsive to those who see and hear him, and especially to profanes. It is not absolutely required that he should be a religious man, resembling the clergyman in seriousness of deportment; but in his behavior he should be an example of respect for religion. He who at one time drinks to intoxication, or indulges in profane swearing, or obscene and vulgar language, is unfit at any other time to conduct the religious services of a society. Such a Master could inspire the members of his Lodge with no respect for the ceremonies he was conducting; and if the occasion was a public one, as at the burial of a brother, the circumstance would subject the Order which could tolerate such an incongruous exhibition to contempt and ridicule.

Priesthood, Order of High. See *High Priesthood, Order of.*

Priestly Order. A Rite which Bro. John Yarker, of Manchester, says (*Myst. of*

Antiq., p. 126) was formerly practised in Ireland, and formed the system of the York Grand Lodge. It consisted of seven degrees, as follows: 1. 2. 3. Symbolic degrees; 4. Past Master; 5. Royal Arch; 6. Knight Templar; 7. Knight Templar Priest, or Holy Wisdom. The last degree was called a Tabernacle, and was governed by seven "Pillars." Bro. Hughan (*Hist. of Freem. in York*, p. 32) doubts the York origin of the Priestly Order, as well as the claim it made to have been revived in 1786. It is now obsolete.

Priest, Royal. The Fifth Degree of the Initiated Brothers of Asia.

Priest Theosophist. Thory says that it is the Sixth Degree of the Kabbalistic Rite.

Priestly Vestments. The high priest ministered in eight vestments, and the ordinary priest in four—the tunic, drawers, bonnet, and girdle. To these the high priest added the breastplate, ephod, robe and golden plate, and when occasion required the Urim and Thummim.

Primitive Freemasonry. The Primitive Freemasonry of the antediluvians is a term for which we are indebted to Oliver, although the theory was broached by earlier writers, and among them by the Chevalier Ramsay. The theory is, that the principles and doctrines of Freemasonry existed in the earliest ages of the world, and were believed and practised by a primitive people, or priesthood, under the name of Pure or Primitive Freemasonry; and that this Freemasonry, that is to say, the religious doctrine inculcated by it, was, after the flood, corrupted by the Pagan philosophers and priests, and, receiving the title of *Spurious Freemasonry*, was exhibited in the Ancient Mysteries. The Noachidæ, however, preserved the principles of the Primitive Freemasonry, and transmitted them to succeeding ages, when at length they assumed the name of *Speculative Masonry*. The Primitive Freemasonry was probably without ritual or symbolism, and consisted only of a series of abstract propositions derived from antediluvian traditions. Its dogmas were the unity of God and the immortality of the soul. Dr. Oliver, who gave this system its name, describes it (*Hist. Landm.*, i., p. 61) in the following language: "It included a code of simple morals. It assured men that they who did well would be approved of God; and if they followed evil courses, sin would be imputed to them, and they would thus become subject to punishment. It detailed the reasons why the seventh day was consecrated and set apart as a Sabbath, or day of rest; and showed why the bitter consequences of sin were visited upon our first parents, as a practical lesson that it ought to be avoided. But the great object of this Primitive Freemasonry was to preserve and cherish the promise of a Redeemer, who should provide a remedy for the evil that their transgression had introduced into the world, when the appointed time should come."

In his *History of Initiation* he makes the supposition that the ceremonies of this Primitive Freemasonry would be few and unostentatious, and consist, perhaps, like that of admission into Christianity, of a simple lustration, conferred alike on all, in the hope that they would practise the social duties of benevolence and good-will to man, and unsophisticated devotion to God.

He does not, however, admit that the system of Primitive Freemasonry consisted only of those tenets which are to be found in the first chapters of Genesis, or that he intends, in his definition of this science, to embrace so general and indefinite a scope of all the principles of truth and light, as Preston has done in his declaration, that "from the commencement of the world, we may trace the foundation of Masonry." On the contrary, Oliver supposes that this Primitive Freemasonry included a particular and definite system, made up of legends and symbols, and confined to those who were initiated into its mysteries. The knowledge of these mysteries was of course communicated by God himself to Adam, and from him traditionally received by his descendants, throughout the patriarchal line.

This view of Oliver is substantiated by the remarks of Rosenberg, a learned French Mason, in an article in the *Freemasons' Quarterly Review*, on the Book of Raziel, an ancient Kabbalistic work, whose subject is these Divine mysteries. "This book," says Rosenberg, "informs us that Adam was the first to receive these mysteries. Afterward, when driven out of Paradise, he communicated them to his son Seth; Seth communicated them to Enoch; Enoch to Methuselah; Methuselah to Lamech; Lamech to Noah; Noah to Shem; Shem to Abraham; Abraham to Isaac; Isaac to Jacob; Jacob to Levi; Levi to Kelhoth; Kelhoth to Amram; Amram to Moses; Moses to Joshua; Joshua to the Elders; the Elders to the Prophets; the Prophets to the Wise Men; and then from one to another down to Solomon."

Such, then, was the Pure or Primitive Freemasonry, the first system of mysteries which, according to modern Masonic writers of the school of Oliver, has descended, of course with various modifications, from age to age, in a direct and uninterrupted line, to the Freemasons of the present day.

The theory is an attractive one, and may be qualifiedly adopted, if we may accept what appears to have been the doctrine of Anderson, of Hutchinson, of Preston, and of Oliver, that the purer theosophic tenets of "the chosen people of God" were similar to those subsequently inculcated in Masonry, and distinguished from the corrupted teaching of the Pagan religions as developed in the mysteries. But if we attempt to contend that there was among the Patriarchs any esoteric organization at all resembling the modern system of Freemasonry, we shall find no historical data on which we may rely for support.

Primitive Rite. This Rite was founded at Narbonne, in France, on April 19, 1780, by the pretended "Superiors of the Order of Free

and Accepted Masons." It was attached to the Lodge of the *Philadelphes*, under the title of the "First Lodge of St. John united to the Primitive Rite for the country of France." Hence it is sometimes called the Primitive Rite of Narbonne, and sometimes the Rite of the Philadelphes. It was divided into three classes, which comprised ten degrees of instruction. These were not, in the usual sense, degrees, but rather collections of grades, out of which it was sought to develop all the instructions of which they were capable. These classes and degrees were as follows:

First Class. 1. Apprentice. 2. Fellow-Craft. 3. Master Mason. These were conformable to the same degrees in all the other Rites.

Second Class. Fourth Degree, comprising Perfect Master, Elu, and Architect. Fifth Degree, comprising the Sublime Ecossais. Sixth Degree, comprising the Knight of the Sword, Knight of the East, and Prince of Jerusalem.

Third Class. 7. The First Chapter of Rose Croix, comprising ritual instructions. 8. The Second Chapter of Rose Croix. It is the depository of historical documents of rare value. 9. The Third Chapter of Rose Croix, comprising physical and philosophical instructions. 10. The Fourth and last Chapter of Rose Croix, or Rose Croix Brethren of the Grand Rosary, engaged in researches into the occult sciences, the object being the rehabilitation and reintegration of man in his primitive rank and prerogatives. The Primitive Rite was united to the Grand Orient in 1786, although some of its Lodges, objecting to the union, maintained their independence. It secured, at one time, a high consideration among French Masons, not only on account of the objects in which it was engaged, but on account also of the talents and position of many of its members. But it is no longer practised.

Primitive Scottish Rite. This Rite claims to have been established in 1770, at Namur, in Belgium, by a body called the Metropolitan Grand Lodge of Edinburgh. But the truth, according to Clavel (*Hist. Pitt.*, p. 220), is that it was the invention of one Marchot, an advocate of Nivelles, who organized it in 1818, at Namur, beyond which city, and the Lodge of "Bonne Amitié," it scarcely ever extended. It consists of thirty-three degrees, as follows: 1. Apprentice; 2. Fellow-Craft; 3. Master; 4. Perfect Master; 5. Irish Master; 6. Elect of Nine; 7. Elect of the Unknown; 8. Elect of Fifteen; 9. Illustrious Master; 10. Perfect Elect; 11. Minor Architect; 12. Grand Architect; 13. Sublime Architect; 14. Master in Perfect Architecture; 15. Royal Arch; 16. Prussian Knight; 17. Knight of the East; 18. Prince of Jerusalem; 19. Master of All Lodges; 20. Knight of the West; 21. Knight of Palestine; 22. Sovereign Prince of Rose Croix; 23. Sublime Scottish Mason; 24. Knight of the Sun; 25. Grand Scottish Mason of St. Andrew; 26. Master of the Secret; 27. Knight of the Black Eagle; 28. Knight of K——H; 29. Grand Elect of Truth; 30. Novice of the Interior; 31. Knight of the Interior; 32. Prefect of the Interior; 33. Commander of the Interior. The Primitive Scottish Rite appears to have been founded upon the Rite of Perfection, with an intermixture of the Strict Observance of Hund, the Adonhiramite, and some other Rites.

Prince. The word Prince is not attached as a title to any Masonic office, but is prefixed as a part of the name to several degrees, as Prince of the Royal Secret, Prince of Rose Croix, and Prince of Jerusalem. In all of these instances it seems to convey some idea of sovereignty inherent in the character of the degree. Thus the Prince of the Royal Secret was the ultimate, and, of course, controlling degree of the Rite of Perfection, whence, shorn, however, of its sovereignty, it has been transferred to the Ancient and Accepted Scottish Rite. The Prince of Rose Croix, although holding in some Rites a subordinate position, was originally an independent degree, and the representative of Rosicrucian Masonry. It is still at the head of the French Rite. The Princes of Jerusalem, according to the Old Constitutions of the Rite of Perfection, were invested with power of jurisdiction over all degrees below the Sixteenth, a prerogative which they exercised long after the promulgation of the *Constitutions of 1786*; and even now they are called, in the ritual of the Ancient and Accepted Rite, "Chiefs in Masonry," a term borrowed from the *Constitutions of 1762*. But there are several other Prince degrees which do not seem, at least now, to claim any character of sovereignty—such are the Prince of Lebanon, Prince of the Tabernacle, and Prince of Mercy, all of which are now subordinate degrees in the Scottish Rite.

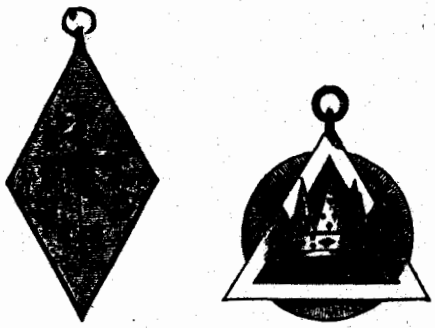
Prince Adept. See *Adept, Prince.*

Prince Depositor, Grand. (*Grand Prince Dépositaire.*) A degree in the collection of Pyron.

Prince Edward Island. Previous to November, 1798, Prince Edward Island was called St. John's Island, the name being changed by Imperial Act on that date.

On the 9th of October, 1797, St. John's Lodge, now No. 1 on the Registry of that Province, was established by Warrant at Charlottetown by the Grand Lodge of England. The then Lieutenant-Governor, General Edward Fanning, was one of the Charter members. In 1857, Victoria Lodge at Charlottetown was chartered by Scotland. In 1875 there were seven lodges in this Province working under English Warrants, viz., St. John's, King Hiram, St. George, Alexandra, Mount Lebanon, and True Brothers, and one under the Scottish Register, "Victoria."

On the 23d day of June, 1875, these eight Lodges met and formed the Grand Lodge of Prince Edward Island. The Hon. John Yeo was elected Grand Master and was installed, together with his officers, the following day by M. Wor. Bro. John V. Ellis, Grand Master of New Brunswick.



Prince Mason. A term applied in the old Scottish Rite Constitutions to the possessors of the high degrees above the Fourteenth. It was first assumed by the Council of the Emperors of the East and West. Rose Croix Masons in Ireland are still known by this name.

Prince of Jerusalem. (*Prince de Jerusalem.*) This was the Sixteenth Degree of the Rite of Perfection, whence it was transferred to the Ancient and Accepted Scottish Rite, where it occupies the same numerical position. Its legend is founded on certain incidents which took place during the rebuilding of the second Temple, when the Jews were so much incommoded by the attacks of the Samaritans and other neighboring nations, that an embassy was sent to King Darius to implore his favor and protection, which was accordingly obtained. This legend, as developed in the degree, is contained neither in Ezra nor in the apocryphal books of Esdras. It is found only in the *Antiquities* of Josephus (lib. xi., cap. iv., sec. 9), and thence there is the strongest internal evidence to show that it was derived by the inventor of the degree. Who that inventor was we can only conjecture. But as we have the statements of both Ragon and Kloss that the Baron de Tschoudy composed the degree of Knight of the East, and as that degree is the first section of the system of which the Prince of Jerusalem is the second, we may reasonably suppose that the latter was also composed by him. The degree being one of those adopted by the Emperors of the East and West in their system, which Stephen Morin was authorized to propagate in America, it was introduced into America long before the establishment of the Supreme Council of the Scottish Rite. A Council was established by Henry A. Francken, about 1767, at Albany, in the State of New York, and a Grand Council organized by Myers, in 1788, in Charleston, South Carolina. This body exercised sovereign powers even after the establishment of the Supreme Council, May 31, 1801, for, in 1802, it granted a Warrant for the establishment of a Mark Lodge in Charleston, and another in the same year, for a Lodge of Perfection, in Savannah, Georgia. But under the present regulations of the Ancient and Accepted Scottish Rite, this prerogative has been abolished, and Grand Councils of Princes of Jerusalem no longer exist. The old regulation, that the Master of a Lodge of Perfection must be at least a Prince of Jerusalem, which was contained in the Constitution of the Grand Council, has also been repealed, together with most of the privileges which formerly appertained to the degree. A decision of the Supreme Council, in 1870, has even obliterated Councils of the Princes of Jerusalem as a separate organization, authorized to confer the preliminary degree of Knights of the East, and placed such Councils within the bosom of Rose Croix Chapters, a provision of which, as a manifest innovation on the ancient system, the expediency, or at least the propriety, may be greatly doubted.

Bodies of this degree are called Councils. According to the old rituals, the officers were a Most Equitable, a Senior and Junior Most Enlightened, a Grand Treasurer, and Grand Secretary. The more recent ritual of the Southern Jurisdiction of the United States has substituted for these a Most Illustrious Tarshatha, a Most Venerable High Priest, a Most Excellent Scribe, two Most Enlightened Wardens, and other officers. Yellow is the symbolic color of the degree, and the apron is crimson (formerly white), lined and bordered with yellow. The jewel is a medal of gold, on one side of which is inscribed a hand holding an equally poised balance, and on the other a double-edged, cross-hilted sword erect, between three stars around the point, and the letters D and Z on each side.

The Prince of Jerusalem is also the Fifty-third Degree of the Metropolitan Chapter of France, and the Forty-fifth of the Rite of Mizraim.

Prince of Jerusalem, Jewel of. Should be a gold incrustation on a lozenge-shaped piece of mother-of-pearl. Equipoise scales held by hand, sword, five stars, one larger than

the other four, and the letters D and Z in Hebrew, one on either side of the scales. The five-pointed crown, within a triangle of gold, has also been used as a jewel of this Sixteenth Degree.

Prince of Lebanon. See *Knight of the Royal Ax.*

Prince of Libanus. Another title for *Prince of Lebanon.*

Prince of Mercy. (*Prince du Merci.*) The Twenty-sixth Degree of the Ancient and Accepted Scottish Rite, called also *Scottish Trinitarian* or *Ecossais Trinitaire.* It is one of the eight degrees which were added on the organization of the Scottish Rite to the original twenty-five of the Rite of Perfection.

It is a Christian degree in its construction, and treats of the triple covenant of mercy which God made with man; first with Abraham by circumcision; next, with the Israelites in the wilderness, by the intermediation of Moses; and lastly, with all mankind, by the death and sufferings of Jesus Christ. It is in allusion to these three acts of mercy, that the degree derives its two names of Scottish Trinitarian and Prince of Mercy, and not, as

Ragon supposes, from any reference to the Fathers of Mercy, a religious society formerly engaged in the ransoming of Christian captives at Algiers. Chemin Dupontès (*Mem. Sur l'Ecoss*, p. 373) says that the Scottish rituals of the degree are too full of the Hermetic philosophy, an error from which the French Cahiers are exempt; and he condemns much of its doctrines as "hyperbolique plaisanterie." But the modern rituals as now practised are obnoxious to no such objection. The symbolic development of the number three of course constitutes a large part of its lecture; but the real dogma of the degree is the *importance of Truth*, and to this all its ceremonies are directed.

Bodies of the degree are called Chapters. The presiding officer is called Most Excellent Chief Prince, the Wardens are styled Excellent. In the old rituals these officers represented Moses, Aaron, and Eleazar; but the abandonment of these personations in the modern rituals is, I think, an improvement. The apron is red bordered with white, and the jewel is an equilateral triangle, within which is a heart. This was formerly inscribed with the Hebrew letter *tau*, now with the letters I. H. S.; and, to add to the Christianization which these letters give to the degree, the American Councils have adopted a tessera in the form of a small fish of ivory or mother-of-pearl, in allusion to the well-known usage of the primitive Christians.

Prince of Rose Croix. See *Rose Croix, Prince of.*

Prince of the Captivity. According to the Talmudists, the Jews, while in captivity at Babylon, kept a genealogical table of the line of their kings, and he who was the rightful heir of the throne of Israel was called the Head or Prince of the Captivity. At the time of the restoration, Zerubbabel, being the lineal descendant of Solomon, was the Prince of the Captivity.

Prince of the East, Grand. (*Grand Prince d'Orient.*) A degree in the collection of Le Page.

Prince of the Levites. (*Prince des Lévites.*) A degree in the collection of the Lodge of Saint Louis des Amis Réunis at Calais.

Prince of the Royal Secret. See *Sublime Prince of the Royal Secret.*

Prince of the Seven Planets, Illustrious Grand. (*Illustre Grand Prince des sept Planètes.*) A degree in the manuscript collection of Peuvret.

Prince of the Tabernacle. (*Prince du Tabernacle.*) The Twenty-fourth Degree of the Ancient and Accepted Scottish Rite. In the old rituals the degree was intended to illustrate the directions given for the building of the tabernacle, the particulars of which are recorded in the twenty-fifth chapter of Exodus. The Lodge is called a Hierarchy, and its officers are a Most Powerful Chief Prince, representing Moses, and three Wardens, whose style is Powerful, and who respectively represent Aaron, Bezaleel, and Aholiab. In the modern rituals of the United States, the three principal officers are called the Leader, the High Priest, and the Priest, and respectively represent Moses, Aaron, and Ithamar, his son. The ritual is greatly enlarged; and while the main idea of the degree is retained, the ceremonies represent the initiation into the mysteries of the Mosaic tabernacle.

The jewel is the letter A, in gold, suspended from a broad crimson ribbon. The apron is white, lined with scarlet and bordered with green. The flap is sky-blue. On the apron is depicted a representation of the tabernacle.

This degree appears to be peculiar to the Scottish Rite and its modifications. I have not met with it in any of the other Rites.

Prince of Wales' Grand Lodge. About the time of the reconciliation of the two contending Grand Lodges in England, in 1813, they were called, by way of distinction, after their Grand Masters. That of the "Moderns" was called the "Prince of Wales' Grand Lodge," and that of the "Ancients" the "Duke of Kent's Grand Lodge." The titles were used colloquially, and not officially.

Princess of the Crown. (*Princesse de la Couronne.*) The Tenth and last degree of the Masonry of Adoption according to the French *régime*. The degree, which is said to have been composed in Saxony, in 1770, represents the reception of the Queen of Sheba by King Solomon. The Grand Master and Grand Mistress personate Solomon and his wife (which one, the Cahier does not say), and the recipiendary plays the part of the Queen of Sheba. The degree, says Ragon (*Tuil. Gen.*, p. 78), is not initiatory, but simply honorary.

Principal Officers. The number *three*, as a sacred number in the Masonic system, is, among many other ways, developed in the fact that in all Masonic bodies there are three principal officers.

Principals. The three presiding officers in a Chapter of Royal Arch Masons, according to the system practised in England, are called the Three Principals, or King, Prophet, and Priest, and, under the titles of Z, H, and J, represent Zerubbabel, Haggai, and Joshua. No person is eligible to the First Principal's chair unless he has served twelve months in each of the others; and he must also be the Master or Past Master of a Lodge, and have served in the Chapter the office of Scribe, Sojourner, or Assistant Sojourner. At his installation, each of the Principals receives an installing degree like that of the Master of a Blue Lodge. There is, however, no resemblance between any of these degrees and the order of High Priesthood which is conferred in this country.

The presiding officers of the Grand Chapter are called Grand Principals, and represent the same personages.

The official jewel of Z, is a crown; of H, an All-seeing eye; and of J, a book, each surrounded by a nimbus, or rays of glory, and placed within an equilateral triangle.

Principal Sojourner. The Hebrew word גר, *ger*, which we translate "a sojourner," signifies a man living out of his own country, and is used in this sense throughout the Old Testament. The children of Israel were, therefore, during the captivity, sojourners in Babylon, and the person who is represented by this officer, performed, as the incidents of the degree relate, an important part in the restoration of the Israelites to Jerusalem. He was the spokesman and leader of a party of three sojourners, and is, therefore, emphatically called the chief, or principal sojourner.

In the English Royal Arch system there are three officers called Sojourners. But in the American system the three Historical Sojourners are represented by the candidates, while only the supposed chief of them is represented by an officer called the Principal Sojourner. His duties are those of a conductor, and resemble, in some respects, those of a Senior Deacon in a Symbolic Lodge; which office, indeed, he occupies when the Chapter is open on any of the preliminary degrees.

Printed Proceedings. In 1741, the Grand Lodge of England adopted a regulation, which Entick (*Constitutions*, 1756, p. 236) is careful to tell us, "was unanimously agreed to," forbidding any brother "to print, or cause to be printed, the proceedings of any Lodge or any part thereof, or the names of the persons present at such Lodge, but by the direction of the Grand Master or his deputy, under pain of being disowned for a brother, and not to be admitted into any Quarterly Communication or Grand Lodge, or any Lodge whatsoever, and of being rendered incapable of bearing any office in the Craft." The law has never been repealed, but the Grand Lodge of England issues reports of its meetings, as also do most of the Grand Lodges of the world. Bulletins are published at stated intervals by the Grand Orients of France, Italy, and Portugal, and by nearly all those of South America. In the United States, every Grand Lodge publishes annually the journal of its proceedings, and many subordinate Lodges print the account of any special meeting held on an important or interesting occasion.

Prior. 1. The superiors of the different nations or provinces into which the Order of the Templar was divided, were at first called Priors or Grand Priors, and afterward Preceptors or Grand Preceptors.

2. Each of the languages of the Order of Malta was divided into Grand Priories, of which there were twenty-six, over which a Grand Prior presided. Under him were several Commanderies.

3. The second officer in a Council of Kadosh, under the Supreme Council for the Southern Jurisdiction of the United States.

4. The Grand Prior is the third officer in the Supreme Council of the Ancient and Accepted Scottish Rite for the Southern Jurisdiction of the United States.

Prior, Grand. See *Grand Prior*.

Priory. The jurisdiction of a Grand Prior in the Order of Malta or St. John of Jerusalem.

Priory, Great. See *Great Priory*.

Prison. A Lodge having been held in 1782, in the King's Bench prison, London, the Grand Lodge of England passed a resolution declaring that "it is inconsistent with the principles of Masonry for any Freemason's Lodge to be held for the purposes of making, passing, or raising Masons in any prison or place of confinement." (*Constitutions*, 1784, p. 349.) The resolution is founded on the principle that there must be perfect freedom of action in all that relates to the admission of candidates, and that this freedom is not consistent with the necessary restraints of a prison.

Private Committee. See *Committee, Private*.

Privileged Questions. In parliamentary law, privileged questions are defined to be those to which precedence is given over all other questions. They are of four kinds: 1. Those which relate to the rights and privileges of the assembly or any of its members. 2. Motions for adjournment. 3. Motions for reconsideration. 4. Special orders of the day. The first, third, and fourth only are applicable to Masonic parliamentary law.

Privilege, Questions of. In all parliamentary or legislative bodies, there occur certain questions which relate to matters affecting the dignity of the assembly or the rights and privileges of some of its members, and these are hence called "questions of privilege"; such, for instance, are motions arising out of or having relation to a quarrel between two of the members, an assault upon any member, charges affecting the integrity of the assembly or any of its members, or any other matters of a similar character. Questions referring to any of these matters take precedence of all other business, and hence are always in order. These questions of privilege are not to be confounded with privileged questions; for, although all questions of privilege are privileged questions, all privileged questions are not questions of privilege. Strictly speaking, questions of privilege relate to the house or its members, and privileged questions relate to matters of business. (See Dr. Mackey's *Parliamentary Law, as applied to the Government of Masonic Bodies*, ch. xxiv., xxv.)

Probation. The interval between the reception of one degree and the succeeding one is called the probation of the candidate, because it is during this period that he is to prove his qualification for advancement. In England and in this country the time of probation between the reception of degrees is four weeks, to which is generally added the further safeguard of an open examination in the preceding degree. In France and Germany the probation is extended to one year. The time is greatly extended in the Ancient and Accepted Scottish Rite. The

statutes of the Southern Supreme Council require an interval of two years to be passed between the reception of the Fourteenth and the Thirty-second degrees. An extraordinary rule prevailed in the Constitutions of 1762, by which the Rite of Perfection was governed. According to this rule, a candidate was required to pass a probation, from the time of his application as an Entered Apprentice until his reception of the Twenty-fifth or ultimate degree of the Rite, of no less than six years and nine months. But as all the separate times of probation depended on symbolic numbers, it is not to be presumed that this regulation was ever practically enforced.

Problem, Forty-Seventh. See *Forty-Seventh Problem.*

Processions. Public processions of the Order, although not as popular as they were some years ago, still have the warrant of early and long usage. The first procession, after the revival, of which we have a record, took place June 24, 1721, when, as Anderson tells us (*Constitutions*, 1738, p. 112), "Payne, Grand Master, with his Wardens, the former Grand officers, and the Masters and Wardens of twelve Lodges, met the Grand Master elect in a Grand Lodge at the King's Arms Tavern, St. Paul's Churchyard, in the morning, . . . and from thence they marched on foot to the Hall in proper clothing and due form." Anderson and Entick continue to record the annual processions of the Grand Lodge and the Craft on the feast day, with a few exceptions, for the next twenty-five years; but after this first pedestrian procession all the subsequent ones were made in carriages, the record being, "the procession of March was made in coaches and chariots." (*Constitutions*, 1756, p. 227.) But ridicule being thrown by the enemies of the Order upon these processions, by a mock one in 1741 (see *Scald Miserables*), and in subsequent years, in 1747 the Grand Lodge unanimously resolved to discontinue them, nor have they since been renewed. (*Ibid.*, p. 248.) *

In America, public processions of the Craft were some years ago very common, nor have they yet been altogether abandoned; although now practised with greater discretion and less frequently, being in general restricted to special occasions of importance, such as funerals, the laying of corner-stones, or the dedication of public edifices.

The question has been often mooted, whether public processions, with the open exhibition of its regalia and furniture, are or are not of advantage to the Order. In 1747 it was thought not to be so, at least in London, but the custom was continued, to a great extent, in the provinces. Dr. Oliver was in favor of what he calls (*Symb. of Glory*) "the good old custom, so strongly recommended and assiduously practised by the Masonic worthies of the last century, and imitated by many other public bodies of men, of assembling the brethren of a province annually under their own banner, and marching in solemn procession to the house of God, to offer up their thanksgiving in the public congregation for the blessings of the preceding year; to pray for mercies in prospect, and to hear from the pulpit a disquisition on the moral and religious purposes of the Order."

Processions are not peculiar to the Masonic Fraternity. The custom comes to us from remote antiquity. In the initiations at Eleusis, the celebration of the Mysteries was accompanied each day by a solemn procession of the initiates from Athens to the temple of initiation. Apuleius describes the same custom as prevailing in the celebration of the Mysteries of Isis. Among the early Romans, it was the custom, in times of public triumph or distress, to have solemn processions to the temples, either to thank the gods for their favor or to invoke their protection. The Jews also went in procession to the Temple to offer up their prayers. So, too, the primitive Christians walked in procession to the tombs of the martyrs. Ecclesiastical processions were first introduced in the fourth century. They are now used in the Catholic Church on various occasions, and the *Pontificale Romanum* supplies the necessary ritual for their observance. In the Middle Ages these processions were often carried to an absurd extent. Polydore describes them as consisting of "ridiculous contrivances, of a figure with a great gaping mouth, and other pieces of merriment." But these displays were abandoned with the increasing refinement of the age. At this day, processions are common in all countries, not only of religious confraternities, but of political and social societies.

There are processions also in Masonry which are confined to the internal concerns of the Order, and are not therefore of a public nature. The procession "round the Hall," at the installation of the Grand Master, is first mentioned in 1721. Previous to that year there is no allusion to any such ceremony. From 1717 to 1720 we are simply told that the new Grand Master "was saluted," and that he was "homaged," or that "his health was drunk in due form." But in 1721 a processional ceremony seems to have been composed, for in that year we are informed (*Const.*, 1738, p. 113) that "Brother Payne, the old Grand Master, made the first procession round the Hall, and when returned, he proclaimed aloud the most noble prince and our brother." This procession was not abolished with the public processions in 1747, but continued for many years afterward. In America it gave rise to the procession at the installation of Masters, which, although provided for by the ritual, and practised by most Lodges until very recently, has been too often neglected by

* On the subject of these mock processions, see an article by Dr. W. J. Chetwode Crawley in *Ars Quatuor Coronatorum*, vol. 18.

many. The form of the procession, as adopted in 1724, is given by Anderson (*Constitutions*, 1738, p. 117), and is almost precisely the same as that used in all Masonic processions at the present day, except funeral ones. The rule was then adopted, which has ever since prevailed, that in all processions the juniors in degree and in office shall go first, so that the place of honor shall be the rear.

Proclamation. At the installation of the officers of a Lodge, or any other Masonic body, and especially a Grand Lodge or Grand Chapter, proclamation is made in a Lodge or Chapter by the installing officer, and in a Grand Lodge or Grand Chapter by the Grand Marshal. Proclamation is also made on some other occasions, and on such occasions the Grand Marshal performs the duty.

Proclamation of Cyrus. A ceremony in the American Royal Arch. We learn from Scripture that in the first year of Cyrus, the King of Persia, the captivity of the Jews was terminated. Cyrus, from his conversations with Daniel and the other Jewish captives of learning and piety, as well as from his perusal of their sacred books, more especially the prophecies of Isaiah, had become imbued with a knowledge of true religion, and hence had even publicly announced to his subjects his belief in the God "which the nation of the Israelites worshipped." He was consequently impressed with an earnest desire to fulfil the prophetic declarations of which he was the subject, and to rebuild the Temple of Jerusalem. Accordingly, he issued a proclamation, which we find in Ezra, as follows:

"Thus saith Cyrus, King of Persia, The Lord God of heaven hath given me all the kingdoms of the earth; and he hath charged me to build him a house at Jerusalem, which is in Judea. Who is there among you of all his people? his God be with him, and let him go up to Jerusalem, which is in Judea, and build the house of the Lord God of Israel (he is the God) which is in Jerusalem."

With the publication of this proclamation of Cyrus commences what may be called the second part of the Royal Arch Degree.

Proclus. Known as the successor of Syrianus as the head of the Athenian school. Born in Constantinople, 412, died at Athens, 485. Proclus was a Neo-Platonist, and waged war against the new religion of Christianity, which caused him to be banished from the city; but was subsequently readmitted. His works were chiefly mystical, such as devoting hymns to the sun, Venus, or the poetic muses, and so far were harmless.

Profane. There is no word whose technical and proper meaning differs more than this. In its ordinary use *profane* signifies one who is irreligious and irreverent, but in its technical adaptation it is applied to one who is ignorant of sacred rites. The word is compounded of the two Latin words *pro* and *fanum*, and literally means *before* or *outside of the temple;* and hence a *profanus* among the ancients was one who was not allowed to enter the temple and behold the mysteries. "Those," says Vossius, "were called profane who were not initiated in the sacred rites, but to whom it was allowed only to stand before the temple—*pro fano*—not to enter it and take part in the solemnities." The Greek equivalent, Βέβηλος, had a similar reference; for its root is found in Βηλὸς, a *threshold*, as if it denoted one who was not permitted to pass the threshold of the temple. In the celebrated hymn of Orpheus, which it is said was sung at the Mysteries of Eleusis, we meet with this phrase, Φθεγξομαι οἷς Θέμις ἐστὶ Θύρας [δ' ἐπιθέσθε Βεβήλοις. "I speak to those to whom it is lawful, but close the doors against the profane." When the mysteries were about to begin, the Greeks used the solemn formula, ἐκὰς, ἐκὰς, ἔστε Βεβήλοι; and the Romans, "Procul, O procul este profani," both meaning, "Depart, depart, ye profane!" Hence the original and inoffensive signification of *profane* is that of being uninitiated; and it is in this sense that it is used in Masonry, simply to designate one who has not been initiated as a Mason. The word *profane* is not recognized as a noun substantive in the general usage of the language, but it has been adopted as a technical term in the dialect of Freemasonry, in the same relative sense in which the word *layman* is used in the professions of law and divinity.

Proficiency. The necessity that anyone who devotes himself to the acquisition of a science should become a proficient in its elementary instructions before he can expect to grasp and comprehend its higher branches, is so almost self-evident as to need no argument. But as Speculative Masonry is a science, it is equally necessary that a requisite qualification for admission to a higher degree should be a suitable proficiency in the preceding one. It is true, that we do not find in express words in the Old Constitutions any regulations requiring proficiency as preliminary to advancement, but their whole spirit is evidently to that effect; and hence we find it prescribed in the Old Constitutions, that no Master shall take an apprentice for less than seven years, because it was expected that he should acquire a competent knowledge of the *mystery* before he could be admitted as a Fellow. The modern Constitution of the Grand Lodge of England provides that no Lodge shall confer a higher degree on any brother until he has passed an examination in open Lodge on the preceding degrees (Rule 195), and many, perhaps most, of the Grand Lodges of this country have adopted a similar regulation. The ritual of all the Symbolic degrees, and, indeed, of the higher degrees, and that too in all rites, makes the imperative demand of every candidate whether he has made suitable proficiency in the preceding degree, an affirmative answer to which is required before the rites of initiation can be proceeded with. This answer is,

according to the ritual, that "he has"; but some Masons have sought to evade the consequence of an acknowledgment of ignorance and want of proficiency by a change of the language of the ritual into "such as time and circumstances would permit." But this is an innovation, unsanctioned by any authority, and should be repudiated. If the candidate has not made proper proficiency, the ritual, outside of all statutory regulations, refuses him advancement.

Anderson, in the second edition of his *Constitutions* (p. 71), cites what he calls "an old record," which says that in the reign of Edward III. of England it was ordained "that Master Masons, or Masters of work, shall be examined whether they be able of cunning to serve their respective Lords, as well the Highest as the Lowest, to the Honour and Worship of the aforesaid Art, and to the Profit of their Lords."

Here, then, we may see the origin of that usage, which is still practised in every well-governed Lodge, not only of demanding a proper degree of proficiency in the candidate, but also of testing that proficiency by an examination.

This cautious and honest fear of the Fraternity lest any brother should assume the duties of a position which he could not faithfully discharge, and which is, in our time, tantamount to a candidate's advancing to a degree for which he is not prepared, is again exhibited in all the Old Constitutions. Thus in the Lansdowne Manuscript, whose date is referred to the middle of the sixteenth century, it is charged "that no Mason take on him no Lord's work, nor other man's, but if [unless] he know himself well able to perform the work, so that the Craft have no slander." The same regulation, and almost in the same language, is to be found in all the subsequent manuscripts.

In the Charges of 1722, it is directed that "a younger brother shall be instructed in working, to prevent spoiling the materials for want of judgment, and for encreasing and continuing of brotherly love." (*Constitutions*, 1723, p. 53.) It was, with the same view, that all of the Old Constitutions made it imperative that no Master should take an apprentice for less than seven years, because it was expected that he should acquire a competent knowledge of the mystery of the Craft before he could be admitted as a Fellow.

Notwithstanding these charges had a more particular reference to the operative part of the art, they clearly show the great stress that was placed by our ancient brethren upon the necessity of skill and proficiency; and they have furnished the precedents upon which are based all the similar regulations that have been subsequently applied to Speculative Masonry.

Pro Grand Master. An officer known only to the English system, and adopted for the first time in 1782, when, on the election of the Duke of Cambridge to the office of Grand Master, a regulation was adopted by the Grand Lodge of England, that whenever a prince of the blood accepted the office of Grand Master, he should be at liberty to nominate any peer of the realm to be the Acting Grand Master, and to this officer is now given the title of Pro Grand Master. His collar, jewel, and authority are the same as those of a Grand Master, and in the case of a vacancy he actually assumes the office until the next annual election.

The following have been Pro Grand Masters:

1782–9, Earl of Effingham.
1790–1813, Earl of Moira.
1834–8, Lord Dundas.
1839–40, Earl of Durham.
1841–3, Earl of Zetland.
1874–90, Earl of Carnarvon.
1891–8, Earl of Lathom.
1898–1908, Earl Amherst.
1908, Lord Ampthill.

Progressive Masonry. Freemasonry is undoubtedly a progressive science, and yet the fundamental principles of Freemasonry are the same now as they were at the very beginning of the Institution. Its landmarks are unchangeable. In these there can be no alteration, no diminution, no addition. When, therefore, we say that Freemasonry is progressive in its character, we of course do not mean to allude to this unalterable part of its constitution. But there is a progress which every science must undergo, and which many of them have already undergone, to which the science of Freemasonry is subject. Thus we say of chemistry that it is a progressive science. Two hundred years ago, all its principles, so far as they were known, were directed to such futile inquiries as the philosopher's stone and the elixir of immortality. Now these principles have become more thoroughly understood, and more definitely established, and the object of their application is more noble and philosophic. The writings of the chemists of the former and the present period sufficiently indicate this progress of the science. And yet the elementary principles of chemistry are unchangeable. Its truths were the same then as they are now. Some of them were at that time unknown, because no mind of sufficient research had discovered them; but they existed as truths, from the very creation of matter; and now they have only been developed, not invented.

So it is with Freemasonry. It too has had its progress. Masons are now expected to be more learned than formerly in all that relates to the science of the Order. Its origin, its history, its objects, are now considered worthy of the attentive consideration of its disciples. The rational explanation of its ceremonies and symbols, and their connection with ancient systems of religion and philosophy, are now considered as necessary topics of inquiry for all who desire to distinguish themselves as proficients in Masonic science.

In all these things we see a great difference between the Masons of the present and of former days. In Europe, a century ago, such inquiries were considered as legitimate subjects of Masonic study. Hutchinson published in 1760, in England, his admirable work entitled *The Spirit of Freemasonry*, in which the deep philosophy of the Institution was fairly developed with much learning and ingenuity. Preston's *Illustrations of Masonry*, printed at a not much later period, also exhibits the system treated, in many places, in a philosophical manner. Lawrie's *History of Freemasonry*, published in Scotland in 1804, is a work containing much profound historical and antiquarian research. And in the present century, the works of Oliver alone would be sufficient to demonstrate to the most cursory observer that Freemasonry has a claim to be ranked among the learned institutions of the day. In Germany and France, the press has been borne down with the weight of abstruse works on our Order, written by men of the highest literary pretensions.

In America, notwithstanding the really excellent work of Salem Town on *Speculative Masonry*, published in 1818, and the learned *Discourses* of Dr. T. M. Harris, published in 1801, it is only within a few years that Masonry has begun to assume the exalted position of a literary institution.

Promise. In entering into the covenant of Masonry, the candidate makes a promise to the Order; for his covenant is simply a promise where he voluntarily places himself under a moral obligation to act within certain conditions in a particular way. The law of promise is, therefore, strictly applicable to this covenant, and by that law the validity and obligation of the promises of every candidate must be determined. In every promise there are two things to be considered: the intention and the obligation. As to the intention: of all casuists, the Jesuits alone have contended that the intention may be concealed within the bosom of the promiser. All Christian and Pagan writers agree on the principle that the words expressed must convey their ordinary meaning to the promisee. If I promise to do a certain thing to-morrow, I cannot, when the morrow comes, refuse to do it on the ground that I only promised to do it if it suited me when the time of performance had arrived. The obligation of every promiser is, then, to fulfil the promise that he has made, not in any way that he may have secretly intended, but in the way in which he supposes that the one to whom he made it understood it at the time that it was made. Hence all Masonic promises are accompanied by the declaration that they are given without equivocation or mental reservation of any kind whatsoever.

All voluntary promises are binding, unless there be some paramount consideration which will release the obligation of performance. It is worth while, then, to inquire if there be any such considerations which can impair the validity of Masonic promises. Dr. Wayland (*Elem. of Mor. Science*, p. 285) lays down five conditions in which promises are not binding: 1. Where the performance is impossible; 2. Where the promise is unlawful; 3. Where no expectation is voluntarily excited by the promiser; 4. Where they proceed upon a condition which the promiser subsequently finds does not exist; and, 5. Where either of the parties is not a moral agent.

It is evident that no one of these conditions will apply to Masonic promises, for, 1. Every promise made at the altar of Masonry is possible to be performed; 2. No promise is exacted that is unlawful in its nature; for the candidate is expressly told that no promise exacted from him will interfere with the duty which he owes to God and to his country; 3. An expectation is voluntarily excited by the promiser, and that expectation is that he will faithfully fulfil his part of the covenant; 4. No false condition of things is placed before the candidate, either as to the character of the Institution or the nature of the duties which would be required of him; and, 5. Both parties to the promise, the candidate who makes it and the Craft to whom it is made, are moral agents, fully capable of entering into a contract or covenant.

This, then, is the proper answer to those adversaries of Freemasonry who contend for the invalidity of Masonic promises on the very grounds of Wayland and other moralists. Their conclusions would be correct, were it not that every one of their premises is false.

Promotion. Promotion in Masonry should not be governed, as in other societies, by succession of office. The fact that one has filled a lower office gives him no claim to a higher, unless he is fitted, by skill and capacity, to discharge its duties faithfully. This alone should be the true basis of promotion. (See *Preferment*.)

Proofs. What the German Masons call "proben und prüfungen," *trials and proofs*, and the French, "épreuves Maçonniques," or *Masonic proofs*, are defined by Bazot (*Manuel*, p. 141) to be "mysterious methods of discovering the character and disposition of a recipiendary." They are, in fact, those ritualistic ceremonies of initiation which are intended to test the fortitude and fidelity of the candidate. They seem to be confined to continental Masonry, for they are not known to any extent in the English or American systems, where all the ceremonies are purely symbolic. Krause (*Kunsturkund.* i., 152, n. 37) admits that no trace of them, at least in the perilous and fearful forms which they assume in the continental rituals, are to be found in the oldest English catechisms; and he admits that, as appealing to the sentiments of fear and hope, and adopting a dramatic form, they are contrary to the spirit of Masonry, and greatly interfere with its symbolism and with the pure and peaceful sentiments which it is intended to impress upon the mind of the neophyte.

Property of a Lodge. As a Lodge owes its existence, and all the rights and prerogatives that it exercises, to the Grand Lodge from which it derives its Charter or Warrant of Constitution, it has been decided, as a principle of Masonic law, that when such Lodge ceases to exist, either by a withdrawal or a surrender of its Warrant, all the property which it possessed at the time of its dissolution reverts to the Grand Lodge. But should the Lodge be restored by a revival of its Warrant, its property should be restored, because the Grand Lodge held it only as the general trustee or guardian of the Craft.

Prophet. Haggai, who in the American system of the Royal Arch is called the scribe, in the English system receives the title of *prophet*, and hence in the order of precedence he is placed above the high priest.

Prophets, Schools of the. See *Schools of the Prophets.*

Proponenda. The matters contained in the "notices of motions," which are required by the Grand Lodge of England to be submitted to the members previous to the Quarterly Communication when they are to be discussed, are sometimes called the *proponenda*, or subjects to be proposed.

Proposing Candidates. The only method recognized in America of proposing candidates for initiation or membership is by the written petition of the applicant, who must at the same time be recommended by two members of the Lodge. In England, the applicant for initiation must previously sign the declaration, which in America is only made after his election. He is then proposed by one brother, and, the proposition being seconded by another, he is balloted for at the next regular Lodge. Applicants for membership are also proposed without petition, but the certificate of the former Lodge must be produced, as in the United States the demit is required. Nor can any candidate for affiliation be balloted for unless previous notice of the application be given to all the members of the Lodge.

Propylæum (also *Propylon*). The court or vestibule in front of an edifice.

Proscription. The German Masons employ this word in the same sense in which we do *expulsion*, as the highest Masonic punishment that can be inflicted. They also use the word *verbannung*, banishment, for the same purpose.

Proselyte of Jerusalem. (*Prosélyte de Jerusalem*). The Sixty-eighth Degree of the Metropolitan Chapter of France.

Proselytism. Brahmanism is, perhaps, the only religion which is opposed to proselytism. The Brahman seeks no convert to his faith, but is content with that extension of his worship which is derived from the natural increase only of its members. The Jewish Church, perhaps one of the most exclusive, and which has always seemed indifferent to progress, yet provided a special form of baptism for the initiation of its proselytes into the Mosaic rites.

Buddhism, the great religion of the Eastern world, which, notwithstanding the opposition of the leading Brahmans, spread with amazing rapidity over the Oriental nations, so that now it seems the most popular religion of the world, owes its extraordinary growth to the energetic propagandism of Sakya-muni, its founder, and to the same proselyting spirit which he inculcated upon his disciples.

The Christian church, mindful of the precept of its Divine founder, "Go ye into all the world, and preach the Gospel to every creature," has always considered the work of missions as one of the most important duties of the Church, and owes its rapid increase, in its earlier years, to the proselyting spirit of Paul, and Thomas, and the other apostles.

Mohammedanism, springing up and lingering for a long time in a single family, at length acquired rapid growth among the Oriental nations, through the energetic proselytism of the Prophet and his adherents. But the proselytism of the religion of the New Testament and that of the Koran differed much in character. The Christian made his converts by persuasive accents and eloquent appeals; the Mussulman converted his penitents by the sharp power of the sword. Christianity was a religion of peace, Mohammedanism of war; yet each, though pursuing a different method, was equally energetic in securing converts.

In respect to this doctrine of proselytism, Freemasonry resembles more the exclusive faith of Brahma than the inviting one of Moses, of Buddha, of Christ, or of Mohammed.

In plain words, Freemasonry is rigorously opposed to all proselytism. While its members do not hesitate, at all proper times and on all fitting occasions, to defend the Institution from all attacks of its enemies, it never seeks, by voluntary laudation of its virtues, to make new accessions of friends, or to add to the number of its disciples.

Nay, it boasts, as a peculiar beauty of its system, that it is a voluntary Institution. Not only does it forbid its members to use any efforts to obtain initiates, but actually requires every candidate for admission into its sacred rites to seriously declare, as a preparatory step, that in this voluntary offer of himself he has been unbiased by the improper solicitations of friends. Without this declaration, the candidate would be unsuccessful in his application. Although it is required that he shoud be prompted to solicit the privilege by the favorable opinion which he had conceived of the Institution, yet no provision is made by which that opinion can be inculcated in the minds of the profane; for were a Mason, by any praises of the Order, or any exhibitions of its advantages, to induce anyone under such representations to seek admission, he would not only himself commit a grievous fault, but would subject the candidate to serious embarrassment at the very entrance of the Lodge.

This Brahmanical spirit of anti-proselytism, in which Masonry differs from every other association, has imprinted upon the Institution certain peculiar features. In the first place, Freemasonry thus becomes, in the most positive form, a voluntary association. Whoever comes within its mystic circle, comes there of his "own free will and accord, and unbiased by the influence of friends." These are the terms on which he is received, and to all the legitimate consequences of this voluntary connection he must submit. Hence comes the axiom, "Once a Mason, always a Mason"; that is to say, no man, having once been initiated into its sacred rites, can, at his own pleasure or caprice, divest himself of the obligations and duties which, as a Mason, he has assumed. Coming to us freely and willingly, he can urge no claim for retirement on the plea that he was unduly persuaded, or that the character of the Institution had been falsely represented. To do so, would be to convict himself of fraud and falsehood, in the declarations made by him preliminary to his admission. And if these declarations were indeed false, he at least cannot, under the legal maxim, take advantage of his own wrong. The knot which binds him to the Fraternity has been tied by himself, and is indissoluble. The renouncing Mason may, indeed, withdraw from his connection with a Lodge, but he cannot release himself from his obligations to the regulation, which requires every Mason to be a member of one. He may abstain from all communication with his brethren, and cease to take any interest in the concerns of the Fraternity; but he is not thus absolved from the performance of any of the duties imposed upon him by his original admission into the brotherhood. A proselyte, persuaded against his will, might claim his right to withdraw; but the voluntary seeker must take and hold what he finds.

Another result of this anti-proselyting spirit of the Institution is, to relieve its members from all undue anxiety to increase its membership. It is not to be supposed that Masons have not the very natural desire to see the growth of their Order. Toward this end, they are ever ready to defend its character when attacked, to extol its virtues, and to maintain its claims to the confidence and approval of the wise and good. But the growth they wish is not that abnormal one, derived from sudden revivals or ephemeral enthusiasm, where passion too often takes the place of judgment; but that slow and steady, and therefore healthy, growth which comes from the adhesion of wise and virtuous and thoughtful men, who are willing to join the brotherhood, that they may the better labor for the good of their fellow-men.

Thus it is that we find the addresses of our Grand Masters, the reports of our committees on foreign correspondence, and the speeches of our anniversary orators, annually denouncing the too rapid increase of the Order, as something calculated to affect its stability and usefulness.

And hence, too, the black ball, that antagonist of proselytism, has been long and familiarly called the bulwark of Masonry. Its faithful use is ever being inculcated by the fathers of the Order upon its younger members; and the unanimous ballot is universally admitted to be the most effectual means of preserving the purity of the Institution.

And so, this spirit of anti-proselytism, impressed upon every Mason from his earliest initiation, although not itself a landmark, has come to be invested with all the sacredness of such a law, and Freemasonry stands out alone, distinct from every other human association, and proudly proclaims, "Our portals are open to all the good and true, but we ask no man to enter."

Protector of English Freemasons. A title assumed by King Edward VII. on his accession to the throne of England in 1901.

Protector of Innocence. (*Protecteur de l'Innocence.*) A degree in the nomenclature of Fustier, cited by him from the collection of Viany.

Protocol. In French, the formulæ or technical words of legal instruments; in Germany, the rough draft of an instrument or transaction; in diplomacy, the original copy of a treaty. Gädicke says that, in Masonic language, the protocol is the rough minutes of a Lodge. The word is used in this sense in Germany only.

Prototype. The same as *Archetype*, which see.

Provincial Grand Lodge. In each of the counties of England is a Grand Lodge composed of the various Lodges within that district, with the Provincial Grand Master at their head, and this body is called a Provincial Grand Lodge. It derives its existence, not from a Warrant, but from the Patent granted to the Provincial Grand Master by the Grand Master, and at his death, resignation, or removal, it becomes extinct, unless the Provincial Grand Registrar keeps up its existence by presiding over the province until the appointment of another Provincial Grand Master. Its authority is confined to the framing of by-laws, making regulations, hearing disputes, etc., but no absolute sentence can be promulgated by its authority without a reference to the Grand Lodge. Hence Oliver (*Jurisprud.*, 272) says that a Provincial Grand Lodge "has a shadow of power, but very little substance. It may talk, but it cannot act." The system does not exist in the United States. In England and Ireland the Provincial Grand Master is appointed by the Grand Master, but in Scotland his commission emanates from the Grand Lodge.

Provincial Grand Master. The presiding officer of a Provincial Grand Lodge. He is appointed by the Grand Master, during whose pleasure he holds his office. An appeal lies from his decisions to the Grand Lodge.

Provincial Grand Officers. The officers of a Provincial Grand Lodge correspond in title to those of the Grand Lodge. The Provincial Grand Treasurer is elected, but the other officers are nominated by the Provincial Grand Master. They are not by such appointment members of the Grand Lodge, nor do they take any rank out of their province. They must all be residents of the province and subscribing members to some Lodge therein. Provincial Grand Wardens must be Masters or Past Masters of a Lodge, and Provincial Grand Deacons, Wardens, or Past Wardens.

Provincial Master of the Red Cross. The Sixth Degree of the Rite of Clerks of Strict Observance.

Provost and Judge. (*Prévôt et Juge.*) The Seventh Degree of the Ancient and Accepted Scottish Rite. The history of the degree relates that it was founded by Solomon, King of Israel, for the purpose of strengthening his means of preserving order among the vast number of craftsmen engaged in the construction of the Temple. Tito, Prince Harodim, Adoniram, and Abda his father, were first created Provosts and Judges, who were afterward directed by Solomon to initiate his favorite and intimate secretary, Joabert, and to give him the keys of all the building. In the old rituals, the Master of a Lodge of Provosts and Judges represents Tito, Prince Harodim, the first Grand Warden and Inspector of the three hundred architects. The number of lights is six, and the symbolic color is red. In the more recent ritual of the Southern Jurisdiction of the United States there has been a slight change. The legend is substantially preserved, but the presiding officer represents Azarias, the son of Nathan.

The jewel is a golden key, having the letter A within a triangle engraved on the ward. The collar is red. The apron is white, lined with red, and is furnished with a pocket.

This was one of Ramsay's degrees, and was originally called *Maître Irlandais*, or Irish Master.

Proxy Installation. The Regulations of 1721 provide that, if the new Grand Master be absent from the Grand Feast, he may be proclaimed if proper assurance be given that he will serve, in which case the old Grand Master shall act as his proxy and receive the usual homage. This has led to a custom, once very common in America, but now getting into disuse, of installing an absent officer by proxy. Such installations are called proxy installations. Their propriety is very questionable.

Proxy Master. In the Grand Lodge of Scotland, a Lodge is permitted to elect any Master Mason who holds a diploma of the Grand Lodge, although he may not be a member of the Lodge, as its Proxy Master. He nominates two Proxy Wardens, and the three then become members of the Grand Lodge and representatives of the Lodge. Great opposition has recently been made to this system, because by it a Lodge is often represented by brethren who are in no way connected with it, who never were present at any of its meetings, and who are personally unknown to any of its members. A similar system prevailed in the Grand Lodge of South Carolina, but was, after a hard struggle, abolished in 1860, at the adoption of a new Constitution.

Prudence. This is one of the four cardinal virtues, the practise of which is inculcated upon the Entered Apprentice. Preston first introduced it into the degree as referring to what was then, and long before had been called the four principal signs, but which are now known as the perfect points of entrance. Preston's eulogium on prudence differs from that used in the lectures of this country, which was composed by Webb. It is in these words: "Prudence is the true guide to human understanding, and consists in judging and determining with propriety what is to be said or done upon all our occasions, what dangers we should endeavor to avoid, and how to act in all our difficulties." Webb's definition, which is much better, may be found in all the Monitors. The Masonic reference of prudence to the manual point reminds us of the classic method of representing her statutes with a rule or measure in her hand.

Prussia. Frederick William I. of Prussia was so great an enemy of the Masonic Institution, that until his death it was scarcely known in his dominions, and the initiation, in 1738, of his son, the Crown Prince, was necessarily kept a secret from his father. But in 1740 Frederick II. ascended the throne, and Masonry soon felt the advantages of a royal patron. The Baron de Bielefeld says (*Lettres*, i., 157) that in that year the king himself opened a Lodge at Charlottenburg, and initiated his brother, Prince William, the Margrave of Brandenburg, and the Duke of Holstein-Beck. Bielefeld and the Counselor Jordan, in 1740, established the Lodge of the Three Globes at Berlin, which soon afterward assumed the rank of a Grand Lodge. There are now in Prussia three Grand Lodges, the seats of all of them being at Berlin. These are the Grand Lodge of the Three Globes, established in 1740, the Grand Lodge Royal York of Friendship, established in 1760, and the National Grand Lodge of Germany, established in 1770. There is no country in the world where Freemasonry is more profoundly studied as a science than in Prussia, and much of the abstruse learning of the Order, for which Germany has been distinguished, is to be found among the members of the Prussian Lodges. Unfortunately, they have, for a long time, been marked with an intolerant spirit toward the Jews, whose initiation was strictly forbidden until very recently, when that stain was removed, and the tolerant principles of the Order were recognized by the abrogation of the offensive laws.

Prussian Knight. See *Noachite*.

Psaterians. A sect of Arians who maintained, at the Council of Antioch, A.D. 360, that the Son was dissimilar to the Father in will; that He was made from nothing; and that in God, creation and generation were synonymous terms.

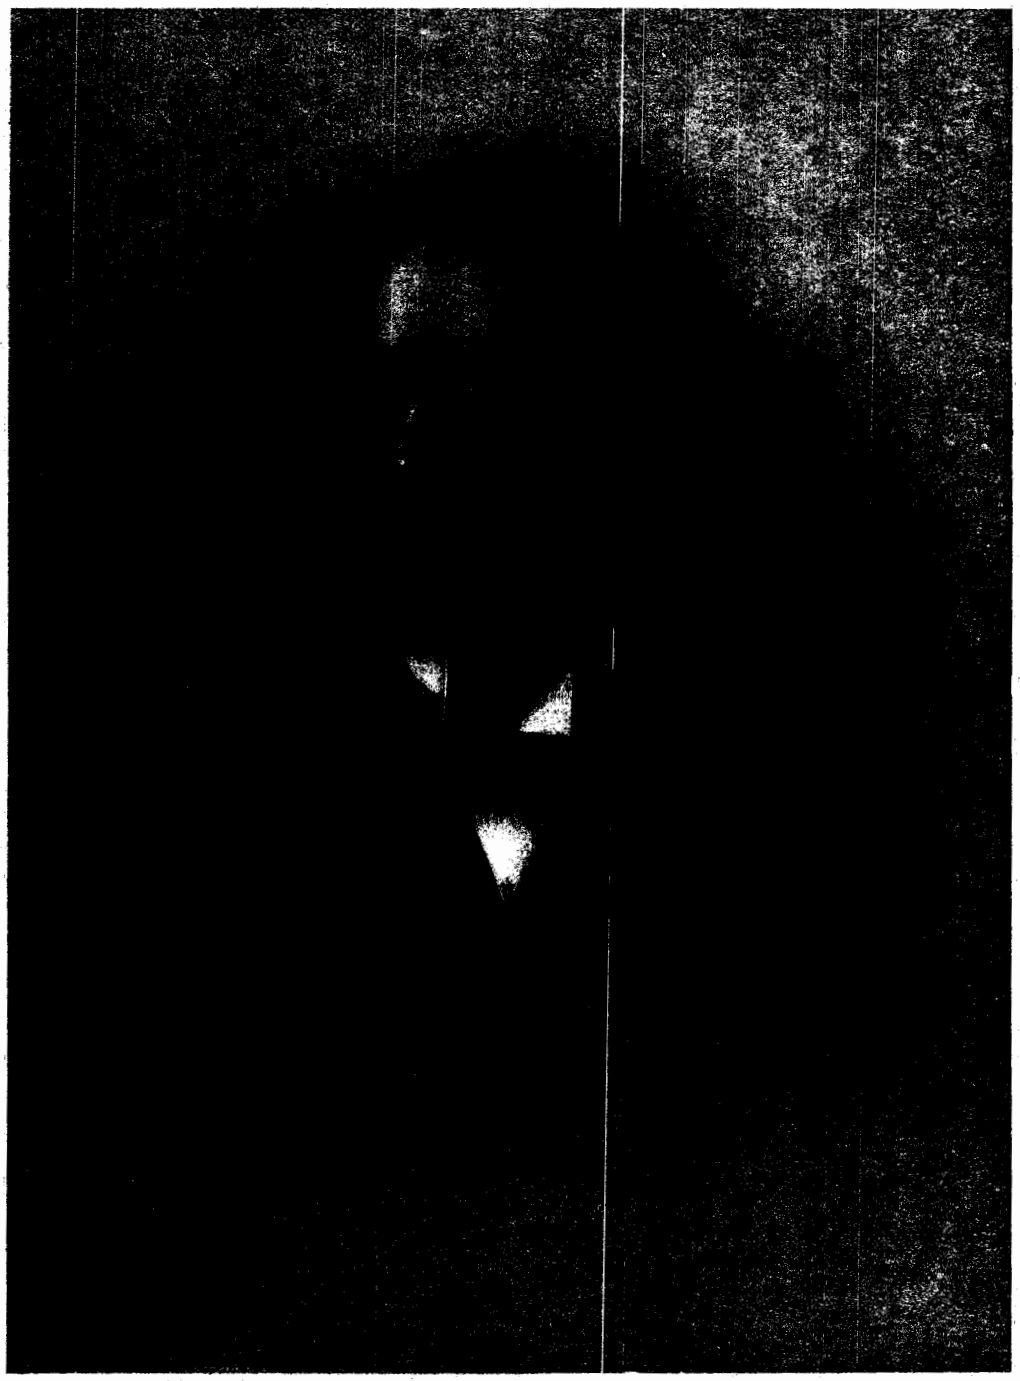
Pseudonym. A false or fictitious name. Continental writers on Freemasonry in the last century often assumed fictitious names, sometimes from affectation, and sometimes because the subjects they treated were unpopular with the government or the church. Thus, Carl Rössler wrote under the pseudonym of Acerrellas, Arthuseus under that of Irenæus Agnostus, Guillemain de St. Victor under that of De Gaminville or Querard, Louis Travenol under that of Leonard Gabanon, etc.

The Illuminati also introduced the custom of giving pseudonyms to the kingdoms and cities of Europe; thus, with them, Austria was Achaia; Munich, Athens; Vienna, Rome; Ingolstadt, Eleusis, etc. But this practise was not confined to the Illuminati, for we find many books published at Paris, Berlin, etc., with the fictitious imprint of Jerusalem, Cosmopolis, Latomopolis, Philadelphia, Edessa, etc. This practise has long since been abandoned.

Publications, Masonic. The fact that, within the past few years, Freemasonry has taken its place—and an imposing one, too—in the literature of the times; that men of genius and learning have devoted themselves to its investigation; that its principles and its system have become matters of study and research; and that the results of this labor of inquiry have been given, and still continue to be given, to the world at large, in the form of treatises on Masonic science, have at length introduced the new question among the Fraternity, whether Masonic books are of good or of evil tendency to the Institution. Many well-meaning but timid members of the Fraternity object to the freedom with which Masonic topics are discussed in printed works. They think that the veil is too much withdrawn by modern Masonic writers, and that all doctrine and instruction should be confined to oral teaching, within the limits of the Lodge room. Hence, to them, the art of printing becomes useless for the diffusion of Masonic knowledge; and thus, whatever may be the attainments of a Masonic scholar, the fruits of his study and experience would be confined to the narrow limits of his personal presence. Such objectors draw no distinction between the ritual and the philosophy of Masonry. Like the old priests of Egypt, they would have everything concealed under hieroglyphics, and would as soon think of opening a Lodge in public as they would of discussing, in a printed book, the principles and design of the Institution.

The Grand Lodge of England, some years ago, adopted a regulation which declared it penal to print or publish any part of the proceedings of a Lodge, or the names of the persons present at such a Lodge, without the permission of the Grand Master. The rule, however, evidently referred to local proceedings only, and had no relation whatever to the publication of Masonic authors and editors; for the English Masonic press, since the days of Hutchinson, in the Middle of the last century, has been distinguished for the freedom, as well as learning, with which the most abstruse principles of our Order have been discussed.

Fourteen years ago the Committee of Foreign Correspondence of a prominent Grand Lodge affirmed that Masonic literature was doing more "harm than good to the Institution." About the same time the committee of another equally prominent Grand Lodge were not ashamed to express their regret that so much prominence of notice is, "in several Grand Lodge proceedings, given to Masonic publications. Masonry existed and flourished, was harmonious and happy, in their absence."



When one reads such diatribes against Masonic literature and Masonic progress—such blind efforts to hide under the bushel the light that should be on the hill-top—he is incontinently reminded of a similar iconoclast, who, more than four centuries ago, made a like onslaught on the pernicious effects of learning.

The immortal Jack Cade, in condemning Lord Say to death as a patron of learning, gave vent to words of which the language of these enemies of Masonic literature seems to be but the echo:

"Thou hast most traitorously corrupted the youth of the realm, in erecting a grammar-school; and whereas, before, our forefathers had no other books but the score and the tally, thou hast caused printing to be used; and contrary to the king, his crown, and dignity, thou hast built a paper-mill. It will be proved to thy face that thou hast men about thee that usually talk of a noun and a verb, and such abominable words as no Christian ear can endure to hear."

I belong to no such school. On the contrary, I believe that too much cannot be written and printed and read about the philosophy and history, the science and symbolism of Freemasonry; provided always the writing is confided to those who rightly understand their art. In Masonry, as in astronomy, in geology, or in any other of the arts and sciences, a new book by an expert must always be esteemed a valuable contribution. The production of silly and untutored minds will fall of themselves into oblivion without the aid of official persecution; but that which is really valuable—which presents new facts, or furnishes suggestive thoughts—will, in spite of the denunciations of the Jack Cades of Masonry, live to instruct the brethren, and to elevate the tone and standing of the Institution.

Dr. Oliver, who has written more on Masonry than any other author, says on this subject: "I conceive it to be an error in judgment to discountenance the publication

Edward L. Hawkins

of philosophical disquisitions on the subject of Freemasonry, because such a proceeding would not only induce the world to think that our pretensions are incapable of enduring the test of inquiry, but would also have a tendency to restore the dark ages of superstition, when even the sacred writings were prohibited, under an apprehension that their contents might be misunderstood or perverted to the propagation of unsound doctrines and pernicious practices; and thus would ignorance be transmitted, as a legacy, from one generation to another."

Still further pursuing this theme, and passing from the unfavorable influence which must be exerted upon the world by our silence, to the injury that must accrue to the Craft, the same learned writer goes on to say, that "no hypotheses can be more untenable than that which forebodes evil to the Masonic Institution from the publication of Masonic treatises illustrative of its philosophical and moral tendency." And in view of the meager and unsatisfactory nature of the lectures, in the form in which they are delivered in the Lodges, he wisely suggests that "if strictures on the science and philosophy of the Order were placed within every brother's reach, a system of examination and research would soon be substituted for the dull and uninteresting routine which, in so many instances, characterizes our private meetings. The brethren would become excited by the inquiry, and a rich series of new beauties and excellences would be their reward."

Of such a result I have no doubt. In consequence of the increase of Masonic publications in this country within a few years, Masonry has already been elevated to a high position. If there be any who still deem it a merely social institution, without a philosophy or literature; if there be any who speak of it with less admiration than it justly deserves, we may be assured that such men have read as little as they have thought on the subject of its science and its history. A few moments of conversation with a Mason will show whether he is one of those contracted craftsmen who suppose that Masonic "*brightness*" consists merely in a knowledge of the correct mode of working one's way into a Lodge, or whether he is one who has read and properly appreciated the various treatises on the "royal art," in which men of genius and learning have developed the true spirit and design of the Order.

Such is the effect of Masonic publications upon the Fraternity; and the result of all my experience is, that *enough has not been published*. Cheap books on all Masonic subjects, easily accessible to the masses of the Order, are necessaries essential to the elevation and extension of the Institution. Too many of them confine their acquirements to a knowledge of the signs and the ceremonies of initiation. There they cease their researches. They make no study of the philosophy and the antiquities of the Order. They do not seem to know that the modes of recognition are simply intended as means of security against imposition, and that the ceremonial rites are worth nothing without the symbolism of which they are only the external exponents. Masonry for them is nerveless—senseless—lifeless; it is an empty voice without meaning—a tree of splendid foliage, but without a single fruit.

The monitorial instructions of the Order, as they are technically called, contain many things which probably, at one time, it would have been deemed improper to print; and there are some Masons, even at this day, who think that Webb and Cross were too free in their publications. And yet we have never heard of any evil effects arising from the reading of our Monitors, even upon those who have not been initiated. On the contrary, meager as are the explanations given in those works, and unsatisfactory as they must be to one seeking for the full light of Masonry, they have been the means, in many instances, of inducing the profane, who have read them, to admire our Institution, and to knock at the "door of Masonry" for admission—while we regret to say that they sometimes comprise the whole instruction that a candidate gets from an ignorant Master. Without these published Monitors, even that little beam of light would be wanting to illuminate his path.

But if the publication and general diffusion of our elementary text-books have been of acknowledged advantage to the character of the Institution, and have, by the information, little as it is, which they communicate, been of essential benefit to the Fraternity, we cannot see why a more extensive system of instruction on the legends, traditions, and symbols of the Order should not be productive of still greater good.

Years ago, we uttered on this subject sentiments which we now take occasion to repeat.

Without an adequate course of reading, no Mason can now take a position of any distinction in the ranks of the Fraternity. Without extending his studies beyond what is taught in the brief lectures of the Lodge, he can never properly appreciate the end and nature of Freemasonry as a speculative science. The lectures constitute but the skeleton of Masonic science. The muscles and nerves and blood-vessels, which are to give vitality, and beauty, and health, and vigor to that lifeless skeleton, must be found in the commentaries on them which the learning and research of Masonic writers have given to the Masonic student.

The objections to treatises and disquisitions on Masonic subjects, that there is danger, through them, of giving too much light to the world without, has not the slightest support from experience. In England, in France, and in Germany, scarcely

any restriction has been observed by Masonic writers, except as to what is emphatically esoteric; and yet we do not believe that the profane world is wiser in those countries than in our own in respect to the secrets of Freemasonry. In the face of these publications, the world without has remained as ignorant of the aporrheta of our art, as if no work had ever been written on the subject; while the world within—the Craft themselves—have been enlightened and instructed, and their views of Masonry (not as a social or charitable society, but as a philosophy, a science, a religion) have been elevated and enlarged.

The truth is, that men who are not Masons never read authentic Masonic works. They have no interest in the topics discussed, and could not understand them, from a want of the preparatory education which the Lodge alone can supply. Therefore, were a writer even to trench a little on what may be considered as being really the *arcana* of Masonry, there is no danger of his thus making an improper revelation to improper persons.

Public Ceremonies. Most of the ceremonies of Masonry are strictly private, and can be conducted only in the presence of the initiated. But some of them, from their nature, are necessarily performed in public. Such are the burials of deceased brethren, the laying of corner-stones of public edifices, and the dedications of Masonic halls. The installation of the officers of a Lodge, or Grand Lodge, are also sometimes conducted in public in America. But the ceremonies in this case differ slightly from those of a private installation in the Lodge room, portions of the ceremony having to be omitted. The reputation of the Order requires that these ceremonies should be conducted with the utmost propriety, and the Manuals and Monitors furnish the fullest details of the order of exercises. Preston, in his *Illustrations*, was the first writer who gave a printed account of the mode of conducting these public ceremonies, and to him we are most probably indebted for their ritual. Anderson, however, gave in the first edition of the *Constitutions* the prescribed form for constituting new Lodges, and installing their officers, which is the model upon which Preston, and other writers, have subsequently framed their more enlarged formulæ.

Puerility of Freemasonry. "The absurdities and puerilities of Freemasonry are fit only for children, and are unworthy of the time or attention of wise men." Such is the language of its adversaries, and the apothegm is delivered with all that self-sufficiency which shows that the speaker is well satisfied with his own wisdom, and is very ready to place himself in the category of those wise men whose opinion he invokes. This charge of a puerility of design and object of Freemasonry is worth examination.

Is it then possible, that those scholars of unquestioned strength of intellect and depth of science, who have devoted themselves to the study of Masonry, and who have in thousands of volumes given the result of their researches, have been altogether mistaken in the direction of their labors, and have been seeking to develop, not the principles of a philosophy, but the mechanism of a toy? Or is the assertion that such is the fact a mere sophism, such as ignorance is every day uttering, and a conclusion to which men are most likely to arrive when they talk of that of which they know nothing, like the critic who reviews a book that he has never read, or the skeptic who attacks a creed that he does not comprehend? Such claims to an inspired infallibility are not uncommon among men of unsound judgment. Thus, when Gall and Spurzheim first gave to the world their wonderful discoveries in reference to the organization and the functions of the brain—discoveries which have since wrought a marked revolution in the sciences of anatomy, physiology, and ethics—the Edinburgh reviewers attempted to demolish these philosophers and their new system, but succeeded only in exposing their own ignorance of the science they were discussing. Time, which is continually evolving truth out of every intellectual conflict, has long since shown that the German philosophers were right and that their Scottish critics were wrong. How common is it, even at this day, to hear men deriding Alchemy as a system of folly and imposture, cultivated only by madmen and knaves, when the researches of those who have investigated the subject without prejudice, but with patient learning, have shown, without any possibility of doubt, that these old alchemists, so long the objects of derision to the ignorant, were religious philosophers, and that their science had really nothing to do with the discovery of an elixir of life or the transmutation of the baser metals into gold, but that they, like the Freemasons, with whom they have a strong affinity, concealed under profound symbols, intelligible only to themselves, the search after Divine Truth and the doctrine of immortal life. Truth was the gold which they eliminated from all mundane things, and the immortality of the soul was the elixir of everlasting life which perpetually renewed youth, and took away the power of death.

So it is with Freemasonry. Those who abuse it know nothing of its inner spirit, of its profound philosophy, of the pure religious life that it inculcates.

To one who is at all acquainted with its organization, Freemasonry presents itself under two different aspects:

First, as a secret society distinguished by a peculiar ritual;

And secondly, as a society having a philosophy on which it is founded, and which it proposes to teach to its disciples.

These by way of distinction may be called

the *ritualistic* and the *philosophical* elements of Freemasonry.

The *ritualistic* element of Freemasonry is that which relates to the due performance of the rites and ceremonies of the Order. Like the rubrics of the church, which indicate when the priest and congregation shall kneel and when they shall stand, it refers to questions such as these: What words shall be used in such a place, and what ceremony shall be observed on such an occasion? It belongs entirely to the inner organization of the Institution, or to the manner in which its services shall be conducted, and is interesting or important only to its own members. The language of its ritual or the form of its ceremonies has nothing more to do with the philosophic designs of Freemasonry than the rubrics of a church have to do with the religious creed professed by that church. It might at any time be changed in its most material points, without in the slightest degree affecting the essential character of the Institution.

Of course, this ritualistic element is in one sense important to the members of the society, because, by a due observance of the ritual, a general uniformity is preserved. But beyond this, the Masonic ritual makes no claim to the consideration of scholars, and never has been made, and, indeed, from the very nature of its secret character, never can be made, a topic of discussion with those who are outside of the Fraternity.

But the other, the *philosophical* element of Freemasonry, is one of much importance. For it, and through it, I do make the plea that the Institution is entitled to the respect, and even veneration, of all good men, and is well worth the careful consideration of scholars.

A great many theories have been advanced by Masonic writers as to the real origin of the Institution, as to the time when and the place where it first had its birth. It has been traced to the mysteries of the ancient Pagan world, to the Temple of King Solomon, to the Roman Colleges of Artificers, to the Crusades for the recovery of the Holy Land, to the Gilds of the Middle Ages, to the Stone-Masons of Strasburg and Cologne and even to the revolutionary struggle in England in the time of the commonwealth, and to the secret efforts of the adherents of the house of Stuart to recover the throne. But whatever theory may be selected, and wheresoever and whensoever it may be supposed to have received its birth, one thing is certain, namely, that for generations past, and yet within the records of history, it has, unlike other mundane things, presented to the world an unchanged organization. Take, for instance, the theory which traces it back to one of the most recent periods, that, namely, which places the organization of the Order of Freemasons at the building of the Cathedral of Strasburg, in the year 1275. During all the time that has since elapsed, full six hundred years, how has Freemasonry presented itself? Why, as a brotherhood organized and controlled by a secret discipline, engaged in important architectural labors, and combining with its operative tasks speculations of great religious import. If we see any change, it is simply this, that when the necessity no longer existed, the operative element was laid aside, and the speculative only was retained, but with a scrupulous preservation (as if it were for purposes of identification) of the technical language, the rules and regulations, the working-tools, and the discipline of the operative art. The material only on which they wrought was changed. The disciples and followers of Erwin of Steinbach, the Master Builder of Strasburg, were engaged, under the influence of a profoundly religious sentiment, in the construction of a material edifice to the glory of God. The more modern workers in Freemasonry are under the same religious influence, engaged in the construction of a spiritual temple. Does not this long continuance of a brotherhood employed in the same pursuit, or changing it only from a material to a spiritual character, but retaining its identity of organization, demand for itself some respect, and, if for nothing else, at least for its antiquity, some share of veneration?

But this is not all. This society or brotherhood, or confraternity as it might more appropriately be called, is distinguished from all other associations by the possession of certain symbols, myths, and, above all else, a *Golden Legend*, all of which are directed to the purification of the heart, to the elevation of the mind, to the development of the great doctrine of immortality.

Now the question where and when these symbols, myths, and legends arose is one that is well worth the investigation of scholars, because it is intimately connected with the history of the human intellect. Did the Stone-Masons and building corporations of the Middle Ages invent them? Certainly not, for they are found in organizations that existed ages previously. The Greeks at Eleusis taught the same dogma of immortal life in the same symbolic mode, and their legend, if it differed from the Masonic in its accidents, was precisely identical in its substance. For Hiram there was Dionysus, for the acacia the myrtle, but there were the same mourning, the same discovery, the same rejoicing, because what had been lost was found, and then the same ineffable light, and the same sacred teaching of the name of God and the soul's immortality. And so an ancient orator, who had passed through one of these old Greek Lodges—for such, without much violence of language, they may well be called—declared that those who have endured the initiation into the mysteries entertain better hopes both of the end of life and of the eternal future. Is not this the very object and design of the legend of the Master's Degree? And this

same peculiar form of symbolic initiation is to be found among the old Egyptians and in the island of Samothracia, thousands of years before the light of Christianity dawned upon the world to give the seal of its Master and Founder to the Divine truth of the resurrection.

This will not, it is true, prove the descent of Freemasonry, as now organized, from the religious mysteries of antiquity; although this is one of the theories of its origin entertained and defended by scholars of no mean pretension. But it will prove an identity of design in the moral and intellectual organization of all these institutions, and it will give the Masonic student subjects for profound study when he asks the interesting questions—Whence came these symbols, myths, and legends? Who invented them? How and why have they been preserved? Looking back into the remotest days of recorded history, we find a priesthood in an island of Greece and another on the banks of the Nile, teaching the existence of a future life by symbols and legends, which convey the lesson in a peculiar mode. And now, after thousands of years have elapsed, we find the same symbolic and legendary method of instruction, for the same purpose, preserved in the depository of what is comparatively a modern institution. And between these two extremes of the long past and the present now, we find the intervening period occupied by similar associations, succeeding each other from time to time, and spreading over different countries, but all engaged in the same symbolic instruction, with substantially the same symbols and the same mythical history.

Does not all this present a problem in moral and intellectual philosophy, and in the archeology of ethics, which is well worthy of an attempted solution? How unutterably puerile seem the objections and the objurgations of a few contracted minds, guided only by prejudice, when we consider the vast questions of deep interest that are connected with Freemasonry as a part of those great brotherhoods that have filled the world for so many ages, so far back, indeed, that some philosophic historians have supposed that they must have derived their knowledge of the doctrines which they taught in their mystic assemblies from direct revelation through an ancient priesthood that gives no other evidence of its former existence but the results which it produced.

Man needs something more than the gratification of his animal wants. The mind requires food as well as the body, and nothing can better give that mental nutriment than the investigation of subjects which relate to the progress of the intellect and the growth of the religious sentiment.

Again, man was not made for himself alone. The old Stoic lived only for and within himself. But modern philosophy and modern religion teach no such selfish doctrine. Man is but part of the great brotherhood of man, and each one must be ready to exclaim with the old poet, "Homo sum; humani nihil à me alienum puto," *I am a man, and I deem nothing relating to mankind to be foreign to my feelings.* Men study ancient history simply that they may learn what their brother men have done in former times, and they read the philosophers and poets of Greece and Rome that they may know what were the speculations of those old thinkers, and they strive to measure the intellect of man as it was then and as it is now, because the study of the growth of intellectual philosophy and the investigation of the mental and moral powers come home to us all as subjects of common interest.

Looking, then, upon Freemasonry as one of those associations which furnish the evidence and the example of the progress of man in intellectual, moral, and religious development, it may be well claimed for it that its design, its history, and its philosophy, so far from being puerile, are well entitled to the respect of the world, and are worth the careful research of scholars.

Puissant. A title given to the presiding officer in several of the high degrees.

Puissant Irish Master. The Eighth Degree of Ramsay's Irish Colleges.

Pullen, William Hyde. An eminent and accomplished craftsman of England, who was renowned among English and American "workmen" for his excellence in the conduct of the forms and varied ceremonies of Masonry.

Pulsanti Operietur. Latin. *To him who knocks it shall be opened.* An inscription sometimes placed over the front door of Masonic temples or Lodge rooms.

Punishments, Masonic. Punishment in Masonry is inflicted that the character of the Institution may remain unsullied, and that the unpunished crimes of its members may not injuriously reflect upon the reputation of the whole society. The nature of the punishment to be inflicted is restricted by the peculiar character of the Institution, which is averse to some forms of penalty, and by the laws of the land, which do not give to private corporations the right to impose certain species of punishment.

The infliction of fines or pecuniary penalties has, in modern times at least, been considered as contrary to the genius of Masonry, because the sanctions of Masonic law are of a higher nature than any that could be furnished by a pecuniary penalty.

Imprisonment and corporal punishment are equally adverse to the spirit of the Institution, and are also prohibited by the laws of the land, which reserve the infliction of such penalties for their own tribunals.

Masonic punishments are therefore restricted to an expression of disapprobation or the deprivation of Masonic rights, and are: 1. Censure; 2. Reprimand; 3. Exclusion; 4. Suspension, Definite or Indefinite; and 5. Expulsion—all of which see under their respective titles.

Punjaub. Freemasonry was founded in Punjaub, India, in 1872, by an ardent Mason, W. Bro. Major Henry Basevi, whose failing

health caused him to forsake his post shortly thereafter, leaving as his successor Major M. Ramsay, who became R. W. D. Grand Master. By last returns received there were 26 Lodges in the District. It is reported authoritatively that in 1879 the Institution maintained, clothed, and educated twenty-one children.

Puranas. ("Knowledge.") The text-books of the worshipers of Vishnu and of Siva, forming, with the Tantras, the basis of the popular creed of the Brahmanical Hindus. There are about 18 Puranas, and as many more minor works, called Upapuranas, all written in Sanskrit, and founded to some extent upon the Mahabharata and Ramâyana. Otherwise their date is very uncertain. The followers of Brahmanism number about 175,000,000.

Purchase. In the Cooke MS. (line 630) it is said that the son of Athelstan "purchased a free patent of the kyng that they [the Masons] shulde make a sembly." This does not mean that he bought the patent, but that he obtained or procured it. Such was the use of purchase in old English. The booty of a thief was called his purchase, because he had acquired it. Colloquially, the word is still used to designate the getting a hold on anything.

Pure Freemasonry. See *Primitive Freemasonry*.

Purification. As the aspirant in the Ancient Mysteries was not permitted to pass through any of the forms of initiation, or to enter the sacred vestibule of the temple, until, by water or fire, he had been symbolically purified from the corruptions of the world which he was about to leave behind, so in Masonry there is in the First Degree a symbolical purification by the presentation to the candidate of the common gavel, an implement whose emblematic use teaches a purification of the heart. (See *Lustration*.)

Purity. In the Ancient Mysteries purity of heart and life was an essential prerequisite to initiation, because by initiation the aspirant was brought to a knowledge of God, to know whom was not permitted to the impure. For, says Origen (*Cont. Cel.*, vi.), "a defiled heart cannot see God, but he must be pure who desires to obtain a proper view of a pure Being." And in the same spirit the Divine Master says: "Blessed are the pure in heart, for they shall see God." But "to see God" is a Hebraism, signifying to possess him, to be spiritually in communion with him, to know his true character. Now to acquire this knowledge of God, symbolized by the knowledge of his Name, is the great object of Masonic, as it was of all ancient initiation; and hence the candidate in Masonry is required to be pure, for "he only can stand in the holy place who hath clean hands and a pure heart." (See *White*.)

Purity, Brothers of. An association of Arabic philosophers, founded at Bosra, in Syria, in the tenth century. Many of their writings, which were much studied by the Jews of Spain in the twelfth century, were mystical. Steinschneider (*Jew. Lit.*, 174, 295) calls them "the Freemasons of Bosra," and says that they were "a celebrated society of a kind of Freemasons."

Purple. Purple is the appropriate color of those degrees which, in the American Rite, have been interpolated between the Royal Arch and Ancient Craft Masonry, namely, the Mark, Past, and Most Excellent Masters. It is in Masonry a symbol of fraternal union, because, being compounded of blue, the color of the Ancient Craft, and red, which is that of the Royal Arch, it is intended to signify the close connection and harmony which should ever exist between those two portions of the Masonic system. It may be observed that this allusion to the union and harmony between blue and red Masonry is singularly carried out in the Hebrew word which signifies purple. This word, which is ארגמן, *argaman*, is derived from רגם, *ragam* or *regem*, one of whose significations is "a friend." But Portal (*Coul. Symb.*, 230) says that purple, in the profane language of colors, signifies constancy in spiritual combats, because blue denotes fidelity, and red, war.

In the religious services of the Jews we find purple employed on various occasions. It was one of the colors of the curtains of the tabernacle, where, Josephus says, it was symbolic of the element of water, of the veils, and of the curtain over the great entrance; it was also used in the construction of the ephod and girdle of the high priest, and the cloths for Divine service.

Among the Gentile nations of antiquity purple was considered rather as a color of dignity than of veneration, and was deemed an emblem of exalted office. Hence Homer mentions it as peculiarly appropriated to royalty, and Virgil speaks of *purpura regum*, or "the purple of kings." Pliny says it was the color of the vestments worn by the early kings of Rome; and it has ever since, even to the present time, been considered as the becoming insignia of regal or supreme authority.

In American Masonry, the purple color seems to be confined to the intermediate degrees between the Master and the Royal Arch, except that it is sometimes employed in the vestments of officers representing either kings or men of eminent authority—such, for instance, as the Scribe in a Chapter of Royal Arch Masons.

In the Grand Lodge of England, Grand Officers and Provincial Grand Officers wear purple collars and aprons. As the symbolic color of the Past Master's Degree, to which all Grand Officers should have attained, it is also considered in this country as the appropriate color for the collars of officers of a Grand Lodge.

Purple Brethren. In English Masonry, the Grand Officers of the Grand Lodge and the Past Grand and Deputy Grand Masters and Past and Present Provincial Grand Masters are called "purple brethren," because of the color of their decorations, and at meetings of the Grand Lodge are privileged to sit on the dais.

Purple Lodges. Grand and Provincial Grand Lodges are thus designated by Dr. Oliver in his *Institutes of Masonic Jurisprudence*. The term is not used in this country.

Purrah, The. A society of Sussu negroes exercising similar powers to, and for a somewhat similar purpose as, the Vehmgericht.

Pursuivant. The third and lowest order of heraldic officers. In Masonry the lowest officer in rank except the Tiler, if he may be termed an officer.

Pyron, Jean Baptiste Pierre Julien. A distinguished French Mason of the latter part of the last and beginning of the present century, who died at Paris in September, 1821. He was the author of many Masonic discourses, but his most important work was a profound and exhaustive *History of the Organization of the Ancient and Accepted Rite in France*, published in 1814. He was one of the founders of the Grand Orient, and having received the Thirty-third Degree from the Count de Grasse Tilly, he afterward assisted in the organization of the Supreme Council of Italy, at Milan, and the Supreme Council of France. In 1805, his name was struck from the register of the Grand Orient in consequence of his opposition to that body, but he remained the Secretary-General of the Supreme Council until his death. Ragon calls him an intriguer and bold innovator, but Thory speaks more highly of his Masonic character. He was undoubtedly a man of talent, learning, and Masonic research. He made a manuscript collection of many curious degrees, which Thory has liberally used in his *Nomenclature of Rites and Degrees*.

Pythagoras. One of the most celebrated of the Grecian philosophers, and the founder of what has been called the Italic school, was born at Samos about 586 B.C. Educated as an athlete, he subsequently abandoned that profession and devoted himself to the study of philosophy. He traveled through Egypt, Chaldea, and Asia Minor, and is said to have submitted to the initiations in those countries for the purpose of acquiring knowledge. On his return to Europe, he established his celebrated school at Crotona, much resembling that subsequently adopted by the Freemasons. His school soon acquired such a reputation that disciples flocked to him from all parts of Greece and Italy. Pythagoras taught as the principal dogma of his philosophy the system of metempsychosis, or the transmigration of souls. He taught the mystical power of numbers, and much of the symbolism on that subject which we now possess is derived from what has been left to us by his disciples, for of his own writings there is nothing extant. He was also a geometrician, and is regarded as having been the inventor of several problems, the most important of which is that now known as the forty-seventh problem of Euclid. He was also a proficient in music, and is said to have demonstrated the mathematical relations of musical intervals, and to have invented a number of musical instruments. Disdaining the vanity and dogmatism of the ancient sages, he contented himself with proclaiming that he was simply a seeker after knowledge, not its possessor, and to him is attributed the introduction of the word *philosopher*, or *lover of wisdom*, as the only title which he would assume. After the lawless destruction of his school at Crotona, he fled to the Locrians, who refused to receive him, when he repaired to Metapontum, and sought an asylum from his enemies in the temple of the Muses, where tradition says that he died of starvation 506 B.C., when eighty years old.

Pythagoras, School of. The schools established by Pythagoras at Crotona and other cities, have been considered by many writers as the models after which Masonic Lodges were subsequently constructed. They undoubtedly served the Christian ascetics of the first century as a pattern for their monastic institutions, with which institutions the Freemasonry of the Middle Ages, in its operative character, was intimately connected. A brief description of the school of Crotona will not therefore be inappropriate. The disciples of this school wore the simplest kind of clothing, and having on their entrance surrendered all their possessions to the common fund, they submitted for three years to voluntary poverty, during which time they were also compelled to a rigorous silence. The doctrines of Pythagoras were always delivered as infallible propositions which admitted of no argument, and hence the expression *αὐτὸς ἔφη, he said it*, was considered as a sufficient answer to anyone who demanded a reason. The scholars were divided into *Exoterics* and *Esoterics*. This distinction was borrowed by Pythagoras from the Egyptian priests, who practised a similar mode of instruction. The exoteric scholars were those who attended the public assemblies, where general ethical instructions were delivered by the sage. But only the esoterics constituted the true school, and these alone Pythagoras called, says Jamblichus, his companions and friends. Before admission to the privileges of this school, the previous life and character of the candidate were rigidly scrutinized, and in the preparatory initiation secrecy was enjoined by an oath, and he was made to submit to the severest trials of his fortitude and self-command. He who after his admission was alarmed at the obstacles he had to encounter, was permitted to return to the world, and the disciples, considering him as dead, performed his funeral obsequies, and erected a monument to his memory.

The mode of living in the school of Crotona was like that of the modern communists. The brethren, about six hundred in number, with their wives and children, resided in one large building. Every morning the business and duties of the day were arranged, and at night an account was rendered of the day's transactions. They arose before day to pay their devotions to the sun, and recited verses from Homer, Hesiod, or some other poet. Several hours were spent in study, after which

there was an interval before dinner, which was occupied in walking and in gymnastic exercises. The meals consisted principally of bread, honey, and water, for though the table was often covered with delicacies, no one was permitted to partake of them. It was in this secret school that Pythagoras gave his instructions on his interior doctrine, and explained the hidden meaning of his symbols. There were three degrees: the first, or Mathematici, being engaged in the study of the exact sciences; and the second, or Theoretici, in the knowledge of God and the future state of man; but the third, or highest degree, was communicated only to a few whose intellects were capable of grasping the full fruition of the Pythagorean philosophy. This school, after existing for thirty years, was finally dissolved through the machinations of Kylo, a wealthy inhabitant of Crotona, who, having been refused admission, in revenge excited the citizens against it, when a lawless mob attacked the scholars while assembled in the house of Milo, set fire to the building and dispersed the disciples, forty of them being burned to death. The school was never resumed, but after the death of the philosopher summaries of his doctrines were made by some of his disciples. Still many of his symbols and his esoteric teachings have to this day remained uninterpreted and unexplained.

After this account of the Pythagorean school, the Mason will find no difficulty in understanding that part of the so-called Leland Manuscript which is said to have so much puzzled the great metaphysician John Locke.

This manuscript—the question of its authenticity is not here entered upon—has the following paragraphs:

"How comede ytt [Freemasonry] yn Engelonde?

"Peter Gower, a Grecian, journeyeded for kunnynge yn Egypte and in Syria, and yn everyche londe whereat the Venetians hadde plauntedde Maconrye, and wynnynge entraunce yn al Lodges of Maconnes, he lerned muche, and retournedde and worked yn Grecia Magna wachsynge and becommynge a myghtye wysacre and gratelyche renowned, and here he framed a grate Lodge at Groton, and maked many Maconnes, some whereoffe dyd journeye yn Fraunce, and maked manye Maconnes wherefromme, yn process of tyme, the arte passed yn Engelonde."

Locke confesses that he was at first puzzled with those strange names, *Peter Gower*, *Groton*, and the *Venetians;* but a little thinking taught him that they were only corruptions of *Pythagoras*, *Crotona*, and the *Phœnicians*.

It is not singular that the old Masons should have called Pythagoras their "ancient friend and brother," and should have dedicated to him one of their geometrical symbols, the forty-seventh problem of Euclid; an epithet and a custom that have, by the force of habit, been retained in all the modern rituals.

Q

Q. (Heb. ק, Q or K, *Koph.*) The seventeenth letter in the English and modern Latin alphabets. In the Phœnician or Ancient Hebrew its form was one circle within another. Its numerical value is 100. The Canaanite signification is ear.

Quadrivium. In classical Latin the word *quadrivium* meant a place where four roads met, and *trivium*, a place where three roads met. The scholastics of the Middle Ages, looking to the metaphorical meaning of the phrase *the paths of learning*, divided what were called the seven liberal arts and sciences, but which comprised the whole cycle of instruction in those days, into two classes, calling grammar, rhetoric, and logic the *trivium*, and arithmetic, geometry, music, and astronomy the *quadrivium*. These two roads to the temple of wisdom, including seven distinct sciences, were, in the Middle Ages, supposed to include universal knowledge. (See *Liberal Arts and Sciences*.)

Quadrivium and Trivium. The seven liberal arts and sciences. The Quadrivium, in the language of the schools, were the four lesser arts, arithmetic, music, geometry, and astronomy; while the Trivium were the triple way to eloquence by the study of grammar, logic, and rhetoric.

Quakers. The question of the admissibility of a Quaker's affirmation in Masonry is discussed under the word *Affirmation*, which see.

Qualifications of Candidates. Every candidate for initiation into the mysteries of Freemasonry must be qualified by certain essential conditions. These qualifications are of two kinds, *Internal* and *External*. The internal qualifications are those which lie within his own bosom, the external are those which refer to his outward and apparent fitness. The external qualifications are again divided into *Moral*, *Religious*, *Physical*, *Mental*, and *Political*.

I. The Internal Qualifications are:

1. That the applicant must come of his own free will and accord. His application must be purely voluntary, to which he has not been induced by persuasion of friends.

2. That he must not be influenced by mercenary motives.

3. That he must be prompted to make the

application in consequence of a favorable opinion that he entertains of the Institution.

4. That he must be resolved to conform with cheerfulness to the established usages and customs of the Fraternity.

II. The EXTERNAL QUALIFICATIONS are, as has already been said, divided into four kinds:

1. The *Moral.* That candidate only is qualified for initiation who faithfully observes the precepts of the moral law, and leads a virtuous life, so conducting himself as to receive the reward of his own conscience as well as the respect and approbation of the world.

2. The *Religious.* Freemasonry is exceedingly tolerant in respect to creeds, but it does require that every candidate for initiation shall believe in the existence of God as a superintending and protecting power, and in a future life. No inquiry will be made into modifications of religious belief, provided it includes these two tenets.

3. The *Physical.* These refer to sex, age, and bodily conformation. The candidate must be a man, not a woman; of mature age, that is, having arrived at his majority, and not so old as to have sunk into dotage; and he must be in possession of all his limbs, not maimed or dismembered, but, to use the language of one of the old Charges, "have his right limbs as a man ought to have."

4. The *Mental.* This division excludes all men who are not intellectually qualified to comprehend the character of the Institution, and to partake of its responsibilities. Hence fools or idiots and madmen are excluded. Although the landmarks do not make illiteracy a disqualification, and although it is undeniable that a large portion of the Craft in olden times was uneducated, yet there seems to be a general opinion that an incapacity to read and write will, in this day, disqualify a candidate.

5. The *Political.* These relate to the condition of the candidate in society. The old rule required that none but those who were free born could be initiated, which, of course, excluded slaves and those born in servitude; and although the Grand Lodge of England substituted *free man* for *free born*, it is undeniable that that action was a violation of a landmark; and the old rule still exists, at least in America.

Quarrels. Contention or quarreling in the Lodge, as well as without, is discountenanced by the spirit of all the Old Constitutions of Masonry. In the Charges compiled from them, approved by the Grand Lodge of England in 1722, and published by Dr. Anderson, it is said, "No private piques or quarrels must be brought within the door of the Lodge, far less any quarrels about religion, or nations, or State policy." (*Constitutions*, 1723, p. 54.)

Quarries. It is an error to speak, as Oliver does, misguided by some Masonic traditions, of the quarries of Tyre in connection with the Temple of Solomon. Modern researches have shown without question that the stones used in the construction of the Temple were taken out of quarries in the immediate vicinity; and the best traditions, as well as Scripture, claim only that the wood from the forests of Lebanon was supplied by King Hiram. The great quarries of Jerusalem are situated in the northeast portion of the city, near the Damascus gate. The entrance to them was first discovered by Barclay. A writer, quoted by Barclay, thus describes them (*City of the Great King*, p. 466): "Here were blocks of stones but half quarried, and still attached by one side to the rock. The work of quarrying was apparently effected by an instrument resembling a pickaxe, with a broad chisel-shaped end, as the spaces between the blocks were not more than four inches wide, in which it would be impossible for a man to work with a chisel and mallet. The spaces were, many of them, four feet deep and ten feet in height, and the distance between them was about four feet. After being cut away at each side and at the bottom, a lever was inserted, and the combined force of three or four men could easily pry the block away from the rock behind. The stone was extremely soft and friable, nearly white, and very easily worked, but, like the stone of Malta and Paris, hardening by exposure. The marks of the cutting instrument were as plain and well-defined as if the workman had just ceased from his labor. The heaps of chippings which were found in these quarries showed that the stone had been dressed there, and confirm the Bible statement that the stone of which the Temple was built was made ready before it was brought thither." Barclay remarks (*ib.*, p. 118) that "those extra cyclopean stones in the south-east and south-west corners of the Temple wall were doubtless taken from this great quarry, and carried to their present position down the gently inclined plain on rollers—a conjecture which at once solves the mystery that has greatly puzzled travellers in relation to the difficulty of transporting and *handling* such immense masses of rock, and enables us to understand why they were called 'stones of rolling' by Ezra." Mr. Prime also visited these quarries, and in his *Tent Life in the Holy Land* (p. 114) speaks of them thus: "One thing to me is very manifest: there has been solid stone taken from the excavation sufficient to build the walls of Jerusalem and the Temple of Solomon. The size of many of the stones taken from here appears to be very great. I know of no place to which the stone can have been carried but to these works, and I know no other quarries in the neighborhood from which the great stone of the walls would seem to have come. These two connected ideas compelled me strongly toward the belief that this was the ancient quarry whence the city was built; and when the magnitude of the excavation between the two opposing hills and of this cavern is considered, it is, to say the least of it, a difficult question to answer, what has become of the stone once here, on any other theory than that I have suggested." And he adds: "Who can say that the cavern which we explored was not the place where the ham-

mers rang on the stone which were forbidden to sound in the silent growth of the great Temple of Solomon?"

The researches of subsequent travelers, and especially the labors of the "Palestine Exploration Fund," have substantiated these statements, and confirmed the fact that the quarries where the workmen labored at the building of the Solomonic Temple were not in the dominions of the King of Tyre, but in the immediate vicinity of the Temple. In 1868, Rob. Morris held what he calls a "Moot Lodge" in these quarries, which event he describes in his *Freemasonry in the Holy Land*, a work of great interest to Masonic scholars.

Quarterly Communication. The Old Records of the Institution state that the Fraternity met annually in their General Assembly. The Halliwell or Regius Manuscript says it is true that the Assembly may be held triennially, "Eche year or third year it should be hold" (line 475); but wherever spoken of in subsequent records, it is always as an Annual Meeting. It is not until 1717 that we find anything said of quarterly communications; and the first allusion to these subordinate meetings in any printed work to which we now have access is in 1738, in the edition of the *Constitutions* published in that year. The expression there used is that the quarterly communications were "forthwith revived." This of course implies that they had previously existed; but as no mention is made of them in the Regulations of 1663, which, on the contrary, speak expressly only of an "Annual General Assembly," we may infer that quarterly communications must have been first introduced into the Masonic system after the middle of the seventeenth century. They have not the authority of antiquity, and have been very wisely discarded by nearly all the Grand Lodges in this country. They are still retained by the Grand Lodges of England, Scotland, and Ireland, but in the United States only by those of Massachusetts and Pennsylvania.

Quaternion. From the Latin *quater*, the number *Four*, which see. Oliver calls it the *quaternary*, but *quaternion* is the better usage.

Quatuor Coronati. See *Four Crowned Martyrs*.

Quatuor Coronati Lodge. This Lodge, No. 2076 on the roll of the Grand Lodge of England, was established in 1886, for the purpose of studying the History, Symbols, and Legends of Freemasonry, and it is in fact a Masonic Literary and Archeological Society, meeting as a tiled Lodge. Attached to the Lodge proper, which is limited to 40 full members, is a Correspondence Circle established in 1887, and now numbering over 3,000 members drawn from all parts of the world. The transactions of the Lodge are published under the title of *Ars Quatuor Coronatorum*. The Lodge is named after the "Four Crowned Martyrs" (*q. v.*). All Master Masons in good standing are eligible to membership in the Correspondence Circle. The dues are $2.50 a year, for which the valuable Transactions of the Lodge are sent to each member. [E. L. H.]

Quebec. From 1855 to 1869 the Grand Lodge of Canada was the controlling Masonic power in the Province of Quebec, but with the birth of the Dominion came also the agitation for separate Grand Lodges. Several meetings were held, and finally, on the 20th of October, 1869, the Grand Lodge of Quebec was formed by twenty-eight of the Warranted Lodges then in the Province, with M. W. Bro. John Hamilton Graham, LL.D., as Grand Master. [W. H. W.]

Questions of Henry VI. Questions said to have been proposed by King Henry VI. of England to the Masons of the kingdom, which, with their answers, are contained in the manuscript known as the *Leland Manuscript*, which see.

Quetzialcoatl. The Mexican idea of the Deity of Enlightenment. The spirit-man from whom they received their civilization, and for whose second coming they wait. Him for whom they mistook Cortez, and therefore welcomed him with joy.

Quorum. The parliamentary law provides that a deliberative body shall not proceed to business until a quorum of its members is present. And this law is applicable to Masonry, except that, in constituting a quorum for opening and working a Lodge, it is not necessary that the quorum shall be made up of actual members of the Lodge; for the proper officers of the Lodge being present, the quorum may be completed by any brethren of the Craft. As to the number of brethren necessary to make a quorum for the transaction of business, the Old Constitutions and Regulations are silent, and the authorities consequently differ. In reply to an inquiry directed to him in 1857, the editor of the London *Freemasons' Magazine* affirmed that *five* Masons are sufficient to open a Lodge and carry on business other than initiation; for which latter purpose *seven* are necessary. This opinion appears to be the general English one, and is acquiesced in by Dr. Oliver; but there is no authority of law for it. And when, in the year 1818, the suggestion was made that some regulation was necessary relative to the number of brethren requisite to constitute a legal Lodge, with competent powers to perform the rite of initiation, and transact all other business, the Board of General Purposes of the Grand Lodge of England, to whom the suggestion had been referred, replied, with something like Dogberrian astuteness, "that it is a matter of so much delicacy and difficulty, that it is thought advisable not to depart from the silence on the subject which had been observed in all the Books of Constitutions."

In the absence, then, of all written laws upon the subject, and without any constitutional provision to guide us, we are compelled to recur to the ritual for authority. There the answer to the question in each degree, "How many compose a Lodge?" will supply us with the rule by which we are to establish the quorum in that degree. For whatever

number composes a Lodge, that is the number which will authorize the Lodge to proceed to business. The ritual has thus established the number which constitutes a "perfect Lodge," and without which number a Lodge could not be legally opened, and therefore, necessarily, could not proceed to work or business; for there is no distinction, in respect to a quorum, between a Lodge when at work or when engaged in business.

According to the ritualistic rule referred to, seven constitute a quorum, for work or business, in an Entered Apprentice's Lodge, five in a Fellow-Craft's, and three in a Master Mason's. Without this requisite number no Lodge can be opened in either of these degrees. In a Chapter of Royal Arch Masons nine Companions constitute a quorum, and in a Commandery of Knights Templar eleven Knights; although, under certain circumstances well known to the Order, three Knights are competent to transact business.

R

R. (Heb. ר, *Resh.*) The eighteenth letter in the English and other Western alphabets. The word Resh signifies *forehead*, and in the Phœnician and hieroglyphic character is thus represented.  Its numerical value is 200, and the equivalent as a name of God is רחום, *Rahum*, signifying clemency.

Rabbanaim. רב־בנאים, Rabbinical Hebrew, and signifying "the chief of the architects." A significant word in the high degrees.

Rabbinism. The system of philosophy taught by the Jewish Rabbis subsequent to the dispersion, which is engaged in mystical explanations of the oral law. With the reveries of the Jewish teachers was mingled the Egyptian, the Arabic, and the Grecian doctrines. From the Egyptians, especially, Rabbinism derived its allegorical and symbolic mode of instruction. Out of it sprang the Therapeutists and the Essenians; and it gave rise to the composition of the Talmud, many of whose legends have been incorporated into the mythical philosophy of Speculative Masonry. And this it is that makes Rabbinism an interesting subject of research to the Masonic student.

Rabboni. רבוני. Literally, *my Master*, equivalent to the pure Hebrew, *Adoni*. As a significant word in the higher degrees, it has been translated "*a most excellent Master*," and its usage by the later Jews will justify that interpretation. Buxtorf (*Lex. Talmud.*) tells us that about the time of Christ this title arose in the school of Hillel, and was given to only seven of their wise men who were preeminent for their learning. Jahn (*Arch. Bib.*, § 106) says that Gamaliel, the preceptor of St. Paul, was one of these. They styled themselves the children of wisdom, which is an expression very nearly corresponding to the Greek φιλοσοφοι. The word occurs once, as applied to Christ, in the New Testament (John xx. 16), "Jesus said unto her, Mary. She turned herself, and saith unto him, Rabboni, which is to say, Master." The Masonic myth in the "Most Excellent Master's Degree," that it was the title addressed by the Queen of Sheba to King Solomon on beholding the magnificence and splendor of the Temple, wants the element of plausibility, inasmuch as the word was not in use in the time of Solomon.

Ragon, J. M. One of the most distinguished Masonic writers of France. His contemporaries did not hesitate to call him "the most learned Mason of the nineteenth century." He was born in the last quarter of the eighteenth century, most probably at Bruges, in Belgium, where in 1803 he was initiated in the Lodge Réunion des Amis du Nord, and subsequently assisted in the foundation of the Lodge and Chapter of Vrais Amis in the same city. On his removal to Paris he continued his devotion to Freemasonry, and was the founder in 1805 of the celebrated Lodge of Les Trinosophes. In that Lodge he delivered, in 1818, a course of lectures on ancient and modern initiations, which twenty years afterward were repeated at the request of the Lodge, and published in 1841, under the title of *Cours Philosophique et Interpratif des Initiations Anciennes et Modernes*. This work was printed with the express permission of the Grand Orient of France, but three years after that body denounced its second edition for containing some additional matter. Rebold charges this act to the petty passions of the day, and twenty-five years after the Grand Orient made ample reparation in the honor that it paid to the memory of Ragon. In 1818 and 1819, he was editor in chief of the periodical published during those years under the title of *Hermès, ou Archives Maçonniques*. In 1853, he published *Orthodoxie Maçonnique*, a work abounding in historical information, although some of his statements are inaccurate. In 1861, he published the *Tuileur Général de la Franc-Maçonnerie, ou Manuel de l'Initié;* a book not merely confined to the details of degrees, but which is enriched with many valuable and interesting notes. Ragon died at Paris about the year 1866. In the preface to his *Orthodoxie*, he had an-

nounced his intention to crown his Masonic labors by writing a work to be entitled *Les Fastes Initiatiques*, in which he proposed to give an exhaustive view of the Ancient Mysteries, of the Roman Colleges of Architects and their successors, the building corporations of the Middle Ages, and of the institution of Modern or Philosophic Masonry at the beginning of the eighteenth century. This was to constitute the first volume. The three following volumes were to embrace a history of the Order and of all its Rites in every country. The fifth volume was to be appropriated to the investigation of other secret associations, more or less connected with Freemasonry; and the sixth and last volume was to contain a General Tiler or manual of all the known rites and degrees. Such a work would have been an inestimable boon to the Masonic student, but Ragon unfortunately began it too late in life. He did not live to complete it, and in 1868 the unfinished manuscript was purchased, by the Grand Orient of France, from his heirs for a thousand francs. It was destined to be quietly deposited in the archives of that body, because, as it was confessed, no Mason could be found in France who had ability enough to supply its lacunæ and prepare it for the press.

Ragon's theory of the origin of Masonry was that its primitive idea is to be found in the initiations of the Ancient Mysteries, but that for its present form it is indebted to Elias Ashmole, who fabricated it in the seventeenth century.

Ragotzky, Carl August. A German who was distinguished for his labors in Masonry, and for the production of several works of high character, the principal of which were *Der Freidenker in der Maurerei oder Freimüthige Briefe über wichtige Gegenstände in der Frei-Maurerei*, i. e., The Freethinker in Masonry, or Candid Letters on important subjects in Freemasonry, published at Berlin, in 1793, in an octavo volume of three hundred and eleven pages, of which a second edition appeared in 1811; and a smaller work entitled *Ueber Maurerische Freiheit, für eingeweihte und uneingeweihte*, i. e., An Essay on Masonic Liberty, for initiated and uninitiated readers, published in 1792. He died January 5, 1823.

Rainbow, The Most Ancient Order of the. A secret association existing in Moorfields in 1760.

Rains. It was a custom among the English Masons of the middle of the last century, when conversing together on Masonry, to announce the appearance of a profane by the warning expression "it rains." The custom was adopted by the German and French Masons, with the equivalent expression, *es regnet* and *il pluie*. Baron Tschoudy, who condemns the usage, says that the latter refined upon it by designating the approach of a female by *il neige*, it snows. Dr. Oliver says (*Rev. Sq.*, 142) that the phrase "it rains," to indicate that a cowan is present and the proceedings must be suspended, is derived from the ancient punishment of an eavesdropper, which was to place him under the eaves of a house in rainy weather, and to retain him there till the droppings of water ran in at the collar of his coat and out at his shoes.

Raised. When a candidate has received the Third Degree, he is said to have been "raised" to the sublime degree of a Master Mason. The expression refers, *materially*, to a portion of the ceremony of initiation, but *symbolically*, to the resurrection, which it is the object of the degree to exemplify.

Raising Sheet. A term sometimes given to one of the common properties known to Master Masons.

Ramayana. The great epic of ancient India, deemed a sacred writing by its people, narrating the history of Rama, or Vishnu incarnate, and his wife Siva. It contains about 24,000 verses, in seven books, written in Sanskrit, and is ascribed to Valmîki, who lived about the beginning of the Christian era.

Ramsay, Andrew Michael. Commonly called the Chevalier Ramsay. He was born at Ayr, in Scotland. [There is some uncertainty about the date of his birth, but according to his own account he must have been born in 1680 or 81, because in 1741 he told Herr von Gensau that he was 60 years old.] His father was a baker, but being the possessor of considerable property was enabled to give his son a liberal education. He was accordingly sent to school in his native burgh, and afterward to the University of Edinburgh, where he was distinguished for his abilities and diligence. In 1709 he was entrusted with the education of the two sons of the Earl of Wemyss. Subsequently, becoming unsettled in his religious opinions, he resigned that employment and went to Holland, residing for some time at Leyden. There he became acquainted with Pierre Poiret, one of the most celebrated teachers of the mystic theology which then prevailed on the Continent. From him Ramsay learned the principal tenets of that system; and it is not unreasonable to suppose that he was thus indoctrinated with that love of mystical speculation which he subsequently developed as the inventor of Masonic degrees, and as the founder of a Masonic Rite. In 1710, he visited the celebrated Fénelon, Archbishop of Cambrai, of whose mystical tendencies he had heard, and met with a cordial reception. The archbishop invited Ramsay to become his guest, and in six months he was converted to the Catholic faith. Fénelon procured for him the preceptorship of the Duc de Chateau-Thierry and the Prince de Turenne. As a reward for his services in that capacity, he was made a Knight of the Order of St. Lazarus, whence he received the title of "Chevalier" by which he was usually known. He was subsequently selected by James III., the Pretender, as the tutor of his two sons,

Charles Edward and Henry, the former of whom became afterward the Young Pretender, and the latter the Cardinal York. For this purpose he repaired, in 1724, to Rome. But the political and religious intrigues of that court became distasteful to him, and in a short time he obtained permission to return to France. In 1728, he visited England, and became an inmate of the family of the Duke of Argyle. Chambers says (*Biog. Dict.*) that while there he wrote his *Principles of Natural and Revealed Religion*, and his *Travels of Cyrus*. This statement is evidently incorrect. The former did not appear until after his death, and was probably one of the last productions of his pen. The latter had already been published at Paris in 1727. But he had already acquired so great a literary reputation, that the University of Oxford conferred on him the degree of Doctor of Civil Law. He then returned to France, and resided for many years at Pointoise, a seat of the Prince of Turenne, where he wrote his *Life of Fénelon*, and a *History of the Viscount Turenne*. During the remainder of his life he resided as Intendant in the Prince's family, and died May 6, 1743, in the sixty-second year of his age.

[He was a Freemason and Grand Chancellor of the Grand Lodge of Paris, but it is not known where and when he became a Mason; it was probably during his visit to England about 1730.]

Ramsay, although born of humble parentage, was by subsequent association an aristocrat in disposition. Hence, in proposing his theory of the origin of Freemasonry, he repudiated its connection with an operative art, and sought to find its birthplace in Palestine, among those kings and knights who had gone forth to battle as Crusaders for the conquest of Jerusalem. In 1737, Ramsay, as Grand Orator, pronounced a discourse before the Grand Lodge of France, in which he set forth his theory in explicit terms. The following is a translation of part of the speech:

"During the time of the holy wars in Palestine, several principal lords and citizens associated themselves together, and entered into a vow to re-establish the temples of the Christians in the Holy Land; and engaged themselves by an oath to employ their talents and their fortunes in restoring architecture to its primitive institution. They adopted several ancient signs and symbolic words drawn from religion, by which they might distinguish themselves from the infidels and recognize each other in the midst of the Saracens. They communicated these signs and words only to those who had solemnly sworn, often at the foot of the altar, never to reveal them. This was not an oath of execration, but a bond uniting men of all nations into the same confraternity. Some time after our Order was united with the Knights of St. John of Jerusalem. Hence our Lodges are in all countries called Lodges of St. John. This union was made in imitation of the Israelites when they rebuilt the second Temple, during which time with one hand they managed the trowel and mortar, and in the other held the sword and buckler.

"Our Order must not, therefore, be regarded as a renewal of the Bacchanals and a source of senseless dissipation, of unbridled libertinism and of scandalous intemperance, but as a moral Order, instituted by our ancestors in the Holy Land to recall the recollection of the most sublime truths in the midst of the innocent pleasures of society.

"The kings, princes, and nobles, when they returned from Palestine into their native dominions, established Lodges there. At the time of the last Crusade several Lodges had already been erected in Germany, Italy, Spain, France, and, from the last, in Scotland, on account of the intimate alliance which then existed between those two nations.

"James, Lord Steward of Scotland, was the Grand Master of a Lodge established at Kilwinning, in the west of Scotland, in the year 1236, a short time after the death of Alexander III., King of Scotland, and a year before John Baliol ascended the throne. This Scottish lord received the Earls of Gloucester and Ulster, English and Irish noblemen, as Masons in his Lodge.

"By degrees our Lodges, our festivals, and our solemnities were neglected in most of the countries where they had been established. Hence the silence of the historians of all nations, except Great Britain, on the subject of the Order. It was preserved, however, in all its splendor by the Scotch, to whom for several centuries the kings of France had intrusted the guardianship of their sacred persons.

"After the lamentable reverses of the Crusades, the destruction of the Christian armies, and the triumph of Bendocdar, Sultan of Egypt, in 1263, during the eighth and ninth Crusades, the great Prince Edward, son of Henry III., King of England, seeing that there would be no security for the brethren in the Holy Land when the Christian troops should retire, led them away, and thus this colony of the Fraternity was established in England. As this prince was endowed with all the qualities of mind and heart which constitute the hero, he loved the fine arts, and declared himself the protector of our Order. He granted it several privileges and franchises, and ever since the members of the confraternity have assumed the name of *Freemasons*. From this time Great Britain became the seat of our sciences, the conservatrix of our laws, and the depository of our secrets. The religious dissensions which so fatally pervaded and rent all Europe during the sixteenth century, caused our Order to degenerate from the grandeur and nobility of its origin. Several of our rites and usages, which were opposed to the

prejudices of the times, were changed, disguised, or retrenched. Thus it is that several of our brethren have, like the ancient Jews, forgotten the spirit of our laws, and preserved only the letter and the outer covering. But from the British isles the ancient science is now beginning to pass again into France."

Such was the peculiar theory of Ramsay. Rejecting all reference to the Traveling Architects from Como, to the Stone Masons of Germany, and the Operative Freemasons of England, he had sought a noble and chivalric origin for Freemasonry, which with him was not a confraternity founded on a system of architecture, but solely on the military prowess and religious enthusiasm of knighthood. The theory was as clearly the result of his own inventive genius as was his fable of the travels of Cyrus. He offered no documentary or historical authority to support his assertions, but gave them as if they were already admitted facts. The theory was, however, readily accepted by the rich, the fashionable, and the noble, because it elevated the origin and the social position of the Order, and to it we are to attribute the sudden rise of so many high degrees, which speedily overshadowed the humbler pretensions of primitive Craft Masonry. [After the delivery of this speech a number of Chivalric Degrees were invented in France and styled Scottish Masonry, and they have been attributed to Ramsay, acting as has been supposed in the interests of the exiled Stuarts; and he has also been considered the inventor of the Royal Arch Degree; but R. F. Gould in his *History of Freemasonry* has shown that there is no foundation for either of these theories; and that Ramsay's influence on Freemasonry was due to his speech alone.]

All writers concur in giving the most favorable opinions of Ramsay's character. Chambers asserts that he was generous and kind to his relatives, and that on his temporary return to Great Britain, although he did not visit them in Scotland, he sent them liberal offers of money, which, however, incensed at his apostasy from the national religion, they indignantly refused to accept. Clavel (*Hist. Pittor.*, p. 165) describes him as "a man endowed with an ardent imagination, and a large amount of learning, wit, and urbanity." And Robison (*Proofs of a Consp.*, p. 39) says he was "as eminent for his piety as he was for his enthusiasm," and speaks of his "eminent learning, his elegant talents, and his amiable character."

His general literary reputation is secured by his *Life of Fénelon*, his *Travels of Cyrus*, and the elaborate work, published after his death, entitled *The Philosophical Principles of Natural and Revealed Religion, Unfolded in a Geometrical Order*. He is said to have been the author of an *Apologetic and Historical Relation of the Society of Freemasonry*, which was published in 1738, and had the honor to be burnt the next year at Rome by the public executioner, on the sentence of the Sacred Congregation of the Inquisition.

Raphael. (Hebrew interpretation, "The healing of God.") The title of an officer in a Rose Croix Chapter. The name of the angel, under the Kabbalistical system, that governed the planet Mercury. A messenger.

Ratisbon. A city of Bavaria, in which two Masonic Congresses have been held. The first was convoked in 1459, by Jost Dotzinger, the master of the works of the Strasburg cathedral. It established some new laws for the government of the Fraternity in Germany. The second was called in 1464, by the Grand Lodge of Strasburg, principally to define the relative rights of, and to settle existing difficulties between, the Grand Lodges of Strasburg, Cologne, Vienna, and Bern. (See *Stone Masons of the Middle Ages.*)

Rawlinson Manuscript. In 1855, the Rev. J. S. Sidebotham, of New College, Oxford, published in the *Freemasons' Monthly Magazine* a series of interesting extracts from a manuscript volume which he stated was in the Bodleian Library, and which he described as seeming "to be a kind of Masonic album, or commonplace book, belonging to Brother Richard Rawlinson, LL.D. and F. R. S., of the following Lodges: Sash and Cocoa-tree, Moorfields, 37; St. Paul's Head, Ludgate Street, 40; Rose Tavern, Cheapside, and Oxford Arms, Ludgate Street, 94; in which he inserted anything that struck him either as useful or particularly amusing. It is partly in manuscript, partly in print, and comprises some ancient Masonic Charges, Constitutions, forms of summons, a list of all the Lodges of his time under the Grand Lodge of England, whether in London, the country, or abroad; together with some extracts from the *Grub Street Journal*, the *General Evening Post*, and other journals of the day. The dates range from 1724 to 1740." (*F. M. Monthly Mag.*, 1855, p. 81.)

Among the materials thus collected is one which bears the following title: *The Freemasons' Constitutions, Copied from an Old MS. in the possession of Dr. Rawlinson.* This copy of the Old Constitutions does not differ materially in its contents from the other old manuscripts, but its more modern spelling and phraseology would seem to give it a later date, which may be from 1725 to 1750. In a note to the statement that King Athelstan "caused a roll or book to be made, which declared how this science was first invented, afterwards preserved and augmented, with the utility and true intent thereof, which roll or book he commanded to be read and plainly recited when a man was to be made a Freemason," Dr. Rawlinson says: "One of these rolls I have seen in the possession of Mr. Baker, a carpenter in Moorfields." The title of the manuscript in the scrap-book of Rawlinson is *The Freemasons' Constitution, Copied from an Old MS. in the possession of Dr. Rawlinson.* The original MS. has not yet been traced, but

possibly if found would be of about the end of the seventeenth century.

Richard Rawlinson, LL.D., was a celebrated antiquary, who was born in London about 1690, and died April 6, 1755. He was the author of a *Life of Anthony Wood*, published in 1711, and of *The English Topographer*, published in 1720. Dr. Rawlinson was consecrated a bishop of the non-juring communion of the Church of England, March 25, 1728. He was an assiduous collector of old manuscripts, invariably purchasing, sometimes at high prices, all that were offered him for sale. In his will, dated June 2, 1752, he bequeathed the whole collection to the University of Oxford. The manuscripts were placed in the Bodleian Library, and still remain there. In 1898, Dr. W. J. Chetwode Crawley published in the *Ars Quatuor Coronatorum*, vol. xi., a full account of the Rawlinson MSS., in which he shows that the collection was not really made by Dr. Rawlinson, but by one Thomas Towl. (P. 15.)

Received and Acknowledged. A term applied to the initiation of a candidate into the Sixth or Most Excellent Master's Degree of the American Rite. (See *Acknowledged*.)

Reception. The ceremony of initiation into a degree of Masonry is called a reception.

Recipient. The French call the candidate in any degree of Masonry the *Recipiendaire*, or Recipient.

Recognition, Modes of. Smith says (*Use and Abuse*, p. 46) that at the institution of the Order, to each of the degrees "a particular distinguished *test* was adapted, which *test*, together with the explication, was accordingly settled and communicated to the Fraternity previous to their dispersion, under a necessary and solemn injunction to secrecy; and they have been most cautiously preserved and transmitted down to posterity by faithful brethren ever since their emigration."

Hence, of all the landmarks, the modes of recognition are the most legitimate and unquestioned. They should admit of no variation, for in their universality consist their excellence and advantage. And yet such variations have unfortunately been admitted, the principal of which originated about the middle of the eighteenth century, and were intimately connected with the division of the Fraternity in England into the two conflicting societies of the "Ancients" and the "Moderns"; and although by the reconciliation in 1813 uniformity was restored in the United Grand Lodge which was then formed, that uniformity did not extend to the subordinate bodies in other countries which had derived their existence and their different modes of recognition from the two separated Grand Lodges; and this was, of course, equally applicable to the high degrees which sprang out of them. Thus, while the modes of recognition in the York and Scottish Rites are substantially the same, those of the French or Modern Rite differ in almost everything. In this there is a P. W. in the First Degree unrecognized by the two other Rites, and all afterward are different.

Again, there are important differences in the York and American Rites, although there is sufficient similarity to relieve American and English Masons from any embarrassment in mutual recognition. Although nearly all the Lodges in the United States, before the Revolution of 1776, derived their existence from the Grand Lodges of England, the American Masons do not use the multitude of signs that prevail in the English system, while they have introduced, I think, through the teachings of Webb, the D. G., which is totally unknown to English Masonry. Looking to these differences, the Masonic Congress of Paris, held in 1856, recommended, in the seventh proposition, that "Masters of Lodges, in conferring the degree of Master Mason, should invest the candidate with the words, signs, and grips of the Scottish and Modern Rites." This proposition, if it had been adopted, would have mitigated, if it did not abolish, the evil; but, unfortunately, it did not receive the general concurrence of the Craft.

As to the antiquity of modes of recognition in general, it may be said that, from the very nature of things, there was always a necessity for the members of every secret society to have some means for recognizing a brother that should escape the detection of the uninitiated. We find evidence in several of the classic writings showing that such a custom prevailed among the initiated in the Pagan mysteries. Livy tells us (xxxi., 14) of two Acarnanian youths who accidentally entered the temple of Ceres during the celebration of the mysteries, and, not having been initiated, were speedily detected as intruders, and put to death by the managers of the temple. They must, of course, have owed their detection to the fact that they were not in possession of those modes of recognition which were known only to the initiated.

That they existed in the Dionysiac rites of Bacchus we learn from Plautus, who, in his *Miles Gloriosus* (Act IV., Sc. ii.), makes Misphidippa say to Pyrgopolonices, "Cedo signum si harunc Baccharum es," *Give the sign, if you are one of these Bacchæ*.

Jamblichus (*Vit. Pyth.*) tells the story of a disciple of Pythagoras, who, having been taken sick, on a long journey, at an inn, and having exhausted his funds, gave, before he died, to the landlord, who had been very kind to him, a paper, on which he had written the account of his distress, and signed it with a symbol of Pythagoras. This the landlord affixed to the gate of a neighboring temple. Months afterward another Pythagorean, passing that way, recognized the secret symbol, and, inquiring into the tale, reimbursed the landlord for all his trouble and expense.

Apuleius, who was initiated into the Osirian and Isiac mysteries, says, in his

Defensio, "if any one is present who has been initiated into the same secret rites as myself, if he will give me the sign, he shall then be at liberty to hear what it is that I keep with such care." But in another place he is less cautious, and even gives an inkling of what was one of the signs of the Osirian initiation. For in his *Golden Ass* (lib. xi.) he says that in a dream he beheld one of the disciples of Osiris, "who walked gently, with a hesitating step, the ankle of his left foot being slightly bent, in order, no doubt, that he might afford me some sign by which I could recognize him." The Osirian initiates had then, it seems, like the Freemasons, mystical steps.

That the Gnostics had modes of recognition we learn from St. Epiphanius, himself at one time in early life a Gnostic, who says in his *Panarium*, written against the Gnostics and other heretics, that "on the arrival of any stranger belonging to the same belief, they have a sign given by one to another. In holding out the hand, under pretence of saluting each other, they feel and tickle it in a peculiar manner underneath the palm, and so discover if the new-comer belongs to the same sect. Thereupon, however poor they may be, they serve up to him a sumptuous feast, with abundance of meats and wine."

I do not refer to the fanciful theories of Dr. Oliver—the first one most probably a joke, and therefore out of place in his *Symbolical Dictionary*—founded on passages of Homer and Quintus Curtius, that Achilles and Alexander of Macedon recognized the one Priam and the other the High Priest by a sign. But there are abundant evidences of an authentic nature that a system of recognition by signs, and words, and grips has existed in the earliest times, and, therefore, that they were not invented by the Masons, who borrowed them, as they did much more of their mystical system, from antiquity.

Recommendation. The petition of a candidate for initiation must be recommended by at least two members of the Lodge. Preston requires the signature to be witnessed by one person (he does not say whether he must be a member of the Lodge or not), and that the candidate must be proposed in open Lodge by a member. Webb says that "the candidate must be proposed in form, by a member of the Lodge, and the proposition seconded by another member." Cross says that the recommendation "is to be signed by two members of the Lodge," and he dispenses with the formal proposition. These gradual changes, none of them, however, substantially affecting the principle, have at last resulted in the present simpler usage, which is, for two members of the Lodge to affix their names to the petition, as recommenders of the applicant.

The petition for a Dispensation for a new Lodge, as preliminary to the application for a Warrant of Constitution, must be recommended by the nearest Lodge. Preston says that it must be recommended "by the Masters of three regular Lodges adjacent to the place where the new Lodge is to be held." This is also the language of the Constitution of the Grand Lodge of Ireland. The Grand Lodge of Scotland requires the recommendation to be signed "by the Masters and officers of two of the nearest Lodges." The modern Constitution of the Grand Lodge of England requires a recommendation "by the officers of some regular Lodge," without saying anything of its vicinity to the new Lodge. The rule now universally adopted is, that it must be recommended by the nearest Lodge.

Reconciliation, Lodge of. When the two contending Grand Lodges of England, known as the "Ancients" and the "Moderns," resolved, in 1813, under the respective Grand Masterships of the Dukes of Kent and Sussex, to put an end to all differences, and to form a United Grand Lodge, it was provided, in the fifth article of union, that each of the two Grand Masters should appoint nine Master Masons to meet at some convenient place; and each party having opened a just and perfect Lodge in a separate apartment, they should give and receive mutually and reciprocally the obligations of both Fraternities; and being thus duly and equally enlightened in both forms, they should be empowered and directed to hold a Lodge, under the Warrant or Dispensation to be entrusted to them, and to be entitled "The Lodge of Reconciliation." The duty of this Lodge was to visit the several Lodges under both Grand Lodges, and to instruct the officers and members of the same in the forms of initiation, obligation, etc., in both, so that uniformity of working might be established. The Lodge of Reconciliation was constituted on the 27th of December, 1813, the day on which the union was perfected. This Lodge was only a temporary one, and the duties for which it had been organized having been performed, it ceased to exist by its own limitation in 1816. [For a full account of this Lodge and its proceedings, see *Ars Quatuor Coronatorum*, vol. xxiii., for 1910.]

Reconsideration, Motion for. A motion for reconsideration can only be made in a Grand Lodge, Grand Chapter, or other Grand Body, on the same day or the day after the adoption of the motion which it is proposed to reconsider. In a Lodge or other subordinate body, it can only be made at the same meeting. It cannot be moved by one who has voted in the minority. It cannot be made when the matter to be reconsidered has passed out of the control of the body, as when the original motion was for an appropriation which has been expended since the motion for it was passed. A motion for reconsideration is not debatable if the question proposed to be reconsidered is not. It cannot always be adopted by a simple majority vote. It may be postponed or laid upon the table.

If postponed to a time definite, and when that time arrives is not acted upon, it cannot be renewed. If laid upon the table, it cannot be taken up out of its order, and no second motion for reconsideration can be offered while it lies upon the table, hence to lay a motion for reconsideration on the table is considered as equivalent to rejecting it. When a motion for reconsideration is adopted, the original motion comes up immediately for consideration, as if it had been for the first time brought before the body, in the form which it presented when it was adopted.

Reconsideration of the Ballot. When the petition of a candidate for initiation has been rejected, it is not permissible for any member to move for a reconsideration of the ballot. The following four principles set forth in a summary way the doctrine of Masonic parliamentary law on this subject:

1. It is never in order for a member to move for the reconsideration of a ballot on the petition of a candidate, nor for a presiding officer to entertain such a motion. 2. The Master or presiding officer alone can, for reasons satisfactory to himself, order such a reconsideration. 3. The presiding officer cannot order a reconsideration on any subsequent night, nor on the same night, after any member who was present and voted has departed. 4. The Grand Master cannot grant a Dispensation for a reconsideration, nor in any other way interfere with the ballot. The same restriction applies to the Grand Lodge.

Recorder. In some of the high degrees, as in a Council of Select Masters and a Commandery of Knights Templar, the title of Recorder is given to the Secretary. The recording officer of the Grand Encampment of Knights Templar of the United States, of State Grand Commanderies, and of Grand Councils of Royal and Select Masters, is styled a Grand Recorder.

Records, Old. The early history of Masonry, as written by Anderson, Preston, Smith, Calcott, and writers of that generation, was little more than a collection of fables, so absurd as to excite the smile of every reader, or bare statements of incidents, without any authority to substantiate their genuineness.

The recent writers on the same subject have treated it in a very different manner, and one that gives to the investigation of the early annals of Freemasonry a respectable position in the circle of historic studies. Much of the increased value that is given in the present day to Masonic history is derivable from the fact that, ceasing to repeat the gratuitous statements of the older writers, some of whom have not hesitated to make Adam a Grand Master, and Eden the site of a Lodge, our students of this day are drawing their conclusions from, and establishing their theories on, the old records, which Masonic archeology is in this generation bringing to light. Hence, one of these students (Bro. Woodford, of England) has said that, when we begin to investigate the real facts of Masonic history, "not only have we to discard at once much that we have held tenaciously and taught habitually, simply resting on the reiterated assertions of others, but we shall also find that we have to get rid of what, I fear, we must call 'accumulated rubbish,' before we can see clearly how the great edifice of Masonic history, raised at last on sure and good foundations, stands out clearer to the sight, and even more honorable to the builders, from those needful, if preparatory, labors."

Anderson tells us that in the year 1719, at some of the private Lodges, "several very valuable manuscripts concerning the Fraternity, their Lodges, Regulations, Charges, Secrets, and Usages, were too hastily burnt by some scrupulous brothers, that those papers might not fall into strange hands." (*Constitutions*, 1738, p. 111.)

In the last quarter of a century the archeologists of Masonry have labored very diligently and successfully to disinter from the old Lodges, libraries, and museums many of these ancient manuscripts, and much light has thus been thrown upon the early history of Freemasonry.

The following is a list of the most important of these old records which the industry of Masonic antiquaries has brought to light. They are generally called "Manuscripts," because their originals, for the most part, exist in manuscript rolls, or there is competent evidence that the original manuscripts, although now lost, once existed. There are, however, a few instances in which this evidence is wanting, and the authenticity of the manuscript rests only on probability. Each of them is noted in this work under its respective title.

1. Halliwell or Regius Manuscript.
2. Book of the Fraternity of Stone Masons.
3. Paris Regulations.
4. Strasburg Constitutions.
5. Cooke's Manuscript.
6. Lansdowne Manuscript.
7. Schaw Manuscript.
8. St. Clair Charters.
9. Eglinton Manuscript.
10. York Manuscripts (six in number).
11. Grand Lodge Manuscript.
12. Sloane Manuscripts (two in number).
13. Aitcheson-Haven Manuscript.
14. Kilwinning Manuscript.
15. Harleian Manuscript.
16. Hope Manuscript.
17. Alnwick Manuscript.
18. Papworth Manuscript.
19. Roberts' Manuscript.
20. Edward III. Manuscript.
21. St. Albans' Regulations.
22. Anderson Manuscript.
23. Stone Manuscripts.
24. Constitutions of Strasburg.
25. Constitutions of Torgan.
26. Dowland Manuscript.
27. Wilson Manuscript.

28. Spencer Manuscript.
29. Cole Manuscript.
30. Plot Manuscript.
31. Inigo Jones Manuscript.
32. Rawlinson Manuscript.
33. Woodford Manuscript.
34. Krause Manuscript.
35. Antiquity Manuscript.
36. Leland Manuscript, sometimes called the Locke Manuscript.
37. Charter of Cologne.

There may be some other manuscript records, especially in France and Germany, not here noticed, but the list above contains the most important of those now known to the Fraternity. Many of them have never yet been published, and the collection forms a mass of material absolutely necessary for the proper investigation of Masonic history. Every Mason who desires to know the true condition of the Fraternity during the last three or four centuries, and who would learn the connection between the Stone-Masons of the Middle Ages and the Free and Accepted Masons of the present day, so as perfectly to understand the process by which the Institution became changed from an operative art to a speculative science, should attentively read and thoroughly digest these ancient records of the Brotherhood. (See also *Manuscripts, Old.*)

Rectification. The German Masons use this word to designate that process of removing an irregularity of initiation which, in American Masonry, is called *healing*, which see.

Rectified Rite. (*Rite Rectifié.*) See *Martinism.*

Rectified Rose Croix, Rite of. See *Rose Croix, Rectified.*

Recusant. A term applied in English history to one who refused to acknowledge the supremacy of the king as head of the church. In Masonic law, the word is sometimes used to designate a Lodge or a Mason that refuses to obey an edict of the Grand Lodge. The arrest of the Charter, or the suspension or expulsion of the offender, would be the necessary punishment of such an offense.

Red. Red, scarlet, or crimson, for it is indifferently called by each of these names, is the appropriate color of the Royal Arch Degree, and is said symbolically to represent the ardor and zeal which should actuate all who are in possession of that sublime portion of Masonry. Portal (*Couleurs Symb.*, p. 116) refers the color red to fire, which was the symbol of the regeneration and purification of souls. Hence there seems to be a congruity in adopting it as the color of the Royal Arch, which refers historically to the regeneration or rebuilding of the Temple, and symbolically to the regeneration of life.

In the religious services of the Hebrews, red, or scarlet, was used as one of the colors of the veils of the tabernacle, in which, according to Josephus, it was an emblem of the element of fire; it was also used in the ephod of the high priest, in the girdle, and in the breastplate. Red was, among the Jews, a color of dignity, appropriated to the most opulent or honorable, and hence the prophet Jeremiah, in describing the rich men of his country, speaks of them as those who "were brought up in scarlet."

In the Middle Ages, those knights who engaged in the wars of the Crusades, and especially the Templars, wore a red cross, as a symbol of their willingness to undergo martyrdom for the sake of religion; and the priests of the Roman Church still wear red vestments when they officiate on the festivals of those saints who were martyred.

Red is in the higher degrees of Masonry as predominating a color as blue is in the lower. Its symbolic significations differ, but they may generally be considered as alluding either to the virtue of fervency when the symbolism is moral, or to the shedding of blood when it is historical. Thus in the degree of Provost and Judge, it is historically emblematic of the violent death of one of the founders of the Institution; while in the degree of Perfection it is said to be a moral symbol of zeal for the glory of God, and for our own advancement toward perfection in Masonry and virtue.

In the degree of Rose Croix, red is the predominating color, and symbolizes the ardent zeal which should inspire all who are in search of that which is lost.

Where red is not used historically, and adopted as a memento of certain tragical circumstances in the history of Masonry, it is always, under some modification, a symbol of zeal and fervency.

These three colors, blue, purple, and red, were called in the former English lectures "the old colors of Masonry," and were said to have been selected "because they are royal, and such as the ancient kings and princes used to wear; and sacred history informs us that the veil of the Temple was composed of these colors."

Red Brother. The Sixth and last degree of the Swedenborgian system.

Red Cross Knight. When, in the tenth century, Pope Urban II., won by the enthusiasm of Peter the Hermit, addressed the people who had assembled at the city of Clermont during the sitting of the Council, and exhorted them to join in the expedition to conquer the Holy Land, he said, in reply to their cry that God wills it, *Dieux el volt*, "it is indeed the will of God; let this memorable word, the inspiration, surely, of our Holy Spirit, be forever adopted as your cry of battle, to animate the devotion and courage of the champions of Christ. His cross is the symbol of your salvation; wear it, a red, a bloody cross, as an external mark on your breasts or shoulders, as a pledge of your sacred and irrevocable engagement." The proposal was eagerly accepted, and the Bishop of Puy was the first who solicited

the Pope to affix the cross in red cloth on his shoulder. The example was at once followed, and thenceforth the red cross on the breast was recognized as the sign of him who was engaged in the Holy Wars, and Crusader and Red Cross Knight became convertible terms. Spenser, in the *Fairie Queen* (Cant. I.), thus describes one of these knights:

"And on his breast a bloody cross he bore,
The dear remembrance of his dying Lord,
For whose sweet sake that glorious badge he wore,
And dead, as living, ever him ador'd:
Upon his shield the like was also scor'd."

The application of this title, as is sometimes done in the ritual of the degree, to a Masonic degree of Knight of the Red Cross, is altogether wrong, and it is now called Companion of the Red Cross. A Red Cross Knight and a Knight of the Red Cross are two entirely different things.

Red Cross Legend. The embassy of Zerubbabel to the court of Darius constitutes what has been called the Legend of the Red Cross Degree. (See *Embassy*, and *Companion of the Red Cross.*)

Red Cross of Babylon. See *Babylonish Pass.*

Red Cross of Rome and Constantine. A degree founded on the circumstance of the vision of a cross, with the inscription EN TOTTΩ NIKA, which appeared in the heavens to the Emperor Constantine. It formed originally a part of the Rosaic Rite, and is now practised in England, Ireland, Scotland, and some of the English colonies, as a distinct Order; the meetings being called "Conclaves," and the presiding officer of the Grand Imperial Council of the whole Order, "Grand Sovereign." Its existence in England as a Masonic degree has been traced, according to Bro. R. W. Little (*Freemas. Mag.*), to the year 1780, when it was given by Bro. Charles Shirreff. It was reorganized in 1804 by Walter Rodwell Wright, who supplied its present ritual. The ritual of the Order contains the following legend:

"After the memorable battle fought at Saxa Rubra, on the 28th October, A.D. 312, the emperor sent for the chiefs of the Christian legion, and—we now quote the words of an old ritual—'in presence of his other officers constituted them into an Order of Knighthood, and appointed them to wear the form of the Cross he had seen in the heavens upon their shields, with the motto *In hoc signo vinces* round it, surrounded with clouds; and peace being soon after made, he became the Sovereign Patron of the Christian Order of the Red Cross.' It is also said that this Cross, together with a device called the *Labarum*, was ordered to be embroidered upon all the imperial standards. The Christian warriors were selected to compose the body-guard of Constantine, and the command of these privileged soldiers was confided to Eusebius, Bishop of Nicomedia, who was thus considered the second officer of the Order."

Red Cross Sword of Babylon. A degree worked in the Royal Arch Chapters of Scotland, and also in some parts of England. It is very similar to the Knight of the Red Cross conferred in the United States, which is now called the Companion of the Red Cross.

Red Letters. In the Ancient and Accepted Scottish Rite, edicts, summonses or other documents, written or printed in red letters, are supposed to be of more binding obligation, and to require more implicit obedience, than any others. Hence, in the same Rite, to publish the name of one who has been expelled in red letters is considered an especial mark of disgrace. It is derived from the custom of the Middle Ages, when, as Muratori shows (*Antiq. Ital. Med.*), red letters were used to give greater weight to documents; and he quotes an old Charter of 1020, which is said to be confirmed "per literas rubeas," or by red letters.

Reflection, Chamber of. See *Chamber of Reflection.*

Reformed Helvetic Rite. The Reformed Rite of Wilhelmsbad was introduced into Poland, in 1784, by Bro. Glayre, of Lausanne, the minister of King Stanislaus, and who was also the Provincial Grand Master of this Rite in the French part of Switzerland. But, in introducing it into Poland, he subjected it to several modifications, and called it the Reformed Helvetic Rite. The system was adopted by the Grand Orient of Poland.

Reformed Rite. This Rite was established, in 1872, by a Congress of Freemasons assembled at Wilhelmsbad, in Germany, over whose deliberations Ferdinand, Duke of Brunswick, presided as Grand Master. It was at this Convention that the Reformed Rite was first established, its members assuming the title of the "Beneficent Knights of the Holy City," because they derived their system from the French Rite of that name. It was called the Reformed Rite, because it professed to be a reformation of a Rite which had been established in Germany about a quarter of a century before under the name of the "Rite of Strict Observance." This latter Rite had advanced an hypothesis in relation to the connection between Freemasonry and the Order of Knights Templar, tracing the origin of our Institution to those Knights at the Crusades. This hypothesis the Convention at Wilhelmsbad rejected as unfounded in history or correct tradition. By the adoption of this Rite, the Congress gave a death-blow to the Rite of Strict Observance.

The Reformed Rite is exceedingly simple in its organization, consisting only of five degrees, namely:

1. Entered Apprentice; 2. Fellow-Craft; 3. Master Mason; 4. Scottish Master; 5. Knight of the Holy City.

The last degree is, however, divided into three sections, those of Novice, Professed Brother, and Knight, which really gives seven degrees to the Rite.

Refreshment. In Masonic language, *refreshment* is opposed in a peculiar sense to *labor*. While a Lodge is in activity it must be either at labor or at refreshment. If a Lodge is permanently closed until its next communication, the intervening period is one of abeyance, its activity for Masonic duty having for the time been suspended; although its powers and privileges as a Lodge still exist, and may be at any time resumed. But where it is only temporarily closed, with the intention of soon again resuming labor, the intermediate period is called a time of refreshment, and the Lodge is said not to be closed, but to be called from labor to refreshment. The phrase is an old one, and is found in the earliest rituals of the last century. *Calling from labor to refreshment* differs from closing in this, that the ceremony is a very brief one, and that the Junior Warden then assumes the control of the Craft, in token of which he erects his column on his stand or pedestal, while the Senior Warden lays his down. This is reversed in *calling on*, in which the ceremony is equally brief.

The word *refreshment* no longer bears the meaning among Masons that it formerly did. It signifies not necessarily eating and drinking, but simply cessation from labor. A Lodge at refreshment may thus be compared to any other society when in a recess. During the whole of the last century, and a part of the present, a different meaning was given to the word, arising from a now obsolete usage, which Dr. Oliver (*Mas. Juris.*, p. 210) thus describes:

"The Lodges in ancient times were not arranged according to the practice in use amongst ourselves at the present day. The Worshipful Master, indeed, stood in the east, but both the Wardens were placed in the west. The south was occupied by the senior Entered Apprentice, whose business it was to obey the instructions of the Master, and to welcome the visiting brethren, after having duly ascertained that they were Masons. The junior Entered Apprentice was placed in the north to prevent the intrusion of cowans and eavesdroppers; and a long table, and sometimes two, where the Lodge was numerous, were extended in parallel lines from the pedestal to the place where the Wardens sat, on which appeared not only the emblems of Masonry, but also materials for refreshment;—for in those days every section of the lecture had its peculiar toast or sentiment;—and at its conclusion the Lodge was called from labour to refreshment by certain ceremonies, and a toast, technically called 'the charge,' was drunk in a bumper, with the honours, and not unfrequently accompanied by an appropriate song. After which the Lodge was called from refreshment to labour, and another section was delivered with the like result."

At the present day, the banquets of Lodges, when they take place, are always held after the Lodge is closed; although they are still supposed to be under the charge of the Junior Warden. When modern Lodges are called to refreshment, it is either as a part of the ceremony of the Third Degree, or for a brief period; sometimes extending to more than a day, when labor, which had not been finished, is to be resumed and concluded.

The mythical history of Masonry tells us that high twelve or noon was the hour at Solomon's Temple when the Craft were permitted to suspend their labor, which was resumed an hour after. In reference to this myth, a Lodge is at all times supposed to be called from labor to refreshment at "high twelve," and to be called on again "one hour after high twelve."

Regalia. Strictly speaking, the word regalia, from the Latin, *regalia*, royal things, signifies the ornaments of a king or queen, and is applied to the apparatus used at a coronation, such as the crown, scepter, cross, mound, etc. But it has in modern times been loosely employed to signify almost any kind of ornaments. Hence the collar and jewel, and sometimes even the apron, are called by many Masons the regalia. The word has the early authority of Preston. In the second edition of his *Illustrations* (1775), when on the subject of funerals, he uses the expression, "the body, with the regalia placed thereon, and two swords crossed." And at the end of the service he directs that "the *regalia* and ornaments of the deceased, if an officer of a Lodge, are returned to the Master in due form, and with the usual ceremonies." *Regalia* cannot here mean the Bible and *Book of Constitutions*, for there is a place in another part of the procession appropriated to them. It might have been supposed that, by regalia, Preston referred to some particular decorations of the Lodge, had not his subsequent editors, Jones and Oliver, both interpolated the word "other" before ornaments, so as to make the sentence read "regalia and *other* ornaments," thus clearly indicating that they deemed the regalia a part of the ornaments of the deceased. The word is thus used in one of the headings of the modern Constitutions of the Grand Lodge of England. But in the text the more correct words "clothing and insignia" (Rule 282) are employed. There is, however, so great an error in the use of the word *regalia* to denote Masonic clothing, that it would be better to avoid it.

Regeneration. In the Ancient Mysteries the doctrine of regeneration was taught by symbols: not the theological dogma of regeneration peculiar to the Christian church, but the philosophical dogma as a change from death to life—a new birth to immortal existence. Hence the last day of the Eleusinian mysteries, when the initiation was completed, was called, says Court de Gebelin (*M. P.*, iv., 322), *the day of regeneration*. This is the doctrine in the Masonic mysteries, and more especially in the symbolism of the Third Degree. We must not say that the Mason is regenerated when he is initiated, but that he has been indoctrinated into the philosophy of the regeneration, or the new birth of all things—of light out of darkness, or life out of death, of eternal life out of temporal death.

Regent. The Fourth Degree of the Lesser Mysteries of the Illuminati.

Reghellini, M. A learned Masonic writer, who was born of Venetian parents on the island of Scio, whence he was usually styled Reghellini de Scio. The date of 1750, at which his birth has been placed, is certainly an error. Michaud supposes that it is twenty or thirty years too soon. The date of the publication of his earliest works would indicate that he could not have been born much before 1780. After receiving a good education, and becoming especially proficient in mathematics and chemistry, he settled at Brussels, where he appears to have spent the remaining years of his life, and wrote various works, which indicate extensive research and a lively and, perhaps, a rather ill-directed imagination. In 1834 he published a work entitled *Examen du Mosaisme et du Christianisme*, whose bold opinions were not considered as very orthodox. He had previously become attached to the study of Masonic antiquities, and in 1826 published a work in one volume, entitled *Esprit du dogme de la Franc-Maçonnerie: recherches sur son origine et celle de ses différents rites.* He subsequently still further developed his ideas on this subject, and published at Paris, in 1833, a much larger work, in three volumes, entitled, *La Maçonnerie, considerée comme le resultat des Religions Egyptienne, Juive et Chrétienne.* In this work he seeks to trace both Freemasonry and the Mosaic religion to the worship that was practised on the banks of the Nile in the time of the Pharaohs. Whatever may be thought of his theory, it must be confessed that he has collected a mass of learned and interesting facts that must be attractive to the Masonic scholar. From 1822 to 1829 Reghellini devoted his labors to editing the *Annales Chronologiques, Litteraires et Historiques de la Maçonnerie des Pays-Bas*, a work that contains much valuable information.

Outside of Masonry, the life of Reghellini is not well known. It is said that in 1848 he became implicated with the political troubles which broke out that year in Vienna, and, in consequence, experienced some trouble. His great age at the time precluded the likelihood that the statement is true. In his latter days he was reduced to great penury, and in August, 1855, was compelled to take refuge in the House of Mendicity at Brussels, where he shortly afterward died.

Regimental Lodge. An expression used by Dr. Oliver, in his *Jurisprudence*, to designate a Lodge attached to a regiment in the British army. The title is not recognized in the English Constitutions, where such a Lodge is always styled a *Military Lodge*, which see.

Register. A list of the officers and members of a Grand or Subordinate Lodge. The registers of Grand Lodges are generally published in this country annually, attached to their Proceedings. The custom of publishing annual registers of subordinate Lodges is almost exclusively confined to the Masonry of the Continent of Europe. Sometimes it is called a *Registry*.

Registrar, Grand. 1. An officer of the Grand Lodge of England, whose principal duty it is to take charge of the seal, and attach it, or cause it to be attached by the Grand Secretary, to documents issued by the Grand Lodge or Grand Master. Also to superintend the records of the Grand Lodge, and to take care that the several documents issued be in due form. (*Constitutions*, Rules 31, 32.) 2. An officer in a Grand Consistory of the Scottish Rite, whose duties are those of Grand Secretary.

Registration. The modern Constitutions of the Grand Lodge of England require that every Lodge must be particularly careful in registering the names of the brethren initiated therein, and also in making the returns of its members; as no person is entitled to partake of the general charity, unless his name be duly registered, and he shall have been at least five years a contributing member of a Lodge, except in the following cases, to which the limitation of five years is not meant to extend, viz., shipwreck, or capture at sea, loss by fire, or blindness or serious accident fully attested and proved. (Rule 234.) To prevent injury to individuals, by their being excluded the privileges of Masonry through the neglect of their Lodges in not registering their names, any brother so circumstanced, on producing sufficient proof that he has paid the full fees to his Lodge, including the register fee, shall be capable of enjoying the privileges of the Craft. But the offending Lodge shall be reported to the Board of General Purposes, and rigorously proceeded against for withholding moneys which are the property of the Grand Lodge. (Rule 237.)

An unregistered member in England is therefore equivalent, so far as the exercise of his rights is concerned, to an unaffiliated Mason. In America the same rule exists of registration in the Lodge books and an annual return of the same to the Grand Lodge, but the penalties for neglect or disobedience are neither so severe nor so well defined.

Registry. The roll or list of Lodges and their members under the obedience of a Grand Lodge. Such registries are in general published annually by the Grand Lodges of the United States at the end of their printed Proceedings.

Regius MS. See *Halliwell Manuscript.*

Regular. A Lodge working under the legal authority of a Warrant of Constitution is said to be regular. The word was first used in 1723, in the first edition of Anderson's *Constitutions*. In the eighth General Regulation published in that work it is said: "If any set or number of Masons shall take upon themselves to form a Lodge without the Grand Master's Warrant, the *regular Lodges* are not to countenance them." Ragon says (*Orthod. Maç.*, 72) that the word was first heard of in French Masonry in 1773, when an edict of the Grand Orient thus defined it: "A regular Lodge is a Lodge attached to the Grand Ori-

ent, and a regular Mason is a member of a regular Lodge."

Regulations. See *Old Regulations.*

Rehum. Called by Ezra the chancellor. He was probably a lieutenant-governor of the province of Judea, who, with Shimshai the scribe, wrote to Artaxerxes to prevail upon him to stop the building of the second Temple. His name is introduced into some of the high degrees that are connected in their ritual with the second Temple.

Reinhold, Karl Leonhard. A German philosopher, who was born at Vienna in 1758, and died in 1823. He was associated with Wieland, whose daughter he married, in the editorship of the *Deutschen Mercur.* He afterward became a professor of philosophy at Kiel, and published *Letters on the Philosophy of Kant.* He was much interested in the study of Freemasonry, and published, under the pseudonym of Decius, at Leipsic, in 1788, two lectures entitled *Die Hebraïschen Mysterien oder die älteste religiöse Freimaurerei*, i. e., The Hebrew Mysteries, or the Oldest Religious Freemasonry. The fundamental idea of this work is, that Moses derived his system from the Egyptian priesthood. Eichhorn attacked his theory in his *Universal Repository of Biblical Literature.* Reinhold delivered and published, in 1809, *An Address on the Design of Freemasonry*, and another in 1820, on the occasion of the reopening of a Lodge at Kiel. This was probably his last Masonic labor, as he died in 1823, at the age of sixty-five years. In 1828, a *Life* of him was published by his son, a professor of philosophy at Jena.

Reinstatement. See *Restoration.*

Rejection. Under the English Constitutions three black balls must exclude a candidate; but the by-laws of a Lodge may enact that one or two shall do so. (Rule 190.) In America one black ball will reject a candidate for initiation. If a candidate be rejected, he can apply in no other Lodge for admission. If admitted at all, it must be in the Lodge where he first applied. But the time when a new application may be made never having been determined by the general or common law of Masonry, the rule has been left to the special enactment of Grand Lodges, some of which have placed it at six months, and some at from one to two years. Where the Constitution of a Grand Lodge is silent on the subject, it is held that a new application has never been specified, so that it is held that a rejected candidate may apply for a reconsideration of his case at any time. The unfavorable report of the committee to whom the letter was referred, or the withdrawal of the letter by the candidate or his friends, is considered equivalent to a rejection. (See *Unanimous Consent.*)

Rejoicing. The initiation of the Ancient Mysteries, like that of the Third Degree of Masonry, began in sorrow and terminated in rejoicing. The sorrow was for the death of the hero-god, which was represented in the sacred rites, and the rejoicing was for his resuscitation to eternal life. "Thrice happy," says Sophocles, "are those who descend to the shades below when they have beheld these rites of initiation." The lesson there taught was, says Pindar, the Divine origin of life, and hence the rejoicing at the discovery of this eternal truth.

Relief. One of the three principal tenets of a Mason's profession, and thus defined in the lecture of the First Degree.

To relieve the distressed is a duty incumbent on all men, but particularly on Masons, who are linked together by an indissoluble chain of sincere affection. To soothe the unhappy, to sympathize with their misfortunes, to compassionate their miseries, and to restore peace to their troubled minds, is the great aim we have in view. On this basis we form our friendships and establish our connections.

Of the three tenets of a Mason's profession, which are Brotherly Love, Relief, and Truth, it may be said that *Truth* is the column of wisdom, whose rays penetrate and enlighten the inmost recesses of our Lodge; *Brotherly Love*, the column of strength, which binds us as one family in the indissoluble bond of fraternal affection; and *Relief*, the column of beauty, whose ornaments, more precious than the lilies and pomegranates that adorned the pillars of the porch, are the widow's tear of joy and the orphan's prayer of gratitude.

Relief, Board of. The liability to imposition on the charity of the Order, by the applications of impostors, has led to the establishment in the larger cities of America of Boards of Relief. These consist of representatives of all the Lodges, to whom all applications for temporary relief are referred. The members of the Board, by frequent consultations, are better enabled to distinguish the worthy from the unworthy, and to detect attempts at imposition. A similar organization, but under a different name, was long ago established by the Grand Lodge of England, for the distribution of the fund of benevolence. (See *Fund of Benevolence.*) In New Orleans, Louisiana, the Board of Relief, after twenty-five years of successful operation, was chartered in July, 1854, by the Grand Lodge as "Relief Lodge, No. 1," to be composed of the Masters and Wardens of all the Lodges who were united in the objects of the Board.

Religion of Masonry. There has been a needless expenditure of ingenuity and talent, by a large number of Masonic orators and essayists, in the endeavor to prove that Masonry is not religion. This has undoubtedly arisen from a well-intended but erroneous view that has been taken of the connection between religion and Masonry, and from a fear that if the complete disseverance of the two was not made manifest, the opponents of Masonry would be enabled successfully to establish a theory which they have been fond of advancing, that the Masons were disposed to substitute the teachings of their Order for the truths of Christianity. Now I have never for a moment believed that any such unwarrantable assumption, as that Masonry is intended to be a substitute for Christianity, could ever obtain admission into any well-regulated mind,

and, therefore, I am not disposed to yield, on the subject of the religious character of Masonry, quite so much as has been yielded by more timid brethren. On the contrary, I contend, without any sort of hesitation, that Masonry is, in every sense of the word, except one, and that its least philosophical, an eminently religious institution—that it is indebted solely to the religious element which it contains for its origin and for its continued existence, and that without this religious element it would scarcely be worthy of cultivation by the wise and good. But, that I may be truly understood, it will be well first to agree upon the true definition of religion. There is nothing more illogical than to reason upon undefined terms. Webster has given four distinct definitions of religion:

1. Religion, in a comprehensive sense, includes, he says, a belief in the being and perfections of God—in the revelation of his will to man—in man's obligation to obey his commands—in a state of reward and punishment, and in man's accountableness to God; and also true godliness or piety of life, with the practise of all moral duties.

2. His second definition is, that religion, as distinct from theology, is godliness or real piety in practise, consisting in the performance of all known duties to God and our fellow-men, in obedience to Divine command, or from love to God and his law.

3. Again, he says that religion, as distinct from virtue or morality, consists in the performance of the duties we owe directly to God, from a principle of obedience to his will.

4. And lastly, he defines religion to be any system of faith or worship; and in this sense, he says, religion comprehends the belief and worship of Pagans and Mohammedans as well as of Christians—any religion consisting in the belief of a superior power, or powers, governing the world, and in the worship of such power or powers. And it is in this sense that we speak of the Turkish religion, or the Jewish religion, as well as of the Christian.

Now, it is plain that, in either of the first three senses in which we may take the word religion (and they do not very materially differ from each other), Masonry may rightfully claim to be called a religious institution. Closely and accurately examined, it will be found to answer to any one of the requirements of either of these three definitions. So much does it "include a belief in the being and perfections of God," that the public profession of such a faith is essentially necessary to gain admission into the Order. No disbeliever in the existence of a God can be made a Mason. The "revelation of his will to man" is technically called the "spiritual, moral, and Masonic trestle-board" of every Mason, according to the rules and designs of which he is to erect the spiritual edifice of his eternal life. A "state of reward and punishment" is necessarily included in the very idea of an obligation, which, without the belief in such a state, could be of no binding force or efficacy. And "true godliness or piety of life" is inculcated as the invariable duty of every Mason, from the inception of the first to the end of the very last degree that he takes. So, again, in reference to the second and third definitions, all this practical piety and performance of the duties we owe to God and to our fellow men arise from and are founded on a principle of obedience to the Divine will. Else whence, or from what other will, could they have arisen? It is the voice of the G. A. O. T. U. symbolized to us in every ceremony of our ritual and from every portion of the furniture of our Lodge, that speaks to the true Mason, commanding him to fear God and to love the brethren. It is idle to say that the Mason does good simply in obedience to the statutes of the Order. These very statutes owe their sanction to the Masonic idea of the nature and perfections of God, which idea has come down to us from the earliest history of the Institution, and the promulgation of which idea was the very object and design of its origin.

But it must be confessed that the fourth definition does not appear to be strictly applicable to Masonry. It has no pretension to assume a place among the religions of the world as a sectarian "system of faith and worship," in the sense in which we distinguish Christianity from Judaism, or Judaism from Mohammedanism. In this meaning of the word we do not and can not speak of the Masonic religion, nor say of a man that he is not a Christian, but a Mason. Here it is that the opponents of Freemasonry have assumed mistaken ground, in confounding the idea of a religious institution with that of the Christian religion as a peculiar form of worship, and in supposing, because Masonry teaches religious truth, that it is offered as a substitute for Christian truth and Christian obligation. Its warmest and most enlightened friends have never advanced nor supported such a claim. Freemasonry is not Christianity, nor a substitute for it. It is not intended to supersede it nor any other form of worship or system of faith. It does not meddle with sectarian creeds or doctrines, but teaches fundamental religious truth—not enough to do away with the necessity of the Christian scheme of salvation, but more than enough to show, to demonstrate, that it is, in every philosophical sense of the word, a religious institution, and one, too, in which the true Christian Mason will find, if he earnestly seeks for them, abundant types and shadows of his own exalted and divinely inspired faith.

The tendency of all true Masonry is toward religion. If it make any progress, its progress is to that holy end. Look at its ancient landmarks, its sublime ceremonies, its profound symbols and allegories—all inculcating religious doctrine, commanding religious observance, and teaching religious truth, and who can deny that it is eminently a religious institution?

But, besides, Masonry is, in all its forms, thoroughly tinctured with a true devotional spirit. We open and close our Lodges with prayer; we invoke the blessing of the Most

High upon all our labors; we demand of our neophytes a profession of trusting belief in the existence and the superintending care of God; and we teach them to bow with humility and reverence at his awful name, while his holy law is widely opened upon our altars. Freemasonry is thus identified with religion; and although a man may be eminently religious without being a Mason, it is impossible that a Mason can be "true and trusty" to his Order unless he is a respecter of religion and an observer of religious principle.

But the religion of Masonry is not sectarian. It admits men of every creed within its hospitable bosom, rejecting none and approving none for his peculiar faith. It is not Judaism, though there is nothing in it to offend a Jew; it is not Christianity, but there is nothing in it repugnant to the faith of a Christian. Its religion is that general one of nature and primitive revelation—handed down to us from some ancient and patriarchal priesthood—in which all men may agree and in which no men can differ. It inculcates the practise of virtue, but it supplies no scheme of redemption for sin. It points its disciples to the path of righteousness, but it does not claim to be "the way, the truth, and the life." In so far, therefore, it cannot become a substitute for Christianity, but its tendency is thitherward; and, as the handmaid of religion, it may, and often does, act as the porch that introduces its votaries into the temple of Divine truth.

Masonry, then, is, indeed, a religious institution; and on this ground mainly, if not alone, should the religious Mason defend it.

Religious Qualifications. See *Qualifications*.

Removal of Lodges. On January 25, 1738, the Grand Lodge of England adopted a regulation that no Lodge should be removed without the Master's knowledge; that no motion for removing it should be made in his absence; and that if he was opposed to the removal, it should not be removed unless two-thirds of the members present voted in the affirmative. (*Constitutions*, 1738, p. 157.) But as this rule was adopted subsequent to the General Regulations of 1722, it is not obligatory as a law of Masonry at present. The Grand Lodges of England and of New York have substantially the same rule. But unless there be a local regulation in the Constitution of any particular Grand Lodge to that effect, there would seem to be no principle of Masonic law set forth in the Ancient Landmarks or Regulations which forbids a Lodge, upon the mere vote of the majority, from removing from one house to another in the same town or city; and unless the Grand Lodge of any particular jurisdiction has adopted a regulation forbidding the removal of a Lodge from one house to another without its consent, there is no law in Masonry of universal force which would prohibit such a removal at the mere option of the Lodge.

This refers, of course, only to the removal from one house to another; but as the town or village in which the Lodge is situated is designated in its Warrant of Constitution, no such removal can be made except with the consent of the Grand Lodge, or, during the recess of that body, by the Dispensation of the Grand Master, to be subsequently confirmed by the Grand Lodge.

Renouncing Masons. During the anti-Masonic excitement in the United States, which began in 1828, and lasted for a few years, many Masons left the Order, actuated by various motives (seldom good ones), and attached themselves to the anti-Masonic party. It is not singular that these deserters, who called themselves "Renouncing Masons," were the bitterest in their hatred and the loudest in their vituperations of the Order. But, as may be seen in the article *Indelibility*, a renunciation of the name cannot absolve anyone from the obligations of a Mason.

Repeal. As a Lodge cannot enact a new by-law without the consent of the Grand Lodge, neither can it repeal an old one without the same consent; nor can anything done at a stated meeting be repealed at a subsequent extra or emergent one.

Report of a Committee. When a committee, to which a subject had been referred, has completed its investigation and come to an opinion, it directs its chairman, or some other member, to prepare an expression of its views, to be submitted to the Lodge. The paper containing this expression of views is called its report, which may be framed in three different forms: It may contain only an expression of opinion on the subject which had been referred; or it may contain, in addition to this, an express resolution or series of resolutions, the adoption of which by the assembly is recommended; or, lastly, it may contain one or more resolutions, without any preliminary expression of opinion.

The report, when prepared, is read to the members of the committee, and, if it meets with their final sanction, the chairman, or one of the members, is directed to present it to the Lodge.

The reading of the report is its reception, and the next question will be on its adoption. If it contains a recommendation of resolutions, the adoption of the report will be equivalent to an adoption of the resolutions, but the report may, on the question of adoption, be otherwise disposed of by being laid on the table, postponed, or recommitted. (See the subject fully discussed in Dr. Mackey's treatise on *Parliamentary Law as applied to the Government of Masonic Bodies*, ch. xxxi.)

Reportorial Corps. A name recently given in the United States to that useful and intelligent body of Masons who write, in their respective Grand Lodges, the reports on Foreign Correspondence. Through the exertions of Dr. Corson, the chairman of the Committee of Foreign Correspondence of New Jersey, a convention of this body was held at Baltimore in 1871, during the session of the General Grand Chapter, and measures were then taken to establish a triennial convention. Such a

convention would assume no legislative powers, but would simply meet for the intercommunication of ideas and the interchange of fraternal greetings.

Representative of a Grand Lodge. A brother appointed by one Grand Lodge to represent its interest in another. The representative is generally, although not necessarily, a member of the Grand Lodge to whom he is accredited, and receives his appointment on its nomination, but he wears the clothing of the Grand Lodge which he represents. He is required to attend the meetings of the Grand Lodge to which he is accredited, and to communicate to his constituents an abstract of the proceedings, and other matters of Masonic interest. But it is doubtful whether these duties are generally performed. The office of representative appears to be rather one of honor than of service. In the French system, a representative is called a "gage d'amitié."

Representatives of Lodges. In the General Regulations of 1721 it was enacted that "The Grand Lodge consists of and is formed by the Masters and Wardens of all the regular particular Lodges upon record"; and also that "The majority of every particular Lodge, when congregated, shall have the privilege of giving instructions to their Master and Wardens before the assembling of the Grand Chapter or Lodge, at the three quarterly communications hereafter mentioned and of the Annual Grand Lodge too; because their Master and Wardens are their Representatives and are supposed to speak their mind." (*Constitutions*, 1723, p. 61.) A few modern Grand Lodges have disfranchised the Wardens also, and confined the representation to the Masters only. But this is evidently an innovation, having no color of authority in the Old Regulations. [E. L. H.]

Representative System. The system of appointing representatives of Grand Lodges originated some years ago with the Grand Lodge of New York. It at first met with much opposition, but has gradually gained favor, and there are now but few Grand Lodges in Europe or America that have not adopted it. Although the original plan intended by the founders of the system does not appear to have been effectually carried out in all its details, it has at least been successful as a means of more closely cementing the bonds of union between the bodies mutually represented.

Reprimand. A reproof formally communicated to the offender for some fault committed, and the lowest grade, above censure, of Masonic punishment. It can be inflicted only on charges made, and by a majority vote of the Lodge. It may be private or public. Private reprimand is generally communicated to the offender by a letter from the Master. Public reprimand is given orally in the Lodge and in the presence of the brethren. A reprimand does not affect the Masonic standing of the person reprimanded.

Reputation. In the technical language of Masonry, a man of good reputation is said to be one who is "under the tongue of good report"; and this constitutes one of the indispensable qualifications of a candidate for initiation.

Residence. It is the general usage in America, and may be considered as the Masonic law of custom, that the application of a candidate for initiation must be made to the Lodge nearest his place of residence. There is, however, no express law upon this subject either in the ancient landmarks or the Old Constitutions, and its positive sanction as a law in any jurisdiction must be found in the local enactments of the Grand Lodge of that jurisdiction. Still there can be no doubt that expediency and justice to the Order make such a regulation necessary, and accordingly many Grand Lodges have incorporated such a regulation in their Constitutions; and of course, whenever this has been done, it becomes a positive law in that jurisdiction.

It has also been contended by some American Masonic jurists that a non-resident of a State is not entitled, on a temporary visit to that State, to apply for initiation. There is, however, no landmark nor written law in the ancient Constitutions which forbids the initiation of non-residents. Still, as there can be no question that the conferring of the degrees of Masonry on a stranger is always inexpedient, and frequently productive of injury and injustice, by foisting on the Lodges near the candidate's residence unworthy and unacceptable persons, there has been a very general disposition among the Grand Lodges of this country to discountenance the initiation of non-residents. Many of them have adopted a specific regulation to this effect, and in all jurisdictions where this has been done, the law becomes imperative; for, as the landmarks are entirely silent on the subject, the local regulation is left to the discretion of each jurisdiction. But no such rule has ever existed among European Lodges.

Resignation of Membership. The spirit of the law of Masonry does not recognize the right of any member of a Lodge to resign his membership, unless it be for the purpose of uniting with another Lodge. This mode of resignation is called a demission. (See *Demit.*)

Resignation of Office. Every officer of a Lodge, or rather Masonic organization, being required at the time of his installation into office to enter into an obligation that he will perform the duties of that office for a specified time and until his successor is installed, it has been repeatedly held by the Masonic jurists of this country that an officer once elected and installed cannot resign his office; and this may be considered as a well-established law of American Masonry.

Resolution. In parliamentary law, a proposition, when first presented, is called a motion; if adopted, it becomes a resolution. Many Grand Lodges adopt, from time to time, in addition to the provisions of their Constitution, certain resolutions on important subjects, which, giving them an apparently

greater weight of authority than ordinary enactments, are frequently appended to their Constitution, or their transaction, under the imposing title of "Standing Regulations." But this weight of authority is only apparent. These standing resolutions having been adopted, like all other resolutions, by a mere majority vote, are subject, like them, to be repealed or rescinded by the same vote.

Respectable. A title given by the French, as *Worshipful* is by the English, to a Lodge. Thus, *La Respectable Loge de la Candeur* is equivalent to "The Worshipful Lodge of Candor." It is generally abbreviated as R.·. L.·. or R.·. ☐.·.

Response. In the liturgical services of the church an answer made by the people speaking alternately with the clergyman. In the ceremonial observances of Freemasonry there are many responses, the Master and the brethren taking alternate parts, especially in the funeral service as laid down first by Preston, and now very generally adopted. In all Masonic prayers the proper response, never to be omitted, is, "So mote it be."

Restoration. The restoration, or, as it is also called, the reinstatement of a Mason who had been excluded, suspended, or expelled, may be the voluntary act of the Lodge, or that of the Grand Lodge on appeal, when the sentence of the Lodge has been reversed on account of illegality in the trial, or injustice, or undue severity in the sentence. It may also, as in the instance of definite suspension, be the result of the termination of the period of suspension, when the suspended member is, *ipso facto*, restored without any further action of the Lodge.

The restoration from indefinite suspension must be equivalent to a reinstatement in membership, because the suspension being removed, the offender is at once invested with the rights and privileges of which he had never been divested, but only temporarily deprived.

But restoration from expulsion may be either to membership in the Lodge or simply to the privileges of the Order.

It may also be *ex gratia*, or an act of mercy, the past offense being condoned; or *ex debito justitiæ*, by a reversal of the sentence for illegality of trial or injustice in the verdict.

The restoration *ex gratia* may be either by the Lodge or the Grand Lodge on appeal. If by the Lodge, it may be to membership, or only to good standing in the Order. But if by the Grand Lodge, the restoration can only be to the rights and privileges of the Order. The Mason having been justly and legally expelled from the Lodge, the Grand Lodge possesses no prerogative by which it could enforce a Lodge to admit one legally expelled any more than it could a profane who had never been initiated.

But if the restoration be *ex debito justitiæ*, as an act of justice, because the trial or verdict had been illegal, then the brother, never having been lawfully expelled from the Lodge or the Order, but being at the very time of his appeal a member of the Lodge, unjustly or illegally deprived of his rights, the restoration in this case by the Grand Lodge must be to membership in the Lodge. Any other course, such as to restore him to the Order but not to membership, would be manifestly unjust. The Grand Lodge having reversed the trial and sentence of the subordinate Lodge, that trial and sentence become null and void, and the Mason who had been unjustly expelled is at once restored to his original status. (See this subject fully discussed in Dr. Mackey's *Text Book of Masonic Jurisprudence*, Book VI., chap. iii.)

Resurrection. The doctrine of a resurrection to a future and eternal life constitutes an indispensable portion of the religious faith of Masonry. It is not authoritatively inculcated as a point of dogmatic creed, but is impressively taught by the symbolism of the Third Degree. This dogma has existed among almost all nations from a very early period. The Egyptians, in their mysteries, taught a final resurrection of the soul. Although the Jews, in escaping from their Egyptian thraldom, did not carry this doctrine with them into the desert—for it formed no part of the Mosaic theology—yet they subsequently, after the captivity, borrowed it from the Zoroastrians. The Brahmans and Buddhists of the East, the Etruscans of the South, and the Druids and the Scandinavian Skalds of the West, nursed the faith of a resurrection to future life. The Greeks and the Romans subscribed to it; and it was one of the great objects of their mysteries to teach it. It is, as we all know, an essential part of the Christian faith, and was exemplified, in his own resurrection, by Christ to his followers. In Freemasonry, a particular degree, the Master's, has been appropriated to teach it by an impressive symbolism. "Thus," says Hutchinson (*Spirit of Masonry*, p. 164), "our Order is a positive contradiction to Judaic blindness and infidelity, and testifies our faith concerning the resurrection of the body."

We may deny that there has been a regular descent of Freemasonry, as a secret organization, from the mystical association of the Eleusinians, the Samothracians, or the Dionysians. No one, however, who carefully examines the mode in which the resurrection or restoration to life was taught by a symbol and a ceremony in the Ancient Mysteries, and how the same dogma is now taught in the Masonic initiation, can, without absolutely rejecting the evident concatenation of circumstances which lies patent before him, refuse his assent to the proposition that the latter was derived from the former. The resemblance between the Dionysiac legend, for instance, and the Hiramic, cannot have been purely accidental. The chain that connects them is easily found in the fact that the Pagan mysteries lasted until the fourth century of the Christian era, and, as the fathers of the church lamented, exercised an influence over the secret societies of the Middle Ages.

Returns of Lodges. Every subordinate Lodge is required to make annually to the

Grand Lodge a statement of the names of its members, and the number of admissions, demissions, and expulsions or rejections that have taken place within the year. This statement is called a *return*. A neglect to make the annual return causes a forfeiture of the right of representation in the Grand Lodge. The sum due by the Lodge is based on the return, as a tax is levied for each member and each initiation. The Grand Lodge is also, by this means, made acquainted with the state of its subordinates and the condition of the Order in its jurisdiction.

Reuben. The eldest son of Jacob. Among the Royal Arch banners, that of Reuben is purple, and bears a man as the device. It is appropriated to the Grand Master of the Second Veil.

Revelation. The following is an extract from Mackenzie's *Royal Masonic Cyclopædia* upon this subject: "With infinite learning and patience the author of *The Book of God*, who preserves strict anonymity, has endeavoured to show that the work (Apocalypse) was originally revealed to a primæval John, otherwise Oannes, and identical with the first messenger of God to man. This theory is sufficiently remarkable to be mentioned here. The messengers, twelve in number, are supposed by the author to appear at intervals of 600 years. Thus: 1, Adam, A. M. 3000; 2, Enoch, A. M. 3600; 3, Fohi, A. M. 4200; 4, Brigoo, A. M. 4800; 5, Zaratusht, A. M. 5400; 6, Thoth, A. M. 6000; 7, Amosis or Moses, A. M. 6600; 8, Laotseu, A. M. 7200; 9, Jesus, A. M. 7800; 10, Mohammed, A. M. 8400; 11, Chengiz-Khan, A. M. 9000; and, 12, the twelfth messenger yet to be revealed, A. M. 9600. With the aid of this theory, the whole history of the world, down to our own days, is shown to be foretold in the Apocalypse, and although it is difficult to agree with the accomplished writer's conclusions, supported by him with an array of learning and a sincere belief in what is stated, no one with any taste for these studies should be without this wonderful series of books. The same author has published, in two volumes, a revised edition of the *Book of Enoch*, with a commentary, and he promises to continue, and, if possible, complete his design."

Revelations of Masonry. See *Expositions*.

Revels, Master of the. An officer attached to the royal or other eminent household, whose function it was to preside when the members and guests were at refreshment, physical and intellectual, to have charge of the amusements of the court or of the nobleman to whose house he was attached during the twelve Christmas holidays. In Masonic language, the Junior Warden.

Reverend. A title sometimes given to the chaplain of a Masonic body.

Reverential Sign. The second sign in the English Royal Arch system, and thus explained. We are taught by the reverential sign to bend with submission and resignation beneath the chastening hand of the Almighty, and at the same time to engraft his law in our hearts. This expressive form, in which the Father of the human race first presented himself before the face of the Most High, to receive the denunciation and terrible judgment, was adopted by our Grand Master Moses, who, when the Lord appeared to him in the burning bush on Mount Horeb, covered his face from the brightness of the Divine presence.

Revestiary. The wardrobe, or place for keeping sacred vestments. Distinctive costumes in public worship formed a part not only of the Jewish, but of almost all the ancient religions. The revestiary was common to them all. The Master of the Wardrobe became a necessity.

Revival. The occurrences which took place in the city of London, in the year 1717, when that important body, which has since been known as the Grand Lodge of England, was organized, have been always known in Masonic history as the "Revival of Masonry." Anderson, in the first edition of the *Constitutions*, published in 1723 (p. 47), speaks of the freeborn British nations having revived the drooping Lodges of London; but he makes no other reference to the transaction. In his second edition, published in 1738, he is more diffuse, and the account there given is the only authority we possess of the organization made in 1717: Preston and all subsequent writers have of course derived their authority from Anderson. The transactions are thus detailed by Preston (*Illust.*, ed. 1792, p. 246), whose account is preferred, as containing in a more succinct form all that Anderson has more profusely detailed.

"On the accession of George I., the Masons in London and its environs, finding themselves deprived of Sir Christopher Wren and their annual meetings discontinued, resolved to cement themselves under a new Grand Master, and to revive the communications and annual festivals of the Society. With this view, the Lodges at the Goose and Gridiron, in St. Paul's Church-Yard; the Crown, in Parker's Lane, near Drury Lane; the Apple-Tree Tavern, in Charles Street, Covent Garden; and the Rummer and Grapes Tavern, in Channel Row, Westminster, the only four Lodges in being in the South of England at that time, with some other old brethren, met at the Apple-Tree Tavern, above mentioned, in February, 1717; and, having voted the oldest Master Mason then present into the chair, constituted themselves a Grand Lodge, *pro tempore*, in due form. At this meeting it was resolved to revive the Quarterly Communications of the Fraternity, and to hold the next annual assembly and feast on the 24th of June at the Goose and Gridiron, in St. Paul's Church-Yard, (in compliment to the oldest Lodge, which then met there,) for the purpose of electing a Grand Master among themselves, till they should have the

honor of a noble brother at their head. Accordingly, on St. John the Baptist's day, 1717, in the third year of the reign of King George I., the assembly and feast were held at the said house; when the oldest Master Mason and the Master of a Lodge having taken the chair, a list of proper candidates for the office of Grand Master was produced; and the names being separately proposed, the brethren, by a great majority of hands, elected Mr. Anthony Sayer Grand Master of Masons for the ensuing year; who was forthwith invested by the said oldest Master, installed by the Master of the oldest Lodge, and duly congratulated by the assembly, who paid him homage. The Grand Master then entered on the duties of his office, appointed his Wardens, and commanded the brethren of the four Lodges to meet him and his Wardens quarterly in communication; enjoining them at the same time to recommend to all the Fraternity a punctual attendance on the next annual assembly and feast."

Recently, this claim, that Masonry was not for the first time organized, but only revived in 1717, has been attacked by some of those modern iconoclasts who refuse credence to anything traditional, or even to any record which is not supported by other contemporary authority. Chief among these is Bro. W. P. Buchan, of England, who, in his numerous articles in the *London Freemason* (1871 and 1872), has attacked the antiquity of Freemasonry, and refuses to give it an existence anterior to the year 1717. His exact theory is that "our system of degrees, words, grips, signs, etc., was not in existence until about A. D. 1717." He admits, however, that certain of the "elements or groundwork" of the degrees existed before that year, but not confined to the Masons, being common to all the gilds. He thinks that the present system was indebted to the inventive genius of Anderson and Desaguliers. And he supposes that it was simply "a reconstruction of an ancient society, viz., of some form of old Pagan philosophy." Hence, he contends that it was not a "revival," but only a "renaissance," and he explains his meaning in the following language:

"Before the eighteenth century we had a renaissance of Pagan architecture; then, to follow suit, in the eighteenth century we had a renaissance in a new dress of Pagan mysticism; but for neither are we indebted to the Operative Masons, although the Operative Masons were made use of in both cases." (*London Freemason*, September 23, 1871.)

Buchan's theory has been attacked by Bros. William J. Hughan and Chalmers I. Paton. That he is right in his theory, that the three degrees of Master, Fellow-Craft, and Apprentice were unknown to the Masons of the seventeenth century, and that these classes existed only as gradations of rank, will be very generally admitted. But there is unquestionable evidence that the modes of recognition, the method of government, the legends, and much of the ceremonial of initiation, were in existence among the Operative Masons of the Middle Ages, and were transmitted to the Speculative Masons of the eighteenth century. The work of Anderson, of Desaguliers, and their contemporaries, was to improve and to enlarge, but not to invent. The Masonic system of the present day has been the result of a slow but steady growth. Just as the lectures of Anderson, known to us from their publication in 1725, were subsequently modified and enlarged by the successive labors of Clare, of Dunckerley, of Preston, and of Hemming, did he and Desaguliers submit the simple ceremonial, which they found at the reorganization of the Grand Lodge in 1717, to a similar modification and enlargement.

Revoke. When a Dispensation is issued by a Grand Master for the organization of a Lodge, it is granted "to continue of force until the Grand Lodge shall grant a Warrant, or until the Dispensation is revoked by the Grand Master or the Grand Lodge." A Dispensation may therefore be revoked at any time by the authority which issued it, or by a higher authority. Charters are *arrested*, *forfeited*, or *declared null and void;* Dispensations are revoked.

Rhetoric. The art of embellishing language with the ornaments of construction, so as to enable the speaker to persuade or affect his hearers. It supposes and requires a proper acquaintance with the rest of the liberal arts; for the first step toward adorning a discourse is for the speaker to become thoroughly acquainted with its subject, and hence the ancient rule that the orator should be acquainted with all the arts and sciences. Its importance as a branch of liberal education is recommended to the Mason in the Fellow-Craft's Degree. It is one of the seven liberal arts and sciences, the second in order, and is described in the ancient Constitutions as "retoricke that teacheth a man to speake faire and in subtill termes." (*Harleian MS.*, No. 1942.)

Rhode Island. Masonry was introduced into Rhode Island in 1750 by the establishment of a Lodge at Newport, the Charter for which had been granted by the St. John's Grand Lodge of Boston on December 27, 1749. The same Grand Lodge established a second Lodge at Providence on January 18, 1757. On April 6, 1791, these two Lodges organized a Grand Lodge at Providence, Christopher Champlin being elected the first Grand Master. This is the first instance known in Masonic history of the organization of a Grand Lodge by only two subordinates. The act was irregular, and the precedent has never subsequently been followed. It was not until 1799 that the new Grand Lodge granted its first Charter for the establishment of a third Lodge at Warren. The Grand Chapter was organized in March, 1798, and the Grand Council in October, 1860. The Grand Commandery forms a part of a common body known as the Grand Commandery of Massachusetts and Rhode Island. It was

formed in 1805, and the celebrated Thomas Smith Webb was its first presiding officer.

Rhodes. An island in the Mediterranean Sea, which, although nominally under the government of the Emperor of Constantinople, was in 1308 in the possession of Saracen pirates. In that year, Fulke de Villaret, Grand Master of the Knights Hospitalers, having landed with a large force, drove out the Saracens and took possession of the island, which became the seat of the Order, who removed to it from Cyprus and continued to occupy it until it was retaken by the Saracens in 1522, when the knights were transferred to the island of Malta. Their residence for over two hundred years at Rhodes caused them sometimes to receive the title of the Knights of Rhodes.

Rhodes, Knight of. See *Knight of Rhodes.*

Ribbon. The use of a ribbon, with the official jewel suspended and attached to a buttonhole instead of the collar, recently adopted by a few American Lodges, is a violation of the ancient customs of the Order. The collar cut in a triangular shape, with the jewel suspended from the apex, dates from the earliest time of the revival, and is perhaps as old as the apron itself. (See *Collar.*)

Ridel, Cornelius Johann Rudolph. Born at Hamburg, May 25, 1759, and died at Weimar, January 16, 1821. He was an active and learned Mason, and for many years the Master of the Lodge Amalia at Weimar. In 1817, he published in four volumes an elaborate and valuable work entitled *Versuch eines Alphabetischen Verzeichnisses, u. s. w.*, i. e., "An essay toward an Alphabetical Catalogue of important events, for the knowledge and history of Freemasonry, and especially for a critical examination of the origin and growth of the various rituals and systems from 1717 to 1817."

Right Angle. A right angle is the meeting of two lines in an angle of ninety degrees, or the fourth part of a circle. Each of its lines is perpendicular to the other; and as the perpendicular line is a symbol of uprightness of conduct, the right angle has been adopted by Masons as an emblem of virtue. Such was also its signification among the Pythagoreans. The right angle is represented in the Lodges by the square, as the horizontal is by the level, and the perpendicular by the plumb.

Right Eminent. An epithet prefixed to the title of the Deputy Grand Master of the Grand Encampment of Knights Templar of the United States, and to that of the Grand Commander of a State Grand Commandery.

Right Excellent. The epithet prefixed to the title of all superior officers of a Grand Chapter of Royal Arch Masonry below the dignity of a Grand High Priest.

Right Hand. The right hand has in all ages been deemed an important symbol to represent the virtue of fidelity. Among the ancients, the right hand and fidelity to an obligation were almost deemed synonymous terms. Thus, among the Romans, the expression "fallere dextram," *to betray the right hand*, also signified *to violate faith;* and "jungere dextras," *to join right hands*, meant *to give a mutual pledge.* Among the Hebrews, ימין, *iamin*, the right hand, was derived from אמן, *aman*, to be faithful.

The practise of the ancients was conformable to these peculiarities of idiom. Among the Jews, to give the right hand was considered as a mark of friendship and fidelity. Thus St. Paul says, "when James, Cephas, and John, who seemed to be pillars, perceived the grace that was given unto me, they gave to me and Barnabas the *right hands of fellowship*, that we should go unto the heathen, and they unto the circumcision." (Gal. ii. 9.) The same expression, also, occurs in Maccabees. We meet, indeed, continually in the Scriptures with allusions to the right hand as an emblem of truth and fidelity. Thus in Psalm cxliv. it is said, "their right hand is a right hand of falsehood," that is to say, they lift up their right hand to swear to what is not true. This lifting up of the right hand was, in fact, the universal mode adopted among both Jews and Pagans in taking an oath. The custom is certainly as old as the days of Abraham, who said to the King of Salem, "I have lifted up my hand unto the Lord, the most high God, the possessor of heaven and earth, that I will not take anything that is thine." Sometimes among the Gentile nations, the right hand, in taking an oath, was laid upon the horns of the altar, and sometimes upon the hand of the person administering the obligation. But in all cases it was deemed necessary, to the validity and solemnity of the attestation, that the right hand should be employed.

Since the introduction of Christianity, the use of the right hand in contracting an oath has been continued, but instead of extending it to heaven, or seizing with it a horn of the altar, it is now directed to be placed upon the Holy Scriptures, which is the universal mode at this day in all Christian countries. The antiquity of this usage may be learned from the fact, that in the code of the Emperor Theodosius, adopted about the year 438, the placing of the right hand on the Gospels is alluded to; and in the code of Justinian (lib. ii., tit. 53, lex. i.), whose date is the year 529, the ceremony is distinctly laid down as a necessary part of the formality of the oath, in the words "tactis sacrosanctis Evangeliis"—the Holy Gospels being touched.

This constant use of the right hand in the most sacred attestations and solemn compacts, was either the cause or the consequence of its being deemed an emblem of fidelity. Dr. Potter (*Arch. Græc.*, p. 229) thinks it was the cause, and he supposes that the right hand was naturally used instead of the left, because it was more honorable, as being the instrument by which superiors give commands to those below them. Be this as it

may, it is well known that the custom existed universally, and that there are abundant allusions in the most ancient writers to the junction of right hands in making compacts.

The Romans had a goddess whose name was *Fides*, or Fidelity, whose temple was first consecrated by Numa. Her symbol was two right hands joined, or sometimes two human figures holding each other by the right hands, whence, in all agreements among the Greeks and Romans, it was usual for the parties to take each other by the right hand, in token of their intention to adhere to the compact.

By a strange error for so learned a man, Oliver mistakes the name of this goddess, and calls her Faith. "The spurious Freemasonry," he remarks, "had a goddess called Faith." No such thing. *Fides*, or, as Horace calls her, "incorrupta Fides," incorruptible Fidelity, is very different from the theological virtue of Faith.

The joining of the right hands was esteemed among the Persians and Parthians as conveying a most inviolable obligation of fidelity. Hence, when King Artabanus desired to hold a conference with his revolted subject, Asineus, who was in arms against him, he despatched a messenger to him with the request, who said to Asineus, "the king hath sent me to give you his right hand and security," that is, a promise of safety in going and coming. And when Asineus sent his brother Asileus to the proposed conference, the king met him and gave him his right hand, upon which Josephus (*Ant. Jud.*, lib. xviii., cap. ix.) remarks: "This is of the greatest force there with all these barbarians, and affords a firm security to those who hold intercourse with them; for none of them will deceive, when once they have given you their right hands, nor will any one doubt of their fidelity, when that is once given, even though they were before suspected of injustice."

Stephens (*Travels in Yucatan*, vol. ii., p. 474) gives the following account of the use of the right hand as a symbol among the Indian tribes:

"In the course of many years' residence on the frontiers including various journeyings among the tribes, I have had frequent occasion to remark the use of the right hand as a symbol; and it is frequently applied to the naked body after its preparation and decoration for sacred or festive dances. And the fact deserves further consideration from these preparations being generally made in the arcanum of the secret Lodge, or some other private place, and with all the skill of the adept's art. The mode of applying it in these cases is by smearing the hand of the operator with white or colored clay, and impressing it on the breast, the shoulder, or other part of the body. The idea is thus conveyed that a secret influence, a charm, a mystical power is given, arising from his sanctity, or his proficiency in the occult arts. This use of the hand is not confined to a single tribe or people. I have noticed it alike among the Dacotahs, the Winnebagoes, and other Western tribes, as among the numerous branches of the red race still located east of the Mississippi River, above the latitude of 42 degrees, who speak dialects of the Algonquin language."

It is thus apparent that the use of the right hand as a token of sincerity and a pledge of fidelity, is as ancient as it is universal; a fact which will account for the important station which it occupies among the symbols of Freemasonry.

Right Side. Among the Hebrews, as well as the Greeks and Romans, the right side was considered superior to the left; and as the right was the side of good, so was the left of bad omen. *Dexter*, or right, signified also propitious, and *sinister*, or left, unlucky. In the Scriptures we find frequent allusions to this superiority of the right. Jacob, for instance, called his youngest and favorite child, *Ben-jamin*, the son of his right hand, and Bathsheba, as the king's mother, was placed at the right hand of Solomon. (See *Left Side.*)

Right Worshipful. An epithet applied in most jurisdictions of the United States to all Grand Officers below the dignity of a Grand Master.

Ring, Luminous. See *Academy of Sublime Masters of the Luminous Ring.*

Ring, Masonic. The ring, as a symbol of the covenant entered into with the Order, as the wedding ring is the symbol of the covenant of marriage, is worn in some of the high degrees of Masonry. It is not used in Ancient Craft Masonry. In the Order of the Temple the "ring of profession," as it is called, is of gold, having on it the cross of the Order and the letters P. D. E. P., being the initials of "*Pro Deo et Patria.*" It is worn on the index finger of the right hand. The Inspectors-General of the Thirty-third Degree of the Ancient and Accepted Rite wear a ring on the little finger of the right hand. Inside is the motto of the Order, "DEUS MEUM QUE JUS." In the Fourteenth Degree of the same Rite a ring is worn, which is described as "a plain gold ring," having inside the motto, "*Virtus junxit, mors non separabit.*" It is worn in the Northern Jurisdiction on the fourth or ring finger of the left hand. In the Southern Jurisdiction it is worn on the same finger of the right hand.

The use of the ring as a symbol of a covenant may be traced very far back into antiquity. The Romans had a marriage ring, but according to Swinburne, the great canonist, it was of iron, with a jewel of adamant, "to signify the durance and perpetuity of the contract."

In reference to the rings worn in the high degrees of Masonry, it may be said that they partake of the double symbolism of power and affection. The ring, as a symbol of power and dignity, was worn in ancient times by kings and men of elevated rank and office. Thus Pharaoh bestowed

a ring upon Joseph as a mark or token of the power he had conferred upon him, for which reason the people bowed the knee to him. It is in this light that the ring is worn by the Inspectors of Scottish Masonry as representing the sovereigns of the Rite. But those who receive only the Fourteenth Degree, in the same Rite, wear the ring as a symbol of the covenant of affection and fidelity into which they have entered.

While on the subject of the ring as a symbol of Masonic meaning, it will not be irrelevant to refer to the magic ring of King Solomon, of which both the Jews and the Mohammedans have abundant traditions. The latter, indeed, have a book on magic rings, entitled *Scalcuthal*, in which they trace the ring of Solomon from Jared, the father of Enoch. It was by means of this ring, as a talisman of wisdom and power, that Solomon was, they say, enabled to perform those wonderful acts and accomplish those vast enterprises that have made his name so celebrated as the wisest monarch of the earth.

Rising Sun. The rising sun is represented by the Master, because as the sun by his rising opens and governs the day, so the Master is taught to open and govern his Lodge with equal regularity and precision.

Rite. The Latin word *ritus*, whence we get the English *rite*, signifies an approved usage or custom, or an external observance. Vossius derives it by metathesis from the Greek τριβειν, whence literally it signifies a trodden path, and, metaphorically, a long-followed custom. As a Masonic term its application is therefore apparent. It signifies a method of conferring Masonic light by a collection and distribution of degrees. It is, in other words, the method and order observed in the government of a Masonic system.

The original system of Speculative Masonry consisted of only the three Symbolic degrees, called, therefore, Ancient Craft Masonry. Such was the condition of Freemasonry at the time of what is called the revival in 1717. Hence, this was the original Rite or approved usage, and so it continued in England until the year 1813, when at the union of the two Grand Lodges the "Holy Royal Arch" was declared to be a part of the system; and thus the English Rite was made legitimately to consist of four degrees.

But on the Continent of Europe, the organization of new systems began at a much earlier period, and by the invention of what are known as the high degrees a multitude of Rites was established. All of these agreed in one important essential. They were built upon the three Symbolic degrees, which, in every instance, constituted the fundamental basis upon which they were erected. They were intended as an expansion and development of the Masonic ideas contained in these degrees. The Apprentice, Fellow-Craft, and Master's degrees were the porch through which every initiate was required to pass before he could gain entrance into the inner temple which had been erected by the founders of the Rite. They were the text, and the high degrees the commentary.

Hence arises the law, that whatever may be the constitution and teachings of any Rite as to the higher degrees peculiar to it, the three Symbolic degrees being common to all the Rites, a Master Mason, in any one of the Rites, may visit and labor in a Master's Lodge of every other Rite. It is only after that degree is passed that the exclusiveness of each Rite begins to operate.

There has been a multitude of these Rites. Some of them have lived only with their authors, and died when their parental energy in fostering them ceased to exert itself. Others have had a more permanent existence, and still continue to divide the Masonic family, furnishing, however, only diverse methods of attaining to the same great end, the acquisition of Divine Truth by Masonic light. Ragon, in his *Tuilier Général*, supplies us with the names of a hundred and eight, under the different titles of Rites, Orders, and Academies. But many of these are unmasonic, being merely of a political, social, or literary character. The following catalogue embraces the most important of those which have hitherto or still continue to arrest the attention of the Masonic student.

1. York Rite.
2. Ancient and Accepted Scottish Rite.
3. French or Modern Rite.
4. American Rite.
5. Philosophic Scottish Rite.
6. Primitive Scottish Rite.
7. Reformed Rite.
8. Reformed Helvetic Rite.
9. Fessler's Rite.
10. Schröder's Rite.
11. Rite of the Grand Lodge of the Three Globes.
12. Rite of the Elect of Truth.
13. Rite of the Vielle Bru.
14. Rite of the Chapter of Clermont.
15. Pernetty's Rite.
16. Rite of the Blazing Star.
17. Chastanier's Rite.
18. Rite of the Philalethes.
19. Primitive Rite of the Philadelphians.
20. Rite of Martinism.
21. Rite of Brother Henoch.
22. Rite of Mizraim.
23. Rite of Memphis.
24. Rite of Strict Observance.
25. Rite of Lax Observance.
26. Rite of African Architects.
27. Rite of Brothers of Asia.
28. Rite of Perfection.
29. Rite of Elected Cohens.
30. Rite of the Emperors of the East and West.
31. Primitive Rite of Narbonne.
32. Rite of the Order of the Temple.
33. Swedish Rite.
34. Rite of Swedenborg.
35. Rite of Zinnendorf.
36. Egyptian Rite of Cagliostro.
37. Rite of the Beneficent Knights of the Holy City.

These Rites are not here given in either the order of date or of importance. The distinct history of each will be found under its appropriate title.

Rite des Elus Coens, ou Prêtres. A system adopted in 1750, but which did not attain its full vigor until twenty-five years thereafter, when Lodges were opened in Paris, Marseilles, Bordeaux, and Toulouse. The devotees of Martinez Pasqualis, the founder, were called Martinistes, and were partly Hermetic and partly Swedenborgian in their teachings. Martinez was a religious man, and based his teachings partly on the Jewish Kabbala and partly on Hermetic supernaturalism. The grades were as follows: 1. Apprenti; 2. Compagnon; 3. Maître; 4. Grand Elu; 5. Apprenti Coen; 6. Compagnon Coen; 7. Maître Coen; 8. Grand Architecte; 9. Grand Commandeur.

Ritter. German for *knight*, as "Der Preussische Ritter," the Prussian Knight. The word is not, however, applied to a Knight Templar, who is more usually called "Tempelherr"; although, when spoken of as a *Knight of the Temple*, he would be styled *Ritter vom Tempel*.

Ritual. The mode of opening and closing a Lodge, of conferring the degrees, of installation, and other duties, constitute a system of ceremonies which are called the Ritual. Much of this ritual is esoteric, and, not being permitted to be committed to writing, is communicated only by oral instruction. In each Masonic jurisdiction it is required, by the superintending authority, that the ritual shall be the same; but it more or less differs in the different Rites and jurisdictions. But this does not affect the universality of Masonry. The ritual is only the external and extrinsic form. The doctrine of Freemasonry is everywhere the same. It is the body which is unchangeable—remaining always and everywhere the same. The ritual is but the outer garment which covers this body, which is subject to continual variation. It is right and desirable that the ritual should be made perfect, and everywhere alike. But if this be impossible, as it is, this at least will console us, that while the ceremonies, or ritual, have varied at different periods, and still vary in different countries, the science and philosophy, the symbolism and the religion, of Freemasonry continue, and will continue, to be the same wherever true Masonry is practised.

Robelot. Formerly an advocate of the parliament of Dijon, a distinguished French Mason, and the author of several Masonic discourses, especially of one delivered before the Mother Lodge of the Philosophic Scottish Rite, of which he was Grand Orator, December 8, 1808, at the reception of Askeri Khan, the Persian Ambassador, as a Master Mason. This address gave so much satisfaction to the Lodge, that it decreed a medal to M. Robelot, on one side of which was a bust of the Grand Master, and on the other an inscription which recounted the valuable services rendered to the society by M. Robelot as its Orator, and as a Masonic author. Robelot held the theory that Freemasonry owed its origin to the East, and was the invention of Zoroaster.

Robert I. Commonly called Robert Bruce. He was crowned King of Scotland in 1306, and died in 1329. After the turbulence of the early years of his reign had ceased, and peace had been restored, he devoted himself to the encouragement of architecture in his kingdom. His connection with Masonry, and especially with the high degrees, is thus given by Dr. Oliver (*Landm.*, ii., 12): "The only high degree to which an early date can be safely assigned is the Royal Order of H. R. D. M., founded by Robert Bruce in 1314. Its history in brief refers to the dissolution of the Order of the Temple. Some of those persecuted individuals took refuge in Scotland, and placed themselves under the protection of Robert Bruce, and assisted him at the battle of Bannockburn, which was fought on St. John's day, 1314. After this battle the Royal Order was founded; and from the fact of the Templars having contributed to the victory, and the subsequent grants to their Order by King Robert, for which they were formally excommunicated by the church, it has, by some persons, been identified with that ancient military Order. But there are sound reasons for believing that the two systems were unconnected with each other." Thory (*Act. Lat.*, i., 6), quoting from a manuscript ritual in the library of the Mother Lodge of the Philosophic Rite, gives the following statement: "Robert Bruce, King of Scotland, under the name of Robert I., created on the 24th June, after the battle of Bannockburn, the Order of St. Andrew of the Thistle, to which he afterwards united that of H. R. D., for the sake of the Scottish Masons who made a part of the thirty thousand men with whom he had fought an army of one hundred thousand English. He reserved forever to himself and his successors the title of Grand Master. He founded the Grand Lodge of the Royal Order of H. R. D. at Kilwinning, and died, covered with glory and honor, on the 9th July, 1329." Both of these statements or legends require for all their details authentication. (See *Royal Order of Scotland*.)

Roberts Manuscript. This is the first of those manuscripts the originals of which have not yet been recovered, and which are known to us only in a printed copy. The Roberts Manuscript, so called from the name of the printer, J. Roberts, was published by him at London, in 1722, under the title of *The Old Constitutions belonging to the Ancient and Honorable Society of Free and Accepted Masons. Taken from a Manuscript wrote above five hundred years since.* Of this work, which had passed out of the notice and knowledge of the Masonic world, Richard Spencer, of London, being in possession of a copy, published a second edition in 1871. On a collation of this work with the Harleian MS., it is evident that either both were derived

from one and the same older manuscript, or that one of them has been copied from the other; although, if this be the case, there has been much carelessness on the part of the transcriber. If the one was transcribed from the other, there is internal evidence that the Harleian is the older exemplar. The statement on the title-page of Roberts's book, that it was "taken from a manuscript wrote over five hundred years since," is contradicted by the simple fact that, like the Harleian MS., it contains the regulations adopted at the General Assembly held in 1663.

Robes. A proposition was made in the Grand Lodge of England, on April 8, 1778, that the Grand Master and his officers should be distinguished in future at all public meetings by robes. This measure, Preston says (*Illustrations*, ed. 1792, p. 332), was at first favorably received; but it was, on investigation, found to be so diametrically opposed to the original plan of the Institution, that it was very properly laid aside. In no jurisdiction are robes used in Symbolic Masonry. In many of the high degrees, however, they are employed. In the United States and in England they constitute an important part of the paraphernalia of a Royal Arch Chapter. (See *Royal Arch Robes*.)

Robin, Abbé Claude. A French littérateur, and curate of St. Pierre d'Angers. In 1776 he advanced his views on the origin of Freemasonry in a lecture before the Lodge of Nine Sisters at Paris. This he subsequently enlarged, and his interesting work was published at Paris and Amsterdam, in 1779, under the title of *Recherches sur les Initiations Anciennes et Modernes*. A German translation of it appeared in 1782, and an exhaustive review, or, rather, an extensive synopsis of it, was made by Chemin des Pontès in the first volume of his *Encyclopédie Maçonnique*. In this work the Abbé deduces from the ancient initiations in the Pagan Mysteries the orders of chivalry, whose branches, he says, produced the initiation of Freemasonry.

Robison, John. He was Professor of Natural Philosophy in the University of Edinburgh, and Secretary of the Royal Society in that city. He was born at Boghall, in Scotland, in 1739, and died in 1805. He was the author of a *Treatise on Mechanical Philosophy*, which possessed some merit; but he is better known in Masonic literature by his anti-Masonic labors. He published in 1797, at Edinburgh and London, a work entitled *Proofs of a Conspiracy against all the Religions and Governments of Europe, carried on in the Secret Meetings of the Freemasons, Illuminati, and Reading Societies, collected from Good Authorities*. In consequence of the anti-Jacobin sentiment of the people of Great Britain at that time, the work on its first appearance produced a great sensation. It was not, however, popular with all readers. A contemporary critic (*Month. Rev.*, xxv., 315) said of it, in a very unfavorable review: "On the present occasion, we acknowledge that we have felt something like regret that a lecturer on natural philosophy, of whom his country is so justly proud, should produce any work of literature by which his high character for knowledge and for judgment is liable to be at all depreciated." It was intended for a heavy blow against Masonry; the more heavy because the author himself was a Mason, having been initiated at Liege in early life, and for some time a working Mason. The work is chiefly devoted to a history of the introduction of Masonry on the Continent, and of its corruptions, and chiefly to a violent attack on the Illuminati. But while recommending that the Lodges in England should be suspended, he makes no charge of corruption against them, but admits the charities of the Order, and its respectability of character. There is much in the work on the history of Masonry on the Continent that is interesting, but many of his statements are untrue and his arguments illogical, nor was his crusade against the Institution followed by any practical results. The *Encyclopædia Britannica*, to which Robison had contributed many valuable articles on science, says of his *Proofs of a Conspiracy*, that "it betrays a degree of credulity extremely remarkable in a person used to calm reasoning and philosophical demonstration," giving as an example his belief in the story of an anonymous German writer, that the minister Turgot was the protector of a society that met at Baron d'Holbach's for the purpose of examining living children in order to discover the principle of vitality. What Robison has said of Masonry in the 531 pages of his book may be summed up in the following lines (p. 522) near its close: "While the Freemasonry of the continent was tricked up with all the frippery of stars and ribands, or was perverted to the most profligate and impious purposes, and the Lodges became seminaries of foppery, of sedition, and impiety, it has retained in Britain its original form, simple and unadorned, and the Lodges have remained the scenes of innocent merriment or meetings of charity and beneficence." So that, after all, his charges are not against Freemasonry in its original constitution, but against its corruption in a time of great political excitement.

Rockwell, William Spencer. A distinguished Mason of the United States, who was born at Albany, in New York, in 1804, and died in Maryland in 1865. He had been Grand Master of the Grand Lodge of Georgia, and at the time of his death was Lieutenant Grand Commander of the Supreme Council of the Ancient and Accepted Rite for the Southern Jurisdiction of the United States. He was a man of great learning, having a familiar acquaintance with many languages, both ancient and modern, and was well versed in the sciences. He was an able lawyer, and occupied a high position at the bar of Georgia, his adopted State. Archeology was his

favorite study. In 1848, he was induced by the great Egyptologist, George R. Gliddon, to direct his attention particularly to the study of Egyptian antiquities. Already well acquainted with the philosophy and science of Masonry, he applied his Egyptian studies to the interpretation of the Masonic symbols to an extent that led him to the formation of erroneous views. His investigations, however, and their results, were often interesting, if not always correct. Mr. Rockwell was the author of an *Ahiman Rezon* for the Grand Lodge of Georgia, published in 1859, which displays abundant evidences of his learning and research. He also contributed many valuable articles to various Masonic periodicals, and was one of the collaborators of Mackey's *Quarterly Review of Freemasonry*. Before his death he had translated Portal's *Treatise on Hebrew and Egyptian Symbols*, and had written an *Exposition of the Pillars of the Porch*, and an *Essay on the Fellow-Craft's Degree*. The manuscripts of these works, in a completed form, are in the hands of his friends, but have never been published.

Rod. The rod or staff is an emblem of power either inherent, as with a king, where it is called a scepter, or with an inferior officer, where it becomes a rod, verge, or staff. The Deacons, Stewards, and Marshal of a Lodge carry rods. The rods of the Deacons, who are the messengers of the Master and Wardens, as Mercury was of the gods, may be supposed to be derived from the caduceus, which was the insignia of that deity, and hence the Deacon's rod is often surmounted by a pine-cone. The Steward's rod is in imitation of the white staff borne by the Lord High Steward of the king's household. The Grand Treasurer also formerly bore a white staff like that of the Lord High Treasurer. The Marshal's baton is only an abbreviated or short rod. It is in matters of state the ensign of a Marshal of the army. The Duke of Norfolk, as hereditary Earl Marshal of England, bears two batons crossed in his arms. Mr. Thynne, the antiquary, says (*Antiq. Disc.*, ii., 113) that the rod "did in all ages, and yet doth amongst all nations and amongst all officers, signify correction and peace; for by correction follows peace, wherefore the verge or rod was the ensign of him which had authority to reform evil in war and in peace, and to see quiet and order observed amongst the people; for therefore beareth the king his sceptre. The church hath her pastoral staff; and other magistrates which have the administration of justice or correction, as have the judges of the law and the great officers of the prince's house, have also a verge or staff assigned to them." We thus readily see the origin of the official rods or staves used in Masonry.

Rod, Deacon's. The proper badge or ensign of office of a Deacon, which he should always carry when in the discharge of the duties of his office, is a blue rod surmounted by a pine-cone, in imitation of the caduceus, or rod of Mercury, who was the messenger of the gods as is the Deacon of the superior officers of the Lodge. In the beginning of this century *columns* were prescribed as the proper badges of these officers, and we find the fact so stated in Webb's *Monitor*, which was published in 1797, and in an edition of Preston's *Illustrations*, published at Portsmouth, New Hampshire, in the year 1804. In the installation of the Deacons, it is said "these columns, as badges of your office, I intrust to your care." A short time afterward, however, the columns were transferred to the Wardens as their appropriate badges, and then we find that in the hands of the Deacon they were replaced by the rods. Thus in Dalcho's *Ahiman Rezon*, the first edition of which was printed in 1807, the words of the charge are altered to "those *staves* the badges of your office." In the *Masons' Manual*, published in 1822, by the Lodge at Easton, Pennsylvania, the badges are said to be "wands," and in Cole's *Library* they are said to carry "rods." All the subsequent Monitors agree in assigning the *rods* to the Deacons as insignia of their office, while the *columns* are appropriated to the Wardens.

In Pennsylvania, however, as far back as 1778, "the proper pillars" were carried in procession by the Wardens, and "wands tipped with gold" were borne by the Deacons. This appears from the account of a procession in that year, which is appended to Smith's edition of the *Ahiman Rezon* of Pennsylvania. The rod or wand is now universally recognized in America and in England as the Deacon's badge of office.

Rod, Marshal's. See *Baton*.

Rod of Iron. The Master is charged in the ritual not to rule his Lodge with "a rod of iron," that is to say, not with cruelty or oppression. The expression is Scriptural. Thus in Psalm ii. 9, "Thou shalt break them with a rod of iron," and in Revelation ii. 27, "He shall rule them with a rod of iron."

Rod, Steward's. The badge or ensign of office of the Stewards of a Lodge, or of the Grand Stewards of a Grand Lodge, is a white rod or staff. It is an old custom. In the first formal account of a procession in the *Book of Constitutions*, on June 24, 1724, the Stewards are described as walking "two and two abreast with white rods." (*Constitutions*, 1738, p. 117.) This use of a white rod comes from the political usages of England, where the Steward of the king's household was appointed by the delivery of a staff, the breaking of which dissolved the office. Thus an old book quoted by Thynne says that in the reign of Edward IV., the creation of the Steward of the household "only consisteth by the king's delivering to him the household staffe, with these words, *Seneschall, tenez le bastone de notre Maison*." When the Lord High Steward presides over the House of Lords at the trial of a Peer, at the conclusion of the trial he breaks the white staff which thus terminates his office.

Rod, Treasurer's. See *Staff*.

Roessler, Carl. A German Masonic writer, who translated from French into German the work of Reghellini on Masonry in its relations to the Egyptian, Jewish, and Christian religions, and published it at Leipsic in 1834 and 1835, under the assumed name of R. S. Acerrellos. He was the author of some other less important Masonic works.

Roll. In the Prestonian ritual of the funeral service, it is directed that the Master, while the brethren are standing around the coffin, shall take "the sacred roll" in his hand, and, after an invocation, shall "put the ROLL into the chest." (*Illustrations*, ed. 1792, p. 123.) In the subsequent part of the ceremony, a procession being formed, consisting of the members of visiting Lodges and of the Lodge to which the deceased belonged, it is stated that all the Secretaries of the former Lodges carry rolls, while the Secretary of the latter has none, because, of course, it had been deposited by the Master in the coffin. From the use of the words "sacred roll," we presume that the rolls borne by the Secretaries in funeral processions are intended to represent the roll of the law, that being the form still used by the Jews for inscribing the Sacred Books.

Roman Colleges of Artificers. It was the German writers on the history of the Institution, such as Krause, Heldmann, and some others of less repute, who first discovered, or at least first announced to the world, the connection that existed between the Roman Colleges of Architects and the Society of Freemasons.

The theory of Krause on this subject is to be found principally in his well-known work entitled *Die drei ältesten Kunsterkunden*. He there advances the doctrine that Freemasonry as it now exists is indebted for all its characteristics, religious and social, political and professional, its interior organization, its modes of thought and action, and its very design and object, to the *Collegia Artificum* of the Romans, passing with but little characteristic changes through the *Corporationen von Baukünstlern*, or "Architectural Gilds," of the Middle Ages up to the English organization of the year 1717; so that he claims an almost absolute identity between the Roman Colleges of Numa, seven hundred years before Christ, and the Lodges of the nineteenth century. We need not, according to his view, go any farther back in history, nor look to any other series of events, nor trouble ourselves with any other influences for the origin and the character of Freemasonry.

This theory, which is perhaps the most popular one on the subject, requires careful examination; and in the prosecution of such an inquiry the first thing to be done will be to investigate, so far as authentic history affords us the means, the true character and condition of these Roman Colleges.

It is to Numa, the second king of Rome, that historians, following after Plutarch, ascribe the first organization of the Roman Colleges; although, as Newman reasonably conjectures, it is probable that similar organizations previously existed among the Alban population, and embraced the resident Tuscan artificers. But it is admitted that Numa gave to them that form which they always subsequently maintained.

Numa, on ascending the throne, found the citizens divided into various nationalities, derived from the Romans, the Sabines, and the inhabitants of neighboring smaller and weaker towns, who, by choice or by compulsion, had removed their residence to the banks of the Tiber. Hence resulted a disseverance of sentiment and feeling, and a constant tendency to disunion. Now the object of Numa was to obliterate these contending elements and to establish a perfect identity of national feeling, so that, to use the language of Plutarch, "the distribution of the people might become a harmonious mingling of all with all."

For this purpose he established one common religion, and divided the citizens into curiæ and tribes, each curia and tribe being composed of an admixture indifferently of Romans, Sabines, and the other denizens of Rome.

Directed by the same political sagacity, he distributed the artisans into various gilds or corporations, under the name of *Collegia*, or "Colleges." To each collegium was assigned the artisans of a particular profession, and each had its own regulations, both secular and religious. These colleges grew with the growth of the republic; and although Numa had originally established but nine, namely, the College of Musicians, of Goldsmiths, of Carpenters, of Dyers, of Shoemakers, of Tanners, of Smiths, of Potters, and a ninth composed of all artisans not embraced under either of the preceding heads, they were subsequently greatly increased in number. Eighty years before the Christian era they were, it is true, abolished, or sought to be abolished, by a decree of the Senate, who looked with jealousy on their political influence, but twenty years afterward they were revived, and new ones established by a law of the tribune Clodius, which repealed the Senatus Consultum. They continued to exist under the empire, were extended into the provinces, and even outlasted the decline and fall of the Roman power.

And now let us inquire into the form and organization of these Colleges, and, in so doing, trace the analogy between them and the Masonic Lodges, if any such analogy exists.

The first regulation, which was an indispensable one, was that no College could consist of less than three members. So indispensable was this rule that the expression *tres faciunt collegium*, "three make a college," became a maxim of the civil law. So rigid too was the application of this rule, that the body of Consuls, although calling each other

"colleagues," and possessing and exercising all collegiate rights, were, because they consisted only of two members, never legally recognized as a College. The reader will very readily be struck with the identity of this regulation of the Colleges and that of Freemasonry, which with equal rigor requires three Masons to constitute a Lodge. The College and the Lodge each demanded three members to make it legal. A greater number might give it more efficiency, but it could not render it more legitimate. This, then, is the first analogy between the Lodges of Freemasons and the Roman Colleges.

These Colleges had their appropriate officers, who very singularly were assimilated in stations and duties to the officers of a Masonic Lodge. Each College was presided over by a chief or president, whose title of *Magister* is exactly translated by the English word "Master." The next officers were the *Decuriones*. They were analogous to the Masonic "Wardens," for each *Decurio* presided over a section or division of the College, just as in the most ancient English and in the present continental ritual we find the Lodge divided into two sections or "columns," over each of which one of the Wardens presided, through whom the commands of the Master were extended to "the brethren of his column." There was also in the Colleges a *Scriba*, or "secretary," who recorded its proceedings; a *Thesaurensis*, or "treasurer," who had charge of the common chest; a *Tabularius*, or keeper of the archives, equivalent to the modern "Archivist"; and lastly, as these Colleges combined a peculiar religious worship with their operative labors, there was in each of them a *sacerdos*, or priest, who conducted the religious ceremonies, and was thus exactly equivalent to the "chaplain" of a Masonic Lodge. In all this we find another analogy between these ancient institutions and our Masonic bodies.

Another analogy will be found in the distribution or division of classes in the Roman Colleges. As the Masonic Lodges have their Master Masons, their Fellow-Crafts, and their Apprentices, so the Colleges had their *Seniores*, "Elders," or chief men of the trade, and their journeymen and apprentices. The members did not, it is true, like the Freemasons, call themselves "Brothers," because this term, first adopted in the gilds or corporations of the Middle Ages, is the offspring of a Christian sentiment; but, as Krause remarks, these Colleges were, in general, conducted after the pattern or model of a family; and hence the appellation of *brother* would now and then be found among the family appellations.

The partly religious character of the Roman Colleges of Artificers constitutes a very peculiar analogy between them and the Masonic Lodges. The history of these Colleges shows that an ecclesiastical character was bestowed upon them at the very time of their organization by Numa. Many of the workshops of these artificers were erected in the vicinity of temples, and their *curia*, or place of meeting, was generally in some way connected with a temple. The deity to whom such temple was consecrated was peculiarly worshiped by the members of the adjacent College, and became the patron god of their trade or art. In time, when the Pagan religion was abolished and the religious character of these Colleges was changed, the Pagan gods gave way, through the influences of the new religion, to Christian saints, one of whom was always adopted as the patron of the modern gilds, which, in the Middle Ages, took the place of the Roman Colleges; and hence the Freemasons derive the dedication of their Lodges to Saint John from a similar custom among the Corporations of Builders.

These Colleges held secret meetings, in which the business transacted consisted of the initiations of neophytes into their fraternity, and of mystical and esoteric instructions to their apprentices and journeymen. They were, in this respect, secret societies like the Masonic Lodges.

There were monthly or other periodical contributions by the members for the support of the College, by which means a common fund was accumulated for the maintenance of indigent members or the relief of destitute strangers belonging to the same society.

They were permitted by the government to frame a constitution and to enact laws and regulations for their own government. These privileges were gradually enlarged and their provisions extended, so that in the latter days of the empire the Colleges of Architects especially were invested with extraordinary powers in reference to the control of builders. Even the distinction so well known in Masonic jurisprudence between "legally constituted" and "clandestine" Lodges, seems to find a similitude or analogy here; for the Colleges which had been established by lawful authority, and were, therefore, entitled to the enjoyment of the privileges accorded to those institutions, were said to be *collegia licita*, or "lawful colleges," while those which were voluntary associations, not authorized by the express decree of the senate or the emperor, were called *collegia illicita*, or "unlawful colleges." The terms *licita* and *illicita* were exactly equivalent in their import to the *legally constituted* and the *clandestine* Lodges of Freemasonry.

In the Colleges the candidates for admission were elected, as in the Masonic Lodges, by the voice of the members. In connection with this subject, the Latin word which was used to express the art of admission or reception is worthy of consideration. When a person was admitted into the fraternity of a College, he was said to be *cooptatus in collegium*. Now, the verb *cooptare*, almost exclusively employed by the Romans to signify an election into a College, comes from the root "op" which also occurs in the Greek ὄψομαι, "to see, to

behold." This same word gives origin, in Greek, to *epoptes*, a spectator or beholder, *one who has attained to the last degree in the Eleusinian mysteries;* in other words, *an initiate.* So that, without much stretch of etymological ingenuity, we might say that *cooptatus in collegium* meant "to be initiated into a College." This is, at least, singular. But the more general interpretation of *cooptatus* is "admitted or accepted in a fraternity," and so "made free of all the privileges of the gild or corporation." And hence the idea is the same as that conveyed among the Masons by the title "Free and Accepted."

Finally, it is said by Krause that these Colleges of workmen made a symbolic use of the implements of their art or profession, in other words, that they cultivated the science of symbolism; and in this respect, therefore, more than in any other, is there a striking analogy between the Collegiate and the Masonic institutions. The statement cannot be doubted; for as the organization of the Colleges partook, as has already been shown, of a religious character, and, as it is admitted, that all the religion of Paganism was eminently and almost entirely symbolic, it must follow that any association which was based upon or cultivated the religious or mythological sentiment, must cultivate also the principle of symbolism.

I have thus briefly but succinctly shown that in the form, the organization, the mode of government, and the usages of the Roman Colleges, there is an analogy between them and the modern Masonic Lodges which is evidently more than accidental. It may be that long after the dissolution of the Colleges, Freemasonry, in the establishment of its Lodges, designedly adopted the collegiate organization as a model after which to frame its own system, or it may be that the resemblance has been the result of a slow but inevitable growth of a succession of associations arising out of each other, at the head of which stands the Roman Colleges.

This problem can only be determined by an investigation of the history of these Colleges, and of the other similar institutions which finally succeeded them in the progress of architecture in Europe. We shall then be prepared to investigate with understanding the theory of Krause, and to determine whether the Lodges are indebted to the Colleges for their form alone, or for both form and substance.

We have already seen that in the time of Numa the Roman Colleges amounted to only nine. In the subsequent years of the Republic the number was gradually augmented, so that almost every trade or profession had its peculiar College. With the advance of the empire, their numbers were still further increased and their privileges greatly extended, so that they became an important element in the body politic. Leaving untouched the other Colleges, I shall confine myself to the *Collegia Artificum*, "the Colleges of Architects," as the only one whose condition and history are relevant to the subject under consideration.

The Romans were early distinguished for a spirit of colonization. Their victorious arms had scarcely subdued a people, before a portion of the army was deputed to form a colony. Here the barbarism and ignorance of the native population were replaced by the civilization and the refinement of their Roman conquerors.

The Colleges of Architects, occupied in the construction of secular and religious edifices, spread from the great city to municipalities and the provinces. Whenever a new city, a temple, or a palace was to be built, the members of these corporations were convoked by the Emperor from the most distant points, that with a community of labor they might engage in the construction. Laborers might be employed, like the "bearers of burdens" of the Jewish Temple, in the humbler and coarser tasks, but the conduct and the direction of the works were entrusted only to the "accepted members"—the *cooptati*—of the Colleges.

The colonizations of the Roman Empire were conducted through the legionary soldiers of the army. Now, to each legion there was attached a College or corporation of artificers, which was organized with the legion at Rome, and passed with it through all its campaigns, encamped with it where it encamped, marched with it where it marched, and when it colonized, remained in the colony to plant the seeds of Roman civilization, and to teach the principles of Roman art. The members of the College erected fortifications for the legion in times of war, and in times of peace, or when the legion became stationary, constructed temples and dwelling houses.

When England was subdued by the Roman arms, the legions which went there to secure and to extend the conquest, carried with them, of course, their Colleges of Architects. One of these legions, for instance, under Julius Cæsar, advancing into the northern limits of the country, established a colony, which, under the name of Eboracum, gave birth to the city of York, afterward so celebrated in the history of Masonry. Existing inscriptions and architectural remains attest how much was done in the island of Britain by these associations of builders.

Druidism was at that time the prevailing religion of the ancient Britons. But the toleration of Paganism soon led to an harmonious admixture of the religious ideas of the Roman builders with those of the Druid priests. Long anterior to this Christianity had dawned upon the British islands; for, to use the emphatic language of Tertullian, "Britain, inaccessible to the Romans, was subdued by Christ." The influences of the new faith were not long in being felt by the Colleges, and the next phase in their

history is the record of their assumption of the Christian life and doctrine.

But the incursions of the northern barbarians into Italy demanded the entire force of the Roman armies to defend the integrity of the Empire at home. Britain was abandoned, and the natives, with the Roman colonists who had settled among them, were left to defend themselves. These were soon driven, first by the Picts, their savage neighbors, and then by the Saxon sea-robbers, whom the English had incautiously summoned to their aid, into the mountains of Wales and the islands of the Irish Sea. The architects who were converted to Christianity, and who had remained when the legions left the country, went with them, and having lost their connection with the mother institution, they became thenceforth simply corporations or societies of builders, the organization which had always worked so well being still retained.

Subsequently, when the whole of England was taken possession of by the Saxon invaders, the Britons, headed by the monks and priests, and accompanied by their architects, fled into Ireland and Scotland, which countries they civilized and converted, and whose inhabitants were instructed in the art of building by the corporations of architects.

Whenever we read of the extension in barbarous or Pagan countries of Christianity, and the conversion of their inhabitants to the true faith, we also hear of the propagation of the art of building in the same places by the corporations of architects, the immediate successors of the legionary Colleges, for the new religion required churches, and in time cathedrals and monasteries, and the ecclesiastical architecture speedily suggested improvements in the civil.

In time all the religious knowledge and all the architectural skill of the northern part of Europe were concentrated in the remote regions of Ireland and Scotland, whence missionaries were sent back to England to convert the Pagan Saxons. Thus the Venerable Bede tells us (*Eccl. Hist.*, lib. iii., cap. 4, 7) that West Saxony was converted by Agilbert, an Irish bishop, and East Anglia, by Fursey, a Scotch missionary. From England these energetic missionaries, accompanied by their pious architects, passed over into Europe, and effectually labored for the conversion of the Scandinavian nations, introducing into Germany, Sweden, Norway, and even Ireland, the blessings of Christianity and the refinements of civilized life.

It is worthy of note that in all the early records the word *Scotland* is very generally used as a generic term to indicate both Scotland and Ireland. This error arose most probably from the very intimate geographical and social connections of the Scotch and the northern Irish, and perhaps, also, from the general inaccuracy of the historians of that period. Thus has arisen the very common opinion, that Scotland was the germ whence sprang all the Christianity of the northern nations, and that the same country was the cradle of ecclesiastical architecture and Operative Masonry.

This historical error, by which the glory of Ireland has been merged in that of her sister country, Scotland, has been preserved in much of the language and many of the traditions of modern Freemasonry. Hence the story of the Abbey of Kilwinning as the birthplace of Masonry, a story which is still the favorite of the Freemasons of Scotland. Hence the tradition of the apocryphal mountain of Heroden, situated in the northwest of Scotland, where the first or metropolitan Lodge of Europe was held; hence the high degrees of Ecossais, or Scottish Master, which play so important a part in modern philosophical Masonry; and hence the title of "Scottish Masonry," applied to one of the leading Rites of Freemasonry, which has, however, no other connection with Scotland than that historical one, through the corporations of builders, which is common to the whole Institution.

It is not worth while to trace the religious contests between the original Christians of Britain and the Papal power, which after years of controversy terminated in the submission of the British Bishops to the Pope. As soon as the Papal authority was firmly established over Europe, the Roman Catholic hierarchy secured the services of the builders' corporations, and these, under the patronage of the Pope and the Bishops, were everywhere engaged as "travelling freemasons," in the construction of ecclesiastical and regal edifices.

Henceforth we find these corporations of builders exercising their art in all countries, everywhere proving, as Mr. Hope says, by the identity of their designs, that they were controlled by universally accepted principles, and showing in every other way the characteristics of a corporation or gild. So far the chain of connection between them and the *Collegia Artificum* at Rome has not been broken.

In the year 926 a general assembly of these builders was held at the city of York, in England.

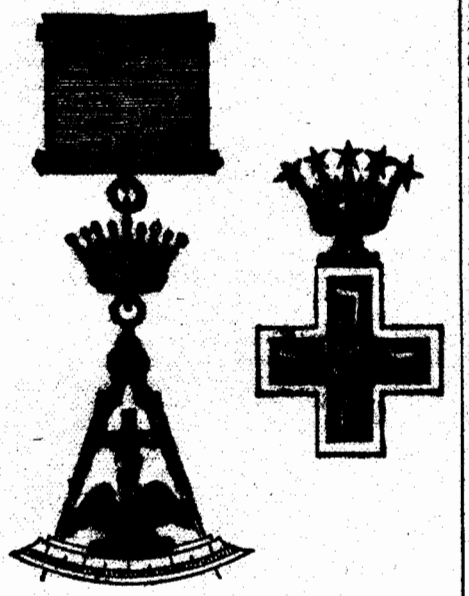
Four years after, in 930, according to Rebold, Henry the Fowler brought these builders, now called Masons, from England into Germany, and employed them in the construction of various edifices, such as the cathedrals of Magdeburg, Meissen, and Merseburg. But Krause, who is better and more accurate as a historian than Rebold, says that, as respects Germany, the first account that we find of these corporations of builders is at the epoch when, under the direction of Edwin of Steinbach, the most distinguished architects had congregated from all parts at Strasburg for the construction of the cathedral of that city. There they held their general assembly,

like that of their English brethren at York, enacted Constitutions, and established, at length, a Grand Lodge, to whose decisions numerous Lodges or *hutten*, subsequently organised in Germany, Bohemia, Hungary, France, and other countries, yielded obedience. George Kloss, in his exhaustive work entitled *Die Freimaurerei in ihrer wahren Bedeutung*, has supplied us with a full collation of the statutes and regulations adopted by these Strasburg Masons. (See *Stone-Masons of Germany*.)

We have now reached recent historical ground, and can readily trace these associations of builders to the establishment of the Grand Lodge of England at London, in 1717, when the Lodges abandoned their operative charters and became exclusively speculative. The record of the continued existence of Lodges of Free and Accepted Masons from that day to this, in every civilized country of the world, is in the hands of every Masonic student. To repeat it would be a tedious work of supererogation.

Such is the history, and now what is the necessary deduction? It cannot be doubted that Krause is correct in his theory that the incunabula—the cradle or birthplace—of the modern Masonic Lodges is to be found in the Roman Colleges of Architects. That theory is correct, if we look only to the outward form and mode of working of the Lodges. To the Colleges are they indebted for everything that distinguished them as a gild or corporation, and especially are they indebted to the architectural character of these Colleges for the fact, so singular in Freemasonry, that its religious symbolism—that by which it is distinguished from all other institutions—is founded on the elements, the working-tools, and the technical language of the stone-masons' art.

But when we view Freemasonry in a higher aspect, when we look at it as a science of symbolism, the whole of which symbolism is directed to but one point, namely, the elucidation of the great doctrine of the immortality of the soul, and the teaching of the two lives, the present and the future, we must go beyond the Colleges of Rome, which were only operative associations, the speculative Craft has borrowed from the older type to be found in the Ancient Mysteries, where the same doctrine was taught in a similar manner. Krause does not, it is true, altogether omit a reference to the priests of Greece, who, he thinks, were in some way the original whence the Roman Colleges derived their existence; but he has not pressed the point. He gives in his theory a preeminence to the Colleges to which they are not in truth entitled.



Romvel. In the Hiramic legend of some of the high degrees, this is the name given to one of the assassins of the Third Degree. This seems to be an instance of the working of Stuart Masonry, in giving names of infamy in the legends of the Order to the enemies of the house of Stuart. For we cannot doubt the correctness of Bro. Albert Pike's suggestion, that this is a manifest corruption of *Cromwell*. If with them Hiram was but a symbol of Charles I., then the assassin of Hiram was properly symbolised by Cromwell.

Rosaic System. The system of Masonry taught by Rosa in the Lodges which he established in Germany and Holland, and which were hence sometimes called "Rosaic Lodges." Although he professed that it was the system of the Clermont Chapter, for the propagation of which he had been appointed by the Baron Von Printzen, he had mixed with that system many alchemical and theosophic notions of his own. The system was at first popular, but it finally succumbed to the greater attractions of the Rite of Strict Observance, which had been introduced into Germany by the Baron von Hund.

Rosa, Philipp Samuel. Born at Ysenberg; at one time a Lutheran clergyman, and in 1757 rector of the Cathedral of St. James at Berlin. He was initiated into Masonry in the Lodge of the Three Globes, and Von Printzen having established a Chapter of the high degrees at Berlin on the system of the French Chapter of Clermont, Rosa was appointed his deputy, and sent by him to propagate the system. He visited various places in Germany, Holland, Denmark, and Sweden. In Denmark and Sweden, although well received personally on account of his pleasing manners, he made no progress in the establishment of the Rite; but his success was far better in Germany and Holland, where he organized many Lodges of the high degrees, engrafting them on the English system, which alone had been theretofore known in those countries. Rosa was a mystic and a pretended alchemist, and as a Masonic charlatan accumulated large sums of money by the sale of degrees and decorations. Lenning does not speak well of his moral conduct, but some contemporary writers describe him as a man of very attractive manners, to which indeed may be ascribed his popularity as a Masonic leader. While residing at Halle, he, in 1765, issued a protestation against the proceedings of the Congress of Jena, which had been convoked in that year by the impostor Johnson. But it met with no success, and thenceforth Rosa faded away from the knowledge of the Masonic world. We can learn nothing of his subsequent life, nor of the time or place of his death.

Rose. The symbolism of the rose among the ancients was twofold. First, as it was dedicated to Venus as the goddess of love, it became the symbol of secrecy, and hence came the expression "under the rose," to indicate that which was spoken in confidence. Again, as it was dedicated to Venus as the personification of the generative energy of nature, it became the symbol of immortality. In this latter and more recondite sense it was, in Christian symbology, transferred to Christ, through whom "life and immortality were

brought to light." The "rose of Sharon" of the Book of Canticles is always applied to Christ, and hence Fuller (*Pisgah Sight of Palestine*) calls him "that prime rose and lily." Thus we see the significance of the rose on the cross as a part of the jewel of the Rose Croix Degree. Reghellini (vol. i., p. 358), after showing that anciently the rose was the symbol of secrecy, and the cross of immortality, says that the two united symbols of a rose resting on a cross always indicate the *secret*

of immortality. Ragon agreeswith him in this opinion, and says that it is the simplest mode of writing that dogma. But he subsequently gives a different explanation, namely, that as the rose was the emblem of the female principle, and the cross or triple phallus of the male, the two together, like the Indian lingam, symbolized universal generation. But Ragon, who has adopted the theory of the astronomical origin of Freemasonry, like all theorists, often carries his speculations on this subject to an extreme point. A simpler allusion will better suit the character and teachings of the degree in its modern organization. The rose is the symbol of Christ, and the cross, the symbol of his death—the two united, the rose suspended on the cross—signify his death on the cross, whereby the secret of immortality was taught to the world. In a word, the rose on the cross is Christ crucified.

Rose and Triple Cross. A degree contained in the Archives of the Lodge of Saint Louis des Amis Réunis at Calais.

Rose Croix. French. Literally, *Rose Cross*.

1. The Seventh Degree of the French Rite; 2. The Seventh Degree of the Philalethes; 3. The Eighth Degree of the Mother Lodge of the Philosophic Scottish Rite; 4. The Twelfth Degree of the Elect of Truth; 5. The Eighteenth Degree of the Mother Scottish Lodge of Marseilles; 6. The Eighteenth Degree of the Rite of Heredom, or of Perfection.

Rose Croix, Brethren of the. Thory says (*Fondat. du G. Or.*, p. 163) that the Archives of the Mother Lodge of the Philosophic Scottish Rite at Paris contain the manuscripts and books of a secret society which existed at The Hague in 1622, where it was known under the title of the *Frères de la Rose Croix*, which pretended to have emanated from the original Rosicrucian organization of Christian Rosenkruz. Hence Thory thinks that the Philosophic Rite was only a continuation of this society of the Brethren of the Rose Croix.

Rose Croix, Jacobite. The original Rose Croix conferred in the Chapter of Arras, whose Charter was said to have been granted by the Pretender, was so called with a political allusion to King James III., whose adherents were known as Jacobites.

Rose Croix, Jewel of the. Although there are six well-known Rose Croix degrees, belonging to as many systems, the jewel has invariably remained the same, while the interpretation has somewhat differed. The usual jewel of a Rose Croix Knight and also that of the M. Wise Sov. of an English Chapter are presented in opposite column.

Rose Croix, Knight. (*Chevalier Rose Croix.*) The Eighteenth Degree of the Rite of Perfection. It is the same as the Prince of Rose Croix of the Ancient and Accepted Rite.

Rose Croix, Magnetic. The Thirty-eighth Degree of the Rite of Misraim.

Rose Croix of Germany. A Hermetic degree, which Ragon says belongs rather to the class of Elus than to that of Rose Croix.

Rose Croix of Gold, Brethren of the. (*Frères de la Rose Croix d'Or.*) An alchemical and Hermetic society, which was founded in Germany in 1777. It promised to its disciples the secret of the transmutation of metals, and the panacea or art of prolonging life. The Baron Gleichen, who was Secretary for the German language of the Philalethan Congress at Paris in 1785, gives the following history of the organization of this society:

"The members of the Rose Croix affirm that they are the legitimate authors and superiors of Freemasonry, to all of whose symbols they give a hermetical interpretation. The Masons, they say, came into England under King Arthur. Raymond Lully initiated Henry IV. The Grand Masters were formerly designated, as now, by the titles of John I., II., III., IV., etc.

"Their jewel is a golden compass attached to a blue ribbon, the symbol of purity and wisdom. The principal emblems on the ancient tracing-board were the sun, the moon, and the double triangle, having in its centre the first letter of the Hebrew alphabet. The brethren wore a silver ring on which were the letters I. A. A. T., the initials of *Ignis*, *Aer*, *Aqua*, *Terra*.

"The Ancient Rose Croix recognised only three degrees; the third degree, as we now

know it, has been substituted for another more significant one."

The Baron de Westerode, in a letter dated 1784, and quoted by Thory (*Act. Lat.*, i., 336), gives another mythical account. He says:

"The disciples of the Rose Croix came, in 1188, from the East into Europe, for the propagation of Christianity after the troubles in Palestine. Three of them founded in Scotland the Order of the Masons of the East (Knights of the East,) to serve as a seminary for instruction in the most sublime sciences. This Order was in existence in 1196. Edward, the son of Henry III., was received into the society of the Rose Croix by Raymond Lully. At that time only learned men and persons of high rank were admitted.

"Their founder was a seraphic priest of Alexandria, a magus of Egypt named Ormesius, or Ormus, who with six of his companions was converted in the year 96 by St. Mark. He purified the doctrine of the Egyptians according to the precepts of Christianity, and founded the society of Ormus, that is to say, the Sages of Light, to the members of which he gave a red cross as a decoration. About the same time the Essenes and other Jews founded a school of Solomonic wisdom, to which the disciples of Ormus united themselves. Then the society was divided into various Orders known as the Conservators of Mosaic Secrets, of Hermetic Secrets, etc.

"Several members of the association having yielded to the temptations of pride, seven Masters united, effected a reform, adopted a modern constitution, and collected together on their tracing-board all the allegories of the hermetic work."

In this almost altogether fabulous narrative we find an inextricable confusion of the Rose Croix Masons and the Rosicrucian philosophers.

Rose Croix of Heredom. The First Degree of the Royal Order of Scotland, the Eighteenth of the Ancient and Accepted Rite, the Eighteenth of the Rite of Perfection, the Ninetieth of the Rite of Mizraim, and some others affix to the title of Rose Croix that of *Heredom*, for the signification of which see the word.

Rose Croix of the Dames. (*Rose Croix des Dames.*) This degree, called also the Ladies of Beneficence (*Chevalieres de la Bienfaisance*), is the Sixth Capitular or Ninth Degree of the French Rite of Adoption. It is not only Christian, but Roman Catholic in its character, and is derived from the ancient Jesuitical system as first promulgated in the Rose Croix Chapter of Arras.

Rose Croix of the Grand Rosary. (*Rose Croix du Grand Rosaire.*) The Fourth and highest Rose Croix Chapter of the Primitive Rite.

Rose Croix, Philosophic. A German Hermetic degree found in the collection of M. Pyron, and in the Archives of the Philosophic Scottish Rite. It is probably the same as the Brethren of the Rose Croix, of whom Thory thinks that that Rite is only a continuation.

Rose Croix, Prince of. French, *Souverain Prince Rose Croix.* German, *Prinz vom Rosenkruz.* This important degree is, of all the high grades, the most widely diffused, being found in numerous Rites. It is the Eighteenth of the Ancient and Accepted Scottish Rite, the Seventh of the French or Modern, the Eighteenth of the Council of Emperors of the East and West, the Third of the Royal Order of Scotland, the Twelfth of the Elect of Truth, and the Seventh of the Philalethes. It was also given, formerly, in some Encampments of Knights Templars, and was the Sixth of the degrees conferred by the Encampment of Baldwyn at Bristol, in England. It must not, however, be confounded with the Rosicrucians, who, however, similar in name, were only a Hermetic and mystical Order.

The degree is known by various names: sometimes its possessors are called "Sovereign Princes of Rose Croix," sometimes "Princes of Rose Croix de Heroden," and sometimes "Knights of the Eagle and Pelican." In relation to its origin, Masonic writers have made many conflicting statements, some giving it a much higher antiquity than others; but all agreeing in supposing it to be one of the earliest of the higher degrees. The name has, undoubtedly, been the cause of much of this confusion in relation to its history; and the Masonic Degree of Rose Croix has, perhaps, often been confounded with the Kabbalistical and alchemical sect of "Rosicrucians," or "Brothers of the Rosy Cross," among whose adepts the names of such men as Roger Bacon, Paracelsus, and Elias Ashmole, the celebrated antiquary, are to be found. Notwithstanding the invidious attempts of Barruel and other foes of Masonry to confound the two Orders, there is a great distinction between them. Even their names, although somewhat similar in sound, are totally different in signification. The Rosicrucians, who were alchemists, did not derive their name, like the Rose Croix Masons, from the emblems of the rose and cross—for they had nothing to do with the rose—but from the Latin *ros*, signifying *dew*, which was supposed to be of all natural bodies the most powerful solvent of gold, and *crux*, the cross, a chemical hieroglyphic of light.

Baron de Westerode, who wrote in 1784, in the *Acta Latomorum* (i., 336), gives the earliest origin of any Masonic writer to the degree of Rose Croix. He supposes that it was instituted among the Knights Templars in Palestine, in the year 1188, and he adds that Prince Edward, the son of Henry III. of England, was admitted into the Order by Raymond Lully in 1196. De Westerode names Ormesius, an Egyptian priest, who had been converted to Christianity, as its founder.

Some have sought to find its origin in the labors of Valentine Andreä, the reputed founder of the Rosicrucian fraternity. But the Rose Croix of Masonry and the Hermetic Rosicrucianism of Andreä were two entirely different things; and it would be

difficult to trace any connection between them, at least any such connection as would make one the legitimate successor of the other. J. G. Buhle, in a work, published in Göttingen in 1804, under the title of *Ueber den Ursprung und die vornehmsten Schicksale der Orden der Rosenkreutzer und Freimaurer*, reverses this theory, and supposes the Rosicrucians to be a branch of the Freemasons; and Higgins, in his *Anacalypsis* (ii., 388), thinks that the "modern Templars, the Rosicrucians, and the Masons are little more than different Lodges of one Order," all of which is only a confusion of history in consequence of a confounding of names. It is thus that Inge has written an elaborate essay on the *Origine de la Rose Croix* (*Globe*, vol. iii.); but as he has, with true Gallic *insouciance* of names, spoken indifferently of the Rose Croix Masons and the Rosicrucian Adepts, his statements supply no facts available for history.

The Baron de Gleichen, who was, in 1785, the German secretary of the Philalethan Congress at Paris, says that the Rose Croix and the Masons were united in England under King Arthur. (*Acta Lat.*, i., 336.) But he has, undoubtedly, mixed up Rosicrucianism with the Masonic legends of the Knights of the Round Table, and his assertions must go for nothing.

Others, again, have looked for the origin of the Rose Croix Degree, or, at least, of its emblems, in the *Symbola divina et humana pontificum, imperatorum, regum* of James Typot, or Typotius, the historiographer of the Emperor Rudolph II., a work which was published in 1601; and it is particularly in that part of it which is devoted to the "symbol of the holy cross" that the allusions are supposed to be found which would seem to indicate the author's knowledge of this degree. But Ragon refutes the idea of any connection between the symbols of Typotius and those of the Rose Croix. Robison (*Proofs*, p. 72) also charges Von Hund with borrowing his symbols from the same work, in which, however, he declares "there is not the least trace of Masonry or Templars."

Clavel, with his usual boldness of assertion, which is too often independent of facts, declares that the degree was invented by the Jesuits for the purpose of countermining the insidious attacks of the freethinkers upon the Roman Catholic religion, but that the philosophers parried the attempt by seizing upon the degree and giving to all its symbols an astronomical signification. Clavel's opinion is probably derived from one of those sweeping charges of Professor Robison, in which that systematic enemy of our Institution declares that, about the beginning of the eighteenth century, the Jesuits interfered considerably with Masonry, "insinuating themselves into the Lodges, and contributing to increase that religious mysticism that is to be observed in all the ceremonies of the Order." But there is no better evidence than these mere vague assertions of the connection of the Jesuits with the Rose Croix Degree.

Oliver (*Landm.*, ii., 81) says that the earliest notice that he finds of this degree is in a publication of 1613, entitled *La Réformation universelle du monde entier avec la fama fraternitatis de l'Ordre respectable de la Rose Croix*. But he adds, that "it was known much sooner, although not probably as a degree in Masonry; for it existed as a cabalistic science from the earliest times in Egypt, Greece, and Rome, as well as amongst the Jews and Moors in times more recent."

Oliver, however, undoubtedly, in the latter part of this paragraph, confounds the Masonic Rose Croix with the alchemical Rosicrucians; and the former is singularly inconsistent with the details that he gives in reference to the Rosy Cross of the Royal Order of Scotland.

There is a tradition, into whose authenticity I shall not stop to inquire, that after the dissolution of the Order, many of the Knights repaired to Scotland and placed themselves under the protection of Robert Bruce; and that after the battle of Bannockburn, which took place on St. John the Baptist's Day, in the year 1314, this monarch instituted the Royal Order of Heredom and Knight of the Rosy Cross, and established the chief seat of the Order at Kilwinning. From that Order, it seems to us by no means improbable that the present degree of Rose Croix de Heroden may have taken its origin. In two respects, at least, there seems to be a very close connection between the two systems: they both claim the kingdom of Scotland and the Abbey of Kilwinning as having been at one time their chief seat of government, and they both seem to have been instituted to give a Christian explanation to Ancient Craft Masonry. There is, besides, a similarity in the names of the degrees of "Rose Croix de Heroden," and "Heredom and Rosy Cross," amounting almost to an identity, which appears to indicate a very intimate relation of one to the other.

The subject, however, is in a state of inextricable confusion, and I confess that, after all my researches, I am still unable distinctly to point to the period when, and to the place where, the present degree of Rose Croix received its organization as a Masonic grade.

We have this much of history to guide us. In the year 1747, the Pretender, Prince Charles Edward, is said to have established a Chapter in the town of Arras, in France, with the title of the "Chapitre Primordial de Rose Croix." The Charter of this body is now extant in an authenticated copy deposited in the departmental archives of Arras. In it the Pretender styles himself "King of England, France, Scotland, and Ireland, and, by virtue of this, Sovereign Grand Master of the Chapter of H. known under

the title of the Eagle and Pelican, and, since our sorrows and misfortunes, under that of Rose Croix." From this we may infer that the title of "Rose Croix" was first known in 1747; and that the degree had been formerly known as "Knight of the Eagle and Pelican," a title which it still retains. Hence it is probable that the Rose Croix Degree has been borrowed from the Rosy Cross of the Scottish Royal Order of Heredom, but in passing from Scotland to France it greatly changed its form and organization, as it resembles in no respect its archetype, except that both are eminently Christian in their design. But in its adoption by the Ancient and Accepted Rite, its organization has been so changed that, by a more liberal interpretation of its symbolism, it has been rendered less sectarian and more tolerant in its design. For while the Christian reference is preserved, no peculiar theological dogma is retained, and the degree is made cosmopolite in its character.

It was, indeed, on its first inception, an attempt to Christianize Freemasonry; to apply the rites, and symbols, and traditions of Ancient Craft Masonry to the last and greatest dispensation; to add to the first Temple of Solomon and the second of Zerubbabel a third, that to which Christ alluded when he said, "Destroy this temple, and in three days will I raise it up." The great discovery which was made in the Royal Arch ceases to be of value in this degree; for it another is substituted of more Christian application; the Wisdom, Strength, and Beauty which supported the ancient Temple are replaced by the Christian pillars of Faith, Hope and Charity; the great lights, of course, remain, because they are of the very essence of Masonry; but the three lesser give way to the thirty-three, which allude to the years of the Messiah's sojourning on earth. Everything, in short, about the degree, is Christian; but, as I have already said, the Christian teachings of the degree have been applied to the sublime principles of a universal system, and an interpretation and illustration of the doctrines of the "Master of Nazareth," so adapted to the Masonic dogma of tolerance, that men of every faith may embrace and respect them. It thus performs a noble mission. It obliterates, alike, the intolerance of those Christians who sought to erect an impassable barrier around the sheepfold, and the equal intolerance of those of other religions who would be ready to exclaim, "Can any good thing come out of Nazareth?"

In the Ancient and Accepted Scottish Rite, whence the Rose Croix Masons of the United States have received the degree, it is placed as the eighteenth on the list. It is conferred in a body called a "Chapter," which derives its authority immediately from the Supreme Council of the Thirty-third, and which confers with it only one other and inferior degree, that of "Knights of the East and West." Its principal officers are a Most Wise Master and two Wardens. Maundy Thursday and Easter Sunday are two obligatory days of meeting.

The aspirant for the degree makes the usual application duly recommended; and if accepted, is required, before initiation, to make certain declarations which shall show his competency for the honor which he seeks, and at the same time prove the high estimation entertained of the degree by those who already possess it.

The jewel of the Rose Croix is a golden compass, extended on an arc to the sixteenth part of a circle, or twenty-two and a half degrees. The head of the compass is surmounted by a triple crown, consisting of three series of points arranged by three, five, and seven. Between the legs of the compass is a cross resting on the arc; its center is occupied by a full-blown rose, whose stem twines around the lower limb of the cross; at the foot of the cross, on the same side on which the rose is exhibited, is the figure of a pelican wounding its breast to feed its young which are in a nest surrounding it, while on the other side of the jewel is the figure of an eagle with wings displayed. On the arc of the circle, the P.·. W.·. of the degree is engraved in the cipher of the Order.

In this jewel are included the most important symbols of the degree. The *Cross*, the *Rose*, the *Pelican*, and the *Eagle* are all important symbols, the explanations of which will go far to a comprehension of what is the true design of the Rose Croix Order. They may be seen in this work under their respective titles.

Rose Croix, Rectified. The name given by F. J. W. Schröder to his Rite of seven magical, theosophical, and alchemical degrees. (See *Schroeder, Friederich Joseph Wilhelm.*)

Rose Croix, Sovereign Prince of. Because of its great importance in the Masonic system, and of the many privileges possessed by its possessors, the epithet of "Sovereign" has been almost universally bestowed upon the degree of Prince of Rose Croix. Recently, however, the Mother Council of the Ancient and Accepted Scottish Rite at Charleston has discarded this title, and directed that the word "Sovereign" shall only be applied to the Thirty-third Degree of the Rite; and this is now the usage in the Southern Jurisdiction of the United States.

Rose, Knights and Ladies of the. See *Knight of the Rose.*

Rose, Order of the. A Masonic adventurer, Franz Rudolph Van Grossing, but whose proper name, Wadzeck says, was Franz Matthäus Grossinger, established, as a financial speculation, at Berlin, in 1778, an androgynous society, which he called *Rosen-Order*, or the Order of the Rose. It consisted of two degrees: 1. Female Friends, and 2. Confidants; and the meetings of the society were designated as "holding the rose." The

society had but a brief duration, and the life and adventures of the founder and the secrets of the Order were published in 1789, by Friederich Wadzeck, in a work entitled *Leben und Schicksale des berüchtigten F. R. Von Grossing*.

Rosenkreuz, Christian. An assumed name, invented, it is supposed, by John Valentine Andreä, by which he designated a fictitious person, to whom he has attributed the invention of *Rosicrucianism*, which see.

Rosicrucianism. Many writers have sought to discover a close connection between the Rosicrucians and the Freemasons, and some, indeed, have advanced the theory that the latter are only the successors of the former. Whether this opinion be correct or not, there are sufficient coincidences of character between the two to render the history of Rosicrucianism highly interesting to the Masonic student.

There appeared at Cassel, in the year 1614, a work bearing the title of *Allgemeine und General-Reformation der ganzen weiten Welt. Benebem der Fama Fraternitatis des Löblichen Ordens des Rosencreutzes an alle Gelehrte und Häupter Europä geschrieben*. A second edition appeared in 1615, and several subsequent ones; and in 1652 it was introduced to the English public in a translation by the celebrated adept, Thomas Vaughan, under the title of *Fame and Confession of Rosie-Cross*.

This work has been attributed, although not without question, to the philosopher and theologian, John Valentine Andreä, who is reported, on the authority of the preacher, M. C. Hirschen, to have confessed that he, with thirty others in Wurtemberg, had sent forth the *Fama Fraternitatis;* that under this veil they might discover who were the true lovers of wisdom, and induce them to come forward.

In this work Andreä gives an account of the life and adventures of Christian Rosenkreuz, a fictitious personage, whom he makes the founder of the pretended Society of Rosicrucians.

According to Andreä's tale, Rosenkreuz was of good birth, but, being poor, was compelled to enter a monastery at a very early period of his life. At the age of 100 years, he started with one of the monks on a pilgrimage to the Holy Sepulcher. On their arrival at the island of Cyprus, the monk was taken sick and died, but Rosenkreuz proceeded on his journey. At Damascus he remained for three years, devoting himself to the study of the occult sciences, taught by the sages of that city. He then sailed for Egypt, where he continued his studies; and, having traversed the Mediterranean, he at length arrived at Fes, in Morocco, as he had been directed by his masters of Damascus. He passed two years in acquiring further information from the philosophers of Africa, and then crossed over into Spain. There, however, he met with an unfavorable reception, and then determined to return to Germany, and give to his own countrymen the benefit of his studies and researches, and to establish there a society for the cultivation of the sciences which he had acquired during his travels. Accordingly, he selected three of the monks of the old convent in which he was educated. To them he imparted his knowledge, under a solemn vow of secrecy. He imposed on them the duty of committing his instructions to writing, and forming a magic vocabulary for the benefit of future students. They were also taught the science of medicine, and prescribed gratuitously for all the sick who applied to them. But the number of their patients soon materially interfering with their other labors, and the new edifice, the House of the Holy Spirit, being now finished, Father Christian, as he was called, resolved to enlarge his society by the initiation of four new members.

The eight brethren being now thoroughly instructed in the mysteries, they agreed to separate—two to remain with Father Christian, and the others to travel, but to return at the end of each year, and mutually to communicate the results of their experience. The two who had remained at home were then relieved by two of the others, and they again separated for another year.

The society thus formed was governed by a code of laws, by which they agreed that they would devote themselves to no occupation except that of physic, which they were to practise without pecuniary reward; that they would not distinguish themselves from the rest of the world by any peculiar costume; that each one should annually present himself at the House of the Holy Spirit, or send an excuse for his absence; that each one should, during his life, appoint somebody to succeed him at his death; that the letters R. C. were to be their title and watchword; and that the brotherhood should be kept a secret for one hundred years.

At the age of 106 years Father Christian Rosenkreuz died, and was buried by the two brethren who had remained with him; but the place of his burial remained a secret to all of the rest—the two carrying the mystery with them to the grave. The society, however, continued, notwithstanding the death of the founder, to exist, but unknown to the world, always consisting of eight members. There was a tradition among them, that at the end of one hundred and twenty years the grave of Father Rosenkreuz was to be discovered, and the brotherhood no longer remain a secret. About that time the brethren began to make some alterations in their building, and attempted to remove to a more fitting situation the memorial table on which was inscribed the names of those who had been members of the fraternity. The plate was of brass, and was affixed to the wall by a nail driven through its center; but so firmly was it attached, that in tearing it away, a portion of the plaster came off and exposed a secret door. Upon removing the incrustation on the door, there appeared written in large letters, "Post cxx Annos Patebo"—*after one hundred and twenty years I will open*. Returning the next morning to renew their researches, they

opened the door and discovered a heptagonal vault, each of its seven sides being five feet wide, and in height eight feet. The light was received from an artificial sun in the roof, and in the middle of the floor there stood, instead of a tomb, a circular altar, on which was an inscription, importing that this apartment, as a compendium of the universe, had been erected by Christian Rosenkreuz. Other later inscriptions about the apartment—such as *Jesus mihi omnia; Legis jugum; Libertas Evangelii:* Jesus is my all; the yoke of the law; the liberty of the Gospel—indicated the Christian character of the builder. In each of the sides was a door opening into a closet, and in these closets they found many rare and valuable articles, such as the life of the founder, the vocabulary of Paracelsus, and the secrets of the Order, together with bells, mirrors, burning lamps, and other curious articles. On removing the altar and a brass plate beneath it, they came upon the body of Rosenkreuz in a perfect state of preservation.

Such is the sketch of the history of the Rosicrucians given by Andreä in his *Fama Fraternitatis*. It is evidently a romance; and scholars now generally assent to the theory advanced by Nicolai, that Andreä, who, at the time of the appearance of his book, was a young man full of excitement, seeing the defects of the sciences, the theology, and the manners of his time, sought to purify them; and, to accomplish this design, imagined the union into one body of all those who, like himself, were the admirers of true virtue; in other words, that he wrote this account of the rise and progress of Rosicrucianism for the purpose of advancing, by a poetical fiction, his peculiar views of morals and religion.

But the fiction was readily accepted as a truth by most people, and the invisible society of Rosenkreuz was sought for with avidity by many who wished to unite with it. The sensation produced in Germany by the appearance of Andreä's book was great; letters poured in on all sides from those who desired to become members of the Order, and who, as proofs of their qualifications, presented their claims to skill in Alchemy and Kabbalism. No answers, of course, having been received to these petitions for initiation, most of the applicants were discouraged and retired; but some were bold, became impostors, and proclaimed that they had been admitted into the society, and exercised their fraud upon those who were credulous enough to believe them. There are records that some of these charlatans, who extorted money from their dupes, were punished for their offense by the magistrates of Nuremberg, Augsburg, and some other German cities. There was, too, in Holland, in the year 1722, a Society of Alchemists, who called themselves Rosicrucians, and who claimed that Christian Rosenkreuz was their founder, and that they had affiliated societies in many of the German cities. But it is not to be doubted that this was a self-created society, and that it had nothing in common, except the name, with the imaginary brotherhood invented by Andreä. Des Cartes, indeed, says that he sought in vain for a Rosicrucian Lodge in Germany.

But although the brotherhood of Rosenkreuz, as described by Andreä in his *Fama Fraternitatis*, his *Chemical Nuptuals*, and other works, never had a real tangible existence as an organized society, the opinions advanced by Andreä took root, and gave rise to the philosophic sect of the Rosicrucians, many of whom were to be found, during the seventeenth century, in Germany, in France, and in England. Among these were such men as Michael Maier, Richard Fludd, and Elias Ashmole. Nicolai even thinks that he has found some evidence that the *Fama Fraternitatis* suggested to Lord Bacon the notion of his *Instauratio Magna*. But, as Vaughan says (*Hours with the Mystics*, ii., 104), the name Rosicrucian became by degrees a generic term, embracing every species of doubt, pretension, arcana, elixirs, the philosopher's stone, theurgic ritual, symbols, or initiations.

Higgins, Sloane, Vaughan, and several other writers have asserted that Freemasonry sprang out of Rosicrucianism. But this is a great error. Between the two there is no similarity of origin, of design, or of organization. The symbolism of Rosicrucianism is derived from a Hermetic philosophy; that of Freemasonry from an operative art. The latter had its cradle in the Stone-Masons of Strasburg and the Masters of Como long before the former had its birth in the inventive brain of John Valentine Andreä.

It is true, that about the middle of the eighteenth century, a period fertile in the invention of high degrees, a Masonic Rite was established which assumed the name of Rose Croix Masonry, and adopted the symbol of the Rose and Cross. But this was a coincidence, and not a consequence. There was nothing in common between them and the Rosicrucians, except the name, the symbol, and the Christian character. Doubtless the symbol was suggested to the Masonic Order from the use of it by the philosophic sect; but the Masons modified the interpretation, and the symbol, of course, gave rise to the name. But here the connection ends. A Rose Croix Mason and a Rosicrucian are two entirely different persons.

The Rosicrucians had a large number of symbols, some of which were in common with those of the Freemasons, and some peculiar to themselves. The principal of these were the globe, the circle, the compasses, the square (both the working-tool and the geometrical figure), the triangle, the level, and the plummet. These are, however, interpreted, not like the Masonic, as symbols of the moral virtues, but of the properties of the philosopher's stone. Thus, the twenty-first emblem of Michael Maier's *Atlanta Fugiens* gives the following collection of the most important symbols: A philosopher is measuring with a pair of compasses a circle which surmounts a triangle. The triangle encloses a square, within which is another circle, and inside of the circle

a nude man and woman, representing, it may be supposed, the first step of the experiment. Over all is this epigraph: "Fac ex mare et femina circulum, inde quadrangulum, hinc triangulum, fac circulum et habebis lapidem Philosophorum." That is, "Make of man and woman a circle; thence a square; thence a triangle; form a circle, and you will have the Philosopher's stone." But it must be remembered that Hitchcock, and some other recent writers, have very satisfactorily proved that the labors of the real Hermetic philosophers (outside of the charlatans) were rather of a spiritual than a material character; and that their "great work" symbolized not the acquisition of inexhaustible wealth and the infinite prolongation of life, but the regeneration of man and the immortality of the soul.

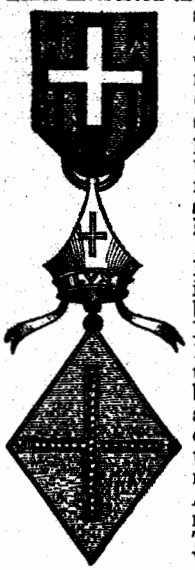
As to the etymology of the word *Rosicrucian*, several derivations have been given. Peter Gassendi (*Exam. Phil. Fludd*, sect. 15), first, and then Mosheim (*Hist. Eccles.*, iv., i.) deduce it from the two words *ros*, dew, and *crux*, a cross, and thus define it: Dew, according to the Alchemists, was the most powerful of all substances to dissolve gold; and the cross, in the language of the same philosophers, was identical with light, or LVX, because the figure of a cross exhibits the three letters of that word. But the word *lux* was referred to the seed or menstruum of the Red Dragon, which was that crude and material light which, being properly concocted and digested, produces gold. Hence, says Mosheim, a Rosicrucian is a philosopher, who by means of *dew* seeks for *light*, that is, for the substance of the philosopher's stone. But notwithstanding the high authority for this etymology, I think it untenable, and altogether at variance with the history of the origin of the Order, as will be presently seen.

Another and more reasonable derivation is from *rose* and *cross*. This was undoubtedly in accordance with the notions of Andreä, who was the founder of the Order, and gave it its name, for in his writings he constantly calls it the "Fraternitas Roseæ Crucis," or "the Fraternity of the Rosy Cross." If the idea of *dew* had been in the mind of Andreä in giving a name to the society, he would have called it the "Fraternity of the Dewy Cross," not that of the "Rosy Cross." "Fraternitas Roscidæ Crucis," not "Roseæ Crucis." This ought to settle the question. The man who invents a thing has the best right to give it a name.

The origin and interpretation of the symbol have been variously given. Some have supposed that it was derived from the Christian symbolism of the rose and the cross. This is the interpretation that has been assumed by the Rose Croix Order of the Masonic system; but it does not thence follow that the same interpretation was adopted by the Rosicrucians. Others say that the rose meant the generative principle of nature, a symbolism borrowed from the Pagan mythologers, and not likely to have been appropriated by Andreä. Others, again, contend that he derived the symbol from his own arms, which were a St. Andrew's cross between four roses, and that he alluded to Luther's well-known lines:

> "Des Christen Herz auf Rosen geht,
> Wenn's mitten unter'n Kreutze steht,"

i. e., "The heart of the Christian goes upon roses when it stands close beneath the cross." But whatever may have been the effect of Luther's lines in begetting an idea, the suggestion of Andreä's arms must be rejected. The symbol of the Rosicrucians was a single rose upon a passion cross, very different from four roses surrounding a St. Andrew's cross.



Another derivation may be suggested, namely: That, the rose being a symbol of secrecy, and the cross of light, the rose and cross were intended to symbolize the secret of the true light, or the true knowledge, which the Rosicrucian brotherhood were to give to the world at the end of the hundred years of their silence, and for which purpose of moral and religious reform Andreä wrote his books and sought to establish his sect. But the whole subject of Rosicrucian etymology is involved in confusion.

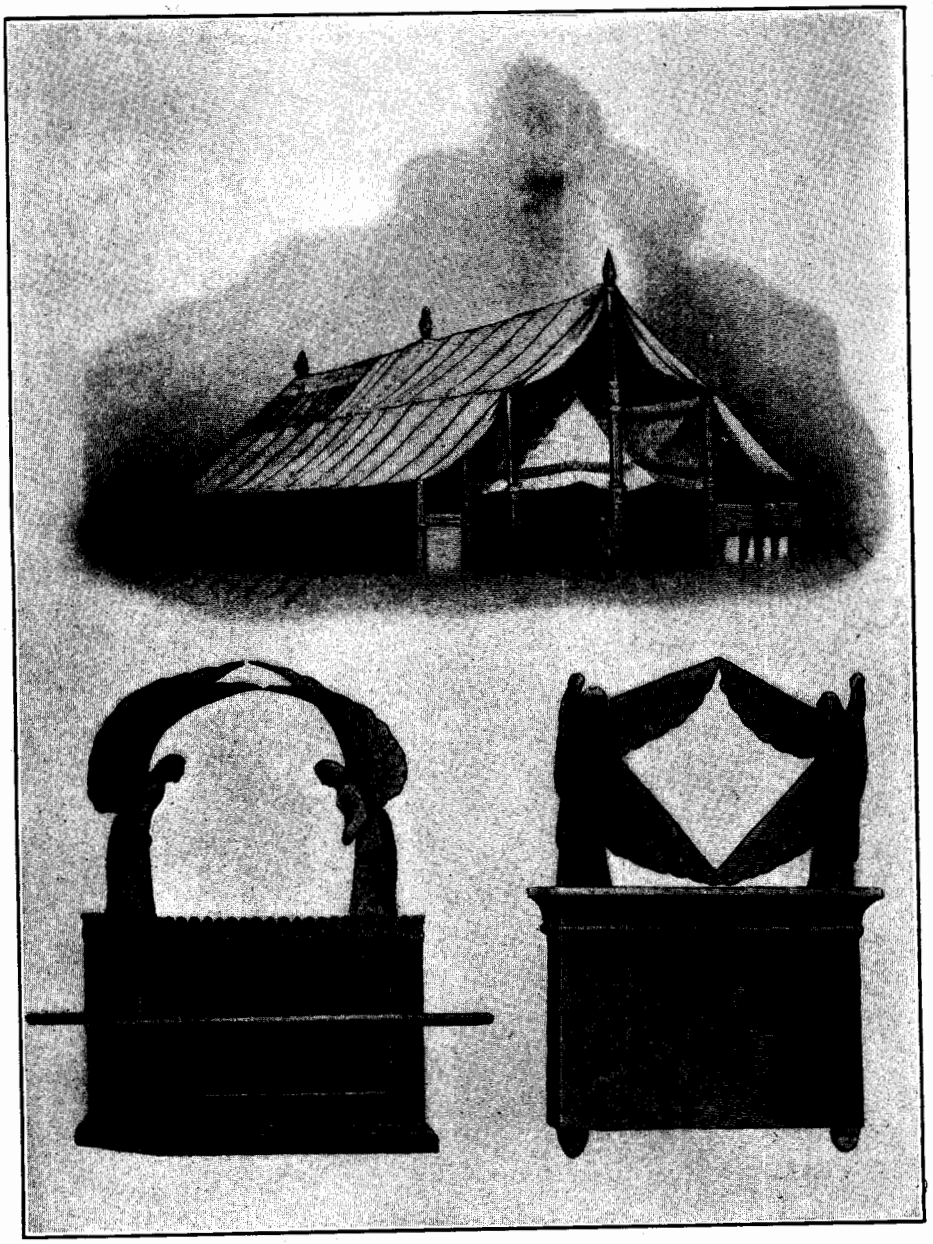
*The Rosicrucian Society, instituted in the fourteenth century, was an extraordinary Brotherhood, exciting curiosity and commanding attention and scrutiny. The members delved in abstruse studies; many became Anchorites, and were engrossed in mystic philosophy and theosophy. This strange Fraternity, asserted by some authorities to have been instituted by Roger Bacon near the close of the thirteenth century, filled the world with renown as to their incomprehensible doctrines and presumed abilities. They claimed to be the exponents of the true Kabbala, as embracing theosophy as well as the science of numbers. They were said to delve in strange things and deep mysteries; to be enwrapt in the occult sciences, sometimes vulgarly termed the "Black Art"; and in the secrets of magic and sorcery, which are looked upon by the critical eyes of the world as tending to the supernatural, and a class of studies to be avoided.

These mystics, for whom great philanthropy is claimed, and not without reason, are heard of as early as the commencement of the fourteenth century, in the person of Raymond Lully, the renowned scholiast and metaphysical chemist, who proved to be an adept in the doctrines taught at the German seat of Hermetic learning in 1302, and who died in 1315. Fidelity and secrecy were the first care of the Brotherhood. They claimed a kinship to the ancient philosophies of Egypt, the Chaldeans, the Magi of Persia, and even the Gymnosophists of India. They were unobtrusive and retiring in the extreme. They were learned in the principles and sciences of chemistry, hermeticism, magnetism, astrology, astronomy, and theosophy, by which they obtained great powers through their discoveries, and

*From this point the article is by C. T. McClenachan.

aimed at the universal solvent—the Philosopher's Stone—thereby striving to acquire the power of transmuting baser metals into silver and gold, and of indefinitely prolonging human life. As a Fraternity they were distinct from the Kabbalists, Illuminati, and Carbonari, and in this relation they have been largely and unpleasantly misrepresented. Ignorance and prejudice on the part of the learned as to the real purposes of the Rosicrucians, and as to the beneficence of that Fraternity, has wrought them great injustice. Science is infinitely indebted to this Order. The renowned reviver of Oriental literature, John Reuchlin, who died in 1522; the famous philosopher and classic scholar, John Picus di Mirandola, who died in 1494; the celebrated divine and distinguished philosopher, Cornelius Henry Agrippa, who died in 1535; the remarkable chemist and physician, John Baptist Von Helmont, who died in 1644; and the famous physician and philosopher, Robert Fludd, who died in 1637, all attest the power and unquestioned prominence of the famous Brotherhood. It is not the part of wisdom to disdain the Astrological and Hermetic Association of Elias Ashmole, author of the *Way to Bliss*. All Europe was permeated by this secret organization, and the renown of the Brotherhood was preeminent about the year 1615. Wessel's *Fama Fraternitatis*, the curious work *Secretioris Philosophiæ Consideratis*, and *Cum Confessione Fraternitatis*, by P. A. Gabella, with Fludd's *Apologia*, the *Chemische Hochzeit of Christian Rosenkreuz*, by Valentine Andreä; and the endless number of volumes, such as the *Fama Ramissa*, establish the high rank in which the Brotherhood was held. Its curious, unique, and attractive Rosaic doctrines interested the masses of scholars of the sixteenth and seventeenth centuries. With the Rosicrucians worldly grandeur faded before intellectual elevation. They were simple in their attire, and passed individually through the world unnoticed and unremarked, save by deeds of benevolence and humanity.

The *Modern Society* of Rosicrucians was given its present definite form by Robert Wentworth Little, of England, in 1866; it is founded upon the remains or the embers of an old German association which had come under his observation during some of his researches. Bro. Little Anglicized it, giving it more perfect system. The purpose of Robert Wentworth Little was to create a literary organization, having in view a base for the collection and deposit of archeological and historical subjects pertaining to Freemasonry, secret societies in general, and interesting provincial matter; to inspire a greater disposition to obtain historical truth and to displace error; to bring to light much in relation to a certain class of scientists and scholars, and the results of their life-labors, that were gradually dying away in the memories of men. To accomplish this end he called about him some of his most prominent English and Scottish Masonic friends inclined to literary pursuits, and they awarded their approval and hearty cooperation.



Rosicruciana in Anglia, Societas. A society whose objects are of a purely literary character, and connected with the sect of the Rosicrucians of the Middle Ages. It is secret, but not Masonic, in its organization; although many of the most distinguished Masons of England take great interest in it, and are active members of the society. (See the preceding article.)

Rosy Cross. One of the degrees conferred in the *Royal Order of Scotland*, which see.

Rough Ashlar. See *Ashlar*.

Round Table, King Arthur's. The old English legends, derived from the celebrated chronicle of the twelfth century known as the *Brut of England*, say that the mythical King Arthur, who died in 542, of a wound received in battle, instituted a company of twenty-four (or, according to some, twelve) of his principal knights, bound to appear at his court on certain solemn days, and meet around a circular table, whence they were called "Knights of the Round Table." Arthur is said to have been the institutor of those military and religious orders of chivalry which afterward became so common in the Middle Ages. Into the Order which he established none were admitted but those who had given proofs of their valor; and the knights were bound to defend widows, maidens, and children; to relieve the distressed, maintain the Christian religion, contribute to the support of the church, protect pilgrims, advance honor, and suppress vice. They were to administer to the care of soldiers wounded in the service of their country, and bury those who died, to ransom captives, deliver prisoners, and record all noble enterprises for the honor and renown of the noble Order. King Arthur and his knights have been very generally considered by scholars as mythical; notwithstanding that, many years ago Whittaker, in his *History of Manchester*, attempted to establish the fact of his existence, and to separate the true from the fabulous in his history. The legend has been used by some of the fabricators of irregular degrees in Masonry.

Round Towers of Ireland. Edifices, sixty-two in number, varying in height from 80 to 120 feet, which are found in various parts of Ireland. They are cylindrical in shape, with a single door eight or ten feet from the ground, and a small aperture near the top. The question of their origin and design has been a source of much perplexity to antiquaries. They have been supposed by Mont-

morency to have been intended as beacons; by Vallancey, as receptacles of the sacred fire; by O'Brien, as temples for the worship of the sun and moon; and more recently, by Petrie, simply as bell-towers, and of very modern date. This last theory has been adopted by many; while the more probable supposition is still maintained by others, that, whatever was their later appropriation, they were, in their origin, of a phallic character, in common with the towers of similar construction in the East. O'Brien's work *On the Round Towers of Ireland*, which was somewhat extravagant in its arguments and hypotheses, led some Masons to adopt, forty years ago, the opinion that they were originally the places of a primitive Masonic initiation. But this theory is no longer maintained as tenable.

Rowers. See *Knight Rower.*

Royal and Select Masters. See *Council of Royal and Select Masters.*

Royal Arch, Ancient. See *Knight of the Ninth Arch.*

Royal Arch Apron. At the triennial meeting of the General Grand Chapter of the United States at Chicago, in 1859, a Royal Arch apron was prescribed, consisting of a

lambskin (silk or satin being strictly prohibited), to be lined and bound with scarlet, on the flap of which should be placed a triple tau cross within a triangle, and all within a circle.

Royal Arch Badge. The triple tau, consisting of three tau crosses conjoined at their feet, constitutes the Royal Arch badge. The English Masons call it the "emblem of all emblems," and the "grand emblem of Royal Arch Masonry." The English Royal Arch lecture thus defines it: "The triple tau forms two right angles on each of the exterior lines, and another at the centre, by their union; for the three angles of each triangle are equal to two right angles. This, being triplified, illustrates the jewel worn by the companions of the Royal Arch, which, by its intersection, forms a given number of angles that may be taken in five several combinations." It is used in the Royal Arch Masonry of Scotland, and has, for the last ten or fifteen years, been adopted officially in the United States.

Royal Arch Banners. See *Banners, Royal Arch.*

Royal Arch Captain. The sixth officer in a Royal Arch Chapter according to the American system. He represents the *sar hatabahim*, or Captain of the King's Guards. He sits in front of the Council and at the entrance to the fourth veil, to guard the approaches to which is his duty. He wears a white robe and cap, is armed with a sword, and bears a white banner on which is inscribed a lion, the emblem of the tribe of Judah. His jewel is a triangular plate of gold inscribed with a sword. In the preliminary Lodges of the Chapter he acts as Junior Deacon.

Royal Arch Clothing. The clothing or regalia of a Royal Arch Mason in the American system consists of an apron (already described), a scarf of scarlet velvet or silk, on which is embroidered or painted, on a blue ground, the words, "Holiness to the Lord"; and if an officer, a scarlet collar, to which is attached the jewel of his office. The scarf, once universally used, has, within a few years past, been very much abandoned. Every Royal Arch Mason should also wear at his buttonhole, attached by a scarlet ribbon, the jewel of the Order.

Royal Arch Colors. The peculiar color of the Royal Arch Degree is red or scarlet, which is symbolic of fervency and zeal, the characteristics of the degree. The colors also used symbolically in the decorations of a Chapter are blue, purple, scarlet, and white, each of which has a symbolic meaning. (See *Veils, Symbolism of the.*)

Royal Arch Degree. The early history of this degree is involved in obscurity, but in the opinion of the late Bro. W. J. Hughan its origin may be ascribed to the fourth decade of the eighteenth century. The earliest known mention of it occurs in a contemporary account of the meeting of a Lodge (No. 21) at Youghal, in Ireland, in 1743, when the members walked in procession and the Master was preceded by "the Royal Arch carried by two Excellent Masons." (See *Excellent Master.*)

The next mention of it is in Dr. Dassigny's *A Serious and Impartial Enquiry into the cause of the present Decay of Freemasonry in the Kingdom of Ireland*, published in 1744, in which the writer says that he is informed that in York "is held an assembly of Master Masons under the title of Royal Arch Masons, who, as their qualifications and excellencies are superior to others, receive a larger pay than working Masons." He also speaks of "a certain propagator of a false system, some few years ago, in this city (Dublin), who imposed upon several very worthy men, under a pretence of being Master of the Royal Arch, which he asserted he had brought with him from the city of York, and that the beauties of the Craft did principally consist in the knowledge of this valuable piece of Masonry. However, he carried on his scheme for several months, and many of the learned and wise were his followers, till, at length, his fallacious art was discovered by a Brother of probity and wisdom, who had some small space before attained that excellent part of Masonry in London, and plainly proved that his doctrine was false: whereupon the Brethren justly despised him, and ordered him to be excluded

from all benefits of the Craft, and although some of the fraternity have expressed an uneasiness at this matter being kept a secret from them (since they had already passed through the usual degrees of probation), I cannot help being of opinion that they have no right to any such benefit until they make a proper application, and are received with due formality, and as it is an organis'd body of men who have passed the chair, and given undeniable proofs of their skill in architecture, it cannot be treated with too much reverence, and more especially since the character of the present members of that particular Lodge are untainted, and their behaviour judicious and unexceptionable, so that there cannot be the least hinge to hang a doubt on, but that they are most excellent Masons."

This passage makes it plain that the Royal Arch Degree was conferred in London before 1744 (say about 1740), and would suggest that York was considered to be its place of origin. Also as Laurence Dermott became a Royal Arch Mason in 1746 it is clear that he could not have been, as is sometimes asserted, the inventor of the Rite.

The next mention of the degree occurs in the minutes of the "Ancients" Grand Lodge for March 4, 1752, when "A formal complaint was made by several brethren against Thos. Phealon and John Macky, better known as 'leg of mutton Masons' for clandestinely making Masons for the mean consideration of a leg of mutton for dinner or supper. Upon examining some brothers whom they pretended to have made Royal Arch men, the parties had not the least idea of that secret. The Grand Secretary had examined Macky, and stated that he had not the least idea or knowledge of Royal Arch Masonry, but instead thereof he had told the people he had deceived, a long story about twelve white marble stones, &c., &c., and that the rainbow was the Royal Arch, with many other absurdities equally foreign and ridiculous."

The earliest known record of the degree being actually conferred is a minute of the Fredericksburg Lodge, Virginia, U. S. A., stating that on December 22, 1753, three brethren were raised to the degree of Royal Arch Mason (for a facsimile of this entry see *Ars Quatuor Coronatorum*, iv., p. 222); while the earliest records traced in England are of the year 1758, during which year several brethren were "raised to the degree of Royal Arch" in a Lodge meeting at The Crown at Bristol.

This Lodge was a "Modern" one and its records therefore make it abundantly clear that the Royal Arch Degree was not by any means confined to the "Ancients," though it was not officially recognized by the Grand Lodge of the "Moderns," whose Secretary wrote in 1759, "Our Society is neither Arch, Royal Arch or Ancient."

However, at the Union of "Ancients" and "Moderns," in 1813, it was declared that "pure Ancient Masonry consists of three degrees, and no more, *viz.*, those of the Entered Apprentice, the Fellow Craft, and the Master Mason, including the Supreme Order of the Holy Royal Arch."

And this lends color to the idea that at some time or other the Royal Arch had formed part of the Master Mason's Degree, though when and by whom it was separated from it no one has yet discovered, for we may dismiss as utterly uncorroborated by any proof the assertion that Ramsay was the fabricator of the Royal Arch Degree, and equally unsupported is the often made assertion that Dunckerley invented it, though he undoubtedly played a very active part in extending it.

The late Bro. W. J. Hughan, in his *Origin of the English Rite of Free Masonry* (ed. 1909, p. 90), favors "the theory that a *word* was placed in the Royal Arch *prominently* which was previously given in the *sections* of the Third Degree and known 'as the ancient word of a Master Mason,'" and considers that "according to this idea, that *which was once lost, and then found*, in the Third Degree (in one of the sections), was subsequently under the new regime discovered in the 'Royal Arch,' only *much extended, and under most exalted and dignified surroundings*."

In England, Scotland, and the United States, the legend of the degree is the same, though varying in some of the details, but the ceremony in Ireland differs much, for it has nothing to do with the rebuilding of the Temple as narrated by Ezra, but with the repairing of the Temple by Josiah, the three chief Officers, or Principals, being the King (Josiah), the Priest (Hilkiah), and the Scribe (Shaphan), not as in England Zerubbabel, Haggai, and Jeshua, or as in America, High Priest, King, and Scribe.

At one time in England only Past Masters were eligible for the degree, and this led to a system called "passing the chair," by which a sort of degree of Past Master was conferred upon brethren who had never really served in the chair of a Lodge; now a Master Mason who has been so for four weeks is eligible for exaltation.

In Scotland, Royal Arch Masonry is not officially recognized by the Grand Lodge, though the Grand Chapter of Royal Arch Masons for Scotland was formed in 1817.

Dr. W. J. Chetwode Crawley, in his *Cæmentaria Hibernica, Fasciculus I.*, says, "It (the Royal Arch Degree) is not a separate entity, but the completing part of a Masonic legend, a constituent ever present in the compound body, even before it developed into a Degree . . . if the Royal Arch fell into desuetude, the cope-stone would be removed, and the building left obviously incomplete."

[E. L. H.]

Royal Arch, Grand. The Thirty-first Degree of the Rite of Mizraim. It is nearly the same as the Thirteenth Degree of the Ancient and Accepted Scottish Rite.

Royal Arch Grand Bodies in America. The first meeting of delegates out of which arose the General Grand Chapter was at Boston, October 24, 1797. The convention adjourned to assemble at Hartford, in January,

1798, and it was there the Grand Chapter of the Northern States of America was organized. Again, on the 9th of January, 1799, an adjourned meeting was held, whereat it was resolved to change its name to that of "General Grand Royal Arch Chapter of the Northern States of America." On January 9, 1806, the present designation was adopted, to wit: "The General Grand Chapter of Royal Arch Masonry for the U. S. of America." New York was determined upon as the place for the first convocation, September, 1812, and the sessions to be made septennial. It failed to meet at the appointed time, but an important convocation was held in New York City, on June 6, 1816.

Joseph K. Wheeler, G. Secretary, in his introduction to the *Records of Capitular Masonry in the State of Connecticut*, says, after mentioning the names of the Chapters represented at the organization of the Grand Chapter in 1798: "In tracing their history it will be observed that all of these Chapters obtained their authority from a Washington Chapter in the city of New York, with the exception of Vanderbroeck, No. 5," chartered at an early date, by the G. Chapter of New York, after which no more Chapters were established by any authority outside the jurisdiction of Connecticut except Lynch Chapter, No. 8, located at Reading and Weston, which was chartered by the Grand Chapter of New York, August 23, 1801, which charter was signed by Francis Lynch, H. P. Grand Chapter of R. A. Masons; James Woods, King; and Samuel Clark, Scribe; which was admitted to membership in G. Chapter of Connecticut, May 19, 1808.

It is of interest here to note that the oldest Chapter in New York State is Ancient, No. 1, whose date of origin is lost, its records up to 1804 having been destroyed by fire, but tradition fixes the year 1763. For years it wielded the powers of a Grand Chapter, and until 1799 was known as the Old Grand Chapter. It granted charters for Chapters in New York, New Jersey, and Connecticut. In this last named State it issued a charter to Lynch Chapter (see above), which was received into full fellowship by the G. Chapter of Connecticut, although the G. Chapter of New York had been in existence some time before the charter was issued.

On the formation of the Grand Chapter of the State of New York, the numbers 1 and 2 were left vacant for the acceptance of Old and Washington Chapters (which latter was an offspring of the former), who at that time refused to place themselves under its jurisdiction. In 1806, Old Chapter enrolled itself as "Ancient" under the State Grand Body, accepted the number *one*, and was further honored by having its H. Priest, James Woods, elected Dep. G. H. Priest. (See *Pennsylvania*.) [C. T. McClenachan.]

Royal Arch Jewel. The jewel which every Royal Arch Mason is permitted to wear as a token of his connection with the Order. In America it is usually suspended by a scarlet ribbon to the button. In England it is to be worn pendant from a narrow ribbon on the left breast, the color of the ribbon varying with the rank of the wearer. It is of gold, and consists of a triple tau cross within a triangle, the whole circumscribed by a circle. This jewel is eminently symbolic, the *tau* being the mark mentioned by Ezekiel (ix. 4), by which those were distinguished who were to be saved from the wicked who were to be slain; the *triple tau* is symbolic of the peculiar and more eminent separation of Royal Arch Masons from the profane; the *triangle*, or *delta*, is a symbol of the sacred name of God, known

only to those who are thus separated; and the *circle* is a symbol of the eternal life, which is the great dogma taught by Royal Arch Masonry. Hence, by this jewel, the Royal Arch Mason makes the profession of his separation from the unholy and profane, his reverence for God, and his belief in the future and eternal life.

In America, the emblem worn by Royal Arch Masons without the Chapter is a Keystone, on which are the letters H. T. W. S. S. T. K. S. arranged in a circle and within the circle may or should be his mark.

Royal Arch Masonry. That division of Speculative Masonry which is engaged in the investigation of the mysteries connected with the Royal Arch, no matter under what name or in what Rite. Thus the mysteries of the Knight of the Ninth Arch constitute the Royal Arch Masonry of the Ancient and Accepted Scottish Rite just as much as those of the Royal Arch of Zerubbabel do the Royal Arch of the American Rite.

Royal Arch Masonry, Massachusetts. A statement of the origin and record of St. Andrew's Chapter in Boston is to trace early Royal Arch Masonry in Massachusetts. The following is extracted from Comp. Thomas Waterman's admirable history of St. Andrew's Royal Arch Chapter, the result of much earnest research: "The first meeting recorded of this Chapter was held on the 28th of August, 1769, and was then styled the Royal Arch Lodge, of which R. W. James Brown was Master." It is presumable this Lodge derived its authority from the Grand Lodge (Ancients) of England, as did that of the same name in Philadelphia, whereby it was authorized to confer the Holy Royal Arch Degree, as also did Independent Royal Arch, No. 2, of NewYork, but surrendered the right to

confer the Royal Arch Degree when it joined the Grand Lodge of New York.

Comp. Waterman adds: "It appears by the record that the Degrees of 'Excellent, Super-Excellent, and Royal Arch' were conferred in the Royal Arch Lodge." Winthrop Gray, on April 17, 1770, was elected Master. On the succeeding May 14th, "Most Worshipful Joseph Warren, Esq.," was made a Royal Arch Mason. No record appears between March 26, 1773, and March 20, 1789. In an old register-book, dated April 1, 1789, is found "Original members, April 1, 1789, M. E. William McKeen, H. P." The next recorded election, October 21, 1790, gives William McKeen, R. A. Master. "On November 28, 1793, the Degree of Mark Master was connected with the other Degrees conferred in the Chapter." "January 30, 1794, the words 'Royal Arch Chapter' are used for the first time in recording the proceedings of the Chapter."

"The Grand Royal Arch Chapter of Massachusetts was organized by delegates from St. Andrew's Chapter, Boston, and King Cyrus' Chapter, Newburyport, who assembled at Masons' Hall, in the Green Dragon Tavern, Boston, on Tuesday, the 13th of March, A. D. 1798."

Royal Arch of Enoch. The Royal Arch system which is founded upon the legend of Enoch. (See *Enoch.*)

Royal Arch of Solomon. One of the names of the degree of Knight of the Ninth Arch, or Thirteenth Degree of the Ancient and Accepted Scottish Rite.

Royal Arch of Zerubbabel. The Royal Arch Degree of the American Rite is so called to distinguish it from the Royal Arch of Solomon in the Ancient and Accepted Scottish Rite.

Royal Arch Robes. In the working of a Royal Arch Chapter in the United States, great attention is paid to the robes of the several officers. The High Priest wears, in imitation of the high priest of the Jews, a robe of blue, purple, scarlet, and white linen, and is decorated with the breastplate and miter. The King wears a scarlet robe, and has a crown and scepter. The Scribe wears a purple robe and turban. The Captain of the Host wears a white robe and cap, and is armed with a sword. The Principal Sojourner wears a dark robe, with tessellated border, a slouched hat, and pilgrim's staff. The Royal Arch Captain wears a white robe and cap, and is armed with a sword. The three Grand Masters of the Veils wear, respectively, the Grand Master of the third veil a scarlet robe and cap, of the second veil a purple robe and cap, of the first veil a blue robe and cap. Each is armed with a sword. The Treasurer, Secretary, and Sentinel wear no robes nor peculiar dress. All of these robes have either an historical or symbolical allusion.

Royal Arch Tracing-Board. The oldest Royal Arch tracing-board extant is one which was formerly the property of a Chapter in the city of Chester, and which Dr. Oliver thinks was "used only a very few years after the degree was admitted into the system of constitutional Masonry." He has given a copy of it in his work *On the Origin of the English Royal Arch.* The symbols which it displays are, in the center of the top an arch scroll, with the words in Greek, ΕΝ ΑΡΧΗ ΗΝ. Ο ΛΟΓΟΣ, i. e., *In the beginning was the Word;* beneath, the word JEHOVAH written in Kabbalistic letters; on the right side an arch and keystone, a rope falling in it, and a sun darting its rays obliquely; on the left a pot of incense beneath a rainbow; in the center of the tracing-board, two interlaced triangles and a sun in the center, all surrounded by a circle; on the right and left of this the seven-branched candlestick and the table of shew-bread. Beneath all, on three scrolls, are the words, "Solomon, King of Israel; Hiram, King of Tyre; Hiram, the Widow's Son," in Hebrew and Latin. Dr. Oliver finds in these emblems a proof that the Royal Arch was originally taken from the Master's Degree, because they properly belong to that degree, according to the English lecture, and were afterward restored to it. But the American Mason will find in this board how little his system has varied from the primitive one practised at Chester, since all the emblems, with the exception of the last three, are still recognized as Royal Arch symbols according to the American system.

Royal Arch Word. See *Tetragrammaton.*

Royal Arch Working-Tools. See *Working-Tools.*

Royal Ark Mariners. A side degree in England which is conferred on Mark Master Masons, and worked under the authority of the Grand Master of Mark Masons, assisted by a Royal Ark Council. The language of the Order is peculiar. The Supreme body is called a "Grand Ark"; subordinate Lodges are "vessels"; organizing a Lodge is "launching a vessel"; to open a Lodge is "to float an ark"; to close the Lodge is "to moor." All its references are nautical, and allude to the deluge and the ark of Noah. The degree is useless for any light that it sheds on Masonry. The degree seems to have been invented in England about the end of the last century. A correspondent of the London *Monthly Magazine* for December, 1798 (vol. vi., p. 424), calls it "one of the new degrees in Freemasonry," and thus describes the organization:

"They profess to be followers of Noah, and therefore call themselves Noachidæ, or Sons of Noah. Hence their President, who at present is Thomas Boothby Parkins, Lord Rancliffe, is dignified with the venerable title of Grand Noah, and the Lodge where they assemble is called the Royal Ark Vessel.

"These brother mariners wear in Lodge time a broad sash ribbon, representing a rainbow, with an apron fancifully embellished with an ark, dove, etc.

"Among other rules of this society is one that no brother shall be permitted to enter as a mariner on board a Royal Ark vessel for any less sum than ten shillings

and sixpence, of which sum sixpence shall be paid to the Grand and Royal Ark vessel for his registry, and the residue be disposed of at the discretion of the officers of the vessel."

Their principal place of meeting in London was at the Surry Tavern, Surry Street, in the Strand.

The writer gives the following verse from one of their songs written by Dr. Ebenezer Sibley, which does not speak much for the poetical taste of the Mariners or their laureate:

"They entered safe—lo! the deluge came
And none were protected but Masons and wives;
The crafty and knavish came floating along,
The rich and the beggar of profligate lives:
It was now in woe,
For mercy they call
To old Father Noah,
And loudly did bawl,
But Heaven shut the door and the ark was afloat,
To perish they must, for they were found out."

Royal Art. The earliest writers speak of Freemasonry as a "Royal Art." Anderson used the expression in 1723, and in such a way as to show that it was even then no new epithet. (*Constitutions*, 1723, p. 5.) The term has become common in all languages as an appellative of the Institution, and yet but few perhaps have taken occasion to examine into its real signification or have asked what would seem to be questions readily suggested, "Why is Freemasonry called an *art*?" and next, "Why is it said to be a *Royal Art*?"

The answer which is generally supposed to be a sufficient one for the latter inquiry, is that it is so called because many monarchs have been its disciples and its patrons, and some writers have gone so far as to particularize, and to say that Freemasonry was first called a "Royal Art" in 1693, when William III., of England, was initiated into its rites; and Gädicke, in his *Freimaurer Lexicon*, states that some have derived the title from the fact that in the times of the English Commonwealth, the members of the English Lodges had joined the party of the exiled Stuarts, and labored for the restoration of Charles II. to the throne. He himself, however, seems to think that Freemasonry is called a Royal Art because its object is to erect stately edifices, and especially palaces, the residences of kings.

Such an answer may serve for the profane, who can have no appreciation of a better reason, but it will hardly meet the demands of the intelligent initiate, who wants some more philosophic explanation —something more consistent with the moral and intellectual character of the Institution.

Let us endeavor to solve the problem, and to determine why Freemasonry is called an art at all; and why, above all others, it is dignified with the appellation of a Royal Art. Our first business will be to find a reply to the former question.

An art is distinguished from a handicraft in this, that the former consists of and supplies the principles which govern and direct the latter. The stone-mason, for instance, is guided in his construction of the building on which he is engaged by the principles which are furnished to him by the architect. Hence stone-masonry is a trade, a handicraft, or, as the German significantly expresses it, a *handwerk*, something which only requires the skill and labor of the hands to accomplish. But architecture is an art, because it is engaged in the establishment of principles and scientific tenets which the "handwork" of the Mason is to carry into practical effect.

The handicraftsman, the handworker, of course, is employed in manual labor. It is the work of his hands that accomplishes the purpose of his trade. But the artist uses no such means. He deals only in principles, and his work is of the head. He prepares his designs according to the principles of his art, and the workman obeys and executes them, often without understanding their ulterior object.

Now, let us apply this distinction to Freemasonry. Eighteen hundred years ago many thousand men were engaged in the construction of a Temple in the city of Jerusalem. They felled and prepared the timbers in the forests of Lebanon, and they hewed and cut and squared the stones in the quarries of Judea; and then they put them together under the direction of a skilful architect, and formed a goodly edifice, worthy to be called, as the Rabbis named it, "the chosen house of the Lord." For there, according to the Jewish ritual, in preference to all other places, was the God of Hosts to be worshiped in Oriental splendor. Something like this has been done thousands of times since. But the men who wrought with the stone-hammer and trowel at the Temple of Solomon, and the men who afterward wrought at the temples and cathedrals of Europe and Asia, were no artists. They were simply handicraftsmen—men raising an edifice by the labor of their hands—men who, in doing their work, were instructed by others skilful in art, but which art looked only to the totality, and had nothing to do with the operative details. The Giblemites, or stone-squarers, gave form to the stones and laid them in their proper places. But in what form they should be cut, and in what spots they should be laid so that the building might assume a proposed appearance, were matters left entirely to the superintending architect, the artist, who, in giving his instructions, was guided by the principles of his art.

Hence Operative Masonry is not an art. But after these handicraftsmen came other men, who, simulating, or, rather, symbolizing, their labors, converted the operative pursuit into a speculative system, and thus made of a handicraft an art. And it was

in this wise that the change was accomplished.

The building of a temple is the result of a religious sentiment. Now, the Freemasons intended to organize a religious institution. I am not going into any discussion, at this time, of its history. When Freemasonry was founded is immaterial to the theory, provided that the foundation is made posterior to the time of the building of King Solomon's Temple. It is sufficient that it be admitted that in its foundation as an esoteric institution the religious idea prevailed, and that the development of this idea was the predominating object of its first organizers.

Borrowing, then, the name of their Institution from the operative masons who constructed the Temple at Jerusalem, by a very natural process they borrowed also the technical language and implements of the same handicraftsmen. But these they did not use for any manual purpose. They did not erect with them temples of stone, but were occupied solely in developing the religious idea which the construction of the material temple had first suggested; they symbolized this language and these implements, and thus established an art whose province and object it was to elicit religious thought, and to teach religious truth by a system of symbolism. And this symbolism—just as peculiar to Freemasonry as the doctrine of lines and surfaces is to geometry, or of numbers is to arithmetic—constitutes the art of Freemasonry.

If I were to define Freemasonry as an art, I should say that it was an art which taught the construction of a spiritual temple, just as the art of architecture teaches the construction of a material temple. And I should illustrate the train of ideas by which the Freemasons were led to symbolize the Temple of Solomon as a spiritual temple of man's nature, by borrowing the language of St. Peter, who says to his Christian initiates: "Ye also, as lively stones, are built up a spiritual house." And with greater emphasis, and as still more illustrative, would I cite the language of the Apostle of the Gentiles—that Apostle who, of all others, most delighted in symbolism, and who says: "Know ye not that ye are the temple of God, and that the spirit of God dwelleth in you?"

And this is the reason why Freemasonry is called an art.

Having thus determined the conditions under which Freemasonry becomes an art, the next inquiry will be why it has been distinguished from all other arts in being designated, *par excellence*, the *Royal Art*. And here we must abandon all thought that this title comes in any way from the connection of Freemasonry with earthly monarchs—from the patronage or the membership of kings. Freemasonry obtains no addition to its intrinsic value from a connection with the political heads of states. Kings, when they enter within its sacred portals, are no longer kings, but brethren. In the Lodge all men are on an equality, and there can be no distinction or preference, except that which is derived from virtue and intelligence. Although a great king once said that Freemasons made the best and truest subjects, yet in the Lodge is there no subjection save to the law of love—that law which, for its excellence above all other laws, has been called by an Apostle the "royal law," just as Freemasonry, for its excellence above all other arts, has been called the "Royal Art."

St. James says, in his general Epistle: "If ye fulfil the *royal law* according to the Scripture, Thou shalt love thy neighbor as thyself, ye do well." Dr. Adam Clarke, in his commentary on this passage—which is so appropriate to the subject we are investigating, and so thoroughly explanatory of this expression in its application to Freemasonry, that it is well worth a citation—uses the following language:

Speaking of the expression of St. James, *nomon basilicon*, "the royal law," he says: "This epithet, of all the New Testament writers, is peculiar to James; but it is frequent among the Greek writers in the sense in which it appears St. James uses it. Basilikos, *royal*, is used to signify anything that is of general concern, is suitable to all, and necessary for all, as brotherly love is. This commandment, *Thou shalt love thy neighbor as thyself*, is a *royal law;* not only because it is ordained of God, proceeds from his *kingly* authority over men, but because it is so useful, suitable, and necessary to the present state of man; and as it was given us particularly by Christ himself, who is our *king*, as well as prophet and priest, it should ever put us in mind of his authority over us, and our subjection to him. As the *regal state* is the most excellent for secular dignity and civil utility that exists among men, hence we give the epithet *royal* to whatever is excellent, noble, grand, or useful."

How beautifully and appropriately does all this definition apply to Freemasonry as a Royal Art. It has already been shown how the art of Freemasonry consisted in a symbolization of the technical language and implements and labors of an operative society to a moral and spiritual purpose. The Temple which was constructed by the builders at Jerusalem was taken as the groundwork. Out of this the Freemasons have developed an admirable science of symbolism, which on account of its design, and on account of the means by which that design is accomplished, is well entitled, for its "excellence, nobility, grandeur, and utility," to be called the "Royal Art."

The stone-masons at Jerusalem were engaged in the construction of a material temple. But the Freemasons who succeeded them are occupied in the construction of a moral and spiritual temple, man being

considered, through the process of the act of symbolism, that holy house. And in this symbolism the Freemasons have only developed the same idea that was present to St. Paul when he said to the Corinthians that they were "God's building," of which building he, "as a wise master-builder, had laid the foundation"; and when, still further extending the metaphor, he told the Ephesians that they were "built upon the foundation of the apostles and prophets, Jesus Christ himself being the chief corner-stone, in whom all the building fitly framed together, groweth unto a holy temple in the Lord; in whom also ye are builded together for a habitation of God through the spirit."

This, then, is the true art of Freemasonry. It is an art which teaches the right method of symbolizing the technical language and the material labors of a handicraft, so as to build up in man a holy house for the habitation of God's spirit; to give perfection to man's nature; to give purity to humanity, and to unite mankind in one common bond.

It is singular, and well worthy of notice, how this symbolism of building up man's body into a holy temple, so common with the New Testament writers, and even with Christ himself—for he speaks of man as a temple which, being destroyed, he could raise up in three days; in which, as St. John says, "he spake of the temple of his body"—gave rise to a new word or to a word with a new meaning in all the languages over which Christianity exercises any influence. The old Greeks had from the two words *oikos*, "a house," and *domein*, "to build," constructed the word *oikodomein*, which of course signified "to build a house." In this plain and exclusive sense it is used by the Attic writers. In like manner, the Romans, out of the two words *ædes*, "a house," and *facere*, "to make," constructed their word *ædificare*, which always meant simply "to build a house," and in this plain sense it is used by Horace, Cicero, and all the old writers. But when the New Testament writers began to symbolize man as a temple or holy house for the habitation of the Lord, and when they spoke of building up this symbolic house, although it was a moral and spiritual growth to which they alluded, they used the Greek word *oikodomein*, and their first translators, the Latin word *ædificare* in a new sense, meaning "to build up morally," that is, to educate, to instruct. And as modern nations learned the faith of Christianity, they imbibed this symbolic idea of a moral building, and adapted for its expression a new word or gave to an old word a new meaning, so that it has come to pass that in French *edifier*, in Italian *edificare*, in Spanish *edificar*, in German *erbauen*, and in English *edify*, each of which literally and etymologically means "to build a house," has also the other signification, "to instruct, to improve, to educate." And thus we speak of a marble building as a magnificent edifice, and of a wholesome doctrine as something that will edify its hearers. There are but few who, when using the word in this latter sense, think of that grand science of symbolism which gave birth to this new meaning, and which constitutes the very essence of the Royal Art of Freemasonry.

For when this temple is built up, it is to be held together only by the cement of love. Brotherly love, the love of our neighbor as ourself—that love which suffereth long and is kind, which is not easily provoked, and thinketh no evil—that love pervades the whole system of Freemasonry, not only binding all the moral parts of man's nature into one harmonious whole, the building being thus, in the language of St. Paul, "fitly framed together," but binding man to man, and man to God.

And hence Freemasonry is called a "Royal Art," because it is of all arts the most noble; the art which teaches man how to perfect his temple of virtue by pursuing the "royal law" of universal love, and not because kings have been its patrons and encouragers.

A similar idea is advanced in a Catechism published by the celebrated Lodge "Wahreit und Einigkeit," at Prague, in the year 1800, where the following questions and answers occur:

Q. "What do Freemasons build?

A. "An invisible temple, of which King Solomon's Temple is the symbol.

Q. "By what name is the instruction how to erect this mystic building called?

A. "*The Royal Art;* because it teaches man how to govern himself."

Appositely may these thoughts be closed with a fine expression of Ludwig Bechstein, a German writer, in the *Astræa.*

"Every king will be a Freemason, even though he wears no Mason's apron, if he shall be God-fearing, sincere, good, and kind; if he shall be true and fearless, obedient to the law, his heart abounding in reverence for religion and full of love for mankind; if he shall be a ruler of himself, and if his kingdom be founded on justice. And every Freemason is a king, in whatsoever condition God may have placed him here, with rank equal to that of a king and with sentiments that become a king, for his kingdom is LOVE, the love of his fellow-man, a love which is long-suffering and kind, which beareth all things, believeth all things, hopeth all things, endureth all things."

And this is why Freemasonry is an art, and of all arts, being the most noble, is well called the "Royal Art."

Royal Ax. See *Knight of the Royal Ax.*

Royal Lodge. The Royal Arch lectures in the English system say that the Royal Lodge was held in the city of Jerusalem, on the return of the Babylonish captives, in the first year in the reign of Cyrus; over it presided Zerubbabel the prince of the Jews, Haggai the prophet, and Joshua the high priest.

Royal Master. The Eighth Degree of the American Rite, and the first of the degrees conferred in a Council of Royal and Select Masters. Its officers are a Thrice Illustrious Grand Master, representing King Solomon; Illustrious Hiram of Tyre, Principal Conductor of the Works, representing Hiram Abif; Master of the Exchequer, Master of Finances, Captain of the Guards, Conductor of the Council and Steward. The place of meeting is called the "Council Chamber," and represents the private apartment of King Solomon, in which he is said to have met for consultation with his two colleagues during the construction of the Temple. Candidates who receive this degree are said to be "honored with the degree of Royal Master." Its symbolic colors are black and red—the former significant of grief, and the latter of martyrdom, and both referring to the chief builder of the Temple.

The events recorded in this degree, looking at them in a legendary point of view, must have occurred at the building of the first Temple, and during that brief period of time after the death of the builder which is embraced between the discovery of his body and its "Masonic interment." In all the initiations into the mysteries of the ancient world, there was, as it is well known to scholars, a legend of the violent death of some distinguished personage, to whose memory the particular mystery was consecrated, of the concealment of the body, and of its subsequent discovery. That part of the initiation which referred to the concealment of the body was called the *Aphanism*, from a Greek verb which signifies "to conceal," and that part which referred to the subsequent finding was called the *euresis*, from another Greek verb which signifies "to discover." It is impossible to avoid seeing the coincidences between the system of initiation and that practised in the Masonry of the Third Degree. But the ancient initiation was not terminated by the *euresis* or discovery. Up to that point, the ceremonies had been funereal and lugubrious in their character. But now they were changed from wailing to rejoicing. Other ceremonies were performed by which the restoration of the personage to life, or his apotheosis or change to immortality, was represented, and then came the *autopsy* or illumination of the neophyte, when he was invested with a full knowledge of all the religious doctrines which it was the object of the ancient mysteries to teach—when, in a word, he was instructed in Divine truth.

Now, a similar course is pursued in Masonry. Here also there is an illumination, a symbolic teaching, or, as we call it, an *investiture* with that which is the representative of Divine truth. The communication to the candidate, in the Master's Degree, of that which is admitted to be merely a representation of or a substitution for that symbol of Divine truth (the search for which, under the name of the *true word*, makes so important a part of the degree), how imperfect it may be in comparison with that more thorough knowledge which only future researches can enable the Master Mason to attain, constitutes the *autopsy* of the Third Degree. Now, the principal event recorded in the legend of the Royal Master, the interview between Adoniram and his two Royal Masters, is to be placed precisely at that juncture of time which is between the *euresis* or discovery in the Master Mason's Degree and the autopsy, or investiture with the great secret. It occurred between the discovery by means of the sprig of acacia and the final interment. It was at the time when Solomon and his colleague, Hiram of Tyre, were in profound consultation as to the mode of repairing the loss which they then supposed had befallen them.

We must come to this conclusion, because there is abundant reference, both in the organised form of the Council and in the ritual of the degree, to the death as an event that had already occurred; and, on the other hand, while it is evident that Solomon had been made acquainted with the failure to recover, on the person of the builder, that which had been lost, there is no reference whatever to the well-known *substitution* which was made at the time of the interment.

If, therefore, as is admitted by all Masonic ritualists, the *substitution* was precedent and preliminary to the establishment of the Master Mason's Degree, it is evident that at the time that the degree of Royal Master is said to have been founded in the ancient Temple, by our "first Most Excellent Grand Master," all persons present, except the first and second officers, must have been merely Fellow-Craft Masons. In compliance with this tradition, therefore, a Royal Master is, at this day, supposed to represent a Fellow-Craft in the search, and making his demand for that reward which was to elevate him to the rank of a Master Mason.

If from the legendary history we proceed to the symbolism of the degree, we shall find that, brief and simple as are the ceremonies, they present the great Masonic idea of the laborer seeking for his reward. Throughout all the symbolism of Masonry, from the first to the last degree, the search for the WORD has been considered but as a symbolic expression for the search after TRUTH. The attainment of this truth has always been acknowledged to be the great object and design of all Masonic labor. Divine truth—the knowledge of God—concealed in the old Kabbalistic doctrine, under the symbol of his ineffable name—and typified in the Masonic system under the mystical expression of the True Word, is the reward proposed to every Mason who has faithfully wrought his task. It is, in short, the "Master's wages."

Now, all this is beautifully symbolised

in the degree of Royal Master. The reward has been promised, and the time had now come, as Adoniram thought, when the promise was to be redeemed, and the true word—Divine truth—was to be imparted. Hence, in the person of Adoniram, or the Royal Master, we see symbolized the Speculative Mason, who, having labored to complete his spiritual temple, comes to the Divine Master that he may receive his reward, and that his labor may be consummated by the acquisition of truth. But the temple that he had been building is the temple of this life; that first temple which must be destroyed by death that the second temple of the future life may be built on its foundations. And in this first temple the truth cannot be found. We must be contented with its substitute.

Royal Order of Scotland. This is an Order of Freemasonry confined exclusively to the kingdom of Scotland, and which, formerly conferred on Master Masons, is now restricted to those who have been exalted to the Royal Arch Degree. It consists of two degrees, namely, that of H. R. D. M. and R. S. Y. C. S., or, in full, *Heredom* and *Rosy Cross*. The first may be briefly described as a Christianized form of the Third Degree, purified from the dross of Paganism, and even of Judaism, by the Culdees, who introduced Christianity into Scotland in the early centuries of the church. The Second Degree is an Order of civil knighthood, supposed to have been founded by Robert Bruce after the battle of Bannockburn, and conferred by him upon certain Masons who had assisted him on that memorable occasion. He, so the tradition goes, gave power to the Grand Master of the Order for the time being to confer this honor, which is not inherent in the general body itself, but is specially given by the Grand Master and his Deputy, and can be conferred only by them, or Provincial Grand Masters appointed by them. The number of knights is limited, and formerly only sixty-three could be appointed, and they Scotchmen; now, however, that number has been much increased, and distinguished Masons of all countries are admitted to its ranks. In 1747, Prince Charles Edward Stuart, in his celebrated Charter to Arras is said to have claimed to be the Sovereign Grand Master of the Royal Order, "Nous Charles Edouard Stewart, Roi d'Angleterre, de France, de l'Ecosse, et d'Irlande, et en cette qualité, S. G. M. du Chapitre de H." Prince Charles goes on to say that H. O. or H. R. M. is known as the "Pelican and Eagle." "Connu sous le titre de Chevalier de l'Aigle et de Pelican, et depuis nos malheurs et nos infortunes, sous celui de Rose Croix." Now, there is not the shadow of a proof that the Rose Croix, says Bro. Reitam, was ever known in England till twenty years after 1747; and in Ireland it was introduced by a French chevalier, M. L'Aurent, about 1782 or 1783. The Chapter at Arras was the first constituted in France—"Chapitre primordial de Rose Croix"; and from other circumstances (the very name Rose Croix being a translation of R. S. Y. C. S.) some writers have been led to the conclusion that the degree chartered by Prince Charles Edward Stuart was, if not the actual Royal Order in both points, a Masonic ceremony founded on and pirated from that most ancient and venerable Order.

This, however, is an error; because, except in name, there does not appear to be the slightest connection between the Rose Croix and the Royal Order of Scotland. In the first place, the whole ceremonial is different, and different in essentials. Most of the language used in the Royal Order is couched in quaint old rime, modernized, no doubt, to make it "understanded of the vulgar," but still retaining sufficient about it to stamp its genuine antiquity. The Rose Croix Degree is most probably the genuine descendant of the old Rosicrucians, and no doubt it has always had a more or less close connection with the Templars.

Clavel says that the Royal Order of Heredom of Kilwinning is a Rosicrucian degree, having many different gradations in the ceremony of consecration. The kings of England are *de jure*, if not *de facto*, Grand Masters; each member has a name given him, denoting some moral attribute. In the initiation the sacrifice of the Messiah is had in remembrance, who shed his blood for the sins of the world, and the neophyte is in a figure sent forth to seek the lost word. The ritual states that the Order was first established at Icomkill, and afterward at Kilwinning, where the King of Scotland, Robert Bruce, took the chair in person; and oral tradition affirms that, in 1314, this monarch again reinstated the Order, admitting into it the Knights Templar who were still left. The Royal Order, according to this ritual, which is written in Anglo-Saxon verse, boasts of great antiquity.

Findel disbelieves in the Royal Order, as he does in all the Christian degrees. He remarks that the Grand Lodge of Scotland formerly knew nothing at all about the existence of this Order of Heredom, as a proof of which he adduces the fact that Laurie, in the first edition of his *History of the Grand Lodge of Scotland*, has not mentioned it. Oliver, however, as it will be seen, had a high opinion of the Order, and expressed no doubt of its antiquity.

As to the origin of the Order, we have abundant authority both mythical and historical.

Thory (*Act. Lat.*, i., 6) thus traces its establishment:

"On the 24th of June, 1314, Robert Bruce, king of Scotland, instituted, after the battle of Bannockburn, the Order of St. Andrew of the Thistle, to which was afterward united that of H. D. M., for the sake of the Scottish Masons who had composed a part of the thirty thousand men with whom he had fought the English army,

consisting of one hundred thousand. He formed the Royal Grand Lodge of the Order of H. D. M. at Kilwinning, reserving to himself and his successors forever the title of Grand Masters."

Oliver, in his *Historical Landmarks* (ii., 15), defines the Order more precisely, thus:

"The Royal Order of H. R. D. M. had formerly its chief seat at Kilwinning, and there is every reason to think that it and St. John's Masonry were then governed by the same Grand Lodge. But during the sixteenth and seventeenth centuries Masonry was at a very low ebb in Scotland, and it was with the greatest difficulty that St. John's Masonry was preserved. The Grand Chapter of H. R. D. M. resumed its functions about the middle of the last century at Edinburgh; and, in order to preserve a marked distinction between the Royal Order and Craft Masonry,—which had formed a Grand Lodge there in 1736,—the former confined itself solely to the two degrees of H. R. D. M. and R. S. Y. C. S."

Again, in the history of the Royal Order, officially printed in Scotland, the following details are found:

"It is composed of two parts, H. R. M. and R. S. Y. C. S. The former took its rise in the reign of David I., king of Scotland, and the latter in that of King Robert the Bruce. The last is believed to have been originally the same as the most ancient Order of the Thistle, and to contain the ceremonial of admission formerly practised in it.

"The Order of H. R. M. had formerly its seat at Kilwinning, and there is reason to suppose that it and the Grand Lodge of St. John's Masonry were governed by the same Grand Master. The introduction of this Order into Kilwinning appears to have taken place about the same time, or nearly the same period, as the introduction of Freemasonry into Scotland. The Chaldees, as is well known, introduced Christianity into Scotland; and, from their known habits, there are good grounds for believing that they preserved among them a knowledge of the ceremonies and precautions adopted for their protection in Judea. In establishing the degree in Scotland, it is more than probable that it was done with the view to explain, in a correct Christian manner, the symbols and rites employed by the Christian architects and builders; and this will also explain how the Royal Order is purely catholic,—not Roman Catholic,—but adapted to all who acknowledge the great truths of Christianity, in the same way that Craft or Symbolic Masonry is intended for all, whether Jew or Gentile, who acknowledge a supreme God. The second part, or R. S. Y. C. S., is an Order of Knighthood, and, perhaps, the only genuine one in connection with Masonry, there being in it an intimate connection between the trowel and the sword, which others try to show. The lecture consists of a figurative description of the ceremonial, both of H. R. M. and R. S. Y. C. S., in simple rhyme, modernized, of course, by oral tradition, and breathing the purest spirit of Christianity. Those two degrees constitute, as has already been said, the Royal Order of Scotland, the Grand Lodge of Scotland. Lodges or Chapters cannot legally meet elsewhere, unless possessed of a Charter from it or the Grand Master, or his deputy. The office of Grand Master is vested in the person of the king of Scotland, (now of Great Britain,) and one seat is invariably kept vacant for him in whatever country a Chapter is opened, and cannot be occupied by any other member. Those who are in possession of this degree, and the so-called higher degrees, cannot fail to perceive that the greater part of them have been concocted from the Royal Order, to satisfy the morbid craving for distinction which was so characteristic of the continent during the latter half of the last century.

"There is a tradition among the Masons of Scotland that, after the dissolution of the Templars, many of the Knights repaired to Scotland and placed themselves under the protection of Robert Bruce, and that, after the battle of Bannockburn, which took place on St. John the Baptist's day, 1314, this monarch instituted the Royal Order of H. R. M. and Knights of the R. S. Y. C. S., and established the chief seat at Kilwinning. From that Order it seems by no means improbable that the present degree of Rose Croix de Heredom may have taken its origin. In two respects, at least, there seems to be a very close connection between the two systems. They both claim the kingdom of Scotland and the Abbey of Kilwinning as having been at one time the chief seat of government, and they both seem to have been instituted to give a Christian explanation to Ancient Craft Masonry. There is, besides, a similarity in the name of the degrees of Rose Croix de Heredom and H. R. M. and R. S. Y. C. S. amounting almost to an identity, which appears to indicate a very intimate relation of one to the other."

And now recently there comes Bro. Randolph Hay, of Glasgow, who, in the London *Freemason*, gives us this legend, which he is pleased to call "the real history of the Royal Order," and which he, at least, religiously believes to be true:

"Among the many precious things which were carefully preserved in a sacred vault of King Solomon's Temple was a portrait of the monarch, painted by Adoniram, the son of Elkanah, priest of the second court. This vault remained undiscovered till the time of Herod, although the secret of its existence and a description of its locality were retained by the descendants of Elkanah. During the war of the Maccabees, certain Jews, fleeing from their native country, took refuge, first in Spain and afterward in Britain, and amongst them was one Aholiab, the then possessor of the document necessary to find the hidden treasure. As is well known, buildings were then in progress in Edinburgh, or Dun

Edwin, as the city was then called, and thither Aholiab wended his way to find employment. His skill in architecture speedily raised him to a prominent position in the Craft, but his premature death prevented his realizing the dream of his life, which was to fetch the portrait from Jerusalem and place it in the custody of the Craft. However, prior to his dissolution, he confided the secret to certain of the Fraternity under the bond of secrecy, and these formed a class known as 'The Order of the King,' or 'The Royal Order.' Time sped on; the Romans invaded Britain; and, previous to the crucifixion, certain members of the old town guard of Edinburgh, among whom were several of the Royal Order, proceeded to Rome to enter into negotiations with the sovereign. From thence they proceeded to Jerusalem, and were present at the dreadful scene of the crucifixion. They succeeded in obtaining the portrait, and also the blue veil of the Temple rent upon the terrible occasion. I may dismiss these two venerable relics in a few words. Wilson, in his *Memorials of Edinburgh*, (2 vols., published by Hugh Patton,) in a note to Masonic Lodges, writes that this portrait was then in the possession of the brethren of the Lodge St. David. This is an error, and arose from the fact of the Royal Order then meeting in the Lodge St. David's room in Hindford's Close. The blue veil was converted into a standard for the trades of Edinburgh, and became celebrated on many a battle-field, notably in the First Crusade as 'The Blue Blanket.' From the presence of certain of their number in Jerusalem on the occasion in question, the Edinburgh City Guard were often called Pontius Pilate's Prætorians. Now, these are facts well known to many Edinburghers still alive. Let 'X. Y. Z.' go to Edinburgh and inquire for himself.

"The brethren, in addition, brought with them the teachings of the Christians, and in their meetings they celebrated the death of the Captain and Builder of our Salvation. The oath of the Order seals my lips further as to the peculiar mysteries of the brethren. I may, however, state that the Ritual, in verse, as in present use, was composed by the venerable Abbot of Inchaffray, the same who, with a crucifix in his hand, passed along the Scots' line, blessing the soldiers and the cause in which they were engaged, previous to the battle of Bannockburn. Thus the Order states justly that it was revived, that is, a profounder spirit of devotion infused into it, by King Robert, by whose directions the Abbot reorganized it."

In this account, it is scarcely necessary to say that there is far more of myth than of legitimate history.

The King of Scotland is hereditary Grand Master of the Order, and at all assemblies a chair is kept vacant for him.

Provincial Grand Lodges are held at Glasgow, Rouen in France, in Sardinia, Spain, the Netherlands, Calcutta, Bombay, China, and New Brunswick. The Provincial Grand Lodge of London was established in July, 1872, and there the membership is confined to those who have previously taken the Rose Croix, or Eighteenth Degree of the Ancient and Accepted Scottish Rite.

Royal Priest. The Fifth Degree of the Initiated Brothers of Asia, also called the True Rose Croix.

Royal Secret, Sublime Prince of the. See *Sublime Prince of the Royal Secret.*

R. S. Y. C. S. An abbreviation of *Rosy Cross* in the Royal Order of Scotland.

Ruchiel. In the old Jewish Angelology, the name of the angel who ruled the air and the winds. The angel in charge of one of the four tests in Philosophic Masonry.

Ruffians. The traitors of the Third Degree are called *Assassins* in continental Masonry and in the high degrees. The English and American Masons have adopted in their ritual the more homely appellation of *Ruffians*. The fabricators of the high degrees adopted a variety of names for these Assassins (see *Assassins of the Third Degree*), but the original names are preserved in the rituals of the York and American Rites. There is no question that has so much perplexed Masonic antiquaries as the true derivation and meaning of these three names. In their present form, they are confessedly uncouth and without apparent signification. Yet it is certain that we can trace them in that form to the earliest appearance of the legend of the Third Degree, and it is equally certain that at the time of their adoption some meaning must have been attached to them. I am convinced that this must have been a very simple one, and one that would have been easily comprehended by the whole of the Craft, who were in the constant use of them. Attempts, it is true, have been made to find the root of these three names in some recondite reference to the Hebrew names of God. But there is, I think, no valid authority for any such derivation. In the first place, the character and conduct of the supposed possessors of these names preclude the idea of any congruity and appropriateness between them and any of the Divine names. And again, the literary condition of the Craft at the time of the invention of the names equally precludes the probability that any names would have been fabricated of a recondite signification, and which could not have been readily understood and appreciated by the ordinary class of Masons who were to use them. The names must naturally have been of a construction that would convey a familiar idea, would be suitable to the incidents in which they were to be employed, and would be congruous with the character of the individuals upon whom they were to be bestowed. Now all these requisites meet in a word which was entirely familiar to the Craft at the time when these names were probably invented. The *Ghiblim* are spoken of by Anderson, meaning *Giblim*,

as stone-cutters or Masons; and the early rituals show us very clearly that the Fraternity in that day considered *Giblim* as the name of a Mason; not only of a Mason generally, but especially of that class of Masons who, as Drummond says, "put the finishing hand to King Solomon's Temple"—that is to say, the Fellow-Crafts. Anderson also places the *Ghiblim* among the Fellow-Crafts; and so, very naturally, the early Freemasons, not imbued with any amount of Hebrew learning, and not making a distinction between the singular and plural forms of that language, soon got to calling a Fellow-Craft a *Giblim*. The steps of corruption between *Giblim* and *Jubelum* were not very gradual; nor can anyone doubt that such corruptions of spelling and pronunciation were common among these illiterate Masons, when he reads the Old Manuscripts, and finds such verbal distortions as *Nembroch* for *Nimrod*, *Euglet* for *Euclid*, and *Aymon* for *Hiram*. Thus, the first corruption was from *Giblim* to *Gibalim*, which brought the word to three syllables, making it thus nearer to its eventual change. Then we find in the early rituals another transformation into *Chibbelum*. The French Masons also took the work of corruption in hand, and from *Giblim* they manufactured *Jiblime* and *Jibulum* and *Jabulum*. Some of these French corruptions came back to English Masonry about the time of the fabrication of the high degrees, and even the French words were distorted. Thus in the Leland Manuscript, the English Masons made out of *Pytagore*, the French for *Pythagoras*, the unknown name *Peter Gower*, which is said so much to have puzzled Mr. Locke. And so we may through these mingled English and French corruptions trace the genealogy of the word Jubelum; thus, Ghiblim, Giblim, Gibalim, Chibbelum, Jiblime, Jibelum, Jabelum, and, finally, Jubelum. It meant simply a Fellow-Craft, and was appropriately given as a common name to a particular Fellow-Craft who was distinguished for his treachery. In other words, he was designated, not by a special and distinctive name, but by the title of his condition and rank at the Temple. He was *the Fellow-Craft*, who was at the head of a conspiracy. As for the names of the other two Ruffians, they were readily constructed out of that of the greatest one by a simple change of the termination of the word from *um* to *a* in one, and from *um* to *o* in the other, thus preserving, by a similarity of names, the idea of their relationship, for the old rituals said that they were brothers who had come together out of Tyre. This derivation seems to me to be easy, natural, and comprehensible. The change from *Giblim*, or rather from *Gibalim* to *Jubelum*, is one that is far less extraordinary than that which one-half of the Masonic words have undergone in their transformation from their original to their present form.

Rule. An instrument with which straight lines are drawn, and therefore used in the Past Master's Degree as an emblem admonishing the Master punctually to observe his duty, to press forward in the path of virtue, and, neither inclining to the right nor the left, in all his actions to have eternity in view. The twenty-four-inch gage is often used in giving the instruction as a substitute for this working-tool. But they are entirely different; the twenty-four-inch gage is one of the working-tools of an Entered Apprentice, and requires to have the twenty-four inches marked upon its surface; the rule is one of the working-tools of a Past Master, and is without the twenty-four divisions. The rule is appropriated to the Past or Present Master, because, by its assistance, he is enabled to lay down on the trestle-board the designs for the Craft to work by.

Rule of the Templars. The code of regulations for the government of the Knights Templars, called their "Rule," was drawn up by St. Bernard, and by him submitted to Pope Honorius II. and the Council of Troyes, by both of whom it was approved. It is still in existence, and consists of seventy-two articles, partly monastic and partly military in character, the former being formed upon the Rule of the Benedictines. The first articles of the Rule are ecclesiastical in design, and require from the Knights a strict adherence to their religious duties. Article twenty defines the costume to be worn by the brotherhood. The professed soldiers were to wear a white costume, and the serving brethren were prohibited from wearing anything but a black or brown cassock. The Rule is very particular in reference to the fit and shape of the dress of the Knights, so as to secure uniformity. The brethren are forbidden to receive and open letters from their friends without first submitting them to the inspection of their superiors. The pastime of hawking is prohibited, but the nobler sport of lion-hunting is permitted, because the lion, like the devil, goes about continually roaring, seeking whom he may devour. Article fifty-five relates to the reception of married members, who are required to bequeath the greater portion of their property to the Order. The fifty-eighth article regulates the reception of aspirants, or secular persons, who are not to be received immediately on their application into the society, but are required first to submit to an examination as to sincerity and fitness. The seventy-second and concluding article refers to the intercourse of the Knights with females. No brother was allowed to kiss a woman, though she were his mother or sister. "Let the soldier of the cross," says St. Bernard, "shun all ladies' lips." At first this rule was rigidly enforced, but in time it was greatly relaxed, and the picture of the interior of a house of the Temple, as portrayed by the Abbot of Clairvaux, would scarcely have been appropriate a century or two later.

Rulers. Obedience to constituted authority has always been inculcated by the laws of Masonry. Thus, in the installation charges as prefixed to the Constitutions of the

Grand Lodge of England, the incoming Master is required to promise "to hold in veneration the original *rulers* and patrons of the Order of Freemasonry, and their regular successors, supreme and subordinate, according to their stations."

Russia. In 1731 Capt. John Philips was appointed to be Provincial Grand Master of Russia by Lord Lovel, Grand Master of England (*Constitutions*, 1738, p. 194), but it does not follow that there were any Lodges in Russia at that time. It is said that there was a Lodge in St. Petersburg as early as 1732; but its meetings must have been private, as the first notice that we have of a Lodge openly assembling in the empire is that of "Silence," established at St. Petersburg, and the "North Star" at Riga, both in the year 1750. Thory says that Masonry made but little progress in Russia until 1763, when the Empress Catherine II. declared herself the Protectress of the Order.

In 1765 the Rite of Melesino, a Rite unknown in any other country, was introduced by a Greek of that name; and there were at the same time the York, Swedish, and Strict Observance Rites practised by other Lodges. In 1783 twelve of these Lodges united and formed the National Grand Lodge, which, rejecting the other Rites, adopted the Swedish system. For a time Masonry flourished with unalloyed prosperity and popularity. But about the year 1794, the Empress, becoming alarmed at the political condition of France, and being persuaded that the members of some of the Lodges were in opposition to the government, withdrew her protection from the Order. She did not, however, direct the Lodges to be closed, but most of them, in deference to the wishes of the sovereign, ceased to meet. The few that continued to work were placed under the surveillance of the police, and soon languished, holding their communications only at distant intervals. In 1797, Paul I., instigated by the Jesuits, whom he had recalled, interdicted the meetings of all secret societies, and especially the Masonic Lodges. Alexander succeeded Paul in 1801, and renewed the interdict of his predecessor. In 1803, M. Boeber, counselor of state and director of the school of cadets at St. Petersburg, obtained an audience of the Emperor, and succeeded in removing his prejudices against Freemasonry. In that year, the edict was revoked, the Emperor himself was initiated in one of the revived Lodges, and the Grand Orient of all the Russias was established, of which M. Boeber was deservedly elected Grand Master. (*Acta Latomorum*, i., 218.) Freemasonry now again flourished, although in 1817 there were two Grand Lodges, that of Astrea, which worked on the system of tolerating all Rites, and a Provincial Lodge, which practised the Swedish system.

But suddenly, on the 12th of August, 1822, the Emperor Alexander, instigated, it is said, by the political condition of Poland, issued a decree ordering all the Lodges to be closed, and forbidding the erection of any new ones. The order was quietly obeyed by the Freemasons of Russia, and is still in force.

Russia, Secret Societies of. First, the Skopzis, founded about 1740, by Seliwanoff, on the ruins of an anterior sect, the Chlysty, which was originated by a peasant named Philippoff, in the seventeenth century. The Skopzis practise self-mutilation and other horrors. They are rich, and abound throughout Russia and in Bulgaria. Second, the Montainists, who declare that they have a "living Christ," a "living Mother of God," a "living Holy Spirit," and twelve "living Apostles." Their ceremonies are peculiar and but little resembling those of Masonry.

S

S. (Heb. ס, *Samech.*) The nineteenth letter in the English alphabet. Its numerical value is 60. The sacred application to the Deity is in the name Somech, סומך, *Fulcieus* or *Firmas*. The Hebrew letter Shin (a tooth, from its formation, ש) is of the numerical value of 300.

Saadh. One of a certain Indian sect, who have embraced Christianity, and who in some respects resemble the Quakers in their doctrine and mode of life. Sometimes written *saud*.

Sabaism. The worship of the sun, moon, and stars, the צבא השמים, Tsaba *Hashmaim*, "the host of heaven." It was practised in Persia, Chaldea, India, and other Oriental countries, at an early period of the world's history. (See *Blazing Star* and *Sun Worship*.)

Sabaoth. יהוה צבאות, *Jehovah Tsabaoth*, Jehovah of Hosts, a very usual appellation for the Most High in the prophetical books, especially in Isaiah, Jeremiah, Zechariah, and Malachi, but not found in the Pentateuch.

Sabbal. ("The Burthen.") The name of the sixth step of the mystic ladder of Kadosh of the A. A. Scottish Rite.

Sabbath. In the lecture of the Second or Fellow-Craft's Degree, it is said, In six days God created the heavens and the earth, and rested upon the seventh day;

the seventh, therefore, our ancient brethren consecrated as a day of rest from their labors, thereby enjoying frequent opportunities to contemplate the glorious works of creation, and to adore their great Creator.

Sablanism. See *Sabaism.*

Sacellum. A walled enclosure without roof. An ornamental chapel within a church.

Sackcloth. In the Rose Croix ritual, sackcloth is a symbol of grief and humiliation for the loss of that which it is the object of the degree to recover.

Sacred Asylum of High Masonry. In the *Institutes, Statutes, and Regulations,* signed by Adington, Chancellor, which are given in the *Recueil des Actes du Suprème Conseil du France,* as a sequence to the Constitutions of 1762, this title is given to any subordinate body of the Scottish Rite. Thus in Article XVI.: "At the time of the installation of a Sacred Asylum of High Masonry, the members composing it shall all make and sign their pledge of obedience to the Institutes, Statutes, and General Regulations of High Masonry." In this document the Rite is always called "High Masonry," and any body, whether a Lodge of Perfection, a Chapter of Rose Croix, or a Council of Kadosh, is styled a "Sacred Asylum."

Sacred Law. The first Tables of Stone, or Commandments, which were delivered to Moses on Mount Sinai, are referred to in a preface to the *Mishna,* bearing this tradition: "God not only delivered the Law to Moses on Mount Sinai, but the explanation of it likewise. When Moses came down from the Mount and entered into his tent, Aaron went to visit him, and Moses acquainted Aaron with the Laws he had received from God, together with the explanation of them. After this Aaron placed himself at the right hand of Moses, and Eleazar and Ithamar (the sons of Aaron) were admitted, to whom Moses repeated what he had just before told to Aaron. These being seated, the one on the right hand, the other on the left hand of Moses, the seventy elders of Israel, who compose the Sanhedrim, came in, and Moses again declared the same laws to them, as he had done before to Aaron and his sons. Lastly, all who pleased of the common people were invited to enter, and Moses instructed them likewise in the same manner as the rest. So that Aaron heard four times what Moses had been taught by God upon Mount Sinai, Eleazar and Ithamar three times, the seventy elders twice, and the people once. Moses afterward reduced the laws which he had received into writing, but not the explanation of them. These he thought it sufficient to trust to the memories of the above-mentioned persons, who, being perfectly instructed in them, delivered them to their children, and these again to theirs, from age to age."

The Sacred Law is repeated in the ritual of the Fourteenth Degree A. A. Scottish Rite.

Sacred Lodge. In the lectures according to the English system, we find this definition of the "Sacred Lodge." The symbol has not been preserved in the American ritual. Over the Sacred Lodge presided Solomon, the greatest of kings, and the wisest of men; Hiram, the great and learned King of Tyre; and Hiram Abif, the widow's son, of the tribe of Naphtali. It was held in the bowels of the sacred Mount Moriah, under the part whereon was erected the Holy of Holies. On this mount it was where Abraham confirmed his faith by his readiness to offer up his only son, Isaac. Here it was where David offered that acceptable sacrifice on the threshing-floor of Araunah by which the anger of the Lord was appeased, and the plague stayed from his people. Here it was where the Lord delivered to David, in a dream, the plan of the glorious Temple, afterward erected by our noble Grand Master, King Solomon. And lastly, here it was where he declared he would establish his sacred name and word, which should never pass away; and for these reasons this was justly styled the Sacred Lodge.

Sacrificant. (*Sacrifiant.*) A degree in the Archives of the Lodge of Saint Louis des Amis Réunis at Calais.

Sacrifice, Altar of. See *Altar.*

Sacrificer. (*Sacrificateur.*) 1. A degree in the Archives of the Lodge of Saint Louis des Amis Réunis at Calais. 2. A degree in the collection of Pyron.

Sadda. (Persian *Saddar,* the hundred gates.) A work in the Persian tongue, being a summary of the Avesta, or sacred books.

Sadducees. (*Zedukim.*) A sect called from its founder *Sadoc,* who lived about 250 years B.C. They denied the resurrection, a future state, and the existence of angels. The Sadducees are often mentioned in the New Testament, the Talmud, and the Midrash. The tenets of the Sadducees are noticed as contrasted with those of the Pharisees. While Jesus condemned the Sadducees and Pharisees, he is nowhere found criticizing the acts, words, or doctrines of the third sect of the Jews, the Essenes; wherefore, it has been strongly favored that Jesus was himself one of the last-named sect, who in many excellent qualities resembled Freemasons.

Sadler, Henry. (Born 1840, died 1911.) One of the most painstaking, patient, and persevering of Masonic students. He was initiated in 1862 in the Lodge of Justice, No. 147, being at the time an A. B. in the mercantile marine. He became W. M. of this Lodge in 1872. In 1882 he was a founder of the Southgate Lodge, No. 1950, and in 1886 he was a founder and first Master of the Walsingham Lodge, No. 2148; in 1869 he was exalted to the Royal Arch Degree in the Royal York Chapter, No. 7; in 1872 he joined the Temperance Chapter, No. 169, and became its First Principal in 1880. In 1879 he was appointed Grand Tiler of the Grand Lodge of England, and held the post until 1910, when he retired on a pension. In 1887 he was appointed Sub-

Librarian to the Grand Lodge of England and was promoted to be its Librarian in 1910. His position in the Grand Lodge Library gave him access to all the old records of the Grand Lodge of England, and enabled him to write most valuable books on various points in connection with the history of English Freemasonry. In 1887 appeared his principal work, *Masonic Facts and Fictions*, in which he proved that the Grand Lodge of the "Ancients" was formed in London by some Irish Freemasons, who had not seceded (as had been supposed) from the Regular Grand Lodge. In 1889 he published *Notes on the Ceremony of Installation;* in 1891, the *Life of Thomas Dunckerley;* in 1898, *Masonic Reprints and Historical Revelations;* in 1904, *Some Memorials of the Globe Lodge, No. 23*, also the *Illustrated History of Emulation Lodge of Improvement, No. 256;* and in 1906, the *History and Records of the Lodge of Emulation, No. 21.* [E. L. H.]

Sagitta. The keystone of an arch. The abscissa of a curve.

Saint Adhabell. Introduced into the Cooke MS. (l. 603), where the allusion evidently is to *St. Amphibalus*, which see.

Saint Alban. St. Alban, or Albanus, the proto-martyr of England, was born in the third century, at Verulam, now St. Albans, in Hertfordshire. In his youth he visited Rome, and served seven years as a soldier under the Emperor Diocletian. On his return to Britain he embraced Christianity, and was the first who suffered martyrdom in the great persecution which raged during the reign of that emperor. The Freemasons of England have claimed St. Alban as being intimately connected with the early history of the Fraternity in that island. Anderson (*Constitutions*, 1738, p. 57) says, "This is asserted by all the old copies of the Constitutions, and the old English Masons firmly believed it," and he quotes from the Old Constitutions:

"St. Alban loved Masons well and cherished them much, and he made their pay right good; *viz.*, two shillings per week and three pence to their cheer; whereas before that time, through all the land, a Mason had but a penny a day and his meat, until St. Alban amended it. He also obtained of the King a Charter for the Free Masons, for to hold a general council, and gave it the name of Assembly, and was thereat himself as Grand Master and helped to make Masons and gave them good charges."

We have another tradition on the same subject; for in a little work published about 1764, at London, under the title of *The Complete Free Mason or Multa Paucis for the Lovers of Secrets*, we find the following statement in reference to the Masonic character and position of St. Alban (p. 47):

"In the following (the third) century, Gordian sent many architects over [into England], who constituted themselves into Lodges, and instructed the Craftsmen in the true principles of Freemasonry; and a few years later, Carausius was made emperor of the British Isles, and, being a great lover of art and science, appointed Albanus Grand Master of Masons, who employed the Fraternity in building the palace of Verulam, or St. Albans."

Both of these statements are simply legends, or traditions of the not unusual character, in which historical facts are destroyed by legendary additions. The fact that St. Alban lived at Verulam may be true—most probably is so. It is another fact that a splendid Episcopal palace was built there, whether in the time of St. Alban or not is not so certain; but the affirmative has been assumed; and hence it easily followed that, if built in his time, he must have superintended the building of the edifice. He would, of course, employ the workmen, give them his patronage, and, to some extent, by his superior abilities, direct their labors. Nothing was easier, then, than to make him, after all this, a Grand Master. The assumption that St. Alban built the palace at Verulam was very natural, because, when the true builder's name was lost—supposing it to have been so—St. Alban was there ready to take his place, Verulam having been his birthplace.

The increase of pay for labor and the annual congregation of the Masons in a General Assembly, having been subsequent events, the exact date of whose first occurrence had been lost, by a process common in the development of traditions, they were readily transferred to the same era as the building of the palace at Verulam. It is not even necessary to suppose, by way of explanation, as Preston does, that St. Alban was a celebrated architect, and a real encourager of able workmen. The whole of the tradition is worked out of these simple facts: that architecture began to be encouraged in England about the third century; that St. Alban lived at that time at Verulam; that a palace was erected then, or at some subsequent period, in the same place; and in the lapse of time, Verulam, St. Alban, and the Freemasons became mingled together in one tradition. The inquiring student of history will neither assert nor deny that St. Alban built the palace of Verulam. He will be content with taking him as the representative of that builder, if he was not the builder himself; and he will thus recognize the proto-martyr as the type of what is supposed to have been the Masonry of his age, or, perhaps, only of the age in which the tradition received its form.

Saint Albans, Earl of. Anderson (*Constitutions*, 1738, p. 101) says, and, after him, Preston, that a General Assembly of the Craft was held on December 27, 1663, by Henry Jermyn, Earl of St. Albans, Grand Master, who appointed Sir John Denham his Deputy, and Sir Christopher Wren and John Web his Wardens. Several useful regulations were made at this assembly, known as the "Regulations of 1663." These regulations are given by Anderson and by Preston, and also in the Roberts MS., with the addition of the oath of secrecy. The Roberts MS. says that the assembly was held on the 8th of December.

Saint Amphibalus. The ecclesiastical legend is that St. Amphibalus came to England, and converted St. Alban, who was the great patron of Masonry. The Old Constitutions do not speak of him, except the Cooke MS., which has the following passage (l. 602): "And sone after that came Seynt Adhabell into Englond, and he convertyd Seynt Albon to Cristendome"; where, evidently, St. Adhabell is meant for St. Amphibalus. But *amphibalus* is the Latin name of a cloak worn by priests over their other garments; and Higgins (*Celtic Druids*, p. 201) has shown that there was no such saint, but that the "Sanctus Amphibalus" was merely the holy cloak brought by St. Augustine to England. His connection with the history of the origin of Masonry in England is, therefore, altogether apocryphal.

Saint Andrew. Brother of St. Peter and one of the twelve Apostles. He is held in high reverence by the Scotch, Swedes, and Russians. Tradition says he was crucified on a cross thus shaped, X. Orders of knighthood have been established in his name. (See *Knight of St. Andrew.*)

Saint Andrew, Knight of. See *Knight of St. Andrew.*

Saint Andrew's Day. The 30th of November, adopted by the Grand Lodge of Scotland as the day of its Annual Communication.

Saint Augustine. St. Augustine, or St. Austin, was sent with forty monks into England, about the end of the sixth century, to evangelize the country. Lenning says that, according to a tradition, he placed himself at the head of the corporations of builders, and was recognized as their Grand Master. No such tradition, nor, indeed, even the name of St. Augustine, is to be found in any of the Old Constitutions which contain the "Legend of the Craft."

Saint Bernard. Saint Bernard of Clairvaux was one of the most eminent names of the church in the Middle Ages. In 1128 he was present at the Council of Troyes, where, through his influence, the Order of Knights Templar was confirmed; and he himself is said to have composed the Rule or constitution by which they were afterward governed. Throughout his life he was distinguished for his warm attachment to the Templars, and "rarely," says Burnes (*Sketch of K. T.*, p. 12), "wrote a letter to the Holy Land, in which he did not praise them, and recommend them to the favor and protection of the great." To his influence, untiringly exerted in their behalf, has always been attributed the rapid increase of the Order in wealth and popularity.

Saint Constantine, Order of. Presumed to have been founded by the Emperor Isaac Angelus Comnenus, in 1190.

Saint Domingo. One of the principal islands of the West Indies. Freemasonry was introduced there at an early period in the last century. Rebold (*Hist. des Trois G. L.*, p. 687) says in 1746. It must certainly have been in an active condition there at a time not long after, for in 1761 Stephen Morin, who had been deputed by the Council of Emperors of the East and West to propagate the high degrees, selected St. Domingo for the seat of his Grand East, and thence disseminated the system, which resulted in the establishment of the Supreme Council of the Ancient and Accepted Scottish Rite at Charleston, South Carolina. The French Revolution, and the insurrection of the slaves at about the same period, was for a time fatal to the progress of Masonry in St. Domingo. Subsequently, the island was divided into two independent governments—that of Dominica, inhabited by whites, and that of Hayti, inhabited by blacks. In each of these a Masonic obedience has been organized. The Grand Lodge of Hayti has been charged with irregularity in its formation, and has not been recognized by the Grand Lodges of the United States. It has been, however, by those of Europe generally, and a representative from it was accredited at the Congress of Paris, held in 1855. Masonry was revived in Dominica, Rebold says (*ibid.*), in 1822; other authorities say in 1855. A Grand Lodge was organized at the city of St. Domingo, December 11, 1858. At the present time Dominican Masonry is established under the Ancient and Accepted Scottish Rite, and the National Grand Orient of the Dominican Republic is divided into four sections, namely, a Grand Lodge, Grand Chapter General, Grand Consistory General, and Supreme Council. The last body has not been recognized by the Mother Council at Charleston, since its establishment is in violation of the Scottish Constitutions, which prescribe one Supreme Council only for all the West India Islands.

Sainte Croix, Emanuel Joseph Guilhem de Clermont-Lodeve de. A French antiquary, and member of the Institute, who was born at Mormoiron, in 1746, and died in 1809. His work, published in two volumes in 1784, and entitled *Recherches Historiques et Critiques sur les Mystères du Paganisme*, is one of the most valuable and instructive essays that we have in any language on the ancient mysteries—those religious associations whose history and design so closely connect them with Freemasonry. The later editions were enriched by the valuable notes of Silvestre de Tracy.

Saint George's Day. The twenty-third of April. Being the patron saint of England, his festival is celebrated by the Grand Lodge. The Constitution requires that "there shall be a Grand Masonic festival annually on the Wednesday next following St. George's Day."

Saint Germain. A town in France, about ten miles from Paris, where James II. estab-

lished his court after his expulsion from England, and where he died. Oliver says (*Landm.*, ii., 28), and the statement has been repeatedly made by others, that the followers of the dethroned monarch who accompanied him in his exile, carried Freemasonry into France, and laid the foundation of that system of innovation which subsequently threw the Order into confusion by the establishment of a new degree, which they called the Chevalier Maçon Ecossais, and which they worked in the Lodge of St. Germain. But Oliver has here antedated history. James II. died in 1701, and Freemasonry was not introduced into France from England until 1725. The exiled house of Stuart undoubtedly made use of Masonry as an instrument to aid in their attempted restoration; but their connection with the Institution must have been after the time of James II., and most probably under the auspices of his grandson, the Young Pretender, Charles Edward.

Saint John, Favorite Brother of. The Eighth Degree of the Swedish Rite.

Saint John, Lodge of. See *Lodge of St. John.*

St. John of Jerusalem, Knight of. See *Knight of St. John of Jerusalem.*

Saint John's Masonry. The Constitutions of the Grand Lodge of Scotland (ed. 1848, chap. ii.) declare that that body "practises and recognizes no degrees of Masonry but those of Apprentice, Fellow Craft, and Master Mason, denominated *St. John's Masonry.*"

Saint John's Order. In a system of Masonry which Oliver says (*Mirror for the Johannites*, p. 58) was "used, as it is confidently affirmed, in the fourteenth century" (but it is doubtful if it could be traced farther back than the early part of the seventeenth), this appellation occurs in the obligation:

> "That you will always keep, guard, and conceal,
> And from this time you never will reveal,
> Either to M. M., F. C., or Apprentice,
> Of *St. John's* ORDER, what our grand intent is."

The same title of "Joannis Ordo" is given in the document of uncertain date known as the "Charter of Cologne."

St. John the Almoner. The son of the King of Cyprus, and born in that island in the sixth century. He was elected Patriarch of Alexandria, and has been canonized by both the Greek and Roman churches, his festival among the former occurring on the 11th of November, and among the latter on the 23d of January. Bazot (*Man. du Franc-Maçon.*, p. 144) thinks that it is this saint, and not St. John the Evangelist or St. John the Baptist, who is meant as the true patron of our Order. "He quitted his country and the hope of a throne," says this author, "to go to Jerusalem, that he might generously aid and assist the knights and pilgrims. He founded a hospital and organized a fraternity to attend upon sick and wounded Christians, and to bestow pecuniary aid upon the pilgrims who visited the Holy Sepulcher. St. John, who was worthy to become the patron of a society whose only object is charity, exposed his life a thousand times in the cause of virtue. Neither war, nor pestilence, nor the fury of the infidels, could deter him from pursuits of benevolence. But death, at length, arrested him in the midst of his labors. Yet he left the example of his virtues to the brethren, who have made it their duty to endeavor to imitate them. Rome canonized him under the name of St. John the Almoner, or St. John of Jerusalem; and the Masons—whose temples, overthrown by the barbarians, he had caused to be rebuilt—selected him with one accord as their patron." Oliver, however (*Mirror for the Johannite Masons*, p. 39), very properly shows the error of appropriating the patronage of Masonry to this saint, since the festivals of the Order are June 24th and December 27th, while those of St. John the Almoner are January 23d and November 11th. He has, however, been selected as the patron of the Masonic Order of the Templars, and their Commanderies are dedicated to his honor on account of his charity to the poor, whom he called his "Masters," because he owed them all service, and on account of his establishment of hospitals for the succor of pilgrims in the East.

Saint John the Baptist. One of the patron saints of Freemasonry, and at one time, indeed, the only one, the name of St. John the Evangelist having been introduced subsequent to the sixteenth century. His festival occurs on the 24th of June, and is very generally celebrated by the Masonic Fraternity. Dalcho (*Ahim. Rez.*, p. 150) says that "the stern integrity of St. John the Baptist, which induced him to forego every minor consideration in discharging the obligations he owed to God; the unshaken firmness with which he met martyrdom rather than betray his duty to his Master; his steady reproval of vice, and continued preaching of repentance and virtue, make him a fit patron of the Masonic institution."

The Charter of Cologne says: "We celebrate, annually, the memory of St. John, the Forerunner of Christ and the Patron of our Community." The Knights Hospitalers also dedicated their Order to him; and the ancient expression of our ritual, which speaks of a "Lodge of the Holy St. John of Jerusalem," probably refers to the same saint.

Krause, in his *Kunsturkunden* (p. 295–305), gives abundant historical proofs that the earliest Masons adopted St. John the Baptist, and not St. John the Evangelist as their patron. It is worthy of note that the Grand Lodge of England was revived on St. John the Baptist's Day, 1717 (*Constitutions*, 1738, p 109), and that the annual feast was kept on that day until 1725, when it was held for the first time on the festival of the Evangelist. (*Ibid.*, p. 119.) Lawrie says that the Scottish Masons always kept the festival of the Baptist until 1737, when the Grand Lodge changed the time of the annual election to St. Andrew's Day. (*Hist. of F. M.*, p. 152.)

Saint John the Evangelist. One of the patron saints of Freemasonry, whose festival is celebrated on the 27th of December. His constant admonition, in his Epistles, to the cultivation of brotherly love, and the mystical nature of his Apocalyptic visions, have been, perhaps, the principal reasons for the veneration paid to him by the Craft. Notwithstanding a well-known tradition, all documentary evidence shows that the connection of the name of the Evangelist with the Masonic Order is to be dated long after the sixteenth century, before which time St. John the Baptist was exclusively the patron saint of Masonry. The two are, however, now always united, for reasons set forth in the article on the *Dedication of Lodges*, which see.

Saint Leger. See *Aldworth, Mrs.*

Saint Martin, Louis Claude. A mystical writer and Masonic leader of considerable reputation in the last century, and the founder of the Rite of Martinism. He was born at Amboise, in France, on January 18, 1743, being descended from a family distinguished in the military service of the kingdom. Saint Martin when a youth made great progress in his studies, and became the master of several ancient and modern languages. After leaving school, he entered the army, in accordance with the custom of his family, becoming a member of the regiment of Foix. But after six years of service, he retired from a profession which he found uncongenial with his fondness for metaphysical pursuits. He then traveled in Switzerland, Germany, England, and Italy, and finally retired to Lyons, where he remained for three years in a state of almost absolute seclusion, known to but few persons, and pursuing his philosophic studies. He then repaired to Paris, where, notwithstanding the tumultuous scenes of the revolution which was working around, he remained unmoved by the terrible events of the day, and intent only on the prosecution of his theosophic studies. Attracted by the mystical systems of Boehme and Swedenborg, he became himself a mystic of no mean pretensions, and attracted around him a crowd of disciples, who were content, as they said, to hear, without understanding, the teachings of their leader. In 1775 appeared his first and most important work, entitled *Des Erreurs et de la Vérité, ou les Hommes rappelés au principe universal de la Science.* This work, which contained an exposition of the ideology of Saint Martin, acquired for its author, by its unintelligible transcendentalism, the title of the "Kant of Germany." Saint Martin had published this work under the pseudonym of the "Unknown Philosopher" (*le Philosophe inconnu*); whence he was subsequently known by this name, which was also assumed by some of his Masonic adherents; and even a degree bearing that title was invented and inserted in the Rite of Philalethes. The treatise *Des Erreurs et de la Vérité* was in fact made a sort of text-book by the Philalethans, and highly recommended by the Order of the Initiated Knights and Brothers of Asia, whose system was in fact a compound of theosophy and mysticism. It was so popular, that between 1775 and 1784 it had been through five editions.

Saint Martin, in the commencement of his Masonic career, attached himself to Martinez Paschalis, of whom he was one of the most prominent disciples. But he subsequently attempted a reform of the system of Paschalis, and established what he called a Rectified Rite, but which is better known as the Rite or system of Martinism, which consisted of ten degrees. It was itself subsequently reformed, and, being reduced to seven degrees, was introduced into some of the Lodges of Germany under the name of the Reformed Ecossism of Saint Martin.

The theosophic doctrines of Saint Martin were introduced into the Masonic Lodges of Russia by Count Gabrianko and Admiral Pleshcheyeff, and soon became popular. Under them the Martinist Lodges of Russia became distinguished not only for their Masonic and religious spirit—although too much tinged with the mysticism of Jacob Boehme and their founder—but for an active zeal in practical works of charity of both a private and public character.

The character of Saint Martin has been much mistaken, especially by Masonic writers. Those who, like Voltaire, have derided his metaphysical theories, seem to have forgotten the excellence of his private character, his kindness of heart, his amiable manners, and his varied and extensive erudition. Nor should it be forgotten that the true object of all his Masonic labors was to introduce into the Lodges of France a spirit of pure religion. His theory of the origin of Freemasonry was not, however, based on any historical research, and is of no value, for he believed that it was an emanation of the Divinity, and was to be traced to the very beginning of the world.

Saint Nicaise. A considerable sensation was produced in Masonic circles by the appearance at Frankfort, in 1755, of a work entitled *Saint Nicaise, oder eine Sammlung merkwürdiger Maürerischer Briefe, für Freimaürer und die es nicht.* A second edition was issued in 1786. Its title-page asserts it to be a translation from the French, but it was really written by Dr. Starck. It professes to contain the letters of a French Freemason who was traveling on account of Freemasonry, and having learned the mode of work in England and Germany, had become dissatisfied with both, and had retired into a cloister in France. It was really intended, although Starck had abandoned Masonry, to defend his system of Spiritual Templarism, in opposition to that of the Baron Von Hund. Accordingly, it was answered in 1786 by Von Sprengseisen, who was an ardent friend and admirer of Von Hund, in a work entitled *Anti Saint Nicaise*, which was immediately followed by two other essays by the same author, entitled *Archimedes*, and *Scala Algebraica Œconomica.* These three works have become exceedingly rare.

Saint Paul's Church. As St. Paul's, the Cathedral Church of London, was rebuilt by

Sir Christopher Wren—who is called, in the *Book of Constitutions* (1738, p. 107), the Grand Master of Masons—and some writers have advanced the theory that Freemasonry took its origin at the construction of that edifice. In the Fourth Degree of Fessler's Rite—which is occupied in the critical examination of the various theories on the origin of Freemasonry—among the seven sources that are considered, the building of St. Paul's Church is one. Nicolai does not positively assert the theory; but he thinks it not an improbable one, and believes that a new system of symbols was at that time invented. It is said that there was, before the revival in 1717, an old Lodge of St. Paul's; and it is reasonable to suppose that the Operative Masons engaged upon the building were united with the architects and men of other professions in the formation of a Lodge, under the regulation which no longer restricted the Institution to Operative Masonry. But there is no authentic historical evidence that Freemasonry first took its rise at the building of St. Paul's Church.

Saints John. The "Holy Saints John," so frequently mentioned in the ritual of Symbolic Masonry, are *St. John the Baptist* and *St. John the Evangelist*, which see. The original dedication of Lodges was to the "Holy St. John," meaning the Baptist.

Saints John, Festivals of. See *Festivals*.

Saint Victor, Louis Guillemain de. A French Masonic writer, who published, in 1781, a work in Adonhiramite Masonry, entitled *Receuil Précieux de la Maçonnerie Adonhiramite*. This volume contained the ritual of the first four degrees, and was followed, in 1787, by another, which contained the higher degrees of the Rite. If St. Victor was not the inventor of this Rite, he at least modified and established it as a working system, and, by his writings and his labors, gave to it whatever popularity it at one time possessed. Subsequent to the publication of his *Receuil Précieux*, he wrote his *Origine de la Maçonnerie Adonhiramite*, a learned and interesting work, in which he seeks to trace the source of the Masonic initiation to the mysteries of the Egyptian priesthood.

Sakinat. The Divine presence. The *Shekinah*, which see.

Sakti. The female energy of Brahma, of Vishnu, or especially of Siva. This lascivious worship was inculcated in the TANTRA ("Instrument of Faith"), a Sanskrit work, found under various forms, and regarded by its numerous Brahmanical and other followers as a "fifth Veda."

Salaam. The name of the Arabic form of salutation, which is by bowing the head and bringing the extended arms from the sides until the thumbs touch, the palms being down.

Saladin. More properly Salah-ed-din, Yussuf ibn Ayub, the Sultan of Egypt and Syria, in the time of Richard Cœur-de-Lion, and the founder of the Ayubite dynasty. As the great Moslem hero of the third Crusade, and the beau-ideal of Moslem chivalry, he is one of the most imposing characters presented to us by the history of that period. Born at Takreit, 1137; died at Damascus, 1193. In his manhood he had entered the service of Noureddin. He became Grand Vizier of the Fatimite Calif, and received the title of "the Victorious Prince." At Noureddin's death, Salah-ed-din combated the succession and became the Sultan of Syria and Egypt. For ten succeeding years he was in petty warfare with the Christians, until at Tiberias, in 1187, the Christians were terribly punished for plundering a wealthy caravan on its way to Mecca. The King of Jerusalem, two Grand Masters, and many warriors were taken captive, Jerusalem stormed, and many fortifications reduced. This roused Western Europe; the Kings of France and England, with a mighty host, soon made their appearance; they captured Acre in 1191, and Richard Cœur-de-Lion, with an invading force, twice defeated the Sultan, and obtained a treaty in 1192, by which the coast from Jaffa to Tyre was yielded to the Christians.

Salah-ed-din becomes a prominent character in two of the Consistorial degrees of the A. A. Scottish Rite, mainly exemplifying the universality of Masonry.

Salfi, Francesco. An Italian philosopher and litterateur, who was born at Cozenza, in Calabria, January 1, 1759, and died at Passy, near Paris, September, 1832. He was at one time professor of history and philosophy at Milan. He was a prolific writer, and the author of many works on history and political economy. He published, also, several poems and dramas, and received, in 1811, the prize given by the Lodge at Leghorn for a Masonic essay entitled *Della utilità della Franca-Massoneria sotto il rapporto filantropico è morale*.

Salix. A significant word in the high degrees, invented, most probably, at first for the system of the Council of Emperors of the East and West, and transferred to the Ancient and Accepted Scottish Rite. It is derived, say the old French rituals, from the initials of a part of a sentence, and has, therefore, no other meaning.

Salle des Pas Perdus. (*The Hall of the Lost Steps.*) The French thus call the anteroom in which visitors are placed before their admission into the Lodge. The Germans call it the fore-court (*Vorhof*), and sometimes, like the French, *der Saal der verlornen Schritte*. Lenning says that it derives its name from the fact that every step taken before entrance into the Fraternity, or not made in accordance with the precepts of the Order, is considered as lost.

Salomonis Sanctificatus Illuminatus, Magnus Jehova. The title of the reigning Master or third class of the Illuminated Chapter according to the Swedish system.

Salsette. An island in the Bay of Bombay, celebrated for stupendous caverns excavated artificially out of the solid rock, with a labor which must, says Mr. Grose, have been equal to that of erecting the Pyramids, and which were appropriated to the initiations in the Ancient Mysteries of India.

Salt. In the Helvetian ritual salt is added to corn, wine, and oil as one of the elements of consecration, because it is a symbol of the wisdom and learning which should characterize a Mason's Lodge. When the foundation-stone of a Lodge is laid, the Helvetian ritual directs that it shall be sprinkled with salt, and this formula be used: "May this undertaking, contrived by wisdom, be executed in strength and adorned with beauty, so that it may be a house where peace, harmony, and brotherly love shall perpetually reign."

Salutation. Lenning says, that in accordance with the usage of the Operative Masons, it was formerly the custom for a strange brother, when he visited a Lodge, to bring to it such a salutation as this: "From the Right Worshipful Brethren and Fellows of a Right Worshipful and Holy Lodge of St. John." The English salutation, at the middle of the last century, was: "From the Right Worshipful Brothers and Fellows of the Right Worshipful and Holy Lodge of St. John, from whence I come and greet you thrice heartily well." The custom has become obsolete, although there is an allusion to it in the answer to the question, "Whence come you?" in the modern catechism of the Entered Apprentice's Degree. But Lenning is incorrect in saying that the salutation went out of use after the introduction of certificates. The salutation was, as has been seen, in use in the eighteenth century, and certificates were required as far back at least as the year 1683.

Salutem. (*Lat.* Health.) When the Romans wrote friendly letters, they prefixed the letter S as the initial of Salutem, or health, and thus the writer expressed a wish for the health of his correspondent. At the head of Masonic documents we often find this initial letter thrice repeated, thus: S.·. S.·. S.·., with the same signification of Health, Health, Health. It is equivalent to the English expression, "Thrice Greeting."

Salute Mason. Among the Stone-Masons of Germany, in the Middle Ages, a distinction was made between the *Grussmaurer* or *Wortmaurer*, the *Salute Mason* or *Word Mason*, and the *Schriftmaurer* or *Letter Mason*. The Salute Masons had signs, words, and other modes of recognition by which they could make themselves known to each other; while the Letter Masons, who were also called *Briefträger* or *Letter Bearers*, had no mode, when they visited strange Lodges, of proving themselves, except by the certificates or written testimonials which they brought with them. Thus, in the "examination of a German Stone-Mason," which has been published in Fallou's *Mysterien der Freimaurerei* (p. 25), and copied thence by Findel, we find these questions proposed to a visiting brother, and the answers thereto:

"*Warden.* Stranger, are you a Letter Mason or a Salute Mason?

"*Stranger.* I am a Salute Mason.

"*Warden.* How shall I know you to be such?

"*Stranger.* By my salute and words of my mouth." (*Hist. of F. M.*, p. 659.)

Samaria. A city situated near the center of Palestine, and built by Omri, King of Israel, about 925 B.C. It was the metropolis of the kingdom of Israel, or of the ten tribes, and was, during the exile, peopled by many Pagan foreigners sent to supply the place of the deported inhabitants. Hence it became a seat of idolatry, and was frequently denounced by the prophets. (See *Samaritans.*)

Samaritan, Good. See *Good Samaritan.*

Samaritans. The Samaritans were originally the descendants of the ten revolted tribes who had chosen Samaria for their metropolis. Subsequently, the Samaritans were conquered by the Assyrians under Shalmaneser, who carried the greater part of the inhabitants into captivity, and introduced colonies in their place from Babylon, Cultah, Ava, Hamath, and Sepharvaim. These colonists, who assumed the name of Samaritans, brought with them of course the idolatrous creed and practises of the region from which they emigrated. The Samaritans, therefore, at the time of the rebuilding of the second Temple, were an idolatrous race, and as such abhorrent to the Jews. Hence, when they asked permission to assist in the pious work of rebuilding the Temple, Zerubbabel, with the rest of the leaders, replied, "Ye have nothing to do with us to build a house unto our God; but we ourselves together will build unto the Lord God of Israel, as King Cyrus, the king of Persia, has commanded us."

Hence it was that, to avoid the possibility of these idolatrous Samaritans polluting the holy work by their cooperation, Zerubbabel found it necessary to demand of every one who offered himself as an assistant in the undertaking that he should give an accurate account of his lineage, and prove himself to have been a descendant (which no Samaritan could be) of those faithful Giblemites who worked at the building of the first Temple.

There were many points of religious difference between the Jews and the Samaritans. One was, that they denied the authority of any of the Scriptures except the Pentateuch; another was that they asserted that it was on Mount Gerizim, and not on Mount Moriah, that Melchizedek met Abraham when returning from the slaughter of the kings, and that here also he came to sacrifice Isaac, whence they paid no reverence to Moriah as the site of the "Holy House of the Lord." A few of the sect still remain at Nabulus. They do not exceed one hundred and fifty. They have a high priest, and observe all the feasts of the ancient Jews, and especially that of the Passover, which they keep on Mount Gerizim with all the formalities of the ancient rites.

Samothracian Mysteries. The Mysteries of the Cabiri are sometimes so called because the principal seat of their celebration was in the island of Samothrace. "I ask," says Voltaire (*Dict. Phil.*), "who were these Hierophants, these sacred Freemasons, who celebrated their Ancient Mysteries of Samothracia, and whence came they and their gods Cabiri?" (See *Cabiric Mysteries.*)

Sanctuary. The Holy of Holies in the Temple of Solomon. (See *Holy of Holies.*)

Sanctum Sanctorum. Latin for *Holy of Holies*, which see.

Sandalphon. In the Rabbinical system of Angelology, one of the three angels who receive the prayers of the Israelites and weave crowns from them. Longfellow availed himself of this idea in one of his most beautiful poems.

Sandwich Islands. Freemasonry was first introduced into those far islands of the Pacific by the Grand Orient of France, which issued a Dispensation for the establishment of a Lodge about 1848, or perhaps earlier; but it was not prosperous, and soon became dormant. In 1852, the Grand Lodge of California granted a Warrant to Hawaiian Lodge, No. 21, on its register at Honolulu. Royal Arch and Templar Masonry have both been since introduced. Honolulu Chapter was established in 1859, and Honolulu Commandery in 1871.

San Graal. Derived, probably, from the old French, *sang real*, the true blood; although other etymologies have been proposed. The San Graal is represented, in legendary history, as being an emerald dish in which our Lord had partaken of the last supper. Joseph of Arimathea, having further sanctified it by receiving into it the blood issuing from the five wounds, afterward carried it to England. Subsequently it disappeared in consequence of the sins of the land, and was long lost sight of. When Merlin established the Knights of the Round Table, he told them that the San Graal should be discovered by one of them, but that he only could see it who was without sin. One day, when Arthur was holding a high feast with his Knights of the Round Table, the San Graal suddenly appeared to him and to all his chivalry, and then as suddenly disappeared. The consequence was that all the knights took upon them a solemn vow to seek the Holy Dish. "The quest of the San Graal" became one of the most prominent myths of what has been called the Arthuric cycle. The old French romance of the *Morte d'Arthur*, which was published by Caxton in 1485, contains the adventures of Sir Galahad in search of the San Graal. There are several other romances of which this wonderful vessel, invested with the most marvelous properties, is the subject. *The quest of the San Graal* very forcibly reminds us of *the search for the Lost Word*. The symbolism is precisely the same—the loss and the recovery being but the lesson of death and eternal life —so that the San Graal in the Arthurian myth, and the Lost Word in the Masonic legend, seem to be identical in object and design. Hence it is not surprising that a French writer, M. de Caumont, should have said (*Bulletin Monument*, p. 129) that "the poets of the twelfth and fourteenth centuries, who composed the romances of the Round Table, made Joseph of Arimathea the chief of a military and religious Freemasonry."

Sanhedrim. The highest judicial tribunal among the Jews. It consisted of seventy-two persons besides the high priest. It is supposed to have originated with Moses, who instituted a council of seventy on the occasion of a rebellion of the Israelites in the wilderness. The room in which the Sanhedrim met was a rotunda, half of which was built without the Temple and half within, the latter part being that in which the judges sat. The Nasi, or prince, who was generally the high priest, sat on a throne at the end of the hall; his deputy, called Ab-beth-din, at his right hand; and the subdeputy, or Chacan, at his left; the other senators being ranged in order on each side. Most of the members of this council were priests or Levites, though men in private stations of life were not excluded.

According to the English system of the Royal Arch, a Chapter of Royal Arch Masons represents the Sanhedrim, and therefore it is a rule that it shall never consist of more than seventy-two members, although a smaller number is competent to transact any business. This theory is an erroneous one, for in the time of Zerubbabel there was no Sanhedrim, that tribunal having been first established after the Macedonian conquest. The place in the Temple where the Sanhedrim met was called "Gabbatha," or the "Pavement"; it was a room whose floor was formed of ornamental square stones, and it is from this that the Masonic idea has probably arisen that the floor of the Lodge is a tessellated or mosaic pavement.

Sapicole, The. Thory (*Acta Lat.*, i., 339) says that a degree by this name is cited in the nomenclature of Fustier, and is also found in the collection of Viany.

Sapphire. Hebrew, סַפִּיר. The second stone in the second row of the high priest's breastplate, and was appropriated to the tribe of Naphtali. The chief priest of the Egyptians wore round his neck an image of truth and justice made of sapphire.

Saracens. Although originally only an Arab tribe, the word Saracens was afterward applied to all the Arabs who embraced the tenets of Mohammed. The Crusaders especially designated as Saracens those Mohammedans who had invaded Europe, and whose possession of the Holy Land gave rise not only to the Crusades, but to the organization of the military and religious orders of Templars and Hospitalers, whose continual wars with the Saracens constitute the most important chapters of the history of those times.

Sardinia. Freemasonry was introduced into this kingdom in 1737. (Rebold, *Hist. des Trois Grandes Loges*, p. 686.)

Sardius. Hebrew, אֹדֶם, *Odem*. The first stone in the first row of the high priest's breastplate. It is a species of carnelian of a blood-red color, and was appropriated to the tribe of Reuben.

Sarsena. A pretended exposition of Freemasonry, published at Baumberg, Germany, in 1816, under the title of "Sarsena, or the Perfect Architect," created a great sensation at the time among the initiated and the profane.

It professed to contain the history of the origin of the Order, and the various opinions upon what it should be, "faithfully described by a true and perfect brother, and extracted from the papers which he left behind him." Like all other expositions, it contained, as Gädicke remarks, very little that was true, and of that which was true nothing that had not been said before.

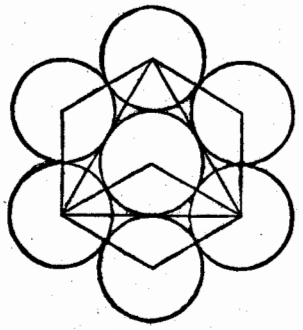
Sash. The old regulation on the subject of wearing sashes in a procession is in the following words: "None but officers, who must always be Master Masons, are permitted to wear sashes; and this decoration is only for particular officers." In this country the wearing of the sash appears, very properly, to be confined to the W.·. Master, as a distinctive badge of his office.

The sash is worn by all the companions of the Royal Arch Degree, and is of a scarlet color, with the words "Holiness to the Lord" inscribed upon it. These were the words placed upon the miter of the high priest of the Jews.

In the Ancient and Accepted Scottish Rite, the white sash is a decoration of the Thirty-third Degree. A recent decree of the Supreme Council of the Southern Jurisdiction confines its use to honorary members, while active members only wear the collar.

The sash, or scarf, is analogous to the Zennar, or sacred cord, which was placed upon the candidate in the initiation into the mysteries of India, and which every Brahman was compelled to wear. This cord was woven with great solemnity, and being put upon the left shoulder, passed over to the right side and hung down as low as the fingers could reach.

Saskatchewan. The Brethren of the Province of Saskatchewan assembled at Regina on the 10th day of August, 1906, and formally resolved themselves into the "Grand Lodge of Saskatchewan." Twenty-five lodges out of twenty-eight located in the Province were represented. M. W. Bro. H. H. Campkin was elected Grand Master and was installed by M. W. Bro. McKenzie, Grand Master of Manitoba.



Sastra. One of the sacred books of the Hindu law.

Sat B'hai, Royal Oriental Order of the. Said to have originated in India, and so named after a bird held sacred by the Hindus, whose flight, invariably in sevens, has obtained for the Society the appellation of the "Seven Brethren," hence the name. It embosoms seven degrees—Arch Censor, Arch Courier, Arch Minister, Arch Herald, Arch Scribe, Arch Auditor, and Arch Mute. It promises overmuch.

The figure in opposite column is termed the Mystery of the Apex.

Satrap. The title given by the Greek writers to the Persian governors of provinces before Alexander's conquest. It is from the Persian word *satrab*. The authorized version calls them the "kings lieutenants"; the Hebrew, *achashdarpenim*, which is doubtless a Persian word Hebraized. It was these satraps who gave the Jews so much trouble in the rebuilding of the Temple. They are alluded to in the congeneric degrees of Companion of the Red Cross and Prince of Jerusalem.

Savalette de Langes. Founder of the Rite of Philalethes at Paris, in 1773. He was also the President and moving spirit of the Masonic Congress at Paris, which met in 1785 and 1787 for the purpose of discussing many important points in reference to Freemasonry. The zeal and energy of Savalette de Langes had succeeded in collecting for the Lodge of the Philalethes a valuable cabinet of natural history and a library containing many manuscripts and documents of great importance. His death, which occurred soon

after the beginning of the French Revolution, and the political troubles that ensued, caused the dispersion of the members and the loss of a great part of the collection. The remnant subsequently came into the possession of the Lodges of St. Alexander of Scotland, and of the Social Contrat, which constituted the Philosophic Scottish Rite.

Saxony. The first Masonic Lodge in Saxony appeared at Dresden, in 1738; within four years thereafter two others had been established in Leipzig and Altenburg. The Grand Lodge was formed in 1811.

Sayer, Anthony. At the revival in 1717, "Mr. Antony Sayer, gentleman," was elected Grand Master. (*Constitutions*, 1738, p. 110.) He was succeeded in the next year by George Payne, Esq. In 1719, he was appointed Senior Grand Warden by Grand Master Desaguliers. Afterward he fell into bad circumstances and in 1730 a sum of £15 was granted to him by Grand Lodge, followed by a further grant of £2.2.0 in 1741. In December, 1730, a complaint was made to Grand Lodge of some irregular conduct on his part, and he was acquitted of the charge, whatever it was, but told to do nothing so irregular for the future. When he died, either late in 1741 or early in 1742, he was Tiler of what is now the Old King's Arms Lodge, No. 28. A portrait of him by Highmore, the celebrated painter, is in existence, mezzotinto copies of which are not uncommon. [E. L. H.]

Scald Miserables. A name given to a set of persons who, in 1741, formed a mock procession in derision of the Freemasons. Sir John Hawkins, speaking, in his *Life of*

Johnson (p. 336), of Paul Whitehead, says: "In concert with one Carey, a surgeon, he planned and exhibited a procession along the Strand of persons on foot and on horseback, dressed for the occasion, carrying mock ensigns and the symbols of Freemasonry; the design of which was to expose to laughter the insignia and ceremonies of that mysterious institution; and it was not until thirty years afterward that the Fraternity recovered from the disgrace which so ludicrous a representation had brought on it." The incorrectness of this last statement will be evident to all who are acquainted with the successful progress made by Freemasonry between the years 1741 and 1771, during which time Sir John Hawkins thinks that it was languishing under the blow dealt by the mock procession of the Scald Miserables.

A better and fuller account is contained in the *London Daily Post* of March 20, 1741. "Yesterday, some mock Freemasons marched through Pall Mall and the Strand as far as Temple Bar in procession; first went fellows on jackasses, with cows' horns in their hands; then a kettle-drummer on a jackass, having two butter firkins for kettle-drums; then followed two carts drawn by jackasses, having in them the stewards with several badges of their order; then came a mourning-coach drawn by six horses, each of a different color and size, in which were the Grand Master and Wardens; the whole attended by a vast mob. They stayed without Temple Bar till the Masons came by, and paid their compliments to them, who returned the same with an agreeable humor that possibly disappointed the witty contriver of this mock scene, whose misfortune is that, though he has some wit, his subjects are generally so ill chosen that he loses by it as many friends as other people of more judgment gain."

April 27th, being the day of the annual feast, "a number of shoe-cleaners, chimney-sweepers, etc., on foot and in carts, with ridiculous pageants carried before them, went in procession to Temple Bar, by way of jest on the Freemasons." A few days afterward, says the same journal, "several of the Mock Masons were taken up by the constable empowered to impress men for his Majesty's service, and confined until they can be examined by the justices."

It was, as Hone remarks (*Anc. Myst.*, p. 242), very common to indulge in satirical pageants, which were accommodated to the amusement of the vulgar, and he mentions this procession as one of the kind. A plate of the mock procession was engraved by A. Benoist, a drawing-master, under the title of "A Geometrical View of the Grand Procession of the Scald Miserable Masons, designed as they were drawn up over against Somerset House in the Strand, on the 27th day of April, Anno 1742." Of this plate there is a copy in Clavel's *Histoire Pittoresque*. With the original plate Benoist published a key, as follows, which perfectly agrees with the copy of the plate in Clavel:

"No. 1. The grand Sword-Bearer, or Tyler, carrying the Sword of State, (a present of Ishmael Abiff to old Hyram, King of the Saracens,) to his Grace of Wattin, Grand Master of the Holy Lodge of St. John of Jerusalem in Clerkenwell. 2. Tylers or Guarders. 3. Grand Chorus of Instruments. 4. The Stewards, in three Gutt-carts drawn by Asses. 5. Two famous Pillars. 6. Three great Lights: the Sun, Hieroglyphical, to rule the Day; the Moon, Emblematical, to rule the Night; a Master Mason, Political, to rule his Lodge. 7. The Entered Prentice's Token. 8. The letter G, famous in Masonry for differencing the Fellow Craft's Lodge from that of Prentices. 9. The Funeral of a Grand Master according to the Rites of the Order, with the Fifteen loving Brethren. 10. A Master Mason's Lodge. 11. Grand Band of Musick. 12. Two Trophies; one being that of a Black-shoe Boy and a Sink Boy, the other that of a Chimney-Sweeper. 13. The Equipage of the Grand Master, all the Attendants wearing Mystical Jewells."

The *historical* mock procession of the Scald Miserables was, it thus appears, that which occurred on April 27th, and not the preceding one of March 20th, which may have been only a feeler, and having been well received by the populace there might have been an encouragement for its repetition. But it was not so popular with the higher classes, who felt a respect for Freemasonry, and were unwilling to see an indignity put upon it. A writer in the London *Freemasons' Magazine* (1858, I., 875) says: "The contrivers of the mock procession were at that time said to be Paul Whitehead, Esq., and his intimate friend (whose real Christian name was *Esquire*) Carey, of Pall Mall, surgeon to Frederick, Prince of Wales. The city officers did not suffer this procession to go through Temple Bar, the common report then being that its real interest was to affront the annual procession of the Freemasons. The Prince was so much offended at this piece of ridicule, that he immediately removed Carey from the office he held under him."

Smith (*Use and Abuse of Freemas.*, p. 78) says that "about this time (1742) an order was issued to discontinue all public processions on feast days, on account of a mock procession which had been planned, at a considerable expense, by some prejudiced persons, with a view to ridicule these public cavalcades." Smith is not altogether accurate. There is no doubt that the ultimate effect of the mock procession was to put an end to what was called "the march of procession" on the feast day, but that effect did not show itself until 1747, in which year it was resolved that it should in future be discontinued. (*Constitutions*, 1756, p. 248.)*

* On the subject of these mock processions there is an article by Dr. W. J. Chetwode Crawley in *Ars Quatuor Coronatorum*, vol. 18,

Scales, Pair of. "Let me be weighed in an even balance," said Job, "that God may know mine integrity"; and Solomon says that "a false balance *is* abomination to the Lord, but a just weight is his delight." So we find that among the ancients a balance, or pair of scales, was a well-known recognized symbol of a strict observation of justice and fair dealing. This symbolism is also recognized in Masonry, and hence in the degree of Princes of Jerusalem, the duty of which is to administer justice in the inferior degrees, a pair of scales is the most important symbol.

Scallop-Shell. The scallop-shell, the staff, and sandals form a part of the costume of a Masonic Knights Templar in his character as a Pilgrim Penitent. Shakespeare makes Ophelia sing—

> "And how shall I my true love know
> From any other one?
> O, by his scallop-shell and staff,
> And by his sandal shoon!"

The scallop-shell was in the Middle Ages the recognized badge of a pilgrim; so much so, that Dr. Clarke (*Travels*, ii., 538) has been led to say: "It is not easy to account for the origin of the shell as a badge worn by the pilgrims, but it decidedly refers to much earlier Oriental customs than the journeys of Christians to the Holy Land, and its history will probably be found in the mythology of eastern nations." He is right as to the question of antiquity, for the shell was an ancient symbol of the Syrian goddess Astarte, Venus Pelagia, or Venus rising from the sea. But it is doubtful whether its use by pilgrims is to be traced to so old or so Pagan an authority. Strictly, the scallop-shell was the badge of pilgrims visiting the shrine of St. James of Compostella, and hence it is called by naturalists the *pecten Jacobæus*—the comb shell of St. James. Fuller (*Ch. Hist.*, ii., 228) says: "All pilgrims that visit St. James of Compostella in Spain returned thence *obsiti conchis*, 'all beshelled about' on their clothes, as a religious donative there bestowed upon them." Pilgrims were, in fact, in Medieval times distinguished by the peculiar badge which they wore, as designating the shrine which they had visited. Thus pilgrims from Rome wore the keys, those from St. James the scallop-shell, and those from the Holy Land palm branches, whence such a pilgrim was sometimes called a *palmer*. But this distinction was not always rigidly adhered to, and pilgrims from Palestine frequently wore the shell. At first the shell was sewn on the cloak, but afterward transferred to the hat; and while, in the beginning, the badge was not assumed until the pilgrimage was accomplished, eventually pilgrims began to wear it as soon as they had taken their vow of pilgrimage, and before they had commenced their journey.

Both of these changes have been adopted in the Templar ritual. The pilgrim, although symbolically making his pilgrimage to the Holy Sepulcher in Palestine, adopts the shell more properly belonging to the pilgrimage to Compostella; and adopts it, too, not after his visit to the shrine, but as soon as he has assumed the character of a pilgrim, which, it will be seen from what has been said, is historically correct, and in accordance with the later practise of Medieval pilgrims.

Scarlet. See *Red*.

Scenic Representations. In the Ancient Mysteries scenic representations were employed to illustrate the doctrines of the resurrection, which it was their object to inculcate. Thus the allegory of the initiation was more deeply impressed, by being brought vividly to the sight as well as to the mind of the aspirant. Thus, too, in the religious mysteries of the Middle Ages, the moral lessons of Scripture were dramatized for the benefit of the people who beheld them. The Christian virtues and graces often assumed the form of personages in these religious plays, and fortitude, prudence, temperance, and justice appeared before the spectators as living and acting beings, inculcating by their actions and by the plot of the drama those lessons which would not have been so well received or so thoroughly understood, if given merely in a didactic form. The advantage of these scenic representations, consecrated by antiquity and tested by long experience, is well exemplified in the ritual of the Third Degree of Masonry, where the dramatization of the great legend gives to the initiation a singular force and beauty. It is surprising, therefore, that the English system never adopted, or, if adopted, speedily discarded, the drama of the Third Degree, but gives only in the form of a narrative what the American system more wisely and more usefully presents by living action. Throughout America, in every State excepting Pennsylvania, the initiation into the Third Degree constitutes a scenic representation. The latter State alone preserves the less impressive didactic method of the English system. The rituals of the Continent of Europe pursue the same scenic form of initiation, and it is therefore most probable that this was the ancient usage, and that the present English ritual is of comparatively recent date.

Scepter. An ensign of sovereign authority, and hence carried in several of the high degrees by officers who represent kings.

Schaw Manuscript. This is a code of laws for the government of the Operative Masons of Scotland, drawn up by William Schaw, the Master of the Work to James VI. It bears the following title: "The Statutis and Ordinanceis to be obseruit be all the Maister-Maissounis within this realme sett down be Williame Schaw, Maister of Wark to his Maieste and generall Wardene of the said Craft, with the consent of the Maisteris efter specifeit." As will be perceived by this title, it is in the Scottish dialect. It is written

on paper, and dated XXVIII December, 1598. Although containing substantially the general regulations which are to be found in the English manuscripts, it differs materially from them in many particulars. Masters, Fellow-Crafts, and Apprentices are spoken of, but simply as gradations of rank, not as degrees, and the word "Ludge" or Lodge is constantly used to define the place of meeting. The government of the Lodge was vested in the Warden, Deacons, and Masters, and these the Fellow-Crafts and Apprentices were to obey. The highest officer of the Craft is called the General Warden. The Manuscript is in possession of the Lodge of Edinburgh, but has several times been published—first in the *Laws and Constitutions of the Grand Lodge of Scotland*, in 1848; then in the American edition of that work, published by Dr. Robert Morris, in the ninth volume of the *Universal Masonic Library;* afterward by W. A. Laurie, in 1859, in his *History of Freemasonry and the Grand Lodge of Scotland;* D. Murray Lyon in *Hist. of the Lodge of Edinburgh* gives a transcript and the last part in facsimile; and lastly, by W. J. Hughan, in his *Unpublished Records of the Craft.*

Schaw, William. A name which is intimately connected with the history of Freemasonry in Scotland. For the particulars of his life, we are principally indebted to the writer (said to have been Sir David Brewster, *Lyon's Hist. of Lodge of Edinburgh*, p. 55) of "Appendix Q. 2," in the *Constitutions of the Grand Lodge of Scotland* (1848).

William Schaw was born in the year 1550, and was probably a son of Schaw of Sauchie, in the shire of Clackmannon. He appears from an early period of life to have been connected with the royal household. In proof of this we may refer to his signature attached to the original parchment deed of the National Covenant, which was signed by King James VI. and his household at the Palace of Holyrood, 28th January, 1580–1. In 1584, Schaw became successor to Sir Robert Drummond, of Carnock, as Master of Works. This high official appointment placed under his superintendence all the royal buildings and palaces in Scotland; and in the Treasurer's accounts of a subsequent period various sums are entered as having been paid to him in connection with these buildings for improvements, repairs, and additions. Thus, in September, 1585, the sum of £315 was paid "to *William Schaw, his Majestie's Maister of Wark*, for the reparation and mending of the Castell of Striueling," and in May, 1590, £400, by his Majesty's precept, was "delyverit to William Schaw, the Maister of Wark, for reparation of the hous of Dumfermling, befoir the Queen's Majestie passing thairto."

Sir James Melville, in his *Memoirs*, mentions that, being appointed to receive the three Danish Ambassadors who came to Scotland in 1585 (with overtures for an alliance with one of the daughters of Frederick II.), he requested the king that two other persons might be joined with him, and for this purpose he named Schaw and James Meldrum, of Seggie, one of the Lords of Session. It further appears that Schaw had been employed in various missions to France. He accompanied James VI. to Denmark in the winter of 1589, previous to the king's marriage with the Princess Anna of Denmark, which was celebrated at Upslo, in Norway, on the 23d of November. The king and his attendants remained during the winter season in Denmark, but Schaw returned to Scotland on the 16th of March, 1589–90, for the purpose of making the necessary arrangements for the reception of the wedding-party. Schaw brought with him a paper subscribed by the king, containing the "Ordour set down be his Majestie to be effectuat be his Hienes Secreit Counsall, and preparit agane his Majestie's returne in Scotland," dated in February, 1589–90. The king and his royal bride arrived in Leith on the 1st of May, and remained there six days, in a building called "The King's Work," until the Palace of Holyrood was prepared for their reception. Extensive alterations had evidently been made at this time at Holyrood, as a warrant was issued by the Provost and Council of Edinburgh to deliver to William Schaw, Maister of Wark, the sum of £1000, "restand of the last taxation of £20,000" granted by the Royal Buroughs in Scotland, the sum to be expended "in biggin and repairing of his Hienes Palice of Halyrud-house," 14th March, 1589–90. Subsequent payments to Schaw occur in the Treasurer's accounts for broad scarlet cloth and other stuff for "burde claythes and coverings to forms and windows bayth in the Kirk and Palace of Halyrud-house." On this occasion various sums were also paid by a precept from the king for dresses, etc., to the ministers and others connected with the royal household. On this occasion William Schaw, Maister of Wark, received £133 6s. 8*d*. The queen was crowned on the 17th of May, and two days following she made her first public entrance into Edinburgh. The inscription on Schaw's monument states that he was, in addition to his office of Master of the Works, "Sacris ceremoniis præpositus" and "Reginæ Quæstor," which Monteith has translated "Sacrist and Queen's Chamberlain." This appointment of Chamberlain evinces the high regard in which the queen held him; but there can be no doubt that the former words relate to his holding the office of General Warden of the ceremonies of the Masonic Craft, an office analogous to that of Substitute Grand Master as now existing in the Grand Lodge of Scotland.

William Schaw died April 18, 1602, and was buried in the Abbey Church of Dunfermline, where a monument was erected to his memory by his grateful mistress, the queen. On this monument is his name and monogram cut in a marble slab, which, tradition says, was executed by his own

hand, and containing his Mason's mark, and an inscription in Latin, in which he is described as one imbued with every liberal art and science, most skilful in architecture, and in labors and business not only unwearied and indefatigable, but ever assiduous and energetic. No man appears, from the records, to have lived with more of the commendation, or died with more of the regret of others, than this old Scottish Mason.

Schismatic. Thory (*Hist. de la Fond. du G. O.*) thus calls the brethren who, expelled by the Grand Lodge of France, had formed, in the year 1772, a rival body under the name of the National Assembly. Any body of Masons separating from the legal obedience, and establishing a new one not authorized by the laws of Masonry —such, for instance, as the Saint John's Grand Lodge in New York—is properly schismatic.

Schisms. This, which was originally an ecclesiastical term, and signifies, as Milton defines it, "a rent or division in the church when it comes to the separating of congregations," is unfortunately not unknown in Masonic history. It is in Masonic, as in canon law, a withdrawing from recognized authority, and setting up some other authority in its place. The first schism recorded after the revival of 1717, was that of the Duke of Wharton, who, in 1722, caused himself to be irregularly nominated and elected Grand Master. His ambition is assigned in the *Book of Constitutions* as the cause, and his authority was disowned "by all those," says Anderson, "that would not countenance irregularities." But the breach was healed by Grand Master Montague, who, resigning his claim to the chair, caused Wharton to be regularly elected and installed. (*Constitutions*, 1738, p. 114.) [The second schism in England was when Preston and others in 1779 formed the "Grand Lodge of England South of the River Trent" owing to a dispute with the Grand Lodge of the "Moderns," which continued for ten years. (See *Preston.*)] In France, although irregular Lodges began to be instituted as early as 1756, the first active schism is to be dated from 1761, when the dancing-master Lacorne, whom the respectable Masons refused to recognize as the substitute of De Clermont the Grand Master, formed, with his adherents, an independent and rival Grand Lodge; the members of which, however, became reconciled to the legal Grand Lodge the next year, and again became schismatic in 1765. In fact, from 1761 until the organization of the Grand Orient in 1772, the history of Masonry in France is but a history of schisms.

In Germany, in consequence of the Germanic principle of Masonic law that two or more controlling bodies may exist at the same time and in the same place with concurrent and coextensive jurisdiction, it is legally impossible that there ever should be a schism. A Lodge or any number of Lodges may withdraw from the parent stock and assume the standing and prerogatives of a mother Lodge with powers of constitution or an independent Grand Lodge, and its regularity would be indisputable, according to the German interpretation of the law of territorial jurisdiction. Such an act of withdrawal would be a secession, but not a schism.

In America there have been several instances of Masonic schism. Thus, in Massachusetts, by the establishment in 1752 of the St. Andrew's Grand Lodge; in South Carolina, by the formation of the Grand Lodge of York Masons in 1787; in Louisiana, in 1848, by the institution of the Grand Lodge of Ancient York Masons; and in New York, by the establishment in 1823 of the city and country Grand Lodges; and in 1849 by the formation of the body known as the Philip's Grand Lodge. In all of these instances a reconciliation eventually took place; nor is it probable that schisms will often occur, because the principle of exclusive territorial jurisdiction has been now so well settled and so universally recognized, that no seceding or schismatic body can expect to receive the countenance or support of any of the Grand Lodges of the Union.

There are these essential points of difference between ecclesiastical and Masonic schism; the former, once occurring, most generally remains perpetual. Reconciliation with a parent church is seldom effected. The schisms of Calvin and Luther at the time of the Reformation led to the formation of the Protestant Churches, who can never be expected to unite with the Roman Church, from which they separated. The Quakers, the Baptists, the Methodists, and other sects which seceded from the Church of England, have formed permanent religious organizations, between whom and the parent body from which they separated there is a breach which will probably never be healed. But all Masonic schisms, as experience has shown, have been temporary in their duration, and sometimes very short-lived. The spirit of Masonic brotherhood which continues to pervade both parties, always leads, sooner or later, to a reconciliation and a reunion; concessions are mutually made, and compromises effected, by which the schismatic body is again merged in the parent association from which it had seceded. Another difference is this, a religious schismatic body is not necessarily an illegal one, nor does it always profess a system of false doctrine. "A schism," says Milton, "may happen to a true church, as well as to a false." But a Masonic schism is always illegal; it violates the law of exclusive jurisdiction; and a schismatic body cannot be recognized as possessing any of the rights or prerogatives which belong alone to the supreme dogmatic Masonic power of the State.

Schneider, Johann August. A zealous and learned Mason of Altenburg, in Germany,

where he was born May 22, 1755, and died August 13, 1816. Besides contributing many valuable articles to various Masonic journals, he was the compiler of the *Constitutions-Buch* of the Lodge "Archimedes zu den drei Reissbretten" at Altenburg, in which he had been initiated, and of which he was a member; an important but scarce work, containing a history of Masonry, and other valuable essays.

Schools. None of the charities of Freemasonry have been more important or more worthy of approbation than those which have been directed to the establishment of schools for the education of the orphan children of Masons; and it is a very proud feature of the Order, that institutions of this kind are to be found in every country where Freemasonry has made a lodgment as an organized society. In England, the Royal Freemasons' Girls' School was established in 1788. In 1798, a similar one for boys was founded. At a very early period charity schools were erected by the Lodges in Germany, Denmark, and Sweden. The Masons of Holland instituted a school for the blind in 1808. In the United States much attention has been paid to this subject. In 1842, the Grand Lodge of Missouri instituted a Masonic college, and the example was followed by several other Grand Lodges. But colleges have been found too unwieldly and complicated in their management for a successful experiment, and the scheme has generally been abandoned. But there are numerous schools in the United States which are supported in whole or in part by Masonic Lodges.

Schools of the Prophets. Oliver (*Landm.*, ii., 374) speaks of "the secret institution of the Nabiim" as existing in the time of Solomon, and says they were established by Samuel "to counteract the progress of the Spurious Freemasonry which was introduced into Palestine before his time." This claim of a Masonic character for these institutions has been gratuitously assumed by the venerable author. He referred to the well-known Schools of the Prophets, which were first organized by Samuel, which lasted from his time to the closing of the canon of the Old Testament. They were scattered all over Palestine, and consisted of scholars who devoted themselves to the study of both the written and the oral law, to the religious rites, and to the interpretation of Scripture. Their teaching of what they had learned was public, not secret, nor did they in any way resemble, as Oliver suggests, the Masonic Lodges of the present day. They were, in their organization, rather like our modern theological colleges, though their range of studies was very different.

Schor-Laban. ("White Ox," or morally, "Innocence.") The name of the second step of the Mystic Ladder of Kadosh of the A. A. Scottish Rite.

Schrepfer, Johann Georg. The keeper of a coffee-house in Leipsic, where, having obtained a quantity of Masonic, Rosicrucian, and magical books, he opened, in 1768, what he called a Scottish Lodge, and pretended that he had been commissioned by Masonic superiors to destroy the system of Strict Observance, whose adherents he abused and openly insulted. He boasted that he alone possessed the great secret of Freemasonry, and that nearly all the German Masons were utterly ignorant of anything about it except its external forms. He declared that he was an anointed priest, having power over spirits, who were compelled to appear at his will and obey his commands, by which means he became acquainted not only with the past and the present, but even with the future. It was in thus pretending to evoke spirits that his Masonry principally consisted. Many persons became his dupes; and although they soon discovered the imposture, shame at being themselves deceived prevented them from revealing the truth to others, and thus his initiations continued for a considerable period, and he was enabled to make some money, the only real object of his system. He has himself asserted, in a letter to a Prussian clergyman, that he was an emissary of the Jesuits; but of the truth of this we have only his own unreliable testimony. He left Leipsic at one time and traveled abroad, leaving his Deputy to act for him during his absence. On his return he asserted that he was the natural son of one of the French princes, and assumed the title of Baron Von Steinbach. But at length there was an end to his practises of jugglery. Seeing that he was beginning to be detected, fearing exposure, and embarrassed by debt, he invited some of his disciples to accompany him to a wood near Leipsic called the Rosenthal, where, on the morning of October 8, 1774, having retired to a little distance from the crowd, he blew out his brains with a pistol. Clavel has thought it worth while to preserve the memory of this incident by inserting an engraving representing the scene in his *Histoire Pittoresque de la Franc-Maçonnerie* (p. 183). Schrepfer had much low cunning, but was devoid of education. Lenning sums up his character in saying that he was one of the coarsest and most impudent swindlers who ever chose the Masonic brotherhood for his stage of action.

Schroeder, Friedrich Joseph Wilhelm. A doctor and professor of pharmacology in Marburg; was born at Bielefeld, in Prussia, March 19, 1733, and died October 27, 1778. Of an infirm constitution from his youth, he still further impaired his bodily health and his mental faculties by his devotion to chemical, alchemical, and theosophic pursuits. He established at Marburg, in 1766, a Chapter of True and Ancient Rose Croix Masons, and in 1779 he organized in a Lodge of Sarreburg a school or Rite, founded on magic, theosophy, and alchemy, which consisted of seven degrees, four high degrees founded on these occult sciences being superadded to the original three Symbolic degrees. This Rite, called the "Rectified Rose Croix,"

was only practised by two Lodges under the Constitution of the Grand Lodge of Hamburg. Clavel (*Histoire Pittoresque*, p. 183) calls him the Cagliostro of Germany, because it was in his school that the Italian charlatan learned his first lessons of magic and theosophy. Oliver, misunderstanding Clavel, styles him an adventurer. (*Landmarks*, ii., 710.) But it is perhaps more just that we should attribute to him a diseased imagination and misdirected studies than a bad heart or impure practises. He must not be confounded with Fried. Ludwig Schroeder, who was a man of a very different character.

Schroeder, Friedrich Ludwig. An actor and a dramatic and Masonic writer, born at Schwerin, November 3, 1744, and died near Hamburg, September 3, 1816. He commenced life as an actor at Vienna, and was so distinguished in his profession that Hoffmann says "he was incontestably the greatest actor that Germany ever had, and equally eminent in tragedy and comedy." As an active, zealous Mason, he acquired a high character. Bode himself, a well-known Mason, was his intimate friend. Through his influence, he was initiated into Freemasonry, in 1774, in the Lodge Emanuel zur Maienblume. He soon after, himself, established a new Lodge working in the system of Zinnendorf, but which did not long remain in existence. Schroeder then went to Vienna, where he remained until 1785, when he returned to Hamburg. On his return, he was elected by his old friends the Master of the Lodge Emanuel, which office he retained until 1799. In 1794 he was elected Deputy Grand Master of the English Provincial Grand Lodge of Lower Saxony, and in 1814, in the seventieth year of his life, he was induced to accept the Grand Mastership. It was after his election, in 1787, as Master of the Lodge Emanuel at Hamburg, that he first resolved to devote himself to a thorough reformation of the Masonic system, which had been much corrupted on the continent by the invention of almost innumerable high degrees, many of which found their origin in the fantasies of Alchemy, Rosicrucianism, and Hermetic Philosophy. It is to this resolution, thoroughly executed, that we owe the Masonic scheme known as Schroeder's Rite, which, whatever may be its defects in the estimation of others, has become very popular among many German Masons. He started out with the theory that, as Freemasonry had proceeded from England to the Continent, in the English Book of Constitutions and the Primitive English Ritual we must look for the pure unadulterated fountain of Freemasonry.

He accordingly selected the well-known English Exposition entitled "Jachin and Boaz" as presenting, in his opinion, the best formula of the old initiation. He therefore translated it into the German language, and, remodeling it, presented it to the Provincial Grand Lodge in 1801, by whom it was accepted and established. It was soon after accepted by many other German Lodges on account of its simplicity. The system of Schroeder thus adopted consisted of the three degrees of Ancient Craft Masonry, all the higher degrees being rejected. But Schroeder found it necessary to enlarge his system, so as to give to brethren who desired it an opportunity of farther investigation into the philosophy of Masonry. He, therefore, established an *Engbund*, or Select Historical Union, which should be composed entirely of Master Masons, who were to be engaged in the study of the different systems and degrees of Freemasonry. The Hamburg Lodges constituted the *Mutterbund*, or central body, to which all the other Lodges were to be united by correspondence.

Of this system, the error seems to be that, by going back to a primitive ritual which recognizes nothing higher than the Master's Degree, it rejects all the developments that have resulted from the labors of the philosophic minds of a century. Doubtless in the high degrees of the eighteenth century there was an abundance of chaff, but there was also much nourishing wheat. Schroeder, with the former, has thrown away the latter. He has committed the logical blunder of arguing from the abuse against the use. His system, however, has some merit, and is still practised by the Grand Lodge of Hamburg.

Schroeder's Rite. See *Schroeder, Friedrich Joseph Wilhelm.*

Schroeder's System. See *Schroeder, Friedrich Ludwig.*

Sciences, Liberal. See *Liberal Arts and Sciences.*

Scientific Masonic Association. (*Scientifischer Freimaurer Bund.*) A society founded in 1803 by Fessler, Mossdorf, Fischer, and other distinguished Masons, the object being, by the united efforts of its members, to draw up, with the greatest accuracy and care, and from the most authentic sources, a full and complete history of Freemasonry, of its origin and objects, from its first formation to the present day, and also of the various systems or methods of working that have been introduced into the Craft; such history, together with the evidence upon which it was founded, was to be communicated to worthy and zealous brethren. The members had no peculiar ritual, clothing, or ceremonies; neither were they subjected to any fresh obligation; every just and upright Freemason who had received a liberal education, who was capable of feeling the truth, and desirous of investigating the mysteries of the Order, could become a member of this society, provided the ballot was unanimous, let him belong to what Grand Lodge he might. But those whose education had not been sufficiently liberal to enable them to assist in those researches were only permitted to attend the meetings as trusty brethren to receive instruction.

Scorpion. A genus of *Arachnida*, of numerous species, with an elongated body, but no marked division between the thorax

and abdomen. Those of the south of Europe and on the borders of the Mediterranean have six eyes. This reptile, dreaded by the Egyptian, was sacred to the goddess Selk, and was solemnly cursed in all temples once a year.

Scotland. The tradition of the Scotch Masons is that Freemasonry was introduced into Scotland by the architects who built the Abbey of Kilwinning; and the village of that name bears, therefore, the same relation to Scotch Masonry that the city of York does to English. "That Freemasonry was introduced into Scotland," says Laurie (*Hist.*, p. 89), "by those architects who built the Abbey of Kilwinning, is manifest not only from those authentic documents by which the Kilwinning Lodge has been traced back as far as the end of the fifteenth century, but by other collateral arguments which amount almost to a demonstration." In Sir John Sinclair's *Statistical Account of Scotland*, the same statement is made in the following words: "A number of Freemasons came from the continent to build a monastery there, and with them an architect or Master Mason to superintend and carry on the work. This architect resided at Kilwinning, and being a good and true Mason, intimately acquainted with all the arts and parts of Masonry known on the continent, was chosen Master of the meetings of the brethren all over Scotland. He gave rules for the conduct of the brethren at these meetings, and decided finally in appeals from all the other meetings or Lodges in Scotland." Which statement amounts to about this: that the brethren assembled at Kilwinning elected a Grand Master (as we should now call him) for Scotland, and that the Lodge of Kilwinning became the Mother Lodge, a title which it has always assumed. Manuscripts preserved in the Advocates' Library of Edinburgh, which were first published by Laurie, furnish further records of the early progress of Masonry in Scotland.

It is said that in the reign of James II., the office of Grand Patron of Scotland was granted to William St. Clair, Earl of Orkney and Caithness and Baron of Roslin, "his heirs and successors," by the king's charter. But, in 1736, the St. Clair who then exercised the Grand Mastership, "taking into consideration that his holding or claiming any such jurisdiction, right, or privilege might be prejudicial to the Craft and vocation of Masonry," renounced his claims, and empowered the Freemasons to choose their Grand Master. The consequence of this act of resignation was the immediate organization of the Grand Lodge of Scotland, over whom, for obvious reasons, the late hereditary Grand Master or Patron was unanimously called to preside.

Scotland, Royal Order of. See *Royal Order of Scotland.*

Scottish. We use indiscriminately the word *Scotch* or *Scottish* to signify something relating to Scotland. Thus we say the Scotch Rite or the Scottish Rite; the latter is, however, more frequently used by Masonic writers. This has been objected to by some purists because the final syllable *ish* has in general the signification of diminution or approximation, as in *brackish, saltish*, and similar words. But *ish* in Scottish is not a sign of diminution, but is derived, as in English, Danish, Swedish, etc., from the German termination *ische*. The word is used by the best writers.

Scottish Degrees. The high degrees adopted by Ramsay, under the name of Irish degrees, were subsequently called by him Scottish degrees in reference to his theory of the promulgation of Masonry from Scotland. (See *Irish Chapters.*)

Scottish Master. See *Ecossais.*

Scottish Rite. French writers call this the "Ancient and Accepted Rite," but as the Latin Constitutions of the Order designate it as the "Antiquus Scoticus Ritus Acceptus," or the "Ancient and Accepted Scottish Rite," that title has now been very generally adopted as the correct name of the Rite. Although one of the youngest of the Masonic Rites, having been established not earlier than the year 1801, it is at this day the most popular and the most extensively diffused. Supreme Councils or governing bodies of the Rite are to be found in almost every civilized country of the world, and in many of them it is the only Masonic obedience. The history of its organization is briefly this: In 1758, a body was organized at Paris called the "Council of Emperors of the East and West." This Council organized a Rite called the "Rite of Perfection," which consisted of twenty-five degrees, the highest of which was "Sublime Prince of the Royal Secret." In 1761, this Council granted a Patent or Deputation to Stephen Morin, authorizing him to propagate the Rite in the Western continent, whither he was about to repair. In the same year, Morin arrived at the city of St. Domingo, where he commenced the dissemination of the Rite, and appointed many Inspectors, both for the West Indies and for the United States. Among others, he conferred the degrees on M. Hayes, with a power of appointing others when necessary. Hayes accordingly appointed Isaac Da Costa Deputy Inspector-General for South Carolina, who in 1783 introduced the Rite into that State by the establishment of a Grand Lodge of Perfection in Charleston. Other Inspectors were subsequently appointed, and in 1801 a Supreme Council was opened in Charleston by John Mitchell and Frederick Dalcho. There is abundant evidence in the Archives of the Supreme Council that up to that time the twenty-five degrees of the Rite of Perfection were alone recognized. But suddenly, with the organization of the Supreme Council, there arose a new Rite, fabricated by the adoption of eight more of the continental high degrees, so as to make the Thirty-third and not the Twenty-fifth Degree the summit of the Rite.

The Rite consists of thirty-three degrees, which are divided into seven sections, each section being under an appropriate jurisdiction, and are as follows:

I.

SYMBOLIC LODGE.

1. Entered Apprentice.
2. Fellow-Craft.
3. Master Mason.

These are called blue or Symbolic degrees. They are not conferred in England, Scotland, Ireland, or in the United States, because the Supreme Councils of the Rite have refrained from exercising jurisdiction through respect to the older authority in those countries of the York and American Rite.

II.

LODGE OF PERFECTION.

4. Secret Master.
5. Perfect Master.
6. Intimate Secretary.
7. Provost and Judge.
8. Intendant of the Building.
9. Elected Knight of the Nine.
10. Illustrious Elect of the Fifteen.
11. Sublime Knights Elect of the Twelve.
12. Grand Master Architect.
13. Knight of the Ninth Arch, or Royal Arch of Solomon.
14. Grand Elect, Perfect and Sublime Mason.

III.

COUNCIL OF PRINCES OF JERUSALEM.

15. Knight of the East.
16. Prince of Jerusalem.

IV.

CHAPTER OF ROSE CROIX.

17. Knight of the East and West.
18. Prince Rose Croix.

V.

COUNCIL OF KADOSH.

19. Grand Pontiff.
20. Grand Master of Symbolic Lodges.
21. Noachite, or Prussian Knight.
22. Knight of the Royal Ax, or Prince of Libanus.
23. Chief of the Tabernacle.
24. Prince of the Tabernacle.
25. Knight of the Brazen Serpent.
26. Prince of Mercy.
27. Knight Commander of the Temple.
28. Knight of the Sun, or Prince Adept.
29. Grand Scottish Knight of St. Andrew.
30. Knight Kadosh.

VI.

CONSISTORY OF SUBLIME PRINCES OF THE ROYAL SECRET.

31. Inspector Inquisitor Commander.
32. Sublime Prince of the Royal Secret.

VII.

SUPREME COUNCIL.

33. Sovereign Grand Inspector-General.

Scottish Templars. See *Templars of Scotland.*

Scottish Trinitarians. See *Prince of Mercy.*

Scribe. The Scribe is the third officer in a Royal Arch Chapter, according to the American ritual, and is the representative of Haggai. The *Sofer*, or Scribe in the earlier Scriptures, was a kind of military secretary; but in the latter he was a learned man, and doctor of the laws, who expounded them to the people. Thus Artaxerxes calls Ezra the priest, "a Scribe of the law of the God of heaven." Horne says that the Scribe was the King's Secretary of State, who registered all acts and decrees. It is in this sense that Haggai is called the Scribe in Royal Arch Masonry. In the English system of Royal Arch Masonry there are two Scribes, who represent Ezra and Nehemiah, and whose position and duties are those of Secretaries. The American Scribe is the Third Principal. The Scribes, according to the English system, appear to be analogous to the Soferim or Scribes of the later Hebrews from the time of Ezra. These were members of the Great Synod, and were literary men, who occupied themselves in the preservation of the letter of the Scriptures and the development of its spirit.

Scriptures, Belief in the. In 1820, the Grand Lodge of Ohio resolved that "in the first degrees of Masonry religious tests shall not be a barrier to the admission or advancement of applicants, provided they profess a belief in God and his holy word"; and in 1854 the same body adopted a resolution declaring that "Masonry, as we have received it from our fathers, teaches the divine authenticity of the Holy Scriptures." In 1845, the Grand Lodge of Illinois declared a belief in the authenticity of the Scriptures a necessary qualification for initiation. Although in Christendom very few Masons deny the Divine authority of the Scriptures of the Old and New Testaments, yet to require, as a preliminary to initiation, the declaration of such a belief, is directly in opposition to the express regulations of the Order, which demand a belief in God and, by implication, in the immortality of the soul as the only religious tests.

Scriptures, Reading of the. By an ancient usage of the Craft, the Book of the Law is always spread open in the Lodge. There is in this, as in everything else that is Masonic, an appropriate symbolism. The Book of the Law is the Great Light of Masonry. To close it would be to intercept the rays of Divine light which emanate from it, and hence it is spread open, to indicate that the Lodge is not in darkness, but under the influence of its illuminating power. Masons in this respect obey the suggestion of the

Divine Founder of the Christian religion, "Neither do men light a candle and put it under a bushel, but on a candlestick; and it giveth light unto all that are in the house." A closed book, a sealed book, indicates that its contents are secret; and a book or roll folded up was the symbol, says Wemyss, of a law abrogated, or of a thing of no further use. Hence, as the reverse of all this, the Book of the Law is opened in our Lodges, to teach us that its contents are to be studied, that the law which it inculcates is still in force, and is to be "the rule and guide of our conduct."

But the Book of the Law is not opened at random. In each degree there are appropriate passages, whose allusion to the design of the degree, or to some part of its ritual, makes it expedient that the book should be opened upon those passages.

Masonic usage has not always been constant, nor is it now universal in relation to what particular passages shall be unfolded in each degree. The custom in America, at least since the publication of Webb's *Monitor*, has been very uniform, and is as follows:

In the First Degree the Bible is opened at Psalm cxxxiii., an eloquent description of the beauty of brotherly love, and hence most appropriate as the illustration of a society whose existence is dependent on that noble principle. In the Second Degree the passage adopted is Amos vii. 7, 8, in which the allusion is evidently to the plumb-line, an important emblem of that degree. In the Third Degree the Bible is opened at Ecclesiastes xii. 1–7, in which the description of old age and death is appropriately applied to the sacred object of this degree.

But, as has been said, the choice of these passages has not always been the same. At different periods various passages have been selected, but always with great appropriateness, as may be seen from the following brief sketch.

Formerly, the Book of the Law was opened in the First Degree at the 22d chapter of Genesis, which gives an account of Abraham's intended sacrifice of Isaac. As this event constituted the *first grand offering*, commemorated by our ancient brethren, by which the ground floor of the Apprentice's Lodge was consecrated, it seems to have been very appropriately selected as the passage for this degree. That part of the 28th chapter of Genesis which records the vision of Jacob's ladder was also, with equal appositeness, selected as the passage for the First Degree.

The following passage from 1 Kings vi. 8, was, during one part of the last century, used in the Second Degree:

"The door of the middle chamber was in the right side of the house, and they went up with winding stairs into the middle chamber, and out of the middle into the third."

The appositeness of this passage to the Fellow-Craft's Degree will hardly be disputed.

At another time the following passage from 2 Chronicles iii. 17, was selected for the Second Degree; its appropriateness will be equally evident:

"And he reared up the pillars before the Temple, one on the right hand, and the other on the left; and he called the name of that on the right hand Jachin, and the name of that on the left Boaz."

The words of Amos v. 25, 26, were sometimes adopted as the passage for the Third Degree:

"Have ye offered unto me sacrifices and offerings in the wilderness forty years, O house of Israel? But ye have borne the tabernacle of your Moloch and Chiun your images, the star of your god, which ye made to yourselves."

The allusions in this paragraph are not so evident as the others. They refer to historical matters, which were once embodied in the ancient lectures of Freemasonry. In them the sacrifices of the Israelites to Moloch were fully described, and a tradition, belonging to the Third Degree, informs us that Hiram Abif did much to extirpate this idolatrous worship from the religious system of Tyre.

The 6th chapter of 2 Chronicles, which contains the prayer of King Solomon at the dedication of the Temple, was also used at one time for the Third Degree. Perhaps, however, this was with less fitness than any other of the passages quoted, since the events commemorated in the Third Degree took place at a somewhat earlier period than the dedication. Such a passage might more appropriately be annexed to the ceremonies of the Most Excellent Master as practised in this country.

At present the usage in England differs in respect to the choice of passages from that adopted in this country.

There the Bible is opened, in the First Degree, at Ruth iv. 7:

"Now this was the manner in former time in Israel concerning redeeming and concerning changing, for to confirm all things; a man plucked off his shoe, and gave it to his neighbor: and this was a testimony in Israel."

In the Second Degree the passage is opened at Judges xii. 6:

"Then said they unto him, Say now Shibboleth: and he said Sibboleth; for he could not frame to pronounce it right. Then they took him, and slew him at the passages of Jordan. And there fell at that time of the Ephraimites forty and two thousand."

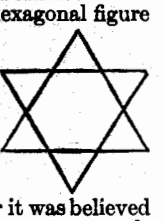
In the Third Degree the passage is opened at 1 Kings vii. 13, 14:

"And king Solomon sent and fetched Hiram out of Tyre. He was a widow's son of the tribe of Naphtali, and his father was a man of Tyre, a worker in brass: and he was filled with wisdom, and understanding, and cunning to work all works in brass. And he came to king Solomon, and wrought all his work."

While from the force of habit, as well as from the extrinsic excellence of the passages themselves, the American Mason will, perhaps, prefer the selections made in our own

Lodges, especially for the First and Third Degrees, he at the same time will not fail to admire the taste and ingenuity of our English brethren in the selections that they have made. In the Second Degree the passage from Judges is undoubtedly preferable to our own.

In conclusion it may be observed, that to give these passages their due Masonic importance it is essential that they should be covered by the square and compasses. The *Bible*, *square*, and *compasses* are significant symbols of Freemasonry. They are said to allude to the peculiar characteristics of our ancient Grand Masters. The Bible is emblematic of the wisdom of King Solomon; the square, of the power of Hiram; and the compasses, of the skill of the Chief Builder. Some Masonic writers have still further spiritualized these symbols by supposing them to symbolize the wisdom, truth, and justice of the Great Architect of the Universe. In any view they become instructive and inseparably connected portions of the true Masonic ritual, which, to be understood, must be studied together.



Scroll. The written portion of the Jewish law, read at stated periods before the congregation, and preserved in the synagogue with great security.

Scythe. In the classic mythology, the scythe was one of the attributes of Saturn, the god of time, because that deity is said to have taught men the use of the implement in agriculture. But Saturn was also the god of time; and in modern iconography Time is allegorized under the figure of an old man, with white hair and beard, two large wings at his back, an hour-glass in one hand and a scythe in the other. It is in its cutting and destructive quality that the scythe is here referred to. Time is thus the great mower who reaps his harvest of men. Masonry has adopted this symbolism, and in the Third Degree the scythe is described as an emblem of time, which cuts the brittle thread of life and makes havoc among the human race.

Seal. A stamp on which letters and a device are carved for the purpose of making an impression, and also the wax or paper on which the impression is made. Lord Coke defines a seal to be an impression on wax, "sigillum est cera impressa," and wax was originally the legal material of a seal. Many old Masonic diplomas and charters are still in existence, where the seal consists of a circular tin box filled with wax, on which the seal is impressed, the box being attached by a ribbon to the parchment. But now the seal is placed generally on a piece of circular paper. The form of a seal is circular; oval seals were formerly appropriated to ecclesiastical dignitaries and religious houses, and the shape alluded to the old Christian symbol of the Vesica Piscis.

No Masonic document is valid unless it has appended to it the seal of the Lodge or Grand Lodge. Foreign Grand Lodges never recognize the transactions of subordinate Lodges out of their jurisdictions, if the standing of the Lodges is not guaranteed by the seal of the Grand Lodge and the signatures of the proper officers.

Seal of Solomon. The Seal of Solomon or the Shield of David, for under both names the same thing was denoted, is a hexagonal figure consisting of two interlaced triangles, thus forming the outlines of a six-pointed star. Upon it was inscribed one of the sacred names of God, from which inscription it was supposed principally to derive its talismanic powers. These powers were very extensive, for it was believed that it would extinguish fire, prevent wounds in a conflict, and perform many other wonders. The Jews called it the Shield of David in reference to the protection which it gave to its possessors. But to the other Orientalists it was more familiarly known as the Seal of Solomon. Among these imaginative people, there was a very prevalent belief in the magical character of the King of Israel. He was esteemed rather as a great magician than as a great monarch, and by the signet which he wore, on which this talismanic seal was engraved, he is supposed to have accomplished the most extraordinary actions, and by it to have enlisted in his service the labors of the genii for the construction of his celebrated Temple.

Robinson Crusoe and the *Thousand and One Nights* are two books which every child has read, and which no man or woman ever forgets. In the latter are many allusions to Solomon's seal. Especially is there a story of an unlucky fisherman who fished up in his net a bottle secured by a leaden stopper, on which this seal was impressed. On opening it, a fierce Afrite, or evil genius, came forth, who gave this account of the cause of his imprisonment. "Solomon," said he, "the son of David, exhorted me to embrace the faith and submit to his authority; but I refused; upon which he called for this bottle, and confined me in it, and closed it upon me with the leaden stopper and stamped upon it his seal, with the great name of God engraved upon it. Then he gave the vessel to one of the genii, who submitted to him, with orders to cast me into the sea."

Of all talismans, there is none, except, perhaps, the cross, which was so generally prevalent among the ancients as this Seal of Solomon or Shield of David. It has been found in the cave of Elephanta, in India, accompanying the image of the Deity, and many other places celebrated in the Brahmanical and the Buddhist religions. Mr. Hay, in an exploration into western Barbary, found it in the harem of a Moor, and in a Jewish synagogue, where it was suspended in front of the recess in which the sacred rolls were deposited. In fact, the interlaced triangles or Seal of Solomon may be considered as *par excellence* the great Oriental talisman.

In time, with the progress of the new religion, it ceased to be invested with a magical reputation, although the Hermetic philosophers of the Middle Ages did employ it as

one of their mystical symbols; but true to the theory that superstitions may be repudiated, but never will be forgotten, it was adopted by the Christians as one of the emblems of their faith, but with varying interpretations. The two triangles were said sometimes to be symbols of fire and water, sometimes of prayer and remission, sometimes of creation and redemption, or of life and death, or of resurrection and judgment. But at length the ecclesiologists seem to have settled on the idea that the figure should be considered as representing the two natures of our Lord—his Divine and his human. And thus we find it dispersed all over Europe, in medallions, made at a very early period, on the breasts of the recumbent effigies of the dead as they lie in their tombs, and more especially in churches, where it is presented to us either carved on the walls or painted in the windows. Everywhere in Europe, and now in this country, where ecclesiastical architecture is beginning at length to find a development of taste, is this old Eastern talisman to be found doing its work as a Christian emblem. The spirit of the old talismanic faith is gone, but the form remains, to be nourished by us as the natural homage of the present to the past.

Among the old Kabbalistic Hebrews, the Seal of Solomon was, as a talisman, of course deemed to be a sure preventive against the danger of fire. The more modern Jews, still believing in its talismanic virtues, placed it as a safeguard on their houses and on their breweries, because they were especially liable to the danger of fire. The common people, seeing this figure affixed always to Jewish brew-houses, mistook it for a sign, and in time, in Upper Germany, the hexagon, or Seal of Solomon, was adopted by German innkeepers as the sign of a beer-house, just as the chequers have been adopted in England, though with a different history, as the sign of a tavern.

Seals, Book of the Seven. "And I saw," says St. John in the Apocalypse (v. 1), "in the right hand of him that sat on the throne a book written within and on the back side, sealed with seven seals." The seal denotes that which is secret, and seven is the number of perfection; hence the Book of the Seven Seals is a symbol of that knowledge which is profoundly secured from all unhallowed search. In reference to the passage quoted, the Book of the Seven Seals is adopted as a symbol in the Apocalyptic Degree of the Knights of the East and West, the seventeenth of the Ancient and Accepted Rite.

Seals, Keeper of the. An officer who has charge of the seal or seals of the Lodge. It is found in some of the high degrees and in continental Lodges, but not recognized in the York or American Rites. In German Lodges he is called *Siegelbewahrer*, and in French, *Garde des Sceaux*.

Search for Truth. This is the object of all Freemasonry and it is pursued from the first to the last step of initiation. The Apprentice begins it seeking for the light which is symbolized by the WORD, itself only a symbol of Truth. As a Fellow-Craft he continues the search, still asking for more light. And the Master Mason, thinking that he has reached it, obtains only its substitute; for the True Word, Divine Truth, dwells not in the first temple of our earthly life, but can be found only in the second temple of the eternal life.

There is a beautiful allegory of the great Milton, who thus describes the search after truth: "Truth came into the world with her Divine Master, and was a perfect shape and glorious to look upon. But when he ascended, and his apostles after him were laid asleep, there straight arose a wicked race of deceivers, who, as the story goes of the Egyptian Typhon, with his conspirators, how they dealt with the good Osiris, took the virgin Truth, hewed her lovely frame into a thousand pieces, and scattered them to the four winds of heaven. Ever since that time the friends of Truth, such as durst appear, imitating the careful search that Isis made for the mangled body of Osiris, went up and down, gathering up limb by limb still as they could find them."

Seceders. During the anti-Masonic excitement in America, which gave rise to the anti-Masonic party, many Masons, fearing the loss of popularity, or governed by an erroneous view of the character of Freemasonry, withdrew from the Order, and took a part in the political and religious opposition to it. These men called themselves, and were recognized by the title of, "seceders" or "seceding Masons."

Second Temple. See *Temple of Zerubbabel*.

Secrecy and Silence. These virtues constitute the very essence of all Masonic character; they are the safeguard of the Institution, giving to it all its security and perpetuity, and are enforced by frequent admonitions in all the degrees, from the lowest to the highest. The Entered Apprentice begins his Masonic career by learning the duty of secrecy and silence. Hence it is appropriate that in that degree which is the consummation of initiation, in which the whole cycle of Masonic science is completed, the abstruse machinery of symbolism should be employed to impress the same important virtues on the mind of the neophyte.

The same principles of secrecy and silence existed in all the ancient mysteries and systems of worship. When Aristotle was asked what thing appeared to him to be most difficult of performance, he replied, "To be secret and silent."

"If we turn our eyes back to antiquity," says Calcott, "we shall find that the old Egyptians had so great a regard for silence and secrecy in the mysteries of their religion, that they set up the god Harpocrates, to whom they paid peculiar honour and veneration, who was represented with the right hand placed near the heart, and the left down by his side, covered with a skin before, full of eyes and ears, to signify, that of many things to be seen and heard, few are to be published." (*Candid Disquisition*, p. 50.)

Apuleius, who was an initiate in the mysteries of Isis, says: "By no peril will I ever be compelled to disclose to the uninitiated the things that I have had intrusted to me on condition of silence."

Lobeck, in his *Aglaophamus*, has collected several examples of the reluctance with which the ancients approached a mystical subject, and the manner in which they shrank from divulging any explanation or fable which had been related to them at the mysteries, under the seal of secrecy and silence.

And, lastly, in the school of Pythagoras, these lessons were taught by the sage to his disciples. A novitiate of five years was imposed upon each pupil, which period was to be passed in total silence, and in religious and philosophical contemplation. And at length, when he was admitted to full fellowship in the society, an oath of secrecy was administered to him on the sacred tetractys, which was equivalent to the Jewish Tetragrammaton.

Silence and secrecy are called "the cardinal virtues of a Select Master," in the Ninth or Select Master's Degree of the American Rite.

Among the Egyptians the sign of silence was made by pressing the index finger of the right hand on the lips. It was thus that they represented Harpocrates, the god of silence, whose statue was placed at the entrance of all temples of Isis and Serapis, to indicate that silence and secrecy were to be preserved as to all that occurred within.

Secretary. The recording and corresponding officer of a Lodge. It is his duty to keep a just and true record of all things proper to be written, to receive all moneys that are due the Lodge, and to pay them over to the Treasurer. The jewel of his office is a pen, and his position in the Lodge is on the left of the Worshipful Master in front.

Secretary-General of the Holy Empire. The title given to the Secretary of the Supreme Council of the Ancient and Accepted Rite.

Secretary, Grand. See *Grand Secretary*.

Secret Doctrine. The secret doctrine of the Jews was, according to Steinschneider, nothing else than a system of metaphysics founded on the commentaries on the law and the legends of the Talmudists. Of this secret doctrine, Maimonides says: "Beware that you take not these words of the wise men in their literal signification, for this would be to degrade and sometimes to contradict the sacred doctrine. Search rather for the hidden sense; and if you cannot find the kernel, let the shell alone, and confess that you cannot understand it." All mystical societies, and even liberal philosophers, were, to a comparatively recent period, accustomed to veil the true meaning of their instructions in intentional obscurity, lest the unlearned and uninitiated should be offended. The Ancient Mysteries had their secret doctrine; so had the school of Pythagoras, and the sect of the Gnostics. The Alchemists, as Hitchcock has clearly shown, gave a secret and spiritual meaning to their jargon about the transmutation of metals, the elixir of life, and the philosopher's stone. Freemasonry alone has no secret doctrine. Its philosophy is open to the world. Its modes of recognition by which it secures identification, and its rites and ceremonies which are its method of instruction, alone are secret. All men may know the tenets of the Masonic creed.

Secret Master. The Fourth Degree in the Ancient and Accepted Scottish Rite, and the first of what are called the "Ineffable Degrees." It refers to those circumstances which occurred at the Temple when Solomon repaired to the building for the purpose of supplying the loss of its illustrious builder by the appointment of seven experts, among whom were to be divided the labors which heretofore had been entrusted to one gigantic mind. The lecture elaborately explains the mystic meaning of the sacred things which were contained in the Sanctum Sanctorum, or Holy of Holies.

The Lodge is hung with black curtains strewed with tears, symbolic of grief. There should be eighty-one lights, distributed by nine times nine; but this number is often dispensed with, and three times three substituted. Later rituals reduce them to eight.

There are but two presiding officers—a Master, styled "Puissant," and representing King Solomon, and an Inspector, representing Adoniram, the son of Abda, who had the inspection of the workmen on Mount Lebanon, and who is said to have been the first Secret Master.

Solomon is seated in the east, clothed in mourning robes lined with ermine, holding a scepter in his hand, and decorated with a blue sash from the right shoulder to the left hip, from which is suspended a triangle of gold. Before him is placed a triangular altar, on which is deposited a wreath of laurel and olive leaves.

Adoniram, called "Venerable Inspector," is seated in the west, but without any implement of office, in commemoration of the fact that the works were suspended at the time of the institution of this degree. He is decorated with a triangular white collar, bordered with black, from which is suspended an ivory key, with the letter Z engraved thereon, which constitute the collar, and jewel of the degree. These decorations are worn by all the brethren.

The apron is white edged with black and with black strings; the flap blue, with an open eye thereon embroidered in gold. The modern ritual prescribes that two branches of olive and laurel crossing each other shall be on the middle of the apron.

Secret Monitor. An honorary or side degree very commonly conferred in the United States. The communication of it is not accompanied, it is true, with any impressive ceremonies, but it inculcates a lesson of unfaltering friendship which the prospect of danger could not appal, and the hour of adversity could not betray. It is, in fact, de-

voted to the practical elucidation of the Masonic virtue of Brotherly Love. In conferring it, those passages of Scripture which are contained in the twentieth chapter of the 1st Book of Samuel, from the sixteenth to the twenty-third, and from the thirty-fifth to the forty-second verses inclusive, are usually considered as appropriate. It may be conferred on a *worthy* Master Mason by any brother who is in possession of its ritual. There was in Holland, in 1778, a secret Masonic society called the Order of Jonathan and David, which was probably much the same as this American degree. Kloss in his *Catalogue* (1910[b]) gives the title of a book published in that year at Amsterdam which gives its statutes and formulary of reception.

Secret of the Secrets, The. A degree cited in the nomenclature of Fustier.

Secret Societies. Secret societies may be divided into two classes: First, those whose secrecy consists in nothing more than methods by which the members are enabled to recognize each other; and in certain doctrines, symbols, or instructions which can be obtained only after a process of initiation, and under the promise that they shall be made known to none who have not submitted to the same initiation; but which, with the exception of these particulars, have no reservations from the public. And secondly, of those societies which, in addition to their secret modes of recognition and secret doctrine, add an entire secrecy as to the object of their association, the times and places of their meeting, and even the very names of their members. To the first of these classes belong all those moral or religious secret associations which have existed from the earliest times. Such were the Ancient Mysteries, whose object was, by their initiations, to cultivate a purer worship than the popular one; such, too, the schools of the old philosophers, like Pythagoras and Plato, who in their esoteric instructions taught a higher doctrine than that which they communicated to their exoteric scholars. Such, too, are the modern secret societies which have adopted an exclusive form only that they may restrict the social enjoyment which it is their object to cultivate, or the system of benevolence for which they are organized, to the persons who are united with them by the tie of a common covenant, and the possession of a common knowledge; such, lastly, is Freemasonry, which is a secret society only as respects its signs, a few of its legends and traditions, and its method of inculcating its mystical philosophy, but which, as to everything else—its design, its object, its moral and religious tenets, and the great doctrine which it teaches—is as open a society as if it met on the highways beneath the sun of day, and not within the well-guarded portals of a Lodge. To the second class of secret societies belong those which sprung up first in the Middle Ages, like the *Vehm Gericht* of Westphalia, formed for the secret but certain punishment of criminals; and in the eighteenth century those political societies like the Carbonari, which have been organized at revolutionary periods to resist the oppression or overthrow the despotism of tyrannical governments. It is evident that these two classes of secret societies are entirely different in character; but it has been the great error of writers like Barruel and Robison, who have attacked Freemasonry on the ground of its being a secret association that they utterly confounded the two classes.

An interesting discussion on this subject took place in 1848, in the National Assembly of France, during the consideration of those articles of the law by which secret societies were prohibited. A part of this discussion is worth preserving, and is in the following words:

M. Volette: I should like to have one define what is meant by a secret society.

M. Coquerel: Those are secret societies which have made none of the declarations prescribed by law.

M. Paulin Gillon: I would ask if *Freemasonry* is also to be suppressed?

M. Floçon: I begin by declaring that, under a republican government, every secret society having for its object a change of the form of such government ought to be severely dealt with. Secret societies may be directed against the sovereignty of the people; and this is the reason why I ask for their suppression; but, from the want of a precise definition, *I would not desire to strike, as secret societies, assemblies that are perfectly innocent.* All my life, until the 24th of February, have I lived in secret societies. Now I desire them no more. Yes, we have spent our life in conspiracies, and we had the right to do so; for we lived under a government which did not derive its sanctions from the people. To-day I declare that under a republican government, and with universal suffrage, it is a crime to belong to such an association.

M. Coquerel: As to Freemasonry, your committee has decided that it *is not a secret society.* A society may have a secret, and yet not be a secret society. I have not the honor of being a Freemason.

The President: The thirteenth article has been amended, and decided that a *secret society is one which seeks to conceal its existence and its objects.*

Secret Vault. See *Vault, Secret.*

Sectarianism. Masonry repudiates all sectarianism, and recognizes the tenets of no sect as preferable to those of any other, requiring in its followers assent only to those dogmas of the universal religion which teach the existence of God and the resurrection to eternal life. (See *Toleration.*)

Secular Lodges. The epithet *secular* has sometimes, but very incorrectly, been applied to subordinate Lodges to distinguish them from Grand Lodges. In such a connection the word is unmeaning, or, what is worse, is a term bearing a meaning entirely different from that which was intended by the writer. "Secular," says Richardson, "is used as distinguished from eternal, and equivalent to temporal; pertaining to temporal things,

things of this world; worldly; also opposed to spiritual, to holy." And every other orthoepist gives substantially the same definition. It is then evident, from this definition, that the word *secular* may be applied to all Masonic bodies, but not to one class of them in contradistinction to another. All Masonic Lodges are secular, because they are worldly, and not spiritual or holy institutions. But a subordinate Lodge is no more secular than a Grand Lodge.

Sedition Act. On July 12, 1799, the British Parliament, alarmed at the progress of revolutionary principles, enacted a law, commonly known as the Sedition Act, for the suppression of secret societies; but the true principles of Freemasonry were so well understood by the legislators of Great Britain, many of whom were members of the Order, that the following clause was inserted in the Act:

"And whereas, certain societies have been long accustomed to be holden in this kingdom, under the denomination of Lodges of Freemasons, the meetings whereof have been in a great measure directed to charitable purposes, be it therefore enacted, that nothing in this Act shall extend to the meetings of any such society or Lodge which shall, before the passing of this Act, have been usually holden under the said denomination, and in conformity to the rules prevailing among the said societies of Freemasons."

Seeing. One of the five human senses, whose importance is treated of in the Fellow-Craft's Degree. By sight, things at a distance are, as it were, brought near, and obstacles of space overcome. So in Freemasonry, by a judicious use of this sense, in modes which none but Masons comprehend, men distant from each other in language, in religion, and in politics, are brought near, and the impediments of birth and prejudice are overthrown. But, in the natural world, sight cannot be exercised without the necessary assistance of light, for in darkness we are unable to see. So in Masonry, the peculiar advantages of *Masonic sight* require, for their enjoyment, the blessing of *Masonic light*. Illuminated by its Divine rays, the Mason sees where others are blind; and that which to the profane is but the darkness of ignorance, is to the initiated filled with the light of knowledge and understanding.

Seekers. (*Chercheurs.*) The First Degree of the Order of Initiated Knights and Brothers of Asia.

Sefidd Schamagan. A secret Moslem Society, called also the Candidati, from being clothed in white. They taught that the wicked would be transformed, after death, into beasts, while the good would be reabsorbed into the Divine Creator. The chief was known as the Veiled Prophet.

Sejjin. The Arabic register of all the wicked, also the title of the residence of Eblis.

Selamu Aleikum, Es. The Arabic salutation of "Peace be with you"; which meets with the response "*Aleikum es Selaam.*" These expressions are prominently in use by ancient Arabic associations.

Select Master. The Ninth Degree in the American Rite, and the last of the two conferred in a Council of Royal and Select Masters. Its officers are a Thrice Illustrious Grand Master, Illustrious Hiram of Tyre, Principal Conductor of the Works, Treasurer, Recorder, Captain of the Guards, Conductor of the Council, and Steward. The first three represent the three Grand Masters at the building of Solomon's Temple. The symbolic colors are black and red, the former significant of secrecy, silence, and darkness; the latter of fervency and zeal. A Council is supposed to consist of neither more nor less than twenty-seven; but a smaller number, if not less than nine, is competent to proceed to work or business. The candidate, when initiated, is said to be "chosen as a Select Master." The historical object of the degree is to commemorate the deposit of an important secret or treasure which, after the preliminary preparations, is said to have been made by Hiram Abif. The place of meeting represents a secret vault beneath the Temple.

A controversy has sometimes arisen among ritualists as to whether the degree of Select Master should precede or follow that of Royal Master in the order of conferring. But the arrangement now existing, by which the Royal Master is made the First and the Select Master the Second Degree of Cryptic Masonry, has been very generally accepted, and this for the best of reasons. It is true that the circumstances referred to in the degree of Royal Master occurred during a period of time which lies between the death of the Chief Builder of the Temple and the completion of the edifice, while those referred to in the degree of Select Master occurred anterior to the builder's death. Hence, in the order of time, the events commemorated in the Select Master's Degree took place anterior to those which are related in the degree of Royal Master; although in Masonic sequence the latter degree is conferred before the former. This apparent anachronism is, however, reconciled by the explanation that the secrets of the Select Master's Degree were not brought to light until long after the existence of the Royal Master's Degree had been known and recognized.

In other words, to speak only from the traditional point of view, Select Masters had been designated, had performed the task for which they had been selected, and had closed their labors, without ever being openly recognized as a class in the Temple of Solomon. The business in which they were engaged was a secret one. Their occupation and their very existence, according to the legend, were unknown to the great body of the Craft in the first Temple. The Royal Master's Degree, on the contrary, as there was no reason for concealment, was publicly conferred and acknowledged during the latter part of the construction of the Temple of Solomon; whereas the degree of

Select Master, and the important incidents on which it was founded, are not supposed to have been revealed to the Craft until the building of the temple of Zerubbabel. Hence the Royal Master's Degree should always be conferred anterior to that of the Select Master.

The proper jurisdiction under which these degrees should be placed, whether under Chapters and to be conferred preparatory to the Royal Arch Degree or under Councils and to be conferred after it, has excited discussion. The former usage prevails in Maryland and Virginia, but the latter in all the other States. There is no doubt that these degrees belonged originally to the Ancient and Accepted Rite, and were conferred as honorary degrees by the Inspectors of that Rite. This authority and jurisdiction the Supreme Council for the Southern Jurisdiction of the Rite continued to claim until the year 1870; although, through negligence, the Councils of Royal and Select Masters in some of the States had been placed under the control of independent jurisdictions called Grand Councils. Like all usurped authority, however, this claim of the State Grand Councils does not seem to have ever been universally admitted or to have been very firmly established. Repeated attempts have been made to take the degrees out of the hands of the Councils and to place them in the Chapters, there to be conferred as preparatory to the Royal Arch. The General Grand Chapter, in the triennial session of 1847, adopted a resolution granting this permission to all Chapters in States where no Grand Councils exist. But, seeing the manifest injustice and inexpediency of such a measure, at the following session of 1850 it refused to take any action on the subject of these degrees. In 1853 it disclaimed all control over them, and forbade the Chapters under its jurisdiction to confer them. As far as regards the interference of the Ancient and Accepted Scottish Rite, that question was set at rest in 1870 by the Mother Council, which, at its session at Baltimore, formally relinquished all further control over them.

Semelius. An officer in the Sixth Degree of the Modern French Rite, known as the Grand Master of Despatches.

Semester. The *mot de semestre*, or semi-annual word, is used only in France. Every six months a secret word is communicated by the Grand Orient to all the Lodges under its jurisdiction. This custom was introduced October 28, 1773, during the Grand Mastership of the Duke of Chartres, to enable him the better to control the Lodges, and to afford the members a means whereby they could recognize the members who were not constant in their attendance, and also those Masons who either belonged to an unrecognized Rite, or who were not affiliated with any Lodge. The Chapters of the higher degrees receive a word annually from the Grand Orient for the same purpose. This, with the password, is given to the Tiler on entering the Temple.

Senatorial Chamber. When the Supreme Council of the Ancient and Accepted Rite meets in the Thirty-third Degree, it is said to meet in its senatorial chamber.

Seneschal. An officer found in some of the high degrees, as in the Thirty-second of the Ancient and Accepted Rite, where his duties are similar to those of a Warden of a Lodge, he acting as the deputy of the presiding officer. The title is derived from the old German *senne*, house, and *schalk*, servant. The seneschals in the Middle Ages were the lieutenants of the dukes and other great feudatories, and took charge of the castles of their masters during their absence.

Senior Deacon. See *Deacon*.

Senior Entered Apprentice. In the ritual of the early part of the last century the Senior and Junior Entered Apprentices acted in the place of the Deacons, which offices were then unknown. The Senior Entered Apprentice was placed in the south, and his duty was "to hear and receive instructions, and to welcome strange Brethren." (See *Junior Entered Apprentice*.)

Senior Warden. The second officer in a Symbolic Lodge. He presides over the Craft during the hours of labor, as the Junior does during the hours of refreshment, and in the absence of the Master he performs his duty. (See *Wardens*.)

Senses, Five. See *Five Senses*.

Senses, Seven. See *Man*.

Sentinel. An officer in a Royal Arch Chapter, in a council of Knights of the Red Cross, and in a Commandery of Knights Templar, whose duties are similar to those of a Tiler in a Symbolic Lodge. In some bodies the word *Janitor* has been substituted for *Sentinel*, but the change is hardly a good one. Janitor has been more generally appropriated to the porter of a collegiate institution, and has no old Masonic authority for its use.

Sephiroth. (Hebrew, ספירות.) It is a plural noun, the singular being *Sephira*. Buxtorf (*Lex. Talm.*) says the word means *numerations*, from SAPHAR, *to number;* but the Kabbalistic writers generally give it the signification of *splendors*, from SAPHIRI, *splendid*. The account of the creation and arrangement of the Sephiroth forms the most important portion of the secret doctrine of the Kabbalists, and has been adopted and referred to in many of the high philosophic degrees of Masonry. Some acquaintance with it, therefore, seems to be necessary to the Mason who desires to penetrate into the more abstruse arcana of his Order. (See *Kabbala*.)

Sephora. Wife of Moses, and daughter of Raguel or Jethro, Priest of Midian. Mentioned in the Fourth Degree of the French Rite of Adoption.

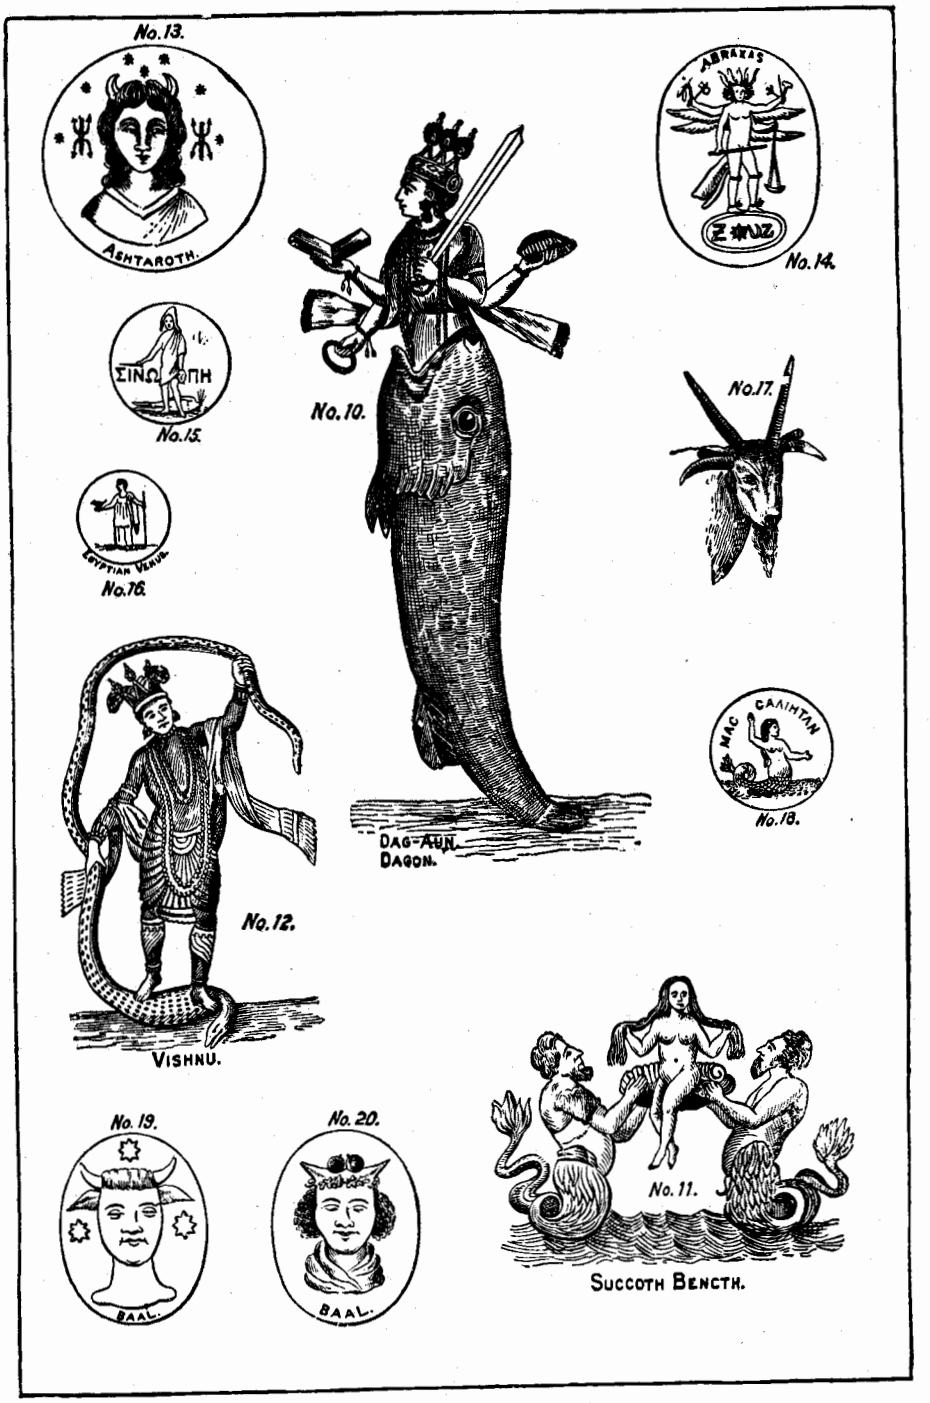
Septenary. The number *Seven*, which see.

Sepulcher. The spirit of gratitude has from the earliest period led men to venerate the tombs in which have been deposited the remains of their benefactors. In all of the ancient religions there were sacred tombs to

which worship was paid. The tombs of the prophets, preserved by the Israelites, gave testimony to their reverence for the memory of these holy personages. After the advent of Christianity, the same sentiment of devotion led the pilgrims to visit the Holy Land, that they might kneel at what was believed to be the sepulcher of their Lord. In many of the churches of the Middle Ages there was a particular place near the altar called the sepulcher, whch was used at Easter for the performance of solemn rites commemorative of the Savior's resurrection. This custom still prevails in some of the churches on the Continent. In Templar Masonry, which is professedly a Christian system, the sepulcher forms a part of the arrangements of a Commandery. In England, the sepulcher is within the Asylum, and in front of the Eminent Commander. In America it is placed without; and the scenic representation observed in every well-regulated and properly arranged Commandery furnishes a most impressive and pathetic ceremony.

Sepulcher, Knight of the Holy. See *Knight of the Holy Sepulcher*.

Seraphim. (Heb., שְׂרָפִים.) Singular *Seraph*, signifying "burning, fiery." Celestial beings in attendance upon Jehovah, mentioned by Isaiah. Similar to the Cherubim, having the human form, face, voice, two hands, and two feet, but six wings, with four of which they cover their faces and feet —as a sign of reverence—while with two they fly. Their specific office is to sing the praises of the Holy One, and convey messages from heaven to earth.



Seraphim, Order of. A Swedish Rite, instituted in 1334, revived in 1748. The number of knights, exclusive of the royal family, was twenty-four.

Serapis, Mysteries of. See *Egyptian Mysteries*.

Sermons, Masonic. Sermons on Masonic subjects, and delivered in churches before Masonic bodies or on Masonic festivals, are peculiar to the British and American Freemasons. Neither the French nor German, nor, indeed, any continental literature of Masonry, supplies us with any examples. The first Masonic sermon of which we have any knowledge, from its publication, was "A General Charge to Masons, delivered at Christ Church, in Boston, [Massachusetts], on the 27th of December, 1749, by the Rev. Charles Brockwell, A. M., published at the request of the Grand Officers and Brethren there." It was, however, not printed at Boston, but was first published in the *Freemasons' Pocket Companion* for 1754. Brockwell was chaplain of the English troops stationed at Boston. But in America, at least, the custom of delivering sermons on St. John's day prevailed many years before. In Dr. Mackey's *History of Freemasonry in South Carolina* (pp. 15–20) will be found the authentic evidence that the Lodges in Charleston attended Divine service on December 27, 1738, and for several years after, on each of which occasions it is to be presumed that a sermon was preached. In 1742 it is distinctly stated, from a contemporary gazette, that "both Lodges proceeded regularly, with the ensigns of their Order and music before them, to church, where they heard a very learned sermon from their brother, the Rev. Mr. Durand." Brockwell's, however, is the first of these early sermons which has had the good fortune to be embalmed in type. But though first delivered, it was not the first printed. In 1750, John Entick, afterward the editor of an edition of Anderson's *Constitutions*, delivered a sermon at Walbrook, England, entitled "The Free and Accepted Mason Described." The text on this occasion was from Acts xxviii. 22, and had some significance in reference to the popular character of the Order. "But we desire to hear of thee what thou thinkest; for as concerning this sect, we know that everywhere it is spoken against." Entick preached several other sermons, which were printed. From that time, both in England and America, the sermon became a very usual part of the public celebration of a Masonic festival. One preached at Newcastle-upon-Tyne, in 1775, is in its very title a sermon of itself: "The Basis of Freemasonry displayed; or, an Attempt to show that the general Principles of true Religion, genuine Virtue, and sound Morality are the noble Foundations on which this renowned Society is established: Being a Sermon preached in Newcastle, on the Festival of St. John the Evangelist, 1775, by Bro. Robert Green."

In 1799, the Rev. Jethro Inwood published a volume of *Sermons, in which are expressed and enforced the religious, moral, and political virtues of Freemasonry, preached upon several occasions before the Provincial Grand Officers and other Brethren in the Counties of Kent and Essex*. In 1849 Spencer published an edition of this work, enriched by the valuable notes of Dr. Oliver. In 1801 the Rev. Thaddeus Mason Harris, Grand Chaplain of the Grand Lodge and Grand Chapter of Massachusetts, published at Charlestown, Massachusetts, a volume of *Discourses delivered on Public Occasions, illustrating the Principles, displaying the Tendency, and vindicating the Design of Freemasonry*. This work has also been annotated in a new edition by Dr. Oliver, and republished in his *Golden Remains of Early Masonic Writers*. During this century there has been an abundance of single sermons preached and published, but no other collected volume of any by one and the same author has been given to the public since those of Dr. Harris. Yet the fact that annually in Great Britain and America hundreds of sermons in praise or in defense of Freemasonry are delivered from Christian pulpits, is a valuable testimony given by the clergy to the purity of the Institution.

Serpent. As a symbol, the serpent obtained a prominent place in all the ancient

initiations and religions. Among the Egyptians it was the symbol of Divine Wisdom when extended at length, and the serpent with his tail in his mouth was an emblem of eternity. The winged globe and serpent symbolized their triune deity. In the ritual of Zoroaster, the serpent was a symbol of the universe. In China, the ring between two serpents was the symbol of the world governed by the power and wisdom of the Creator. The same device is several times repeated on the Isiac table. Higgins (*Anacol.*, i., 521) says that, from the faculty which the serpent possessed of renewing itself, without the process of generation as to outward appearance, by annually casting its skin, it became, like the Phœnix, the emblem of eternity; but he denies that it ever represented, even in Genesis, the evil principle. Faber's theory of the symbolism of the serpent, as set forth in his work on the *Origin of Pagan Idolatry*, is ingenious. He says that the ancients in part derived their idea of the serpent from the first tempter, and hence it was a hieroglyphic of the evil principle. But as the deluge was thought to have emanated from the evil principle, the serpent became a symbol of the deluge. He also represented the good principle; the idea being borrowed from the winged Seraphim which was blended with the Cherubim who guarded the tree of life—the Seraphim and Cherubim being sometimes considered as identical; and besides, in Hebrew, שׂרף means both a *seraph* and a *serpent*. But as the good principle was always male and female, the male serpent represented the Great Father, Adam or Noah, and the female serpent represented the ark or world, the microcosm and the macrocosm. Hence the serpent represented the perpetually renovated world, and as such was used in all the mysteries. Dr. Oliver brings his peculiar views to the interpretation, and says that in Christian Masonry the serpent is an emblem of the fall and the subsequent redemption of man. In Ancient Craft Masonry, however, the serpent does not occur as a symbol. In the Templar and in the Philosophic degrees—such as the Knight of the Brazen Serpent, where the serpent is combined with the cross—it is evidently a symbol of Christ; and thus the symbolism of these degrees is closely connected with that of the Rose Croix.

Serpent and Cross. A symbol used in the degrees of Knights Templar and Knight of the Brazen Serpent. The cross is a tau cross ⊤, and the serpent is twined around. Its origin is found in Numbers xxi. 9, where it is said, "Moses made a serpent of brass, and put it upon a pole." The word נס, *Nes*, here translated "a pole," literally means a standard, or something elevated on high as a signal, and may be represented by a cross as well as by a pole. Indeed, Justin Martyr calls it a cross.

Serpent, Knight of the Brazen. See *Knight of the Brazen Serpent.*

Serpent Worship. In ancient times, the serpent was an object of adoration in almost all nations. It was, in fact, one of the earliest deviations from the true system, and in almost all the ancient rites we find some allusion to the serpent. It was worshiped in India, Egypt, Phœnicia, Babylonia, Greece, and Italy. Indeed, so widely was this worship distributed, presenting everywhere so many similar features, that it is not surprising that it has been regarded by some writers as the primitive religion of man. And so long did it continue, that in the sect of Ophites it became one of the earliest heresies of the church. In some nations, as the Egyptians, the serpent was the representative of the good principle; but in most of them it was the emblem of the evil principle.

Serving Brethren. Masons whose duty it is to serve the Lodge as Tilers, waiters at the Lodge table, and to perform other menial services, are called in European Lodges "serving brethren." They are not known in America, but were long recognized as a distinct class in England and on the Continent. In 1753 the Grand Lodge of England adopted a regulation for their initiation, which, slightly modified, is still in force. By it every Lodge is empowered to initiate without charge "serving brethren," who cannot, however, become members of the Lodge, although they may join another. In military Lodges private soldiers may be received as serving brethren. On the Continent, at one time, a separate and preliminary form of reception, with peculiar signs, etc., was appropriated to those who were initiated as serving brethren, and they were not permitted to advance beyond the first degree; which, however, worked no inconvenience, as all the business and refreshment of the Lodges were done at that time in the Entered Apprentice's Degree. The regulation for admitting serving brethren arose from the custom of Lodges meeting at taverns; and as at that period labor and refreshment were intermixed, the waiters for the tavern were sometimes required to enter the room while the Lodge was in session, and hence it became necessary to qualify them for such service by making them Masons. In France they are called *Frères Servants;* in Germany, *Dienenden Brüder*.

The Knights Templar had a class called serving brothers, who were not, however, introduced into the Order until it had greatly increased in wealth and numbers. The form of their reception varied very slightly from that of the Knights; but their habit was different, being black. They were designated for the performance of various services inside or outside of the Order. Many rich and well-born men belonged to this class. They were permitted to take part in the election of a Grand Master. The treasurer of the Order was always a serving brother. Of these serving brothers there were two

kinds: *servants at arms* and *artificers*. The former were the most highly esteemed; the latter being considered a very inferior class, except the *armorers*, who were held, on account of the importance of their occupation, in higher estimation.

Seth. It is a theory of some Masonic writers that the principles of the Pure or Primitive Freemasonry were preserved in the race of Seth, which had always kept separate from that of Cain, but that after the flood they became corrupted by a secession of a portion of the Sethites, who established the Spurious Freemasonry of the Gentiles. This theory has been very extensively advanced by Dr. Oliver in all his works. The pillars erected by Seth to preserve the principles of the arts and sciences are mentioned by Josephus. But although the Old Constitutions speak of Seth, they ascribe the erection of these pillars to the children of Lamech. But in the high degrees of Masonry the erection is attributed to Enoch. (See *Enoch*.)

Sethos. In 1731, the Abbé Terrasson published at Paris a work entitled *Sethos histoire ou vie tirée des monumens anecdotes de l'ancienne Egypte*. It has passed through a great many editions and has been translated into German and English. Under the form of fiction it contains an admirable description of the initiation into the ancient Egyptian mysteries. The labors and researches of Terrasson have been very freely used by Lenoir, Clavel, Oliver, and other writers on the ancient initiations.

Setting-Maul. A wooden hammer used by Operative Masons to "set" the stones in their proper positions. It is in Speculative Masonry a symbol, in the Third Degree, reminding us of the death of the builder of the Temple, which is said to have been effected by this instrument. In some Lodges it is very improperly used by the Master as his gavel, from which it totally differs in form and in symbolic signification. The gavel is a symbol of order and decorum; the setting-maul, of death by violence.

Setting Sun. It was the duty of the Senior Wardens to pay and dismiss the Craft at the close of day, when the sun sinks in the West; so now the Senior Warden is said in the Lodge to represent the setting sun.

Seven. In every system of antiquity there is a frequent reference to this number, showing that the veneration for it proceeded from some common cause. It is equally a sacred number in the Gentile as in the Christian religion. Oliver says that this can scarcely be ascribed to any event, except it be the institution of the Sabbath. Higgins thinks that the peculiar circumstance, perhaps accidental, of the number of the days of the week coinciding exactly with the number of the planetary bodies probably procured for it its character of sanctity. The Pythagoreans called it a perfect number, because it was made up of 3 and 4, the triangle and the square, which are the two perfect figures. They called it also a virgin number, and without mother, comparing it to Minerva, who was a motherless virgin, because it cannot by multiplication produce any number within ten, as twice two does four, and three times three does nine; nor can any two numbers, by their multiplication, produce it.

It is singular to observe the important part occupied by the number seven in all the ancient systems. There were, for instance, *seven* ancient planets, *seven* Pleiades, and *seven* Hyades; *seven* altars burned continually before the god Mithras; the Arabians had *seven* holy temples; the Hindus supposed the world to be enclosed within the compass of *seven* peninsulas; the Goths had *seven* deities, viz., the Sun, the Moon, Tuisco, Woden, Thor, Friga, and Seatur, from whose names are derived our days of the week; in the Persian mysteries were *seven* spacious caverns, through which the aspirant had to pass; in the Gothic mysteries, the candidate met with *seven* obstructions, which were called the "road of the seven stages"; and, finally, sacrifices were always considered as most efficacious when the victims were *seven* in number.

Much of the Jewish ritual was governed by this number, and the etymology of the word shows its sacred import, for the radical meaning of שבע, *shabang*, is, says Parkhurst, *sufficiency* or *fulness*. The Hebrew idea, therefore, like the Pythagorean, is that of *perfection*. To both the seven was a perfect number. Again: שבע, means *to swear*, because oaths were confirmed either by seven witnesses, or by seven victims offered in sacrifice, as we read in the covenant of Abraham and Abimelech. (Gen. xxi. 28.) Hence, there is a frequent recurrence to this number in the Scriptural history. The Sabbath was the *seventh* day; Noah received *seven* days' notice of the commencement of the deluge, and was commanded to select clean beasts and fowls by *sevens; seven* persons accompanied him into the ark; the ark rested on Mount Ararat in the *seventh* month; the intervals between despatching the dove were, each time, *seven* days; the walls of Jericho were encompassed *seven* days by *seven* priests, bearing *seven* rams' horns; Solomon was *seven* years building the Temple, which was dedicated in the *seventh* month, and the festival lasted *seven* days; the candlestick in the tabernacle consisted of *seven* branches; and, finally, the tower of Babel was said to have been elevated *seven* stories before the dispersion.

Seven is a sacred number in Masonic symbolism. It has always been so. In the earliest rituals of the last century it was said that a Lodge required seven to make it perfect; but the only explanation to be found in any of those rituals of the sacredness of the number is the seven liberal arts and sciences, which, according to the old "Legend of the Craft," were the foundation of Masonry. In modern ritualism the symbolism of seven has been transferred

from the First to the Second Degree, and there it is made to refer only to the seven steps of the Winding Stairs; but the symbolic seven is to be found diffused in a hundred ways over the whole Masonic system.

*The sun was naturally the great central planet of the ancient seven, and is ever represented as the central light of the seven in the branched candlestick. Of the days of the week one was known as Sol's day, or Sunday, and as the Sun was the son of Saturn, he was ushered in by his father Saturn (or Saturday), whom he superseded. The Jews got their Sabbath from the Babylonians about 700 B.C. (*Anc. Faiths*, p. 863; also see *Philo Judæus*, *Josephus*, and *Clement of Alexandria*), while Sol's day dates from time immemorial, and was always a sacred one. In a phallic sense, when the sun has been in conjunction with the moon, he only leaves Luna after impregnation, and as Forlong, in his *Rivers of Life*, expresses it, "the young sun is that faint globe we so often see in the arms of the new moon," which is in gestation with the sun. The occult meaning of the word *Mi-mi* perhaps is

here revealed, as mentioned in 2 Kings xviii. 27, being defined *Firewater*. *Mi* is the name of the sun, and as well signifies gold. It is designated in the musical scale, and is also the name of *fire* in Burmese, Siamese, and cognate tongues, as mentioned by Forlong in treating of the *Early Faiths of Western Asia* (vol. ii., p. 65).

Next to the sun in beauty and splendor the moon leads all the hosts of heaven. And the Occidental, as well as the Oriental, nations were strongly moved in their imaginations by the awful majesty, the solemn silence, and the grandeur of that brilliant body progressing nightly through the starry vault: from the distant plains of India to ancient Egypt, and even those far-off lands where the Incas ruled, altars were erected to the worship of the Moon. On every seventh day the moon assumed a new phase, which gave rise to festivals to Luna being correspondingly celebrated; the day so set apart was known as *Moon*-day, or the second day of the week, that following *Sun*-day. "The Moon, whose phases marked and appointed their holy days." (Cicero, *Tusculan Disputations*, Book I., ch. 28.) In the Hebrew, Syrian, Persian, Phœnician, Chaldean, and Saxon, the word Seven signifies *full* or *complete*, and every seventh day after the first quarter the moon is complete in its change. In all countries the moon is best known under the beautiful figure of the *unveiling Queen of Heaven*.

The relative values of Seven in the musical scale and in the ancient planetary formula are as follows:

Si	Moon . . .	Silver.
Ut	Mercury . .	Quicksilver.
Re	Venus . . .	Copper.
Mi . . .	Sun	Gold.
Fa	Mars . . .	Iron.
Sol . . .	Jupiter . .	Tin.
La	Saturn . .	Lead.

The eminent professor of music, Carl Bergstein, in connection herewith, furnishes the information that Guido Aretinus, Monk, in the eleventh century, the great reformer of music, invented the staff, several keys, and the names *ut, re, mi, fa, sol, la, si;* they being taken from a prayer to St. John to protect the voice, running thus:

Ut queant laxis *R*esonare fibris
*Mi*ra gestorum *Fa*muli tuorum
*Sol*ve polluti *La*bii reatum, Sancte Johannes.

The literal translation of which would be rendered:

"For that (or to enable) with expanded breast Thy servants are able to sing the praise of Thy Deeds, forgive the polluted lips the sins uttered."

The syllable *ut* has since been changed for the more satisfactory *do*.

In the year 1562 there was printed at Leipzig a work entitled *Heptalogium Virgilii Salsburgensis*, in honor of the number Seven. It consists of seven parts, each embracing seven divisions. In 1624 appeared in London a curious work on the subject of numbers, bearing the following title: "*The Secret of Numbers according to Theological, Arithmetical, Geometrical, and Harmonical Computation; drawn, for the better part, out of those Ancients, as well as Neoteriques.* Pleasing to read, profitable to understand, opening

*From this point the article is by C. T. McClenachan.

themselves to the capacities of both learned and unlearned; being no other than a key to lead men to any doctrinal knowledge whatsoever." In the ninth chapter the author has given many notable opinions from learned men, to prove the excellency of the number Seven. "First, it neither begets nor is begotten, according to the saying of Philo. Some numbers, indeed, within the compass of ten, beget, but are not begotten; and that is the unarie. Others are begotten, but beget not, as the octonarie. Only the septenaries have a prerogative above them all, they neither beget nor are begotten. This is its first divinity or perfection. Secondly, this is a harmonical number, and the well and fountain of that fair and lovely Sigamma, because it includeth within itself all manner of harmony. Thirdly, it is a theological number, consisting of perfection. Fourthly, because of its compositure; for it is compounded of the first two perfect numbers equal and unequal, three and four; for the number two, consisting of repeated unity, which is no number, is not perfect. Now every one of these being excellent of themselves (as hath been demonstrated), how can this number be but far more excellent, consisting of them all, and participating, as it were, of all their excellent virtues?"

Hippocrates says that the septenary number, by its occult virtue, tends to the accomplishment of all things, is the dispenser of life and fountain of all its changes; and, like Shakespeare, he divides the life of man into seven ages. In seven months a child may be born and live, and not before. Anciently a child was not named before seven days, not being accounted fully to have life before that periodical day. The teeth spring out in the seventh month, and are renewed in the seventh year, when infancy is changed into childhood. At thrice seven years the faculties are developed, manhood commences, and we become legally competent to all civil acts; at four times seven man is in full possession of his strength; at five times seven he is fit for the business of the world; at six times seven he becomes grave and wise, or never; at seven times seven he is in his apogee, and from that time he decays; at eight times seven he is in his first climacteric; at nine times seven, or sixty-three, he is in his grand climacteric, or years of danger; and ten times seven, or threescore years and ten, has, by the Royal Prophet, been pronounced the natural period of human life.

Seven Stars. In the Tracing-Board of the Seventeenth Degree, or Knight of the East and West, is the representation of a man clothed in a white robe, with a golden girdle round his waist, his right hand extended, and surrounded with seven stars. The Seventeenth is an apocalyptic degree, and this symbol is taken from the passage in Revelation i. 16, "and he had in his right hand seven stars." It is a symbol of the seven churches of Asia.

Seventy Years of Captivity. This period must be computed from the defeat of the Egyptians at Carchemish, in the same year that the prophecy was given, when Nebuchadnezzar reduced the neighboring nations of Syria and Palestine, as well as Jerusalem, under his subjection. At the end of seventy years, on the accession of Cyrus, an end was put to the Babylonish monarchy.

Shaddai. One of the names of God. In Exodus vi. 3, the word translated God Almighty is, in the original, *Shaddai*, שדי; it is therefore the name by which he was known to the Israelites before he communicated to Moses the Tetragrammaton. The word is a *pluralis majestatis*, and signifies all-powerful, omnipotent.

Shalal Shalom Abi. (Hebrew, שלום אבי שלל, *Diripuit pacem patri.*) A covered word in the Fifteenth Degree of the A. A. Scottish Rite.

Shalash Esrim. (Heb. שלש עשרים.) "Twenty-three," and refers to a day in the month Adar, noted in the Sixteenth Degree of the A. A. Scottish Rite.

Shamir. King Solomon is said, in a Rabbinical legend, to have used the worm *Shamir* as an instrument for building the Temple. The legend is that Moses engraved the names of the twelve tribes on the stones of the breastplate by means of the blood of the worm *Shamir*, whose solvent power was so great that it could corrode the hardest substances. When Solomon was about to build the Temple of stones without the use of any metallic implement, he was desirous of obtaining this potent blood; but the knowledge of the source whence Moses had derived it had been lost by the lapse of time. Solomon enclosed the chick of a bird, either an ostrich or a hoopoe, in a crystal vessel, and placed a sentinel to watch it. The parent bird, finding it impossible to break the vessel with her bill so as to gain access to the young one, flew to the desert, and returned with the miraculous worm, which, by means of its blood, soon penetrated the prison of glass, and liberated the chick. By a repetition of the process, the King of Israel at length acquired a sufficiency of the dissolving blood to enable him to work upon the stones of the Temple.

It is supposed that the legend is based on a corruption of the word *Smiris*, the Greek for emery, which was used by the antique engravers in their works and medallions, and that the name *Shamir* is merely the Hebrew form of the Greek word.

Sharp Instrument. The emblematic use of a "sharp instrument," as indicated in the ritual of the First Degree, is intended to be represented by a warlike weapon (the old rituals call it "a warlike instrument"), such as a dagger or sword. The use of the point of a pair of compasses, as is sometimes improperly done, is an erroneous application of the symbol, which should not be tolerated in a properly conducted Lodge. The compasses are, besides, a symbol peculiar to the Third Degree.

Shaster. ("Instruction.") Any book held more or less sacred among the Hindus, whether included in the Sruti or not. The Great Shasters comprise the Vedas, the Upavedas, and the Vedangas, with their appended works of learning, including the Puranas, the Ramayâna, and the Mahabharata.

Shastras. The sacred book of the Hindus, which contains the dogmas of their religion and the ceremonies of their worship. It is a commentary on the Vedas, and consists of three parts: the moral law, the rites and ceremonies of the religion, and the distribution of the people into tribes. To the Hindu Mason it would be the Greater Light and his Book of the Law, as the Bible is to his Christian brother.

Sheba, Queen of. In the Books of Kings and Chronicles, we are told that "when the Queen of Sheba heard of the fame of Solomon concerning the name of the Lord, she came to prove him with hard questions." Sheba, or Saba, is supposed to have been a province of Arabia Felix, situated to the south of Jerusalem. The queen, whose visit is thus described, is spoken of nowhere else in Scripture. But the Jews and the Arabs, who gave her the name of Balkis, recite many traditions concerning her. The Masonic one will be found under the words *Admiration, Sign of*, which see.

Shebat. (שבט.) The fifth month of the Hebrew civil year, and corresponding with the months January and February, beginning with the new moon of the former.

Shekel. In the Fourth or Mark Master's Degree, it is said that the value of a mark is "a Jewish half-shekel of silver, or twenty-five cents in the currency of this country." The shekel of silver was a weight of great antiquity among the Jews, its value being

about a half-dollar. In the time of Solomon, as well as long before and long after, until the Babylonish exile, the Hebrews had no regularly stamped money, but generally used in traffic a currency which consisted of uncoined shekels, which they weighed out to one another. The earliest specimens of the coined shekel which we know are of the coinage of Simon Maccabeus, issued about the year 144 B.C. Of these, we generally find on the obverse the sacred pot of manna, with the inscription, "Shekel Israel," in the old Samaritan character; on the reverse, the rod of Aaron, having three buds, with the inscription, "Ierushalem Kadoshah," or Jerusalem the Holy, in a similar character.

Shekinah. Heb., שכינה, derived from SHAKAN, to dwell. A term applied by the Jews, especially in the Targums, to the Divine glory which dwelt in the tabernacle and the Temple, and which was manifested by a visible cloud resting over the mercy-seat in the Holy of Holies. It first appeared over the ark when Moses consecrated the tabernacle; and was afterward, upon the consecration of the Temple by Solomon, translated thither, where it remained until the destruction of that building.

The Shekinah disappeared after the destruction of the first Temple, and was not present in the second. Mr. Christie, in his learned treatise on the *Worship of the Elements*, says that "the loss of the Shekinah, that visible sign of the presence of the Deity, induced an early respect for solar light as its substitute." Now there is much that is significative of Masonic history in this brief sentence. The sun still remains as a prominent symbol in the Masonic system. It has been derived by the Masons from those old sun-worshipers. But the idea of Masonic light is very different from their idea of solar light. The Shekinah was the symbol of the Divine glory; but the true glory of divinity is *Truth*, and Divine Truth is therefore the Shekinah of Masonry. This is symbolized by light, which is no longer used by us as a "substitute" for the Shekinah, or the Divine glory, but as its symbol—the physical expression of its essence.

Shelum leeka. The password of the Order of Felicity. It is of Arabic root, signifying, "Peace be with you!"

Shem. שם. *The Name.* The Jews in their sacred rites often designated God by the word *Name*, but they applied it only to him in his most exalted character as expressed by the Tetragrammaton, JEHOVAH. To none of the other titles of God, such as *El, Eheyeh*, or *Adonai*, do they apply the word. Thus, *Shemchah Kadosh*, Thy name is holy, means Thy name Jehovah is holy. To the *Name* thus exalted, in its reference to the Tetragrammaton, they applied many epithets, among which are the following used by the Talmudists, שם של ארבע, *Shem shal arbang*, the name of four, i. e., four letters; שם המיוכד, *Shem hamjukad*, the appropriated name, i. e., appropriated solely to God. שם הגדול, *Shem haggadol*, the great name, and שם הקדוש, *Shem hakkadosh*, the holy name. To the Jew, as to the Mason, this great and holy name was the symbol of all Divine truth. The *Name* was the true name, and therefore it symbolized and represented the true God.

Shem, Ham, Japheth. The three sons of Noah, who assisted him in the construction of the ark of safety, and hence they became significant words in the Royal Arch Degree according to the American system. The interpolation of *Adoniram* in the place of one of these names, which is sometimes met with, is a blunder of some modern, ignorant ritual maker.

Shem Hamphorasch. שם המפורש, *the separated name.* The Tetragrammaton is so called because, as Maimonides (*More Nevoch.*) says, all the names of God are derived from his works except the Tetragrammaton, which is called the *separated name,* because it is derived from the substance of the Creator, in which there is no participation of any other thing. That is to say, this name indicates the self-existent essence of God, which is something altogether within himself, and separate from his works.

Shemitic. One of the three historical divisions of religion—the other two being the Turanian and the Aryan—and embraces Mosaism, Christianity, the Eddaic Code, and Moslemism.

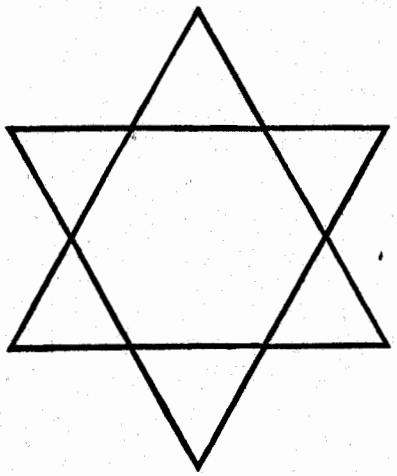
Sheriff. According to Preston, the sheriff of a county possessed, before the revival of 1717, a power now confined to Grand Masters. He says (*Illust.*, p. 182) that "A sufficient number of Masons met together within a certain district, with the consent of the Sheriff or chief magistrate of the place, were empowered, at this time, to make Masons, and practise the rites of Masonry without a Warrant of Constitution." This is confirmed by the following passage in the Cooke MS. (lines 901–912): "When the masters and fellows be forewarned, and are come to such congregations, if need be, the Sheriff of the Country, or the Mayor of the City, or Aldermen of the Town in which such Congregation is holden, shall be fellow and sociate to the master of the congregation in help of him against rebels and [for the] upbearing the right of the realm."

Shermah, Insect. See *Insect Shermah.*

Shesha. The seven-headed serpent floating in the cosmical ocean, upon which the throne of Brahma rested.

Shetharboznai. See *Tatnai.*

Shewbread. The twelve loaves which were placed upon a table in the sanctuary of the Temple, and which were called the shewbread or bread of the presence, are represented among the paraphernalia of a Lodge of Perfection in the Ancient and Accepted Rite. Bähr (*Symbolik*) says that the shewbread was a symbol of the bread of life—of the eternal life by which we are brought into the presence of God and know him; an interpretation that is equally applicable to the Masonic symbolism.



Shibboleth. (Heb. שבלת.) The word which the Gileadites under Jephthah made use of as a test at the passages of the river Jordan after a victory over the Ephraimites. The word has two meanings in Hebrew: First, an ear of corn; and, secondly, a stream of water. As the Ephraimites were desirous of crossing the river, it is probable that this second meaning suggested it to the Gileadites as an appropriate test word on the occasion. The proper sound of the first letter of this word is *sh*, a harsh breathing which is exceedingly difficult to be pronounced by persons whose vocal organs have not been accustomed to it. Such was the case with the Ephraimites, who substituted for the aspiration the hissing sound of *s*. Their organs of voice were incapable of the aspiration, and therefore, as the record has it, they "could not frame to pronounce it right." The learned Burder remarks (*Orient. Cust.*, ii., 782) that in Arabia the difference of pronunciation among persons of various districts is much greater than in most other places, and such as easily accounts for the circumstance mentioned in the passage of Judges. Hutchinson (*Sp. of Mas.*, p. 182), speaking of this word, rather fancifully derives it from the Greek σιβω, *I revere*, and λιθος, *a stone*, and, therefore, he says "Σιβολιθον, Sibbolithon, *Colo Lapidem*, implies that they (the Masons) retain and keep inviolate their obligations, as the *Juramentum per Jovem Lapidem*, the most obligatory oath held among the heathen."

It may be remarked that in the ritual of the Fellow-Craft's Degree, where the story of the Ephraimites is introduced, and where Shibboleth is symbolically interpreted as meaning *plenty*, the word *water-ford* is sometimes used incorrectly, instead of *waterfall*. Shibboleth means a *flood of water*, a rapid stream, not a *ford*. In Psalm lxix. 3, the word is used in this exact sense. שטפתני שבלת, *Shibboleth shetafatni*, the flood has overwhelmed me. And, besides, a *waterfall* is an emblem of plenty, because it indicates an abundance of water; while a *water-ford*, for the converse reason, is, if any symbol at all, a symbol of scarcity.

Shield. The shape of the shield worn by the knight in the Middle Ages varied according to the caprice of the wearer, but generally it was large at the top and gradually diminished to a point, being made of wood and covered with leather, and on the outside was seen the escutcheon or representation of the armorial bearings of the owner. The shield, with all the other parts of the armor worn by the knights except the gauntlets, has been discontinued by the modern Masonic Knights. Oliver thinks that in some of the military initiations, as in those of the Scandinavian mysteries, the shield was substituted for the apron. An old heraldic writer, quoted by Sloane-Evans (*Gram. Brit. Her.*, 153), thus gives the symbolic import of the shield: "Like as the shield served in the battle for a safeguard of the body of soldiers against wounds, even so in time of peace, the same being hanged up, did defend the owner against the malevolent detractions of the envious."

Shield of David. Two interlaced triangles, more commonly known as the Seal of Solomon, and considered by the ancient Jews as a talisman of great efficacy. (See *Seal of Solomon.*) Because the shield was, in battle, a protection, like a talisman, to the person, the Hebrews used the same word, מגן, *Magen*, to signify both a *shield* and a *talisman*. Gaffarel says, in his *Curiositates Inauditæ* (*Lond. Trans.*, 1650, p. 133), "The

Hebrew word *Maghen* signifies a scutcheon, or any other thing noted with Hebrew characters, the virtue whereof is like to that of a scutcheon." After showing that the shield was never an image, because the Mosaic law forbade the making of graven images, he adds: "*Maghen*, therefore, signifies properly any piece of paper or other like matter marked or noted with certain characters drawn from the Tetragrammaton, or Great Name of four letters, or from any

other." The most usual form of the Shield of David was to place in the center of the two triangles, and at the intersecting points, the Hebrew word אגלא, AGLA, which was compounded of the initials of the words of the sentence, אתה גבר לעלם אדני, *Atah Gibor Lolam Adonai*, "Thou art strong in the eternal God." Thus constructed, the Shield of David was supposed to be a preservative against all sorts of dangers.

Shinto. The national worship of the Japanese, and signifies the "path of the gods." It is presumed to be more ancient than the days of King Solomon, and is analogous to sun-worship.

Shintoism. The ancient religion of Japan, and founded on the worship of ancestors. It acknowledges a Supreme Creator and many subordinate gods called *Kami*, many of whom are the apotheoses of emperors and great men. It believes in the immortality of the soul, and in its ritual uses symbols, such as the mirror—which is the symbol of an unsoiled life—and lustrations symbolic of moral purification. Like the early Grecian mythology, Shintoism has deified natural objects, such as the sun, the air, earth, fire, water, lightning, thunder, etc. It is a system much mixed up with the philosophy of Confucius and with myths and legends.

Shock. A striking of hands and feet, so as to produce a sudden noise. There is a ceremony called "the shock," which was in use in the reception of an Apprentice in the beginning of this century, and is still used by some Lodges in what is called "the Shock of Entrance," and by all in "the Shock of Enlightenment." Of the first shock as well as of the second, there are evident traces in some of the earlier rituals of the last century, and there is no doubt that it was an ancient ceremony, the gradual disuse of which is an innovation.

Shock of Enlightenment. A ceremony used in all the degrees of Symbolic Masonry. By it we seek to symbolize the idea of the birth of material light, by the representation of the circumstances that accompanied it, and their reference to the birth of intellectual or Masonic light. The one is the type of the other; and hence the illumination of the candidate is attended with a ceremony that may be supposed to imitate the primal illumination of the universe—most feebly, it is true, and yet not altogether without impressiveness.

The *Shock of Enlightenment* is, then, a symbol of the change which is now taking place in the intellectual condition of the candidate. *It is the symbol of the birth of intellectual light and the dispersion of intellectual darkness.*

Shock of Entrance. A ceremony formerly used on the admission of an Entered Apprentice, but now partly becoming obsolete. In the old initiations, the same word signified *to die* and *to be initiated*, because, in the initiation, the lesson of death and the resurrection to eternal life was the dogma inculcated. In the initiation of an Apprentice in Masonry the same lesson is begun to be taught, and the initiate, entering upon a new life and new duties, disrupting old ties and forming new ones, passes into a new birth. This is, or ought to be, necessarily accompanied by some ceremony which should symbolically represent this great moral change. Hence the impression of this idea is made by the symbolism of the shock at the entrance of the candidate.

The shock or entrance is then the symbol of the disruption of the candidate from the ties of the world, and his introduction into the life of Masonry. *It is the symbol of the agonies of the first death and of the throes of the new birth.*

Shoe. Among the ancient Israelites, the shoe was made use of in several significant ways. *To put off the shoes*, imported reverence, and was done in the presence of God, or on entering the dwelling of a superior. *To unloose one's shoe and give it to another* was the way of confirming a contract. Thus we read in the Book of Ruth, that Boaz having proposed to the nearest kinsman of Ruth to exercise his legal right by redeeming the land of Naomi, which was offered for sale, and marrying her daughter-in-law, the kinsman, being unable to do so, resigned his right of purchase to Boaz; and the narrative goes on to say (Ruth iv. 7, 8), "Now this was the manner in former time in Israel concerning redeeming and concerning chang-

ing, for to confirm all things; a man plucked off his shoe, and gave it to his neighbor: and this was a testimony in Israel. Therefore the kinsman said unto Boaz, Buy it for thee. So he drew off his shoe." The reference to the shoe in the First Degree is therefore really as a symbol of a covenant to be entered into. In the Third Degree the symbolism is altogether different. For an explanation of it, see *Discalceation*.

Shoulkain. (Heb. שול־קין, *Fimbria possessionis*.) Stolkin, mentioned in the Ninth and other degrees of the A. A. Scottish Rite.

Shovel. An instrument used to remove rubbish. It is one of the working-tools of a Royal Arch Mason, and symbolically teaches him to remove the rubbish of passions and prejudices, that he may be fitted, when he thus escapes from the captivity of sin, for the search and the reception of Eternal Truth and Wisdom.

Shrine. Oliver says that the shrine is the place where the secrets of the Royal Arch are deposited. The word is not so used in America, nor does it seem properly applicable according to the legend of the degree.

Side Degrees. There are certain Masonic degrees, which, not being placed in the regular routine of the acknowledged degrees, are not recognized as a part of Ancient Masonry, but receive the name of "Honorary or Side Degrees." They constitute no part of the regular ritual, and are not under the control of either Grand Lodges, Grand Chapters, or any other of the legal, administrative bodies of the Institution. Although a few of them are very old, the greater number are of a comparatively modern origin, and are generally supposed to have been indebted for their invention to the ingenuity of either Grand Lecturers, or other distinguished Masons. Their history and ceremonies are often interesting, and so far as we have been made acquainted with them, their tendency, when they are properly conferred, is always moral. They are not given in Lodges or Chapters, but at private meetings of the brethren or companions possessing them, informally and temporarily called for the sole purpose of conferring them. These temporary assemblies owe no allegiance to any supreme, controlling body, except so far as they are composed of Master or Royal Arch Masons, and when the business of conferring the degrees is accomplished, they are dissolved at once, not to meet again, except under similar circumstances and for a similar purpose.

Some of them are conferred on Master Masons, some on Royal Arch Masons, and some only on Knights Templar. There is another class which females, connected by certain ties of relationship with the Fraternity, are permitted to receive; and this fact, in some measure, assimilates these degrees to the Masonry of Adoption, or Female Masonry, which is practised in France and some other European countries, although there are important points of difference between them. These female side degrees have received the name of "androgynous degrees," from two Greek words signifying *man* and *woman*, and are thus called to indicate the participation in them by both sexes.

The principal side degrees practised in America are as follows:

1. Secret Monitor.
2. Knight of the Three Kings.
3. Knight of Constantinople.
4. Mason's Wife and Daughter.
5. Ark and Dove.
6. Mediterranean Pass.
7. Knight and Heroine of Jericho.
8. Good Samaritan.
9. Knight of the Mediterranean Pass.

Sight, Making Masons at. The prerogative of the Grand Master to make Masons at sight is described as the eighth landmark of the Order. It is a technical term, which may be defined to be the power to initiate, pass, and raise candidates, by the Grand Master, in a Lodge of emergency, or, as it is called in the *Book of Constitutions*, "an occasional Lodge," specially convened by him, and consisting of such Master Masons as he may call together for that purpose only; the Lodge ceasing to exist as soon as the initiation, passing, or raising has been accomplished, and the brethren have been dismissed by the Grand Master.

It is but right to say that this doctrine is not universally received as established law by the Craft. I do not think, however, that it was ever disputed until within a comparatively recent period. It is true that Cole (*Freemas.*, lib. 51), as far back as 1817, remarked that it was "a great stretch of power, not recognized, or at least, he believed, not practised in this country." But the qualifying phrases in this sentence, clearly show that he was by no means certain that he was correct in denying the recognition of the right. Cole, however, would hardly be considered as competent authority on a question of Masonic law, as he was evidently unacquainted with the *Book of Constitutions*, and does not quote or refer to it throughout his voluminous work.

In that *Book of Constitutions*, however, several instances are furnished of the exercise of this right by various Grand Masters.

In 1731, Lord Lovell being Grand Master, he "formed an occasional Lodge at Houghton Hall, Sir Robert Walpole's House in Norfolk," and there made the Duke of Lorraine, afterward Emperor of Germany, and the Duke of Newcastle, Master Masons.

I do not quote the case of the initiation, passing, and raising of Frederick, Prince of Wales, in 1737, which was done in "an occasional Lodge," over which Dr. Desaguliers presided, because, as Desaguliers was not the Grand Master, nor even, as has been incorrectly stated by the New York Committee of Correspondence, Deputy Grand Master, but only a Past Grand Master, it

cannot be called *a making at sight*. He most probably acted under the Dispensation of the Grand Master, who at that time was the Earl of Darnley.

But in 1766, Lord Blaney, who was then Grand Master, convened "an occasional Lodge," and initiated, passed, and raised the Duke of Gloucester.

Again in 1767, John Salter, the Deputy, then acting as Grand Master, convened "an occasional Lodge," and conferred the three degrees on the Duke of Cumberland.

In 1787, the Prince of Wales was made a Mason "at an occasional Lodge convened," says Preston, "for the purpose at the Star and Garter, Pall Mall, over which the Duke of Cumberland (Grand Master) presided in person."

It has been said, however, by those who deny the existence of this prerogative, that these "occasional Lodges" were only special communications of the Grand Lodge, and the "makings" are thus supposed to have taken place under the authority of that body, and not of the Grand Master. The facts, however, do not sustain this position. Throughout the *Book of Constitutions*, other meetings, whether regular or special, are distinctly recorded as meetings of the Grand Lodge; while these "occasional Lodges" appear only to have been convened by the Grand Master for the purpose of making Masons. Besides, in many instances the Lodge was held at a different place from that of the Grand Lodge, and the officers were not, with the exception of the Grand Master, the officers of the Grand Lodge. Thus the occasional Lodge which initiated the Duke of Lorraine was held at the residence of Sir Robert Walpole, in Norfolk, while the Grand Lodge always met in London. In 1766, the Grand Lodge held its communications at the Crown and Anchor, but the occasional Lodge, which in the same year conferred the degrees on the Duke of Gloucester, was convened at the Horn Tavern. In the following year, the Lodge which initiated the Duke of Cumberland was convened at the Thatched House Tavern, the Grand Lodge continuing to meet at the Crown and Anchor.

But I think that a conclusive argument *à fortiori* may be drawn from the dispensing power of the Grand Master, which has never been denied. No one ever has doubted, or can doubt, the inherent right of the Grand Master to constitute Lodges by Dispensation, and in these Lodges, so constituted, Masons may be legally entered, passed, and raised. This is done every day. Seven Master Masons applying to the Grand Master, he grants them a Dispensation, under authority of which they proceed to open and hold a Lodge, and to make Masons. This Lodge is, however, admitted to be the mere creature of the Grand Master, for it is in his power at any time to revoke the Dispensation he had granted, and thus to dissolve the Lodge.

But if the Grand Master has the power thus to enable others to confer the degrees and make Masons, by his individual authority out of his presence, are we not permitted to argue *à fortiori* that he has also the right of congregating seven brethren and causing a Mason to be made in his sight? Can he delegate a power to others which he does not himself possess? And is his calling together an "occasional Lodge," and making, with the assistance of the brethren thus assembled, a Mason "at sight," that is to say, in his presence, any thing more or less than the exercise of his dispensing power for the establishment of a Lodge under Dispensation, for a temporary period and for a special purpose. The purpose having been effected, and the Mason having been made, he revokes his Dispensation, and the Lodge is dismissed. If we assumed any other ground than this, we should be compelled to say that though the Grand Master might authorize others to make Masons when he was absent, he could not do it himself when present. The form of the expression "making Masons at sight" is borrowed from Laurence Dermott, the Grand Secretary of the Atholl or Schismatic Grand Lodge; "making Masons in an occasional Lodge" is the phrase used by Anderson and his subsequent editors. Dermott (*True Ahim. Rez.*), commenting on the thirteenth of the old regulations, which prescribes that Fellow-Crafts and Master Masons cannot be made in a private Lodge except by the Dispensation of the Grand Master, says: "This is a very ancient regulation, but seldom put in practice, new Masons being generally made at private Lodges; however, the Right Worshipful Grand Master has full power and authority to make, or cause to be made, in his worship's presence, Free and Accepted Masons at sight, and such making is good. But they cannot be made out of his worship's presence without a written Dispensation for that purpose. Nor can his worship oblige any warranted Lodge to receive the person so made, if the members should declare against him or them; but in such case the Right Worshipful Grand Master may grant them a Warrant and form them into a new Lodge."

But the fact that Dermott uses the phrase does not militate against the existence of the prerogative, nor weaken the argument in its favor. For, in the first place, he is not quoted as authority; and secondly, it is very possible that he did not invent the expression, but found it already existing as a technical phrase generally used by the Craft, although not to be found in the Book of Constitutions. The form there used is "making Masons in an occasional Lodge," which, as I have already said, is of the same signification.

The mode of exercising the prerogative is this: The Grand Master summons to his assistance not less than six other Masons, convenes a Lodge, and without any previous

probation, but *on sight* of the candidate, confers the degrees upon him, after which he dissolves the Lodge and dismisses the brethren.*

Sign. Signs constitute that universal language of which the commentator on the Leland MS. says that "it is a thing rather to be wished than hoped for." It is evident, however, that such a substitute for a universal language has always existed among mankind. There are certain expressions of ideas which, by an implied common consent, are familiar even to the most barbarous tribes. An extension forward of the open hands will be understood at once by an Australian savage or an American Indian as a gesture betokening peace, while the idea of war or dislike would be as readily conveyed to either of them by a repulsive gesture of the same hands. These are not, however, what constitute the signs of Masonry.

It is evident that every secret society must have some conventional mode of distinguishing strangers from those who are its members, and Masonry, in this respect, must have followed the universal custom of adopting such modes of recognition.

The Abbé Grandidier (*Essais Historiques et Topographiques*, p. 422) says that when Josse Dotzinger, as architect of the Cathedral of Strasburg, formed, in 1452, all the Master Masons in Germany into one body, "he gave them a word and a particular sign by which they might recognize those who were of their Confraternity." Martene, who wrote a treatise on the ancient rites of the monks (*De Antiquis Monachorum ritibus*), says that, at the Monastery of Hirschau, where many Masons were incorporated as lay brethren, one of the officers of the monastery was called the Master of the Works; and the Masons under him had a sign which he describes as "pugnam super pugnam pone vicissim quasi simules constructores marum"; that is, they placed alternately fist upon fist, as if imitating the builders of walls. He also says, and other writers confirm the statement, that in the Middle Ages the monks had a system of signs by which they were enabled to recognize the members of their different orders.

Krause (*Kunsturkunden*, iv., 420) thinks that the Masons derived their custom of having signs of recognition from this rule of the old monks. But we can trace the existence of signs to remote antiquity. In the Ancient Mysteries, the initiates were always instructed in a sign.

Thus, when a wreath was presented to an initiate of the mysteries of Mithras by another, instead of receiving it, he cast it upon the ground, and this gesture of casting down was accepted as a sign of recognition.

So, too, Apuleius (*Metamorph.*) describes the action of one of the devotees of the mysteries of Isis, and says: "He walked gently, with a hesitating step, the ankle of the left foot being slightly bent, in order, no doubt, that he might afford me some *sign* by which I might recognize him." And in another work (*Apologia*) he says: "If any one happens to be present who has been initiated into the same rites as myself, if he will *give me the sign*, he shall then be at liberty to hear what it is that I keep with so much care."

Plautus, too, alludes to this custom in one of his plays (*Miles Gloriosus*, iv., 2), when he says:

"*Cedo signum*, si harunc Baccharum est,"

i. e., "*Give me the sign*, if you are one of these Bacchantes."

Signs, in fact, belong to all secret associations, and are no more peculiar to Masonry than is a system of initiation. The forms differ, but the principle has always existed.

Signature. Every Mason who receives a certificate or diploma from a Grand Lodge is required to affix his signature in the margin, for a reason which is given under the words *Ne Varietur*, which see.

Signet. A ring on which there is an impression of a device is called a signet. They were far more common among the ancients than they are among the moderns, although they are still used by many persons. Formerly, as is the custom at this day in the East, letters were never signed by the persons who sent them; and their authenticity depended solely on the impression of the signets which were attached to them. So common was their use among the ancients, that Clement of Alexandria, while forbidding the Christians of the second century to deck their fingers with rings, which would have been a mark of vanity, makes an exception in favor of signet rings. "We must wear," he says, "but one ring, for the use of a signet; all other rings we must cast aside." Signets were originally engraved altogether upon stone; and Pliny says that metal ones did not come into use until the time of Claudius Cæsar.

Signets are constantly alluded to in Scripture. The Hebrews called them חֹתָם, *Sabaoth*, and they appear to have been used among them from an early period, for we find that when Judah asks Tamar what pledge he shall give her, she replies, "Thy signet, and thy bracelets, and thy staff that is in thine hand." (Gen. xxxviii. 18.) They were worn on the finger, generally the index finger, and always on the right hand, as being the most honorable; thus in Jeremiah xxii. 24, we read: "As I live, saith the Lord, though Coniah, the son of

*This custom of making Masons at sight has been practised by many Grand Lodges in America, but is becoming less usual, and some Grand Lodges have prohibited it by a constitutional enactment. A few noted cases may be mentioned: John Wanamaker, at Philadelphia; former Vice-President Charles W. Fairbanks, at Indianapolis, Indiana; the late Rear-Admiral Winfield Scott Schley, at Washington, D. C.; and when William Howard Taft was President-Elect, he was made a Mason "at-sight" on February 18, 1909, at Cincinnati, by the Grand Master of Ohio.

Jehoiakim, king of Judah, were the signet upon my right hand, yet would I pluck thee thence." The signets of the ancients were generally sculptured with religious symbols or the heads of their deities. The sphinx and the sacred beetle were favorite signets among the Egyptians. The former was adopted from that people by the Roman Emperor Augustus. The Babylonians followed the same custom, and many of their signets, remaining to this day, exhibit beautifully sculptured images of Baal-Berith and other Chaldean deities.

The impression from the signet-ring of a king gave the authority of a royal decree to any document to which it was affixed; and hence the delivery or transfer of the signet to anyone made him, for the time, the representative of the king, and gave him the power of using the royal name.

Signet of Truth. The signet of Zerubbabel, used in the ritual of the Royal Arch Degree, is also there called the *Signet of Truth*, to indicate that the neophyte who brings it to the Grand Council is in search of Divine Truth, and to give to him the promise that he will by its power speedily obtain his reward in the possession of that for which he is seeking. The Signet of Truth is presented to the aspirant to assure him that he is advancing in his progress to the attainment of truth, and that he is thus invested with the power to pursue the search.

Signet of Zerubbabel. This is used in the American ritual of the Royal Arch Degree. It refers to a passage of Haggai (ii. 23), where God has promised that he will make Zerubbabel his signet. It has the same symbolic meaning as is given to its synonym the "Signet of Truth," because Zerubbabel, as the head of the second Temple, was the symbol of the searcher after truth. But something may be said of the incorrect form in which it is found in many Chapters. At least from the time when Cross presented an engraving of this signet in his *Hieroglyphic Chart*, and perhaps from a much earlier period, for he may possibly have only perpetuated the blunder, it has been represented in most Chapters by a triangular plate of metal. Now, an unattached plate of metal, in any shape whatsoever, is about as correct a representation of a signet as a walking-cane is of a piece of money. The signet is and always has been a finger-ring, and so it should be represented in the ceremonies of the Chapter. What the peculiar device of this signet was—for every signet must have a device—we are unable to show, but we may suppose that it was the Tetragrammaton, perhaps in its well-known abbreviated form of a *yod within a triangle*. Whether this was so or not, such a device would be most appropriate to the symbolism of the Royal Arch ritual.

Significant Word. Significant is making a sign. A significant word is a sign-making word, or a word that is equivalent to a sign; so the secret words used in the different degrees of Masonry, and the knowledge of which becomes a sign of the possession of the degree, are called significant words. Such a word Lenning calls "ein bedeutendes Wort," which has the same meaning.

Sign of Distress. This is probably one of the original modes of recognition adopted at the revival period, if not before. It is to be found in the earliest rituals extant of the last century, and its connection with the legend of the Third Degree makes it evident that it probably belongs to that degree. The Craft in the last century called it sometimes "the Master's Clap," and sometimes "the Grand Sign," which latter name has been adopted by the Masons of the present century, who call it the "Grand Hailing Sign," to indicate its use in *hailing* or calling a brother whose assistance may be needed. The true form of the sign has unfortunately been changed by carelessness or ignorance from the ancient one, which is still preserved in Great Britain and on the Continent of Europe. It is impossible to be explicit; but it may be remarked, that looking to its traditional origin, the sign is a defensive one, first made in an hour of attack, to give protection to the person. This is perfectly represented by the European and English form, but utterly misrepresented by the American. The German Rite of Schroeder attempted some years ago to induce the Craft to transfer this sign from the Third to the First Degree. As this would have been an evident innovation, and would have contradicted the ritual history of its origin and meaning, the attempt was not successful.

Sijel, Al. The recording angel in Islam.

Silence. See *Secrecy and Silence*.

Silent Brotherhood. Dwellers in the priories of Clugny and Hirsan in the eleventh century were placed under rigid discipline as to speech. Those of Clugny were the first to adopt the system of signs for daily intercommunication, which system, by consent or permissal, granted after application through three special messengers from the priory of Hirsan, was adopted by that priory in all its elaborateness, and indeed enlarged and perfected by the well-known Abbot William. The doctrine of a perfect silence in such extensive communities became noteworthy in history. These earnest and devoted men, under strong discipline, as "*Conversi* or *barbati fratres*," were encouraged by the abbeys of the Middle Ages. Their labors were conducted in companies of ten each, under deans of the monastery, who were in turn instructed by wardens and superiors.

Siloam Inscription. An inscription accidently discovered in 1880 by a native pupil of Mr. Schick, a German architect, who had long settled in Jerusalem. It is chiseled in the rock that forms the southern

wall of the channel which opens out upon the ancient Pool of Siloam, and is partly concealed by the water. The present modern pool includes the older reservoir, supplied with water by an excavated tunnel, 1708 yards long, communicating with the Spring of the Virgin, which is cut through the ridge that forms the southern part of the Temple Hill. The pool is on the opposite side of the ridge, at the mouth of the Tyropœon (Cheesemakers) valley, which is now filled with rubbish, and largely built over.

The inscription is on an artificial tablet in the rock, about nineteen feet from the opening upon the pool. The first intelligible copy was made by Prof. A. H. Sayce, whose admirable little work, called *Fresh Light from the Ancient Monuments*, gives full details. Dr. Guthe, in March, 1881, made a complete *facsimile* of the six lines, which read thus:

"(Behold) the excavation! now this is the history of the excavation. While the excavators were still lifting up the pick, each towards his neighbor, and while there were yet three cubits to (excavate, there was heard) the voice of one man calling to his neighbor, for there was an excess in the rock on the right hand (and on the left). And after that on the day of excavating, the excavators had struck pick against pick, one against the other, the waters flowed from the spring to the pool for a distance of 1200 cubits. And (part) of a cubit was the height of the rock over the head of the excavators."

The engineering skill must have been considerable, as the work was tortuous, and yet the excavators met at the middle. There is no date, but the form of the letters show the age to be nearly that of the Moabite stone. Scholars place the date during the reign of Hezekiah. "He made the pool and the aqueduct, and brought the water into the city." (2 Kings xx. 20, Heb. B.). The discovery was an important one. Prof. Sayce deduces the following: "That the modern city of Jerusalem occupies very little of the same ground as the ancient one; the latter stood entirely on the rising ground to the east of the Tyropœon valley, the northern portion of which is at present occupied by the Mosque of Omar, while the southern portion is uninhabited. The Tyropœon valley itself must be the Valley of the Sons of Hinnom, where the idolaters of Jerusalem burnt their children in the fire to Moloch. It must be in the southern cliff of this valley that the tombs of the kings are situated," they being buried under the rubbish with which the valley is filled; and "among this rubbish must be the remains of the city and temple destroyed by Nebuchadnezzar. Here, as well as in the now obliterated Valley of the Cheesemakers, probably lie the relics of the dynasty of David."

Hebrew inscriptions of an early date have hitherto long been sought for in vain. Seals and fragmentary inscriptions have heretofore been discovered. Several of these seals have been found in Babylonia and Mesopotamia, and are regarded as memorials of the Jewish exiles; but the Schick discovery gives us a writing certainly as old as the time of Isaiah.

Silver and Gold. When St. Peter healed the lame man whom he met at the gate Beautiful of the Temple, he said to him, "Silver and gold have I none; but such as I have give I thee" (Acts iii. 6); and he bestowed on him the gift of health. When the pious pilgrim begged his way, through all the perils of a distant journey, to kneel at the Holy Sepulcher, in his passage through poor and inhospitable regions, a crust of bread and a draft of water were often the only alms that he received. This has been symbolized in the ritual of reception of a Knights Templar, and in it the words of St. Peter have been preserved, to be applied to the allegorical pilgrimage there represented.

Silver Cord. In the beautiful and affecting description of the body of man suffering under the infirmities of old age given in the twelfth chapter of Ecclesiastes, we find the expression "or ever the silver cord be loosed, or the golden bowl be broken, or the pitcher be broken at the fountain, or the wheel broken at the cistern: then shall the dust return to the earth as it was, and the spirit shall return to God who gave it." Dr. Clarke thus explains these beautiful metaphors. The silver cord is the spinal marrow; its loosening is the cessation of all nervous sensibility; the golden bowl is the brain, which is rendered unfit to perform its functions by the approach of death; the pitcher means the great vein which carries the blood to the right ventricle of the heart, here called the fountain; by the wheel is meant the great artery which receives the blood from the left ventricle of the heart, here designated as the cistern. This collection of metaphors is a part of the Scripture reading in the Third Degree, and forms an appropriate introduction to those sublime ceremonies whose object is to teach symbolically the resurrection and life eternal.

Simorgh. A monstrous griffin, guardian of the Persian mysteries.

Sinai. A mountain of Arabia between the horns of the Red Sea. It is the place where Moses received the Law from Jehovah, and where he was directed to construct the tabernacle. Hence, says Lenning, the Scottish Masons make Mt. Sinai a symbol of truth. Of the high degrees, the Twenty-third and Twenty-fourth of the Ancient and Accepted Rite, or the Chief and the Prince of the Tabernacle, refer in their rituals to this mountain and the Tabernacle there constructed.

Sir. This is the distinctive title given to the possessors of the degrees of Masonic knighthood, and is borrowed from the heraldic

usage. The word "knight" is sometimes interposed between the title and the personal name, as, for example, "Sir Knight John Smith." English knights are in the habit of using the word *frater*, or *brother*, a usage which to some extent is being adopted in America. English Knights Templar have been led to the abandonment of the title *Sir* because legal enactments made the use of titles not granted by the crown unlawful. But there is no such law in America. The addition of *Sir* to the names of all Knights is accounted, says Ashmole, "parcel of their style." The use of it is as old, certainly, as the time of Edward I., and it is supposed to be a contraction of the old French *Sire*, meaning *Seigneur*, or *Lord*.

Sirat, As or **Al.** See *Al-Sirat*.

Siroc. שרוך. A significant word, formerly used in the Order of High Priesthood in America. It signifies a shoe-latchet, and refers to the declaration of Abraham to Melchizedek, that of the goods which had been captured he would "not take from a thread even to a shoe-latchet" (Genesis xiv. 23), that is, nothing even of the slightest value. The introduction of this word into some of the lower capitular degrees is a recent error of ignorant ritualists.

Sister Lodges. Lodges are so called which are in the same Masonic jurisdiction, and owe obedience to the same Grand Lodge.

Sisters by Adoption. In the Lodges of the French Adoptive Rite this is the title by which the female members are designated. The female members of all androgynous degrees are sisters, as the male members are brethren.

Sisters of the Gild. The attempt of a few writers to maintain that women were admitted into the Medieval confraternities of Masons fails to be substantiated for want of sufficient proof. The entire spirit of the Old Constitutions indicates that none but men, under the titles of "brethren" and "fellows," were admitted into these Masonic gilds; and the first code of charges adopted at the revival in 1717, declares that "the persons admitted members of a Lodge must be good and true men . . . no women, etc." The opinion that women were occasionally admitted into the Masonic gild, and is asserted that they were into some of the others, is based upon the fact that, in what is called the "York MS., No. 4," whose [illegible] to the roll is 1693, we find the following words: "The one of the elders takeing the Booke, and that hee or shee that is to be made mason shall lay their hands theron, and the charge shall be given." But in the "Alnwick MS.," which is inserted as a Preface to the Records of the Lodge at Alnwick, beginning September 29, 1701, and which manuscript was therefore probably at least contemporary with that of York, we find the corresponding passage in the following words: "Then shall one of the most ancient of them all hold a book that he or they may lay his or their hands upon the said Book," etc. Again, in the "Grand Lodge, No. 1, MS.," whose date is 1583, we meet with the regulation in Latin thus: "Tunc unus ex senioribus teneat librum et ille vel illi apposuerunt manus sub librum et tunc præcepta deberent legi." This was no doubt the original form of which the writer of the York MS. gives a translation, and either through ignorance or clerical carelessness, the "ille vel illi," instead of *he or they*, has been translated *he or she*. Besides, the whole tenor of the charges in the York MS. clearly shows that they were intended for men only. A woman could scarcely have been required to swear that she "would not take her fellow's wife in villainy," nor make anyone a Mason unless "he has his right limbs as a man ought to have." It cannot be admitted on the authority of a mistranslation of a single letter, by which an *a* was taken for an *e*, thus changing *ille* into *illa*, or *he* into *she*, that the Masonic gild admitted women into a craft whose labors were to hew heavy stones and to ascend tall scaffolds. Such never could have been the case in Operative Masonry.

There is, however, abundant evidence that in the other gilds, or livery companies of England, women or sisters were admitted to the freedom of the company. Herbert (*Hist. Liv. Comp.*, xi., 83) thinks that the custom was borrowed, on the constitution of the Companies, by Edward III. from the ecclesiastical or religious gilds, which were often composed of both sexes. But there does not seem to be any evidence that the usage was extended to the building corporations or Freemasons' gilds. A woman might be a female grocer or haberdasher, but she could hardly perform the duties of a female builder.

"Sit Lux et Lux Fuit." A motto frequently used in Masonry, although sometimes written, "Lux Fiat et Lux Fit," signifying, "Let there be light, and there was light"; the strict translation from the Hebrew continues, "And the Lord took care of the light, that it was useful, and he divided the light from the darkness."

Situation of the Lodge. A Lodge is, or ought to be, always situated due east and west, for reasons which are detailed in the articles *East* and *Orientation*, which see.

Sivan. (סיון.) The ninth month of the Hebrew civil year, corresponding with the months May and June, beginning with the new moon of the former.

Six Lights. The six lights of Symbolic Masonry are divided into the *Greater* and *Lesser Lights*, which see. In the American system of the Royal Arch there is no symbol of the kind, but in the English system there are six lights—three lesser and three greater—placed in the form of two interlaced triangles. The three lesser represent the Patriarchal, Mosaic, and Christian dispensations; the three greater the Creative, Preservative, and Destructive power of God. The four lesser triangles, formed by the intersection of the two great triangles, are emblematic of the four degrees of Ancient Craft Masonry.

Six Periods. The Great Architect's Six Periods constituted a part of the old Preston-

ian lecture in the Fellow-Craft's Degree. It referred to the six days of creation, the six periods being the six days. It no longer forms a part of the lecture as modified by Hemming in England, although Oliver devotes a chapter in his *Historical Landmarks* to this subject. It was most probably at one time taught in America before Webb modified and abridged the Prestonian lectures, for Hardie gives the "Six Periods" in full in his *Monitor*, which was published in 1818. The Webb lecture, now practised in this country, comprehends the whole subject of the Six Periods, which make a closely printed page in Browne's *Master Key*, in these few words: "In six days God created the heavens and the earth, and rested upon the seventh day; the seventh, therefore, our ancient brethren consecrated as a day of rest from their labors; thereby enJoying frequent opportunities to contemplate the glorious works of creation, and to adore their great Creator."

Skeleton. A symbol of death. The ancient Egyptians often introduced a skeleton in their feasts to remind the revelers of the transitory nature of their enjoyments, and to teach them that in the midst of life we are in death. As such an admonitory symbol it is used in some of the high degrees.

Skirret. In the English system the skirret is one of the working-tools of a Master Mason. It is an implement which acts on a center-pin, whence a line is drawn, chalked, and struck to mark out the ground for the foundation of the intended structure. Symbolically, it points to us that straight and undeviating line of conduct laid down for our pursuits in the volume of the Sacred Law. The skirret is not used in the American system.

Skull. The skull as a symbol is not used in Masonry except in Masonic Templarism, where it is a symbol of mortality. Among the articles of accusation sent by the Pope to the bishops and papal commissaries upon which to examine the Knights Templar, those from the forty-second to the fifty-seventh refer to the human skull, "cranium humanum," which the Templars were accused of using in their reception, and worshiping as an idol. It is possible that the Old Templars made use of the skull in their ceremony of reception; but Modern Templars will readily acquit their predecessors of the crime of idolatry, and find in their use of a skull a symbolic design. (See *Baphomet.*)

Skull and Cross-bones. They are a symbol of mortality and death, and are so used by heralds in funeral achievements. As the means of inciting the mind to the contemplation of the most solemn subjects, the skull and cross-bones are used in the Chamber of Reflection in the French and Scottish Rites, and in all those degrees where that Chamber constitutes a part of the preliminary ceremonies of initiation.

Slander. Inwood, in his sermon on "Union Amongst Masons," says: "To defame our brother, or suffer him to be defamed, without interesting ourselves for the preservation of his name and character, there is scarcely the shadow of an excuse to be formed. Defamation is always wicked. Slander and evil speaking are the pests of civil society, are the disgrace of every degree of religious profession, are the poisonous bane of all brotherly love."

Slave. See *Free Born.*

Slip. This technical expression in American Masonry, but mostly confined to the Western States, and not generally used, is of very recent origin; and both the action and the word most probably sprang up, with a few other innovations, intended as especial methods of precaution, about the time of the anti-Masonic excitement.

Sloane Manuscripts. There are three copies of the Old Constitutions which bear this name. All of them were found in the British Museum among the heterogeneous collection of papers which were once the property of Sir Hans Sloane. The first, which is known in the Museum as No. 3848, is one of the most complete of the copies extant of the Old Constitutions. At the end of it, the date is certified by the following subscription: "Finis p. me Eduardu Sankey decimo sexto die Octobris Anno Domini 1646." It was published for the first time, from an exact transcript of the original, by Bro. Hughan in his *Old Charges of the British Freemasons*. The second Sloane MS. is known in the British Museum as No. 3323. It is in a large folio volume of three hundred and twenty-eight leaves, on the fly-leaf of which Sir Hans Sloane has written, "Loose papers of mine Concerning Curiosities." There are many Manuscripts by different hands. The Masonic one is subscribed "Hæc scripta fuerunt p. me Thomam Martin, 1659," and this fixes the date. It consists of three leaves of paper six inches by seven and a half, is written in a small, neat hand, and endorsed "Free Masonry." It was first published, in 1871, by Bro. Hughan in his *Masonic Sketches and Reprints*. The Rev. Bro. A. F. A. Woodford thinks this an "indifferent copy of the former one." But this seems unlikely. The entire omission of the "Legend of the Craft" from the time of Lamech to the building of the Temple, including the important "Legend of Euclid," all of which is given in full in the MS. No. 3848, together with a great many verbal discrepancies, and a total difference in the eighteenth charge, would lead one to suppose that the former MS. never was seen, or at least copied, by the writer of the latter. On the whole, it is, from this very omission, one of the least valuable of the copies of the Old Constitutions.

The third Sloane MS. is really one of the most interesting and valuable of those that have been heretofore discovered. A portion of it, a small portion, was inserted by Findel in his *History of Freemasonry;* but the whole has been since published in the *Voice of Masonry*, a periodical printed at Chicago in 1872. The number of the MS. in the British Museum is 3329, and Mr. Hughan places its date at

from 1640 to 1700; but he says that Messrs. Bond and Sims, of the British Museum, agree in stating that it is "probably of the beginning of the eighteenth century." But the Rev. Mr. Woodford mentions a *great authority* on MSS., who declares it to be "previous to the middle of the seventeenth century." Findel thinks it originated at the end of the seventeenth century, and "that it was found among the papers which Dr. Plot left behind him on his death, and was one of the sources whence his communications on Freemasonry were derived." It is not a copy of the Old Constitutions, in which respect it differs from all the other Manuscripts, but is a description of the ritual of the society of Free Operative Masons at the period when it was written. This it is that makes it so valuable a contribution to the history of Freemasonry, and renders it so important that its precise date should be fixed.

Smaragdine, Tablet of Hermes. The foundation of Hermetic knowledge, with an unknown author. Translated in the *Œdipus Ægyptiacus*.

Smith, George. Captain George Smith was a Mason of some distinction during the latter part of the eighteenth century. Although born in England, he at an early age entered the military service of Prussia, being connected with noble families of that kingdom. During his residence on the Continent it appears that he was initiated in one of the German Lodges. On his return to England he was appointed Inspector of the Royal Military Academy at Woolwich, and published, in 1779, a *Universal Military Dictionary*, and, in 1783, a *Bibliotheca Militaris*.

He devoted much attention to Masonic studies, and is said to have been a good workman in the Royal Military Lodge at Woolwich, of which he was for four years the Master. During his Mastership the Lodge had, on one occasion, been opened in the King's Bench prison, and some persons who were confined there were initiated. For this the Master and brethren were censured, and the Grand Lodge declared that "it is inconsistent with the principles of Masonry for any Freemason's Lodge to be held, for the purpose of making, passing, or raising Masons, in any prison or place of confinement." (*Constitutions*, 1784, p. 349.) Smith was appointed by the Duke of Manchester, in 1778, Provincial Grand Master of Kent, and on that occasion delivered his *Inaugural Charge* before the Lodge of Friendship at Dover. He also drew up a code of laws for the government of the province, which was published in 1781. In 1780 he was appointed Junior Grand Warden of the Grand Lodge; but objections having been made by Heseltine, the Grand Secretary, between whom and himself there was no very kind feeling, on the ground that no one could hold two offices in the Grand Lodge, Smith resigned at the next quarterly communication. As at the time of his appointment there was really no law forbidding the holding of two offices, its impropriety was so manifest, that the Grand Lodge adopted a regulation that "it is incompatible with the laws of this society for any brother to hold more than one office in the Grand Lodge at the same time." (*Constitutions*, 1784, p. 336.) Captain Smith, in 1783, published a work entitled *The Use and Abuse of Freemasonry: a work of the greatest utility to the Brethren of the Society, to Mankind in general, and to the Ladies in particular.* The interest to the ladies consists in some twenty pages, in which he gives the "Ancient and Modern reasons why the ladies have never been admitted into the Society of Freemasons," a section the omission of which would scarcely have diminished the value of the work or the reputation of the author.

The work of Smith would not at the present day, in the advanced progress of Masonic knowledge, enhance the reputation of its writer. But at the time when it appeared, there was a great dearth of Masonic literature —Anderson, Calcott, Hutchinson, and Preston being the only authors of any repute that had as yet written on the subject of Masonry. There was much historical information contained within its pages, and some few suggestive thoughts on the symbolism and philosophy of the Order. To the Craft of that day the book was therefore necessary and useful. Nothing, indeed, proves the necessity of such a work more than the fact that the Grand Lodge refused its sanction to the publication on the general ground of opposition to Masonic literature. Noorthouck (*Constitutions*, 1784, p. 347), in commenting on the refusal of a sanction, says:

"No particular objection being stated against the above-mentioned work, the natural conclusion is, that a sanction was refused on the general principle that, considering the flourishing state of our Lodges, where *regular* instruction and suitable exercises are ever ready for all brethren who zealously aspire to improve in masonical knowledge, new publications are unnecessary on a subject which books cannot teach. Indeed, the temptations to authorship have effected a strange revolution of sentiments since the year 1720, when even *antient* manuscripts were destroyed, to prevent their appearance in a *printed* Book of Constitutions! for the principal materials in this very work, then so much dreaded, have since been retailed in a variety of forms, to give consequence to fanciful productions that might have been safely withheld, without sensible injury, either to the Fraternity or to the literary reputation of the writers."

To dispel such darkness almost any sort of book should have been acceptable. The work was published without the sanction, and the Craft being wiser than their representatives in the Grand Lodge, the edition was speedily exhausted.

In 1785 Captain Smith was expelled from the Society for "uttering an instrument purporting to be a certificate of the Grand Lodge recommending two distressed Brethren."

Dr. Oliver (*Rev. of a Sq.*, p. 215) describes Captain Smith as a man "plain in speech and

manners, but honourable and upright in his dealings, and an active and zealous Mason." It is probable that he died about the end of the last or the beginning of the present century.

Smitten Builder. The old lectures used to say: "The veil of the Temple is rent, *the builder is smitten*, and we are raised from the tomb of transgression." Hutchinson, and after him Oliver, apply the expression, "The smitten builder," to the crucified Savior, and define it as a symbol of his Divine mediation; but the general interpretation of the symbol is, that it refers to death as the necessary precursor of immortality. In this sense, the *smitten builder* presents, like every other part of the Third Degree, the symbolic instruction of Eternal Life.

Snow, John. A distinguished lecturer on Masonry, who was principally instrumental in introducing the system of Webb, of whom he was a pupil, into the Lodges of the Western States. He was also a Grand Master of the Grand Lodge of Ohio, and was the founder and first Grand Commander of the first Grand Encampment of Knights Templar in the same State. He was born in Providence, Rhode Island, February 25, 1780; was initiated into Freemasonry in Mount Vernon Lodge, of Providence, in 1809, and died May 16, 1852, at Worthington, Ohio.

Snows. See *Rains*.

Social Character of Freemasonry. Freemasonry attracts our attention as a great SOCIAL Institution. Laying aside for the time those artificial distinctions of rank and wealth, which, however, are necessary in the world to the regular progression of society, its members meet in their Lodges on one common level of brotherhood and equality. There virtue and talent alone claim and receive preeminence, and the great object of all is to see who can best work and best agree. There friendship and fraternal affection are strenuously inculcated and assiduously cultivated, and that great mystic tie is established which peculiarly distinguishes the society. Hence is it that Washington has declared that the benevolent purpose of the Masonic Institution is to enlarge the sphere of social happiness, and its grand object to promote the happiness of the human race.

Socius. The Sixth Degree of the Order of Strict Observance.

Sodalities. Societies or companies of friends or companions assembled together for a special purpose. Such confraternities, under the name of *Sodalitia*, were established in Rome, by Cato the Censor, for the mutual protection of the members. As their proceedings were secret, they gave offense to the government, and were suppressed, 80 B.C., by a decree of the Senate, but were afterward restored by a law of Clodius.

Sofism. The Sofis were a mystical sect which greatly prevailed in Eastern countries, and especially in Persia, whose religious faith was supposed by most writers to embody the secret doctrine of Mohammedanism. Sir John Malcolm (*Hist. Pers.*, ch. xx.) says that they have among them great numbers of the wisest and ablest men of Persia and the East, and since his time the sect has greatly increased.

The name is most probably derived from the Greek *σοφία, wisdom;* and Malcolm states that they also bore the name of *philosaufs*, in which we may readily detect the word *philosophers*. He says also: "The Mohammedan Sofis have endeavored to connect their mystic faith with the doctrine of their prophet, who, they assert, was himself an accomplished *Sofi*." The principal Sofi writers are familiar with the opinions of Aristotle and Plato, and their most important works abound with quotations from the latter. Sir John Malcolm compares the school of Sofism with that of Pythagoras. It is evident that there is a great similarity between Sofism and Gnosticism, and all the features of the Sofic initiation remind us very forcibly of those of the Masonic. The object of the system is the attainment of *Truth*, and the novice is invited "to embark on the sea of doubt," that is, to commence his investigations, which are to end in its discovery.

There are four stages or degrees of initiation: the first is merely preliminary, and the initiate is required to observe the ordinary rites and ceremonies of religion for the sake of the vulgar, who do not understand their esoteric meaning. In the Second Degree he is said to enter the pale of Sofism, and exchanges these external rites for a spiritual worship. The Third Degree is that of *Wisdom*, and he who reaches it is supposed to have attained supernatural knowledge, and to be equal to the angels. The Fourth and last degree is called *Truth*, for he has now reached it, and has become completely united with Deity. They have, says Malcolm, secrets and mysteries in every stage or degree which are never revealed to the profane, and to reveal which would be a crime of the deepest turpitude. The tenets of the sect, so far as they are made known to the world, are, according to Sir William Jones (*Asiat. Researches*, ii., 62), "that nothing exists absolutely but God; that the human soul is an emanation of his essence, and, though divided for a time from its heavenly source, will be finally reunited with it; that the highest possible happiness will arise from its reunion; and that the chief good of mankind in this transitory world consists in as perfect a union with the Eternal Spirit as the incumbrances of a mortal frame will allow." It is evident that an investigation of the true system of these Eastern mysteries must be an interesting subject of inquiry to the student of Freemasonry; for Higgins is hardly too enthusiastic in supposing them to be the ancient Freemasons of Mohammedanism. His views are thus expressed in the second volume of his *Anacalypsis*, p. 301: a wonderful work—wonderful for the vast and varied learning that it exhibits; but still more so for the bold and strange theories which, however untenable, are defended with all the powers of a more than ordinary intellect.

"The circumstances," he says, "of the gradation of ranks, the initiation, and the head of the Order in Persia being called Grand Master, raise a presumption that the Sofis were, in reality, the Order of Masons."

Without subscribing at once to the theory of Higgins, we may well be surprised at the coincidences existing between the customs and the dogmas of the Sofis and those of the Freemasons, and we would naturally be curious to investigate the causes of the close communication which existed at various times during the Crusades between this Mohammedan sect of philosophers and the Christian Order of Templars.

Mr. C. W. King, in his learned treatise on the Gnostics, seems to entertain a similar idea of this connection between the Templars and the Sofis. He says that, "inasmuch as these *Sofis* were composed exclusively of the learned amongst the Persians and Syrians, and learning at that time meant little more than a proficiency in medicine and astrology, the two points that brought the Eastern sages into amicable contact with their barbarous invaders from the West, it is easy to see how the latter may have imbibed the secret doctrines simultaneously with the science of those who were their instructors in all matters pertaining to science and art. The Sofi doctrine involved the grand idea of one universal creed, which could be secretly held under any profession of an outward faith: and in fact took virtually the same view of religious systems as that in which the ancient philosophers had regarded such matters."

Softas. Students in the universities of Islam.

So Help Me God. The usual obsecration or imprecation affixed in modern times to oaths, and meaning, "May God so help me as I keep this vow."

Sojourner. See *Principal Sojourner*.

Soldiers of Christ. *Milites Christi* is the title by which St. Bernard addressed his exhortations to the Knights Templar. They are also called in some of the old documents, "*Militia Templi Salomonis*," The Chivalry of the Temple of Solomon; but their ancient statutes were entitled "*Regula pauperum commilitonum Templi Salomonis*," The Rule of the poor fellow-soldiers of the Temple of Solomon; and this is the title by which they are now most generally designated.

Soli Sanctissimo Sacrum. ("Sacred to the most holy Sun.") Mentioned in the Twenty-eighth Degree, A. A. Scottish Rite.

Solomon. In writing the life of King Solomon from a Masonic point of view, it is impossible to omit a reference to the legends which have been preserved in the Masonic system. But the writer, who, with this preliminary notice, embodies them in his sketch of the career of the wise King of Israel, is by no means to be held responsible for a belief in their authenticity. It is the business of the Masonic biographer to relate all that has been handed down by tradition in connection with the life of Solomon; it will be the duty of the severer critic to seek to separate out of all these materials that which is historical from that which is merely mythical, and to assign to the former all that is valuable as fact, and to the latter all that is equally valuable as symbolism.

Solomon, the King of Israel, the son of David and Bathsheba, ascended the throne of his kingdom 2989 years after the creation of the world, and 1015 years before the Christian era. He was then only twenty years of age, but the youthful monarch is said to have commenced his reign with the decision of a legal question of some difficulty, in which he exhibited the first promise of that wise judgment for which he was ever afterward distinguished.

One of the great objects of Solomon's life, and the one which most intimately connects him with the history of the Masonic institution, was the erection of a temple to Jehovah. This, too, had been a favorite design of his father David. For this purpose, that monarch, long before his death, had numbered the workmen whom he found in his kingdom; had appointed the overseers of the work, the hewers of stones, and the bearers of burdens; had prepared a great quantity of brass, iron, and cedar; and had amassed an immense treasure with which to support the enterprise. But on consulting with the prophet Nathan, he learned from that holy man, that although the pious intention was pleasing to God, yet that he would not be permitted to carry it into execution, and the Divine prohibition was proclaimed in these emphatic words: "Thou hast shed blood abundantly, and hast made great wars; thou shalt not build a house unto my name, because thou hast shed much blood upon the earth in my sight." The task was, therefore, reserved for the more peaceful Solomon, his son and successor.

Hence, when David was about to die, he charged Solomon to build the Temple of God as soon as he should have received the kingdom. He also gave him directions in relation to the construction of the edifice, and put into his possession the money, amounting to ten thousand talents of gold and ten times that amount of silver, which he had collected and laid aside for defraying the expense.

Solomon had scarcely ascended the throne of Israel, when he prepared to carry into execution the pious designs of his predecessor. For this purpose, however, he found it necessary to seek the assistance of Hiram, King of Tyre, the ancient friend and ally of his father. The Tyrians and Sidonians, the subjects of Hiram, had long been distinguished for their great architectural skill; and, in fact, many of them, as the members of a mystic operative society, the fraternity of Dionysian artificers, had long monopolized the profession of building in Asia Minor. The Jews, on the contrary, were rather more eminent for their military valor than for their knowledge of the arts of peace, and hence King Solomon at once conceived the necessity of invoking the aid of these foreign architects, if he expected to

complete the edifice he was about to erect, either in a reasonable time or with the splendor and magnificence appropriate to the sacred object for which it was intended. For this purpose he addressed the following letter to King Hiram:

"Know thou that my father would have built a temple to God, but was hindered by wars and continual expeditions, for he did not leave off to overthrow his enemies till he made them all subject to tribute. But I give thanks to God for the peace I, at present, enjoy, and on that account I am at leisure, and design to build a house to God, for God foretold to my father, that such a house should be built by me; wherefore I desire thee to send some of thy subjects with mine to Mount Lebanon, to cut down timber, for the Sidonians are more skilful than our people in cutting of wood. As for wages to the hewers of wood, I will pay whatever price thou shalt determine."

Hiram, mindful of the former amity and alliance that had existed between himself and David, was disposed to extend the friendship he had felt for the father to the son, and replied, therefore, to the letter of Solomon in the following epistle:

"It is fit to bless God that he hath committed thy father's government to thee, who art a wise man endowed with all virtues. As for myself, I rejoice at the condition thou art in, and will be subservient to thee in all that thou sendest to me about; for when, by my subjects, I have cut down many and large trees of cedar and cypress wood, I will send them to sea, and will order my subjects to make floats of them, and to sail to what places soever of thy country thou shalt desire, and leave them there, after which thy subjects may carry them to Jerusalem. But do thou take care to procure us corn for this timber, which we stand in need of, because we inhabit in an island."

Hiram lost no time in fulfilling the promise of assistance which he had thus given; and accordingly we are informed that Solomon received thirty-three thousand six hundred workmen from Tyre, besides a sufficient quantity of timber and stone to construct the edifice which he was about to erect. Hiram sent him, also, a far more important gift than either men or materials, in the person of an able architect, "a curious and cunning workman," whose skill and experience were to be exercised in superintending the labors of the craft, and in adorning and beautifying the building. Of this personage, whose name was also Hiram, and who plays so important a part in the history of Freemasonry, an account will be found in the article *Hiram Abif*, to which the reader is referred.

King Solomon commenced the erection of the Temple on Monday, the second day of the Hebrew month Zif, which answers to the twenty-first of April, in the year of the world 2992, and 1012 years before the Christian era. Advised in all the details, as Masonic tradition informs us, by the wise and prudent counsels of Hiram, King of Tyre, and Hiram Abif, who, with himself, constituted at that time the three Grand Masters of the Craft, Solomon made every arrangement in the disposition and government of the workmen, in the payment of their wages, and in the maintenance of concord and harmony which should insure despatch in the execution and success in the result.

To Hiram Abif was entrusted the general superintendence of the building, while subordinate stations were assigned to other eminent artists, whose names and offices have been handed down in the traditions of the Order.

In short, the utmost perfection of human wisdom was displayed by this enlightened monarch in the disposition of everything that related to the construction of the stupendous edifice. Men of the most comprehensive minds, imbued with the greatest share of zeal and fervency, and inspired with the strongest fidelity to his interests, were employed as masters to instruct and superintend the workmen; while those who labored in inferior stations were excited to enthusiasm by the promise of promotion and reward.

The Temple was at length finished in the month Bul, answering to our November, in the year of the world 3000, being a little more than seven years from its commencement.

As soon as the magnificent edifice was completed, and fit for the sacred purposes for which it was intended, King Solomon determined to celebrate the consummation of his labors in the most solemn manner. For this purpose he directed the ark to be brought from the king's house, where it had been placed by King David, and to be deposited with impressive ceremonies in the holy of holies, beneath the expanded wings of the cherubim. This important event is commemorated in the beautiful ritual of the Most Excellent Master's Degree.

Our traditions inform us, that when the Temple was completed, Solomon assembled all the heads of the tribes, the elders and chiefs of Israel to bring the ark up out of Zion, where King David had deposited it in a tabernacle until a more fitting place should have been built for its reception. This duty, therefore, the Levites now performed, and delivered the ark of the covenant into the hands of the priests, who fixed it in its place in the center of the holy of holies.

Here the immediate and personal connection of King Solomon with the Craft begins to draw to a conclusion. It is true, that he subsequently employed those worthy Masons, whom the traditions say, at the completion and dedication of the Temple, he had received and acknowledged as Most Excellent Masters, in the erection of a magnificent palace and other edifices, but in process of time he fell into the most grievous errors; abandoned the path of truth; encouraged the idolatrous rites of Spurious Masonry; and, induced by the persuasions of those foreign wives and concubines whom he had espoused in his later days, he erected a fane for the celebration of these

heathen mysteries, on one of the hills that overlooked the very spot where, in his youth, he had consecrated a temple to the one true God. It is however believed that before his death he deeply repented of this temporary aberration from virtue, and in the emphatic expression, "Vanity of vanities! all is vanity," he is supposed to have acknowledged that in his own experience he had discovered that falsehood and sensuality, however they may give pleasure for a season, will, in the end, produce the bitter fruits of remorse and sorrow.

That King Solomon was the wisest monarch that swayed the scepter of Israel, has been the unanimous opinion of posterity. So much was he beyond the age in which he flourished, in the attainments of science, that the Jewish and Arabic writers have attributed to him a thorough knowledge of the secrets of magic, by whose incantations they suppose him to have been capable of calling spirits and demons to his assistance; and the Talmudists and Mohammedan doctors record many fanciful legends of his exploits in controlling these ministers of darkness. As a naturalist, he is said to have written a work on animals of no ordinary character, which has however perished; while his qualifications as a poet were demonstrated by more than a thousand poems which he composed, of which his epithalamium on his marriage with an Egyptian princess and the Book of Ecclesiastes alone remain. He has given us in his Proverbs an opportunity of forming a favorable opinion of his pretensions to the character of a deep and right-thinking philosopher; while the long peace and prosperous condition of his empire for the greater portion of his reign, the increase of his kingdom in wealth and refinement, and the encouragement which he gave to architecture, the mechanic arts, and commerce, testify his profound abilities as a sovereign and statesman.

After a reign of forty years he died, and with him expired forever the glory and the power of the Hebrew empire.
